So you would think America, during this period of the stunning collapse of Enron, would have learned an important lesson, and that certain Members of this Congress who are trying to tinker around with Social Security would have learned an important lesson, and that is that the vagaries of the market and the private sector's penchant for gambling with other people's money is no substitute, can never be a substitute, for the rock-solid guarantee of Social Security, an insurance program and a disability program. Any one of us, any one of our family members, can be struck by a disability. Social Security is the social safety net for this country.

Yet what we see in the Bush administration's proposal in the wake of Enron is not retirement security, but retirement insecurity. In fact, the lockbox that the gentleman from North Carolina (Mr. ETHERIDGE) referenced, where we all promised we would not touch the Social Security trust fund, in that in fact that trust fund would be there to pay dollars, the billions of dollars to our seniors across this country this year, next year, and as the baby boom generation retires, what the Bush administration is actually doing is taking these dollars and giving them away; and it is giving them away by the billions.

How is that actually happening? It is happening because this trust fund is being borrowed from now to pay tax rebates to some of the wealthiest and most profitable corporations in our country, not just this year, but over the next 10 years.

If you think about who is getting the benefit, let us take a look at Enron. If you look at the tax proposals that were passed here in this House, which I did not support, what they essentially meant was that we are taking money from the trust fund, and we are giving it to companies like Enron.

Enron, unless we stop it, is going to be getting rebates, rebates that basically are transfers from the trust fund which are the accumulated savings of the American people, taken out of every worker's check, and put there for their parents or grandparents. Those dollars are being transferred, not by the thousands, not even by the millions, but by the billions, which is the amount that is in the trust fund; and if you take Enron, for example, just in the years we are serving here, the first 3 years they probably will get $350 million in rebates.

Guess where that comes from? It comes from the one source of accumulated savings that the American people have, and that is the Social Security trust fund. So my aunt in Toledo and maybe your grandmother in Chicago, those savings that are there are being transferred because of consolidated accounting.

The Republican Party has invaded the lockbox that we promised would be there in perpetuity. Overall, the numbers show that the Congressional Budget Office projected a 10-year non-Social Security surplus of $3.1 trillion; and now, just 1 year later, that projection has plunged to a deficit of $742 billion, almost $1 trillion. So the surplus that had existed technically in the annual budgets has been turned almost overnight into a deficit, and the borrowing is continuing from the Social Security trust fund.

Now, Enron just does not get a little bit. I mean, $350 million in rebates, that is one-third of $1 billion. None of my relatives can even imagine how much money that really is. But that is what is going on here. And if there is any program that has marked the Democratic Party, and in fact it is one of the reasons I am a Democrat, is because of this Social Security program. It meant the difference for our grandmother between the poor house and being able to live out her final years in dignity. It was very meager, but at least it was something. It was something. To see this program violated for the likes of a chief executive officer like Ken Lay is absolutely abhorrent to me.

If I look at other corporations that are benefiting and the money coming out of the Social Security trust fund and going to them, we can look at General Electric, because General Electric is one of the companies that is not just going to get millions. Enron is going to get millions; General Electric is going to get billions out of the Social Security trust fund.

With the changes in the alternative minimum tax, it means that all of these little tax breaks and loopholes that the very well-paid accountants from companies like Arthur Andersen can find for these large corporations, they are going to get rebates through the Social Security trust fund, which sounds incredible because we were supposed to have put it in a lockbox and not touched it, and yet it is being drawn down to give money back to really the wealthiest people in our country and the wealthiest interests.

□ 1600

And they are not having trouble. These companies like General Electric, they are not going bankrupt. Now, Enron went bankrupt because of wrongdoing, criminal wrongdoing, it appears. And many of these other corporations, take Chevron, take Texaco, we are not talking about pennies, we are talking about hundreds of millions of dollars. The Social Security Trust Fund is being invaded to give nearly $200 million to Texaco, three-quarters of a billion dollars to Chevron. Think about that. Think about the transfer of wealth that is occurring.

So some people are saying, well, let a senior family or someone who is going to be of retirement age someday, let them put money aside. We just have to encourage responsibility in the American people. How do we do that on minimum wage? How do we do that when we do not earn a minimum wage? How do we do that when we have no health benefits?

Yesterday I sat in the Committee on Veterans Affairs thinking about this Special Order tonight and the fact that we were taking money out of Social Security Trust Fund to give it to some of the wealthiest corporations in the country, and we have a proposal from the Bush administration to charge veterans for prescription drugs. Now, we have always had a $2 copayment for various prescriptions, and many of our veterans average 10 prescriptions per month. What the Bush administration is doing is raising that copayment to $7 per prescription which, per month, would be $70, with a cap annually of over $850 for prescription drugs for veterans.

I am sitting there and thinking, well, is this not interesting. We hear all of these patriotic speeches on behalf of our military; and yet, when it comes to serving those who have put their life on the line, then, as they are very elderly and unable to fend for themselves, they say, now you have to pay additional money for prescription drugs. Is that what Lincoln had in mind when he said we would care for the veteran, his widow, his orphan? Is that the promise? Was it a false promise that was made?

So what we see happening is, why are we charging for prescription drugs for veterans, for those who have created and preserved the freedom that we have here in this country? Why are we charging them? Because we have to borrow. We have to take the money that should be placed into paying for those pharmaceuticals for those who have served our Nation. We are giving it away. We are giving it away to Enron in rebates, we are giving it away to General Motors in rebates, we are giving it away to Chevron in rebates, we are giving it away to IBM in rebates. That is where the money is going.

So I want to say to the gentleman from Oklahoma (Mr. CARSON), I am really very pleased that he has taken the leadership in pulling this together today, because this truly is; this is not a tangential issue for the Democratic Party, this is the core of the Democratic Party.

I was here in 1983 when we saved Social Security. It was the key issue in the election of 1992, along with the recession. We were able to reconstitute a healthy Social Security Trust Fund which served us well into this millennium. I am certainly one Member that will do nothing to weaken the system.

Mr. Speaker, I am proud to be a Democrat. I am proud to be holding the Social Security Trust Fund in our hands, and we literally do, and preserving it for the American people for this generation and generations to come.

I thank the gentleman again for giving this time this evening and urge him on in his efforts to inform the American public and to re-create that lockbox permanently.

Mr. CARSON of Oklahoma. Mr. Speaker, I would like to thank the gentlewoman from Ohio for her comments today. She is quite right in saying that, if the American public is wise, the upcoming election will be about this important issue, the most successful social program the United States has ever had. A social program that once, in 1935 when seniors were the poorest group in America, has lifted them out of poverty, so that those people in retirement no longer have to worry about making basic ends meet. Indeed, the election and this entire debate about the future of Social Security is between those people who would preserve this important program and those people who, in the name of reform, seek to dismantle it.

It is so important that people watching this today and those people who are across America and are going to be casting their ballots recognize the importance of Social Security. It is not as a 401(k) program is, it is not as a pension program is at a private business. Those programs are important; and I in Congress, along with my colleagues, have voted to make those more accessible to our retirees. We should encourage people to invest and to save on their own. But the genius of Social Security has been always that it is a program below which we allowed no one to fall, a safety net, below which no one was allowed to fall. We can make good on the promise of retirement and the harvest of a bountiful life.

SOCIAL SECURITY: AMERICA'S MOST IMPORTANT GOVERNMENT PROGRAM

The SPEAKER pro tempore (Mr. CRENSHAW). Under the Speaker's announced policy of January 3, 2001, the gentleman from South Carolina (Mr. DEMINT) is recognized for 60 minutes as the designee of the majority leader.

Mr. DEMINT. Mr. Speaker, I appreciate being here today to continue the discussion on this important issue, the issue of retirement security for America's seniors.

There has been a lot of discussion about the need to have an honest debate. I think that is very important. But we cannot have an honest debate when we have one side who is just criticizing with no plan, and our side who has been working diligently to develop a plan to guarantee benefits for today's seniors as well as to improve the Social Security system and guarantee even higher benefits for the next generation.

It is important that we recognize that Social Security is America's most important government program. It is a sacred promise to the American people. It is a Social Security contract that we cannot ignore.

Social Security is a plan that Republicans believe in, and we think that it cannot only make Americans free and secure, but it can secure our future indefinitely if we plan correctly. But we cannot have an honest debate, again, with a side that is full of critics, but no plans.

The Democrats at this point have put forward no plan to improve and save Social Security in the future. This is something we must challenge every day.

About two-thirds of retired Americans get their primary source of income from Social Security. It is too important to leave to chance. So our purpose here today is to talk about Social Security as it is and how it needs to be, how we can guarantee the benefits for today's seniors and improve the program for tomorrow.

In order for that to happen, there has to be more truth about the current Social Security program. It will not do to give a lot of statistics and a lot of misrepresentations.

We just heard the gentlewoman speaking of money coming out of the trust fund to go to corporations. This simply is not true. We want to refute these things today and tell Americans the truth about Social Security.

The first thing we need to do before we begin the debate is to stop this shameful frightening of senior citizens. The gentleman from Missouri (Mr. GEPHARDT) was on the floor last night and talked about a secret plan to reduce benefits after the election. They say we do not need to issue a written guarantee to seniors. We must issue a written guarantee if the other side continues to say that this plan is in jeopardy, that their benefits are in jeopardy. One moment they are saying it is a rock-solid investment; the next moment they are saying that someone is going to take it away from seniors.

We have a plan to tell every senior citizen in writing that their benefits are guaranteed. The current Social Security program will meet the promised benefits of today's senior citizens. They do not need to worry that any reform plan will change that. The President has said that he will consider no plan that reduces benefits for current seniors or those near retirement. The plans introduced by Republicans, none of them reduce benefits for seniors. The plan that the Democratic side has, which is no plan, means that we will continue with the program that we know is going bankrupt.

We need to tell people the truth. The first part of that truth is to reassure our seniors that no one will reduce their benefits.

The next thing we need to do is to clarify for today's workers the true nature of this Social Security system. The other side has just suggested that it is the only accumulated savings program for many Americans. Yes, it is the only savings program for many Americans. The problem is that, even though over 12 percent of everything workers make goes into Social Security for their retirement, not one penny of that is saved for their retirement. All of that money is spent on current retirees, paying down debt, or other government programs. The current Social Security system is not set up in a way that allows it to accumulate savings.

So, again, we work all of our lives. Many Americans, 20 percent, who do not live over 65, lose everything they put into Social Security, because there is no accumulated savings.

We need to guarantee benefits to today's seniors, but for today's workers, we need to tell the Social Security Administration something very simple and something Americans already think that we are doing for them. We tell the Social Security Administration to start saving some of the money that workers are putting into the Social Security program. We do not need to privatize anything. The same Social Security system, the same structure, the same payroll withholding, can continue just as it is. The only difference is is we begin to save some of that money for the future retirement of today's workers. We can do that without compromising in any way the security and benefits of today's seniors.

There are several reform plans on the Republican side, and I want to talk about one today that the gentleman from Texas (Mr. ARMEY) and myself have introduced here in the House. This is a plan that answers many of the questions that were posed by the other side, who has no plan. This plan is called the Social Security Ownership and Guarantee Plan.

Let us talk about the words "ownership" and "guarantee." Today's Social Security program, while it may be the only savings program for most Americans, saves no money for seniors. We need to start saving and allow individuals to own their Social Security retirement account. At the same time, we need to tell every American that no American will ever receive less from Social Security under the DeMint-Armey plan than they would have received under the existing plan. They have a choice not to leave the current plan at all. So they can stay where they are, or they can begin to save some of the money that is coming out of their paycheck for their retirement.

What will happen over the next 20, 30, 40 years is my children and folks in their 20s and 30s will begin to accumulate large sums of money in a personal Social Security account that guarantees them that they will have at least as good or better benefits than the current system. So instead of retiring after a whole life of putting money into Social Security, under the DeMint-Armey plan, Americans will retire with hundreds of thousands of dollars in a Social Security savings account that is theirs. It can be turned into a monthly income and can be used to pass on to their children and grandchildren.

We need to recognize that for many poor working Americans the only opportunity for them to leave something to the next generation is from Social Security, and the way Social Security is set up today, all of one's benefits die with them. They have no opportunity to pass along anything that one puts into Social Security.

The DeMint-Armey plan allows individuals to save, to invest in safe investments, in government bonds, and to have the money they need for retirement and money to pass on to the next generation.

Perhaps even more importantly, the DeMint-Armey plan recognizes that we need to set aside even more of the income for the working poor so that they will have enough when they retire to have their own income as well as money to leave. The DeMint-Armey plan allows folks at the lower income level to keep a larger part of their payroll withholding. They do not take out any more taxes. The taxes stay exactly the same. But they put up to 8 percent of their total salary into the savings account so that, when they retire, they will have something of their own.

This is a plan that helps the poor, it helps seniors, it helps America. Because what changes with this DeMint-Armey plan is, when the next generation arrives at retirement, they are no longer dependent on the government for their income.

☐ 1615

They do not have to listen every election that somebody is going to take their income from them, or there is some secret plan to reduce benefits. They will have their own retirement account, their own retirement income. Many Americans will be wealthy from the Social Security system.

There are a lot of folks trying to frighten us today, to say if this money is saved that somehow they will not be as secure. We need to remind Americans that if they have no savings and they are totally dependent on politicians to give them a retirement income, they are not secure at all. In fact, they will continue to be frightened and manipulated, like we have heard today.

It is critically important that we talk about the truth, that we debate real plans for Social Security reform, and that we do not continue the charade of the other side that nothing is wrong and nothing has to be changed. If we do not change Social Security, within 30 years benefits will be cut nearly 30 percent. Those cuts will continue, along with increases in payroll taxes over the years. That will happen in about 2038.

Social Security is a promise of the future. This is not a problem that we cannot solve. In fact, it is an incredible opportunity for us as a Congress to reshape the Social Security program in a way that makes people not only secure but makes them free and independent in retirement. It gives the poor an opportunity to save and pass along wealth to the next generation. This is the opportunity that we need to give to the American people during the debate on Social Security.

Mr. Speaker, I yield to the gentleman from Indiana (Mr. PENCE).

Mr. PENCE. Mr. Speaker, I thank the gentleman, not only for yielding to me, but for his leadership on the issue of Social Security reform in this Congress.

Mr. Speaker, this Congress has a responsibility to inform the American people that Social Security faces serious financial problems in the not-too-distant future. We cannot afford to sit idly by while our Social Security system continues to mirror corporations that have become insolvent, like ones that have made their way onto the front pages of America's newspapers.

At present today, there are four workers supporting every one beneficiary on Social Security. By the year 2020, that ratio will dwindle to two workers for every one beneficiary. Americans will either have to endure enormous payroll tax increases or support systemic reform.

I am here today, along with the gentleman from South Carolina (Mr. DEMINT) and other colleagues, to stand in support of systemic and visionary reform that even includes the idea of personal retirement accounts. Mr. Speaker, the personal accounts proposals that are being debated in Congress today are completely voluntary, and, I would offer and emphasize, completely safe. Investments would be made in highly diversified companies plus government and corporate bonds, a popular pension plan among many Members of Congress.

If it is an option for those of us in this Chamber, it should certainly be an option for American taxpayers. Let us give workers real ownership of their Social Security by making it free from the influence and political control of Congress.

But Mr. Speaker, let us move on to some of the myths from the left that are hovering above our Social Security system today, and it makes this Special Order and this time on the House floor so urgent and so important as a beginning in this debate.

Myth number one: the President's budget raids Social Security. I offer that this is absolutely false. The President has proposed a budget well suited to this unique moment in American history when our country is at war, our homeland and our citizens have been attacked, and our economy is weak. This budget is an appropriate blueprint to craft our response to the challenges before us. In fact, Mr. Speaker, the Social Security trust fund continues to grow under the President's budget. It provides for every penny of current law benefits and full cost-of-living adjustments.

Myth number two: last year's tax cuts in some way threatened Social Security. Again, Mr. Speaker, this is entirely false. Last year's tax cuts have not affected the Federal Government's ability to pay benefits, and the trust fund remains unchanged.

Some of those in this debate can and will continue to point to tax cuts as a threat to Social Security, but the truth lies in the simple demographics of an aging population. Eliminating tax cuts will not improve worker-retiree ratios. It will not encourage seniors to delay retirement. It will not encourage workers to save more for their own retirement.

Myth number three: Social Security reform will somehow erode the trust fund. In fact, that, again, Mr. Speaker, is false. Research indicates that the creation of the proposals for personal retirement accounts actually increase benefits for retirees well above what the current Social Security system could ever imagine to pay. Without these accounts, today's workers could face as much as a 30 percent cut in benefits when they retire.

The research is accurate, and the myths have been dispelled. We as a body must now move in the direction of offering a plan; and the Republicans, Mr. Speaker, have a plan. We will save Social Security from its bankruptcy and the course upon which it is headed in the next 20 years while guaranteeing that current retirees receive their promised benefits.

Let me say again, Mr. Speaker, I think it is absolutely imperative, and I extol the leadership of the gentleman from South Carolina (Mr. DEMINT) and others in this Chamber who have said we as leaders in this country in both political parties should make an affirmative statement to the American people that we will meet our obligations in the Social Security system; that what people expect to receive from Social Security in income and in benefits they will receive, and no less. I believe the time has come for us to make this imperative statement clear to the American people, and perhaps this Congress will do so this year.

This leadership and this majority will ensure that workers are allowed to earn higher benefits than under current law, as we have before. We will give workers ultimately real ownership of Social Security when reform finally arrives. We will enable younger workers to build wealth through voluntary participation in their own personally owned accounts that they can pass along to their heirs. We will preserve the important disability and survivors components of the program. We will reduce the financial burden on children and grandchildren. We will improve the rate of return for all beneficiaries.

Mr. Speaker, the Good Book tells us that if anyone does not provide for his relatives, and especially for his immediate family, he has denied the faith and is worse than an unbeliever. I submit today that we must, in this country, make it more possible for more Americans to not only provide for themselves but to provide for their families.

We do that through strengthening Social Security today. We do that through strengthening the people's confidence in the commitments that this government has made to Social Security, that we will meet those commitments, that income and benefits from Social Security will remain firm, and we will also keep the promise of Social Security alive, Mr. Speaker, by being a reform Congress; by recognizing that if we simply allow Social Security to continue along its way, that it is headed for the shoals.

But if we will step in with the leadership that the gentleman from South Carolina (Mr. DEMINT) has provided in this Congress, that our majority leader continues to provide, and that other visionary leaders in this Congress have offered in this area, I am altogether confident that there will be one bright, shining day when we will have a Social Security system in America that builds wealth rather than dependency; a Social Security system in America that engenders confidence about those retirement years for all Americans; a bright, shining future when some day, Mr. Speaker, perhaps Americans would not look longingly to the Capitol dome hoping that their retirement security would be in place, but rather, they could look to themselves. They could look to their own retirement accounts. They could look to a system, and they could look to statements with their own resources, and be confident on their future because of the resources that they have placed in that trust.

It is a vision, it is a long-term vision; but it begins, I submit today, as the gentleman from South Carolina (Mr. DEMINT) has laid out so eloquently, it begins with a promise. It begins with strengthening the commitment that this Congress has to maintaining the income and benefits of Social Security at the level of expectation that Americans have today.

Once we reiterate this Congress's and this government's commitment to Social Security, once we have laid the foundation of confidence with the American people, then we will lead with reform that will ensure not only Social Security for our parents but also for our peers and for their children and for our grandchildren for years to come through much-needed reforms.

Mr. DEMINT. Mr. Speaker, I thank the gentleman. It is so refreshing to hear someone dispel the myths; to talk about the need to guarantee benefits, to talk about real ideas that cannot only guarantee the benefits for today's seniors, but to guarantee that no American will ever receive less from Social Security than is promised by the current system.

This is leadership, and I want to thank the gentleman from Indiana (Mr. PENCE) for being here today and helping us dispel the myths. We no longer need to listen to the fear tactics, to the manipulation.

Surely the other side does not want us to issue a guarantee because they do not want seniors to know that their benefits are safe, because in the upcoming election, Mr. Speaker, they want to run these ads that tell the seniors that someone is going to take their Social Security from them.

I can guarantee today's seniors that as long as President Bush is in the White House and the Republicans are leading the Congress, that no American will ever receive less from Social Security than is promised by the current system.

Mr. Speaker, I yield to the gentleman from Michigan (Mr. SMITH).

Mr. SMITH of Michigan. Mr. Speaker, I thank the gentleman for yielding to me, and I thank him for doing this Special Order.

If we can convey one message, it is that Social Security has real problems. I think the temptation in a political election year is for anyone that comes up with suggestions on how to solve Social Security, how to keep it solvent, to criticize them, to maybe win some points from seniors by scaring seniors that their retirement benefits might be in jeopardy with any change.

Mr. Speaker, I have a couple of charts. This chart represents the complications of the increased cost of Medicaid, Medicare, and Social Security. So as we see, the percentage of the total gross economy of the country, which is now around 7 percent, is going to go to about 15 percent in terms of the cost of these particular programs. Trillions of dollars does not have a great deal of meaning for most Americans, and probably not for most Members of Congress; but the unfunded liability of Social Security right now in today's dollars is $9 trillion. That means we would have to take $9 trillion, put it in a bank account with a return of approximately 4 percent to accommodate the money that we are going to need over and above the FICA tax, the money coming in, the Social Security tax, to pay Social Security taxes in the future. That is if we do nothing.

So if there is one message that the gentleman has been so successful in conveying, and many of us have tried to pitch in, it is the fact that the cost of doing nothing is so much greater than trying to reform the program and get a better return on some of those dollars. This just represents the portion of Social Security as it consumes the current budget. So it is one of the biggest expenditures; 21 percent of everything that government spends is now spent on Social Security.

Here is the danger. The danger is not doing anything, and we will wait until the last minute and then increase taxes and reduce benefits. That is what this country has done several times since 1934, because this Congress, in very emotional, vulnerable areas such as Social Security, waits until the last minute. They wait until it is almost a catastrophe, running out of money, and then they do something. Here is the something that they have been doing is raising taxes.

□ 1630

On this chart you see in 1940 the rate was 2 percent on the first $3,000; and the maximum tax was, of course, $60 a year. By 1960 they raised the rate again to 6 percent on the first $4,800. In 1980 they raised it to 10.16 percent on the first $25,900; and in 2000 it is 12.4 percent. In 2000 it was on a base rate of 76,200. Today it is 86,000. So it is 12.4 percent of the 86,000. So as the number of workers has declined in relation or in the ratio to the number of seniors, then you charge those existing workers more and more.

So we have got that kind of demography facing this country. In 1940 there were about 40 workers for every one retiree. Today there are three workers for every one retiree. And they expect in the next 25 to 30 years it will be two workers for every one retiree. The tremendous burden on those two workers. And what we are suggesting now, nobody is suggesting privatization, privatization is a word that the demagoguers use to try to scare people.

Every plan that I have seen by every Republican, including some of those that are joined in by Democrats, have a Social Security program that gives the protection of benefits to current and future retirees. The challenge is can we get a little better return than no return at all on the money. Right now, with a little extra surplus coming from the Social Security tax, it is put into government bonds; and when interest accrues, another IOU is written but there is no real money. So in 2016 when the revenues coming in from Social Security tax are less than what is sent out to pay benefits, look, everybody needs to know there is no account with your individual name on it as an American worker that gives you any entitlement to Social Security benefits; and that should be obvious over the past years when we have simply increased taxes and reduced benefits.

If we can get some of that in individual workers' names and limit it to certain kinds of indexed accounts, that is what the gentleman from South Carolina (Mr. DEMINT) does in his bill, that is what I do in my bill, then you own it. If you die before you are 65, then it goes into your estate because it is your money. Right now if you die before you are 65, you get $225-or-something death benefits.

Can we get a better return on the money? And how dangerous is it to keep putting this bill off? I chaired the bipartisan Social Security Task Force last session, and I introduced four Social Security bills since I came here in 1993 that were to keep Social Security solvent. Every term, every session over the last 9 years that I have introduced a bill, it had to be a little more drastic. And if we continue putting this off, then it is going to be that much more drastic later on.

It is going to cost a lot of money to pay benefits. We are going to pay benefits. The question is can we save almost 20 percent of the cost by changing the programs now and getting some real return on that investment.

Mr. DEMINT. Mr. Speaker, I thank the gentleman for taking the time to understand the problems with the Social Security system and to tell the truth about it. But even more importantly, for taking the time to develop a plan to make Social Security better in the future. That is what has been missing in this debate, truth about the current program and a plan to make Social Security better in the future and to guarantee the benefits. That is what we need to bring to this honest debate that has been requested by the gentleman from Missouri (Mr. GEPHARDT) is a plan in truth.

Again, I want to thank the gentleman. I want to thank the Speaker. I want to thank everyone here for recognizing the importance of the Social Security program, but to also recognize that it is Republicans that have a plan to guarantee the future of Social Security. Our head is not in the sand as the other side's is. We are not denying that there is a problem.

We are recognizing the problem, but we are developing plans to guarantee that no American will ever receive less from Social Security than is promised by the current program. And we want to put that in writing, and we want it put it down in a plan that will last.

Mr. SMITH of Michigan. Mr. Speaker, will the gentleman yield?

Mr. DEMINT. I will yield to the gentleman from Michigan.

Mr. SMITH of Michigan. Just to emphasize the point, we talk about the magic of compound interest. I paid my grandson to come in and paint the fence. And I said, Look, will you put this $36 in a Roth IRA? He said, Geez, Grandpa, I want to put this in an account and buy a car with it when I am old enough. So I explained to him, Look, if you put this $36 in an IRA it doubles almost every 8 years. So I figured it out and projected it out so at age 65 he had $70,000 that that money would be worth because of the magic of compound interest; and if he waited another 7 years to age 72, then it would be worth $140,000. He said, Gosh, Grandpa, that is good; but could I just put most of it towards the car and a little bit towards the Roth IRA?

So the magic of compound interest is what can make today's workers that are modest or median income retire as rich people. That is what we are trying to do is having something more than just Social Security but promise the Social Security, but then have the opportunity with the magic of compound interest to have retirees gain even more in their retirement years.

Mr. DEMINT. Mr. Speaker, I thank the gentleman, although I do think he should have paid his grandson more than $36. But he makes an excellent point. If Americans knew that even the poorest worker, if we start now for those in their 20's and 30's, they will all have several hundred thousand dollars that is theirs that can be turned into a monthly income for their own retirement security, but even more importantly, to have some additional income for their retirement, to pay off a house, to help children or grandchildren. We need to help the poor of America develop wealth that they can pass on to the next generation and Social Security is that only opportunity.

We have plans to help them save more and at the same time guarantee that their retirement income will always be as much or more than the current Social Security system.

This has been a great start to the discussion. You will hear more from the Republicans because it is the Republicans that have the plans, and it is the Republicans that will tell you the truth.

SOCIAL SECURITY, WOMEN'S HISTORY MONTH, AND PREVENTING RECIDIVISM

The SPEAKER pro tempore (Mr. TIBERI). Under the Speaker's announced policy of January 3, 2001, the gentleman from Illinois (Mr. DAVIS) is recognized for 60 minutes.

Mr. DAVIS of Illinois. Mr. Speaker, I must confess that I have been intrigued with some of the discussion that has taken place relative to Social Security and what we need to do with it. And I count myself as one of those who believe that our Social Security system, which was actually developed and generated by Democrats, a Democratic President, of course, undergirded much of it; and, of course, Democrats want to preserve and protect it.

I am one of those who believe that at all costs we must, in fact, protect and preserve our Social Security system as we have known it. But that is not what I really came to talk about this evening. As a matter of fact, I have two things that I am going to discuss.

WOMEN'S HISTORY MONTH

Mr. DAVIS of Illinois. Last month we praised our forefathers as we observed President's Day, and this month is Women's History Month. And as it gets underway, I want to recognize some of the outstanding women; women who dared to be first; women who strove for equality and social justice; women who not only broke ceilings but shattered spheres in pursuit of rights that should have been inalienable at the time, and whose contributions continue to pave the way and continue to inspire others.

Of course, Mr. Speaker, as you know I am from Chicago, a city that is rich in women pioneers and trailblazers in both the past and the present. One such woman that I would like to mention is Ida B. Wells, who founded the first black female suffrage club in Illinois as well as the first kindergarten in a black neighborhood.

Ida B. Wells was born in 1862, was a slave for the first 6 months of her life, and spent the remainder of her life fighting for civil and economic rights for African Americans and for others. Declaring that one had better die fighting against injustice then die like a dog or rat in a trap, Wells crusaded against lynching and segregation until her death in 1931.

Another outstanding Chicagoan and another outstanding pioneer in the suffrage movement was labor activist Sylvia Woods, who was a pioneer in civil rights, a woman that I got an opportunity to actually know. During World War II she held the union organization drive at Bendix Aviation. She spent much of the 1940's organizing the United Auto Workers Local 330 and formulating the UAB resolution against sex discrimination. Following the war, she assisted women who were laid off in Chicago and co-founded the National Alliance Against Racism.

However, at present there are future history makers who are also making a tremendous impact on the lives of citizens in Chicago and throughout the Nation. Exemplary individuals from today include Reverend Addie Wyatt, Reverend Willie Taplin Barrow, Dr. Johnnie Coleman, and Ms. Mamie Bone, as well as a number of others.

Reverend Addie Wyatt has the distinction of having had active involvement with the three major movements of the 20th century: labor, civil rights, and women's rights. Her leadership roles in labor were the international vice president of the United Food and Commercial Workers International Union, and she broke ground as the first female local union president of the United Packing House Food and Allied Workers and as international vice president of the Amalgamated Meat Cutters and Butcher Workmen of North America.

One of the most eloquent spokespersons I have ever heard, Addie Wyatt also played a founding role in Operation Breadbasket and Operation PUSH, as well as her work with Dr. Martin Luther King, Jr., illustrates her commitment to civil rights.

Her involvement in the women's movement has also generated a number of worthy achievements. Reverend Wyatt is a founding member of the National Organization of Women and in the early days was appointed by Eleanor Roosevelt to serve on the Labor Legislation Committee of the Commission on the Status of Women. During her distinguished career, she advised Presidents Kennedy, Johnson and Carter and other important leaders on these causes.

She and her husband, Reverend Claude Wyatt, currently serve as pastors emeritus of the Vernon Park Church of God in Chicago, which they helped to develop and which stands as a monument to their tremendous religious and spiritual leadership.

Reverend Dr. Willie Taplin Barrow is the co-chair of Rainbow/PUSH Coalition. She is well known for breaking barriers in a male-dominated profession. She is an ordained minister and on the Governor's Committee on the Status of Women in Illinois. She is a member of the Democratic National Committee, is a dynamic preacher and inspirational speaker, and travels all over the world motivating, stimulating, activating people to realize their own potential for not only self-sufficiency, but the potential that they have to help shape and mold the society of which they are a part.

Almost any Saturday morning you can encounter Reverend Barrow at Operation PUSH where she co-leads that organization along with its founders, the Reverend Jessie Jackson.

Another fine citizen of Chicago is Reverend Dr. Johnnie Coleman, sometimes referred to as the first lady of the religious community. She is the founding minister of Christ Universal Church where 4,000 people go to hear her words of wisdom and healing every Sunday.

□ 1645

To her credit, Reverend Coleman has several organizations in Chicago; the Universal Foundation for Better Living, Incorporated, the Johnnie Coleman Institute, and the Johnnie Coleman Academy, as well as a book of teachings entitled "Open Your Mind and Be Healed."

Also, an outstanding minister is Reverend Jennie Pettis, who is the founder and pastor of the Family Altar Evangelistic Church. In a relatively short period of time, the Reverend Pettis and her parishioners have built a brand new edifice, which they expect to inhabit during the spring of this year.

Chicago is a magnificent city, a tremendous city. I represent a Congressional District that is one of the most diverse in the Nation. It includes downtown Chicago, the Gold Coast, the Magnificent Mile, outstanding museums and universities, 23 hospitals, 4 medical centers, 4 medical schools, almost anything that one can imagine. But also in that landscape, of course, I represent Chinatown, I represent Greek Town, I represent what is called Little Italy, a great Italian community, and I represent the Ukrainian Village.

I also represent a large percentage of the public housing in Chicago, more than 68 percent; and as the chairperson of the Central Advisory Council, Ms. Mamie Bone fights for the residents of public housing. She currently serves as a member of the CHA Board of Commissioners and continues to champion and continues to work and advocate for the employment, security and safety of public housing residents.

Other individuals who provide leadership in public housing are people like Deverra Beverly, who is the chairman of the local advisory council at the Abla Public Housing Complex. Also, Ms. Cora Moore at Cabrini-Green, and Ms. Carolyn Willingham. Both provide tremendous leadership in the Cabrini-Green complex. Ms. Maner Wiley and Lorena Nellum at the Hilliard Homes. Ms. Gloria Williams at the Nazariah Safe Haven. Ms. Brenda Bolden in the Lawndale area. Ms. Cora Dillard in Robert Taylor. Ms. Deborah Martin and Ms. Mildred Dennis in Robert Taylor. Ms. Mary Baldwin at Rockwell Gardens. Ms. Francine Washington at Stateway Gardens. Ms. Beatrice Harris at Wentworth Gardens. And, of course, Ms. Shirley Hammond, who has developed a business in the Cabrini area and represents the senior housing on the north side of the city; and Ms. Martha Marshall, who represents the Senior Housing Central and has developed a business which is part of the business development activity for the area.

The last woman that I will mention, as we talk about outstanding Chicago women, is one of great historical significance. Jane Addams, the mother of social work, Nobel Peace Prize recipient, and an individual extolled by President Franklin Roosevelt as Chicago's most useful citizen.

Jane Addams established Hull House, Chicago's first settlement house for the underprivileged in 1889. Hull House quickly became an innovative place for gathering, learning, obtaining a free meal, gaining employment, and even organizing union activity. She later became a vocal advocate for women's suffrage and humanitarian causes in the early 20th century and reasoned that "civilization is a method of living and an attitude of equal respect for all people."

She held leadership positions in several key organizations throughout her life, including the National Progressive Party and the International Congress of Women. Fortunately, Jane Addams was not destined to always be a suffragette, never a voter. She lived until 1931 and saw an American woman's right to vote become a reality in 1920.

In closing, Jane Addams also sagaciously stated that national events determine our ideas as much as our ideas determine national events. Indeed, Women's History Month is a national event which celebrates the ideas of our Nation and the spirit and triumph of the women's movement; and so it makes sense for us to stop, to pause, to realize and to recognize the tremendous contribution that women have made and continue to make in the development of this country.

REINTEGRATING EX-OFFENDERS INTO SOCIETY

I think I will shift at this time a bit, Mr. Speaker, and talk about an issue that I think is one of the most serious issues facing our country, and that is the issue of successfully reintegrating ex-offenders back into the normalcy of society; that is, successfully reintegrating ex-offenders back into normal life after they have been incarcerated, after they have served time and are now looking for a way to become, one might say, normal again.

On February 7, I introduced what is now called the Public Safety Ex-offender Self-sufficiency Act of 2002. The Public Safety Ex-offender Self-sufficiency Act amends the Internal Revenue Code of 1986 to reflect an ex-offender low-income housing credit to encourage the provision of housing, job training, and other essential services to ex-offenders through a structured living environment designed to assist the ex-offenders in becoming self-sufficient.

The United States Department of Justice, the National Institute of Justice, said in November of 2000 that in the United States, and I quote them, "There are virtually no systematic, comprehensive approaches to dealing with reintegrating ex-offenders." This is a comprehensive legislative initiative that will address recidivism, cost of crime to victims, and public safety. Let us see if we can make the case.

The problem of successfully reintegrating ex-offenders back into normal life is one of the major issues facing low-income and minority communities throughout the Nation. It is a serious public safety issue that requires serious public attention. While 5 percent of the world's population lives in the United States, 25 percent of the world's prison population are in United States' jails and prisons. Nationally, the United States Department of Justice reports that there are now over 2 million people in State and Federal prisons, more than a threefold increase since 1980.

This year, more than 600,000 people will leave prison and return to neighborhoods across the country. The problem of ex-offenders impacts all levels of our society. In 1998, there were 225,700 veterans held in the Nation's prisons and jails, 56,500 Vietnam War era veterans, and 18,500 Persian Gulf War era veterans. The Justice Department reports that 20 percent of those veterans in prison or jail reported seeing combat duty during their military service.

As of November 2000, 45,617 adults were incarcerated in Illinois prisons. During that same period, 29,120 were on parole. We have even looked at a study prepared by Claritas and commissioned by the Stein Family Foundation that 70 percent of men between the ages of 18 and 45 in one particular Chicago community are ex-offenders. In America, the poor and people of color are more likely to be incarcerated. Fifty-three percent of people warehoused in our Nation's prisons earned less than $10,000 a year prior to incarceration.

Although the minority population is approximately 13 percent, 66 percent of the Nation's prison population are people of color. Nearly 4.6 million adult men and women were on probation or parole at the end of 2000, an increase of almost 70,700 during that year. While 52 percent of those on probation have been convicted of committing a felony, 46 percent were convicted of misdemeanors. Of the offenders on parole, 97 percent had been sentenced to incarceration of more than 1 year. According to the Soros Institute, 72 percent of those entering State prison for the first time were nonviolent offenders.

Studies indicate that the median education level of released prisoners is 11th grade. In addition, three-fourths of those reentering prison have a history of substance abuse. Not surprisingly, 16 percent suffer from mental illness.

According to the U.S. Department of Justice Bureau of Justice statistics, at the end of 2000 State prisons were operating between full capacity and 15 percent above capacity, while Federal prisons were operating at 31 percent above capacity.

As our Nation's prison population explodes and prison operating costs skyrocket, little is done to prepare these adults for reentry. In fact, the National Institute of Justice reports that 14 States have abolished discretionary parole and the parole boards that historically managed prisoner reentry.

There is a shortage of vocational, educational and substance abuse programs in prison. In fact, like States all over the country, Illinois recently cut the post-GED programs. According to the sentencing project, more than 100,000 prisoners are being released each year without any form of community correctional supervision.

□ 1700

The recidivism rate remains high, and studies show that a direct correlation between homelessness and recidivism exists. The Chicago Continuum of Care reported that 6.5 percent of respondents noted that release from jail was a contributing factor for homelessness. In addition, 7.1 percent responded that release from incarceration was the primary factor for homelessness. According to the U.S. Department of Justice, 62 percent of those released from State prisons will be rearrested within 3 years, and 40 percent will be reincarcerated, including many for technical violation of parole.

In 1997, the Illinois recidivism rate for African Americans exceeded the national norm: blacks, 48.2 percent; whites, 35.7 percent; Hispanics, 30.9 percent; and others, 28 percent. A staggering 36.4 percent returned due to a new sentence. Ex-offenders that are truly interested in reintegrating back into community life, interested in finding employment and taking care of themselves and their families, locating housing, going to school, oftentimes have no place to go. There are very few second chances.

What happens to a man or woman who cannot find an employer willing to give them a second chance, refused TANF benefits, cannot receive subsidized housing, educational or medical assistance? We have seen over and over again that they return to prison. We hope to convince the Nation that by supporting these initiatives we begin the process of, one, saving ourselves; two, protecting our persons and property; three, reducing the human and capital costs of recidivism; and, four, we begin to seriously impact in a positive way the quality of life for everyone.

Neighborhoods across the Nation are absorbing the economic and social cost of reintegrating hundreds of thousands of ex-offenders back into society each year. In 1991, the Bureau of Justice reported that the cost of the justice system per resident was $299. In 1996, the Department of Justice reported that the cost of crime to victims rises to approximately $450 billion a year, or $1,800 per man, woman, and child.

That is to say if we could find a way to seriously reduce crime, reduce recidivism, provide opportunities for these individuals to become self-sufficient, to learn a trade, develop a skill, go to school, get a job, then not only are we providing for them, but we are in reality helping all of America. According to a poll commissioned by the ACLU, people across the Nation are not satisfied with the current prison system. In addition, the poll released in July 2001 found that six in 10 Americans believe that it is possible to rehabilitate a nonviolent offender. Other key findings of the ACLU poll support alternative punishments for many nonviolent offenses. In addition, 69 percent of respondents believe that prisons should be required to teach skills. That is, individuals ought to be able to develop to the extent that when they leave a correctional facility they are in better shape than they were when they first went in.

As these men and women transition from incarceration to freedom, what they need most are comprehensive reentry solutions. What they find instead are often cold stares, unreturned phone calls, and closed doors. The jobs are like an old man's teeth, few and far apart. Housing is scarce, and other social services are in most cases nonexistent for the serious and earnest men and women desirous of working to clean up their act and transition into productive citizens.

Mr. Speaker, with the implementation of this bill nationally, the recidivism rate just might decrease. Prevention, treatment, and rehabilitation are just as important as incarceration. These men, women, and children always must live in some communities. Increased public safety is a primary concern of communities and neighborhoods all over the country. In the Seventh Congressional District of Illinois, Ex-offenders Task Force representing a broad group, including representatives from national and local civil rights organizations, community-based organizations, ex-offenders, academicians, law enforcement officials, elected officials, community activists, faith-based organizations, block club residents, businesses and community residents, are all in serious collaboration to try and find direction and, hopefully, solutions.

The Public Safety Ex-Offender Self-Sufficiency Act addresses several serious needs and barriers this population must overcome in order to successfully reintegrate. Through the efforts of the task force, we confirmed that housing still remains a key barrier. In fact, secure and safe and affordable housing is a stabilizing force for the formerly incarcerated.

From Los Angeles to New York and in Chicago, ex-offenders are deterred from a fresh start, a second chance. These men and women face countless legal barriers. In Chicago, for example, ex-offenders are prohibited from living in public housing and from working in many public agencies. In Illinois, ex-offenders are prohibited from working in 57 occupational categories without some form of waiver. Nationally, ex-offenders that are convicted of drug offenses after 1996 are unable to receive Pell Grants.

According to a 1998 NACRO study, 13 percent of prisoners were homeless before their sentence, and 34 percent had lost homes because of prison. As a result, half the sample were therefore at risk of being homeless on release. The study also notes that prisoners that are released homeless are much more likely to offend or to reoffend. In addition, a housing research study, "The Housing Needs of Ex-Prisoners," identified three factors to determine whether ex-offenders succeeded in retaining their homes: one, the quality of family relationships; two, the availability of housing entitlements; three, current financial status.

The study also noted that ex-offenders face other problems in rehousing which includes access to independent mainstream accommodations, arranging housing accommodations other than in hotels prior to release, and very few ex-prisoners agree to live in hotels or homeless shelters because of concern about recidivism.

But the issues are much broader than housing alone: Federal Pell Grants, expungement, jobs, health care. Through our legislative initiative, we are looking at reintegrating ex-offenders from a holistic perspective, trying to address factors while acknowledging that affordable and available housing is an overarching need. This legislation will help to meet that need. But the other thing about this legislation is that it is cost effective. It is not designed to just ask the government or somebody to provide grants. It really uses the low-income housing tax credit system that we are all familiar with where States receive credits based upon population.

In this instance we simply take the number of ex-offenders who are released to a particular State, and then provide credits to that State based upon its number of ex-offenders. Private developers will be encouraged to develop the housing that is needed which they must hold for 15 years. After 10 years, they will have recouped the money that they have invested so it makes good business sense, good business sense for the private developers who will develop the housing that is needed; good business sense for the communities who will have help in aiding their ex-offenders; and good business sense because it will help a category of individuals to become self-sufficient, contributing members of society who then will be in a position to give rather than to take, will be in a position to become substantial helpers, to make America become what America has the potential of being.

Mr. Speaker, I urge my colleagues, I urge business and industry, I urge social workers and social scientists all to get behind this legislation because I believe that it could provide hope for the hopeless and help for the helpless.

Mr. Speaker, I yield to the gentleman from Vermont (Mr. SANDERS).

Mr. SANDERS. Mr. Speaker, I thank the gentleman for yielding, and I congratulate the gentleman for touching on an issue of enormous consequence that does not get the attention that it deserves, that is, we have in this country the largest per capita rate of incarcerated people; and I think the evidence as the gentleman has just indicated is very clear that we do not do a good job of reintegrating those people into society. The result is an enormous amount of pain, human destruction, and a great deal of expense to the American taxpayer.

Mr. Speaker, what I want to touch on, and the gentleman from Illinois (Mr. DAVIS) might be interested in this issue, is another issue that does not get a great deal of attention, and that is the increasing concentration of media ownership in the United States today.

In my view we cannot be a vibrant democracy unless the people get information, unless the people know what the most important issues are that are facing them. I fear very much that in recent years what we have seen is fewer and fewer large, multinational corporations own and control the media of this country. We are seeing huge corporations like General Electric, like Disney, like Rupert Murdoch's News Incorporated control major television networks. We have seen fewer and fewer large companies control radio outlets so that increasingly it is difficult for people in various communities to get local news because their local radio stations have been bought up by large national organizations.

□ 1715

We see in terms of newspapers and in magazines fewer and fewer large corporations controlling those as well.

I think people are not aware of the degree of corporate ownership of the media in this country and the fact that recent court rulings will make that situation even worse and allow fewer and fewer large companies to own more and more of the media.

Some of the largest media conglomerates in this country are AT&T, AOL Time Warner, the Liberty Media Corporation, Viacom, Walt Disney Corporation, the News Corporation, General Electric, Vivendi, Bertelsmann and Sony. And if you add together what these 10 corporations own, one would be absolutely amazed to the degree that they own television, radio, newspapers, magazines, book publishing, movie companies and so forth.

A concern that I have is that, given this corporate control over the media, the American people get relatively little discussion about some of the most important issues facing this country. For example, Mr. Speaker, I am not aware that most Americans know that the United States of America today is the only industrialized nation on earth that does not have a national health care system guaranteeing health care to all people and yet we spend twice as much per capita on health care than any other nation. Some people may think national health care is a good idea. Some people may think it is a bad idea. But I wonder how much discussion there has been on corporately controlled media or on the radio stations pointing out that every other industrialized nation has a national health care system and we do not. That is an issue that should be discussed.

Mr. DREIER. Mr. Speaker, will the gentleman yield?

Mr. DAVIS of Illinois. I yield to the gentleman from California.

Mr. DREIER. I thank my friend from Illinois for yielding. I would like to listen attentively to my friend from Vermont for just a couple of minutes, and then I would like to briefly, if the gentleman has time, respond to the question that the gentleman just posed.

Mr. SANDERS. Mr. Speaker, what are some of the most important issues facing the vast majority of the people? The President of the United States seems to think that the most important issue is that we give huge tax breaks to the wealthiest people in this country. In fact, as a result of recent legislation passed here, some $500 billion over a 10-year period are going to be given in tax breaks to the wealthiest 1 percent, people with a minimum income of $375,000 a year.

Maybe there are some districts in this country where that is the most important issue, but it is not the case in Vermont, I doubt it is the case in Chicago, and I doubt that it is the case in most districts in this country.

I will tell you what some of the issues are that the American people are concerned about. They are concerned about health care and wondering why 44 million Americans do not have health care and why we are the only major country without a national health care program while we spend twice as much as any other country per capita on health care. They are wondering about why pensions are being cut for working people all over this country, health care benefits are being cut for workers all over this country, while the CEOs of major corporations now earn 500 times what their workers earn.

There are some people who may think, hey, that is a good idea. No problem. No problem that the United States has the most unfair distribution of wealth and income in the industrialized world, where the wealthiest 1 percent own more wealth than the bottom 95 percent. No problem.

But I just met with paralyzed veterans in this country who were in my office saying, why can we not put more money into the Veterans' Administration so we take care of the men and women who put their lives on the line to defend this country? Some people think that taking care of veterans, putting money into education, putting money into child care, paying off our national debt, might be more important than giving huge tax breaks to millionaires and billionaires.

Mr. DREIER. Mr. Speaker, will the gentleman yield?

Mr. SANDERS. I would be happy to yield.

Mr. DREIER. I thank my friend for yielding.

Let me just say at the outset, as far as the first question that my friend posed about the control that the large media has had in preventing people from having the opportunity to engage in a debate on whether or not we should have a nationalized health care system, I would say very clearly, my friend from Vermont and I have together appeared on a number of fora on television programs that are provided because the technological advances that have been made in this country due to large investments that come from those in the media providing a wide range of choices for the American consumer and the television viewer to engage in debate.

Mr. SANDERS. Let me reclaim the time from my friend. I have appeared on national TV programs, I am going to be on one tonight, as a matter of fact, but the issue of why the United States is the only country in the world without a national health care system has never been the topic of discussion on any program that I have been on and I doubt any program that my friend has been on.

Mr. DREIER. Let me give my friend a little bit of advice. I have found, from having appeared on the different CNN and Fox News Channel and MSNBC programs, you can provide whatever answer to whatever question you have. I know that my friend who is so committed to bringing up the issue as to whether or not we should have a national health care system, that he can engage in that debate regardless of what question that they are posing to him.

Mr. SANDERS. Taking my time back, my friend is right. I can probably get 15 seconds into the debate before a moderator jumps in.

Let me ask my friend a question. I am glad that he is here.

Mr. DREIER. If I could just raise one more issue before you pose that. That is, that we at this moment, and I know that as chairman of the Committee on Rules that we are not to address those who might be outside of this Chamber viewing it, but because of technological advances that have been made in this country due to investment that has taken place into a wide range of new and innovative and creative areas, we are able to have this coverage carried beyond this Chamber. I think that by virtue of our having a discussion right now on this issue that my friend raises is a very important one, that has come about because of the level of creativity that exists in the United States.

I should say that it is a complete mischaracterization to say that we are not committed from this side of the aisle or in a bipartisan way to dealing with the concerns of veterans, because we have dramatically increased the level of funding for veterans. At the same time, the focus on education and health care continues to be a priority.

The SPEAKER pro tempore (Mr. PENCE). Respectfully, the Chair would remind Members that the time is controlled by the gentleman from Illinois.

Mr. DREIER. I thank the gentleman from Illinois for yielding to me.

Mr. SANDERS. I appreciate my friend from California being here. This is a good discussion.

The issue that I wanted to pose is, yes, I can get on national shows and I occasionally do, but we have a problem. Let us talk about the radio for a second. I would characterize the United States as being kind of a centrist country, not right wing, not left wing, kind of centrist. In the last election, as you know, Gore and Nader got more votes than did Mr. Bush and Mr. Buchanan, by a few million votes. Kind of a centrist country.

If you turned on talk radio today, would my friend agree with me that what you would hear is one extreme right winger after another right winger after another right winger? So that even a moderate or progressive voice, the gentleman from Illinois (Mr. DAVIS) and I are probably progressives, we know that our people are not going to have a radio station with Rush Limbaugh and his friends out there, Gordon Liddy and all these other folks out there.

But is it somehow interesting, I would think it is somehow interesting, that a country which is basically centrist, that one talk radio show after another is dominated by not right wingers but extreme right wingers.

Mr. DAVIS of Illinois. I yield to the gentleman from California.

Mr. DREIER. I thank the gentleman from Illinois for yielding.

I would say the answer is, number one, it has to do with the market and the listenership. The fact is those programs would not be on were it not for the fact that there is a demand for that listenership. I would say that there are other programs that are out there that do, in fact, offer a perspective. I consider myself to be very progressive myself, I should say.

Mr. SANDERS. You are a progressive?

Mr. DREIER. I consider myself a progressive, yes.

Mr. SANDERS. If you are a progressive, then I would hate to see who is conservative, with all due respect.

Mr. DREIER. It all depends on the definition. But I will tell you that I clearly do believe that there are a wide range of opportunities out there for voices from any side of the issue in this country.

Mr. SANDERS. I have suggested to you, and you do not deny it, that in the last election more people voted for Gore and Nader than voted for the President and Mr. Buchanan, suggesting that we are somewhat of a centrist country. You say that the reason is the market.

Mr. DREIER. I did not say that. That is not what I said.

Mr. SANDERS. That is exactly what you said. These stations are there. They are listened to by the people. But I am suggesting that it is not the market. The people in this country want a variety of viewpoints. Talk radio is predominantly extreme right wing. It is extreme right wing because the stations are owned by conservative multinational corporations.

Mr. DREIER. If the gentleman will yield on that point, that is just a preposterous claim, to say that it is based on the ownership. The programming that has come forward and the demand for more conservative talk radio is in large part due to a level of frustration that the American people have with what is interpreted by many to be a leftward tilt for the control of what is called the mainstream media.

Let me just say, I am not one of those harsh critics who says that. I happen to believe that we need to do everything we can to encourage a free-flowing debate on a wide range of issues and concerns. But I will say this. I know full well that the ownership of the media out there does not play a role in the editorial comment when it comes to the talk show messages that are getting out there.

Mr. DAVIS of Illinois. Reclaiming my time, let me suggest this, that ownership determines who the commentators are; and so in a sense you cannot discount the impact of ownership on what ultimately becomes the direction and content. I find that people listen to those stations more often that they relate to. And so if they relate to the right-wing station, that is where they are going to go. And so if the owner hires a right-wing commentator, then I would have to agree with the gentleman from Vermont, that ownership does play a role in what ultimately gets on.

Mr. DREIER. If my friend would yield on that point, I would say that there clearly is a leftward tilt by a lot of the ownership, then.

I represent Los Angeles. A lot of people in southern California spend a great deal of time in their automobiles. I will say that I, as I know my friends from both Vermont and Illinois, participate on these programs. There are a wide range of programs that are carried by people who my friend from Vermont would describe as progressive or very liberal. I am happy to participate on those shows. I can name them for you in Los Angeles.

Mr. SANDERS. There are a diversity of viewpoints. There is no argument about that. But I would say any objective look at what goes out there, say, in terms of talk radio, is that the tilt is not only right but extreme right.

Mr. DREIER. I disagree.

Mr. SANDERS. You would be hard-pressed to name national progressive radio talk show hosts. We could name one of the Limbaughs of the world ad nauseam on the right. But the bottom line is, as the gentleman from Illinois just indicated, when you have a multinational company like General Electric, what is General Electric's shtick? What do they do?

Mr. DREIER. The gentleman has asked the question, what does General Electric do? I am happy to tell you what they do.

Mr. SANDERS. If I could finish, please.

The SPEAKER pro tempore. The Chair reminds Members that all time is controlled by the gentleman from Illinois.

Mr. DREIER. I suspect the gentleman from Illinois wants the gentleman from Vermont to continue.

Mr. DAVIS of Illinois. I yield to the gentleman from Vermont.

Mr. SANDERS. The bottom line here is that one has got to be very naive not to understand that companies like General Electric that spend millions of dollars on lobbyists here to take jobs to China, that send money to lower their taxes, that send money to build nuclear power plants, to increase military spending and so forth are not going to, within the confines of what they own, present that point of view and discourage discussion on a whole lot of other issues.

If you are a member of a trade union in America, you make 30 percent more than workers who are not in a trade union. Frankly, I have never seen that discussion on television or radio in my life, an enormously important issue like that. The growing gap between the rich and the poor is discussed far, far too little.

I am not going to deny that there are different points of view that are heard. But I think the bottom line is, no question, that corporate ownership of this country is growing in terms of the media and that we are hearing fewer and fewer points of view that represent working people, middle-income people and minority people.

□ 1730

Mr. DREIER. Mr. Speaker, if the gentleman will yield further, let me totally disagree with the assessment that my friend from Vermont has just provided. For starters, I do not think I have ever owned a share of stock in General Electric, and I have no idea whether I have received contributions from their lobbyists here. I suspect some of them may have contributed to my campaigns.

But I happen to believe that companies like General Electric have dramatically improved the quality of life for the people in the United States of America, and I say that because it is very clear that consumer products, regardless of where they are manufactured in the world, that are sold here in the United States, the best quality at the lowest possible price, is something that is very good for the United States of America.

I know that we have the most productive workers on the face of the Earth; and when it comes to technology, the United States of America is on the cutting edge, creating a wide range of new technologies. This is one of the reasons that I was so proud to work on behalf of Trade Promotion Authority, so that we can pry open new markets around the world which will create an opportunity for goods and services here in the United States to be able to move into those economies in other parts of the world.

When it comes to the issue of ownership, I am convinced that with cable television, with the multifarious radio programs that are out there representing a wide range of views, and I know from having talked with many of the owners, they do not exercise control over much of the programming. Some of them may be more sympathetic than some of the others; but I will tell you, we happen to believe that the editorial pages of the New York Times and Washington Post have a leftward tilt, and I think the success of talk radio on the conservative side is in large part a response, a response, to a level of frustration that many Americans have felt over the message that has come from the New York Times and the Washington Post editorial pages.

So I happen to believe that we have some wonderful, wonderful things taking place in this country; and we need to do more to encourage creativity. And the idea of having the government clamp down, jeopardizing the opportunity to pursue new technologies, which it will take investment to do, would just plain be wrong.

I have to go upstairs, but I thank my friend for yielding; and I very much appreciate the opportunity to engage in this discussion and look forward to again another free-flowing debate with hundreds of thousands of people following us as we talk about whether or not we should have a national healthcare system.

Mr. DAVIS of Illinois. Reclaiming my time, I think both gentlemen would, in fact, have to agree that in our country and in a democracy like ours, we live often by the golden rule; but we also have to acknowledge that whoever has got the most gold, most often makes the rules. And I am afraid that too much of the gold is becoming concentrated in too few places, which really means that corporate ownership is becoming too powerful; and when it does, then it makes for a skewed democracy or a more one-sided decision-making process, and it needs to be balanced off a little bit, which really means that more people need to become part of the ownership of America, rather than too few people owning too much.

If that is the thesis that the gentleman from Vermont is promoting, then I would agree with him, and yield for further amplification.

Mr. SANDERS. Mr. Speaker, I think my friend said it very, very well. This is a great Nation, and we have enormous things to be proud of. But I remain very, very concerned that fewer and fewer people own more and more of our economy, own more and more of our media, while, at the same time, the average person that the gentleman and I represent are working, in many cases, longer hours for lower wages just to keep their heads above water.

But the point of my remarks tonight was not just to talk about the economy and ownership in the economy, but was to talk about the media; and my deep concern is that the American people are not hearing all points of view; that corporate ownership of the media is preventing a large segment of ideas which represent the thinking of many, many Americans from getting out there, and I think that is not good for our democracy.

Mr. DAVIS of Illinois. I thank the gentleman, and, reclaiming my time, I would have to agree. I would even go beyond just the media. I mean, one of the reasons, for example, that I am so much in favor of employees reaching the point where they exercise more ownership of where they are and where they work is because the more you spread the ownership, the more you open up the process; and the more open the process, the greater the potential for this commodity that we call democracy. I think that is what we are constantly striving for, a more democratic Nation, where more people are engaged and are part of the decision-making.

I want to thank the gentleman for coming down.

Mr. SANDERS. I thank my friend for allowing me to participate.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF SENATE AMENDMENT TO H.R. 3090, ECONOMIC SECURITY AND RECOVERY ACT OF 2001

Mr. DRIER (during special order of Mr. DAVIS of Illinois), from the Committee on Rules, submitted a privileged report (Rept. No. 107–367) on the resolution (H. Res. 360) providing for consideration of the Senate amendment to the bill (H.R. 3090) to provide tax incentives for economic recovery, which was referred to the House Calendar and ordered to be printed.

PRICE SUPPORT PAYMENT LIMITATIONS

The SPEAKER pro tempore (Mr. PENCE). Under the Speaker's announced policy of January 3, 2001, the gentleman from Michigan (Mr. SMITH) is recognized for 60 minutes.

Mr. SMITH of Michigan. Mr. Speaker, the agricultural industry in the United States over the last 100 years has contributed a great deal. As we develop this year's farm bill, we are now trying to decide, number one, how much should we pay in terms of tax subsidies to farmers, tax dollars going into subsidies to farmers, to make sure that the agricultural industry in the United States survives.

Farmers are facing record low prices compared to the last 20 years. In fact, in terms of what a bushel of wheat would buy, the wheat price today is much lower than it was 50 years ago.

What kind of policy do we want in the United States? We are now in a subsidy war, if you will, with other countries. Other countries have decided they are going to do anything necessary to keep their farmers operating, so they are subsidizing their farmers in these other countries substantially. Their extra production from Europe, from these other countries, go into what would otherwise be our markets, so the resulting overproduction from all over the world results in low commodity prices, and the low commodity prices today would not keep most farmers in business.

Subsidies in the United States represent about 17 percent of the gross income of the average farm. The average net income of an average farm is around 6 percent. So, again, without the subsidy payments, most farms in the United States would lose money every year.

Now, the irony is that farmers do not like to have this subsidy check coming from the government. They would much rather have a real marketplace, where there was real competition throughout the world, where they could compete and make good money farming. And make no mistake, our farmers in the United States can compete, if you will, excuse the expression, on a level playing field, with any other agricultural producers in the world in most commodities.

Our challenge right now is the Senate has passed one farm bill, and the House has passed another farm bill, substantially different in the concepts of where they want agriculture to go and what they want in the farm bill. That includes rural development, that includes the environment in rural areas, that includes the WIC program for food for infants and pregnant mothers, that includes the Food Stamp program.

Just as a footnote here, let me say how we have changed the U.S. Department of Agriculture over the last 50 years. USDA, that part of USDA that is involved in production agriculture, with farmers, now represents only about 25 percent of the total budget of the U.S. Department of Agriculture.

I am here tonight to talk about payment limitations to some of the huge mega-farmers in the United States. The Senate in their bill had provisions that incorporated a level of payment limitations in the hope that some of the large mega-farms would have some kind of a cap, some kind of limit on the payments they received, so there would be more money for what I would call the average mainstream farmer in the United States and some of the other programs in the agricultural bill.

We passed an agriculture bill back in 1996 that pretty much everybody supported. All of the farm organizations thought it was a good idea. What that was is the Freedom to Farm, and it was a phase-out of government subsidy programs. So over 7 years, the subsidy payments to farmers went down and down, and then in the eighth year farmers were supposed to produce strictly for the market.

What happened is the economy in Asia was tremendously disrupted and their purchases went down, and we had a glut of extra farm production; so prices went down, and even with the one subsidy phase-out payment, farmers were going broke, going out of business, going bankrupt.

Now we are developing this new farm legislation, and the question before us is should we have payment limitations on how much money any one farm operation can receive in payments from the Federal Government.

Let me give you one statistic. Right now, the top largest 5 percent of the farms receive 49 percent of the payments. Five percent almost receive half of all the payments. Some have suggested, look, we do have limits on payments. The fact is that we do not have real limits of any kind on price support payments.

Let me just spend a minute on price supports. In our farm programs, what we have is we say to a farmer that to cover at least their fixed costs, that we will guarantee a certain price, and if the market is less than that particular price, government will make up the difference between the current market price and what the Congress has thought to be a price that will at least cover most of the fixed expenses of that particular farm producing that particular crop.

Just for the record, let me throw in those price support payments. The national average now on rice is $6.50 a hundred weight; cotton is $52.9 cents a pound; wheat is $2.58 cents a bushel; soybeans are $5.26 a bushel; and corn is $1.89 a bushel.

So for example, on corn, at $1.89 a bushel, if the current market price is $1.79 in that particular county, then the government will come up with an extra 10 cents per bushel for those farmers.

In terms of my interest in this area, I am a farmer from Michigan. I was born and raised on a family farm. I was on the United States Department of Agriculture State Committee in Michigan as its chairman. I came to Washington when Earl Butz asked me to come to Washington to help phase out some of the complicated farm programs in 1970, and we went from a stack about 10 feet high of program regulations for farmers down to maybe a stack a foot high of those regulations for farmers, and sold a lot of the storage bins that the Federal Government had that tended to depress prices for farmers even more.

We did not have problems with the kind of payment limitations in those years because the price of the commodity was higher than the support price. We had crazy programs for diversions and set-asides; and ever since 1934 when we first started farm programs, it has tended to be farm programs that had more benefit for the big, richer, larger farm operations.

□ 1745

So a big, larger farm operation has a lower per unit cost of production; and, therefore, the difference in price to make it up was a little more beneficial to them in terms of adding to their profit than a small family farm that had a larger unit cost of production.

So what happened from 1934 through the 1960s and into the 1970s is the very small farms went out of business, and the medium-sized farms thought, well, if I buy that small farm and I work maybe another couple of hours a day, I can make a little more money for my family so that my kids have some of the same advantages as my city cousins.

Well, it tended to be progressive; and, pretty soon, what was considered a large farm was considered a small farm and the larger farms bought out those smaller farms. Now, over the last 60 years, we have gone from an average of about 40 acres, 50 acres per farm to 460 acres per farm.

Let me just give my colleagues a report from the Environmental Working Group that went to the U.S. Department of Agriculture and got all of the payments to all of the farmers and the farm operations in the United States. As my colleagues will recall, I mentioned earlier that 5 percent of the farms are now receiving 49 percent, almost 50 percent of farm payments that go out. If we were to have the kind of payment limitations that are in the Senate bill, it would save between $2 billion and $3 billion.

I am going to move away from the mike and just write these numbers in. According to the Environmental Working Group, these are the top recipients of farm program payments between the years 1996 and 2000. I think everybody that is watching might be able to see that. They are Riceland Foods, $49 million; Farmers Rice Corporation, $38.2 million; Harvest States Co-op, $28.1 million; Tyler Farms, $23.8 million; Producers Rice Mill, $19 million. These are the mega farm operations. These are the huge landowners. These are not the 400 or the 500 or the 1,000 or the 2,000 or the 3,000 or the 4,000 acre farms. These are the 40,000, 50,000, 60,000, 70,000, 80,000 acre farms.

What I am suggesting in this short debate this evening is that my colleagues work to have a farm program that is more fair to the mainstream farmers of our country and to limit the kind of payments as we have a limit in the Senate bill. Some of the pressures, of course, come from the big operations that are getting these large payments.

Bear with me a minute and let me just go through a scenario of why there is no cap or limits on farm payments, and that has disturbed me quite a lot over the years, because we sort of fool people into saying there is a limit on price support payments. Because, in the law, it says there is going to be a limit on price support payments of $150,000 per farmer. That is what the law says. So a lot of organizations have tended to say, well, we have payment limits on price support.

Here is what happens. It is a little complicated. But once we hit the $150,000 limit, then we have another program that is called a Nonrecourse Loan Program. So any farmer can take his rice, corn, wheat, cotton, soybeans in and give the government the title to that crop. The government will give him a loan that is equal to the price support payment, and then that farmer has the option of forfeiting on that loan and keeping the money, which gives that farmer exactly the same benefit as the price support payment in the first place. So it is sort of one can do an end run and still collect millions of dollars in price support payments.

I would just urge my colleagues and I would urge the conferees from the Senate and the House to look at the kind of payment limitations that still can be fair to farmers, that still offer some loan provisions to those farmers so that we do not have to glut the market at harvest time.

I spent 5 years as a deputy administrator for farm programs with Earl Butz, and then went back home to the farm. Anyone that thinks that it is not tough, making money on a farm, has not spent a lot of time on the farm. Farmers put in those 14- and 15-hour days. They work very hard. They are desperate to try to have the kind of provisions and services and piano lessons and the ability to send their kids to college. They are trying hard in working those extra hours to try to accommodate their family in the same kind of living as their city cousins. It has been very tough.

So we are losing a lot of our farmers, and we continue the trend of farmers and farms getting bigger and bigger.

I want to make it clear that the limitation amendment will only affect the very largest of recipients. For instance, the average acreage that would have to be taken in the last 2 crop years to reach the limit that the payment limitation sets was over 6,000 acres of corn. So, again, the average farm is 460 acres, but to reach the payment limitation in relation to the price over the last 2 years was 6,000 acres of corn, almost 5,800 acres of soybeans, almost 2,000 acres of cotton and 13,000 acres of wheat, 17,000 acres of rice.

I would note that the average farm size again is 450 acres. So these are very large farms to reach that limit.

Mr. Speaker, I would ask all Americans to work with us in terms of supporting American farmers. I have suggested that, number one, we want to try to talk these other countries into reducing their subsidies, because subsidies tend to encourage overproduction that has a chain reaction of extra supply, lowering the price, and so farmers end up receiving that much lower price from the markets. So we need to work together cooperatively with other countries.

But I think it is very important that we keep our agriculture industry, we keep and we do what is necessary in these farm programs that we are going to develop over the next several weeks to make sure we have a strong agricultural industry that can continue to provide the highest quality food in the world at the lowest percentage of take-home pay of anyplace in the world.

Again, we produce the highest quality of food at the lowest percentage of take-home pay of anyplace in the world. That efficient production in agriculture has allowed so many people that used to work on the farm producing food to try to survive to go into industry and manufacturing and now into the new information technology. So the agricultural industry that has been the most efficient of any industry; if we take the automobile industry or computers or anything else, the increase in productivity of American agriculture has surpassed almost every other industry.

In conclusion, I would say, Mr. Speaker, that I ask all of my colleagues to join with me when they talk to conferees and encourage them to come up with a payment limitation that is fair to all farmers, but not to give in to some of the pressure groups and the large, huge mega farm operations that are trying to put pressure on our conferees to continue unlimited payments without restrictions. Of course, let me add to that the grain marketers who tend to make a certain profit per unit of production also gain from having large volumes produced. So those industries, the grain industries, the cotton, rice, et cetera, those industries do not want the kind of payment limitations that is going to result in fewer bushels or pounds being produced because that is where they have their margin and markup on profits.

Mr. Speaker, it is going to be a challenge. I hope we can overcome that challenge, and I hope we can have the kind of payment limitations that helps make sure that we do not have a nation of huge mega farms.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Ms. LEE (at the request of Mr. GEPHARDT) for today before 4:30 p.m. on account of business in the district.

Ms. WATERS (at the request of Mr. GEPHARDT) for today on account of business in the district.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. PALLONE) to revise and extend their remarks and include extraneous material:)

Mr. LIPINSKI, for 5 minutes, today.
Mr. PALLONE, for 5 minutes, today.
Mrs. CAPPS, for 5 minutes, today.
Ms. NORTON, for 5 minutes, today.
Mr. MCGOVERN, for 5 minutes, today.
Mr. RODRIGUEZ, for 5 minutes, today.

(The following Members (at the request of Mr. PENCE) to revise and extend their remarks and include extraneous material:)

Mr. DUNCAN, for 5 minutes, today.
Mr. ENGLISH, for 5 minutes, today.
Mr. MCINNIS, for 5 minutes, today.

The following Member (at his own request) to revise and extend his remarks and include extraneous material:

Mr. LEWIS of California, for 5 minutes, today.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 1857. An act to encourage the negotiated settlement of tribal claims.

ADJOURNMENT

Mr. SMITH of Michigan. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 55 minutes p.m.), the House adjourned until tomorrow, Thursday, March 7, 2002, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 8 of rule XII, executive communications were taken from the Speaker's table and referred as follows:

5748. A letter from the Congressional Review Coordinator, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting the Department's final rule—Brucellosis in Cattle; State and Area Classifications; Florida [Docket No. 01-020-2] received February 22, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

5749. A letter from the Congressional Review Coordinator, Animal and Plant Health Inspection Service, Department of Agiculture, transmitting the Department's final rule—Mexican Hass Avocado Import Program [Docket No. 00-003-4] (RIN: 0579-AB27) received February 22, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

5750. A letter from the Congressional Review Coordinator, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting the Department's final rule—Limited Ports of Entry for Pet Birds, Performing or Theatrical Birds, and Poultry and Poultry Products [Docket No. 01-121-1] received February 22, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

5751. A letter from the Congressional Review Coordinator, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting the Department's final rule—Importation of Unshu Oranges From Japan [Docket No. 99-099-2] (RIN: 0579-AB17) received February 22, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

5752. A letter from the Congressional Review Coordinator, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting the Department's final rule—States Approved To Receive Stallions and Mares From CEM-Affected Regions; Rhode Island [Docket No. 01-055-2] received February 22, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

5753. A letter from the Congressional Review Coordinator, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting the Department's final rule—Prohibition of Beef From Argentina

[Docket No. 01–032–2] received February 22, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

5754. A letter from the Congressional Review Coordinator, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting the Department's final rule—Interstate Movement of Swine Within a Production System [Docket No. 98–023–2] (RIN: 0579–AB28) received February 22, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

5755. A letter from the Congressional Review Coordinator, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting the Department's final rule—Commercial Transportation of Equines to Slaughter [Docket No. 98–074–2] (RIN: 0579–AB06) received February 22, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

5756. A letter from the Congressional Review Coordinator, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting the Department's final rule—Horses From Iceland; Quarantine Requirements [Docket No. 00–010–2] received February 22, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

5757. A letter from the Congressional Review Coordinator, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting the Department's final rule—Imported Fire Ant; Addition to Quarantined Areas [Docket No. 01–081–1] received February 22, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

5758. A letter from the Congressional Review Coordinator, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting the Department's final rule—Citrus Canker; Addition to Quarantined Areas [Docket No. 00–036–3] received February 22, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

5759. A letter from the Congressional Review Coordinator, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting the Department's final rule—Asian Longhorned Beetle; Addition to Quarantined Areas [Docket No. 01–092–1] received February 22, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

5760. A letter from the Congressional Review Coordinator, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting the Department's final rule—Phytophthora Ramorum; Quarantine and Regulations [Docket No. 01–054–1] received February 22, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

5761. A letter from the Congressional Review Coordinator, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting the Department's final rule—Commuted Traveltime Periods: Overtime Services Relating to Imports and Exports [Docket No. 01–111–1] received February 22, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

5762. A letter from the Congressional Review Coordinator, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting the Department's final rule—Animals Destroyed Because of Tuberculosis; Payment of Indemnity [Docket No. 00–106–1] (RIN: 0579–AB29) received February 22, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

5763. A letter from the Congressional Review Coordinator, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting the Department's final rule—Export Certification; Canadian Solid Wood Packing Materials Exported From the United States to China [Docket No. 99–100–4] received February 22, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

5764. A letter from the Congressional Review Coordinator, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting the Department's final rule—Chronic Wasting Disease in Cervids; Payment of Indemnity [Docket No. 00–108–1] (RIN: 0579–AB35) received February 22, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

5765. A letter from the Congressional Review Coordinator, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting the Department's final rule—Change in Disease Status of Germany, Italy, and Spain Because of BSE [Docket No. 01–008–2] received February 22, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

5766. A letter from the Congressional Review Coordinator, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting the Department's final rule—Change in Disease Status of the Republic of San Marino and the Independent Principalities of Andorra and Monaco [Docket No. 01–008–2] received February 22, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

5767. A letter from the Congressional Review Coordinator, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting the Department's final rule—District of Columbia; Movement of Plants and Plant Products [Docket No. 00–085–2] received February 22, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

5768. A letter from the Congressional Review Coordinator, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting the Department's final rule—Change in Disease Status of The Netherlands and Northern Ireland With Regard to Foot-and-Mouth Disease [Docket No. 01–031–3] received February 22, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

5769. A letter from the Congressional Review Coordinator, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting the Department's final rule—Change in Disease Status of France and Ireland With Regard to Foot-and-Mouth Disease [Docket No. 01–031–2] received February 22, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

5770. A letter from the Congressional Review Coordinator, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting the Department's final rule—States Approved To Receive Stallions and Mares From CEM-Affected Regions; Rhode Island [Docket No. 01–055–01] received February 22, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

5771. A letter from the Director, Policy Directives and Instructions Branch, Department of Justice, transmitting the Department's final rule—Termination of the Designation of Argentina as a Participant Under the Visa Waiver Program [INS No. 2188–02; AG Order No. 2561–2002] (RIN: 1115–AB93) received February 22, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

5772. A letter from the Executive Secretary and Chief of Staff, Agency For International Development, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Government Reform.

5773. A letter from the Acting General Counsel, Office of Management and Budget, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Government Reform.

5774. A letter from the Acting Secretary, Postal Rate Commission, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Government Reform.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. HANSEN: Committee on Resources. H.R. 1870. A bill to provide for the sale of certain real property within the Newlands Project in Nevada, to the city of Fallon, Nevada; with an amendment (Rept. 107–366). Referred to the Committee of the Whole House on the state of the Union.

Ms. PRYCE of Ohio: Committee on Rules. House Resolution 360. Resolution providing for consideration of the Senate amendment to the bill (H.R. 3090) to provide tax incentives for economic recovery (Rept. 107–367). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XII, public bills and resolutions were introduced and severally referred, as follows:

By Mr. McINNIS:

H.R. 3857. A bill to amend the Internal Revenue Code of 1986 to treat nominally foreign corporations created through inversion transactions as domestic corporations; to the Committee on Ways and Means.

By Mr. RAHALL:

H.R. 3858. A bill to modify the boundaries of the New River Gorge National River, West Virginia; to the Committee on Resources.

By Mr. BROWN of South Carolina:

H.R. 3859. A bill to suspend temporarily the duty on Allyl Cyclo Hexyl Propionate (Allyl hexahydro phenylpropionate); to the Committee on Ways and Means.

By Mr. BROWN of South Carolina:

H.R. 3860. A bill to suspend temporarily the duty on Methyl Cinnamate (methyl-3-phenylpropenoate); to the Committee on Ways and Means.

By Mr. BROWN of South Carolina:

H.R. 3861. A bill to suspend temporarily the duty on NeoHeliopan Hydro (2-Phenylbenzimidazole-5-sulfonic acid); to the Committee on Ways and Means.

By Mr. BROWN of South Carolina:

H.R. 3862. A bill to suspend temporarily the duty on Sodium Methylate Powder (Na Methylate Powder); to the Committee on Ways and Means.

By Mr. BROWN of South Carolina:

H.R. 3863. A bill to suspend temporarily the duty on Benzyl Acetone (Methyl-phenylethyl ketone); to the Committee on Ways and Means.

By Mr. BROWN of South Carolina:

H.R. 3864. A bill to suspend temporarily the duty on Globanone (Cyclohexadec-8-en-1-one)

(CHD); to the Committee on Ways and Means.

By Mr. BROWN of South Carolina:

H.R. 3865. A bill to suspend temporarily the duty on Agrumex (o-t-Butyl cyclohexanol); to the Committee on Ways and Means.

By Mr. BROWN of South Carolina:

H.R. 3866. A bill to suspend temporarily the duty on Acetanisole (Anisyl Methyl Ketone); to the Committee on Ways and Means.

By Mr. BROWN of South Carolina:

H.R. 3867. A bill to suspend temporarily the duty on Methyl Acetophenone-para (Melilot); to the Committee on Ways and Means.

By Mr. BROWN of South Carolina:

H.R. 3868. A bill to suspend temporarily the duty on Majantol (2,2-Dimethyl-3-(3-methylphenyl)proponal); to the Committee on Ways and Means.

By Mr. BROWN of South Carolina:

H.R. 3869. A bill to suspend temporarily the duty on NeoHeliopan MA (Menthyl Anthranilate); to the Committee on Ways and Means.

By Mr. BROWN of South Carolina:

H.R. 3870. A bill to suspend temporarily the duty on Allinat (Allyl isosulfocyanate); to the Committee on Ways and Means.

By Mr. BROWN of South Carolina:

H.R. 3871. A bill to suspend temporarily the duty on Frescolate (5-Methyl-2-(methylethyl)cyclohexyl . alpha-hydroxypropanoate); to the Committee on Ways and Means.

By Mr. BROWN of South Carolina:

H.R. 3872. A bill to suspend temporarily the duty on Thymol (alpha-Cymophenol); to the Committee on Ways and Means.

By Mr. BROWN of South Carolina:

H.R. 3873. A bill to suspend temporarily the duty on Phenyl Propyl Alcohol (Benxyl ethyl alcohol); to the Committee on Ways and Means.

By Mr. BROWN of South Carolina:

H.R. 3874. A bill to suspend temporarily the duty on Benzyl Cinnamate (Benzyl beta phenylacrylate); to the Committee on Ways and Means.

By Mr. BROWN of South Carolina:

H.R. 3875. A bill to suspend temporarily the duty on Trimethyl Cyclo Hexanol (1-Methyl-3,3-dimethylcyclohexanol-5); to the Committee on Ways and Means.

By Mr. CANNON:

H.R. 3876. A bill to establish the San Rafael Western Frontier National Heritage Area in the State of Utah, and for other purposes; to the Committee on Resources.

By Mr. CRANE (for himself and Mr. SHAW):

H.R. 3877. A bill to amend the Internal Revenue Code of 1986 and the Social Security Act to clarify rules for determining whether certain agent-drivers and commission-drivers are employees; to the Committee on Ways and Means.

By Mr. DEUTSCH:

H.R. 3878. A bill to enable the residents of the Bayshore Manor assisted living facility in Key West, Florida, to continue to receive supplemental security income benefits under title XVI of the Social Security Act; to the Committee on Ways and Means.

By Mr. EVERETT:

H.R. 3879. A bill to provide wage parity for certain Department of Defense prevailing rate employees in Alabama; to the Committee on Government Reform.

By Mr. FOSSELLA (for himself, Mr. TOWNS, Mr. MEEKS of New York, Mr. GRUCCI, Mrs. KELLY, Mr. OWENS, Mr. RANGEL, Mr. QUINN, Mr. GILMAN, Mrs. McCARTHY of New York, Mr. KING, Mr. ENGEL, and Mr. ACKERMAN):

H.R. 3880. A bill to provide a temporary waiver from certain transportation conformity requirements and metropolitan transportation planning requirements under the Clean Air Act and under other laws for certain areas in New York where the planning offices and resources have been destroyed by acts of terrorism, and for other purposes; to the Committee on Energy and Commerce, and in addition to the Committee on Transportation and Infrastructure, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. HEFLEY (for himself, Mr. McINNIS, Mr. SCHAFFER, and Mr. TANCREDO):

H.R. 3881. A bill to authorize the Secretary of the Interior to engage in studies relating to enlarging Pueblo Dam and Reservoir and Sugar Loaf Dam and Turquoise Lake, Fryingpan-Arkansas Project, Colorado, and for other purposes; to the Committee on Resources.

By Mrs. JOHNSON of Connecticut:

H.R. 3882. A bill to amend title XVIII of the Social Security Act to reform the Medicare physician payment update system through repeal of the sustainable growth rate (SGR) payment update system; to the Committee on Energy and Commerce, and in addition to the Committee on Ways and Means, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. NEAL of Massachusetts (for himself, Mr. SAWYER, Mrs. CAPITO, and Mr. MASCARA):

H.R. 3883. A bill to reduce temporarily the duty on N-Cyclohexylthiophthalimide; to the Committee on Ways and Means.

By Mr. NEAL of Massachusetts (for himself, Mr. MALONEY of Connecticut, Mr. FRANK, Mr. DEFAZIO, Mr. CONYERS, Mr. OLVER, Mr. GEORGE MILLER of California, Mr. TIERNEY, Mr. McGOVERN, Mr. MARKEY, Mr. LYNCH, Mr. ISRAEL, Mr. BROWN of Ohio, Mr. DUNCAN, Mr. CAPUANO, Mr. LAMPSON, Mr. MEEHAN, Mr. DELAHUNT, and Mr. TOWNS):

H.R. 3884. A bill to amend the Internal Revenue Code of 1986 to prevent corporations from avoiding the United States income tax by reincorporating in a foreign country; to the Committee on Ways and Means.

By Mr. PALLONE:

H.R. 3885. A bill to amend the Federal Food, Drug, and Cosmetic Act to require the Secretary of Health and Human Services to establish a tolerance for the presence of methyl mercury in seafood, and for other purposes; to the Committee on Energy and Commerce.

By Mr. ROTHMAN (for himself and Mr. WEINER):

H.R. 3886. A bill to require the Administrator of the Environmental Protection Agency to conduct a feasibility study for applying airport bubbles as a method of identifying, assessing, and reducing the adverse environmental impacts of airport ground and flight operations and improving the overall quality of the environment, and for other purposes; to the Committee on Energy and Commerce, and in addition to the Committee on Transportation and Infrastructure, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Ms. SLAUGHTER (for herself, Ms. DEGETTE, Mrs. MORELLA, and Mr. GREENWOOD):

H.R. 3887. A bill to establish a public education and awareness program relating to emergency contraception; to the Committee on Energy and Commerce.

By Mr. STEARNS:

H.R. 3888. A bill to provide for the conveyance of the National Forest System lands underlying the George Kirkpatrick Dam on the Ocklawaha River near Palatka, Florida, and related lands to the State of Florida; to the Committee on Agriculture.

By Mrs. WILSON of New Mexico (for herself and Mr. WELLER):

H.R. 3889. A bill to amend the Internal Revenue Code of 1986 to provide a tax credit for teachers and principals who work in certain low income schools; to the Committee on Ways and Means.

By Mr. DAN MILLER of Florida (for himself, Mr. DAVIS of Illinois, Mr. CLAY, and Mrs. MALONEY of New York):

H. Con. Res. 339. Concurrent resolution expressing the sense of the Congress regarding the Bureau of the Census on the 100th anniversary of its establishment; to the Committee on Government Reform.

By Mr. DOOLITTLE:

H. Con. Res. 340. Concurrent resolution supporting the goals and ideals of Meningitis Awareness Month; to the Committee on Government Reform.

By Ms. McCOLLUM (for herself, Mr. FARR of California, Mr. WALSH, Mr. PETRI, Mr. NADLER, Mr. McGOVERN, Mr. UDALL of New Mexico, Ms. WOOLSEY, Mr. HONDA, Mr. HALL of Ohio, and Mr. FORD):

H. Con. Res. 341. Concurrent resolution expressing the sense of Congress that Federal funding of the Peace Corps should be doubled to $550,000,000 by 2007, and for other purposes; to the Committee on International Relations.

By Ms. MILLENDER-McDONALD:

H. Con. Res. 342. Concurrent resolution expressing the sense of Congress that the people of the United States should be encouraged to rediscover attractions in the States in which they live; to the Committee on Energy and Commerce.

By Mr. HYDE (for himself, Mr. LANTOS, Mr. BALLENGER, Mr. MENENDEZ, Mr. GOSS, Mr. FARR of California, Mr. KOLBE, Mr. DELAHUNT, Mr. GILMAN, Mrs. TAUSCHER, and Mr. MORAN of Virginia):

H. Res. 358. A resolution expressing support for the democratically elected Government of Colombia and its efforts to counter threats from United States-designated foreign terrorist organizations; to the Committee on International Relations. considered and agreed to.

By Mr. NEY (for himself and Mr. HOYER):

H. Res. 359. A resolution providing amounts for further expenses of the Permanent Select Committee on Intelligence in the second session of the One Hundred Seventh Congress; to the Committee on House Administration.

By Mr. CAMP (for himself, Mr. BARCIA, Mr. ROGERS of Michigan, Mr. EHLERS, Mr. HOEKSTRA, Mr. SMITH of Michigan, Mr. KNOLLENBERG, and Mr. UPTON):

H. Res. 361. A resolution expressing the sense of the House of Representatives regarding the restoration and protection of the Great Lakes; to the Committee on Transportation and Infrastructure, and in addition to the Committees on International Relations, Resources, and Science, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. HASTINGS of Florida:

H. Res. 362. A resolution congratulating the 2002 United States Olympic Team, Salt Lake City, the State of Utah, the Salt Lake Organizing Committee, the International Olympic Committee, athletes from around the world, and all the security personnel who participated in the 2002 Olympic Winter Games in Salt Lake City, Utah; to the Committee on International Relations.

ADDITIONAL SPONSORS

Under clause 7 of rule XII, sponsors were added to public bills and resolutions as follows:

H.R. 68: Mrs. Kelly.

H.R. 250: Mr. Smith of Washington.

H.R. 325: Mr. Moran of Virginia.

H.R. 476: Mr. Berry.

H.R. 563: Ms. Berkley and Mr. Duncan.

H.R. 745: Mr. Lynch, Mr. Baird, and Mr. Frost.

H.R. 792: Mr. Tiberi.

H.R. 839: Ms. Lofgren.

H.R. 853: Mr. Rothman.

H.R. 997: Mr. Foley.

H.R. 1117: Ms. McCollum.

H.R. 1186: Mr. Owens.

H.R. 1211: Ms. Berkley.

H.R. 1307: Ms. Pelosi and Mr. Mascara.

H.R. 1401: Mr. Simmons.

H.R. 1535: Ms. Roybal-Allard.

H.R. 1636: Mr. Simpson.

H.R. 1667: Mr. Dingell.

H.R. 1718: Mr. Davis of Florida.

H.R. 1720: Mr. Gutierrez.

H.R. 1763: Mr. Rothman.

H.R. 1779: Mrs. Morella, Mr. Blagojevich, Mr. Pascrell, Mrs. Napolitano and Mr. Engel.

H.R. 1810: Mr. Matsui and Mr. Pascrell.

H.R. 1904: Ms. Schakowsky, Mr. Green of Texas, Mr. Moran of Virginia, Mr. Honda, Ms. Watson, Mr. Payne, and Mr. Pastor.

H.R. 1979: Mr. Portman, Mr. Kolbe, and Mr. Osborne.

H.R. 2037: Mr. Quinn, Mr. Hill, and Mr. LaTourette.

H.R. 2073: Mr. Frank.

H.R. 2125: Mr. Delahunt.

H.R. 2235: Mr. Osborne.

H.R. 2406: Mr. Frank.

H.R. 2487: Mr. Baldacci and Mr. Filner.

H.R. 2531: Mr. Blagojevich and Ms. Lee.

H.R. 2592: Mr. Rohrabacher.

H.R. 2721: Ms. Lee and Mr. Burton of Indiana.

H.R. 2799: Mr. Ross.

H.R. 2820: Ms. Carson of Indiana, Mr. Rodriguez, Mr. Rahall, and Mr. Phelps.

H.R. 2868: Mrs. Morella, Mr. Kucinich, Mrs. Maloney of New York, and Mr. Allen.

H.R. 2874: Mr. Frost.

H.R. 2941: Mr. Gillmor, Mrs. Kelly, and Ms. Hart.

H.R. 3026: Mr. Dooley of California.

H.R. 3058: Mr. Oxley.

H.R. 3083: Mr. Duncan.

H.R. 3183: Mr. Foley, Mr. Lynch, and Ms. Brown of Florida.

H.R. 3230: Mr. Abercrombie.

H.R. 3231: Mr. Peterson of Minnesota.

H.R. 3244: Mr. Doyle, Mr. Blumenauer, Mr. Goodlatte, and Mr. Schaffer.

H.R. 3279: Ms. Lee.

H.R. 3298: Mrs. Lowey.

H.R. 3321: Mr. Clement and Mr. Carson of Oklahoma.

H.R. 3331: Mr. Hoeffel.

H.R. 3397: Mr. Wilson of South Carolina.

H.R. 3450: Mr. Owens, Mr. Sandlin, Mr. McIntyre, and Mr. Rangel.

H.R. 3479: Mr. Nethercutt, Mr. Otter, and Mr. Turner.

H.R. 3481: Mr. Kennedy of Rhode Island and Mr. Crowley.

H.R. 3524: Mr. Baldacci, Mr. Frost, and Mr. Honda.

H.R. 3533: Mr. Hastings of Florida and Mr. Rogers of Michigan.

H.R. 3547: Mr. Rohrabacher.

H.R. 3569: Mr. Gillmor.

H.R. 3605: Mr. Calvert.

H.R. 3612: Mr. Ryun of Kansas, Ms. Norton, Mr. Clay, and Mr. Mascara.

H.R. 3624: Mr. Akin, Mr. Brady of Texas, and Mr. Lewis of Kentucky.

H.R. 3626: Mr. Terry and Mr. Langevin.

H.R. 3639: Mr. Baldacci.

H.R. 3657: Mr. Langevin and Mr. Kucinich.

H.R. 3661: Mr. English and Ms. Watson.

H.R. 3670: Ms. Carson of Indiana and Ms. Brown of Florida.

H.R. 3675: Ms. DeLauro, Mr. Gilman, Mr. Larsen of Washington, Mr. Filner, Mr. Frank, Mr. Bonior, Mr. Capuano, Ms. Schakowsky, Mr. McNulty, Mr. Wynn, Mr. Stark, Mr. Blagojevich, Ms. Slaughter, Ms. Harman, Mr. Evans, Mr. Doggett, Mr. Ackerman, Mr. Hoeffel, Mr. Rush, Mr. Nadler, Mr. Brady of Pennsylvania, Mr. Borski, Mrs. Christensen, Mr. Hall of Ohio, Mr. Lewis of Georgia, Mr. Luther, Mr. LaFalce, Mr. Udall of Colorado, Mr. Kucinich, Mr. Fattah, Mr. Olver, Mr. Cummings, Mr. Jefferson, Mr. Kildee, Ms. Kilpatrick, Mrs. Morella, Mr. Udall of New Mexico, Mr. Rangel, Mr. Gordon, Mr. Rothman, Mr. Menendez, Mrs. Napolitano, and Mr. Doyle.

H.R. 3676: Mr. Frank, Ms. Kaptur, Mr. McGovern, Mr. Conyers, Mr. Gilman, Mr. Hinchey, Mr. Faleomavaega, and Mr. Doggett.

H.R. 3679: Mr. Davis of Illinois.

H.R. 3710: Mr. Filner.

H.R. 3717: Mr. Simmons and Mr. Shimkus.

H.R. 3733: Mr. Peterson of Minnesota and Mr. Lynch.

H.R. 3741: Mr. Ryun of Kansas.

H.R. 3762; Mrs. Capito, Mr. Bartlett of Maryland, Mr. Latham, Mr. Tiberi, Mr. Gibbons, Mr. Greenwood, Mr. Reynolds, Mr. Isakson, Ms. Hart, Mr. Sensenbrenner, Mr. Green of Wisconsin, Mr. Walsh, Mr. Kolbe, and Mr. Shays.

H.R. 3792: Mr. Gilman, Mr. Brown of Ohio, Ms. Baldwin, Ms. Lee, Mr. Acevedo-Vila, Mr. LaTourette, and Mr. Ferguson.

H.R. 3803: Mr. Bereuter.

H.R. 3833: Mrs. Jones of Ohio, Mr. Deal of Georgia, and Mrs. Bono.

H.R. 3839: Mr. Tiberi.

H. Con. Res. 42: Ms. Pelosi, Mr. Mascara, and Mr. Rush.

H. Con. Res. 197: Mr. LaTourette,

H. Con. Res. 238: Mr. McGovern.

H. Con. Res. 271: Mr. Cantor and Mr. Hobson.

H. Con. Res. 320: Mr. Faleomavaega.

H. Con. Res. 328: Mr. Cummings, Mr. Wynn, Mr. McGovern, and Mrs. Napolitano.

H. Con. Res. 334: Mr. Burton of Indiana, Mr. Vitter, Mr. Aderholt, and Mr. Platts.

H. Res. 225: Ms. Watson.

H. Res. 346: Mr. Walsh and Mr. Shuster.

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 7 of rule XII, sponsors were deleted from public bills and resolutions as follows:

H.R. 3694: Mr. LaHood.

SENATE—*Wednesday, March 6, 2002*

The Senate met at 10 a.m. and was called to order by the Honorable BENJAMIN E. NELSON, a Senator from the State of Nebraska.

PRAYER

The Chaplain, Dr. Lloyd John Ogilvie, offered the following prayer:

Gracious God, all through our history as a nation You have helped us battle the enemies of freedom and democracy. Many of the pages of our history are red with the blood of those who paid the supreme sacrifice in just wars against tyranny. They are our distinguished heroes and heroines.

Today, we feel both grief and gratitude for the seven men who lost their lives in Afghanistan in the battle against the insidious enemy of terrorism. We ask You to comfort and strengthen their families, loved ones, and friends as they experience the anguish of their loss. Death could not end their gallant lives. We do not want to forget them or lose sight of the hallowed memory of their gallantry.

Renew our resolve to press on in the battle to rid the world of terrorism. Lord God of hosts, be with us yet, lest we forget what the men and women of our military are doing to assure us of the freedom of speech and the exercise of government we will enjoy today. Lord, continue to bless America and give us victory over the forces of evil confronting our world. Amen.

PLEDGE OF ALLEGIANCE

The Honorable BENJAMIN E. NELSON led the Pledge of Allegiance, as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. BYRD).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, March 6, 2002.

To the Senate:

Under the provisions of rule I, paragraph 3, of the Standing Rules of the Senate, I hereby appoint the Honorable BENJAMIN E. NELSON, a Senator from the State of Nebraska, to perform the duties of the Chair.

ROBERT C. BYRD,
President pro tempore.

Mr. BENJAMIN E. NELSON thereupon assumed the chair as Acting President pro tempore.

RESERVATION OF LEADER TIME

The ACTING PRESIDENT pro tempore. Under the previous order, the leadership time is reserved.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader.

Mr. DASCHLE. Mr. President, what is the pending business before the Senate?

NATIONAL LABORATORIES PARTNERSHIP IMPROVEMENT ACT OF 2001

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will now resume consideration of S. 517, which the clerk will report.

The assistant legislative clerk read as follows:

A bill (S. 517) to authorize funding for the Department of Energy to enhance its mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, and for other purposes.

Pending:

Daschle/Bingaman further modified amendment No. 2917, in the nature of a substitute.

AMENDMENT NO. 2980 AS MODIFIED

The ACTING PRESIDENT pro tempore. The majority leader.

Mr. DASCHLE. I send an amendment to the desk and ask for its consideration.

The ACTING PRESIDENT pro tempore. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from South Dakota [Mr. DASCHLE] proposes an amendment numbered 2980 to amendment No. 2917.

Mr. DASCHLE. I ask unanimous consent reading of the amendment be dispensed with.

Mr. MURKOWSKI. I object.

The ACTING PRESIDENT pro tempore. The objection is heard.

The clerk will read the amendment.

The assistant legislative clerk read as follows:

At the appropriate place, insert the following:

"(e) PROHIBITION ON CERTAIN PIPELINE ROUTE.—No license, permit, lease, right-of-way, authorization or other approval required under Federal law for the construction of any pipeline to transport natural gas from lands within the Prudhoe Bay oil and gas lease area may be granted for any pipeline that follows a route that traverses—

"(1) the submerged lands (as defined by the Submerged Lands Act) beneath, or the adjacent shoreline of, the Beaufort Sea; and

"(2) enters Canada at any point north of 68 degrees North latitude."

At the appropriate place, insert the following:

"(d) STATE COORDINATION.—The Federal Coordinator shall enter into a Joint Surveillance and Monitoring Agreement, approved by the President and the Governor of Alaska, with the State of Alaska similar to that in effect during construction of the Trans-Alaska Oil Pipeline to monitor the construction of the Alaska natural gas transportation project. The federal government shall have primary surveillance and monitoring responsibility where the Alaska natural gas transportation project crosses federal lands and private lands, and the state government shall have primary surveillance and monitoring responsibility where the Alaska natural gas transportation project crosses state lands."

Mr. REID. I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. LOTT. Mr. President, I ask unanimous consent the call of the quorum be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. LOTT. Mr. President, I ask consent that the pending issue be set aside temporarily so I may make an opening statement on my leader time, without anybody losing their rights.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. LOTT. I thank Senator DASCHLE and Senator MURKOWSKI for allowing me to do this.

We are soon going to be proceeding with the amendments on this very important issue. I have said several times, and I believe it and mean it sincerely, that having a national energy policy is one of the two most important things we will try to accomplish this year. After providing adequate needs for the defense of our country and in the war against terrorism, having a national energy policy is the next most important. While a lot of other issues are critical and we need to address them, this is a very serious matter.

I focus today on my belief that American dependence on foreign oil directly threatens our national security and our freedom. I think it is even bigger than that. It is also about economic freedom. If we do not address this question in a very broad and comprehensive way, the time will come—maybe even this summer once again—when we will have rolling brownouts, and someday, perhaps, blackouts, as well as gas lines again. We need a comprehensive, broad, national policy to avoid that. If we do not do that, we could get to a situation where, for some reason, foreign oil imports should be cut off or a high percentage should be cut off or we decide we will not continue to be dependent on Iraqi oil, or any number of upheavals could affect us immediately. It could affect not only our lifestyles but affect the economy and the jobs on which people depend. Energy is essential to the creation of jobs, whether in the steel industry, the poultry industry, agriculture, or fisheries on the Gulf of Mexico where I live.

I am beginning to think there are people who believe when you flip the switch and the power comes on, it magically appears out of this wire. Somewhere behind that wire are a lot of things we need to have. We need to have transmission lines. We need to have a plant somewhere that is creating that power that is wheeled through those lines. And the energy that fuels that plant has to come from somewhere.

In this bill that we are starting off with, I think we have a very bad product. I am not going to belabor the process of how we got here, but it seems to be a continuing, changing process. The Energy Committee didn't act. The Commerce Committee couldn't act on the CAFE standards. The Finance Committee did finally get together and it produced a $15 billion tax incentive package, but there is some concern about whether or not that should be offset or how it would be offset. So there is going to have to be a lot of work done on this bill to make it acceptable.

I think in the bill as it starts out, far too much is dependent on conservation and alternative fuels and not wanting to sufficiently address the production side. I think we need both. I am for encouraging conservation with incentives. I am for alternative fuels. I am for renewables. I am for using tax incentives to get these marginal wells back in production. But I also want the other side of that equation. I don't think we can conserve ourselves into an energy policy or, by reducing what we use, not be threatened by this energy area.

I hope we will work to come up with a comprehensive package at the end that is worth voting on, to send it on to conference. The Senate has been developing a pattern now of starting off with bad bills or partisan bills. When you do that, you are almost destined to get to a point where you cannot get a result.

We have not been able to move forward on energy for a year but now, thank goodness, we are going to have this full debate. I am appreciative of that, although I am very worried about the way it is starting. It smells like a stimulus bill or an agriculture bill in terms of how it is written. Maybe that will not be the case. I, for one, have started out by saying: Let's not focus on the negative. Let's just go forward and do our work. Let's have amendments, let's have votes, let's improve this bill. I may be disappointed in the end and some people will come to me and say: See, I told you so, you can't fix this thing.

But I am like Nehemiah in the Bible in building the wall. He believed the wall could be built. The people didn't believe it, but they trusted him and they kept working and kept working and they built the wall. We are trying to build a wall here, and this wall is an energy policy for our country.

So I do think there is a problem that affects our national security in the first instance. There are a lot of explanations why we do not have a national energy policy. We can blame a lot of people. There will be those who quickly say: Blame your neighbor's SUV. I have one. I have three grandchildren. I like them to be able to ride in the same vehicle with me. Or blame the oil companies—oh, the polluters. What do they think we are going to drive the economy with without oil and natural gas and coal and nuclear—the whole schmear. Or the automobile makers, it is easy to blame the automobile makers.

Unfortunately, we blame the domestic ones more than we do even the international ones—I am not criticizing them because they are putting their plants in America and we are glad to have them. They can help us, perhaps, produce better automobiles that have better fuel economy. I hope it is not done just by cutting them in half, which is what you get when you go in Europe. I can't even get into those things they have over there, or any of the other usual scapegoats.

Before we do that, just consider this fact. America is one of the leading energy-producing countries in the world. This country has the technology, alternative resources, and enough oil and natural gas to make itself much more self-sufficient. America does not have to revert back to the practices of the 1970s. The country is faced with a serious problem because previous Congresses and previous administrations—blame everybody—didn't do what needed to be done in this area because it was too hard. These issues are not easy, trying to come up with an agreement that will provide a positive result. Whether it is in the fuel efficiency area, in the production area—every one of them is very difficult to work out to an agreement and compromise that will pass.

As a result, crude oil production is down significantly in this country as consumption continues to rise. America now imports 56 percent of the oil it consumes, compared to 36 percent at the time of the 1993 Arab oil embargo. We had long gas lines and we had huge debates in the Congress, particularly in the Senate, over what to do about our energy needs. We acted as if we thought maybe we had done enough. Obviously it didn't work because our dependence on foreign oil had gone up.

At the rate it is going, the Energy Department predicts America will be at least 65-percent dependent on foreign oil by 2020. That alarms me and I bet it does most Senators—and most Americans, when you think about it—when we are dependent on oil that comes from some very dangerous parts of the world, in many cases, or some cases very unstable governments.

We cannot continue down this path. This bill has to be passed so that will not be what happens. We need a national energy policy that will enhance national security by reducing this dependence on foreign energy sources. We need a policy that provides incentives for the use of natural gas—a fuel which can burn cleanly in internal combustion engines and which is abundant within our borders, especially the Gulf of Mexico, right in front of my house where I live. It is out there. Some of it is being taken out of the gulf now. A lot more could be done, but we have a huge battle to try to make use of areas such as the Destin Dome in the Gulf of Mexico, which I think is at least 100 miles from the shoreline. There is no need, no reason we should not pursue that. Natural gas is not oil, for one thing. You don't spill it.

We should also call on America to utilize other domestic resources through incentives which encourage the use of marginal oil wells and the billions of barrels of oil we have in Alaska. Likewise, we should not ignore the use of renewable energy resources such as solar power, hydropower, or wind power. Can we get a substantial percentage of our needs out of that area? I doubt it, although I think hydropower can produce significant amounts. Maybe we can get some help from solar or wind. I doubt if we will ever exceed 3 or 4 or 5 percent, but that is not small potatoes. Let's do that, too. However, Congress must acknowledge that America cannot realistically run only on renewable energy resources. We must be realistic and provide a bridge to our energy future.

Despite the most advanced technology and ingenuity, tomorrow's energy sources will not answer the energy needs of today. Coal, oil, and natural gas remain our most abundant and affordable fuels, and they can be used in environmentally sound ways.

My State doesn't produce a lot of coal. We have some lignite, and we are beginning to make use of it. But I believe clean coal technology is out there. I believe we can use coal and use it in a much cleaner way. We need to have encouragement to do that. Some 55 percent of the electricity generated in the United States comes from coal-fired, steam generating plants. Coal can make a significant contribution to U.S. energy security if the environmental challenges of coal-fired plants can be met. Congress should enact legislation which will provide credits for emissions reductions and efficiency improvements.

We are going to have that in this bill. Some are in it and I hope there will be even more. Congress must also provide incentives for independent producers to keep their wells pumping. Tax credits for marginal wells will restore our link to existing resources, including many in my own home State of Mississippi. We are not a big oil producing State, but we do have some oil and the wells are pumping now. The wells are marginal, but they can produce five barrels a day which can make a difference.

These wells are responsible for 50 percent of the U.S. production. We should give even more incentives to keep that percentage at least in place.

We also need to increase the availability of domestic natural gas, which is the clean alternative for coal in electric power plants. Federal land out West may contain as much as 137 trillion cubic feet of natural gas. Similarly there is Federal land in Alaska which is estimated to contain 16 billion barrels of domestic crude oil. None of these facts should be surprising.

There has to be a solution to this problem. Some would say that all we need to do is improve energy efficiency and reduce energy consumption.

Is that the way we do things in America? No. In America we make things better—more efficient and better. Are we saying you have to learn to live with less and that we can't have it as we did? That is not the American spirit. We can produce more. We can be more energy efficient. We can do all of it if we make up our minds to do it.

While there is a place for energy efficiency incentives in developing a natural energy policy, we must not starve our economy of the energy it needs to maintain and improve our standard of living. In the long run, a national energy policy that looks at all realistic sources of energy must be developed.

This is not the 1970s. America has better technology, more efficient and cleaner automobiles, as well as more energy options. The question is, How long will we forgo these options and be held hostage to nations abroad or extremists at home who do not want us to do what can and should be done? America must tap the vast resources we have. America can solve its energy problems but Congress must act in the interests of the entire Nation, rather than a select few, or with a defeatist attitude. Providing families the security and freedom they deserve depends upon stable, reliable, clean, and affordable energy. America badly needs a comprehensive, but realistic, national energy policy, and we need it now.

I say again that while I might object to the content of the bill we are beginning with and the process used to get here, we are on it. So let us make our opening statements. Let us get the amendments started. Let us see if we can't produce a bill that we can send to conference and get this job done.

The President of the United States wants us to do this. He knows we have to do it. He raised it in a meeting just yesterday. He didn't say you have to do it this way or that way. I know he wants us to get access to oil in ANWR and other places in this country. I know he wants us to have a realistic CAFE standard. But he is not saying you have to do it my way to get it done.

Mr. Chairman and Senator MURKOWSKI, let's roll.

I yield the floor.

Mr. DASCHLE. Mr. President, I compliment the distinguished Republican leader for his statement. While there are some things that might divide us on the issue, there is a lot he just said that I agree with wholeheartedly. This country needs an energy policy. We ought to be moving forward. We can do both in terms of comprehensive conservation and comprehensive production incentives. So I thank him for the spirit in which he has begun this debate.

For those who have expressed some concern about the way this bill came to the floor, I will just say that this is the way the last energy bill came to the floor in May and June of the year 2001. But I want to address very briefly the amendment I have just laid down.

One of the most significant, responsible ways in which to increase production and improve our Nation's energy security is to build a pipeline to bring natural gas from Alaska to the lower forty-eight states.

There are 35 trillion cubic feet of known natural gas reserves on the North Slope of Alaska. Right now, that gas is being pumped back into the ground because we have no way of getting it to people. In the energy bill we are now debating, Senator BINGAMAN and I have proposed a 2,000-mile long gas pipeline that would create 400,000 jobs, use an estimated 5 million tons of U.S. steel, and ensure that we do not become dependent on imported liquefied natural gas. If we want to create jobs, increase our energy security, and help the U.S. steel industry, building this pipeline is the way to do it.

Last week, Alaska Governor Tony Knowles suggested some refinements in the legislation that would ensure that American workers, and in particular, Alaskans, get the greatest benefit from this project.

In particular, Governor Knowles urged us to ensure that the pipeline follow what is known as the southern route down the Alaska Highway. This will ensure that much of the pipeline is constructed in Alaska and that it avoids the environmental pitfalls that construction could have on the fragile northern Alaska environment and the Beaufort Sea.

Second, he asked that we clarify the rules for State and federal cooperation, to ensure that the development of the pipeline proceed as smoothly as possible. Both of these issues are addressed in the amendment we are offering today. Other changes that Governor Knowles has requested include guaranteeing access to the pipeline for new natural gas producers that may arise in the future, protecting the ability of Alaskans to have access to the natural gas that will be transported in the pipeline, and establishing a tax incentive to reduce the risk associated with natural gas price volatility.

Senator BINGAMAN is working closely with others to develop language on these issues, and I would expect the final product of these deliberations to be added to the energy bill prior to final passage.

Energy for America, jobs and opportunity for Alaskans, and no damage to sensitive environmental areas should all be goals to which we can subscribe. This legislation, and this amendment in particular, allow us to do that with even greater confidence.

I yield the floor.

AMENDMENT NO. 2980, AS MODIFIED

Mr. DASCHLE. Mr. President, I have a modification of the amendment at the desk.

The ACTING PRESIDENT pro tempore. The amendment is modified.

The amendment (No. 2980), as modified, is as follows:

Insert the following after Section 704(d):

"(e) PROHIBITION ON CERTAIN PIPELINE ROUTE.—No license, permit, lease, right-of-way, authorization or other approval required under Federal law for the construction of any pipeline to transport natural gas from lands within the Prudhoe Bay oil and gas lease area may be granted for any pipeline that follows a route that traverses—

"(1) the submerged lands (as defined by the Submerged Lands Act) beneath, or the adjacent shoreline of, the Beaufort Sea; and

"(2) enters Canada at any point north of 68 degrees North latitude."

Insert the following after Section 706(c):

"(d) STATE COORDINATION.—The Federal Coordinator shall enter into a Joint Surveillance and Monitoring Agreement, approved by the President and the Governor of Alaska, with the State of Alaska similar to that in effect during construction of the Trans-Alaska Oil Pipeline to monitor the construction of the Alaska natural gas transportation project. The federal government shall have primary surveillance and monitoring responsibility where the Alaska natural gas transportation project crosses federal lands and private lands, and the state government shall have primary surveillance and monitoring responsibility where the Alaska natural gas transportation project crosses state lands."

Mr. BINGAMAN. Mr. President, let me speak very briefly on the same issue that the majority leader raised.

I also believe it is very important for us in this legislation to facilitate construction of this pipeline from the

North Slope of Alaska to bring natural gas to the lower 48 States. This is an issue that my colleague from Alaska, Senator MURKOWSKI, has been urging for some time. I know Senator STEVENS, as well, strongly supports it. I know that virtually all of us on the Energy Committee have believed construction of this pipeline needed to be a priority item as part of a comprehensive energy plan. That is why we included it in the legislation that is before the Senate today.

The amendment Senator DASCHLE has now offered would change what we have in the bill in a couple of important respects. The main thing it would do is ensure that the so-called southern route be chosen. This is again something that I know all of the representatives from Alaska have urged on us. I know Governor Knowles has urged this in testimony before the Energy Committee. He urged that this be done.

The bill we have introduced did not specify that the southern route was the only option. We were route neutral in the bill that is before the Senate because we believed that was an issue and a river we weren't ready to cross. But at this stage, I think it is clear that this southern route, which was authorized in the previous legislation that was passed in Congress a couple of decades ago, is part of our international treaty with Canada. It recognizes that there are environmental advantages if we follow this existing transportation route.

I think there are substantial advantages to be argued in favor of doing this southern route. I know it has been a priority for, as I say, the Governor of Alaska and the Senators and the Representative from Alaska for a long time. I think it will improve the bill.

It will make it clear that the Senate is anxious to see the jobs created in Alaska and that it is anxious to see the economic benefits. It recognizes that the environmental benefits are substantial as well.

I will support the amendment as it is proposed. I hope we can get strong bipartisan support for it. As I say, it is one of those issues we have debated for a long time. We brought the bill to the floor with a route-neutral provision in it. Now that would change, but it would change with my support.

I yield the floor.

Mr. REID. Mr. President, I hope my name will be added as a sponsor of this Daschle-Bingaman amendment.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. REID. Mr. President, I have not had an opportunity to speak on this legislation. I am going to speak generally about the legislation, but in particular to this amendment. For those who are interested, I think we have a clear description of what this legislation, as amended, would do. Basically it brings the route down through Alaska. It is a route of over 2,000 miles.

The amount of jobs it would create is very significant. It would create 400,000 new jobs. And this is an unbelievably large figure, but it is accurate. This is pipe that is more than 50 inches in diameter. We would need 5 million tons of steel. I would hope it would be U.S. steel: 5 million tons. It is hard for me to comprehend that, but that is what it would take.

The bill would provide $10 billion in loan guarantees for the construction of this pipeline and would bring 35 trillion cubic feet of natural gas to the lower 48 States. That is significant.

We can all readily agree that the United States needs to lessen its dependence on foreign oil. The best way to reduce our dependence on foreign oil is to diversify our energy supply by developing renewable energy resources. We also would hope to adopt a CAFE standard. My understanding is that there is a bipartisan agreement being worked out as we speak, if it has not already been worked out. We were close to working it out yesterday. Senator KERRY and Senator McCAIN are working out something on CAFE standards. Another way to reduce our dependence on foreign oil is to improve the energy efficiency of our homes and appliances.

That is how we can best lessen our dependence, reduce our demand on foreign oil: diversify our energy supply by developing renewable energy resources, adopt a CAFE standard, and improve the energy efficiency of our homes and appliances.

It is also obvious that the demand for natural gas is increasing worldwide. In the United States, natural gas consumption is expected to outpace current supply sources over the next 10 to 20 years, creating a shortfall of more than 6 trillion cubic feet by the year 2020. But remember, this legislation would immediately bring to the lower 48 States 35 trillion cubic feet of natural gas. So we would not have the 6 trillion cubic feet shortfall if we are able to produce this gas line.

In Nevada, 29 percent of our electricity needs are now met by natural gas, and that fraction will only grow over time. There is the construction now of a number of powerplants in Nevada to meet the needs of California and, particularly, Nevada.

Clearly, the future favors natural gas as a primary source of electricity in our country. Rightfully, many fear the United States will become as dependent on imported liquid natural gas in the future as we are on oil today. That is why this southern route is so important to our country.

I support the provisions of this act before us. I particularly support this amendment. This amendment would increase the supply of domestically produced natural gas available to U.S. consumers by expediting the construction of a natural gas pipeline from Alaska's North Slope to the lower 48 States.

I do not think there is a question of whether we are going to build the pipeline; it is a question of where we are going to build it. That is why there has been a general agreement we need to go with the southern route, not the northern route, for a number of reasons, not the least of which is the need to help Alaska as much as we can.

There is more than 35 trillion cubic feet of natural gas immediately available in the Alaskan North Slope, gas that is pumped back into the ground because we have no way of getting it to the people. That is inefficient. We save a lot of it by pumping it back into the ground, but we do not save it all.

It is estimated that the total natural gas available from the Alaska North Slope is more than 100 trillion cubic feet. The pipeline would provide natural gas to American consumers for at least 30 years, and it would be a stabilizing force on natural gas prices.

We have heard a lot from my friend, the distinguished ranking member of the Energy Committee, Senator MURKOWSKI, about how many jobs ANWR would create. But the jobs ANWR would create are simply not as great as these 400,000 new jobs. The pipeline would provide a significant opportunity for the U.S. steel industry, requiring up to 2,100 miles of pipe and, as I have indicated before, 5 million tons of steel.

The Alaska natural gas pipeline is a responsible way to address our Nation's growing demand for natural gas. It means energy independence and jobs, a winning combination.

We may have some disagreement with the distinguished Senator from Alaska on whether we should drill in ANWR, but there is no controversy, dispute, or question about the fact that we need to do everything we can, as quickly as we can, to bring the natural gas from Alaska to the lower 48 States.

That is why the Governor of Alaska is totally supportive of what we are doing. Senator STEVENS—and I am confident Senator MURKOWSKI—support what we are doing. Of course, if there is something that is wrong with this amendment that does not meet the demands of Senator MURKOWSKI, we would be happy to speak with him. But as far as I know, in the meetings that have been on his staff level, we are headed in the right direction.

This amendment has two parts. It would ban the so-called "over the top" route for the pipeline—what we are talking about is, it would ban this route shown on the chart here—by prohibiting the issuance of any of the necessary Federal permits.

Governor Knowles' testimony is significant. He testified before the Energy Committee. Among other things, Governor Knowles said:

> I respectfully suggest there are three essential components of this vitally important legislation. First, the route must be mandated along the Alaska Highway, as provided for in the 1976 Alaska Natural Gas Transportation Act. Second, this legislation must build American industry and create American jobs. Third, there must be economic incentives to attract the private capital to the project which when completed will substantially add to the national treasury.
>
> There are many reasons why the route of the gasoline must follow the existing oil pipeline from the Alaska North Slope to Fairbanks and then the Alaska Highway through Canada to Alberta.
>
> It is currently authorized in ANGTA [Alaska Natural Gas Transportation Act] and a presidential decision. It is part of an international treaty with Canada. It recognizes the environmental advantage of following existing transportation corridors. It allows vitally important access to the gas for the residents and businesses in Alaska. For these reasons, this route has the broadest support among Alaskans of any major project in recent history.
>
> Additionally, there are serious concerns over the proposed alternative route commonly known as the northern or "over the top" route. This route would originate on the Alaskan North Slope then proceed 240 miles under the ice-choked Beaufort Sea to the Mackenzie River Delta and then up that river drainage to Alberta.
>
> First and perhaps the most significant opposition to that route has come from the unanimous objections of the North Slope Inupiat Eskimos. At a recent public hearing, their corporate, community, and tribal leaders vowed they would use every resource available to them to fight this route, which would threaten their cultural and nutritional dependence on marine mammals.
>
> Second, both Alaskan and national environmental organizations have said they too strenuously oppose this ill-conceived frontier route. Calling for previously untested technologies and risky ventures underwater, this project could never be considered as a preferred alternative to an existing land transportation corridor.

This is the Governor of Alaska. I quoted him verbatim.

The southern route, as he indicated, is authorized in ANGTA and is part of an international treaty with Canada. It recognizes the environmental advantage of following the existing transportation corridors and allows access to gas for Alaskan residents.

There are serious concerns, environmentally and socially, over the northern "over the top" route. As indicated, the Northern Slope Eskimos strictly oppose this. Environmental organizations oppose this.

For these reasons, the Alaskan delegation, to my knowledge, is supportive of the southern route.

One of the myths that we have heard is the Alaskan natural gas pipeline will create less jobs than drilling in the Arctic Refuge. We do not need a battle over which creates the most jobs, but I do say that the Congressional Research Service, which is an investigative arm of this body, estimates only 60,000 jobs would be created by drilling in the Arctic Refuge—only 60,000 jobs. I recognize that is a lot of jobs.

Certainly, even for Nevada, a State that is probably three times the population of Alaska, 60,000 jobs would be a lot of jobs. I am sure the Presiding Officer, if he lost 60,000 jobs in Nebraska, would take note. He would take further note though that the Congressional Research Service reports that building the Alaska natural gas pipeline would create more than 400,000 new jobs according to industry estimates and require roughly 5 million tons of U.S. steel and 2,100 miles of pipe. The energy bill would provide $10 billion in loan guarantees for the pipeline.

This is a good amendment. It is not only a good amendment, it is a good bill. This bill does some things important for the State of Nevada. We have been very concerned about the FERC having too many new broad authorities at the expense of State authority. In reality, under this Senate bill, FERC is given limited authorities that both Democrats and Republicans have advocated for years to oversee the reliability of the grid and require that all utilities play by the same transmission rules. California and Nevada were hurt significantly during the past year by actions of FERC, and this certainly will not strengthen FERC's role.

Some loopholes in FERC's merger review authority are filled, but the bill does not deregulate the electricity industry. In fact, some needed FERC authorities are strengthened, as indicated by both Democrats and Republicans, to ensure markets can be relied upon to provide low-cost electricity.

Another myth is that the Senate energy bill fails to exploit the Nation's potential to produce and use oil and natural gas. In reality, oil and natural gas will continue to play an integral role in the U.S. energy policy. This bill before the Senate provides $4.6 billion in tax incentives for oil and natural gas and $10 billion in loan guarantees, as we have talked about this morning, to build the Alaska natural gas pipeline which will bring 35 trillion cubic feet of natural gas to the lower 48 States.

Nevada has no coal. We are rich in other minerals. We are the third largest producer of gold in the world behind South Africa and Australia. We produce large quantities of silver and other precious metals. We don't have any coal—good coal or bad coal—but we still understand the importance of coal in America.

The United States is the Saudi Arabia of coal. We have more coal than any other country. We want to overcome the myth that some are saying this legislation will limit the use of coal in the United States. Quite to the contrary, the energy bill provides $1.9 billion in tax incentives for clean coal and establishes extensive clean coal research programs. The bill will ensure the use of clean coal in the United States and clean air in the future.

Outside Reno we have a power plant that was initiated with clean coal technology. It couldn't have been built with clean coal technology without the Federal Government helping Sierra Pacific Power do that. I am a big fan of using coal but using it in a different method than we have used in the past. Clean coal technology is something we have to rely on and do more than what we have done before. This legislation crafted by Senator BINGAMAN will allow us to do that.

I hope we can move this legislation as quickly as possible. We have so much to do in the Senate. The leader has said we are going to finish campaign finance reform. We have all the many items we talked about for so long that we have to do, now that we are a little bit removed from September 11, even though that still is our first fixation. Prescription drug benefits is something we have to work on. We have all the appropriations bills to pass.

We recognize we need an energy policy. I commend and applaud the Senator from New Mexico, chairman of this committee, for this work of art, some would say, he has given to us. He has worked hard. We have a good piece of legislation. I look forward to working with him and Senator MURKOWSKI to come up with an energy policy for this country and move this legislation out of the Senate, move it to the House where we can have a conference, and come back with something for the President to sign.

The ACTING PRESIDENT pro tempore. The Senator from Alaska.

Mr. MURKOWSKI. Mr. President, the pending business before the Senate is Senator DASCHLE's amendment to the pending underlying bill, S. 517; is that correct?

The ACTING PRESIDENT pro tempore. The Senator is correct.

Mr. MURKOWSKI. I join with Senator STEVENS and certainly our colleague on the House side, Representative YOUNG, and commend the majority for introducing this amendment that selects a southern route for the development of natural gas from the State of Alaska.

I believe that while we have supported without exception the designation of the southern route, the amendment in itself is not complete and does not represent the total interest of Alaskans. I will explain that further.

First of all, it is appropriate to note that as far as the responsibility of the Senate is concerned, we have finally met one responsibility associated with the energy bill; that is, to have bipartisan support for the designation of the southern route. It is also appropriate to recognize that the House initiated this some time ago. It is in H.R. 4, the specific designation of a southern route.

I was very glad to see the leader was so anxious to bring this up as the first amendment from the majority. It shows that Alaskans can prevail—our Governor, our Lieutenant Governor, Senator STEVENS and myself, Representative YOUNG.

On the other hand, in the interest of full disclosure, it is appropriate to note that my objection, when the majority leader asked unanimous consent to terminate reading of the amendment, was that I had not seen the amendment and believed it should have been read. I have seen the amendment and, as a consequence, believe that while the amendment, certainly in general terms, addresses the bottom line—namely, the southern route—it does not address what Alaskans want. What Alaskans want is a little broader series of alternatives.

I will be working with the majority in hopes that we can include that in the amendment. Of course, I will be a cosponsor of the amendment.

Specifically, what Alaskans want is to have alternatives for that gas, that 37 trillion cubic feet of gas that lies beneath the oil fields of Prudhoe Bay. What are those alternatives? They primarily are associated with utilizing that gas in Alaska on several alternative routes if, indeed, the economics support routing. As the President is well aware, our oil goes down to Valdez, AK, through the 800-mile pipeline and moves down the west coast of the United States to Washington, to California, where it is refined.

There has been for many years promotion of an idea that one of the potential markets for Alaska's gas—because there is every reason to believe we are going to find more gas than the 37 trillion cubic feet we found accidentally hunting for oil—is the ability to liquefy that gas and either ship it down the west coast of the United States or ship it to the Orient. There have been projects where millions of dollars have been expended exploring the route. Not too many people in this body know that in the early sixties, the first LNG in Japan came from Alaska, a million tons a year. That contract has been renewed and a new fleet of ships has been built. Alaska is no stranger to exporting LNG. It came from a field near Anchorage, and the reserves there are somewhat limited or we would be exporting more LNG from that point.

The point of this discussion is to make sure that we are not solely bound to this southern route that is offered by the Majority Leader. I might add that we are going to have some charts to show you because I think it is important that you understand that the southern route, as it is conceived, from the Prudhoe Bay area, follows an existing pipeline approximately down to Fairbanks. Then it takes off in Fairbanks and goes down toward the delta area, where it branches off and goes to Valdez.

This amendment, in general, would cover the southern route, the highway route. But we want to make sure it does not exclude, if you will—because the possibility of exporting LNG is very real, and it has been promoted for some time—I want to make sure that is included as an alternative.

Secondly, we have every reason to believe that in the area associated with Point Mackenzie in the Matanuska Valley, where they are putting in a port development, that we have the availability of gas to come down from Fairbanks, perhaps under the railroad right of way, and come into the particular area ahead of Cook Inlet and the Matanuska Valley, where there is a port being built.

Then there is the recognition that Anchorage receives most of its gas from the fields of Cook Inlet and the Kenai area. We want to make sure Anchorage has access to this gas. Further, we have large petrochemical plants in Alaska—the only year-round manufacturing facilities we have, as a matter of fact, so we think they are large, but they are small by U.S. standards, like the ones down on the Kenai Peninsula. So I don't want to see this amendment limited to strictly a southern route so that would market the gas only through Canada and into the lower 48. We want the market to dictate where this gas goes. It is important.

Unfortunately, the way this was handled, I can only assume that there is a process here that might involve a little politics. I was prepared to offer, in my amendment—which would mandate a southern route—that would specifically contain alternatives that are certainly in the interest of Alaska. I have not seen the correspondence from our Governor or Lieutenant Governor to the majority. So I cannot comment on how broad the request was from the standpoint of inclusion and having alternatives. But I know from my contacts with Alaskans they want alternatives, and they don't want to be limited by this amendment to one specific designated southern route that would not allow the availability of those alternatives.

Let me put it another way. We want to make sure the market dictates the alternatives of either bringing it down toward Anchorage, bringing it down toward the Kenai Peninsula and the Matanuska Valley and the port that is under development there, as well as having the availability of bringing it further down toward the delta and then down to Valdez, where we could liquefy it.

So I am very sensitive about this and hope that we can work with the majority to include in this amendment a comprehensive accommodation, since we are so interested this morning—I must say I am very pleased that this isn't the first amendment of the majority where they chose to be responsive to our concerns in our State. Again, I remind my colleagues that H.R. 4, of course, already designated a southern route. But I sense a certain eagerness to accommodate a gas pipeline, and I am wondering to what extent. I have the strange feeling that it is at the expense of ANWR.

We are going to have an opportunity to talk about ANWR and to provide an amendment. But I think there is an interesting point that has been overlooked. Since the majority was so anxious to accommodate us, in the sense that we have had this issue before us relative to the gas pipeline for so long, I am curious to know why it wasn't in the underlying bill. But beggars cannot be choosers, and it is in here this morning and I am very pleased.

I see my good friend seeking recognition. I will respond to his question.

Mr. BINGAMAN. Mr. President, I thought it appropriate that I try to respond to the Senator from Alaska. I tried to explain earlier that my thinking at the time we put the bill together for consideration in the Senate was that we should bring a bill to the Senate floor that was route neutral. We had received urging that we prohibit use of the northern route. But it did not seem to me, knowing what we did at that point, that was the right course. Since then, we have gotten more information from the Governor of Alaska, from the Senators from Alaska, from the environmental community, and from those who currently hold a right of way to construct the pipeline under existing law. It seems to me the weight of the evidence is clearly in favor of the amendment that Senator DASCHLE has now proposed and for which I think we have good bipartisan support. I point out also that this amendment does not limit options as far as where the pipeline goes, except that it prohibits the use of the northern route. That is what it does.

Clearly, I think the consensus now in the Senate among those I have spoken to is that is the correct course to follow, and I think that is what we are trying to do by this amendment.

Mr. MURKOWSKI. Mr. President, I appreciate the response of my good friend, Senator BINGAMAN, and he is my friend. We have worked on this issue. I appreciate his explanation. But I have to refer to the fact that route issue has been around for a while because the House had it in its bill. Of course, we were not a party to the process of developing the underlying bill as the minority, so we didn't have an opportunity to address the route issue, and the bill came in route neutral.

Today, it is no longer route neutral. We appreciate that fact. We will cosponsor it, but we are going to add a little more to it. I am sure the majority would agree it is in the interest of Alaska, since we are anxious to make that accommodation. Again, we are most appreciative. But it didn't just come up. It came from H.R. 4, and we have always been in favor because, obviously, the other alternative is simply to take the gas over the top, so to speak, as you can see, from Prudhoe Bay. You take it along the Arctic Ocean off the 1002 area of the Arctic National Wildlife Refuge, over into Canada, and then come down.

Obviously, that is in the best interest of Alaska, not in the best interest of jobs.

In any event, the amendment is the pending business. We are going to have Members talk this morning, giving their opening statements on the energy bill. I believe there is an effort to accommodate our friend from Utah for a short statement on the successful Olympics. We certainly congratulate him and his colleague for providing us that great, extraordinary experience.

There are a couple more comments I do want to make relative to the comparison between the gas line development and the prospects of whether or not some see it as a tradeoff for ANWR. I assure the majority that these two issues are not quid pro quo issues; they have to stand on their own, as they should. It is unfortunate they have come up in the same time sequence, but that is the reality of the way things happen.

Again, as we look at where we are in the debate, as we look at the reality that the majority has chosen this as their first amendment, had we had an opportunity to offer the first amendment, it would have been a similar amendment, but it would have been more inclusive for Alaska allowing for alternatives.

I want to make sure my Alaska friends know the order of preference. When you are in the minority, you are in the minority. That is the harsh reality. The majority has every right to present this as their first amendment. But I want to make it very clear, had they not, we would have presented this as our first amendment. It would have been broader. It would have been more inclusive.

I have a couple more points to make. Again, this amendment does not address the crucial underlying feature associated with this gas line. This gas is on State lands. The leases belong to Phillips, British Petroleum, and they belong primarily to Exxon. They are the companies that are going to have to build this pipeline or work with a consortium of gas line companies, such as Duke, Williams, El Paso, Foothills.

This is going to be a gigantic project. It is going to cost somewhere in the area of $15 billion to $20 billion. It will be the largest construction project in the history of North America. But it needs a safety net.

What do I mean by a safety net? If we are going to put out that kind of money and the price of gas drops below your cost, as the Presiding Officer knows as a businessman, you cannot stay in business very long.

We are not breaking new ground here. We have seen deep water royalty relief, and that is evident in the drilling that goes on in the Gulf of Mexico. We are going to need something with this pipeline.

We have been communicating with the Governor's office. In fact, we provided most of the information that has come back in a rather roundabout way to the majority because we work with the Governor's office. From Washington, it goes to Juneau and back and makes a rather circuitous route because it ends up with the majority leader of the Democratic Party. This is just politics, but much of the input is ours, and that is an obligation Senator STEVENS and I have. We will do it and continue to do it, even if it makes almost a full circle.

The crux of this is the principals have expended roughly $100 million, evaluating this project, and they say currently, because of the price of gas, it is uneconomical. Mr. President, you know what that means, and I know what that means, and I am not very happy about it. But at the current price of gas, it is not economical.

On the other hand, on the positive side, the prospects for development are good because we are pulling down our gas reserves in the United States much faster than we are finding new gas reserves. There is no question this gas will be marketed. There is a question ultimately of whether it will be just the U.S. domestic market or an LNG market in the Pacific rim. The economics dictate, but in order for this to be built now, there has to be some arrangement that if the price of gas falls below a certain level, there is a safety net.

Who is going to underwrite that safety net? Obviously, we are looking toward the Federal Government, the same as we do in deep water royalty relief in the Gulf of Mexico. In Alaska, we have a frontier area; we do not have the infrastructure. What is different about our gas is it is nearly 3,000 miles away from the Chicago market where ultimately the volume is anticipated.

It is not that our gas is different, but it has to be moved further, and to move it further costs more money. What we need in this equation is a safety net that perhaps could be paid back when the price of gas goes over a certain level.

We are not looking for a handout. But the problem we have is the mechanics are not done yet. We do not know how it scores. I do not know that the people who are in the business of scoring really understand, but the concept is fair and equitable, and we are going to pursue it. I am very happy the majority is going to pursue it with us.

While route selection is vital and important, it does not build the project. The only thing that is going to build the project is the economics, and that is what we are working on.

We have Exxon, BP, and Phillips as primary partners. However, as you know, they are not all the same size. Some are a little bigger and take a little bigger risk.

I want to make the record very clear on what we have done today as we have designated a route, and we are going to broaden it with alternatives, but the real crux is coming up with this safety net.

It is fair to close with my wariness, if you will, that suddenly we have this broad support for a gas line, but is it at the price of ANWR? As I indicated, as far as Alaskans are concerned, there is no quid pro quo; these have to stand independently. I do not want to hear Members say: I am for you on the gas line but I am against you on ANWR. Members should be making a decision on what is right for America.

As a consequence, I point out that perhaps our Governor could intervene, as he has in communicating to the majority with regard to the language designating a southern route. I suppose I could send something up asking the Governor to intervene on ANWR and maybe he could prevail upon the majority to include ANWR in the amendment, but I assume that would not stand the test of time. His support might be able to overcome the threat of a filibuster by the majority because Senator DASCHLE has already indicated they are prepared to basically filibuster, filing cloture, requiring 60 votes. I hope that if the Governor is as successful this morning on the route designation, he might be able to address the ANWR issue as well.

Again, we have to understand politics. So as we look at where we are, I think we have to recognize we have a gigantic project that is before us that is in the interest of the United States. I am talking about both projects because they are different. The majority whip has made his comments relative to jobs. The interesting thing is we import about 15 percent of our natural gas in this country, primarily from Canada, but we import 58 percent of our oil. That ought to address some concerns about the vulnerability of the country.

I hear a lot relative to jobs in this debate. The jobs in ANWR are all American jobs, but if one looks at that pipeline that the majority has in their chart, look how much goes through Canada vis-a-vis how much goes through Alaska. No question, there is probably two and a half to three times more activity that will take place in Canada. Those are going to be Canadian jobs, but opening ANWR will create all American jobs. I am sure the majority has been contacted by labor and labor has indicated how important those jobs are to America.

We need to understand the project a little better. We need to have more

Members visit the area. We need to recognize this project is designed to be constructed using 52-inch X–80 steel.

How many steel mills in the United States make this steel? Zero. This is an order that is estimated to be somewhere in the neighborhood of $3 billion to $5 billion. Do you know what they say? We are not geared up to it.

I do not know about the Chair, but I am inclined to think, as a businessman, if he had an order that big, he would start figuring out a way to try to participate. I certainly would.

What happened the last time we built an 800-mile pipeline for oil? Do you know where the pipe was built? In Japan, in Korea, and Italy. Why? Our steel mills were not geared up. In other words, they could not compete. Well, that is another argument for another day. We have quotas on steel, but clearly this is the biggest order ever contemplated associated with the natural gas issue. So I hope this will be an awakening to the American steel industry that there is some business at home, big business. They have not had a $3 billion to $5 billion order in a century. It would take the entire output of the steel mills in Korea and Japan for nearly 2 years to build this gas pipeline.

So we are going to have an interesting debate. I hopefully have cleared the air on the amendment. I look forward to the debate.

I ask unanimous consent that I be added as a cosponsor on the amendment.

The PRESIDING OFFICER (Mr. NELSON of Florida). Without objection, it is so ordered. The Senator will be added as a cosponsor.

Mr. MURKOWSKI. I hope we will be able to work with the majority to expand the amendment as Alaskans have expressed their desire to have various alternatives for the marketing of our gas. I thank the Chair.

The PRESIDING OFFICER. The Senator from Nevada.

Mr. REID. Mr. President, I know there are other Senators wishing to speak, so I will be relatively brief. I say to my friend from Alaska, it would be appropriate on something this important to the State of Alaska that we have a vote on it. We want to make sure when this matter goes to the House they recognize the entire Senate supports it. So I ask my friend if he is ready for a vote, not immediately but sometime in the near future?

Mr. MURKOWSKI. If I may respond, it is very possible we may have a second degree. We have an objection on our side that we have to clear as well. So I agree with my colleague "at some point in time," but it is premature at this time on our side.

Mr. REID. What I say to my friend from Alaska is, we understand there are always things that can be improved and we will certainly look forward to working with the Senator, and Senator STEVENS, as to how we can improve this amendment, but in the near future I hope we can vote on this issue. If there is anything that the Senator needs or believes is appropriate to improve it, we can work at the staff level and then with the principals. We will be happy to do that.

I say to my friend from Alaska, for whom I have the greatest respect, this is quite interesting. I wish Nevada had the choices that Alaska has today. That is, this bill is going to give Alaska something. It is a question of how much. It is a question of whether Alaska is going to get ANWR and this pipeline or just get the pipeline. But there is no question that Alaska, after this legislation passes, is going to have the hope of a significant number of new jobs.

As the Senator from Alaska knows, I do not favor ANWR and we are going to have a debate relatively soon on that. I hope we can fix the debate on that issue and resolve it after everyone has an opportunity to say what they want and move on to the rest of this legislation. Whoever in effect wins, let us move on. It is a question of who has 60 votes, I guess, in this Chamber. So I look forward to that.

I also say that not only is Alaska looking to this legislation with favor but there are lots of others looking to this legislation with favor, not the least of which, as the Senator from Alaska has said, are the steel companies and steel workers in America.

I agree with the Senator from Alaska we can bring our steel mills back into production. With what the President did yesterday, it certainly is a step in the right direction. If we pass this legislation, hopefully they can get geared up to move forward.

One of the problems we have, of course, is companies are no longer just American companies, they are international companies, and sometimes they do not look at building things in America in the right light. So I recognize other issues are important to address with respect to the pipeline, and we want to work with the Alaska delegation, including the Governor, in good faith, in moving these matters forward.

The two items in this amendment are noncontroversial and do not prejudice other concerns that may come up at a subsequent time. We hope there can be agreement to vote on this amendment soon and continue to work on the other issues. I think it would set a great pattern for this legislation, to have a bipartisan vote moving forward with something that is extremely important.

The House bill did not address any of the other issues raised by Senator MURKOWSKI. The amendment is broader than the House language—not a lot, but it is broader. The amendment bans the northern route and does not specify where the southern route will go, but we know it will go through Alaska. So I hope the Senators on the other side will allow us to have a vote in the near future and move on to the next amendment which will be offered by Senator MURKOWSKI.

It is my understanding, based upon what Senator MURKOWSKI said, that Senator BENNETT is wishing to speak as in morning business. Is that right? And if I could ask a question of my friend from Utah, who I am sure is very proud of being able to talk about the way the Olympics went off—Utah should be very proud—how long does the Senator wish to speak?

Mr. BENNETT. Mr. President, somewhere between 15 and 20 minutes.

Mr. REID. Mr. President, I yield to my friend from Alaska.

Mr. MURKOWSKI. If I may respond, the Senator from Kentucky seeks recognition also.

Mr. REID. I was going to get to that.

Mr. MURKOWSKI. We generally agreed, subject to the Senator's concurrence, that we would do that in the order of the Senator from Kentucky and then our friend from Utah.

Mr. REID. I will bet my friend, the Senator from Kentucky, the hall of famer, is not here to brag about Alaska.

I ask unanimous consent that following the remarks of the Senator from Kentucky, the Senator from Utah be recognized as in morning business for up to 30 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MURKOWSKI. Mr. President, before I recognize my friend from Kentucky, I say I think it is rather interesting to reflect on the contentious portions that are in this bill. Everything focuses either on ANWR or the gas line. The electricity portion could be very complex. CAFE is going to be agonizing. Renewables are going to be agonizing.

I was somewhat alerted by the whip who indicated this vote will be a 60 vote. Ordinarily, on issues around here, 51 votes are enough to carry. But it is important to recognize the ground has already been laid, and the reason is interesting. It is contentious. When our national security is concerned, we should do all we can not to limit our options. I am fearful we are limiting our options.

The House bill only prohibits the "over the top" route, which is what the whip alluded to. This would clearly address this point, and it would provide the alternatives that the economics dictate.

Mr. REID. Will the Senator yield?

Mr. MURKOWSKI. I yield.

Mr. REID. I say to my friend from Alaska, I recognize the many complicated and controversial issues in this legislation that are now here, or will be through amendment.

This is not one of the weeks where we say if we finish Thursday we will have no votes on Friday. I know this will take time. I understand that.

Mr. MURKOWSKI. I am not going anywhere. I want everybody to make sure they understand that clearly from the beginning this whole process was designed—and I don't think we are fooling anybody—to ensure that the committee of jurisdiction did not get a chance to vote on it. An ANWR amendment would have been part of this bill because we had the votes. That is the bottom line.

We have gone on from there into this extended synergy, which I do not think is in the best interests of the Senate.

The PRESIDING OFFICER. The Senator from Kentucky.

Mr. BUNNING. Mr. President, I rise today to talk about the pending energy bill. I am glad we're finally having this debate. It has been a long time coming.

We desperately need a commonsense energy policy. Ever since the Arab oil embargoes over a quarter of a century ago, Congress has talked about passing a serious energy bill. Now is the time.

Coming after the tragic events of September 11, it is more important than ever that we have a policy that not only helps us meet our energy needs, but also protects our national security. In the past Congress has failed to make progress on energy because we have fallen into the trap of choosing between conservation and production.

But now I think that we have escaped that trap and reached the point where most of us in the Senate understand that a balanced energy policy must do both—it must help boost production of domestic energy sources as well as promote conservation.

The bill before the Senate today is a decent starting point that attempts to strike a balance between conservation and production.

There are some parts of the legislation that I support. For instance, eventually we are going to get a chance to vote on clean coal technology and ethanol provisions that are important to my State.

I also like the tax proposals coming from the Finance Committee that would promote conservation and the expanded use of cleaner burning fuels.

But overall the bill is too weak on production and contains several provisions that must be changed before the Senate finally passes a bill.

First of all, we need to look at improving the production side. We must have an energy policy that helps reduce our dependence on foreign oil. This means that we have to finally get serious about ANWR.

We deserve to have a straight up or down vote on ANWR. It's clear that a majority of the Senate supports safe drilling in ANWR.

It is the most promising source of domestic energy we have. It is critical to our future and our national security.

But because of the procedural gymnastics from the majority, it looks like we're not going to get a fair shot at voting on ANWR.

That is wrong. ANWR is too important and the stakes are too high not to let the Senate work its will on this matter.

I know that there are some in the Senate who are desperate to stop us from opening up in ANWR. The facts are not on their side. And a few of those facts bear repeating.

ANWR is roughly the size of South Carolina, Maine, Massachusetts, Rhode Island, Vermont, and New Hampshire combined. It is absolutely enormous. But when we talk about drilling in ANWR, we are talking about clean drilling in an area of less than 2,000 acres—smaller than many airports in the United States.

To say that drilling in this limited portion of ANWR threatens the entire environment of the refuge is farfetched and alarmist.

Recent advances in technology enable us to successfully extract oil in ANWR in an environmentally sensitive way. The old stereotypes of dirty oil drilling just don't apply anymore.

In fact, if we do start exploring in ANWR, the drilling operations would be conducted under the most comprehensive environmental regulations in the world.

We all want to do what we can to protect our world. But it is just not credible to say that looking for oil in this one small, limited part of ANWR is a dangerous threat to the entire region. Many of the environmentalists fail to see that if we do not begin oil production in ANWR, oil companies in the Middle East, Russia, and elsewhere—places where environmental regulations are much less restrictive than ours or even nonexistent—will take up the slack.

Opening ANWR now might actually end up being more environmentally sensitive than the alternative. We also cannot escape the fact that drilling in ANWR, and boosting our domestic energy production, is vitally important to our national security.

Right now we import 57 percent of the oil we use and the number is expected to jump to 64 percent by 2020. There are more than 10 billion barrels of oil recoverable in ANWR. That's enough to fuel all of Kentucky's oil needs for 82 years. That is also enough oil to replace the volume we currently import from Saudi Arabia or Iraq for the next 25 years.

Drilling in ANWR provisions would not only make a tremendous difference for our domestic consumption, but would constitute a serious step toward ensuring our national security.

If the choice comes down to drilling in ANWR and lessening the chance that we will have to rely on Saddam Hussein and others in Middle East for our oil, then there is no choice at all.

Today we produce less oil than we did in World War II. We must reverse this trend. Drilling in ANWR won't change things overnight, and no single source can totally end our dependence on foreign energy.

But opening ANWR and boosting production are vital to this bill and to our national security.

On a different subject, I also think that we need to take a long look at the CAFE provisions in the Kerry/Hollings language in the bill. Currently, the CAFE standards are 27.5 miles per gallon for cars and 20.7 miles per gallon for light trucks.

The Kerry/Hollings provision in the bill would require a combined fleet fuel economy standard for cars and trucks to go to 35 miles per gallon by 2015. Their provision also would expand the definition of "light truck" to include vehicles up to 10,000 pounds. That would cover most SUVs and minivans.

Because the Kerry/Hollings provision changes current law by combining cars and trucks, that means that even if auto manufacturers can achieve 28 miles per gallon for their light trucks, some manufacturers will be forced to boost their car standards up to 50 miles per gallon just to reach the overall 35 miles per gallon average. That's a dramatic jump from the current standards, and pushes too far too fast.

The National Academy of Sciences recently studied this issue and the implications of raising CAFE standards on vehicle safety.

NAS found that rapid increases in fuel economy standards for cars in the early 1980's likely contributed to thousands of additional highway deaths.

Back then, auto manufacturers reduced the size and weight of their vehicles to help meet the new standards. But because the CAFE standards were raised too quickly, it turns out that making cars more fuel efficient also made them more deadly.

Today, one of the main ways for a manufacturer to increase its CAFE standards is to downsize its fleet. In fact, since 1978 vehicles have shrunk in weight on average by more than 1,000 pounds per vehicle.

At the same time, the death toll from car crashes has increased. Statistics show that in the last 25 years since fuel efficiency standards were first imposed, more than 40,000 people have died in crashes in which they might have otherwise survived had their vehicles been heavier.

While more people have died because of the increased fuel efficiency, our fuel economy is not much better than it was in 1970. Much of this is because consumers have chosen bigger cars. They want SUVs and minivans to haul their children to soccer games and to go on vacations. And they want larger vehicles because they are safer, more comfortable, and more powerful.

Consumers obviously are not asking for this mandate because they are choosing to continue to purchase larger vehicles despite other choices, including less expensive ones.

Kerry Hollings would overly regulate consumer choice at the expense of safety.

Because Kentucky has become one of the leading auto producing States in the country, I am also worried that the Kerry/Hollings provision would affect jobs. When the CAFE rules went into effect before, manufacturers spend huge sums of money to comply with the new rules. Because of that, many workers were layed off to help cut costs.

Today over 160,000 Kentucky workers are employed in the auto industry or in a job dependent on car manufacturing. That's almost 10 percent of my State's workforce. But many of these jobs will be at risk if the Kerry/Hollings provision in this bill becomes law.

I believe in increasing fuel efficiency in vehicles. I think we can and should do more on this front. But I do not believe that Congress picking a number out of thin air and mandating a target for manufacturers to hit is the way to go. Instead, I think we need to do what we can to encourage sound science by the industry that makes sound, incremental changes in fuel standards.

Finally, I would like to say a few words about the procedure that was used to bring this bill to the floor. The process that this bill went through to finally reach the floor was a sham. Last October, when the Energy Committee was finally going to begin marking up the bill, it was abruptly pulled at the last minute. Then the Democrats began working on their own proposal. Now almost 6 months later we finally get a chance to see their handiwork.

As I said at the beginning of my remarks, there are parts of it that represent a good starting point. But there are serious problems with the measure, problems that probably would have been fixed in the Energy Committee. But because they did not have the votes in committee, the Democrats short-circuited the committee process and brought the bill straight to the floor.

These procedural shortcomings have helped produce a flawed bill. If the legislation had gone through the usual legislative process, it would probably be a stronger, better bill. Many of us have to ask why did the majority do this. The answer appears to be that there was a fear that the energy bill coming out of the committee would include provisions such as ANWR for which we have the votes and that the majority leader decided to have this debate on the floor instead.

That is fine. That has happened before around here. But that also means that we deserve to have a fair shot with our amendments on the floor. It's one thing to shut us out in committee, but it's a whole other matter to try to do so on the Senate floor as well.

Let's have the debate on ANWR, on CAFE, and on other provisions and see where the votes are. If the full Senate is going to work its will on a sound policy, that's the least we can do. Anything else is going to produce a flawed, unbalanced bill that is not going to reflect well on the Senate and is not going to help the country.

We need a sound energy bill and we need it now, and the best way to pass a constructive bill is to have a full, healthy debate on the floor about all of the issues involved—ANWR, CAFE, and all of the rest.

If we have this debate, I think we can produce a balanced bill that increases production and conservation, produces jobs and makes a difference for our national security.

I yield the floor.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. BINGAMAN. Mr. President, before the Senator from Utah begins his statement, I ask unanimous consent that following the statement of the Senator from Utah, Senator JEFFORDS be recognized for up to 30 minutes, and following that, that Senator FEINGOLD be recognized to speak as in morning business for up to 10 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Utah.

THE OLYMPIC GAMES IN UTAH

Mr. BENNETT. Mr. President, I appreciate the opportunity of sharing with my colleagues a summary of what happened in the Salt Lake games that took place the first 2 weeks in February, where the world came to Utah and was received in the spirit of the Olympic flame.

The Olympic Games are one of the few events, if indeed not the only event, where the world comes together in a non-political arena. There was substantial effort that went into these games, both on the part of the people of Utah and the Federal taxpayer. So I think it is appropriate that we have a summary and report to this body on that experience.

If I may, I would like to begin with some numbers. I know that is usually not the way to begin a public speech that you want anybody to listen to, but there are some numbers that outline the scope of these Olympics that I think are irreplaceable as an example of what went on.

These were the largest Winter Olympics in history, and Salt Lake City was the largest city to host a Winter Olympics. In the past, they have always been held in relatively small ski villages. This is the first time a major metropolitan area has been chosen as the host of the Winter Olympics. Some will argue with that and say Sarajevo was a major city, but Salt Lake City is the largest city that has ever been host to a Winter Olympics.

It was the largest number of athletes who have ever come to a Winter Olympics—2,500. They came from the largest number of countries ever represented at the Winter Olympics, 78, and they competed in the largest number of events—also 78. We kept adding sports to the Winter Olympics for this experience.

Three and one-half billion people watched the opening and closing ceremonies that were held in the Rice-Eccles football stadium at the University of Utah. Sixty-seven thousand people signed up to be volunteers—the largest volunteer pool ever created. Only 24,000 of them could be accommodated.

One of the interesting statistics—I don't have the final number—but far into the games, I was told, that of those 24,000 volunteers, only 77 were forced to withdraw for one reason or another: A health problem, a family emergency, what have you. The volunteers were a spectacular part of these Olympics.

There were 9,000 credentialed media that showed up to cover the Olympics. It was, as I say, the largest Winter Olympics in history.

In recognition of the size of the Olympics, it was declared for the first time as a National Special Security Event under Presidential Decision Directive 62. That directive, issued in the Clinton years, established national security events where the Secret Service would take the lead in managing the security. This is the first time the Olympics have ever been designated a National Special Security Event.

The zone of security for the Olympics covered over 900 square miles from Provo to Ogden. That was the largest coordinated area the Secret Service and other law enforcement people have ever been asked to guard—perhaps with the exception of the District of Columbia as a whole. Even at the State of the Union Message, you don't have an area as large as the area covered by these Olympics.

In order to meet the challenge of this security responsibility at these Olympics, we had 1,100 FBI agents, we had 2,000 Secret Service agents, and there were law enforcement officers from 48 different States.

As I went through one venue, I noticed on the sleeve of one of the law enforcement officers the badge of the Police Department of Gallup, NM. Law enforcement officers from 48 States came to help their Utah colleagues provide security for the games. Over 2,400 Utah law enforcement officers gathered from all over the State. There were also 2,400 military personnel—primarily National Guardsmen who came from six different States. And there were 2,200 fire and emergency response individuals. This was an incredible army of security personnel assembled to provide security for the athletes and spectators.

What did they handle? There were over 3.5 million spectators who went through magnetometers during that 2-week period—3½ million people processed on a time-frame. There were some who didn't get to their events on time. But overwhelmingly the ticket holders got to their events, went through the magnetometers, and were properly screened. There were 80,000 spectators processed each day through the magnetometers at Olympic Square. There were over 1,000 trucks processed carrying 250,000 tons of material and product. They were processed. They were screened. They got where they needed to go on time. It was an incredible security and logistical performance.

When the Attorney General was out there, I was with him, and we were checking in advance the security preparations. At one of the venues, the officer briefing us summarized how good the security really was. As he said to the Attorney General, if you are going to get anywhere near this venue during the Olympics without a credential, you are going to have to be a moose.

What happened in terms of the threat as a result of this security activity? By comparison—the Atlanta Olympics were the last that were held in the United States—in Atlanta, they routinely had between 100 and 200 bomb threats every single day by people who felt confident enough to mount some kind of hoax, or threat, or attempt to disrupt—100 to 200 every day. In the Salt Lake Olympics, there were a little over 100 of those threats through the entire 2-week period.

Those are the statistics that give you the size and scope of what we were dealing with—the size and scope of the effort.

In an effort to make sure we were getting our money's worth and that we were on top of things, I visited the venue. I went to the Olympic Village where the athletes were. That was a self-contained city of 3,500 people—the 2,500 athletes plus 1,000 coaches and other team officials. It had its own badge, it had its own health clinic, it had its own dining hall and even its own movie theater. This village had its own post office, bank, dry cleaners and convenience store—it was self-contained.

Then I went to the media center, which was another city. As I said, there were over 9,000 accredited journalists there. Here is a city with its own store and bank as well as facilities for getting on-line, filing stories, and all of the things necessary for the media.

I visited the Public Safety Command Center where over 64 different agencies were located, coordinating all of their efforts.

I went to the joint intelligence center where all of the intelligence agencies—not only from our country, the CIA, the NSA, the DEA but also from other countries—were gathered together sharing intelligence information about what kind of threat they might see.

There was the joint information center where all of the information officers were gathered so that if there were any kind of an incident that came up, everyone would know about it instantly and be able to coordinate their responses.

I visited the Olympic Square and the Medals Plaza and, of course, every one of the athletic venues.

Out of all of this, the basic question that I think we should be addressing in the Congress is, What is the legacy of the Salt Lake City games? What is the lasting result of having held this event? I want to highlight a few of the items that came out of what I have described from all of the visitations I made.

The first legacy that is the most obvious is the degree of security expertise that has come out of this experience. As I said, I went to the security center and saw these 64 agencies in a room not the size of this chamber. They were sitting at a computer roughly every four feet, side by side, watching the computer screens and manning their stations 24 hours a day throughout the entire 17 days of the Olympics. That meant that anything that came up in the form of any sort of threat would be instantly known in real time and simultaneously to all 64 agencies.

I was interested to note the labels that were on the little cardboard folders on the top of each computer. Here was a computer with a label on it that read "FEMA." It was reassuring to know that the Federal Emergency Management Administration was present. Next to it would be one that read "FBI"—that was reassuring—and on through a number of other Federal agencies. In addition, there were various State agencies—the Utah Highway Patrol, the local police agencies, and county sheriffs departments; the Davis County Sheriff's Department.

One label caught my eye which demonstrated to me just how significant an effort this was. There was a label that said "U of U Police Department." The University of Utah security guards were in the same room with the Secret Service and FEMA, because if something happened at the University of Utah—the place where the athletic village was located—the University of Utah police would have to be the first responders. But they were in the same room and were getting the same information that FEMA was getting—FEMA if it was a major fire; that the FBI was getting if there was a major law enforcement challenge; and that the Secret Service was getting if there were some kind of a threat to the President. All were in the same room. All were coordinated. It was a seamless effort, from the Secret Service at the top, all the way down to the smallest—I will not say lowest; smallest—local law enforcement agency. Nothing like this has ever been accomplished before and, certainly, nothing on the scale like this has ever been accomplished before.

The legacy that comes out of this is a degree of expertise and understanding of coordination in law enforcement that can be used as a template for homeland security and homeland defense.

I have made reference of this to Governor Ridge, when he was here, and said, "You need to look very carefully at the experience of the Salt Lake Olympic games. It will give you guidance that will be absolutely invaluable as you struggle with the problem of divided jurisdiction among law enforcement agencies."

While I was there, the man who was running the center turned to me and he said: Senator, this is boring. Nothing is happening. In the security business, boring is good. I smiled a little at that because it did look as if nobody was doing anything. Then he made an interesting comment. He said, "Senator, we think that a number of groups that would otherwise have come to Salt Lake City in an attempt to disrupt the Olympics or do even more serious damage. These groups scoped out the security pattern we had here and decided to stay away."

Indeed, he cited one activist group that, on their Web site, instructed all of their supporters around the country: Stay away. They're ready for us in Salt Lake. If you show up, you will be immediately taken care of. There is no point in coming.

So the games went on flawlessly from a security standpoint because of the incredible coordination that went on, from the Secret Service down to the smallest local law enforcement agency.

That is the first legacy that will come out of the Salt Lake City games: that degree of expertise, that understanding of how things should be done.

In connection with that legacy, I have to acknowledge the work of Brian Stafford, the Director of the United States Secret Service, who personally paid a significant amount of attention to these games. He was in Utah a number of times. Mark Camillo, the special agent in charge, practically became a citizen of Utah. He has been out in Utah for the last 24 months. The FBI, of course, under the leadership of Director Mueller, should be congratulated for an outstanding job. Bob Flowers, who is the head of the Utah Olympic Public Safety Command, was a very significant player in all of this. His right hand person, Dave Tubbs, Executive Director of the Utah Olympic Public Safety Command, deserves further commendation and congratulations.

These are the people who created this legacy from which the nation will draw benefit for years to come.

The second legacy that comes out of these Olympics are the facilities that were built. There were already ski facilities in many places in Salt Lake, but now we have built facilities that were not there before. For example, the ice skating oval in Kearns; the luge/bobsled/skeleton track and the ski jump at Utah Olympic Park—those things were created and upgraded for the Olympics.

I had lunch with the President of the U.S. Olympic Committee, Sandra Baldwin. She said to me, "All of our speed skaters historically have come from Wisconsin." That is a little bit of an overstatement, but she backed down and said, "All right, most of them have come from Wisconsin." Why? Because that is where the best training facilities are for speed skating. We expect now that many of our gold-medal-winning speed skaters will start to come from not only Utah but the entire western United States.

Then the comment made by some athletes at the lunch, and they were not necessarily Utahns, "Salt Lake City is easy to get to. Salt Lake City is accessible by a major airport. It is a major city with hotel and places to stay. Athletes from all over America can come to Salt Lake City to train far more easily than they can in existing training facilities."

One of the legacies of these games will be better prepared, better trained American athletes. These games set the record for Americans winning medals at the Winter Olympics. I expect that record will be broken in the future because of the legacy of the Salt Lake Olympic Games.

In the process of creating those facilities, we produced yet another legacy. I will talk about what was one of the more controversial aspects of the Olympic facilities: the creation of the men's and women's downhill at Snowbasin. In order for that to happen, there had to be a land exchange so that Earl Holding, who owned the Snowbasin facility, could get the land necessary to create the venue that worked so well in the Olympics and that everyone saw on television.

The Forest Service owned most of the land Mr. Holding needed. The Forest Service said, "We would be willing to deed that land to Earl Holding, but we don't want money in exchange. We want other lands." The Forest Service identified 11,000 acres of land in the State of Utah which, for management purposes, they wanted to acquire.

An appraisal was done. The 1,300 acres they deeded to Earl Holding in financial terms was worth the same amount as the 11,000 acres the Forest Service acquired. So even though the Forest Service acquired 8 or 9 times as many acres as it gave up, in financial terms the swap was equal. A careful appraisal was made by the Government to assure that the interest of the public was protected.

Without going into the details, this was the legacy that the Forest Service has as a result of that land swap. In a report they filed in May of 2000, they summarize what they received as a result of the land swap that was stimulated by the Olympics: 15.3 miles of perennial streams, 21.5 miles of intermittent streams, a 23-mile reduction in the boundaries that they have to police, consolidation of ownership, and the elimination of the threat of development of these lands.

They have acquired suitable habitat for threatened and endangered species—both plant and wildlife—as well as habitat for big game calving and fawning, in both summer and winter. They acquired three miles of existing road access that they did not have before, and there are 3.5 miles of existing four-wheel-drive road to be evaluated in Box Elder County, and 15.5 miles of existing trail access was acquired, along with a wide variety of dispersed recreation opportunities, again, for both winter and summer.

I spoke with the Forest Service personnel as I did my visits to the Olympic venues, and they told me how delighted they were with the way the Snowbasin venue had been developed.

They said it was the finest development they had seen and one which they would hope would be a model for other entities who would deal with Forest Service land. But they also described to me how delighted they were at the legacy of better management of Forest Service lands in Utah that comes as a by-product of the Olympics.

Housing, another legacy from the Olympics is that there will be more low-income housing in Utah as a result of efforts necessary to provide housing for Olympic guests. Frankly, we did not get as much low-income housing in Utah as I would have liked. We did not get as much as we originally thought we would get when we embarked on this program. However, one aspect of the housing that needs to be talked about has to do with housing on Indian reservations. Housing was provided for the press in manufactured units. They came straight from the factory. They were assembled on the place, and they became the housing units for people in the press. They were also at a distant venue in Soldier Hollow, where they were used for housing Olympic athletes who needed to stay there rather than at the Olympic Village.

The Olympics are over. What do you do with this housing? Because it is manufactured housing and can be shipped easily, these houses are now in the process of being dismantled and sent to Indian reservations in the State of Utah to provide affordable housing for Native Americans. That is another one of the legacies of these Olympics.

We have a security legacy. We have an athletic facilities legacy. We have a land management legacy, and we have a housing legacy. We should all be proud of that and grateful for that.

There is one more legacy that may be, while intangible, more important than those I have previously mentioned. Let me give an anecdote to illustrate my point. We, of course, were as warm with visitors from foreign countries. As they went around Salt Lake City, as they talked to the volunteers, they had an experience in America.

One of them described it this way, "After September 11 and then the war and the attacks in Afghanistan, we had the feeling that the Americans stood astride the world and we expected, when we were coming to America for the Olympics, that the Americans would be pretty cocky, that the Americans would be lording over the rest of us the fact that they were in charge, that the Americans could do whatever they wanted anywhere in the world, and now you are coming to our Olympics, and the Americans would be filled with overweening pride and a little bit of hubris."

They went on to say, "We have come into this Olympic atmosphere and found nothing but warmth, graciousness, willingness to be helpful, to reach out, and to form relationships around the world. We have found none of the pride and haughtiness we expected. We go away from these Olympics with a different view of America and Americans than we had before we came. We will spread that view in our home countries."

In many ways, that is the most important legacy to come out of these Olympics. Coming against the backdrop of September 11th, it was the coming together of people from 78 nations, of 9,000 journalists, to a nonpolitical arena and to find the humanity, the friendship, the fellowship, and the open nature of human beings regardless of their country that will bless the world.

After September 11, there were proposals to cancel the Olympics. I remember having a conversation with Mitt Romney, President of the Olympics, about that possibility.

I said, "What will happen if you cancel the Olympics?"

He said, "The first thing that would happen is we will go bankrupt. There will be hundreds and hundreds of millions of dollars of default because we can't pay our bills unless we get the revenue from actually putting on the games. We can't cancel the games. More importantly, we must not cancel the games because that would send a signal to the terrorists that they truly had won."

Nonetheless, there was the shadow of what would happen if the games went forward hanging over it. A number of my colleagues in the Senate expressed their concern about that.

We went forward with the games. Not only did we provide safe games in the way I have described, we provided warm, gathering, closing-of-wounds, reassuring kinds of games that told the world we are all still one family.

Enormous thanks belong to a number of people for producing that legacy. Mitt Romney, of course, stands first as the CEO who took over a situation that was challenging and produced the result I have described, along with his chief operating officer, Frazier Bullock.

I want to thank the American people for their contributions and the sense of total American participation. Driving around Salt Lake City, I saw a lot of strange buses from a lot of places I did not recognize. Finally, I saw a familiar bus. I thought: Oh, this is a hometown bus. Then I realized it was a Washington metrobus, not a Salt Lake City UTA bus. The buses came from all over the country.

On our light rail in Salt Lake, the cars are all white. Suddenly, there were a bunch of yellow cars. I wondered from where they came. The answer was, Dallas, Texas. The folks in Dallas, Texas, sent us their railroad cars to supplement ours for our light rail system.

This was truly an American effort that produced the legacy of goodwill and good feelings around the world.

I thank the American people for their help. I want to thank Governor Leavitt, the Governor of Utah; Bob Garff, chairman of the Olympics—they all deserve special thanks.

One individual I will single out, whom many of you have met, is Cindy Gillespie. She was vice president of the Salt Lake organizing committee who handled governmental relations. She was superb at it. She also represented a source that we all found valuable. She did the same job for the Atlanta games. She brought an institutional memory of what the challenges had been in Atlanta that helped us do things a little differently in Salt Lake.

Finally, among my colleagues, I must acknowledge the Senate's leading supporter of the Olympic movement, TED STEVENS of Alaska, who put his full energy in backing these games. I am sure he had some residual regret that the games did not go to Fairbanks but came to Salt Lake City, but he threw himself into support of the Olympics in a manner that was truly heroic. And other Senators: Senator INOUYE, who took over chairmanship of the defense subcommittee when there was a change in leadership, was every bit as supportive as Senator STEVENS. I want to thank Senator BYRD the chairman of the Appropriations Committee for his help. Also Senators GREGG and HOLLINGS, who had the responsibility of funding the requests that came from the President with respect to the Justice Department and the FBI. Senators CAMPBELL and DORGAN for their help in providing adequate funding for the Secret Service. I want to also thank all of my Senate colleagues for their great support. The support for the Olympics was very broad based.

Finally, while I am thanking, I must acknowledge that the Clinton administration could not have been more supportive, and could not have done a better job in seeing to it that these were in fact America's Olympic Games. When the Clinton administration left office and the Bush administration came into power, the transition was seamless. The same support that came out of the White House and all aspects of the administration made a very significant difference.

It is that final legacy, that the support of America has been recognized around the world, and that the goodwill of America will radiate from these games around the world, that is the legacy for which I am the most grateful. It was summarized at the closing ceremonies by Jacques Rogge, the new president of the International Olympic Committee. You may know that in the past it has been the habit of the president of the International Olympic Committee to give a scorecard, a report card of how well the Olympics has done. The comment that has always been looked for at every Olympics before is when the president of the IOC stands up and says, "You have given us the finest Olympics ever." That is what all of us in Salt Lake were hoping we would get, that accolade.

Jacques Rogge said, three or four days before the closing ceremony, he would not say that. He said, "I am going to remove that tradition from the IOC. Every Olympics is different. I am not going to create that expectation, and I tell you in advance, don't be expecting that." So he came and he gave his formal closing remarks. They were written in the program and they were wonderful. But he ad-libbed, as he was caught up in the same spirit of good will throughout the world that I have described as the Olympic's most important legacy. And off of his prepared remarks, he turned to all of us and he said:

> People of America, Utah, and Salt Lake City, you have given the world superb games. That is a legacy of which all Americans can be proud.

I yield the floor.

Mr. HATCH. Mr. President, I rise to pay tribute to all the men and women in the State of Utah and this nation whose hard work and diligence made the 2002 Salt Lake City Winter Olympics the best in the history of the Games.

I want to pay special tribute to the efforts of my Utah partner, Senator BOB BENNETT. We owe him a great deal of gratitude for his leadership and guidance to ensure that the 2002 Winter Olympic Games had the resources and manpower necessary to be successful.

The 2002 Olympics proved that we as a nation can conduct national events where the need for security is balanced with the spirit of the event. In this new age, where terrorism is a constant threat, securing the Olympics was a joint effort. It involved private citizens, Utah businesses, and federal, state, and local law enforcement agencies. The result was a security operation that provided a blueprint for the future.

The 2002 Winter Games were a showcase of American determination, resiliency, creativity, and resourcefulness. The challenge of planning for and executing an event of this magnitude was daunting even prior to the tragedy of September 11th. Following the September 11th tragedy, however, the security of the Winter Olympics became the subject of intense scrutiny in this country and throughout the International Olympic community. Frequently asked questions included: Can the United States still produce a first-rate event given the new security environment? Should the Games be cancelled? Should the Games be scaled back? Would the event become an armed camp?

There was never a question, however, among the organizers and planners of the Games as to whether the Olympics would go forward. They rolled up their sleeves and set out, determined to ensure that these Games were the best and safest Games ever. Law enforcement officials were confident that they already had an excellent security plan in place. Federal, state, local and private agencies developed and strengthened partnerships so the spirit of the Olympic Games could thrive.

The nation and, indeed, the entire international Olympic community were blessed that people of courage and conviction were already in place and prepared to carry out their tasks. I would like to take a moment to thank these wonderful men and women for what they did. I am very proud of all of them.

First, I want to thank all the strong, brave, and gifted Olympic athletes who participated in the Winter Games. I am especially proud of the United States' athletes who performed so magnificently and brought home 34 medals—more than double the bronze, silver and gold the United States brought home from the 1998 Nagano Winter Games. This was 28 more than were won in the 1988 Winter Games in Calgary.

I also want to thank Utah Governor Mike Leavitt and Salt Lake City Mayor Rocky Anderson, U.S. Attorney Paul Warner, Assistant U.S. Attorney Dave Schwendiman, as well as, the many other local city and county officials, and their staffs, who hosted the Games and marshaled the resources which made the Olympics such a success. They represent the great character of the people of Utah.

Utahns work very hard to preserve the beautiful natural backdrop that the world admired and enjoyed so much throughout the Games. They also worked very hard to build the modern, state-of-the-art infrastructure that made the Games possible. It was Utahns who provided the indomitable pioneer spirit which inspired the Games to reach new heights. Without the tens of thousand of Utah volunteers, the Games would not have been possible at all, let alone the unqualified success they turned out to be.

But this is only part of the success story. The 2002 Winter Olympic Games were possible because of well-conceived and well-executed partnerships among Federal, state, local, and private organizations. Not enough can be said about the way private enterprises partnered with government at all levels. Mitt Romney, President and CEO of the Salt Lake Organizing Committee, and Fraser Bullock, the Chief Financial Officer and Chief Operations Officer, are great Americans and heroes of the 2002 Olympic Games. Their collective business acumen, indomitable spirit, and eye for beauty and passion brought about a splendid production from start to finish—that was enjoyed immensely by the whole world. I want to personally thank the entire Salt Lake City Organizing Committee for 17 days of magic!

For many years, the Salt Lake Organizing Committee Board of Trustees was the backbone of planning the Games. These dedicated men and women provided critical guidance and support in developing the overall architecture and operations for the Games. We all owe a great deal of thanks to the able leadership of Frank Joklik, who was also the former CEO and President of the Salt Lake Organizing Committee, as well as former Chairman of the Board of Trustees. Under the direction and care of Bob Garff, current Chairman of the Board of Trustees, the Board has been second to none in keeping the Games on track over the years. We are very proud of every member who has ever served on the Board of Trustees.

The current Board of Trustees have every right to be proud of their accomplishments. We salute: Mr. Spence Eccles, Mr. James Beardall, Ms. Sandy Baldwin, Ms. Teresa Beck, Mr. J. Dwight Bell, Mayor Lewis K. Billings, Mr. Luke Bodensteiner, Mr. Kenneth Bullock, Ms. Camille Cain, Mr. Joseph A. Cannon, Mr. Don Cash, Mr. Keith Christensen, Mr. Forrest Cuch, Ms. Kathaleen K. Cutone, Ms. Anita Defrantz, Ms. Maria Dennis, Mr. Randy Dryer, Mr. James L. Easton, Mr. Ed Eyestone, Mr. Rocky Fluhart, Ms. Maria J. Garciaz, Mr. George Garwood, Mr. Paul George, Ms. Rachel Mayer Godino, Ms. Joan Guetschow, Mr. Jim Holland, Mr. Tom Hori, Mr. William Hybl, Mr. Nolan Karras, Mr. Karlos Kirby, Mr. Don J. Leonard, Ms. Hilary Lindh, Dr. Bernard Machen, Mr. Bill Malone, Mr. Larry Mankin, Mr. Al Mansell, Mr. Henry Marsh, Mr. Jim Morris, Ms. Carol Mushett, Mayor Brad Olch, Ms. Grethe B. Peterson, Ms. Margaret Peterson, Mr. Dave Pimm, Mr. John Price, Mr. Early Reese, Mr. Chris Robinson, Mr. Mike P. Schlappi, Dr. Gerald R. Sherratt, Mr. Bill Shiebler, Mr. William J. Stapleton, Mr. Marty R. Stephens, Mr. Gordon Strachan, Ms. Picabo Street, Mr. James R. Swartz, Ms. Lillian Taylor, Ms. Diana Thomas, Mr. Richard Velez, Mr. Lloyd Ward, Ms. Ann Wechsler, Mr. Winston A. Wilkinson, Mr. Marion Willey, Mr. C.J Young, Mr. Ed T. Eynon, Mr. Kelly J. Flint, Mr. Grant C. Thomas, Mr. Brett Hopkins, Mr. James S. Jardine, and Mr. Lane Beattie.

I want to give special thanks not only to the current board but to past board members who have also given so much to these Olympics. They include: Verl Tophan, Earl Holding, Alan Layton, Scott Nelson, Tom Welch, Dave Johnson, Fred Ball, Jack Gallivan, former Utah Governors Calvin Rampton and Norm Bangerter, former Salt Lake City Mayor, Dee Dee Corradini, Palmer DePaulis, Jake Garn and many others.

The members of the Utah Olympic Public Safety Command, known as USOPSC also deserve special recognition. I am especially proud of its Commander Robert Flowers, Vice Commander Rick Dinse, and Executive Director David Tubbs. This 20-member interagency and intergovernmental body developed and implemented all the public safety and security measures for the Games. I also want to express my appreciation to Earl Morris and former USOPSC member Craig Dearden for their tireless efforts. This unique cooperation between the public sector and the private sector, between federal agencies and state agencies should get an Olympic gold medal. Within the UOPSC structure, all these organizations focused on the task of making the Games safe and enjoyable while leaving organizational biases and petty preferences at the doorstep. I believe that this approach is the blueprint for all future National Special Security Events and the UOPSC structure may even be a model for other states as they continue to implement their plans to combat terrorism.

When the Olympics were designated a National Special Security Event, three federal agencies were primarily responsible for creating the security network for the Games. They were: the Secret Service, the FBI, and the Federal Emergency Management Agency. Attorney General John Ashcroft, FBI Director Robert Mueller, FBI Special Agent in Charge Don Johnson, Secretary of Treasury Paul O'Neill, Secret Service Director Brian Stafford, Secret Service Olympic Coordinator Mark Camillo, FEMA Director Joe Allbaugh, and the Secretary of Health and Human Services Tommy Thompson.

I also want to take this opportunity to recognize other critically important members of the Olympic Games partnership. These are the men and women, many of whom are unsung heroes, who ensured the safety, security, and welfare of the Games participants and spectators. Among these are: the active duty and reserve military personnel who stood in the cold for hours inspecting cars and manning security checkpoints; the military pilots who flew a lonely vigil over Utah venues; and those uniformed personnel who manned cold, remote radar sites.

The legions of personnel from every level of federal, state, and local law enforcement who worked 24 hours a day, seven days a week vigilantly watching, inspecting, and protecting the Games also need special recognition. I think about the fire and emergency medical personnel who, like their law enforcement brothers and sisters, were on duty around the clock, planning for the worst while praying for the best. Finally, let us not forget the private nonprofit organizations such as the American Red Cross and the AmeriCorps who cared for those that might have been forgotten in the excitement of the Games.

We also need to acknowledge the other everyday heroes whose stories often did not make the press. It is amazing that in a state as sparsely populated as Utah, there were well over 60,000 applicants for the 30,000 volunteer positions.

And we all have to pay special tribute to the inspirational performances by The Mormon Tabernacle Choir, for their presence at so many events lifted our spirits and touched our hearts. The Church of Jesus Christ of Latter-Day Saints provided the security for these events, as well as, security at Temple Square. The Church's efforts were lauded by local and federal law enforcement officials alike.

I would like to spend a few minutes discussing the preparation and execution of security for the 2002 Salt Lake City Olympic Games. There is a great story here. I hope the lessons learned in Utah from the efforts of the many men and women in the security community will help others charged with protecting their communities.

The most important lesson learned, and one which I can not emphasize enough, is that security success depends on the open and willing cooperation among agencies at all levels of government and in the private sector. If I had to point to a one thing that spelled the difference between success and failure for the Olympic Games, I would have to say that is was the open lines of communications among all law enforcement agencies, fire and emergency medical services, hospitals and universities, and private and non-profit organizations at all levels.

More than 60 federal, local, and state law enforcement agencies contributed to the public safety of the 2002 Winter Olympics. Let me tell in detail why this experience in Salt Lake City is so unique.

In August 1999, the 2002 Winter Olympics in Salt Lake City was designated as a National Special Security Event. Once this designation was made, the Secret Service became the lead federal agency for designing, coordinating and implementing security at the event. With responsibility for protecting over 2,300 athletes from 77 nations, scores of foreign officials and dignitaries, and over one million spectators, the Secret Service's Major Events Division collaborated with dozens of other federal, state, and local law enforcement agencies and public safety officials to design a multi-faceted and comprehensive security plan. They worked for nearly 16 months to establish a safe and protected environment at an assortment of venues in the Salt Lake City area.

The tragic events of September 11, 2001, ushered in a new era of heightened security, with even more emphasis on precaution and prevention. After the terrorist attacks, efforts intensified to enhance existing security plans designed and tailored to the requirements of each of the many individual venues at the Winter Olympics.

In the end, the 2002 Winter Olympics were a rousing success story for not only the United States athletes, who established a new record for American success at the Winter Games with 34 medals, but also for the thousands of athletes and hundreds of thousands of spectators who were able to compete and attend events in the safest and most secure environment possible.

The 2002 Winter Olympics represented the largest coordinated security effort in our Nation's history. While most security plans for a sporting event may typically include a large stadium and the surrounding area, the Secret Service was responsible for coordinating security at 15 different venues consisting of: the Delta Center, Medals Plaza, Main Media Center, Rice-Eccles Olympic Stadium, Olympic Village, Ice Sheet at Ogden, IOC Hotel, Snow Basin Resort, Park City Mountain Resort, Deer Valley resort, Utah Olympic Park, Soldier's Hollow, Peaks Ice Arena, E-Center Ice Arena, and Ice Oval at Kearns. There also were special security requirements implemented at the Salt Lake International Airport and Salt Lake City's downtown Washington Square.

Compounding the difficulty of securing such a large and diverse number of venues was the sprawling geographical coverage of the Winter Games. The zone of security stretched for 900 square miles, from Provo to Ogden, providing numerous operational and logistical challenges for the Secret Service.

The security plan was designed and developed to provide the most secure environment for athletes, spectators, and protected venues. There was an airspace security plan to restrict certain aircraft from approaching any protected venue. There was a cyberspace security plan to ensure that no electronic intrusions could disrupt communications and operations. In addition, there was a physical security plan, including remote poststanders, magnetometers, state-of-the-art security cameras, chain-link fences, and electronic sensors.

Notwithstanding all of the technology and electronic monitoring, the foundation of any security plan is the law enforcement personnel implementing it. At the Winter Olympics, over 10,000 federal, state and local law enforcement and public safety officers stood watch around the clock, working in a collective and collaborative effort toward one single goal: to prevent any incidents that could cause harm to athletes or spectators, or create significant disruptions of the Games themselves.

The result of this comprehensive and sweeping security plan was secure surroundings that allowed athletes and spectators alike to enjoy the atmosphere of this international gathering without having to navigate any overly burdensome or time-consuming security checkpoints.

While there were occasional evacuations or disturbances, none of these matters were deemed serious, and there were only a handful of minor arrests during the course of the 17 days of the Games. Although at the close of the Olympics, there were no medals for the Secret Service and its partners in law enforcement and the military, the thousands of men and women who participated in the execution of perhaps the most sophisticated and successful security plan in the Secret Service's 137-year history deserve recognition and gratitude for their tireless efforts and dedication to their critical jobs.

In sum, the Salt Lake City Olympics provided the opportunity to develop and execute a plan to protect a 900 square mile part of this country. I urge that we capture the lessons learned from this experience and incorporate these lesson into our national security planning process.

Following the great traditions of this country, the success of the 2002 Salt Lake City Winter Olympics was not due to any one individual, but to all who participated. From the spectators at the venues who showed patience, to the athletes who demonstrated the power of sport, to the organizers and protectors who gave us outstanding Games, and finally to the American people, including this Congress, who overwhelmingly supported the Games, we proved to the World that the events of September 11 will not deter this great Nation.

Finally, I want to take this opportunity to thank the staff who worked tirelessly with me on the Olympics: Kristine Iverson, Patricia Knight, Roslyn Trojan, Christopher Campbell, Scott Simpson, Melanie Bowen, Heather Barney, and Christopher Rosche. I also owe a special thanks to Brandon Burgon who made sure I was always where I was supposed to be, and that I was on time. I appreciate everything they did, and am very proud of them.

The PRESIDING OFFICER (Mr. REED). Under the previous order, the Senator from Vermont is recognized for up to 30 minutes.

NATIONAL LABORATORIES PARTNERSHIP IMPROVEMENT ACT OF 2001—Continued

Mr. JEFFORDS. Mr. President, we will have before us over the next several weeks a historic opportunity to change the direction of energy use in this country.

I know you will hear from many of my colleagues that the events of September 11 have changed how we must view energy, and on that point we must all surely agree. An increasing reliance on energy imports from politically unstable areas of the world is not in America's best interests, and we must reassert our dominance over our own energy production and innovation. One of the most important ways to achieve this is to wean ourselves from foreign oil in our transportation sector, and to diversify the energy base for our electricity generation into clean, domestically produced renewable resources.

We have before us a piece of comprehensive energy legislation that quite frankly is one of the best to emerge from this body in some time. Senators DASCHLE and BINGAMAN have brought forward, in their comprehensive amendment to S. 517, legislation that would spur the development of renewable energy resources, that will advance efficiency in our transportation, building and electricity sectors, and that will begin to address global climate change. I support many of the provisions of this legislation, particularly those that encourage the production of renewable energy, and those that provide additional funding for energy assistance to low income households.

As chairman of the Committee on Environment and Public Works, I have considerable interest in several areas within the committee's jurisdiction. These include issues relating to regulation of commercial nuclear power plants, and to air and water quality issues such as global climate change, the use of reformulated fuels, and air emissions from the transportation sector. I support the bill's provisions on efficiency standards for homes, schools, and public buildings, as well as the efficiency standards for appliances and other consumer and commercial products. I also support increased funding for the Low Income Energy Assistance, LIHEAP, program, and for expanded R&D for reducing greenhouse gas emissions and promoting efficiency and renewables. I look forward to inclusion of the tax provisions passed out of the Finance Committee, particularly those provisions which extend and expand the production tax credit for renewables, and provide credit for alternative fuels and alternative fueled vehicles. As chairman of the Environment and Public Works Committee, I have particular interest in those provisions of the bill which address the protection of our environment through reductions of emissions and pollutants affecting air and water quality.

Earlier this Congress, the EPW Committee reported out S. 950, the Federal Reformulated Fuels Act. This bill provided recognition of the need to reduce MTBE contamination of water supplies and enhance fuel suppliers' flexibility in meeting market demand. We have also recognized the need to grow the renewables share of the transportation fuels market. I commend the leader, Senator DASCHLE, for convening a broad and diverse group of stakeholders to craft an agreement on these issues in the fuels section of S. 517. I support the provisions in the Daschle bill that will raise CAFE standards, a long overdue action that will dramatically decrease the amount of gasoline consumed on our highways.

Both the reformulated fuels and CAFE provisions will benefit the environment, and reduce our dangerous dependence on foreign fuels. I am supportive of the provisions in the Daschle bill that set us on a path to seriously address global climate change. I am however deeply concerned that administration of the greenhouse gas database is not placed with the EPA, the agency most clearly qualified to run this program. No other agency has the experience with air emissions data or capability to run such a program more effectively. The agency already collects detailed carbon dioxide emissions information from the utility sector, and leads the Federal agencies in preparation of the national inventory, pursuant to the Global Climate Protection Act of 1978 and other authorities. Placing this responsibility elsewhere in the Federal bureaucracy seems duplicative and illogical.

As chairman of the Environment Committee, the environmental and public health impacts of emissions are on the top of my list of concerns. These issues are not directly addressed in S. 517. As this session moves forward, the EPW Committee will be considering legislation that would cap greenhouse gas emissions from the transportation sector, which is responsible for approximately one-third of U.S. emissions. I support the inclusion in the electricity section of the bill of a net metering standard, which would give consumers credit for their own production of solar or wind energy. I am however concerned that the bill fails to include provisions, either through a public benefits fund or an electric efficiency mandate, to ensure the continuation of programs to encourage electricity efficiency innovations by utilities. Efficiency in electricity generation is a vital component of consuming less fuel, and lack of a provision addressing this issue is a major failing in the legislation. I am also concerned that the definition of biomass in various places in S. 597 does not exclude incineration of municipal solid waste, a process which results in emissions of mercury and sulfur dioxide. Measures which seek to encourage increased use of clean renewable energy should not provide new incentives for incineration of municipal solid waste.

One of the most important aspects of the legislation is its provisions for increasing the use of renewable energy in our nation. Unlike the House bill, Senator DASCHLE's bill includes a renewable portfolio standard which will guarantee that a greater portion of America's electricity needs are met by renewable energy. To date, the administration, like the House, has not endorsed this most basic of concepts, and I strongly commend Senator DASCHLE and Senator BINGAMAN for stepping forward on this crucial issue. This notwithstanding, I cannot support the Daschle renewable portfolio standard. My primary concern with his provision is that it does not go far enough to provide the level of environmental protection and market stimulation that a national renewable portfolio standard should provide.

S. 597, Senator DASCHLE's bill, contains a renewable portfolio standard requiring the generation of 10 percent of renewable energy electricity by the year 2020. While moving in the right direction, this will not provide the level of investment and growth achievable by my amendment. We must be aggressive in finding alternatives to fuels that pollute, or present unacceptable security risks. I will be introducing an amendment today that will ensure that by the year 2020, 20 percent of the electricity Americans use will be supplied by clean and safe renewable energy from wind, solar, biomass or geothermal sources.

The United States today relies heavily on coal, nuclear power, and natural gas to generate its electricity. Yet the United States is also blessed with an abundance of renewable energy resources including wind power, intense solar energy, vast sources of biomass, and geothermal energy. These renewable energy resources do not pollute, they need not be bought from foreign markets, they do not leave behind piles of toxic wastes, and they will not run out.

Because renewable energy has been with us forever, we tend to disregard it. We tend to think of it as too simplistic to meet our modern energy needs. Like this windmill pictured from the old American West, we tend to think of wind, and other forms of renewable energy as quaint, but outdated vestiges of our past. We could not be more wrong. According to the U.S. Department of Energy wind energy has been the fastest growing source of electricity generation in the world in the 1990s.

Today, the U.S. wind industry generates about 3.5 billion kilowatt-hours of electricity each year, enough to meet the annual electricity needs of 1 million people. The costs of wind energy in the United has dropped more than 80 percent in the past two decades, with today's prices being competitive with electricity being delivered by fossil and other fuels. As you can see in this picture of a modern windmill farm in Texas, times have changed. In Texas alone, wind power generation has more than doubled in the past three years, and estimates are that up to 1,000 megawatts of new renewable energy capacity will be operating by the end of this year. This jump is attributed in large part to a State renewable energy standard signed into law by Governor Bush in 1999.

Throughout the country, utilities are installing wind turbines and other renewable energy facilities as customer demand for clean energy grows, and costs drop.

These pictures illustrate but a few examples, such as this wind farm in Colorado; or the Northern States Power wind farm in Minnesota; the Vanscycle Ridge wind farm in Oregon; this wind facility providing electricity to the people of Traverse City, MI.

Wind production can be especially beneficial in rural and remote areas, as we can see by this wind turbine in remote Kotzebue, AK, which displaces diesel fuel generation.

Geothermal, biomass and solar are also making increasing contributions to local and regional electricity generation. This Nevada geothermal power plant produces electricity for 100,000 people. This geothermal facility in California has produced the energy equivalent of over 250 million barrels of oil, and currently provides electricity to over one million people. This geothermal plant in Hawaii provides electricity for 60,000 people. This modern complex in Lousiville, KY is heated and cooled by geothermal heat pumps.

Energy produced from biomass has the potential to account for almost as much renewable energy electricity production as wind. Here a biomass facility in Shasta County, CA converts wood wastes into electricity. This tractor is harvesting switchgrass in Charington Valley, IA where farmers planted over 4,000 acres of switchgrass, which when burned will generate a continuing 35 megawatt flow of clean burning energy. If successful the project will be scaled up to 50,000 acres and involve 200 to 500 farmers. This bioenergy plant in Fayetteville, AR is testing new bioconversion processes. This photovoltaic charging station in Tampa, FL recharges batteries for hybrid electric vehicles, then contribute excess generated power back to the electric grid. This cattle rancher in Idaho uses wind energy to power his home and ranch under a program sponsored by the Idaho Power Company. This shows the solar array at BP Solarex headquarters in Frederick, MD. BP solar, a subsidiary of BP International, is a leading world developer of photovoltaic technology, with offices and manufacturing sites around the world. This solar concentration system at Sandia National Laboratory in New Mexico produces utility grade electric power.

Despite these exciting advances in U.S. renewable energy, the United States and American businesses still lag far behind advances being made in Europe and the rest of the world. Compared to the roughly 1 million American homes that are served by renewable energy, installed international wind capacity is enough to satisfy the electricity needs of 23 million people. The U.S. wind industry is actively seeking to utilize marketing opportunities outside the United States.

According to the U.S. Department of Energy's National Wind Technology Center, these prospective wind energy markets could translate into several billion dollars in sales for the U.S. wind industry. U.S. firms have already installed turbines in Canada, The Netherlands, Mexico, South America, Spain, Ukraine, and the United Kingdom. Nonetheless, 90 percent of the world's wind turbine manufacturers are European, with a combined annual turnover of more than one billion Euros.

These potential markets are only likely to increase. As the European Wind Energy Association states:

> Whereas the cost of most forms of energy are bound to rise with time, the costs of wind energy are actually coming down.

Offshore European wind projects at various stages in the pipeline amount to more than 5,000 megawatts. Even accounting for the understandable enthusiasm of those in the industry, it is clear that both the international and American wind energy markets have the potential for great expansion.

The faster expansion in international markets is due in great measure to governmental policies that favor such expansion. As the U.S. Department of Energy states,

> Wind energy is the fastest growing source of electricity generation in the world in the 1990's. However, the majority of growth has been in Europe, where government policies and high conventional energy costs favor the use of wind energy.

Even with advances to date, American renewables still account for little more than 2 percent of total U.S. electricity production. There is more than enough room for them in the U.S. energy market. The United States is the world's largest single energy market, representing more than 25 percent of world energy consumption.

The real question is the extent to which we in this country will take advantage of our abundant renewable resources, and the assistance we will be willing to provide our American companies in competing in this market. Are we going to allow American companies to miss the boat? Is the United States going to lag behind while the rest of the world makes investments, develops infrastructure and outpaces us in the profitable manufacture and production of renewable technologies? Will we once more, as we are now for fossil fuels, be dependent on other nations for the means to provide our domestic energy, but this time because the technology and manufacture of renewable energy rests largely in other countries?

My amendment would provide an important step in providing market strength to U.S. renewable industries. It would create a renewable portfolio standard under which utilities would be required to gradually increase the amount of electricity from renewable energy resources sold to consumers, starting at 5 percent by 2005, and leveling out at 20 percent in 2020. This will be achieved by a system of renewable energy credits, that electric retailers can either generate themselves, or buy from someone else who has generated electricity from a renewable resource.

Those selling tradeable credits to the retailers need not themselves be connected into the grid. So long as someone has generated electricity from a listed renewable energy resource, and either used it himself or sold it to someone else to use, he can sell the credit to a retail electric supplier. My amendment would allow credits from existing renewable energy production, thereby encouraging expansion of existing facilities as well as creation of new sources of renewable energy. It would be hydropower neutral in that it would require the use of renewable energy credits to offset only production of non-hydropower electricity sold by the retailer. It would define renewable energy to include wind, solar, geothermal, landfill gas, certain biomass, and incremental hydropower added by increasing efficiency. It would not include industries which generate substantial amounts of pollution such as incineration of municipal solid waste, as renewable energy for which credits could be obtained.

This flexible, market-driven system, will help reduce market barriers for renewable energy, and stimulate domestic investment in new renewable energy throughout the nation. It will allow our companies to grow domestically, and establish sufficient stability to compete successfully in the world market. It will encourage the successful, long-term integration of these important renewable technologies into the energy sector, and will help grow the U.S. renewable energy industry into a world leader of renewable energy technology. My amendment will be good for the environment. It will improve air quality, by reducing use of fossil fuels which produce nitrogen oxides, sulfur dioxide, and mercury emissions. These harmful pollutants are linked to smog, acid rain, respiratory illness, and water contamination.

This is an urgent issue. As reported in today's Washington Post, a study recently published in the Journal of the American Medical Association concludes that long-term exposure to fine particles of air pollution from coal-fired powerplants, factories, and diesel trucks increases an individual's risk of dying from lung cancer by 12 percent.

This is particularly important to my home State of Vermont. We in the Northeast live downwind from virtually the entire nation. The prevailing wind patterns bring ozone-causing nitrogen oxide straight to our front door.

There are days I can stand on Mount Mansfield, and not be able to make out the water tower on Mount Elmore barely 20 miles away.

My amendment would cut carbon dioxide emissions, a major contributor to global warming, by almost 19 percent, or 137 million metric tons by 2020. The Daschle 10-percent standard would achieve only a 7-percent reduction, or 56 million metric tons.

A 20-percent renewable energy standard that stimulates investment in renewable energy will be good for our economy. It will create thousands of new, high quality jobs and bring significant new investment to rural communities. It will create an estimated $80 million in new capitol investment here at home and create new opportunities in the manufacturing and high-tech sectors. The market demand for renewable energy will also bring jobs to rural areas, where it is estimated that wind energy alone could provide $1.2 billion in new income for farmers, ranchers and rural landowners, and $5 billion in new property tax revenues to communities.

My amendment will advance national security. Renewable energy technologies will reduce dependence on fossil fuels, alleviating pressure on those markets. Because they are domestically produced, they will reduce our vulnerability to foreign threats. Because they are distributed in nature, they will reduce our reliance on centralized resources and the vulnerability of our energy infrastructure to terrorist attack.

Following the attacks of September 11, we can no longer afford to take this responsibility lightly.

Mr. President, on September 19, James Woolsey, former Director of the CIA, Admiral Thomas H. Moorer, former Chairman of the Joint Chiefs of Staff, and Robert C. McFarlane, former National Security Advisor to President Reagan, sent a letter to myself and other Members of this body urging in the strongest terms that we take immediate action to address our energy security. Among other recommendations, they state that they "urge the Energy Committee to immediately adopt the Renewable Portfolio Standard. . . ."

I ask unanimous consent that this letter, signed by all three, be printed in the Record.

There being no objection, the letter was ordered to be printed in the Record, as follows:

September 19, 2001.

Senators Thomas A. Daschle, Tom Harkin, Robert C. Byrd, Carl Levin, Jeff Bingaman, James S. Jeffords, Max Baucus, Joseph R. Biden Jr., Trent Lott, Richard Lugar, Ted Stevens, John W. Warner, Frank H. Murkowski, Robert C. Smith, Charles E. Grassley, Jesse Helms.

Dear Senators: Americans are aware of the enormous and complicated tasks ahead in dealing with the consequences of the unprecedented September 11th attack against our nation.

There are many corrective actions that require lead-times that could be months or even years. But, there are actions that can and must be taken now. One of those critical actions is to advance America's energy security. The Congress will soon act on that issue.

It is not enough just to ensure uninterruptible supplies of transportation fuels and electricity. We must also act to advance the security of those supplies, and the nation's ability to meet its needs in all corners of the country at all times. Our refineries, pipelines and electrical grid are highly vulnerable to conventional military, nuclear and terrorist attacks.

Disbursed, renewable and domestic supplies of fuels and electricity, such as energy produced naturally from wind, solar, geothermal, incremental hydro, and agricultural biomass, address those challenges. Fortunately, technologies to deliver these supplies have been advancing steadily since the Middle East fired its first warning shot over our bow in 1973. They are now ready to be brought, full force, into service.

But, while the U.S. Government has committed intellectual and monetary resources to developing these technologies, the status quo marketplace is unwilling to accommodate these new supplies of disbursed and renewable fuels and electricity. Speedy action by the Administration and the Congress is critical to establish the regulatory and tax conditions for these renewable resources to rapidly reach their potential.

Fortunately, such actions are under consideration by the Energy, Environment, and Finance Committees. We urge the Energy Committee to immediately adopt the Renewable Portfolio Standard (for electricity) as well as provisions to ensure ready interconnection access to the electric grid, and cost-shared funds to the state public benefit funds to continue essential support for emerging technologies and the provisions of electricity to the truly needy. We urge the Environment Committee to immediately adopt the Renewable Fuels Standard in conjunction with measures to deal with environmental issues. Finally, we urge the Finance Committee to immediately adopt residential solar credits and renewable energy production tax credits, including a provision for fuels (liquid, gaseous and solid fuels), or their Btu equivalent, similar to the fuel provision tax credit made available in Section 29 of the Internal Revenue Code.

These actions will also develop new industries and jobs, strengthen communities, enhance the environment, and assist in the stabilization of greenhouse gases. On the transportation fuels issue, ethanol, biodiesel and other biofuels will slow the flow of dollars to the Middle East, where too many of those dollars have been used to buy weapons and fund terrorist activities.

Consequently, we also recommend a major and concerted effort to assemble the talent and resources needed to launch a "Liberty Ship" type program to convert agricultural wastes and cellulosic biomass into biofuels, biochemicals and bioelectricity. The technology to do so is in place; all that is lacking is the political will to deploy it.

Sincerely yours,

R. James Woolsey,
Former Director, Central Intelligence.
Robert C. McFarlane,
Former National Security Advisory to President Reagan.
Admiral Thomas H. Moorer USN (Ret),
Former Chairman, Joint Chiefs of Staff.

Mr. JEFFORDS. A 20-percent renewable energy standard by 2020 is affordable. The Department of Energy's information administration found a 20-percent renewable energy standard by 2020 would result in only modest increases in consumer electricity bills of up to 4 percent as compared to prices if no renewable energy standard were imposed.

Polls have indicated Americans are willing to accept such moderate price increases in exchange for the benefits derived from the greater renewable energy production.

These same EIA studies showed that while households will experience modest increases in electric bills, a 20-percent renewable energy standard will actually reduce overall energy costs, which include the costs attributable to home heating and commercial and industrial energy consumption by approximately 0.1 percent by the year 2020.

With these very modest costs, the provisions in my amendment will increase renewable energy production by a total of roughly 2 million megawatts. Higher numbers are distinctly possible. In the Sacramento Municipal Utility District, for example, if every new home built in California subdivisions each year had photovoltaic energy roofs similar to the ones shown in this chart, they would produce the equivalent of a major 400- to 500-megawatt powerplant every year.

This amendment is the right thing to do. It is supported by the Consumers Union, the Consumer Federation of America, along with hundreds of businesses, associations, labor and consumer advocacy groups, environmental groups, faith-based organizations, academies, and local communities.

I ask unanimous consent a list of approximately 450 groups and individuals supporting my amendment be printed in the Record.

There being no objection, the list was ordered to be printed in the Record, as follows:

Supporters of a 20% by 2020 National Renewable Energy Standard

Mr. JEFFORDS. My standard is achievable. To date, 12 States have successfully enacted renewable standards, several of which exceed the 20 percent by 2020 standard of my amendment.

States and utilities, recognizing the cost and environmental benefits of clean energy, are setting goals similar to mine for their use of renewable energy. Governor Pataki of New York, for example, recently ordered all agencies in the State of New York to produce 10 percent of their electricity from renewable energy sources by 2005 and 20 percent by 2010.

While good as far as it goes, Senator DASCHLE's amendment would result in about half of the renewable energy generation that would be achieved under my amendment. Yet a 20-percent standard by 2020 is reasonable, achievable, and will provide for the important capital investment, market security, and environmental benefits for which we should be aiming.

We have an obligation to act now to take the actions needed to secure clean, domestically produced, reliable sources of energy. We must not lag behind the weak standards or no standards at all.

I urge my colleagues to vote for me in favor of this amendment.

Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has approximately 7½ minutes.

Mr. JEFFORDS. Let me share my long-term interest in this matter. I came into the Congress in 1975. In that year, this Nation was in terrible shape. The oil from the Mideast had been interdicted. We had long lines of cars, and everybody was in dire straits. A number of us at that time formed a coalition to do something about energy. The reason I bring it up is that much of what we are talking about today is much of what was proposed.

First, Norm Mineta, then in the House with John Blanchard of Michigan and me, introduced the wind energy bill. It passed. We drew lots as to how it would be named. It turned out to be Blanchard's bill. That was a major move forward in wind energy.

Photovoltaics was another great interest of mine. I have a fond memory of the coalition we put together at that time. We had over 80 members of the energy coalition, the solar coalition as it was called. So I went on to the House floor to offer an amendment. The amendment would have taken a large step forward in solar energy.

The chairman of the subcommittee came to me and said: Son, you do not offer amendments to appropriations bills unless you check with me first. He said: Come in and I will see if I can get you a couple of million dollars for this project.

I said: I am sorry, but I cannot do that.

He said: Why can't you?

I said: Because I have 80 cosponsors.

He said: You have 80 cosponsors?

Yes.

Well, I guess we are going to have to battle it out.

And we did. It passed, although they cut part of it off for other solar energy. So that was the beginning of the photovoltaics industry in the United States. It was a proud moment, and it was a fun one to look back upon, especially as to the shock on the chairman's face when I told him how many cosponsors we had.

At that time also, we went on to form the Alliance to Save Energy, which included myself, and at that time it was JEFF BINGAMAN and the Senator from Illinois who were with us on that issue, and that has proved to be a very interesting and excellent benefit to our energy situation. Chuck Percy was the Senator's name.

I commend JEFF BINGAMAN, who is in the Chamber with me, for his work over those years. Together we are still working as hard as we can to do what we can about the energy situation.

I yield the floor.

The PRESIDING OFFICER. Under the previous order, the Senator from Wisconsin is recognized for up to 10 minutes.

Mr. FEINGOLD. Thank you, Mr. President.

(The remarks of Mr. FEINGOLD are printed in today's RECORD under "Morning Business.")

Mr. FEINGOLD. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. THOMAS. Mr. President, I ask unanimous consent the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THOMAS. Mr. President, I am delighted that we are into the energy package. We have been talking now for some time, of course, about an energy policy in this country. The President has talked about it for a very long time. He has put forth, with the help of the Vice President, an energy policy. So I am pleased that we are into that, and I hope we continue to work on it until we are able to successfully put together a bill that will meet our collective notions.

I ask unanimous consent several letters I received this morning be printed in the RECORD. This one comes from the Vietnam Veterans Institute. These are all directed to Senator DASCHLE in support of the energy program.

This one is from the Veterans of Foreign Wars of the United States, also voicing their support for energy policy. This one comes from the AMVETS, this one from the Catholic War Veterans, and this one from the American Legion.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

VIETNAM VETERANS INSTITUTE,
March 5, 2002.

Hon. TOM DASCHLE,
Majority Leader, U.S. Senate,
The Capitol, Washington, DC.

DEAR SENATOR DASCHLE: As the Chairman and Founder of the Vietnam Veterans Institute, I write today out of a sense of urgency concerning our national security as it relates to our energy supply. Veterans groups with a combined membership of nearly 5 million support the President's energy bill. I am proud to be joined by the American Legion, the Veterans of Foreign Wars, AMVETS, and the Catholic War Veterans of the USA.

I respectfully urge you to pass the President's energy bill, H.R. 4, and the provisions it contains. Further, I agree with the President, who during the State of the Union address, said "We must act, first and foremost, not as Republicans, not as Democrats, but as Americans." He went on to say that we must continue at home and abroad with the same spirit of cooperation. I believe it is imperative to our national security that we stand together as Americans. Make no mistake, responsible exploration of ANWR is a matter of national security.

You have expressed concern with ANWR, stating that an energy plan should not include opening wilderness areas to oil drilling. Senator, do you know that exploration is already taking place in wildlife refuges in 13 states, including Senator Blanche Lambert Lincoln's state of Arkansas and in North Dakota, Senator Kent Conrad's state? It is important to note that in all of those wilderness areas, there has been no harm to the wildlife caused by the exploration in any of those states.

It is crucial for the American public to have the facts. And if the truth is told, the American public will learn that the native peoples of Alaska who actually live in the affected area are 100% supportive of exploration of ANWR—and—do not believe it will be any threat to the environment. Why is it that we are not willing to let the people who live there decide their future and the future of their lands?

The native peoples of Alaska who have opposed ANWR do not live in the affected area and have leased their own lands for oil exploration. I do not know if this has ever been reported. I believe the American public has the right to know.

Please pass the President's energy bill and help us rebuild America!

With the support of our members,
J. ELDON YATES,
Chairman and Founder.

VETERANS OF FOREIGN WARS
OF THE UNITED STATES,
October 29, 2001.

Hon. TOM DASCHLE,
Majority Leader, U.S. Senate,
Washington, DC.

DEAR SENATOR DASCHLE: The 2.7 million members of the Veterans of Foreign Wars of the United States and its Ladies Auxiliary supports H.R. 4, the "Securing America's Future Energy Act of 2001" or SAFE Act of 2001. We applaud the House of Representatives for its bipartisan work in addressing our energy vulnerability by passing H.R. 4. We believe the Senate should consider and vote on H.R. 4 so that our nation has an energy plan for the future and can move forward quickly with a comprehensive plan to develop our domestic energy resources.

Keeping in mind the horrific events of September 11 and mindful of the threats we are facing, we strongly believe that the development of America's domestic energy resources is a vital national security priority. We need to take steps to reverse our growing dependence on Middle East oil as quickly as possible. By passing H.R. 4, the Senate will be supporting our troops serving in combat on Operation Enduring Freedom, the American people, and our national security with a comprehensive energy legislation that is desperately needed to diversify the energy for our country and chart a course for the future.

The VFW strongly urges the Senate to consider and vote on H.R. 4 as passed in the House in this session of Congress.

Sincerely,
ROBERT E. WALLACE,
Executive Director.

AMERICAN VETERANS,
Lanham, MD, March 6, 2002.

Hon. TOM DASCHLE,
Majority Leader, U.S. Senate,
Washington, DC.

DEAR SENATOR DASCHLE: AMVETS urges your favorable consideration of H.R. 4, the Securing America's Future Energy Act of 2001.

As you know, our current reliance on foreign oil leaves the United States vulnerable to the whim of individual oil-exporting countries, many existing in the unpredictable and highly dangerous Persian Gulf. And it cannot be overstated that energy supplies touch nearly every aspect of our lives from our economy to our national security.

H.R. 4, as approved by the House, is a critical part of an overall policy America requires to promote dependable, affordable, and environmentally sound production and distribution of energy for the future. We cannot wait for the next crisis before we act.

Thank you for your service in the United States Senate and please remember that this issue is vital to our nation's security and the brave men and women who serve in the Armed Forces.

Sincerely,
RICHARD A. JONES,
National Legislative Director.

CATHOLIC WAR VETERANS OF THE
UNITED STATES OF AMERICA,
March 5, 2002.

Hon. TOM DASCHLE,
Majority Leader, U.S. Senate,
The Capitol, Washington, DC.

DEAR SENATOR DASCHLE: We write today on behalf of our membership to encourage you to pass the President's energy bill, H.R. 4. We support this bill because we believe our national security demands that America be less dependent on foreign oil producers.

The September 11th attacks on democracy have expedited the need for increased oil self-sufficiency. Reliance on other countries, especially during these times of war and international terrorism, threatens our national security and economic well-being.

The Catholic War Veterans of the USA respectfully urge you to support the provisions contained in the House passed version of the "Securing America's Future Energy Act of 2001." The legislation is a major step toward achieving energy independence and ensuring our national security.

Sincerely,
JOSEPH SATRIANO,
National First Vice Commander.

THE AMERICAN LEGION,
Washington, DC, March 5, 2002.

Hon. TOM DASCHLE,
Majority Leader, U.S. Senate,
The Capitol, Washington, DC.

DEAR SENATOR DASCHLE: On behalf of the 2.8 million members of the American Legion, I urge you to support a comprehensive energy policy that will improve the nation's energy independence and strengthen national security.

War and international terrorism have brought into sharp focus the heavy reliance of the United States on imported oil. During times of crisis, such reliance threatens the nation's security and economic well being. The import of more than 55 percent of the nation's petroleum from foreign countries further compounds our foreign trade balance. This is a time when the country's energy demands continue unabated. It is important that we develop additional reliable sources of domestic oil.

The American Legion understands the sacrifices being made by the men and women in uniform. The members of America's all-volunteer force have been tasked with the demanding mission of combating terrorism worldwide and strengthening our homeland security. In addition to active-duty forces, seventy-six thousand National Guard and Reserve members have put their lives on hold and left their families, following the terrorists' acts of September 11. Now, it is the duty of a grateful nation to ensure these brave men and women have the resources that they need to successfully carry out that mission.

The development of America's domestic energy resources is vital to national security. The American Legion respectfully urges you to support the provisions contained in the House-passed version of the "Securing America's Future Energy Act of 2001."

I thank you for considering our view on this critical national security issue.

Sincerely,
RICHARD J. SANTOS,
National Commander.

Mr. THOMAS. Mr. President, we had a meeting this morning with the veterans. Over the last several months we have had a number of press conferences and meetings with all kinds of different interests in this country that support us doing something, in a balanced way, about energy policy. We have heard from agriculture, the Farm Bureau, the Farmers' Union. Of course, the labor unions have been very much in support of what is there so we can get on with energy production. We have had small businesses. We have had Native Alaskans here and the veterans associations.

I have been impressed with the breadth of support for an energy policy. I think it indicates in some ways the depth of involvement, how this touches everyone in this country, having an affordable, adequate energy supply, and doing it in a balanced way. It touches everyone's life.

Unfortunately, in terms of moving on something, when last year we were having all the problems in California, of course, the shortage of electricity and the high prices, and gasoline prices were very high, there was great interest in it. Now gasoline prices are down. The California crisis is over. But I hope we do not lose our intensity, knowing that is not going to last unless we have a policy that leads us in the direction, in the future, of having an adequate domestic supply so we are not 60-percent dependent on foreign imports.

Beginning to move towards more diversity in energy certainly ought to be part of our plan. We ought to do that. In a balanced bill, we will have research money to be able to look for new sources of energy, to have clean coal research so we can use those resources more thoroughly, and we should have renewables. All of us are interested in that.

At the same time, we have to do something about production. I guess that is my main criticism of the bill before us, that it leans so much toward conservation and renewables, but it does not take into account what our needs are going to be in the next number of years. If nothing else, we have to look at a balanced energy policy that recognizes that we have to modernize and increase conservation, we have to modernize and expand our infrastructure, we have to have diversity in our supplies, and we have to improve environmental protection—among other things.

We have spent a good deal of time on transportation of electric energy. It is also true of gas and oil, but you can generate all the electricity of the world right here, and if you don't have a way to get it to the market, then you have not accomplished your goals. We need to do something dramatic in this whole area of transportation of electricity. We need to build a network. We have an interstate grid that moves wholesale power, and hopefully we would have regional transportation organizations, RTOs, along there to take it into areas—run by the States. These are things that are pretty much accepted as being necessary ingredients as we move forward with an energy bill.

One of the things that is troublesome—I happen to be on the Energy Committee—is the process that has brought us here. The committee did not have an opportunity to deal with these difficult and detailed questions. That should be done at least initially in committees. We did not do that. The majority leader determined to take the bill out of the committee and bring it here to do this. It has been changed several times since we have been on the floor. That makes it difficult to deal with the details of an energy bill.

Every amendment that comes up here is going to have to be dealt with in such detail, you would think, my gosh, that is the kind of thing that ought to be done in committee. But given the situation, the fact that the majority leader chose to do it that way—I happen to think it is a flawed process—nevertheless we are here. We have had no hearings, no markups, so we are going to be trying to do some of those things.

We will be dealing right now with an amendment having to do with a $20 billion pipeline from Alaska which never had a hearing, never had an opportunity to find out the facts. That is not a good way to legislate.

We will be pushing forward on those issues. I am hopeful that we can move forward. I am hopeful we will have an opportunity to deal with some of the difficult issues such as CAFE standards. I don't think anybody would argue with the idea that we would like to have vehicles that do what we need to do with better mileage. But we cannot be unrealistic, moving it over in just several years, given the costs associated with that —particularly to those who live in the West.

Live where I live and look on the road and you seldom see anything except a pickup and an SUV. I realized part of the reason for that when I was there. I would never have gotten out of my driveway without a four-wheel drive.

This is realism. This is the way it is. We can make some changes, but we can't substitute those future movements for where we need to be now.

With regard to the security of this country, military security, terrorism—these things require that we have an adequate supply of energy. Much of it comes from the Middle East. Because we are having the problems we are having over there—and foreseeably we will be having them for some time—we have to do more.

I live in a part of the country where we are one of the large energy producers in this Nation. We are the highest producer of coal. We have large reserves of gas, methane gas, and oil. But much of it is very difficult. We need to have access to public lands, among other things. We need to be able to utilize those resources in an environmentally sound way. We have done that and can do that.

So I think the idea that somehow we can substitute production with some kind of renewables or some kind of scientific process that we do not even have before us is a little bit of dreamland, I am afraid.

I am hopeful we can move forward and be realistic in what we do. We ought to have an opportunity, certainly, to be able to deal with these issues in a way in which everyone gets an opportunity to have amendments and to get something together that will be generally acceptable to all of us.

As I said, I come from a State that is rich in resources. We have very high coal and oil and gas reserves. We also have an adequate supply—sometimes overadequate supply—of wind. We can convert some of that into electricity, of course. We should, indeed, do it.

We need a realistic policy that encourages fuel diversity, that utilizes all of our domestic resources in a very broad way, that takes economic and environmental factors into account. In relation to economic factors, we need to be realistic about what we are going to do. We need to provide a cleaner and more secure energy future. We need an overall energy strategy that increases conservation and energy efficiency and boosts supply and promotes alternative energy. I think we can do that.

Some of what I hear in this Chamber, however, would indicate that we do not need to worry about increasing our gas and oil supply because we are going to take care of it with renewables or with raising the standards in mileage. Fine, but you are not going to do that immediately. There is no way. I hope we are realistic enough to deal with it.

One of the areas, of course, that is going to be very controversial is ANWR. We will all have to deal with that and see if we can't determine what the real impact is. I have been to Prudhoe Bay and out in that area particularly. I have seen the work they are doing there now, which, by the way, is very impressive. I have a little idea of what the wildlife refuge looks like.

Sometimes we hear in this Chamber it would be a brandnew idea to have production on a wildlife refuge. It is not a new idea. It is done on a number of wildlife refuges now. The proposition is to have a very small footprint to be able to have a rather large impact. That is the kind of coming together there has been that makes that a possibility, that makes it a necessity, as a matter of fact, to do something there.

We need to move forward with coal. We need to move forward with nuclear. We can do that. We can get more clean coal technology. That is our greatest reserve of energy for the future.

Everyone in this country is affected by electricity, its availability and price. So this isn't just theoretical; this is something that really impacts everyone very directly.

One of the issues we have to understand as thoroughly as we can is technology breakthrough. We need incentives for that, but they do not happen overnight. You cannot just regulate that they are going to do that. They don't just happen. That is not the way it is. Furthermore, it takes away the choices we have, where we ought to be able to do some things by incentive which I think are very possible. I am hopeful we can move forward through our differences and have legislation that will work.

One of the areas that some of us have been working on, and I suspect will continue to work on for some time, is the electric component. Again, there have been debates and discussions about this. The House bill currently does not have an electric title. But there are a number of issues, certainly, that most people would agree need to be reviewed and that we need to do some things in the electric area. We have an opportunity to deal with some of those issues.

One of them is reliability. We have talked about reliability for a very long time. We talked about it in great detail during the time we were having difficulty in California. We really have not done a great deal about that, but we have an opportunity to do so.

We are going to have to make some choices about the way we handle these matters. Quite frankly, we have been through this for some time. We have been through it in terms of reregulation and deregulation.

I thought we had come to the conclusion that those things that are clearly interstate could fairly well be defined and those things that clearly belong on the national level with FERC could fairly well be defined, that those things that have to do with retail and distribution and the unbundled distribution of electricity to homes and businesses within the State would be done by the State. Certainly, that is the way I believe it ought to be done. Having had a little bit of experience and background in the electric business through the rural electrics, I really think that is the way it ought to be. The needs you have in Pennsylvania and the needs you have in Wyoming are sometimes not the same. So we need to have some flexibility to do that. I am hopeful we will.

This bill, as presented to us now, is really heavy on FERC. It gives FERC all the decisionmaking authority in almost every aspect of electricity. Many of us do not believe that is the way we ought to proceed. Many of us believe we can fix that. There needs to be some overall jurisdiction, of course, with FERC, which is the Federal Energy Regulatory Commission, but there are also opportunities for the North American Reliability Council, for Governors, and others.

As a matter of fact, the Western Governors have put forth very detailed ideas of what they would like to do. I happen to agree generally with what they are doing.

So I hope we can deal with this language and deal with how we can best establish a reliable distribution and generation system.

Things have changed. It was not many years ago when you had an electric system, you had the service area, and whoever had that service area generated the electricity they needed. So it was sort of self-confined.

Now we find ourselves more or less deregulated in the generation aspect of it. You have many private market generators that are dealing in it by selling to the distributors. So you have to move it. That is some competition there. I think it can work.

We have to recognize times have changed and we have to do the same thing.

I think we have some unrealistic demands for renewables in this bill. We ought to be moving on renewables, but the idea to put in the bill that it is going to be this percentage or this many tons or this many kilowatt hours by renewables I don't think is a realistic way to do that. We ought to offer incentives, that type of thing. But to put those numbers in there, and say this is the way it is going to be, I think is unrealistic.

We have a number of areas in which we could modify what FERC's authorities are going to be in terms of some things that could better be done on the State level. There are a number of things in the bill that preempt States' rights. I think most of us, or many of us at least, are not of the mind that that is the way we ought to do that.

The Daschle bill basically gives FERC exclusive authority over reliability. It has a renewable portfolio mandate, billions of dollars in consumer cost. It has FERC authority over State matters. It does not need to be that way.

So I think we are in the process of developing a number of amendments which we hope to file and offer as we go forward, particularly in this area. I am sure there will be many amendments in other areas as well which is proper, particularly since we didn't have committee involvement. We are really doing committee work now on the floor, and that will take some time and effort, but it is necessary in order for us to come out of here with a bill that can be accepted by the Senate, can go to a conference committee, can come out and be accepted by the President.

We have a real challenge before us. I look forward to it and hope we can stick with this issue until it is finished and not come back to campaign finance or something in the middle. We ought to stay with it and keep working, keep as open as we can to other people's ideas, recognizing that it is going to take a long time. But the way it has been brought to us, it has to take a long time.

The PRESIDING OFFICER (Mrs. CARNAHAN). The Senator from New Mexico.

Mr. BINGAMAN. Madam President, my understanding of the status of business is that we are still considering the amendment Senator DASCHLE offered earlier, of which I am a cosponsor, along with Senators REID and MURKOWSKI and others. That amendment is still pending and is being considered for possible second-degree amendment.

The PRESIDING OFFICER. The Senator is correct.

Mr. BINGAMAN. I have also been informed by the floor manager for the majority it is his intention that the Senate will go into recess at 1:30 to allow Senators to attend a briefing Secretary of Defense Rumsfeld is going to conduct for Senators from 1:30 to 2:30. Then we would be back at the same place we are now. That is for the information of Senators.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. REID. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS

Mr. REID. Madam President, Secretary Rumsfeld will be here in less than 15 minutes. We believe all Senators should have the opportunity to attend that briefing. I checked with both leaders. They agree. Therefore, I ask unanimous consent the Senate stand in recess until 2:30 today.

There being no objection, the Senate, at 1:16 p.m., recessed until 2:30 p.m. and reassembled when called to order by the Presiding Officer (Mr. CARPER.)

The PRESIDING OFFICER. The Senator from Nevada is recognized.

NATIONAL LABORATORIES PARTNERSHIP IMPROVEMENT ACT OF 2001—Continued

Mr. REID. Mr. President, Senator LIEBERMAN is here to give an opening statement on the bill. Following his statement, we understand that Senator NICKLES will be here to give a statement. We are working our way through the statements. This is such an important bill. There are a number of Senators who have strong feelings about it, and they wish to lay out their view of what the energy policy in this country should be.

While it may appear that we are not making a lot of headway, I personally think we are making great progress. There is an amendment now pending. Senator MURKOWSKI is contemplating a second-degree amendment to the underlying Daschle amendment. If, in fact, he does offer it, and it is about what I have learned, I think we will accept that and have a vote on the amendment—not because we are concerned about where the votes are, as the measure will receive virtually every vote but we want the first amendment to come out recognizing the importance of Alaska and the southern pipeline and know that when it goes to conference, we hope there is close to unanimous support of the Senate on this measure.

Senator MURKOWSKI has indicated he is ready with an amendment. We will be ready to work on that. We hope to complete all of the statements today and have a vote on the underlying Daschle amendment. If Senator MURKOWSKI wants a vote on the second degree, we would be happy to do that also and move to whatever Senator MURKOWSKI wants to offer.

I ask unanimous consent that following the statement of the Senator from Connecticut, Senator NICKLES be recognized to offer an opening statement regarding this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Connecticut is recognized.

Mr. LIEBERMAN. Mr. President, the Senate has begun a very important debate in the last few days on our national energy policy. This is a debate that will literally affect the lives and the quality of the lives of every single American, as well as affect our national security, our independence in carrying out our foreign and defense policies, and the quality of the environment and the natural resources from which we derive such pleasure as Americans. So this is a very important and timely debate.

It has been 10 years since we last passed major energy legislation. We are starting with a bill hundreds of pages long, and hundreds—or at least 100—amendments may find their way onto it. We are going to be debating some very big opportunities and some very big problems, as well as many other smaller issues associated with the bill.

I saw Senator BINGAMAN on the floor. I congratulate him and Senator DASCHLE for their superb leadership, along with that of the occupant of the chair, in developing the energy legislation that we are debating.

The bill before us out of the Energy Committee coordinates the work of many of the committees of the Senate, including the Senate Governmental Affairs Committee which I am privileged to chair, which has contributed a section of this bill. Senator BINGAMAN and Senator DASCHLE have brought before us a very well-balanced national energy policy, which does have some incentives for the development of remaining energy resources in the United States, but makes a turn and acknowledges and acts on the acknowledgment that our energy future is in new technologies being applied to create new sources of energy-efficient, environmentally protected sources of energy. Of course, that will include renewables as well.

Mr. President, this great country became an industrial power for many reasons, including, of course, the skills and ingenuity of our people. But the availability of inexpensive and abundant sources of energy also contributed to the remarkable growth and success of the American economy during the industrial age.

Prior to the mechanization of our society, we relied on wood, water, and horses for much of our energy need. "King Coal" powered the early part of our industrial development and still plays a critical role. Hopefully, it will continue, with the application of new technologies, to play a critical role in generating electricity for our homes, schools, offices, and our factories.

From the time oil was discovered in Pennsylvania in 1859, the petroleum industry has grown enormously—at first, displacing whale oil for lighting and, eventually, powering the world's transportation systems. Enormous deposits of oil spurred development of oil fields in many parts of our country, including Texas, Oklahoma, and California. The 1930s witnessed the enormous expansion of hydropower in various parts of our country, including, of course, the Tennessee Valley and the northwest section of America. In the middle part of the 20th century, we began to harness the atom and develop nuclear power, which was going to be, in the view of many at that time, "too cheap to meter." In other words, it would be so inexpensive you would not even be able to keep track of it to base costing on.

Nuclear power continues to be a significant part of our energy mix. In a State like mine, it is most significant. We have two plants up and operating that have been decommissioned. I hope we can find a way forward to build a next generation of safe nuclear powerplants.

The oil price shocks of the 1970s brought home to us our dependence on foreign markets for oil, on which so much of our country and its economy have become dependent. With those shocks came an understanding of the ability of foreign countries to seriously disrupt our economy and our lives through higher prices, bringing higher inflation, and unemployment. We began to think and do more about reversing this trend by pursuing energy efficiency and developing alternative sources of energy, including renewable energy.

Yet we have remained largely dependent on—some would say addicted to—fossil fuels, which has exacerbated our dependence. We have also found out along the way that our energy has a cost beyond that of discovering, producing, and transporting product to market. It has health and environmental costs. The smokestacks of our powerplants, factories, and the tailpipes of our cars and trucks spew out millions of tons of pollutants in great quantity, including sulfur dioxide, nitrogen oxides, hydrocarbons, mercury, and carbon dioxide. Our citizens—especially our youngest and our oldest—are subject to a variety of diseases associated with their lungs, particularly, including fine particles and ozone.

There is quite a remarkable article in the press today about a study that has been completed—I believe it appeared in the Journal of the American Medical Association—which draws a powerful and unsettling link between certain pollutants and higher degrees of disease and, in fact, projected numbers of premature deaths. That is, people would have lived longer had they not been inhaling the emissions from power plants and some of the rest of our society.

Our lakes and streams have suffered under the assault of acid rain. Our bays are being choked by nitrogen loadings that come from cars and powerplants. People throughout the country cannot eat fish out of lakes nearby because of mercury contamination. The great vistas of our national parks are despoiled by haze created by motor vehicles, powerplants, and the fossil fuels they are burning creating emissions.

We are heating up the planet through greenhouse gases. We face potentially catastrophic consequences over time associated with sea level rise and increased threats from airborne diseases that migrate north toward our country or within our country as we heat up the planet's atmosphere as a result of the use of fossil fuels.

We cannot continue to use the atmosphere as a dumping ground for waste coming out of smokestacks and tailpipes on a business-as-usual basis. It is our responsibility as stewards of the Earth that we are blessed to inhabit as temporary residents, trustees for the generations and generations that will follow us over the centuries ahead, to establish a framework, a system for meeting our energy needs without harming public health or destroying the environment in the process.

We must consider both of those important policy factors as we go forward with this energy legislation. Energy policy and environmental policy are, if you allow me to put it this way, like a gas pedal and a brake pedal. They only make sense when they are used together and used sensibly.

As we consider energy legislation, we have a clear choice between developing an innovative and independent new energy policy or continuing the same policy—a policy that will continue our energy dependence, deprive us of national independence and compromise the health of our people and the openness and condition of our environment.

We all know that America needs a lot of energy. It takes energy to move our cars and trucks, to cool our refrigerators, and power the terrific technological tools that drive our innovative economy. The challenge is—and it is a challenge—how do we get that energy in a way that does not do the kind of damage I have just described?

The biggest challenge is in transportation. Cars and trucks are responsible for two-thirds of all petroleum use in the United States. That overreliance not only harms public health and the environment, but also hastens global warming. The overreliance forces us on a course of foreign policy dependence because it entangles us in unstable regions and forces us to deal in a much less demanding way than we otherwise would with regimes that do not reflect our values, human rights, religious tolerance, openness, and democracy.

Some people think we can drill our way out of this imbalance, but we have to do the math, and the math is powerful. We have 3 percent of the oil reserves left within our control, yet we consume 25 percent of the world's oil. Two-thirds of the world's oil lies in countries in the Persian Gulf, even though we have developed other sources of energy and oil from Latin America, from Africa, and increasingly from central Asia.

We cannot just drill our way out of the problem. The more oil we use, the more dependent we will be on oil that other countries have and own. That is one of the lessons we have to learn from world events and consider as we go forward on this energy legislation.

America's strength is not in our oil reserves. That is the painful fact. America's strength is in our reserves of innovation and technical know-how. An energy strategy that is good for America will exploit those reserves of innovation and technical know-how to produce smart energy-saving technology and cleaner modern fuels.

Unfortunately, many would have us extend our dependence on oil, and because other countries overwhelmingly control the oil reserves, that means extending our dependence on foreign oil.

They have even, in addition, proposed the despoiling of some of our most precious places in the process. And for what? We will obviously have a debate, as we have had before, on the question of whether to drill in that remaining 5 percent of the North Slope of Alaska. If we opened up, God forbid, the Arctic Refuge to oil exploration, there would be, as we have said over and over, a blip of oil to meet the enormous need we would have. It just does not do it for us.

We should say no to oil development in the Arctic Refuge. We should protect a most unusual, unique, magnificent, inspiring piece of America, piece of God's creation, which is the Arctic National Wildlife Refuge. We have to go in a new direction. We need to spur aggressive development of both new and proven energy sources and technologies, which would include natural gas, the subject of the amendment before the Senate now.

We should encourage hybrid vehicles. Some of those are out and selling very well. There are waiting lists of people who want to buy them and cannot get them rapidly enough.

We must pave the way for renewables, fuel cells, and other barely imagined technologies. I am convinced we have the brain power and the economic power to develop them if we put our mind and will to it. Of course, we should develop our remaining oil deposits that can be developed without hurting the environment, and there are some remarkable new technologies that will help us do that.

Fuel cells are a particularly promising technology, and I hope we in Government will work with industry and others to develop a credible business plan, that is what I would call it, for fuel cell technology development, a business plan that would have clear goals and timetables by which we would develop and deploy fuel cells.

I support the progressive tax incentives for alternative fuels and clean and renewable energy that are part of the package that came out of the Finance Committee. I thank and commend Chairman BAUCUS and Senator GRASSLEY on crafting a responsible and forward-looking set of incentives to transform our energy mix and make us more independent and efficient.

The bill before us does open doors to innovation. It sets up a new framework for the kinds of innovative energy policy we need. That really should be the commitment of our generation, a single-minded, all-out drive to protect our security by developing a new framework for energy use in our country.

We have to start with energy efficiency standards. Over the last 20 years, we have made magnificent efficiency gains which lay a firm foundation for future progress. Increasing the fuel efficiency of cars and trucks by just 3 miles per gallon, well within our reach technologically, would save 6 billion gallons of gasoline per year. As I understand it, by the best estimates, that is about two times the oil that would come out of the Arctic Refuge if we drilled.

That 3-miles-per-gallon increase in fuel efficiency would also save Americans $9 billion a year in annual spending. Imagine that, $9 billion in savings. The increase would also reduce carbon emissions by 15 million tons a year, that much less contributing to the pollution of our air and the warming of our planet.

We can clearly do, in my opinion, better than 3 miles per gallon. That obviously will be the topic of debate that will occur on the amendment on this bill regarding so-called CAFE standards. We were all shocked in the 1970s by the steep increase in the price of oil as a result of the Arab oil embargo in 1973 and 1974 and the Iranian revolution in 1979. Gas prices were approaching a dollar a gallon, and we thought the price would only continue to rise.

We made some real efficiency gains in our economy and in our transportation fleet, but the price of oil collapsed in 1986. Despite a few price spikes along the way, gasoline is now not that much over a dollar a gallon, making it cheaper, certainly when adjusted for inflation, than it was in 1980. New sales of vehicles are increasingly characterized by sport utility vehicles and light trucks—great vehicles, but our overall fuel efficiency has therefore and thereby declined.

We are caught in a policy bind. We have less expensive fuel, providing little incentive to conserve, and industry remains opposed to increased fuel efficiency standards. So gas prices remain low, our fuel efficiency averages are declining, and therefore we continue to increase our reliance on imports of oil. I hope this legislation before us will provide the opportunity to break that gridlock and that we will support increased fuel efficiency standards for our vehicles.

I believe people who oppose the increases in fuel efficiency may well underestimate the resourcefulness and ingenuity of our researchers and/or industry. For example, the Massachusetts Institute of Technology is developing a most promising new technology for economically reducing gasoline engine vehicle emissions and fuel consumption. It could reduce smog-producing nitrogen oxide emissions from gas engines by 90 percent, and it has the potential to increase engine efficiency by 25 percent and reduce carbon dioxide emissions by 20 percent.

We should take advantage of the many advances that have been made under the aegis of the Partnership For a New Generation of Vehicles, a private-public partnership between the Federal Government and the automobile industry to improve the fuel efficiency of our vehicles. The advances we have made in these hybrid technologies that have already come out of that partnership are dramatic. The administration has embraced fuel cells fueled by hydrogen, and I welcome that, but the results are still some time away. That is why we need to make advances in fuel economy sooner, as well as later.

We must also reform our energy system to give renewables and alternative energy fair access to the market, both by ensuring they can make a physical connection to the grid and by enacting tax credits that will ensure the market is open and welcoming to them; in other words, to give consumers and businesses a tax credit for use of some of the renewable and alternative energy systems coming on board, including fuel cells.

We should also require electricity generators, I believe, to account for a portion of their output through renewable energy sources, and I support the inclusion of a renewable portfolio standard in this bill.

I understand many existing industries are resistant to change because change involves risk. Fortunately, many companies are ready to accept some risk because they know there is reward in that, that nothing ultimately ever stays the same. Many businesses have developed new technologies and are willing to do so even more if given a clear, lasting signal from our Government as to what we are going to ask and in which direction we are going. If Government leads by establishing clear goals, objectives, and incentives, as this bill does, progress will follow. Government can act as an innovation spur, not an innovation barrier.

I know there are some who will argue the energy bill is not the place to address climate change. I disagree. I see climate change as probably the biggest long-term environmental challenge that we as Americans and everyone else on the planet face. Some would argue climate change is separate from energy, but I respectfully disagree; they are inextricably linked. The overwhelming majority of greenhouse emissions come from producing and consuming energy, whether in our powerplants, our factories, or our cars and trucks.

I particularly salute the pioneering bipartisan work done by Senators BYRD and STEVENS to promote research and development on climate change, to require an office in the White House which will have the responsibility of developing and overseeing the implementation of hopefully a national climate change policy.

I am proud to say the Governmental Affairs Committee unanimously passed the Byrd-Stevens legislation and it has become part of the energy bill we are debating. The provision does not create any mandatory programs to address climate change—that debate has been reserved for another day—but it puts a strategic planning and research and development foundation in place so we can understand the nature of our problem and begin to work aggressively on solutions.

In particular, the Byrd-Stevens legislation would create a comprehensive effort within the executive branch that would provide creative thought, the creative thought that global warming requires, including a new White House office to develop a peer reviewed strategy to stabilize the levels of greenhouse gases in our atmosphere to safe levels. Now that is an objective on which I hope we can all agree. In fact, the Senate has already agreed on that goal because it is the stated objective of the 1992 Rio Treaty on Climate Change, which this body ratified.

Finally, I again compliment the comprehensive nature of the Byrd-Stevens provision. In crafting a climate change strategy, the White House office would be instructed to consider four key elements: Emissions mitigation, technology development, adaptation needs, and further scientific research. Very often in our debate on this issue all four of these topics do not make it into the discussion, but they must.

To quote Senator BYRD, his bill is meant to complement, not replace, other mitigation measures by creating a process by which we receive expert evaluation of the challenge we face. I hope this legislation will be the tree off which other critical climate change measures will branch.

This is a challenge of great import to us and to all who will follow us on the planet. As Senator STEVENS starkly reminded our Governmental Affairs Committee at a hearing last year, we can already see some deeply unsettling signs of climate change in the Arctic. Permafrost is melting, glaciers are disappearing, boreal forests are moving north, and the migrating habits of many species are being disrupted.

The provision these two leading Senators, Messrs. BYRD and STEVENS, authored is an important first step in examining and reacting to the climate change crisis. To me, it is one every Member of the Senate ought to be able to support, and I hope because it is part of this legislation before us that all will.

I am thankful for the opportunity to make this opening statement. I repeat what I said at the beginning: This is a bill whose importance to every single American and to our country in general cannot be overstated. I look forward to the debate. I hope we can find common ground to achieve what I believe is our commonly held goal, which is to make America more energy independent than it is today.

I yield the floor.

The PRESIDING OFFICER (Mr. CORZINE). Under the previous order, the assistant Republican leader is recognized.

Mr. NICKLES. Mr. President, thank you very much.

I wish to make a few remarks regarding the energy bill. Let me first compliment my colleague and the former chairman of the committee, Senator MURKOWSKI, for his leadership on this issue and for the statement he made both yesterday and today.

Let me also express my very strong displeasure with the process that leads us here today. I am glad we are debating energy. I am glad we are going to have an energy bill that will be amended and discussed. But I am very upset about the procedure and how we arrived here today.

I served 22 years on the Energy Committee. I worked with Democrats and Republicans to pass historic legislation, to deregulate the price of natural gas. I worked with Senator Bennett Johnson, Wendell Ford, Jim McClure, and other Senators. It was bipartisan, historic, important legislation. We passed other legislation.

My point is, we passed historic, meaningful legislation in a bipartisan manner through committee markups, some of which, as in the case of natural gas deregulation, took years. We worked on it, we amended it, and brought a bill to the floor. We did not do that in this case. I cannot recall in my Senate career a legislative proposal this significant where it bypassed the committee. The committee proposal we have before the Senate had no Republican input. I have not had one chance to offer one amendment to this bill. I am offended by that. I am offended by the process. I am offended by the fact that people think we do not want markup in the committee because we cannot control the committee. Since when do we say, we will not have markups if we cannot win?

That is exactly what happened. I have heard some say, that is not really what happened—we just rule 14 bills all the time. We do not, all the time, take significant legislative action and say we don't want the committee to mark it up; we do not want to have bipartisan input; we do not want to allow people to offer amendments; we do not want them to have an amendable vehicle.

The fact is we did not have a legislative markup in the Energy and Natural Resources Committee for months. I am offended by that. Why am I serving in the Senate? Why did I select the Energy and Natural Resources Committee? Why am I one of the senior members on that committee and not even have a chance to offer an amendment to express some positive or negative points about some provisions that affect every single American? I did not even have a chance to offer an amendment. I did not even have a chance to say this is good or bad. Now we have to do it on the floor.

There are a lot of items in this bill that a lot of people do not know about. I wonder if my colleagues are aware there is a $10 billion loan guarantee in this bill. Most people do not know that is included. We never had a hearing on it. We did not have a hearing on it in the House or in the Senate and it is in the bill. I understand they will change it. That is interesting. That has not been discussed.

When Senator MURKOWSKI was chairman of the committee, we had a lot of hearings dealing with the issue, and we were going to mark up the bill. We started marking up the bill last year but we stopped. Why did we stop? The Washington Post says in an October 11 headline, "Daschle Stops Panel's Consideration of Energy Bill."

Then it goes on to say: "Majority leader, TOM DASCHLE, yesterday abruptly halted further committee consideration of major energy legislation after Democrats concluded there were probably enough votes on the panel to approve the Bush administration's plan for drilling in Alaska's Arctic National Wildlife Refuge."

In the Washington Times, the headline, "Daschle Takes Control of the Energy Bill; Republicans decry bid to stall Alaskan drilling as 'partisan' maneuver."

> Daschle yesterday took control of the energy bill in a move to strengthen his opposition to the administration's proposal to drill for oil in Alaska's Arctic National Wildlife Refuge, which President Bush says is critical to national security.
>
> In an unusual legislative action . . .

It is more than "unusual." I don't remember it happening. I have been here 22 years, and maybe others who have been here longer can say it has happened, but I can't remember a majority leader saying: Stop, don't work, don't mark up, I will come up with something on my own.

That does not happen.

Mr. BINGAMAN. Will the Senator yield for a question?

Mr. NICKLES. I am happy to yield.

Mr. BINGAMAN. I recall when we saw the budget resolution last year that contained the President's enormous tax cut, that came from the Budget Committee without markup. That was brought by Senator DOMENICI to the floor, at the request of the majority leader at the time, Senator LOTT. Am I not correct that was a major piece of legislation that came to the Senate floor without ever having a committee markup?

Mr. NICKLES. Let me answer the Senator's question. I thank the Senator for the point.

There is a difference between a budget resolution that is not even law—a budget resolution does not even go to the President for signature. Budget resolutions are entirely different matters. That is not the same. A budget resolution does not have the impact. A budget resolution authorizes committees to say: Here is how much you spend. But it is not a tax cut. You still have to pass a tax cut; you still have to pass the legislation.

This is legislation. This is a bill that will become law. This is a bill that has the potential of increasing the cost of vehicles for everybody in America by $2,000 or $3,000. Are people aware of that? Do I recall a hearing on that provision, the so-called CAFÉ standards? No. Did the Commerce Committee have a hearing on it? Did the Commerce Committee have a markup on it? Did it pass by bipartisan majority out of the Commerce Committee? The answer is no.

Where is the committee report? One of the reasons we have markups in committees is to have everybody on the committee who has expertise on the issue to have input, to support it or oppose it—to issue a committee report so we can find out what is in it, so you can read what is in it in English, not just the legislative language which is difficult to decipher. Our competent and capable staff prepare a committee report explaining in English, here is what this provision does, here is what this provision means.

On most legislative issues I can remember we have had a committee report. There is no committee report because the committee did not report on this bill.

This bill has enormous potential impact on American citizens, but no one knows what is in it. I didn't know what was in it and still don't, even today. I pride myself on doing a little homework on legislative issues. I kind of like to read bills. The bill introduced by Senator DASCHLE did not come through the committee. Maybe it is supported by Senator BINGAMAN, but it is not supported by this Senator. It was introduced February 15. It is 436 pages. I wanted to get the yeas and nays because I had an idea it might be changed. I was not successful and could not do that. But it was introduced and I thought at least I can now start reading it and do homework.

The more I read, the less I liked. It is a pretty crummy energy bill, in my opinion. I started to say you couldn't do much worse, but maybe you could, surely you could. It is not much to my liking, but I had no input on this bill whatsoever. And I think I happen to be No. 3 in seniority in the Energy and Natural Resources Committee—No. 3 or 4.

Then the bill was changed. That bill was introduced on February 15, and it was 436 pages. On February 26, the bill was introduced, just a week or so ago, and it was 539 pages. It grew by over 100 pages in a couple of weeks. I don't know what the differences are. I am trying to find out. I thought, now I have a printed copy. I had to ask consent to get this copy printed, so I did. So now it would not be just in looseleaf form, and now we can get some work done. I can do my homework and take this home.

I started reading it. I didn't like this one either. And I didn't have any impact on this. I didn't get to vote on one single page of this bill—not one. I am offended by that process.

Then it was changed yesterday. We have version No. 3. This was dated March 5. It is 590 pages. That is only another 51 pages more than the bill that was on the floor a week or so ago. I have not analyzed that. I don't know what is in the 51 pages. I have not figured that out yet. But I do know I had no impact, no input, no amendment—nothing.

We have a terrible process where the majority leader shuts down the Energy and Natural Resources Committee and says: We do not care if you have 20 members who have experience on these issues. We don't care if you have had a lot of hearings in the past on these issues—issues such as electricity, CAFÉ standards drilling in Alaska. We do not care if you have expertise because we do not want your input. The Democrats are going to put together a bill. We will decide what you will mark up.

Sure, there is a reason. They said: If you want to change it, go change it. We will give you some amendments. And we will have amendments. Yes, we will just fix it. That is almost the size of the Bible, and unlike the Bible, it contains no good news.

This is a problem. Now we have to fix it. We will fix it paragraph by paragraph. There are a lot of paragraphs in 590 pages. I keep reading things in here I don't like. What is my alternative? I didn't have a chance to offer an amendment. I do not like the loan guarantee. I don't like any loan guarantee. For the most part I opposed the steel loan guarantees. I lost on that one. Now there are loan guarantees for oil companies in here. I don't like loan guarantees for oil companies either. It is in here. Now I have to strike it, I have to replace it.

I don't like the CAFÉ standards. Some people think: Let's just increase CAFÉ standards; we'll go from 27.5 to 35. Wait a minute, in this other version it was 36. But we are going to increase CAFÉ standards.

Does that include SUVs and pickups? Do they have a different standard? Yes.

How much will that cost? Some people say it costs a couple of thousand dollars a vehicle. It may cost a lot more. It may cost thousands of lives.

Who had a hearing? Where is the committee report? Where is the scientific analysis? Where is the data we have from the Department of Transportation that this is a good change? It is not here.

Where is the committee report, where you can study the pros and cons, the supporting opinions and dissenting opinions that we usually have in the back of the report? It is not here. I don't recall a committee report.

We are going to consider legislation of monumental importance, probably the most important issue we will consider this year—maybe not. Maybe it is in the eyes of the beholder. Maybe some people think campaign reform is more important. I don't. This will impact every single American because energy security is national security. If you don't have energy security, you don't have national security. If you don't have energy security, you don't have economic security.

We have seen that happen in the past. We have found ourselves, in the past, when we have not prepared properly, to have made serious mistakes, to have been really vulnerable to curtailments. We had a curtailment, I might remind my colleagues. In 1973 we had a curtailment. It was called the Arab oil embargo. Some of my colleagues might remember it. I remember it. I was in the private sector back in those days. There were lines; there were shortages; we had brownouts; we had schools that were closed; we had people lined up for blocks to buy gasoline. There was a real shortage. It was caused by an oil embargo because there was a real crisis in the Middle East.

At that particular point in time, we had gross crude oil imports of 26.1 percent. Today we are over 60 percent. In 1979 we had another shortage. It was during the Iranian hostage situation. There was an embargo. At that time we were importing 44.5 percent. Today we are importing 60 percent.

Today we have a real problem in the Middle East. It is flaring up every day in Israel. It could expand. I hope and pray it does not. But we are a lot more vulnerable today than we were back in 1973 and 1979. So now, finally, we have an administration that has put together a package after a lot of work, promoted that package, passed that package, by and large, in the House of Representatives.

Did the Senate have a hearing on the House-passed package and use that as a markup vehicle? We do that a lot, but we didn't in this case.

Did we hold the House-passed bill at the desk and use that as a markup vehicle? We do that a lot. No, we didn't do it in this case.

We started with an entirely different bill, one that has never seen the light of day, one that has never gone through a legislative markup, one that has never had a Republican amendment considered.

Basically, what you have is a couple of people who put this bill together, making a whole lot of special interest groups very happy in the process. There are lot of special interest groups that, because of this bill, are very happy. But it is a pathetic excuse for an energy bill, and it is a very poor excuse if we want to do something that will help solve some of our national energy problems. Even worse than that, it is a terrible legislative process.

If we are going to tell two major committees—the Energy Committee for the energy components of this bill and the Commerce Committee for the CAFE standards—don't mark up, then you have just disenfranchised 47 Senators: We don't want your input; one or two people will decide what we are going to do, and if you don't like it, amend it; and, incidentally, if you try to amend, we are going to filibuster your amendments so now you have to have 60 votes to change this bill.

What is the difference? If a committee markup was held you would have input from Democrats and Republicans. You would probably come a lot closer to having consensus, a bipartisan bill. You would have a committee report so people could understand it, they could read what it is, what people are trying to do, what they are doing in the legislative language. Then, if you disagreed with what the committee did, a group of 40 Senators—in this case, 20 from the Energy Committee and 20 from the Commerce Committee; maybe 42 or 43—you could offer amendments to try to change it.

Instead, we are acting as if we have some type of totalitarian government or some type of kingdom over here that says: Committees don't operate. I'll decide what is in your bills. Maybe one or two people, maybe three—I don't know how many; a few people, not Republicans—put together the bill. It is 590 pages. Oh, we will amend but if you offer a couple of amendments, we are going to filibuster those amendments. You need 60 votes. Good luck.

If you marked it up in the committee and put ANWR in the bill—which we would have—then somebody would have to strike it out of the bill. It is totally different. Then you are talking about a majority vote, you are not talking about 60 votes. There is a big difference. Or if somebody wants to set new CAFE standards, new CAFE standards that have bipartisan support that come out of the Commerce Committee, we didn't do that. It is a terrible legislative process. Shame on the Senate for this legislative process. Shame on the Senate.

I have only been here 22 years, but we have not done this. It is not the same thing as the budget resolution. It is not the same thing as a sense-of-the-Senate resolution. This is very comprehensive, significant legislation. It is similar to legislation with which we wrestled in the last Congress dealing with the Patients' Bill of Rights. It is a tough bill.

I was in charge of a lot of it. I disagreed with a lot of the ideas that were floating around. But we had a markup in the Labor Committee. We had a markup in the Labor Committee that lasted days. We had 30, 40 votes on amendments; more amendments, that many votes.

The committee passed, with Senator GREGG's leadership, with Senator COLLINS' and others, a Patients' Bill of Rights. Senator JEFFORDS was on the committee at that time. They passed a pretty decent Patients' Bill of Rights, and we considered it on the floor and amended it on the floor, and we passed it.

I didn't agree with everything that was in it, but I agreed with the final package. It was a decent package. It brought a lot of people together. Some people said it was not enough. But anyway, it went through the legislative process. It wasn't easy. We could have said: We are in the majority, the heck with the committee; we will come up with what we have deemed is the right package and run with it.

I think that is a violation of Senate protocol, spirit—basically telling the minority they don't matter. It doesn't make any difference if there are 49 Members on the Republican side, you don't matter; you have no input.

I just very strongly disagree with that. It means a lot to people who have not looked at this legislation. Usually a lot of Senators haven't looked at it but they rely on the committee, the authorizing committee, for their expertise and for their homework, and they can rely on them for their judgments.

It is kind of hard for us, many of us on this side of the aisle, because we have not looked at this. I keep finding things in there at which I am kind of shocked: Where did this come from? Well, some lobbyist or somebody had some idea, so he stuck it in the bill. We have all kinds of mandates and subsidies and loan guarantees.

Now there is an amendment that says that we, in our infinite wisdom, are going to choose which pipeline route to go for a natural gas pipeline in Alaska. The underlying bill says there is a $10 billion loan guarantee. I question that. But I also question why we are trying to choose which pipeline route should be involved in building the Alaska natural gas pipeline.

Let me see. Let me count the number of days we have had hearings on this. This is about a $20 billion project—a pretty good size project, over which we should have held several hearings on at the least.

Did they have a hearing in the House of Representatives? No.

This language or similar language is in the House bill. I am not going to fault the House. I think they did a pretty good job.

I question the wisdom of putting this in without hearings. Should we dictate which pipeline route? I hate to say this, but what about the marketplace deciding which route? Why don't we use the route that would be most economical? Why don't we use the route that makes most economic sense? Why don't we use the most feasible route?

Is that language in here? No. The language that Senator DASCHLE is proposing now—in addition to the $10 billion loan guarantee that came from somewhere, just appeared in this bill—it says: Oh, we are going to take the southern route. The southern route—if you look at the chart; that is the one shown in orange—swings through Fairbanks and through Alaska. It is several hundred miles longer than the other route. The other route looks a lot cleaner, a lot shorter, a lot straighter, and it is also in plains, maybe marsh. It is parallel to the Mackenzie River. The other one goes through about 900 miles of mountains.

I used to work for a pipeline company. I helped lay pipe in some of my private sector days. I know a little bit about it. I know it is expensive. Man, it is a lot more expensive to do it in the mountains than it is on the plains. There may be pluses and minuses on both. I do not know all the pluses and minuses.

I know one thing: I probably do not know enough yet to say this is the right route or this other one is. I have not studied it enough. I don't recall a hearing. I have not met with all sides. I have met with a couple people. I have constituents who have an involvement. I have constituents who have some minerals or gas in the project, and they would like to get it to market. I would like to get it to market. It would be good for the economy to get it to market.

But why are we going to mandate which way to go? Why are we going to mandate which way to go under Senator DASCHLE's amendment without even a hearing? Whose special interest group is this?

I just question the wisdom of acting this way, of having this bill up in this manner. We have not had a hearing on this bill. No one knows what is in it except for a few people. And now here is an amendment that says: Oh, in our infinite wisdom, we are going to dictate you go this route. Let's go the longer route, the route that looks a lot more expensive because it is several hundred miles longer than the other route. We are going to dictate that?

I don't think we should. Maybe I am in the minority on that. I want to defer to my friend from Alaska, Senator MURKOWSKI. I have great respect for him. But I really question the wisdom of Congress trying to dictate this, and it just goes with the whole process of this bill.

I am more offended by the process and the way this has come to the floor than anything procedurally in the Senate in my career, and certainly out of this committee. I have not been on other committees. Maybe other committees have tried a little end run like this in the past, but I can't remember. But I know they have not in the Energy Committee because I have been on the committee. I would have been very outspoken. If our side tried to do it, I would say: No, that is not right. We have to run it through committee. You have to have input from Democrats and Republicans.

You may have party-line votes once or twice, but most of the time on the Energy Committee we didn't vote on party lines. We tried to vote for what was right and in the best interests of the country.

This is 590 pages of all kinds of little subsidies for alternative fuels, mandates. Oh, we already have a big mandate for ethanol, about 53 cents a gallon for ethanol. Now we are going to mandate not only the subsidy, but we are going to mandate that they have to produce so many gallons; I think it is something like 5 billion gallons in another 10 years or something. Wow. How much are we going to do? Then on and on and on.

The more I see—oh, we have subsidies for wind energy, you name it. There are all kinds of things that are in this bill, some of which are very questionable economically, some of which are going to greatly increase consumer prices.

Then let me just touch on the other side of it, and that is the issue of CAFE. The Federal Government is going to mandate that we raise the fuel average economy standards from 27.5 miles per gallon to 35 miles per gallon, and do that over the next 13 years. In a previous bill it was over 11 years. Now that has been adjusted.

My wife happens to drive a Pathfinder, an SUV. We should send out signals to SUV moms all across the country: Hey, the Senate Democrats, under this bill, are going to raise the price of your vehicle by at least a couple thousand, if not $3,000 or $4,000. Notice to soccer moms, notice to SUV vehicles: It is in here. It is going to increase the price of your vehicle.

Maybe I should have an amendment that says Senate cars should meet these standards, because they do not. But we are going to make every soccer mom in America pay for this because it is in this bill.

Oh, soccer moms: One of reasons you like these SUVs is that they are kind of big, kind of safe. My son has two kids, and he has one. He has the baby seats in it, and he likes it because it is safe. It is not going to be nearly as safe if this bill passes because this bill is going to mandate—well, the vehicle is going to have to have a much smaller engine, it is going to have to be a lot lighter, it is going to resemble something more like a Volkswagen than it is an SUV, and we are sorry about that.

Will the fatalities go up if we pass this bill? The answer is yes, by the thousands. How many? What scientific studies do we have? We don't know. We have not had a hearing. We were not able to ask the safety experts. We were not able to ask the experts who build this: Can this be done? Can it be done safely? And how much will it cost?

I would love to ask the automobile manufacturer: How much is this going to cost? Can we comply with these standards? How much more will SUVs cost in 8 years if they meet this standard?

I will tell you, it is going to be in the thousands. We do not know because we have not had the hearing. We have not asked those questions. We have not gone the legislative route. There is no committee report. There was no homework done. This is put together and changed almost on a daily basis.

It is a crummy way to legislate. And this first amendment is a crummy way to legislate, a very poor way. Shame on the Senate if, oh, we are just going to decide this is the way we are going to build this pipeline, we are going to dictate you have to take this route.

That is not the way it should be done, not when you are talking about $20 billion, not when you are talking about Federal loan guarantees that should not be in the bill in the first place. Oh, now we are going to have loan guarantees and we are going to dictate which route to go. We never had a hearing. We do not know which way is the best as far as protecting the environment is concerned. We do not know which is best as far as the economy is concerned. One might cost twice as much.

I would think to build a mile of pipeline through the mountains would probably be several times as expensive as building one on the plains. Yet we have an amendment offered by Senator DASCHLE, the first amendment up: Here is what we are going to do. Maybe there are political considerations behind his amendment. I don't know. But I am just astounded by this process.

I am very disappointed in this process. This process should not be repeated. It should not be repeated by Democrats or Republicans. We have committees for a purpose. We have committees for a purpose: So we can have bipartisan input, so we can have the legislative process work, so we can have hearings on legislation so people can know what they are voting on, to where they can try to improve it, to where any member of the committee has an opportunity to read the bill and to amend it, to change it—win or lose, at least they have the opportunity to try.

No one has had an opportunity to amend this bill—no one. A few people might have been able to get their special interest provisions in, thanks to the majority leader and to the chairman of the committee. But no one, no Member of the Senate, has offered an amendment to this bill because it has not had a markup.

Right at about half the Senate has been disenfranchised because we did not have a markup on the CAFE standard and did not have a markup on the energy package. So now we are presented with an energy bill: Here it is. Go get it. Have at it. See if you can improve it. Oh, yes, if you have an amendment we don't like, get 60 votes. That is not the way the Senate is supposed to work.

The Senate is a great institution. People are violating the thrust of the

Senate. Totally ignoring the committee process should not be done lightly. So I am critical of it.

I want my colleagues to know of the problem of how we are situated. So we have a bad bill. Some of us are going to try to make it better. It may take a while. We may have to ask a lot of stupid questions: What is this in here for? How much is it going to cost? I would like the proponents to know I am going to be asking those questions because I did not have a chance to ask them yet. I did not have that chance to ask them in committee, so I am going to ask them on the floor. So this markup may take a little while.

This amendment may take a little while. I do not want to filibuster this amendment, but I want to know how much it is going to cost. I want to know why this route is preferred over the other route. I want to know why there is a $10 billion loan guarantee in the bill. Why? Who benefits from that? What is the purpose? Is that the best way to do it? Should it be done? Is it necessary for it to be done? Could we build the other route even without a loan guarantee? Without price supports? Is that possible? Does it need to be? Or does the marketplace dictate we have to go this way?

Aren't those decent questions? Shouldn't those questions be asked? They have not been asked before. Yet we are getting ready to commit to a $20 billion project? This is a crummy way to legislate. The Senate leadership should know this is not the way to operate.

We should not disenfranchise 40 some Senators from the committee process. I hope we won't do it in the future.

I yield the floor.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. MURKOWSKI. I wonder if I could respond to some questions that the Senator from Oklahoma, the minority whip, brought up because I certainly agree with his contention that these matters have not been addressed in a committee process. They are being addressed on the floor.

As I indicated earlier in my opening statement, we have quite a responsibility before us to educate Members. I think the questions my friend from Oklahoma posed deserve consideration. I wonder if I could perhaps offer an explanation as to why the proposed route that has been supported by the State of Alaska is the preferred route.

As my colleague knows, the concentration of capital necessary to build either route is going to be substantial, somewhere in the area of $15 to $20 billion. Clearly, the companies that are going to build this pipeline are interested in a return on their investment. I don't think my colleague is aware of the particulars associated with the northern route.

It would require roughly 400 miles of pipeline at sea. If I can refer to the map, I think it is important to recognize that this is an area that is extraordinary because it runs roughly from Prudhoe Bay, where the gas has been discovered about 400 miles off the Arctic coast. This is an area that is only ice free about 40 days of the year. We are well above the Arctic Circle here. As a consequence, the technology is obviously achievable, but there is still a question of at what price.

As the Senator from Oklahoma is well aware, we have been trying for decades to get permits and the authority to open up ANWR, which is on land, for oil and gas exploration. The consideration has been whether we could do it safely. The problem we have in laying this pipeline in this particular body of water is access because much of the year it is covered with very heavy ice.

Theoretically, most pipelines are laid with a trench being dug on the ocean floor and then covered up, and so forth. We are talking probably about this pipeline being 3 to 4 miles offshore where you would get the adequate depth. The unique problem you have with the engineering is this scouring of the bottom when the ice moves because, as you know, about seven-tenths of the ice is underwater. So these present some engineering problems.

They also present some problems associated with the concern over the Native people, the Eskimo people of Alaska and their concern over the migratory bullhead whale which they are dependent on from the standpoint of subsistence. They support drilling on land and support activity on land, but they are reluctant to see activity offshore that may change the route of the migratory whale movement of the bullhead whale. So they are opposed.

I can cite for the record comments I received in opposition to anything out at sea that might affect them.

I ask unanimous consent to print the comments in the Record.

There being no objection, the material was ordered to be printed in the Record, as follows:

Comments on Proposals for a Natural Gas Pipeline From the North Slope of Alaska by George N. Ahmaogak, Sr. Mayor, North Slope Borough, Barrow, Alaska

(Submitted to the United States Senate, Committee on Energy and Natural Resources, October 2, 2001)

I want to thank Chairman Bingaman and the Committee for inviting comments on North Slope natural gas development from residents of the regions, because we will be most affected by the impacts of development. As Mayor of the North Slope Borough, I represent the people who live in eight communities scattered across the top of Alaska. The majority of our residents are Inupiat Eskimos, whose ancestry is traced back thousands of years along this stretch of the Arctic Ocean coastline.

For more than a quarter of a century, the people of the North Slope have played an active role in Alaska's oil and gas development. After our initial fears about the environmental safety of oil and gas operations were calmed by experience, we struck a stance on development that has not wavered. We have supported onshore projects when they contain adequate environmental safeguards for the land and animal populations and when they do not jeopardize our traditional subsistence hunting and fishing activities, which are so crucial to the continuation of our Native culture.

We have pursued these goals in our interactions with the oil industry largely through our local powers of planning and zoning within the oil fields. We have also sponsored extensive biological research and worked with state and federal agencies to gauge the continuing health of wildlife species in the region.

Twenty-five years later, we remain committed to the stewardship of our homeland as we work in partnership with state and federal agencies and the industry to extract the oil and gas resources our nation so clearly needs. Our commitment to a culturally sensitive development approach leads us to a very firm position on natural gas development. We recognize the need to export the North Slope's vast natural gas supplies, and we believe there is only one environmentally sensible transportation path—along the route of the existing Trans-Alaska oil pipeline. Most of the issues associated with pipeline routing have already been identified and successfully resolved through years of experience with the TAPS oil pipeline. Using the existing corridor is more environmentally efficient than any alternative and is unlikely to result in significant surprise impacts related to land or wildlife. It is clearly the safest and most acceptable transportation plan in our opinion.

For these reasons, we support the State of Alaska's insistence on a southerly (Alaska Highway) route. We also are adamant in our opposition to any project that would involve an offshore pipeline to the McKenzie Delta on the Canadian side of the border. We believe this "over-the-top" scenario is technologically arrogant and offers substantially greater risk of environmental and cultural damage.

Our elders and our subsistence whalers are the true experts on the seasonal movements of sea ice along the arctic coast. They have spent decades studying the forces of pack ice as it piles upon itself to create huge pressure ridges the size of tall buildings. They have witnessed the results of current-driven ice scouring the ocean floor. They have heard stories about these forces, stories that represent the oral preservation of empirical science handed down from generation to generation.

At the same time, the industry has repeatedly tried and failed to show its ability to clean up an oil spill in broken ice conditions. Demonstration of such ability should be an absolute requirement before any offshore oil development is allowed to occur.

Our opposition to an over-the-top route is not conceived lightly. We have proven ourselves to be both willing partners and environmental stewards. When we stand up against a proposal, our objection cannot be dismissed as environmental dogmatism. Nor can our support for a project be written off as pro-development fanaticism. Ours is a more complex position, stemming from a cultural perspective that acknowledges the advantages of development, clings to an inherent environmental ethic, and has as its highest goal the continued health of the original culture attached to this part of the world. The southerly route offers the best solution in light of this trio of concerns.

While we support the southern route, we do not believe that a natural gas pipeline should be supported at any and all cost. A successful project must have the inherent fiscal strength to preserve existing arrangements for local property taxation of energy infrastructure. We have heard rumors of tax concessions associated with a gas pipeline project, but we have not been asked for our opinion on such a scheme. We do not support tax concessions at the local level.

Additionally, we are concerned about the cumulative impacts of oil and gas development. Federal project permits are based in part on an analysis of potential environmental impacts on land, wildlife and human inhabitants of the area. However, this analysis is project specific, and while it has been discussed for years, no provision has ever been made for alleviating the cumulative effects of industrial activity on local communities.

We see the effects in a constant level of stress in our villages. Health problems, family dysfunction, alcohol abuse and other symptoms require intervention. We need help in assessing and addressing these impacts, and we look to the government for impact aid or some other form of assistance aimed at combating these social stresses.

Discussion of a natural gas pipeline necessarily exists in the larger context of North Slope resource development. With that in mind, I would like to reiterate our support for careful exploration in a small portion of the Arctic National Wildlife Refuge (ANWR). This is in keeping with our belief that activity in onshore areas of strong potential is more responsible than offshore exploration and development. Directional drilling and other technical improvements make low-impact activity on the edge of ANWR feasible. Accommodations for seasonal caribou migration can be achieved in ANWR as they have been elsewhere in the region.

Again, I appreciate the committee's interest in the perspective of people who live on the North Slope. I hope my comments assist you in your deliberations. Ours is certainly not the only perspective, but it is a view that springs from the landscape whose future you are considering. I honor the difficulty of your task, and I hope that faith, determination and the good of the people guide you.

Mr. MURKOWSKI. As the Senator from Oklahoma has expressed, we have not had any hearings. We don't know what the scientific answer is. But there is the fear of the people and therefore an objection to any offshore activity.

Then there is the question of trying to get permits to do something for which we don't know what the impact will be. We have never been able to get permits even on land, let alone the difficulty of offshore.

There is also a considerable discussion that has taken place in the engineering community about the prospects of having to loop the line at sea because if you had a break or a fracture and the tremendous amount of volume of somewhere in the area of 4 to 6 billion cubic feet a day flowing through that into a market in the Midwest, perhaps in Chicago, if there was a fracture, you would have a devastating supply situation. And your ability to get at it in the winter with the heavy ice, which is 4 and 5 and 6 and 9 feet thick, would mandate a duplicate route. These are all theoretical, but nevertheless they are concerns expressed.

I will highlight the concern associated with this route. It is certainly a route that is less from the standpoint of distance. There are a couple other aspects we should point out. This is not necessarily a mountainous route. This is a route that parallels the highway and also is a route proposed in 1941 for a railroad to Alaska. The Senator from Oklahoma knows we don't have a connection with the transcontinental railroads of the United States or Canada. But this route is a relatively low elevation. There is one pass in here where the pipeline goes. But as the Senator knows, you increase pressure, and it is not nearly as bad at picking up friction as an oil pipeline.

There are a couple other points I do want to make that are relevant to our consideration. That is the realization that since this is Alaska gas, not found on Federal land but Alaska State land, we obviously want access to the gas for petrochemical and development within our own State, as opposed to the northern route which would simply move the gas offshore with very little secondary industry opportunities for Alaska petrochemical employment, and so forth.

Furthermore, we have been exporting gas out of Kenai to Tokyo, to Tokyo Gas and Electric since about 1966. That gas has come from Cook Inlet. The reserves are running lower now, and we are concerned in Anchorage about only two year-round manufacturing plants for urea and ammonia, and an LNG plant having access to gas. If it goes this way, the majority population centers will not be afforded the opportunity of this gas.

I don't disagree with the Senator from Oklahoma. I think he knows me well enough to recognize, as businessmen, the market dictates. But Alaska is a little different than Oklahoma. We are isolated from the United States by Canada. If we don't put our foot forward in the area of development, we are simply going to be a State where our resources are exported. We have no residential capital base of any kind so capital comes in, exploits the resources, takes them out, and leaves nothing. Our oil companies are good citizens that come to Alaska. They support our efforts. But they are not domiciled in Alaska.

The Senator from Oklahoma is fortunate in having oil companies domiciled in his State even though I guess some of them are moving to a little bigger State—not the biggest State. I would like to see them move to Alaska rather than Texas. He has a lot of independent oil companies, oil and gas. We don't have that in Alaska because we have never been able to accumulate residential wealth nor the availability of private land.

This is a public lands State. As you know, the wealth that is accumulated in our State is public wealth. It is not private. So we don't have domiciled capital ventures that develop our State. We are dependent on outsiders coming in with a lot of money. When they take the resource out, they don't leave much more for it.

This has been the constant history of Alaska. It has been exploitation. First, it was the copper at Kennicott near Cordova. They took the copper out for years and left nothing, absolutely nothing except an abandoned railroad. The canned salmon industry exploited the fishing in southern Alaska. It was all controlled out of Seattle. They left, and there is nothing left in Alaska. We have had the oil industry, and we see our oil going down to Valdez and shipped out of the State. It benefits Washington and Oregon and California.

We are at the point of saying: Wait a minute. We have a resource in our State. We want to make sure we are involved in utilizing this resource to employ our people. We had 30,000 of our young people, ages roughly 19 to 35, leave our State in the last 10 years because we are not able to offer good paying jobs in blue-collar resource development. Yet we are the State with the largest resource base: Oil, gas, timber, the fish, the minerals. But as the Senator from Oklahoma notes, in our effort to open up ANWR, we are taking on the whole public posture of America's environmental community. It is a different set of circumstances.

I trust that my friend from Oklahoma will get a little better understanding.

This isn't just a simple matter of a shorter pipeline. It is a matter of jobs in Alaska, resident opportunities in Alaska because, as this route goes, the jobs and activity are virtually all in Canada. You have the Yukon Territory, Northwest Territory, Alberta, British Columbia, and so forth.

I don't dispute the reality that economics dictate how things happen. But remember one thing, and this has been overlooked in this debate: This gas belongs to the State. It doesn't belong to Exxon; it doesn't belong to BP; it doesn't belong to Phillips. They hold the leases. When this gas is developed, one-eighth of the gas can be taken by the State in kind. We should have something to say about where our gas goes and how it benefits our State.

So that is the action that was taken in the House of Representatives and they designated the route that would be most beneficial to the State of Alaska. That is why I have cosponsored the amendment offered by the majority leader this morning.

But I totally agree with my friend from Oklahoma about the manner in which the majority leader circumvented the committee process and, as a consequence, we are here now educating one another on the merits of this bill.

The PRESIDING OFFICER. The Senator from Nevada is recognized.

Mr. NICKLES. Will the Senator yield for 1 minute?

Mr. REID. Yes.

Mr. NICKLES. I thank my friend and colleague, Senator MURKOWSKI. I understand his situation. We are dealing with $20 billion projects, $10 billion worth of loan guarantees, and we haven't had nearly the number of hearings necessary to consider proponents of both sides and environmentalists. In addition, we should have people who are going to be granting permits, and so on, to give us some input and some estimates on how much it will cost and what the time delays would be, and so on. I haven't seen that being done.

The chairman of the Energy Committee is not here, but I want to have this hearing—and I may not get this hearing before this bill is taken care of, but I want to have a hearing on this before we get a conference report. So he is not here, but I will insist on it. We are not going to have a conference report until we get to have some hearings. I think if we get to the conference, I might have something to do with what is going to be in the conference report. To have this kind of issue and ask Senators to vote on it when we haven't properly reviewed its substance in committee, that is a real procedural mistake. We need to have more significant input from many more experts before making these decisions. I think it is a mistake for us to dictate which pipeline we should be building, without more information.

With that comment, I yield the floor and thank my colleague from Nevada.

Mr. MURKOWSKI. Mr. President, if I may make one clarification.

The PRESIDING OFFICER. The Senator from Nevada is recognized.

Mr. REID. Mr. President, before my two dear friends leave—and perhaps they are not leaving—I would like to have the opportunity to clear the record on a few things. First, my friend from Oklahoma, for whom I have the greatest respect, talked about a number of bills. We know that last time we talked about the energy bill. It got to the floor the same way this bill got here. We know that on the budget resolution the same thing happened, and also on the Patients' Bill of Rights. They got to the floor the same way.

Mr. NICKLES. Will the Senator yield?

Mr. REID. I will in a minute. I want the record to reflect the fact that after Senator BINGAMAN took charge of the committee, a number of hearings were held: June 26 of last year, July 12, July 13, July 17, July 19, July 24, July 25, July 26, August 1, August 2. On August 1 and 2, there was a markup of provisions of this bill.

I also say to my friend from Oklahoma, there have been hearings on this. We have had extensive hearings on this.

Mr. NICKLES. Will the Senator yield?

Mr. REID. I will in a second. I am trying to lay out something on the record, and we can elaborate on it later.

In fact, we had just one hearing where we had 15 witnesses, including the Governor of Alaska, the State Senators from Alaska. We had people from Exxon and BP. Senator MURKOWSKI told us how important this is to them. We have had 15 people talk about this. We had 4 different panels.

Senator BINGAMAN is doing something now and is out of the Chamber momentarily, but I want everybody to understand that Senator BINGAMAN has done an outstanding job of holding hearings. My friend from Oklahoma should not in any way feel that people have not had knowledge of what goes on.

Mr. NICKLES. I think there are factual inaccuracies here.

Mr. REID. I will be happy to talk about that in a second.

H.R. 4, which they say is a great bill, has the same stuff in it that we are talking about today. I don't understand why they are upset when we are following the example that the Republicans used when they were in control of the Senate. If the Republicans are wrong and we are wrong in doing that, the bill is here and it is open for amendment. People can talk as much as they want.

As I said, I will bet Oklahoma wished they were in the quandary that Alaska is in today. Alaska has a chance of getting the southern route pipeline that would create 400,000 jobs. That is a pretty good deal for a small State like Alaska, or even a big State like New York. It would be a great deal for Nevada.

This is an economic development program for Alaska that I support. I think it is great. But I want everybody to know that I think Senator BINGAMAN has done an outstanding job. I think he is an exemplary chairman and we should not complain about how we got here; we are here.

Mr. NICKLES. Mr. President, the Senator mentioned that we had hearings. Can he give me the dates? Have we had a hearing on the two alternatives for pipelines for Alaska?

Mr. REID. We had a hearing to receive testimony on the status of proposals for the transportation of natural gas from Alaska to markets in the lower 48 States, and on legislation that may be required to expedite the construction of a pipeline from Alaska, Tuesday, October 2, 2001, 10 a.m.

Mr. NICKLES. I am surprised. I don't recall that. I don't recall considering the two alternatives. I asked staff did we have a hearing and they said no. I asked if there was a House hearing; they said no. On something this controversial, I am just not so sure we did. Maybe my memory is short, but for a $20 billion project, I kind of think I would know about it. Maybe that is not the case. Maybe I am wrong, but I doubt that hearing was set up in a way that said let's consider these two alternatives.

I will do a little more homework to find out what happened on October 2. I want to find out if we were in session. This doesn't ring a bell.

The Senator said the Republicans brought up Patients' Bill of Rights under this procedure. That is wrong. We had a committee markup on Patients' Bill of Rights. It was marked up, amended, voted on. It was tough, difficult, and it was a very challenging thing, but we marked up the Patients' Bill of Rights. We passed it in committee and on the floor.

The Senator mentioned a budget resolution. That is not a law; that is a guideline for the Congress. Maybe my colleague is right. Maybe we should not have done that. But, at least in my 22 years in the Senate, we have never had substantive, major, significant legislation out of the Energy Committee where we had a day or two of markup and the majority leader said "no more" and we have no more input or consideration of amendments. That has not been done, I am absolutely certain, in my 22 years in the Senate.

Mr. MURKOWSKI. I wonder——

Mr. REID. Mr. President, I had the floor.

Mr. MURKOWSKI. May I ask my friend a question?

Mr. REID. In a minute. I want to explain that we have here from the CONGRESSIONAL RECORD the fact that the hearing was held on the Alaska natural gas pipeline. The committee concluded hearings to examine the status of proposals for the transportation of natural gas from Alaska to markets in the lower 48 States, and on legislation that may be required to expedite the construction of a pipeline from Alaska. After receiving testimony from—and it lists well over a dozen people, including the Governor of Alaska, whose testimony I read into the RECORD today.

So this was shortly after September 11. We all had a lot of things on our minds, and I know how heavily involved the Senator from Oklahoma was on matters that leadership was involved in. Maybe he missed this, but this was an extensive hearing that took a long time.

Mr. NICKLES. I may well stand corrected, and October 2 is pretty close to September 11. Maybe I missed it. My guess is that hearing did not consider the two alternatives. It may have been promoting one alternative. It may have been promoting the alternative that the Governor wanted, but other people—I don't know.

I happen to think there is a lot of interest in two alternatives, and I do not know which is right. I will readily admit that I do not have the answer to which is the best, which is the most economical, which is feasible. My colleague from Alaska was saying we may have to go offshore and build that pipeline; it is a challenge. I do not know that we have to go offshore. These are things that need to be discussed and need to be explored. We did not do that.

My point is, though, we began markup on this bill and that markup was stopped. Again, I will go back to my little 22 years; I cannot remember a substantive legislative item, certainly in the Energy Committee, where we started a markup and then were stopped and were told: No more committee markup; i.e., we do not want input from other people; we are just going to come up with a bill on the floor.

That has not been done, and the process is terrible. I am going to maintain my criticism of it. I look at the 590 pages, and it has grown 100 pages—actually it has grown 154 pages in the last 3 weeks—and I do not know what is in it because we did not have it in committee. There is no committee report. I am fumbling around here. I do not see a committee report. There is no minority report.

That is very unusual for something that is going to increase people's bills, that is going to increase the cost of electricity. We ought to know something about it. It is not out there.

I stand corrected. I always want to be factual. I may have strong passions, but I want to be factual. If we had the hearing and I said we did not, I stand corrected, and I thank my colleague.

Mr. REID. Mr. President, also, there were witnesses talking about the northern route at the hearing. Among those testifying was Forrest Hoglund, chairman and CEO of Arctic Resources Company in Houston, TX.

Maybe the Senator is upset about the procedure, but he should back off a little bit because he has clearly been wrong in the statement about not having a hearing. It was a long hearing; it took a long time.

I state again we are in the Senate working on this most important legislation. I have in my hand S. 1344, which is the Patients' Bill of Rights. This came to the Senate without a single hearing. There were hearings on the Patients' Bill of Rights but not this bill. It was the same with the energy bill we had on the floor when the Republicans were in control of the Senate.

We went one step further than they did. My friend from Oklahoma said: I have never known in 22 years they started a markup and then got the bill here this way. The Republicans would not allow us to even start a markup. We at least started one.

Mr. President, this seems to be getting a little silly. We are here. It is Wednesday. We have to move this legislation. We have other things we need to do. We only follow the lead of the Republicans. If they were wrong, then maybe we should have followed somebody else's lead. The fact is we are here; let's do the best we can on this legislation. If there is something people do not understand—and I am sure my friend from Oklahoma, who is an astute legislator, and he does read legislation and understands it—that he may not have had the time. He has one of the best staffs in the Senate. I am sure very quickly they can bring him up to snuff.

Mr. NICKLES. Will the Senator yield for a question? Since there was a hearing and my able staff pointed out that, yes, there was a hearing, it happened to be on October 2, did that hearing involve the necessity of loan guarantees? Where did the $10 billion loan guarantee come from? This is a surprise and, to my knowledge, was not considered.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. BINGAMAN. Mr. President, I do not believe there was substantial testimony on the issue of loan guarantees. Frankly, this is a proposal we included to make the point to the Senate that some type of risk sharing might well be possible if this project was going to be viable, if the construction of a pipeline was going to be viable.

As I understand it, the ranking member of the committee is in favor of pursuing a different course. I am certainly working with him jointly to see if there is any other way to reduce the risk involved to the companies, if they decided to go ahead with a pipeline.

I can understand there are different points of view about whether or not that would be an appropriate thing to do. We will have an opportunity for a debate on that, I am sure, if the bill finally does contain some kind of financial incentive or support provision like that.

If the Senator from Oklahoma is opposed to that loan guarantee, he ought to propose to delete it. That is certainly an option.

Mr. NICKLES. Will the Senator yield?

Mr. REID. Mr. President, I think I still have the floor.

The PRESIDING OFFICER. The Senator from Nevada has the floor.

Mr. REID. Mr. President, while the Senator from New Mexico is here, I say to him that I very much enjoyed telling everyone what a great chairman he is in his absence. I think he has done a tremendous job getting the bill to this point. This bill and this provision is so important to people of Alaska and our country.

I agree with the Senator from New Mexico. If someone does not like parts of this very important amendment, then move to delete it. But I think we are going to have the support of Senator STEVENS and Senator MURKOWSKI on this, as they should support this.

I say to my friend from Oklahoma, I repeat, maybe there is blame to go around about how legislation happens, but we only follow the example set by my friends in the minority. However we got here, we are here now. It is legislation that is important for this country, and I acknowledge changes probably should be made. It is imperfect, but I think it is really a strong step forward.

I look forward to working with my friend from Oklahoma in any way he thinks is appropriate to improve this legislation.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. NICKLES. Mr. President, before my friend from Nevada leaves, let me clarify a couple things. One, he referred once or twice to the Patients' Bill of Rights. We had a markup on the Patients' Bill of Rights. I am absolutely positive of that. No matter how poor my memory is, I know there was a markup on it.

Mr. REID. Not this one.

Mr. NICKLES. I do not care how many times the Senator from Nevada waves that bill around, I remember there was a markup. I remember putting several people in our committee through a very difficult markup to pass legislation, which they did.

My colleague says, if you do not like the loan guarantees, strike it. The point is, we did not have a committee markup. If we had had a committee markup, I would have had an opportunity to strike it in committee. We would have had 20 people around the committee who would have maybe participated in this hearing and maybe had some impact, but we did not have that chance. I pointed out the $10 billion loan guarantee because I do not know where it came from.

The point is, it would have been nice to have a markup so we could have discussed it. Maybe I would support it. I do not doubt it is a real national energy plus if we can get all the gas reserves that are just being pumped into the ground to the lower 48. That would give us some energy security. That is positive. I would like to see that happen. But I know one thing: I did not have any chance in committee to debate should we have a loan guarantee? Should we have cost shares? what kind of protection do we have for the Government? Is that the best way to go? I am interested in these things. Is this the correct alternative?

I do not believe the hearing was to consider which alternative is the best. Maybe it was, and maybe it was just too close to September 11 and there were other things going on. I am not sure.

We did not have a markup, and I know if we had a markup and somebody offered amendments which said we are going to dictate which route we go, I think I would say why not let the marketplace decide which route to go.

My colleague from Alaska may be exactly right, maybe the southern route is the way to go, but I am saying let's let the marketplace decide.

We have pipelines running all over my State, and I have never voted once on where they should go. We have sort of let the marketplace work. Alaska is a little unique, but should we not find out how much these two routes cost?

My colleague says if I do not like the $10 billion, strike it. Part of our problem right now is we are taking this whole bill up on the floor and now we have to try and fix it. It would have been nice to have had a markup where we could have debated this in committee instead of, oh, I am reading through the bill and, oh, there is a $10 billion loan guarantee. That is interesting. I wonder where that came from?

It is very interesting some of the things one will find in this bill. I am going to be reading more of the bill, much to the chagrin of the manager of this bill. I hope we do not pass a bad bill. I question the wisdom of a $10 billion loan guarantee, but my point is we should have had a markup on it so these issues would have been resolved. If in the committee markup a loan guarantee was supported, I might have been convinced in the process it was the right thing to do so we would have bipartisan support for it, and maybe we do.

The problem is no one knows. I asked my caucus: How many of you know there is a loan guarantee? Nobody, except for Senator MURKOWSKI. The point is, we should have had a markup so we would not have to go through an educational process on the floor and go through a lot of this. Again, clearly the Senator from Alaska knows what he is talking about but I would imagine about 90-some percent of the rest of the Senate does not, and that is kind of unfortunate.

I wish we would have had a markup on the entire bill. It would have eliminated a lot of the process and a lot of the mess that we are in trying to pass an energy package that is 590 pages and, in my opinion, still needs a lot of improvement before we are finished.

I yield the floor.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. MURKOWSKI. Maybe I can enlighten my two colleagues. I see the majority whip has left our midst. He told me he is going to talk to a Republican Governor. That may help his frame of mind, but maybe not.

In any event, in reviewing what took place in October, it was not addressing the issue specifically of routing. It was to consider how to market Alaska's natural gas, and there were proposals for LNG, there were proposals for the boroughs of the North Slope, the Fairbanks borough, the Valdez borough, to come together. There were about half a dozen proposals. It is fair to say, and I want the RECORD to note, that I was not aware, nor did I request, the $10 billion guarantee that is in the underlying bill. This was put in, I think, as an explanation offered by my good friend from New Mexico, to try and address some kind of a safety net that was expressed primarily by one producer from the State of Oklahoma.

That being what it is, I was of the opinion, after talking to the producers—Exxon, BP, and Phillips—that this $10 billion loan guarantee that was put in—and I assume it was put in probably by staff in their willingness to try to come up with something that would provide a safety net—would not provide the assurance they need relative to the magnitude of this project. This is a $20 billion project. So I think the record should note we are going to have to address the necessity of this, and the Senator from Oklahoma has already indicated he questions it.

There has not been a hearing held on it. I hope before this debate is over, we could get a position from the producers, namely the companies that hold these gas leases, on whether they think it is necessary and whether it would be beneficial. That is pretty important relative to a determination of this nature.

I intended to ask, and I will for the record, my good friend from Nevada, who indicated we kind of had a choice—we had a curtain that we could have an ANWR, we could have a gas line, and that sounds very encouraging. I ask if he would give us an up-or-down vote on either one, a 50/50 vote. I will have an opportunity to pose that to him later, or maybe Senator DASCHLE can provide that.

I also ask him, since he was so accommodating, to provide me with an answer of what the position of the committee was on ANWR. What was the position of the Energy and Natural Resources Committee on ANWR? I think the RECORD should reflect it. I do not think we are going to get an answer, and I think the Senator from Oklahoma would agree with me that we are not going to get a committee position on ANWR, which is as a consequence of the manner in which the whole bill was constructed, eliminating the committee process and eliminating the opportunity to have a debate and voting on it one way or another out of committee. It was designed to circumvent the committee process.

I ask the majority whip if he could provide us, in his opinion, what the committee position was on ANWR. I think that may enlighten some of my colleagues.

The PRESIDING OFFICER. The Senator from Oklahoma is recognized.

Mr. NICKLES. Mr. President, to answer the question, I think it was obvious the reason why we did not complete markup on the bill is because the votes were in the committee to have an ANWR provision, and I think obviously the majority leader did not want that to happen. So he basically told the committee not to mark up the bill.

I ask for the yeas and nays on committee amendment No. 2917.

The PRESIDING OFFICER. It takes unanimous consent to ask for the yeas and nays.

Mr. NICKLES. I ask unanimous consent that the yeas and nays be ordered on amendment No. 2917.

The PRESIDING OFFICER. Without objection, it is so ordered.

Is there a sufficient second?

There appears to be a sufficient second.

The yeas and nays were ordered.

Mr. BINGAMAN. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BROWNBACK. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BROWNBACK. Mr. President, I ask unanimous consent to speak on the bill for up to 10 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BROWNBACK. Mr. President, I want to make a few comments on the energy policy in the form of an opening statement. It is something which should take a couple of weeks for us to decide given the bill was not taken through committee. We need to do a lot of work, and I hope we can have a very open amendment process so we can work through the issues and at the end of the day arrive at a bill we are all satisfied with, one that we can be proud of for an energy policy because I think an energy policy has been neglected for too long. It is too important, and it is something we need to act upon.

We are driving a lot of foreign policy based on our lack of an energy policy, and we are having to do some things in regions of the world we probably should not do because we lack that energy policy, because we are so dependent upon the foreign sources.

I particularly point out that the areas upon which we are so dependent for oil are so volatile, we could almost count on the fact that at some time within the next couple of years we are going to see energy disruptions from the Middle East.

We are having some difficulties with Saudi Arabia now, a key place of energy supplies. If we do not act to diversify and get more domestic sources of oil and energy, we are setting ourselves up for a problem that we know is coming, so we need to get a bill through.

We need to get a bill through this Congress.

Our energy policy has been neglected for far too long. We see the effects of this neglect in the sporadic high gas prices at the pump during the summer, in the fact that we import 57 percent of the petroleum we use, and in the complexities we must endure in our foreign policy because of that energy dependency. To alleviate these problems, the U.S. must produce more domestic oil and natural gas while diversifying our energy sources with renewable energy sources, as well. Accomplishing this goal means we engage in a thorough debate on the matter.

I am pleased the Senate is finally addressing such an important issue. I urge my colleagues to resolve our differences so we can get a bill passed.

The Democratic bill before the Senate has some noble goals, particularly with regard to increasing renewable energy, encouraging conservation, fuel efficiency, and addressing global climate change.

However, I am concerned that the specifics in this bill will not get the United States to the shared goal we all have: greater energy independence and improving our energy infrastructure. At issue is a real philosophical difference between the two parties as to how we should meet these goals. As I look at the bill before me, I am concerned the main objectives are accomplished through mandates that may not be achievable by the industry we are trying to grow. Whether it is the CAFE issue or climate change, we need to focus more on incentives, market-based mechanisms, to meet our shared goals.

There are some basic tenets that our conservation energy policy should address that are not included in this bill. The prime issue is our domestic oil and gas production. The bill has some positive measures encouraging renewable energy, particularly ethanol, biomass, and biodiesel, of which I am very supportive. It neglects to address that we need to expand oil and gas in this country. As a result of not having that base in this country, we are forced for reliance on foreign energy. That has numerously dangerous consequences. Increasing our domestic production of oil and gas cannot be left out of the energy security equation. Conservation is important, but it will not solve the problem alone.

The problem is larger than just our domestic situation. It greatly affects our foreign policy, as I noted at the outset. If we were freed from our Middle East dependency on oil, there would be important security benefits for our Nation. Regrettably, at this point, renewables alone cannot accomplish this task, but a combination of increased focus on renewable energy, along with increased domestic production and increased imports from new energy exporters such as the central Asian countries—and I hope we will be working with other nations, too—can yield a formula for accomplishing our mutual energy security and independence goals. It is not a simple equation, but I do think we can see through to a solution.

I commend the work done by the Finance Committee in putting together what looks to be a very positive energy tax package. The tax component is a critical part of making this work. My friend, Senator GRASSLEY, has worked hard to ensure a positive approach to achieving the goals I have described, particularly in support of renewable fuels such as ethanol. Specifically, I am pleased to see the inclusion of tax credits for marginal oil and gas production as part of our important need to increase domestic production. We have many of the marginal oil and gas wells in my State, and this will help bring those online or, in some cases, keep them in production.

We must encourage an infrastructure to serve as a barrier against high prices OPEC may inflict. Independent oil and gas producers are this country's safety net for energy security, and it is in our national interest to preserve and enhance that infrastructure.

Further, the bill provides tax incentives to consumers to buy hybrid vehicles which pollute less and consume less energy. These are positive measures. I am hopeful we can push them through this body, along with some support for other alternative methods of energy production.

As I mentioned, regarding biomass, we can have coal-fired plants that can burn a portion of biomass in their energy production. That can help with our carbon dioxide emission problems but also help having localized sources for energy.

Securing comprehensive energy policies is one of the most important efforts this Congress should undertake this year. We should take the time, we should take the effort, and we should not just vote along partisan lines but work back and forth in the amendment process to come up with a good bill at the end of the day. Let the body work its will.

Regarding how this bill got to the floor, we need to have the body itself work its will and not get tied down on partisan lines. Then at the end of the day we can come up with a national energy strategy that is as broad based as this Nation and the desires here—although our end objective for all of us, energy security, is shared by every Member of this body.

Energy is a key engine that drives our economy. Neglecting it forces us into international dilemmas that can conflict with our security and counterterrorism agenda. I urge my colleagues to work out our differences and pass legislation on this vital topic.

I am hopeful in one other area that I would like to discuss, the area of carbon dioxide emissions. There are important parts of the bill, and I will submit amendments with other Senators, to reduce carbon dioxide loading into the atmosphere. I strongly believe we should go forward with a policy of a trading system, where we go to least cost methods and we put in place a marketplace to reduce carbon dioxide emissions in this country. We have done it previously on issues such as acid rain. We need to do this with carbon dioxide so we can reduce the CO_2 level at the least cost base as others trading for those carbon credits.

There have been innovative programs put in place. I traveled to Brazil to look at one program, the Nature Conservancy is implementing there. It is innovative, helping the environment by reducing carbon dioxide. We should incorporate it as part of our energy strategy. I look forward to this process. I think it is important.

As I noted, this is one of the most important bills we can consider this year.

I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. MILLER). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MURKOWSKI. Mr. President, I ask unanimous consent the order for the quorum call be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2982 TO AMENDMENT NO. 2980

Mr. MURKOWSKI. Mr. President, on behalf of Senator STEVENS and myself, I send a second-degree amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Alaska [Mr. MURKOWSKI], for himself and Mr. STEVENS, proposes an amendment numbered 2982 to amendment No. 2980.

Mr. MURKOWSKI. I ask unanimous consent the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To protect the jurisdiction of the State of Alaska and provide for workforce training)

At the end of the amendment insert the following:

On page 142 after line 20 insert a new section as follows and renumber all following sections accordingly:

"SEC. 708. STATE JURISDICTION OVER IN-STATE DELIVERY OF NATURAL GAS.

"(a) Any facility receiving natural gas from the Alaska natural gas transportation project for delivery to consumers within the State of Alaska shall be deemed to be a local distribution facility within the meaning of section 1(b) of the Natural Gas Act, and therefore not subject to the jurisdiction of the Federal Energy Regulatory Commission.

"(b) Nothing in this Subtitle, except as provided in subsection 704(e), shall preclude or affect any future gas pipeline that may be constructed to deliver natural gas to Fairbanks, Anchorage, Matanuska-Susitna Valley, or the Kenas peninsula or Valdez or any other site in the State of Alaska for consumption within or distribution outside the State of Alaska.".

On page 148 after line 2 insert:

"SEC. 714. ALASKAN PIPELINE CONSTRUCTION TRAINING PROGRAM.

"(a) Within six months after enactment of this Act the Secretary of Labor (hereinafter referred to as the 'Secretary') shall submit a report to the Committee on Energy and Natural Resources of the United States Senate and the Committee on Resources of the United States House of Representatives setting forth a program to train Alaska residents in the skills and crafts required in the design, construction, and operation of an Alaska gas pipeline system that will enhance employment and contracting opportunities for Alaskan residents. The report shall also describe any laws, rules, regulations and policies which act as a deterrent to hiring Alaskan residents or contracting with Alaskan residents to perform work on Alaska gas pipelines, together with any recommendations for changes. For purposes of this section Alaskan residents shall be defined as those individuals eligible to vote within the State of Alaska on the date of enactment of this Act.

"(b) Within 1 year of the date the report is transmitted to Congress, the Secretary shall, directly or through grants or cooperative agreements, establish within the State of Alaska, at such locations as the Secretary deems appropriate, training center(s) for the express purpose of training Alaskan residents in the skills and crafts necessary in the design, construction and operation of gas pipelines in Alaska. The training center shall also train Alaskan residents in the skills required to write, offer, and monitor contracts in support of the design, construction, and operation of Alaska gas pipelines.

"(c) In implementing the report and program described in this section, the Secretary shall consult with the Alaskan Governor.

"(d) There are authorized to be appropriated to the Secretary such sums as may be necessary, but not to exceed $20,000,000 for the purposes of this section.".

Mr. MURKOWSKI. Mr. President, if I may just give a brief explanation.

This amendment makes it explicitly clear that the State of Alaska has complete authority when it comes to regulating in-state distribution of natural gas coming off the Alaska Gas Transportation System.

It also directs the Secretary of Labor to design and establish a program in the State of Alaska to train Alaska residents in the skills and crafts necessary to enhance their ability to compete for jobs and contracts associated with gas pipeline construction.

These amendments are needed because the first degree amendment offered this morning by the majority leader falls short of protecting Alaskan's prerogative to regulate in-State distribution of gas coming off the Alaska Natural Gas Transportation System. I want to highlight in-State distribution.

This ability to control their own destiny is critical to the long-term creation of jobs and the establishment of a gas based industry in my State.

The economic future of Alaska rests with the development of its natural resources—key to the utilization of these resources is the ability of the State to manage their in-State use.

My amendment accomplishes this with respect to North Slope natural gas—it puts Alaskans in a position to guide their own future.

They will decide how and under what conditions gas will be distributed within the State of Alaska.

It will provide locations across Alaska like Anchorage, Fairbanks, the Kenai Peninsula, Delta Junction, and Valdez and Point Mackenzie in Manuska Valley, with the opportunity to pursue gas based opportunities when, and if, they work out the economics.

Like the remaining states of the union, Alaska needs access to a reliable and economic source of clean burning energy. North Slope gas answers this need for the Nation and my State.

The second part of my amendment directs the Secretary of Labor to design and establish a program in the State of Alaska to train Alaska residents in the skills and crafts necessary to enhance their ability to compete for jobs and contracts associated with gas pipeline construction.

Because the impact of this project will fall upon Alaskans in a disproportionate manner, it is only fair that they be provided with the training necessary to compete for pipeline jobs in the State.

These training opportunities will be available to all Alaskans regardless of where they live in the state.

I point out to my colleagues that there is nothing in this amendment that gives Alaskans a priority selection right for pipeline related jobs. Rather, it gives them the training which will allow them to "compete" for those jobs.

My amendment calls on the Secretary of Labor to come up with a plan on how to best accomplish the goal of enhanced employment opportunities for Alaska residents.

This plan will be transmitted to the Congress for our review. This will ensure that this investment will produce the desired results.

The greatest investment we can make in any project is investment we make in the people who will design, build, and operate the system.

Senator REID said this morning that Alaskans should be grateful that they are likely to end up with at least the gasline. That comment demonstrates a fundamental lack of understanding of the economy of Alaska. Our economy does not rely on one resource any more than this Nation can rely on a single energy source. The gas pipeline, if constructed, will provide the foundation for the potential development of a petrochemical industry in my State. ANWR, on the other hand, is a resource destined for consumption in the lower 48. In addition, ANWR is critical to the economic, health, and education future for the peoples of northern Alaska, especially the Inupiat who live on the Coastal Plain. These are entirely separate issues and both offer considerable benefits to the State and to this Nation if we simply have the understanding and courage to do what is right.

While this amendment will rectify some of the shortages in the original proposal put forward by the majority leader, it will be necessary to offer several additional amendments that we are still trying to work out.

For the moment, however, I urge my colleagues to join with me in support of this second-degree amendment.

Mr. BINGAMAN. Mr. President, let me speak in favor of the amendment Senator MURKOWSKI is offering. I think it does improve the underlying Daschle amendment. I strongly support it.

I note one thing with regard to the job training aspect. There is a Federal job training program that is set up under the Workforce Investment Act that makes funds available to each State for job training. I think we are in agreement that is a very important activity. We need to be aware of that as we put the budget together this year and as we do the appropriations bills because those job training programs are being threatened with major budgetary cuts under the administration's proposed budget. I hope the program authorized in this amendment that Senator MURKOWSKI and Senator STEVENS have offered will be consistent to the maximum extent possible with the existing workforce training programs in the State of Alaska.

I was requested to ask unanimous consent that Senator STEVENS be added as a cosponsor of the underlying Daschle amendment. I do not believe he has been so listed as yet.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BINGAMAN. As far as I know, there is strong support for the amendment on our side and we could proceed to a vote.

Mr. MURKOWSKI. I thank the committee chairman.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. MURKOWSKI. I do not think I overlooked adding Senator Stevens on this morning. So he is on both the second-degree and the Daschle amendment.

I urge adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2892) was agreed to.

Mr. REID. Mr. President, I move to reconsider the vote.

Mr. MURKOWSKI. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. REID. Mr. President, if I could address my friend from Alaska and the manager of the bill, Senator BINGAMAN, we now have the Daschle amendment pending. We have been talking about it most all the day. I am wondering if we can agree on some time to vote on it. We have a number of people wishing to speak, but we cannot do that until we have this amendment disposed of, or at least a time set for the vote. The Senator from Georgia wishes to speak. The Senator from South Carolina has an extremely important piece of legislation he wants to introduce and speak about that for awhile. Until we have a time to vote, I don't think we can move off this legislation.

Mr. MURKOWSKI. I have no objection to trying to set a time.

Mr. President, we understand there is another Member coming over who may offer a second-degree. I guess we will have to wait.

Mr. REID. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Mr. President, I have checked with my counterpart, Senator NICKLES, and the two managers of the bill, and they are in agreement that the Senator from Nevada, Mr. ENSIGN, can speak as in morning business for a period up to 6 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The remarks of Mr. ENSIGN and Mr. REID are printed in today's RECORD under "Morning Business.")

Mr. REID. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Mr. President, I have spoken to the Republican manager of the bill and my friend the Senator from Oklahoma. They have graciously consented to allow the chairman of the Commerce Committee to speak for up to 15 minutes as in morning business relative to introduction of a bill.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator from South Carolina.

Mr. HOLLINGS. Mr. President, I thank the most distinguished assistant majority leader.

(The remarks of Mr. HOLLINGS pertaining to the introduction of S. 1991 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

Mr. HOLLINGS. Mr. President, I thank Senator REID, Senator BINGAMAN, and Senator MURKOWSKI for their courtesy. I yield the floor.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. BINGAMAN. Mr. President, I ask unanimous consent that the previously agreed to amendment No. 2982 be in order.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BINGAMAN. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. REID. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Ms. STABENOW). Without objection, it is so ordered.

Mr. REID. Madam President, the Senator from Georgia, Mr. MILLER, wishes to make a statement now in regard to this bill, and he has an amendment which he is not going to offer but wishes to talk about. I ask unanimous consent that he be allowed to speak—we have received permission from the Senator from Alaska, even though we probably do not need it other than to call off the quorum; we appreciate his courtesy—for up to 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator from Georgia.

Mr. MILLER. Madam President, I rise today in defense of that great American workhorse: The pickup truck. I am proud to sponsor, along with my friend, Senator GRAMM of Texas, an amendment that would exempt all pickup trucks from the higher CAFÉ standards that have been proposed.

This is a very simple and short amendment. Pickups are now required to meet a standard of 20.7 miles per gallon, and our amendment would simply freeze pickups at that standard. All pickups would be exempt from any higher mileage standard proposed in this legislation.

Some have said we should only exempt the very largest pickups from the higher standards. That would only cover a small percentage of the pickups that are on the road, and I do not think that is good enough. Our amendment says all pickups will be exempt from the higher CAFÉ standards.

We absolutely should not impose these higher mileage standards on our pickups. We absolutely should not impose the undue safety risk and extra cost of these CAFÉ standards on our farmers, our rural families, and our small businesses that rely so heavily on the pickup.

We have had a lot of conversation about the state of the economy these days, and we hang on every word of Alan Greenspan, Robert Rubin, and the like, about the recession and when we are coming out of it. I knew a fellow back in Georgia. He did not have a Ph.D. in economics; he would have thought Ph.D. stood for "post hole digger." But he was one of the wisest men I ever knew. He told me years ago that if you really want to know when times are bad, take notice of the number of people having to sell their pickups. Look at the ads in the paper and the "for sale" signs in the yards. The more you see, the worse it is because pickups are the very symbol of the working man. As the pickup goes, so does the working man and the very heart of this country.

Madam President, a pickup truck has two ends to it: A working end and a thinking end. Of course, the working end is the engine in the front. I would like to tell you about the thinking end in the back.

I submit that the back of a pickup is the think tank of rural America. I suspect more problems have been solved on the tailgates of pickup trucks after a long day's work than have been solved anywhere.

I do not rise to speak often in this hallowed Chamber. I am still learning the complexities of being a Senator. I envy my learned colleagues who can speak with such great assurance on so many subjects. But, Madam President, on this one you can trust this man from the mountains of North Georgia. If this amendment fails, the tailgates of rural America are going to drop, and it will be a clank that will reverberate from now through November because then the conversation at the end of the day on the back of a pickup as the Sun goes down will not be about the farm or the family or the State or the Nation; the subject will be how to get rid of us in the next election.

Every election year we talk a lot about all those soccer moms out there and how they vote in such high percentages. Well, there is another group out there that votes in a very high percentage. They are the pickup pops. In fact, I would bet pickup pops go to the polls in higher percentages than any other Democratic group out there, and they also have long memories.

If these higher CAFÉ standards are applied to pickups, they will be made unaffordable for many, and unsafe for all, and that will hurt those pickup pops. It will hurt the working man. It will hurt rural America.

We are big on acronyms in Congress, and quite frankly they can be a little deceiving and confusing. I cannot even keep up with all of them. When we talk about CAFÉ and CAFÉ standards, most folks think we are talking about restaurants.

People in rural America also understand what an acronym is, and I think on this issue they would say that "pickup," P-I-C-K-U-P, is an acronym for "People in Congress Keep Us Perplexed." Let us not keep them perplexed anymore.

One of the first things I noticed when I came to Washington, DC is that you hardly ever see a pickup. They are scarce in Washington, DC, but they are not scarce outside the beltway, out there in middle America.

I want to show this chart. In 1999, pickup trucks accounted for almost 18 percent of all registered vehicles in this country. In 29 States, these red and blue States—that is more than half of our States, of course—pickups amounted to as much as 20 to 37 percent of all the registered vehicles. In the year 2000, drivers in this country bought 3.18 million pickup trucks. That makes pickups the third most popular choice of vehicle for American drivers.

So pickups may not be prevalent in Washington, DC, but pickups are popular across the rest of America. When all this talk about CAFÉ started last year, I got worried Washington was going to stick it to the pickup owners of this Nation, so I tried to write a song about it. I am no ORRIN HATCH, but I tried to write a song about it with my good friend, Jack Clement, in Nashville. It is called the "Talking Pickup Truck Blues." I will spare everyone the agony of my singing, but I want to share one verse. It goes something like this:

> Sure, an SUV is classy travel, but it ain't much good for hauling gravel, or hay seed or bovine feces. So please do not make my pickup truck an endangered species.

Now, I will be the first to admit that song has not climbed to the top of the charts, but here is the point we are making: Do not mess with the working machine of the American road. Do not mess with pickups. Farmers depend on them. Families in rural America depend on them. Small businesses across this country depend on them, small businesses such as construction companies and home builders.

One of the greatest economic engines we have in this country is the housing industry. You can go to any construction site across America and see at least a half dozen pickups. Plumbers drive them. Electricians drive them. Painters drive them. Carpenters drive them. Raise the cost of a pickup truck and more than just pickup owners will be harmed; entire industries will be hurt—the housing industry and others that rely heavily on pickups.

Folks buy pickups not because they are affordable and they are safe. They buy them because they get the job done, whatever that job may be, whether it is pulling a trailer full of cattle or hauling lumber to a construction site or driving on gravel and dirt roads in rural America. There are times when only a pickup will do.

So I urge my colleagues, who represent the millions of pickup owners across this country, when this amendment comes up at a later date to vote for this amendment. We must exempt the American workers, the pickup truck, from these higher CAFÉ standards.

Like the last verse in my song goes:

> So help us, Lord, and let there be a little wisdom in D.C.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. Madam President, I ask unanimous consent that I be permitted to speak for 3 minutes as in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The remarks of Mr. DOMENICI are printed in today's RECORD under "Morning Business.")

Mr. BINGAMAN. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. REID. Madam President, I ask unanimous consent the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Madam President, we are in the process of getting agreement for a vote in the next few minutes on the underlying Daschle-Murkowski amendment. We hope that will be accomplished soon. We are waiting to hear from one person whether or not we can proceed with that vote. Members should be alerted we are going to see if we can have a vote this evening.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. REID. Madam President, I ask unanimous consent the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Madam President, I would like to express my appreciation to everyone for their cooperation at this point in this debate. There has been some very good debate. It has been heartfelt on both sides. But I think we are moving forward with this legislation.

As Senator MURKOWSKI said earlier today, this is only preliminary. We have many difficult issues on this bill that are going to come forward in the next few days. So we have to recognize we may have some late nights. We may have to work long and hard on this legislation.

I ask unanimous consent the time until 5:50 today be divided equally and controlled for debate with respect to the Daschle amendment No. 2980, as modified and amended, and at 5:50 p.m. today the Senate vote on the amendment, with no further second-degree amendments in order thereto.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered. Who yields time?

Mr. REID. Madam President, I ask unanimous consent the unanimous consent agreement I just propounded be amended to begin the vote at 5:45 p.m. today.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BINGAMAN. Madam President, I ask unanimous consent the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2980, AS MODIFIED

Mr. BINGAMAN. Madam President, what is the regular order?

The PRESIDING OFFICER. The question is on agreeing to amendment No. 2980, as modified and amended.

Mr. BINGAMAN. Madam President, I ask for the yeas and nays on that amendment.

The PRESIDING OFFICER. Is there a sufficient second?

There appears to be a sufficient second.

The clerk will call the roll.

The legislative clerk called the roll.

Mr. NICKLES. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. NICKLES. Madam President, I ask unanimous consent the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NICKLES. Madam President, for the information of our colleagues, we are going to be voting momentarily. I appreciate the cooperation of my friend from New Mexico for postponing the vote for just a moment.

I urge my colleagues to vote against the Daschle amendment, which was also modified by my friend and colleague, Senator MURKOWSKI, because it mandates that we pick the southern route for a major gas pipeline to go through Alaska. That may be the best route. There are other possibilities, other alternatives.

There is a northern route. It is several hundred miles shorter. It may be more economical. Most of the northern route goes through the Mackenzie River Delta which is on a pretty flat plain and would not require going through 900 miles of mountains.

I do not know which one we should choose. I do not think that Congress should choose it. I do not think we should mandate it without more significant oversight and discussion.

I would like to hear the experts. I would like to hear the environmentalists. I would like to have some input from a lot of people. And I would like to have an idea how much the alternatives would cost.

I have heard that the pipeline route that Senator DASCHLE is trying to mandate, the southern route—going through Alaska, and then going through Canada—would cost about $20 billion. I do not know. I do know that in the underlying bill there is a $10 billion loan guarantee. We have never had a hearing on the loan guarantee. We have never had a hearing on how this is going to be financed, whether it needs governmental assistance or not.

I think it is wrong for us to dictate we go this particular way and other options cannot be considered. I would like to think we believe in the free market system enough to where we would let the marketplace decide what is the best route, what is the most economical route, what is the route that will do the least environmental damage. Instead, we have people coming up and saying: Oh, wait a minute, I have talked to a couple politicians. We are going to mandate the southern route with very little discussion or debate.

Let's let the marketplace decide. Let's get some input from a lot of people. I do not think we are doing that in this case. I do not think this is a good way to legislate.

I do not think we know how much it will cost. I do not think we have an idea of the environmental impact. Instead, we are just going to have a 2-hour debate on the floor, and then we are going to say: Let's go make a decision on a $20 billion pipeline.

Do we need a loan guarantee? Do we need Federal assistance? Do we need to have Federal financing for this project?

I think we are moving pretty quickly here. I would hope we would be silent and assume we could go through the regulatory process.

We have built hundreds of miles of pipeline through my State, and we have never had Federal legislation designating what you have to do, nor have we had State legislation designating what you have to do.

I question the wisdom of us mandating one particular route at this particular time. So I urge my colleagues to vote no on the Daschle amendment.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. STEVENS. Madam President, I am sad to disagree with my friend from Oklahoma. I point out to the Senate that this oil and gas is produced on State lands, with State leases. And our State law prohibits the rights-of-way for this gas to be moved on the northern route. It is within our province to guide the course of this asset of our State so that we might enjoy part of it.

If this gas goes east from Alaska, Alaskans will never enjoy one single benefit from it except a portion of the wellhead price coming to us as royalties. We will not have any right to use it in our second largest city, in Fairbanks, along the Alaska highway going out of Alaska into Canada. This is a very dynamic area from the point of view of tourism.

In addition to that, we have two major bases there, Wainwright and Eielson, and the national missile defense system is right alongside that road. This gas must come south. My State has recognized that and has now passed legislation, signed by the Governor, that specifies that no route will be allowed going east on these State lands. This gas must exit State lands before it can go either east or south.

We have spoken as a State. We understand there may be some problem for us downstream. The Senator from Oklahoma would know, it may well be that the wellhead price of this gas will be lower and our share of that wellhead gas will be lower. But we will have access to the gas. We will have a chance to build the industry that might well utilize this gas in our State.

This is the same problem that came up in the oil pipeline. When the pipeline route came through, there was an argument whether we should be able to take oil out of that pipeline around Fairbanks. As a matter of fact, we have won that argument. We do take out oil. We run it through two different refineries, and it is one of the greatest sources of aviation fuel for our country. It is available in the Nation's largest cargo landing port at the international airport at Anchorage.

I disagree with my friend from Oklahoma. I think we have every right to say we should enjoy a portion of this resource that comes from under our own State lands and to utilize it in a way that will mean a future job base and future low energy costs for the one area of our country that pays the highest energy costs, and that is the area that this pipeline will come through and down to the border of Canada.

That is the only route that is going to be built. I hate to tell my friend this. I told the industry that that line would go east over my dead body. I am not about ready to leave this world.

The PRESIDING OFFICER. The Senator from Nevada.

Mr. REID. Madam President, it is my understanding there has been a vote ordered at 5:50; is that right?

The PRESIDING OFFICER. Yes, that is correct.

Mr. REID. So the regular order would be for us to begin voting; is that right?

The PRESIDING OFFICER. The Senator is correct.

The Senator from Oklahoma.

Mr. NICKLES. Madam President, I ask unanimous consent to speak for 1 minute.

The PRESIDING OFFICER. Is there objection?

Mr. REID. Madam President, I ask unanimous consent that the Senator from New Mexico be given 2 minutes. So Senator NICKLES, 1 minute; Senator BINGAMAN for 2 minutes; and then we vote.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NICKLES. I thank my friend and colleague.

I tell my friend from Alaska, I have no desire whatsoever for him to depart this world at this particular moment or any time in the not too distant future. Also, it is not my intention to say that the northern route is preferable to the southern route. I just don't think we should mandate that it be the southern route. It may well be, due to the information our colleagues have had, the southern route is the preferred route. I am not saying it is not. I just don't think it should be mandated by this legislation that it be the southern route, when we may find out that it costs twice as much as some other alternative.

I yield the floor.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. BINGAMAN. Madam President, I strongly support the amendment on which we are about to vote. It has the support of the Alaska delegation, as Senator STEVENS indicated, as Senator MURKOWSKI has indicated. It has the support of the Governor of Alaska. It is totally consistent with the action this Congress took in 1976 with the Alaska Natural Gas Transportation Act. It is clear to me that this is the correct policy for the Congress to adhere to at this point. I urge my colleagues to support the amendment.

I yield the floor.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. MURKOWSKI. Madam President, I thank my colleagues, Senator BINGAMAN and Senator REID, the majority leader, and others for their cooperation in seeing that the basic Daschle amendment, which was laid down, and the second degree, which was accepted, clearly make this project much more feasible because it gives Alaskans the option on the southern route that suggests we will benefit the State in many ways, not only for Fairbanks but for all utilization of gas within the State, for Point Mackenzie, for the Kenai area, for Valdez, and for the Matanuska Valley.

As Senator STEVENS indicated quite strongly in his opinion on the necessity of this happening, it clearly gives us an opportunity to have some secondary industries in Alaska to support our young people, the greatest natural resource we have—I am most appreciative—as well as the job training that is provided in this bill. I encourage my colleagues to vote in favor of it.

The PRESIDING OFFICER (Ms. CANTWELL). All time has expired. The question is on agreeing to amendment No. 2980, as modified, as amended.

The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. NICKLES. I announce that the Senator from Virginia (Mr. WARNER) and the Senator from Kansas (Mr. ROBERTS) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 93, nays 5, as follows:

[Rollcall Vote No. 41 Leg.]

NOT VOTING—2

Roberts
Warner

The amendment (No. 2980), as modified, as amended, was agreed to.

Mr. REID. Madam President, I move to reconsider the vote.

Mr. KYL. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. REID. The Senator from Arizona has been patient during the day, and he wishes to speak on the bill for up to 10 minutes. Although we need to leave, he has indicated he has a very difficult day tomorrow. I ask unanimous consent the Senator from Arizona be allowed to speak on the bill for up to 10 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Arizona.

Mr. KYL. I thank the Senator from Nevada for his courtesy. I will summarize my remarks and try to find another time to expand on some of my thoughts. I appreciate his courtesy.

There is a big difference between what the President has proposed in terms of an energy policy and the bill we are beginning to debate on the floor of the Senate. The President's energy policy, I believe, was a very well balanced set of recommendations that would have helped achieve the goal of energy efficiency, less dependence upon foreign sources of oil, and a series of steps of progress toward changes in our policy that would result in more environmentally friendly fuels and a variety of reforms almost everybody is willing to support.

Unfortunately, the President's proposals were not met with support by many on the other side of the aisle. As a result, even though I believe there was sufficient support in the Energy Committee, on which I sit, for many of the reforms that the President has proposed, our committee was not allowed to deal with this matter. The only hearings held were a long time ago and did not deal with most of the specifics of the legislation. We were never permitted to mark up the legislation. In fact, the bill that is on the floor today has undergone iterations, and I am not precisely sure I have the very last version.

In terms of process, we are suffering under an inhibition of the primary committee of jurisdiction never having had the opportunity to work out details, to try to smooth out rough edges, and resolve differences that probably could be resolved if we had taken the time to do that in the committee structure. It is hard to write a complex bill during its consideration on the floor of the Senate. Yet that is what we will have to do. As a result, I am afraid we are not going to end up with a product that would be nearly as good as it would have otherwise been.

Let me mention several aspects of the bill that are going to need a lot of work. I will briefly address four or five of them. The bill is written to restructure the electric energy industry. This is a very complex and difficult subject. I think it is done in a very clumsy way. It preempts a lot of State authority. It gives a lot of authority to FERC, largely at the expense of the States. It gets the Federal Government involved in retail matters, with a utility serving its customers in matters such as real-time pricing, net metering, and consumer protection issues. That is not the business of the Federal Government.

It gives FERC broad authority with respect to the interstate transmission grid. There is some authority here. One can make the case that on interstate matters FERC should be able to help open up the market for easier transmission of energy. I think we can work some provisions out that provide broader authority to FERC even in that area. We have to be careful that we do not "socialize the costs," which is the term used by one official, with respect to how the costs will be allocated. We are going to have to treat the costs in a very fair way and make sure the existing customers are not the losers, that a utility that currently serves them can continue to do that, and they will not have to pay the cost of someone else coming to connect to the grid.

There are a lot of issues with respect to this electric restructuring to which we are going to have to pay attention that we could have resolved in committee if we had the opportunity.

The second has to do with nuclear power. The bill itself, unfortunately, does not adequately deal with the need to modernize the law with respect to the provision of nuclear power. It does extend the Price-Anderson Act for 10 years but only for DOE contractors. For those not aware, that is the liability protection that has historically been provided to nuclear generators to ensure that they would be able to provide the power and not have to worry about the insurance costs for some catastrophic accident.

There will be an amendment offered to add the NRC licensees, which are the commercial powerplant operators, to this Price-Anderson protection. I believe that will pass. I think most recognize that is going to be necessary.

There are 103 nuclear powerplants operating in the United States today, including 3 in my home State of Arizona. They supply almost a quarter of the power in the United States in a very environmentally safe manner—no emissions, no gases such as nitrogen oxide, sulfur dioxide, or other gases that threaten the environment. Nuclear energy, of course, is the most efficient. It costs 1.83 cents per kilowatt hour compared to 2.08 per kilowatt hour for coal-fired plants. We need to work to ensure that the nuclear provisions of the bill are modernized. We will have amendments to present to do that.

One of the most contentious parts of the bill relates to increasing our ability to generate oil and gas production in the United States so we do not have to rely so much on foreign sources of oil. This gets primarily into the question of whether we should be able to explore for oil in an area of Alaska that was set aside for that purpose by the U.S. Government some years ago, an area called the Arctic National Wildlife Refuge or ANWR.

The facts have gotten very confused by people who do not support this proposal. The area we are talking about is about the size of the State of South Carolina. But the amount of land that would actually be exposed to exploration is no larger than the footprint of an airport in most of our communities, including, if you want the exact acreage, Dulles Airport outside of Washington, DC, or Sky Harbor Airport in my home State of Arizona. Out of an area the size of South Carolina, we have an area the size of an airport in which the drilling would occur.

It is simply not possible to have the degradation of the environment that some claim with the modern technology that would be used to provide for this production and the small area and the environmentally friendly ways in which it would be done. The drilling pads are 80 percent smaller than they were a generation ago. You can literally get oil 6 miles away by drilling down 2 or 3 miles and drilling out 2 or 3 miles and in that way keep your footprint to a very small area.

The critics have said there is not very much oil, so it is not worth the effort. I will state how much: It is 600,000 barrels of oil per day, which is almost the same amount of oil we are importing from the country of Iraq. It is the supply of oil we get from the country of Iraq for 40 years. That is a lot of oil. If we get into a conflict with Iraq, we will wish we had an alternative source so we would not have to rely upon purchasing it from Iraq.

Suffice it to say, if we are going to be serious about increasing our energy production, we are going to have to be able to drill for oil in Alaska.

There is a provision of the bill dealing with CAFÉ standards, setting the miles per gallon that cars have to meet. While all Members are desirous of trying to improve the miles per gallon that our cars meet, the only way we have found to do that has, as a result, caused an increased number of automobile fatalities. The National Academy of Sciences, certainly an unbiased source, found that previous fuel economy measures likely resulted in 1,300 to 2,600 additional crash fatalities annually, which is the equivalent, according to the National Safety Council, of wiping out the recent hard-won gains of safety belt use, airbags, or drunk driving legislation.

The point is we have had a lot of people unnecessarily killed on our highways because we have had to make cars lighter in order to meet these CAFÉ standards. It seems to me we have to weigh the benefits that might be achieved—might be achieved—in terms of fuel savings on the one hand and the saving of lives that would be achieved on the other hand if we do not carelessly move forward with these CAFÉ standards.

Once again, we will have an amendment that will have to deal with that. I will have amendment also to deal with other subjects. There will be other amendments that will attempt to improve the underlying bill.

My bottom line is this. In this brief opening set of comments, I just want to make the point that the bill before us is not the bill that the President recommended. It is not the bill that I think could have come out of committee. It is a bill that requires a lot of work. It is going to take a lot of time. When we try to do the amending process on the floor of the Senate, we don't necessarily end up with the best of products—just because of the way we have to proceed. It is regrettable we have to do it that way, but since we are opened up to a series of amendments, then I think we will have to have the indulgence of everyone as we present and debate those amendments and hopefully get them passed.

The PRESIDING OFFICER. The Senator from Nevada.

MORNING BUSINESS

Mr. REID. Madam President, I ask unanimous consent the Senate now proceed to a period of morning business with Senators permitted to speak for up to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

REMEMBERING FORMER SENATOR HOWARD CANNON

The PRESIDING OFFICER. The Senator from Nevada.

Mr. REID. Madam President, it is a very sad day because Nevada lost one of its great citizens—Howard Cannon died today.

Howard Cannon served in the Senate for 24 years. He left the Senate in 1982. He was a wonderful man. I have great memories of him when I worked as a police officer, when I was going to law school. Howard Cannon had been a bar examiner before coming back here. He was a very fine lawyer, had a great legal mind. He tutored me, as busy as he was as a Senator, to help me pass the bar. I am always grateful for that. I am grateful for all he did for me as I moved up the political ladder to different offices.

I remember the first political office I ran for was the hospital board. His chief of staff, Jack Conlin, through Senator Cannon, gave me some money for this race. He was always very caring about me, and I cared a great deal about him. I do have, though, some satisfaction because just a couple of weeks ago, on his 90th birthday, I came to the Senate and talked about what a fine man he was, how much he had done for the State of Nevada. I talked to him that day on the telephone.

COMMEMORATING SENIOR AIRMAN JASON CUNNINGHAM

Mr. DOMENICI. Madam President, I rise today to commemorate a fallen hero from my home State of New Mexico—I see Senator BINGAMAN so I think it is appropriate to say "our home State"—Senior Airman Jason Cunningham. He lost his life this week while trying to save the life of another serviceman in eastern Afghanistan.

I express my heartfelt condolences to Jason's wife Theresa; his daughters, 2-year-old Hannah and 4-year-old Kyla; as well as his parents Larry and Jackie. I know I speak for all New Mexicans when I say how proud we are of your husband, father, and son, and that our thoughts and prayers are with you.

Jason was a member of the Air Force's elite pararescue team whose mission is to rescue downed pilots in hostile territory. He joined the 38th Rescue Squadron because it was his passion to save lives, and that is exactly what Jason and his comrades were doing this week when he came under heavy fire from the al-Qaida force.

During an attempt by our forces to land a reconnaissance team in a mountainous region known to be inhabited by al-Qaida and Taliban, one troop fell from a helicopter when it was hit by enemy fire. Later, it was Jason and his rescue team who bravely went into the area where the trooper and helicopter were down in an attempt to extricate him. A heavy fire-fight ensued and Jason and five other Americans lost their lives.

I know that words are of little consolation at such a difficult time for Jason's loved ones, but I want his family to know that all New Mexicans—this Senator, and I am certain my colleague, Senator BINGAMAN—mourn with them today. I am sure that for Jason's heroics his country will bestow upon him one of the most highly respected honors it can give, the Purple Heart. Such valor deserves no less.

The loss of such fine Americans as Jason in the war on terrorism can be heartrending, but as a nation we must honor the sacrifices of men and women like Airman Cunningham and remain steadfast in our resolve to protect our freedoms and liberty from terrorism.

President Bush has told us many times that this war would not be quick or easy, and it would be good to remember that, while we mourn the loss of a good man like Jason Cunningham.

I ask unanimous consent that a detailed statement surrounding the young man and his family headlined "New Mexican Dies Trying to Save Others" from the Albuquerque Journal, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

NEW MEXICAN DIES TRYING TO SAVE OTHERS

(By Miguel Navrot)

Jason Cunningham was one of the best the Air Force had to offer.

Cunningham served as a pararescueman—trained to rescue downed pilots from the most hostile of enemy areas—in one of the military's elite teams, sometimes compared to the Navy SEALs.

Cunningham, who grew up in Carlsbad and Farmington and recently lived in Gallup, once considered becoming a SEAL as a Navy petty officer. He had passed the Navy's fitness test but decided to move to the Air Force.

"I didn't want to kill people," Cunningham told Airman magazine, an Air Force publication, in October 2000. "I wanted to save them."

Cunningham, 26, died trying to save another serviceman Monday. He was one of eight soldiers killed in renewed fighting in eastern Afghanistan.

The remains of seven of those servicemen arrived Tuesday at Ramstein Air Base, Germany.

Jason's parents, who live in Gallup, learned of their son's death Tuesday morning.

"We're very proud of our baby," Jackie Cunningham said of her son as she tried to hold back tears at a family news conference on the lawn outside their blue ranch-style home.

"Jason died doing what he liked to do, save lives," said his father, Larry "Red" Cunningham, choking on his words as he read a brief statement.

Since last summer, Cunningham, a senior airman, was stationed at Moody Air Force Base near Valdosta, Ga., with his wife, Theresa, and two daughters, 2-year-old Hannah and 4-year-old Kyla. He was deployed Feb. 1, his family said.

"We last heard from him on Saturday," the father said.

Cunningham was the middle child of the family. Standing next to his parents were his brother, Chris, 29, of Washington state, and his sister, Lori, of Farmington.

The family said memorial services will be in Georgia and in Carlsbad this week. A funeral and burial are planned for next week in Camarillo, Calif., where his wife is from.

Cunningham was born and raised in Carlsbad. The family moved to Farmington just before his high school years. After graduating from high school, Cunningham went into the Navy for four years before moving to the Air Force.

Cunningham began the Air Force's pararescue school, a grueling 21-month training program that few finish, about 2½ years ago.

Training for pararescuemen, or PJs, concludes at Kirtland Air Force Base. Cunningham graduated from the school on July 7, when he donned the group's maroon beret, Kirtland officials said.

He belonged to the 38th Rescue Squadron.

Tech. Sgt. Tim Donovan, a supervisor for air operations with the school at Kirtland, called Cunningham "kind of silly, kind of goofy," with a heart totally dedicated to the pararescue mission.

"He had several setbacks that he overcame and persevered through all the training," Donovan said. "He never quit. He was totally focused. . . .

"A lot of times you have kids who don't feel they have their hearts into it or they're just in it for the beret or they're doing it for something other than the motto (That Others May Live). That wasn't him at all."

Cunningham is the fourth pararescueman the Air Force has lost in the past three months. The Air Force has about 300 pararescuemen.

"They're a small, tight-knit community, and all of them will most assuredly feel the loss of one of their own and mourn his passing," Kirtland spokeswoman 2nd Lt. Kelley Jeter said Tuesday.

Theresa Cunningham spoke to her parents early Tuesday.

"She was hysterical. She talked to her mom and said, 'Jason is dead.' That's it," said her father, Lito D'Castro.

"He's a nice guy. He loves the service," D'Castro said from Camarillo.

D'Castro said the last time he saw Cunningham was when he visited Camarillo at Christmas-time.

Cunningham was one of seven Americans who died in the bloodiest operation of the war in Afghanistan. They were killed as troops were being taken into the battle area on two different missions, the Pentagon said Tuesday.

Early Monday, a two-helicopter team was ferrying in reconnaissance troops south of Gardez when one was hit by enemy fire, said Brig. Gen. John W. Rosa Jr., deputy director of operations for the Joint Chiefs of Staff.

One soldier fell from a helicopter and later died, Rosa told a Pentagon news conference.

Cunningham was killed during a subsequent rescue mission involving special forces on two helicopters. Once on the ground, those forces got into a firefight in which at least 11 were wounded and six died.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. BINGAMAN. Madam President, I join my colleague, Senator DOMENICI, in expressing condolences to the family of Jason Cunningham. I also read with great sadness the report of his death in Afghanistan. It was emphasized in the report which I read that he was part of this para-rescue team and that he had made a very conscious decision in choosing his career path in the military to be on a para-rescue team rather than on a different type of military team because he did want to commit his life to saving other people's lives. That is the exact activity he was engaged in in Afghanistan when he came under enemy fire and was killed in that combat.

This is a reminder to all who serve in the Senate, as well as, of course, to his family. It is an enormous responsibility we take on as a nation when we send our best young people into battle to do the work of this country, to put these men and women at risk, as has been the case in Afghanistan. It is an enormous undertaking. His sacrifice is the ultimate sacrifice and his family's sacrifice, as well. We join with them in mourning his death.

INTERNATIONAL CRIMINAL TRIBUNAL FOR RWANDA

Mr. FEINGOLD. Madam President, I rise today to voice my support for the International Criminal Tribunal for Rwanda which is the often-neglected sister court to the International Criminal Tribunal for the former Yugoslavia at the Hague. While the international media carries regular coverage of the Milosevic trial and the NATO efforts to arrest individuals wanted by the ICTY, much of the world, it seems, has forgotten about the ICTR. This week, as the UN's fifth committee considers the tribunal's budget, I want to make plain my continuing concerns about the tribunal, but I also want to be crystal clear about my continued support for its work.

In 1994, an unspeakable horror unfolded in the tiny central African site of Rwanda. Despite the initial references to "ancient tribal hatreds" at the source of violence, we now know that the genocide was not a series of spontaneous acts; it was not about crowds gone wild or tribal bloodlust. It was carefully planned and centrally directed. Extra machetes had been imported, militia groups were in place, and incitements to murder had become a regular element of programming on the hate-radio station. The planners targeted not only ethnic Tutsis, but also politically moderate Hutus who threatened their grip on power. We know today that individual people—leaders and planners—are responsible for the deaths of some 800,000 people, and that the blame for these atrocities cannot be heaped on some imagined cultural failing.

Two weeks ago, I had an opportunity to visit the International Criminal Tribunal for Rwanda in Arusha during a weeklong trip to Kenya, Tanzania, and Mozambique that I undertook in my capacity as Chairman of the Senate Foreign Relations Committee's Subcommittee on African Affairs. During my brief visit, I was able to meet with the Deputy Registrar, with Judge Navanetham Pillay, who is the President of the ICTR, and with some members of the Prosecutor's office. I was also able to sit in on one of the trials underway—that of Laurent Semanza, a former mayor of Bicumbi who is charged with several counts of genocide, conspiracy to commit genocide and crimes against humanity, including rape. I heard some of the wrenching testimony in that case, and was astounded at the strength of the tribunal officials, whose work requires them to confront the horrible facts of the Rwandan genocide every day of their work.

For many years, I have strongly supported accountability measures in cases where crimes against humanity have occurred, and I think that international support for such measures is particularly important in Africa, where too often the international community fails to respond to atrocities the way we would if such acts occurred in Europe or North America.

For this reason, I have been a supporter of the Special Court for Sierra Leone. I have long supported the ICTR. In the last Congress, I authored legislation that was signed into law that would extend the U.S. rewards program to allow our government to offer and pay rewards for information about individuals wanted by the tribunal. The reason that we did this is because this provision had already existed for the International Criminal Tribunal for the Former Yugoslavia—an example of how a double standard relating to the courts was at one time institutionalized in our government.

What had happened since the Arusha tribunal's inception is nothing short of groundbreaking. The ICTR was responsible for the very first international convictions for the crime of genocide.

Many people do not realize this, although the international community adopted the definition of the crime of genocide following the holocaust, it was the ICTR that launched the first successful investigation and prosecution for that crime. It was the first-ever international tribunal to convict an individual of rape as a crime against humanity and to rule that rape can be a crime of genocide. The Tribunal was the first such institution to actually convict a national leader, the former Prime Minister of Rwanda, of genocide. The court has established principles of international law that will be studied in law schools around the world for generations to come.

And more importantly, it is establishing, in the minds of African leaders and African elites and African societies, the possibility that those responsible for crimes against humanity may one day be held accountable for their actions. In central Africa in particular, this goal is essential to ending the culture of impunity for gross violations of human rights, whether they occur in Rwanda or Burundi or eastern Congo. The people who have been laboring in Arusha to hold those most responsible for the genocide and for crimes against humanity in Rwanda in 1994 deserve recognition, and respect, and support.

Now, there are a number of steps that the international community can take to help this worthy effort. First, we can ensure that the prosecutor's office is adequately staffed. It is almost appalling that the post of Deputy Prosecutor has been vacant since the middle of last year. I was informed that vacancies exist throughout the office. The UN has to speed up its recruitment process, priortizing the expeditious placement of competent applicants in important jobs, rather than starving the court of staff for the overriding goal of even geographic distribution of personnel. UN member states must also help to address another problem—that of sentence enforcement. Currently, few of the African countries willing to house persons convicted by the ICTR in their jails can meet international standards for prison conditions. Of course I am not suggesting that the international community refurbish the prisons of an entire continent. But I am suggesting that perhaps there are small and reasonable steps that we can take to help.

And the US and the rest of the international community I think should support the tribunal's request for ad litum judges. They have already supported a similar request for the ICTY for the former Yugoslavia. All observers have been concerned about the pace of the tribunal. It makes sense to provide it with the capacity to move more quickly through its work.

Mr. President, must has been made in recent days of the Administration's decision to publicly push for the ICTR and ICTY to finish their work in the next few years. And the need to wrap-up the Tribunal's work is not in dispute—in my meetings with Tribunal officials, no one suggested that the Tribunal should not aim to finish its work by 2008. This consensus, however, does not change the fact that much important still remains to be done, and the tribunals will need continued support to complete it.

Some have also suggested that the existence of tribunals has given the international community a rationale for neglecting developing of indigenous justice systems in countries subject to the tribunals. And I agree that this is a pitfall that must be avoided, and I strongly support efforts to strengthen the capacity and independence of the judiciary in countries that have suffered from wide-scale human rights violations. Last week, Ambassador-at-Large for War Crimes Pierre Prosper told the House International Relations Committee that "the United States stands prepared to assist the states in rebuilding their shattered judicial systems to make them capable of dispensing truth-based justice and establishing systematic respect for the rule of law." I certainly hope he is right, because this is an indispensable element in the global effort to bring some stability to the heart of Africa. But I am not yet convinced that our actions will match this rhetoric, and I am specifically concerned that no funding is being requested in 2003 for the Great Lakes Justice Initiative. And while I am encouraged by the Rwandan Government's efforts to address the massive backlog of genocide-related cases through a system of community courts known as gacaca and believe that the international community should help the government in Kigali to ensure the integrity and efficacy of this effort, I also respect the Rwandan's decision not to attempt to try those most responsible for the genocide—known as Category One suspects—in these untested courts in which judges have very little training and where only limited safeguards exist for victims and for the accused.

Madam President, it is important to acknowledge that much of the criticism that has been leveled at the tribunal is fair, and it reflects real, and in some cases ongoing problems with the ICTR. Too often in the past, allegations of waste and mismanagement proved to be accurate, and the tribunal must exercise constant vigilance to fight corruption and abuse. Decisive steps must be taken to address the issue of fee-splitting between those on trial and defense counsel. I was pleased to learn about some of the efforts currently underway during my visit. I have raised these issues with the Chief Prosecutor, I have raised them with U.N. officials in New York, I raised them in Arusha, and I will continue to raise them. And overall, the tribunal simply has to pick up the pace of its work. I believe that this, too, is being addressed. During my visit there were three cases being heard simultaneously. And as I have mention, providing additional judges to the ICTR will help to address this problem.

Madam President, because this tribunal is so important, the international community must keep working to get it right. The ICTR still has a great deal of work to do, and the international community, including the United States, must ensure that they are operating with all the necessary support, and operating under clear demands for accountability and integrity. These two initiatives—supporting the court and demanding an end to corruption and waste—are not contradictory, they are complementary. I urge my colleagues and the administration to pursue both with equal vigor.

The PRESIDING OFFICER. The Senator from Nevada.

TRIBUTE TO PFC MATTHEW COMMONS

Mr. ENSIGN. Madam President, I rise to speak of a brave young Nevadan, PFC Matthew Commons, who was killed in combat in Afghanistan. I am humbled and grateful that he was willing to make the ultimate sacrifice to preserve our freedom.

For he is one of the noble soldiers of whom Thomas Jefferson spoke when he warned that "the tree of liberty must be refreshed from time to time, with the blood of patriots and tyrants."

In doing his duty for God and country, he gave up all so that we could grow and thrive and learn and love in the greatest Nation in the world.

He is our fallen hero. A grateful Nation should never forget, he had family, friends, and plans for the future. He was just 21 years of age, old enough to dedicate his life to protecting our country, but too young to have a family of his own.

His mother told me that one of the hardest burdens she now has to bear is the knowledge she will never get to hold Matthew's children.

Matthew was an all-American kid, growing up in Boulder City. He ran track and played soccer at Boulder City High. He was elected secretary of his senior class.

On September 11, al-Qaida terrorists attacked the United States.

On March 4, Matthew Commons sought to make sure that would never happen again.

He died to make sure that no American was left behind at the mercy of al-Qaida. His mission was a success. And his fellow soldiers endured heavy fire so that he, too, ultimately would come home from the front.

In fighting for our Nation, he ensured that we would be free.

In dying, he left in his wake the grief of those who knew and loved him, including his mother, Patricia Marek and his father, Greg Commons.

God bless you, Matthew Commons.

And God bless America.

Would the senior Senator from Nevada like to make some comments?

The PRESIDING OFFICER. The senior Senator from Nevada.

Mr. REID. Madam President, I certainly applaud my colleague from Nevada for making his heart-felt statement. I am not much for calling people when there is a tragedy. I tend to write letters. It is difficult for me to speak to people upon the loss of a loved one because it brings back memories of those loved ones of mine I have lost. So I normally just write a letter.

But I thought it was appropriate yesterday, when I learned about the death of Matthew, that I call and speak to the parents; and I did that. Certainly, it was not a pleasant call in the sense that you call and talk to grieving parents, but it was a call I will never forget.

His mother asked me if I would write her a letter. I said I would be happy to. She said: The reason I want the letter is because I will have that to refer to. I will not have my son anymore. And she broke down and cried a little bit about that.

As I just indicated, I talked to his mom, Patricia, who lives in Las Vegas. I also talked to his dad, Gregory. Gregory, as do most fathers, put up a very brave front during the first part of our conversation. Like all dads, toward the end of it, his emotions got the best of him. He shed a few tears, I know. I could tell by his voice that he was crying on the other end of the line.

I talked to him about Matthew's brothers. Matthew had three brothers. Matthew was the oldest. And his dad said: Matthew always looked out for his brothers, that if anyone tried, in any way, to get the better of his little brothers, he was always standing there making sure that they did not.

And I said to Mr. Commons: You have to explain to your sons that they have a great example to live up to because their brother gave his life for our country.

So I was saddened to see that one of those who died was from Bolder City, NV. As indicated in the Washington paper today, in their comments about his death, Matthew was the youngest of those who were killed, but the parents and the wives of the other men who were killed are grieving just as Matthew's parents, no matter where they live in this great country of ours.

But I do say that as a result of the courageous act of Matthew, who was actually going to the aid of one of his comrades, we are going to win the war on terrorism—because there are people all over America today like Matthew Commons willing to give their lives for their country.

GENETIC INFORMATION NONDISCRIMINATION ACT OF 2002

Mr. ENZI. Madam President, I rise today to join my colleagues in introducing the Genetic Information Nondiscrimination Act of 2002. I am particularly grateful to Senators SNOWE, JEFFORDS, FRIST and GREGG for their leadership on the extremely important policy matter of protecting individuals from genetic discrimination.

This bill would effectively and fairly protect against genetic discrimination in health insurance and employment. The group of members assembled to introduce this bill is bipartisan. We all worked together in the past on a bill that dealt strictly with genetic discrimination in health insurance, and today are introducing a bill that includes a new title to also protect individuals from genetic discrimination in employment. During the last Congress, our bill dealing with health insurance discrimination passed the Senate three times. I hope this new bill just has to pass once before the President can sign it into law.

As I have previously stated, I believe there is unanimous support for enacting legislation which prohibits discrimination in both health insurance and employment. The promise that genetic information holds for revolutionary advances in the diagnosis and treatment of diseases such as cancer, Parkinson's disease, heart disease and diabetes should not be hindered by fears about the discriminatory use of this information.

As a result of a lot of hard work and a hearing held by Chairman KENNEDY on February 13, 2002, we are able to introduce a bill today that reflects the cutting edge knowledge about genetic science and also reflects the current regulatory state with respect to medical records privacy. Both the original Snowe bill and the alternative Daschle bill were drafted years ago. The Human Genome has since been mapped. Comprehensive medical records privacy regulations, which will cover genetic information, have since been promulgated. And, the Equal Employment Opportunity Commission, EEOC, has since stated the need to expressly protect individuals from employment discrimination based on genetic information.

In other words, this bill provides the most informed policy to meet the goal of protecting individuals from discrimination without denying the promise of genetic science. Here are just a few examples of how our bill has been improved.

First, the definition of genetic information correctly reflects the science of genetics as the best minds know it today, not 4 years ago. Secondly, the medical records privacy regulation called for under the Kennedy-Kassebaum Health Insurance Portability and Accountability Act of 1996, HIPAA, is nearly final. The Kennedy-Kassebaum law clearly intended that genetic information be considered medical information, and, therefore, should be equally protected under the same privacy standards. The Snowe bill we're introducing today codifies that intent.

The President has also called upon Congress to pass legislation prohibiting discrimination on the basis of genetic information that is fair, reasonable and consistent with existing discrimination statutes when it comes to protecting individuals against employment discrimination. Consistency is mandated to protect the rights of employees and employers alike. Consistency is mandated to protect the carefully designed process for enforcing and redressing employment civil rights legislation.

Therefore, I believe that federal legislation prohibiting employment discrimination based on genetic information must not deviate from other employment discrimination laws, namely Title VII of the Civil Rights Act of 1964 and the Americans with Disabilities Act, with regard to enforcement and remedies.

Furthermore, we cannot enact new employment discrimination legislation without examining its interaction with existing laws. We must be careful to avoid enacting legislation that places employers between a rock and a hard place. That is, in order to comply with one law, an employer violates another. For example, an employer should not be placed in the impossible position of violating genetic discrimination legislation by virtue of its requirement to comply with the ADA or Family and Medical Leave Act. Nor should employers be held to conflicting standards governing the disclosure of genetic information.

Let me briefly address the issue of enforcement of employment discrimination claims on the basis of genetic information. Under Title VII and the ADA, Congress gave the Equal Employment Opportunity Commission the role of investigating and enforcing complaints of violations of these laws. Under both of these laws, a claimant must first file a complaint with the EEOC before being able to file a private suit in court.

The EEOC plays a critical role in the compliance with and enforcement of employment nondiscrimination laws. The EEOC's mediation activities also serve to expedite resolution of employment cases and reduce the backlog of such cases in our courts.

Federal legislation on genetic nondiscrimination that would allow a claimant to bypass the vital role that the EEOC plays undermines the efficacy of such legislation. Furthermore, what is the justification for allowing an individual claiming genetic discrimination to circumvent the complaint process that claimants of other basis of employment discrimination must follow?

With regard to remedies for employment discrimination based on genetic information, federal legislation should not disregard the remedy structure of other employment discrimination laws. The Civil Rights Act of 1991, which applies to remedies available under Title VII and the ADA, places a cap on consequential and punitive damages that is progressive with the size of the employer.

I cannot see the justification for allowing unlimited damages for employment discrimination based on genetic information. Why should someone claiming genetic discrimination, but who is asymptomatic, be able to recover greater damages than someone who is actually disabled in the present or who is a claimant of race discrimination? We must guard against enacting legislation that, in an effort to protect individuals who have been subjected to one type of discrimination, creates inequities for individuals who have been subjected to another type. Unfortunately, I read the alternative bill sponsored by Sen. DASCHLE to create just such an inequity.

The issue of confidentiality of genetic information in the employment context in relation to existing privacy laws might seem very complex. However, I think that the issue is not as complex as we make it out to be. First and foremost, an employer should not be held to conflicting legal requirements regarding the confidentiality of such information.

The HIPAA medical records privacy regulation I mentioned before governs the disclosure of all medical information, including genetic information, by health plans, health care clearinghouses and certain health care providers. Therefore, an employer who is acting in its capacity as a group health plan will be subject to the HIPAA privacy regulation. Federal legislation that prohibits discrimination in health insurance and employment on the basis of genetic information should not create confidentiality requirements for employers acting as group health plans that conflict with the privacy regulation. Again, Sen. Daschle's bill would create this kind of conflict.

On a subject as important as the use and disclosure of genetic information, we must understand and build from existing federal laws and regulations. With this foundation and the benefit of today's understanding of genetic science, I look forward to passing legislation to prohibit discrimination in health insurance and employment of the basis of genetic information.

LOCAL LAW ENFORCEMENT ACT OF 2001

Mr. SMITH of Oregon. Madam President, I rise today to speak about hate crimes legislation I introduced with Senator KENNEDY in March of last year. The Local Law Enforcement Act of 2001 would add new categories to current hate crimes legislation sending a signal that violence of any kind is unacceptable in our society.

I would like to describe a terrible crime that occurred January 30, 1993 in Wilmington, NC. A gay man was dragged from a bar and beaten. The assailants, Colin C. Hunt, 20, Patric G. Gardone, 23, and Walter G. Watkins, 26, were charged with four counts of assault in connection with the incident.

I believe that government's first duty is to defend its citizens, to defend them against the harms that come out of hate. The Local Law Enforcement Enhancement Act of 2001 is now a symbol that can become substance. I believe that by passing this legislation, we can change hearts and minds as well.

ADDITIONAL STATEMENTS

TRIBUTE TO GENERAL WILLIAM H. FAIRBROTHER.

• Mr. MCCAIN. Mr. President, I rise today to honor a great American patriot, Brigadier General William H. Fairbrother, USAF, Ret. General Fairbrother passed away on January 27th at Air Force Village II in San Antonio. My deepest sympathies go out to his wife, Patricia, and his daughters, Bonnie and Nancy.

William Herman Fairbrother was born in Endicott, NY, on March 28, 1923, the son of Lieutenant Herman and Caroline Fairbrother. He grew up on a variety of Infantry Posts, to include the Panama Canal Zone and Manila, Philippine Islands. Bill entered the United States Military Academy at West Point on a Congressional appointment from the 34th District of New York. When he arrived at West Point he knew the prepared sling, the hasty sling, and had qualified with the 30-caliber water-cooled machine gun which made it easy to shoot expert with the M1 Garand plebe year. Academics, however, were something else. With the help of "Sully's Cram School" in Washington, DC the previous year he did fairly well in the first half year. But after that it was a continuing struggle to stay proficient. Because of many moves, high school had been rushed and spotty, and four years of Academy study being rushed into three because of World War II made the task even harder. On the other hand, flying, which was his first love went smoothly. Primary flight training in Texas and then Basic and Advanced at Stewart during the three years went without problems. It was during the Plebe year that he picked up the nickname "Fair-B" in keeping with the academy tradition to reduce the spoken word to its simplest form.

Fair-B graduated with the class of 1944, the D-Day class, albeit rather far down the list. On the very next day, in the Cadet Chapel, he married his childhood sweetheart, Patricia Ross of Kenmore, New York and they lived happily ever after. P–40 and P–47 training, together with those of the class selected for the Fighter business, followed with time at many different bases, as the Service endeavored to cram as much military experience into the class as they could before sending them overseas. Shortly thereafter it was off to Ie Shima Flying P–47's against the Japanese. After the war the unit moved over to Okinawa and Patricia joined him there in 1946. They, along with many other pioneer souls, set up housekeeping in a Quonset hut. , Bonnie, his first daughter, was born in Okinawa in 1947. In December 1947, Fair-B brought the family back to the U.S. to Selfridge, Michigan. The duty was with the 56th Fighter Group flying F–80's and F–86's, where he was squadron adjutant and group adjutant. It was during this time, in 1948, that his second daughter, Nancy, was born. In 1951 it was off to Minneapolis in the Air Defense Control Center business. There he was assigned as an aircraft controller and control center chief with the 31st Air Division. Flying time was cadged from the local guard squadron, which was equipped with P–51s. Then in 1953 cold weather assignments continued, this time to Rapid City, South Dakota and the 54th Fighter Interceptor Squadron at Ellsworth Air Force Base. This was probably the happiest assignment in his career, with over two years of the time there being in command of the squadron. Initially, the airplanes were P–51s, then F84Gs and finally F-86Ds. He had always said that next to being a Captain and Fighter Squadron Flight commander, the position of Fighter Squadron Commander was the best job in the Air Force.

Exchange duty with the Royal Air Force at RAF Manby, England followed in June of 1956. The assignment was attendance at the RAF Flying College. The family thoroughly enjoyed this short tour living in the small East Anglia town of Sutton-on-Sea, going to English Schools, learning the language, dealing with pounds, schillings and pence, and driving on the left side of the road. Fair-B accumulated a respectable amount of time in British Aircraft to include the Gloster Meteor, Hawker Hunter and British Electric Canberra. In January 1957 the family arrived in Rabat Morocco. The assignment here was Chief, Combat Operations in the 316th Air Division. Further broadening and true sophistication took place during this time. Not only was the Division partially manned with French Air Force personnel but also, the family lived in a French villa. In addition, flights with the family on military aircraft up to the European continent were allowed once a year.

They took full advantage of this privilege and managed to visit Spain, Portugal, Italy, France, Germany and Switzerland during their Moroccan stay. The Division Fighter Squadrons were equipped with F–86D and F–100 aircraft so Fair-B was able to keep his hand in flying. There were many trips to Wheelus Air Force Base in Tripoli, Libya, where the squadrons went TDY for gunnery and rocketry training.

The three and a half years in North Africa went by quickly, and the return to the US happened in June 1960 with attendance at the Air War College. Following graduation from the Air War College he spent a long five years in the Pentagon, first on the Air Staff in War Plans and then as Executive Assistant in the Office of the Air Force Chief of Staff. One year with Curtis LeMay and one year with John McConnell provided rare and valuable staff experience.

After the fast pace of the Washington area, duty on the CINCPAC staff in Hawaii, starting in 1966, seemed slow indeed. Here Fair-B served on the staff of the Commander in Chief, Pacific, at Camp Smith. Not only did they take off for the weekends, but Wednesday afternoons as well. The duty was good, with many evaluation trips to the MAAG supported countries in the Far East. This, together with quarters on Hickam, and the benevolent Hawaiian weather made for a delightful tour.

Patricia stayed in Hawaii when Fair-B went to the Republic of Vietnam to join the 14th Special Operations Wing. As Vice Commander and then Commander he was kept busy monitoring the varied activities of the Wing, which were performed from nine separate bases. The little command O–2 aircraft spent a lot of time touring the country. In addition to the clandestine operations, the Wing had the AC–47 and AC–119 gunships, the psychological warfare business with O–2s and C–47s and the only armed helicopter squadron in the Air Force, flying UH–1Ns. He served the Wing from September 1969, to September 1970.

After Vietnam the next assignment as Deputy Chief of Staff at Headquarters Air Force Logistics Command at Wright-Patterson Air Force Base, Ohio with the job of DCS Distribution. The assignment was not awarded because of any logistics experience buy mainly because the boss man wanted some operational talent on the staff. The job was fascinating and of enormous scope. Fair-B jumped in with his typical enthusiasm and his performance helped in getting him promoted to Brigadier General on April 1, 1972. Separation from the Air Force came in 1974 with Fair-B being allowed to keep the wife and kids and the Air Force keeping the airplanes. His decorations and awards include the Legion of Merit (2), Distinguished Flying Cross (2) with oak leaf cluster, Air Medal (3) with two oak leaf clusters and the Meritorious Service Medal. He was a command pilot.

Fair-B and Patricia, hand-in hand then returned to Hawaii, their choice of all the places they had tried throughout the years. They moved into an apartment on Waikiki beach and then took the time to read what there wasn't time for before and work on the projects that had long ago been put aside. Other activities during this eight-year idyll included working with the House Republican Whip in the Hawaii State Legislature, activities with the Retiree Affairs Council at Hickam and work with the Oahu Chapter of the Air Force Association. 1982 found them in San Antonio, Texas, and in 1987 they made their next-to-the-last move into a cottage at Air Force Village II. Fair-B served three years as a Trustee on the Board of the Air Force Village Foundation, and over three years as a Director on the Air Force Village II Board of Directors.

Fair-B is survived by his wife of 57 years Patricia; daughters and sons-in-law Bonnie and Jerold Kreidler, Nancy and James Councilor and granddaughters Katherine and Patricia Councilor.

While it can be said he never single handedly moved the world around, Fair-B certainly participated in many worthwhile events that did. As a result, those who knew him, well can look back over his busy years and say, "Not too shabby, old son, not too shabby." •

IN APPRECIATION FOR MAJOR GENERAL PHILIP G. KILLEY

• Mr. JOHNSON. Madam President, today I express appreciation for the work that Major General Philip G. Killey has done as the Adjutant General for the South Dakota National Guard. Today, General Killey and other members of the National Guard come up to the Capitol for their annual trip to Washington, and I wanted to take this time to thank the general for the terrific leadership he has provided to the Guard over the past four years.

General Killey reports that South Dakota has continued its high rankings in terms of readiness of its Guard and Reserve units. South Dakota's units are also tops in the Nation in the quality of its new recruits. I commend the South Dakota Guard for its continued excellence, and General Killey for his leadership, which has led to the maintenance of this high standard. National rankings only confirm the quality that has come to be expected of the Guard and Reserve of a great State.

Most South Dakotans know at least one of the 4,500 current members of the South Dakota Guard and Reserves or the thousands of former Guardsmen and Reservists. Sometimes, the connection is even more direct. Before joining the Army, my oldest son Brooks was a member of the South Dakota Army Guard in Yankton.

Almost every community in my State benefits from the work of these Guardsmen. Following the tragedies of September 11, Guardsmen were called to assist in the campaign against terrorism and have performed security duties at airports around the state. From Aberdeen to Yankton, the Guard and Reserves are active members of the South Dakota community.

In addition to the support the Guard and Reserves give to South Dakota, they have also supported overseas operations including those in Central America, the Middle East, Europe, and Asia. The South Dakota Air Guard performed admirably in their deployment to the "no-fly zone" over Iraq late last year.

These latest activities, and the professionalism that our South Dakota Guardsmen have shown, are a testimony to the leadership of General Killey. Before becoming the Adjutant General in 1998, General Killey served with distinction in both the active duty Air Force and in the South Dakota National Guard.

General Killey received his commission in 1963 through Officer Training School, at Lackland AFB in Texas. He served a tour in Southeast Asia in 1967–1968 flying the F–4 with the 8th Tactical Fighter Wing at Ubon Royal Thai Air Force Base, Thailand. He left active duty in 1969 and joined the Air National Guard in 1970. He held various positions with the South Dakota Air National Guard before becoming the Adjutant General. He was recalled to active duty as director of the Air National Guard from 1988 until 1994. General Killey was the first Guardsman to serve as commander, 1st Air Force, Air Combat Command, and Continental United States North American Aerospace Defense Command Region, Tyndall Air Force Base, Florida from 1994 until 1998.

I commend General Killey for his many years of service, and thank him for all that he has done for this nation and for our great state of South Dakota.•

TRIBUTE TO COLONEL EDWARD D. BISHOP

• Mr. SESSIONS. Madam President, it has come to my attention that Colonel Edward D. Bishop is retiring after 30 years of exemplary active military service in the United States Army. He served his country with dignity, honor, courage and integrity.

Colonel Bishop is concluding his career as the Chief, Congressional Affairs, U.S. Army Materiel Command, AMC, from August 2000 to May 2002. The Colonel's extraordinary insight into congressional affairs has greatly assisted the United States Army Materiel Command with the tough before the United States Congress. AMC is the one place in the Army where technology, acquisition, and logistics are integrated to assure Army readiness. Colonel Bishop as the Chief, Congressional Affairs, AMC was able to work the hard issues for the Army in order for AMC to continue to sustain the nation's defense industrial base.

Ed Bishop is a world-class logistician who served our nation in numerous logistical assignments throughout his career. From January 1996 to August 2000, he was assigned as the Director of the United States Central Command, CENTCOM, Liaison Office. He was the commands representative to the Office of the Secretary of Defense, the Joint Staff, the Service Staffs, Congress, and numerous Federal Agencies on political-military, operational, and logistics issues affecting 25 countries in Southwest Asia, Central Asia, and Horn of Africa.

Ed's other assignments included Division Chief in the Joint Logistics and Security Assistance Directorate from June 1993 to January 1996. During this period, he negotiated host nation support agreements with selected Gulf countries, monitored the readiness of prepositioned materiel, and provided interface with CENTCOM and the Joint Staff Crisis Action Team. Prior to this period, Col. Bishop was assigned to U.S. Forces Command and Joint Task Force, Somalia.

Colonel Bishop is a native of the great state of Alabama and a distinguished graduate of Jacksonville State University, Jacksonville, Alabama in 1972, and commissioned as a Second Lieutenant of Infantry. Later, he earned a Master of Business Administration, MBA, in Business Administration in 1982, from Florida Institute of Technology, and is a graduate of the Industrial College of Armed Forces at Fort McNair, Washington, D.C.

Colonel Bishop's military decorations include the Defense Superior Service Medal, Army Meritorious Service Medal with five oak leaf clusters, a Joint Service Commendation Medal, Army Commendation Medal with three oak leaf clusters, the Army Achievement Medal, the United Nations Service Medal, and the Army Humanitarian Service Medal. Throughout his career, Colonel Bishop has brought astute judgment, bold recommendations and selfless service to our Army.

Mr. President, Colonel Bishop deserves the thanks and praise of the nation that he faithfully served for so long. I know the Members of the Senate will join me in wishing him, his wife, Linda, two sons, Ryan and Troy, their daughter-in-law Sonya, and their lovely grandson Dylan, all the best in the years ahead.●

TRIBUTE TO ROBERT HODGES, THE OLDEST AMERICAN VETERAN

● Mr. EDWARDS. Madam President, today I pay tribute to an incredible North Carolinian, Mr. Robert Hodges.

On Friday, the Department of Veterans Affairs will host a ceremony in Pamlico County and officially recognize Mr. Hodges as the oldest American veteran. According to VA records, Mr. Hodges celebrated his 111th birthday last June. But if you ask Mr. Hodges, he'll tell you he is actually 114 years old.

As remarkable as his age is, it's not how long he's lived, but how he has lived those 111 or 114 years that is so inspiring.

Mr. Hodges is truly an example of living history. His life has been touched by almost every struggle this nation has endured. He was born in 1888, the same year Benjamin Harrison was elected President. His father, a runaway slave who lived to be 112 years old, often told him stories of the Civil War. He grew up on a former plantation in Beaufort County. He was never offered the chance for a formal education, so he helped his mother and father raise corn, cotton and peanuts on land that just decades before had been tended by slaves.

Shortly after America entered World War I, Mr. Hodges volunteered to serve his country. Mr. Hodges was one of nearly 20,000 African-American soldiers from North Carolina, men dedicated to protecting a nation that treated them as second-class citizens at best. Military life offered no escape from the racism and segregation of civilian life, but Mr. Hodges didn't let that deter him. He served his country with distinction as a medical corpsman, ordnance technician and supplymaster. Mr. Hodges even became friends with General John "Black Jack" Pershing, commander of the U.S. Allied Expeditionary Force.

Following his service, he returned home to his mother and father's farm. He married Malinda, and despite the economic hard times, the two eventually saved enough money to buy their own land and build a home in Stonewall. He and Malinda had eight children. Sadly, after more than 50 years of marriage, Malinda died in 1997.

Time has not touched his incredible spirit. In fact, if you ask him to, he can still describe his feelings at the moment he heard an orderly shout to the front lines "The war is over!"

Several years ago, a reporter covering a Veteran's Day celebration in Stonewall asked Mr. Hodges why it was so important for him to tell his story. Mr. Hodges replied because "so many people . . . didn't get to come home."

Mr. Hodges' story is remarkable. He overcame discrimination and prejudice and served his country with honor. He raised a loving family and has become a pillar of his church and community. I am proud to help tell his story of service and patriotism today, and I'm certain it will serve as an inspiration to all of us.●

CONGRATULATIONS TO ULUS JOHNSON OF SYMSONIA, KENTUCKY

● Mr. BUNNING. Madam President, today I congratulate Ulus Johnson of Symsonia, KY on being named by the Benton Kiwanis Club this year's Grand Marshal of events for the annual Tater Day Parade.

Mr. Johnson, who was with the Navy Seabees during WWII and served 28 months in the South Pacific, is believed to be the first non-Marshall Countian ever to be named Grand Marshal in he Parade's 159 years of existence. Like Mr. Johnson, Tater Day has survived the various twists and turns of history. During the 1950s and 1960s, many believed the parade was on the brink of being canceled. But with the help of friends, Ulus Johnson was able to revive the tradition of Tater Day for future generations.

Tater Day has its origins on the first Monday in April because this day also happened to be County Court Day and a good time for farmers to gather from across Kentucky in Benton to stock up on supplies, including sweet potatoes, for the upcoming planting season. They could also visit with neighbors, swap horses, dogs, knives and more than a few quality stories and tales. Johnson vividly remembers pretending to be ill on this day as a young boy so that he could miss school and attend the events of Tater Day. For many years, Johnson even drove his stagecoach to the parade for the sake of tradition, but now this item stands in a glassed-in enclosure at the rear of his home, where school children often come to learn about modes of transportation from the past. Ulus Johnson has been a vital figure for the Tater Day Parade almost his entire life and will certainly do a great job carrying on its tradition and legacy.

I once again congratulate Mr. Johnson for this honor and wish him and the rest of the participants a glorious Tater Day.●

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Ms. Evans, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting a withdrawal and sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

PRESIDENTIAL MESSAGE

Under the authority of the order of the Senate of January 3, 2001, the Secretary of the Senate, on March 5, 2002, during the adjournment of the Senate, received the following message from the President of the United States, together with the accompanying reports, which was referred as indicated:

PM-72. A message from the President of the United States, received during adjournment, transmitting, pursuant to law, a report to facilitate positive adjustment to competition from imports of certain steel products; to the Committee on Finance.

To the Congress of the United States:

In accordance with section 203(b) of the Trade Act of 1974, as amended (the "Act"), I hereby transmit documents to the Congress that describe the safeguard action that I have proclaimed on imports of certain steel products, pursuant to the authority vested in me by section 203(a)(1) of the Act and as President of the United States, and the reasons for taking that action.

George W. Bush.

The White House, *March 5, 2002.*

MESSAGES FROM THE HOUSE

At 10:49 a.m., a message from the House of Representatives, delivered by Ms. Niland, one of its reading clerks, announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 3789. An act to designate the facility of the United States Postal Service located at 2829 Commercial Way in Rock Springs, Wyoming, as the "Teno Roncalio Post Office Building."

The message also announced that the House has agreed to the following concurrent resolutions, in which it requests the concurrence of the Senate:

H. Con. Res. 338. Concurrent resolution authorizing the printing as a House document of a collection of memorial tributes made in honor of the late Gerald Solomon.

H. Con. Res. 305. Concurrent resolution permitting the use of the Rotunda of the Capitol for a ceremony to present a gold medal on behalf of Congress to former President Ronald Reagan and his wife Nancy Reagan.

The message further announced that pursuant to section 2(a) of the National Cultural Center Act (20 U.S.C. 76h(a)), amended by Public Law 107–117, the Speaker appoints the following Members of the House of Representatives to the Board of Trustees of the John F. Kennedy Center for the Performing Arts: Ms. Pryce of Ohio and Mr. Kennedy of Rhode Island.

At 10:55 a.m., a message from the House of Representatives, delivered by Ms. Niland, one of its reading clerks, announced that the House has agreed to the amendments of the Senate to the bill (H.R. 622) to amend the Internal Revenue Code 1986 to expand the adoption credit, and for other purposes, with amendments to Senate amendments pursuant to House Resolution 347, in which it requests the concurrence of the Senate.

Under the authority of the order of the Senate of January 3, 2001, the Secretary of the Senate, on today March 6, 2002, during the recess of the Senate, received a message from the House of Representatives announcing that the House has passed the following bill, without amendment:

S. 1857. An act to encourage the negotiated settlement of tribal claims.

ENROLLED BILL SIGNED

At 6:03 p.m., a message from the House of Representatives, delivered by Mr. Hays, one of its reading clerks announced that the Speaker has signed the following enrolled bill:

S. 1857. An act to encourage the negotiated settlement of tribal claims.

MEASURES REFERRED

The following bill was read the first and the second times by unanimous consent, and referred as indicated:

H.R. 3789. An act to designate the facility of the United States Postal Service located at 2829 Commercial Way in Rock Springs, Wyoming, as the "Teno Roncalio Post Office Building"; to the Committee on Governmental Affairs.

The following concurrent resolution was read, and referred as indicated:

H. Con. Res. 338. Concurrent resolution authorizing the printing as a House document of a collection of memorial tributes made in honor of the late Gerald Solomon; to the Committee on Rules and Administration.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second times by unanimous consent, and referred as indicated:

By Mrs. MURRAY (for herself, Mrs. Boxer, Ms. Cantwell, and Mr. Corzine):

S. 1990. A bill to establish a public education awareness program relating to emergency contraception; to the Committee on Health, Education, Labor, and Pensions.

By Mr. HOLLINGS (for himself, Mr. Biden, Mr. Breaux, Mr. Carper, Mr. Cleland, Mrs. Clinton, Mr. Corzine, Mr. Durbin, Mrs. Hutchison, Mr. Jeffords, Mr. Kennedy, Mr. Kerry, Mr. Leahy, Ms. Mikulski, Mr. Rockefeller, Mr. Schumer, Mr. Stevens, Mr. Torricelli, Mr. Reid, and Mrs. Feinstein):

S. 1991. To establish a national rail passenger transportation system, reauthorize Amtrak, improve security and service on Amtrak, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. KENNEDY (for himself, Mr. Bingaman, Mr. Corzine , Mrs. Boxer, Mr. Daschle, Mr. Harkin, Ms. Mikulski, Mr. Reed, Mrs. Clinton, and Mr. Durbin):

S. 1992. A bill to amend the Employee Retirement Income Security Act of 1974 to improve diversification of plan assets for participants in individual account plans, to improve disclosure, account access, and accountability under individual account plans, and for other purposes; to the Committee on Health, Education, Labor, and Pensions.

By Mrs. CARNAHAN:

S. 1993. A bill to authorize a military construction project for the construction of a Weapons of Mass Destruction Responder Training Facility at Fort Leonard Wood, Missouri; to the Committee on Armed Services.

By Mr. KERRY (for himself and Mr. Bond):

S. 1994. A bill to establish a priority preference among certain small business concerns for purposes of Federal contracts, and for other purposes; to the Committee on Small Business and Entrepreneurship.

By Ms. SNOWE (for herself, Mr. Frist, Mr. Jeffords, Mr. Enzi, Ms. Collins, Mr. Hagel, Mr. DeWine, and Mr. Gregg):

S. 1995. A bill to prohibit discrimination on the basis of genetic information with respect to health insurance and employment; to the Committee on Health, Education, Labor, and Pensions.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. DASCHLE (for himself, Mr. Lott, Mr. Reid, and Mr. Ensign):

S. Res. 217. A resolution relative to the death of the Honorable Howard W. Cannon, formerly a Senator from the State of Nevada; considered and agreed to.

ADDITIONAL COSPONSORS

S. 540

At the request of Mr. DeWine, the name of the Senator from Indiana (Mr. Bayh) was added as a cosponsor of S. 540, a bill to amend the Internal Revenue Code of 1986 to allow as a deduction in determining adjusted gross income the deduction for expenses in connection with services as a member of a reserve component of the Armed Forces of the United States, to allow employers a credit against income tax with respect to employees who participate in the military reserve components, and to allow a comparable credit for participating reserve component self-employed individuals, and for other purposes.

S. 813

At the request of Mr. Santorum, the name of the Senator from New Jersey (Mr. Torricelli) was added as a cosponsor of S. 813, a bill to amend title XVIII of the Social Security Act to increase payments under the medicare program to Puerto Rico hospitals.

S. 999

At the request of Mr. Bingaman, the name of the Senator from Arkansas

(Mr. HUTCHINSON) was added as a cosponsor of S. 999, a bill to amend title 10, United States Code, to provide for a Korea Defense Service Medal to be issued to members of the Armed Forces who participated in operations in Korea after the end of the Korean War.

S. 1007

At the request of Mr. REID, the name of the Senator from Alaska (Mr. MURKOWSKI) was added as a cosponsor of S. 1007, a bill to amend the Internal Revenue Code of 1986 to treat gold, silver, and platinum, in either coin or bar form, in the same manner as stocks and bonds for purposes of the maximum capital gains rate for individuals.

S. 1062

At the request of Mr. DURBIN, the name of the Senator from Connecticut (Mr. DODD) was added as a cosponsor of S. 1062, a bill to amend the Public Health Service Act to promote organ donation and facilitate interstate linkage and 24-hour access to State donor registries, and for other purposes.

S. 1140

At the request of Mr. HATCH, the name of the Senator from Alaska (Mr. MURKOWSKI) was added as a cosponsor of S. 1140, a bill to amend chapter 1 of title 9, United States Code, to provide for greater fairness in the arbitration process relating to motor vehicle franchise contracts.

S. 1286

At the request of Mrs. CARNAHAN, the name of the Senator from Maine (Ms. SNOWE) was added as a cosponsor of S. 1286, a bill to provide for greater access to child care services for Federal employees.

S. 1335

At the request of Mr. KENNEDY, the name of the Senator from Vermont (Mr. JEFFORDS) was added as a cosponsor of S. 1335, a bill to support business incubation in academic settings.

S. 1394

At the request of Mr. ENSIGN, the names of the Senator from North Carolina (Mr. HELMS), the Senator from South Dakota (Mr. JOHNSON), the Senator from Louisiana (Ms. LANDRIEU), and the Senator from Washington (Mrs. MURRAY) were added as cosponsors of S. 1394, a bill to amend title XVIII of the Social Security Act to repeal the medicare outpatient rehabilitation therapy caps.

S. 1607

At the request of Mr. ROCKEFELLER, the name of the Senator from Virginia (Mr. ALLEN) was added as a cosponsor of S. 1607, a bill to amend title XVIII of the Social Security Act to provide coverage of remote monitoring services under the medicare program.

S. 1739

At the request of Mr. CLELAND, the name of the Senator from Louisiana (Mr. BREAUX) was added as a cosponsor of S. 1739, a bill to authorize grants to improve security on over-the-road buses.

S. 1899

At the request of Mr. BROWNBACK, the name of the Senator from Montana (Mr. BURNS) was added as a cosponsor of S. 1899, a bill to amend title 18, United States Code, to prohibit human cloning.

S. 1917

At the request of Mr. JEFFORDS, the names of the Senator from Utah (Mr. BENNETT) and the Senator from North Dakota (Mr. CONRAD) were added as cosponsors of S. 1917, a bill to provide for highway infrastructure investment at the guaranteed funding level contained in the Transportation Equity Act for the 21st Century.

S. RES. 109

At the request of Mr. REID, the names of the Senator from Massachusetts (Mr. KERRY), the Senator from West Virginia (Mr. ROCKEFELLER), the Senator from Vermont (Mr. JEFFORDS), the Senator from Arkansas (Mrs. LINCOLN), and the Senator from Oregon (Mr. SMITH) were added as cosponsors of S. Res. 109, a resolution designating the second Sunday in the month of December as "National Children's Memorial Day" and the last Friday in the month of April as "Children's Memorial Flag Day."

S. RES. 132

At the request of Mr. CAMPBELL, the name of the Senator from Virginia (Mr. ALLEN) was added as a cosponsor of S. Res. 132, a resolution recognizing the social problem of child abuse and neglect, and supporting efforts to enhance public awareness of it.

S. RES. 206

At the request of Mr. MURKOWSKI, the name of the Senator from Alaska (Mr. STEVENS) was added as a cosponsor of S. Res. 206, a resolution designating the week of March 17 through March 23, 2002 as "National Inhalants and Poison Prevention Week."

S. RES. 207

At the request of Mr. BINGAMAN, the names of the Senator from Delaware (Mr. BIDEN), the Senator from North Carolina (Mr. EDWARDS), and the Senator from Nebraska (Mr. HAGEL) were added as cosponsors of S. Res. 207, a resolution designating March 31, 2002, and March 31, 2003, as "National Civilian Conservation Corps Day."

S. RES. 215

At the request of Mr. CLELAND, the names of the Senator from New Mexico (Mr. BINGAMAN), the Senator from Alaska (Mr. STEVENS), the Senator from Arkansas (Mrs. LINCOLN), the Senator from Louisiana (Mr. BREAUX), and the Senator from South Dakota (Mr. JOHNSON) were added as cosponsors of S. Res. 215, a resolution designating the week beginning March 17, 2002, as "National Safe Place Week."

At the request of Mr. CRAIG, the name of the Senator from Georgia (Mr. CLELAND) was added as a cosponsor of S. Res. 215, supra.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mrs. MURRAY (for herself, Mrs. BOXER, Ms. CANTWELL, and Mr. CORZINE):

S. 1990. A bill to establish a public education awareness program relating to emergency contraception; to the Committee on Health, Education, Labor, and Pensions.

Mrs. MURRAY. Madam President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1990

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Emergency Contraception Education Act".

SEC. 2. FINDINGS.

Congress finds that—

(1) each year, 3,000,000 pregnancies, or one half of all pregnancies, in the United States are unintended, and half of all of these unintended pregnancies end in abortion;

(2) the Food and Drug Administration has declared emergency contraception to be safe and effective in preventing unintended pregnancy, reducing the risk by as much as 89 percent;

(3) the most commonly used forms of emergency contraception are regimens of ordinary birth control pills taken within 72 hours of unprotected intercourse or contraceptive failure;

(4) emergency contraception, also known as post-coital contraception, is a responsible means of preventing pregnancy that works like other hormonal contraception to delay ovulation, prevent fertilization or prevent implantation;

(5) emergency contraception does not cause abortion and will not affect an established pregnancy;

(6) it is estimated that the use of emergency contraception could cut the number of unintended pregnancies in half, thereby reducing the need for abortion;

(7) emergency contraceptive use is the United States remains low, and 9 in 10 women of reproductive age remain unaware of the method;

(8) although the American College of Obstetricians and Gynecologists recommends that doctors routinely offer women of reproductive age a prescription for emergency contraceptive pills during their annual visit, only 1 in 5 ob/gyns routinely discuss emergency contraception with their patients, suggesting the need for greater provider and patient education;

(9) in light of their safety and efficacy, both the American Medical Association and the American College of Obstetricians and Gynecologists have endorsed more widespread availability of emergency contraceptive pills, and have recommended that dedicated emergency contraceptive products be available without a prescription;

(10) Healthy People 2010, published by the Office of the Surgeon General, establishes a

10-year national public health goal of increasing the proportion of health care providers who provide emergency contraception to their patients; and

(11) public awareness campaigns targeting women and health care providers will help remove many of the barriers to emergency contraception and will help bring this important means of pregnancy prevention to American women.

SEC. 3. EMERGENCY CONTRACEPTION EDUCATION AND INFORMATION PROGRAMS.

(a) DEFINITIONS.—In this section:

(1) EMERGENCY CONTRACEPTION.—The term "emergency contraception" means a drug or device (as the terms are defined in section 201 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321)) that is—

(A) used after sexual relations; and

(B) prevents pregnancy, by preventing ovulation, fertilization of an egg, or implantation of an egg in a uterus.

(2) HEALTH CARE PROVIDER.—The term "health care provider" means an individual who is licensed or certified under State law to provide health care services and who is operating within the scope of such license.

(3) INSTITUTION OF HIGHER EDUCATION.—The term "institution of higher education" has the same meaning given such term in section 1201(a) of the Higher Education Act of 1965 (20 U.S.C. 1141(a)).

(4) SECRETARY.—The term "Secretary" means the Secretary of Health and Human Services.

(b) EMERGENCY CONTRACEPTION PUBLIC EDUCATION PROGRAM.—

(1) IN GENERAL.—The Secretary, acting through the Director of the Centers for Disease Control and Prevention, shall develop and disseminate to the public information on emergency contraception.

(2) DISSEMINATION.—The Secretary may disseminate information under paragraph (1) directly or through arrangements with nonprofit organizations, consumer groups, institutions of higher education, Federal, State, or local agencies, clinics and the media.

(3) INFORMATION.—The information disseminated under paragraph (1) shall include, at a minimum, a description of emergency contraception, and an explanation of the use, safety, efficacy, and availability of such contraception.

(c) EMERGENCY CONTRACEPTION INFORMATION PROGRAM FOR HEALTH CARE PROVIDERS.—

(1) IN GENERAL.—The Secretary, acting through the Administrator of the Health Resources and Services Administration and in consultation with major medical and public health organizations, shall develop and disseminate to health care providers information on emergency contraception.

(2) INFORMATION.—The information disseminated under paragraph (1) shall include, at a minimum—

(A) information describing the use, safety, efficacy and availability of emergency contraception;

(B) a recommendation regarding the use of such contraception in appropriate cases; and

(C) information explaining how to obtain copies of the information developed under subsection (b), for distribution to the patients of the providers.

(d) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this section, $10,000,000 for each of fiscal years 2003 through 2007.

By Mr. HOLLINGS (for himself, Mr. BIDEN, Mr. BREAUX, Mr. CARPER, Mr. CLELAND, Mrs. CLINTON, Mr. CORZINE, Mr. DURBIN, Mrs. HUTCHISON, Mr. JEFFORDS, Mr. KENNEDY, Mr. KERRY, Mr. LEAHY, Ms. MIKULSKI, Mr. ROCKEFELLER, Mr. SCHUMER, Mr. STEVENS, Mr. TORRICELLI, Mr. REID, and Mrs. FEINSTEIN):

S. 1991. To establish a national rail passenger transportation system, reauthorize Amtrak, improve security and service on Amtrak, and for other purposes; to the Committee on Commerce, Science, and Transportation.

Mr. HOLLINGS. Madam President, I rise today to introduce the National Defense Rail Act on behalf of myself and some 19 co-sponsors. This legislation will establish a strong and efficient national passenger rail system. For far too long, we have neglected investing in our Nation's passenger rail system. We have taken an active responsibility in developing the infrastructure of all other modes of transportation, whether it has been federally funding the development of the interstate highway system, subsidizing airport construction, or taking the responsibility for dredging harbors and channels or building locks and dams. Now it is time to build a world class passenger railroad system in the United States. We know it can be done. Japan and France provide two models of successful passenger railroad service. The time to move ahead is now. We cannot wait for highways and airports to become so clogged that they cannot operate any longer. Rail systems are not built in a day. We need to engage in long-term planning to address future passenger transportation growth and show forethought in crafting transportation solutions—not wait for an impending crisis. My legislation provides the vision to begin to do this.

The atrocious events of September 11, 2001, and the aftermath which followed, exposed the vulnerability of our society and our economy when transportation choices are limited and our mobility is diminished. In the aftermath of the horrific attack on the World Trade Center and the Pentagon, we were forced to adjust to a transportation system that was without access to aviation. That should make us all evaluate the problems inherent in a policy that results in overall dependence on any one particular mode of transportation. We need to have a more balanced system of transportation for passengers in this country. Our economy depends on it; our travelers deserve it; and our roads and airports could operate more efficiently in a balanced system.

After the Federal Aviation Administration grounded all flights following the terrorist attacks on September 11, 2001, travelers flocked to Amtrak. Whether people had to travel for business, to help with rescue efforts, or just to get home, Amtrak kept our American citizens moving during a time of national emergency.

The situation not only proved that Amtrak works, but that passenger rail is a critical part of our transportation infrastructure during a national emergency or security crisis. Amtrak provided a critical transportation link, carrying 35,000 passengers along the Northeast corridor every day, and hundreds of extra carloads of mail for the U.S. Postal Office in the days following the terrorist attacks.

Transportation security—an essential part of our national security—requires a balanced and competitive system of transportation alternatives. In September, we found that our dependence on the aviation system almost crippled us. We cannot afford to rely on any single mode of transportation; we need to ensure that we have a balanced system that includes a sound passenger rail system. We also know that passenger railroads use less fuel per passenger mile than highway vehicles and commercial airlines. During these times of oil-consciousness, a larger presence of passenger rail in our transportation system would reduce our Nation's dependence on foreign oil.

Passenger railroads, the interstate highway system, and our national aviation network have all taken different paths to their current roles in our national transportation system. The tales of their development stand in quite a stark contrast from each other.

The interstate highway system has received significant attention and federal funding since the construction of the Lincoln Highway in 1913 and the Rural Post Roads Act of 1916, and later during World War II with the Federal Highway Act of 1944. It was not until 1956, however, that the Government began heavily promoting highway transportation with the passage of the Federal Aid Highway Act of 1956. The act established a Highway Trust Fund based upon Federal user taxes, in order to finance up to 90 percent of State construction costs of the $25 billion plan to pay for new roads, and the construction of the Eisenhower National Interstate and Defense Highway System.

Similar policies and Federal attention for aviation resulted in a strengthened infrastructure, and follows much the same story of the highways system.

Passenger rail service was once a vital instrument in the transportation needs of our Nation. For instance, during World War II, not only did the railroads transport 90 percent of all defense freight, but also 97 percent of all defense personnel on their way to theaters of action. By the end of the war, railroads accounted for three-quarters of the common carrier share of intercity traffic, with airplanes and buses sharing the remaining quarter of traffic. However, with national focus turned to aviation and highways, by the late 1960s most rail companies were petitioning the Government to discontinue passenger services because of losses.

Amtrak was created as a Federal corporation in order to relieve the railroad industry of these unprofitable passenger operations, and in the interest of maintaining a national passenger rail network. But in retrospect, Amtrak was set up not to thrive and expand passenger rail service, but really to just maintain the status quo of 30 years ago. That attitude persists even today. Since 1971, Amtrak has received only $25 billion in public subsidies; during that period, the United States invested $750 billion on highways and aviation.

So one problem becomes all too clear—that U.S. passenger rail infrastructure has no stable funding source in contrast to highways, aviation, and transit. In fact, per capita spending on passenger rail is much lower than many other countries: the U.S. ranks behind Britain, France, Japan, Canada, Luxembourg, Austria, Switzerland, Belgium, Sweden, Denmark, Italy, Ireland, Spain, Norway, Czech Republic, Finland, Slovakia, Portugal, Poland, South Africa, Greece, and Estonia. Imagine that of the 23 industrialized nations with rail service, we are at the bottom. Including these countries, no passenger rail service in the world has built and operated a passenger rail system at a profit. All have required Government support for construction and maintenance, or operating support, or both. That same principle holds true for highways and aviation, which have required substantial Federal spending since their beginning and continue to receive generous Federal subsidies today.

Those who want passenger rail to operate without Federal assistance—ultimately forcing more travelers onto cars, buses and airplanes—argue that we should not "subsidize" passenger rail. But we subsidize the building of roads and highways with tax dollars. We subsidize the building of airports and pay for all of the equipment and people needed to run our air traffic control system. We consider those subsidies to be worthwhile investments in our economy and our quality of life. We must make the same investment to create a world-class passenger rail system in order to see the same kinds of benefits.

While that argument should stand on its own, here's something the highway and airline crowd can take to the bank: moving more short-haul travelers to rail service reduces congestion on our already overcrowded highways and eases congestion at airports. It also provides real competition to airlines on short-haul trips.

Over the past 30 years, the lack of investment and attention to the needs of passenger rail infrastructure has resulted in a weak passenger rail network, and has caused a strain on the capacity of other modes of transportation in many areas of the country. The Amtrak Reform and Accountability Act of 1997, and preceding statutes, resulted in creating conflicting missions for Amtrak: serve a public function by operating unprofitable long-distance routes, but also attempt to operate at a profit. To add insult to injury, Amtrak has been forced to delay capital improvement projects having important long-term benefits in order to attempt to meet the mandate of the 1997 Act. Congress passed this misguided law in 1997, requiring Amtrak to operate without government support by the end of fiscal year 2002. But there is no truly national passenger train service in the world that makes a profit. Requiring Amtrak to make a profit has forced the railroad to forgo long-term capital investments in favor of short-term, bond payment shell games. Instead of investing in modern trains and infrastructure upgrades, Amtrak was forced to mortgage Penn Station just to pay the electric bill.

From this, it is evident that we need to reevaluate our Nation's rail passenger policy, and clearly define a role for Amtrak. A strong Federal role was required to establish the interstate highway system and the Federal aviation network. And now Federal investment in passenger rail infrastructure is critical; once again, Federal leadership is required to address the needs of a reliable, safe, secure passenger rail network.

This legislation provides a blueprint for the future of passenger rail in the United States. The bill will help develop high-speed rail corridors, which are the building blocks for a national passenger rail system. This will allow regional transportation solutions to play a part in the national system. It will also aid in the development of short distance corridors between larger urban centers, as well as provide funding to preserve longer distance routes for those communities that do not have the population densities to merit air service—sometimes the train is their only alternative to driving. Finally, it will provide Amtrak with the tools and funding it needs to operate efficiently.

This legislation authorizes $1.255 billion in emergency spending for Amtrak's security and life safety needs. Similar language was included in the Rail Security Act, S. 1550, which was favorably reported by the committee on October 17, 2001. In that legislation, we authorized funds to be spent on immediate rail security needs, such as hiring more police officers across the entire Amtrak system and modernizing the safety infrastructure of old tunnels.

This bill will give the Federal Government the script for the role it needs to play in establishing a national rail passenger system. It would not require any State contribution, and would give preference to projects having right-of-way dedicated to passenger rail, involving high-speed passenger service of 125 mph, although operations of 90 mph speeds or more would be eligible for funding, and those connecting to other modes of passenger transportation, including airports.

The bill authorizes $1.5 billion annually for corridor development. These funds are needed for infrastructure acquisition, highway-rail grade crossing improvement/elimination, acquisition of rolling stock and track and signal equipment. Development of a national passenger rail system carries a high cost, and the Federal Government must take the lead role in funding it.

This bill will also fund $35 billion in loan guarantees. This money will dramatically expand the current Railroad Rehabilitation & Infrastructure Financing loan and loan guarantee program. But we also must restructure that program. Since it was created in 1998 as part of TEA–21 bill, the program has processed only a few loans due to unreasonable constraints imposed by OMB. Our bill eliminates the artificial limits on loan amounts, impossible collateral requirements, and unworkable loan cohort structures.

This bill identifies existing high-speed corridors in 29 States and the District of Columbia for priority consideration. Many of these corridors are in areas where people are now driving cars or taking airplanes on trips of 300 miles or less. In these areas, like the East Coast, travelers could take a high-speed train instead and arrive at about the same time. But right now they don't have that rail option, and they won't until we build it.

The passenger railroad system that has worked well in the Northeast can work in other highly-congested areas of the country: the South, the Midwest, California and the Northwest. Thirty years ago, those areas did not have the population to support high-speed intercity rail. But today those areas are growing by leaps and bounds. As the highways in those areas clog up and the planes run 3 hours late, their Governors—many of them Republicans—are asking us for help to build high speed rail.

A short-term benefit of this legislation will be stimulation of the economy by providing jobs in developing new corridors. This bill ensures that fair labor standards for all projects receiving funds under it, including payment of prevailing wages and allowance of collective bargaining over wage rates.

Another immediate benefit will be the closing/improvement of highway-rail grade crossings in high-speed rail corridors. Under this bill, funds are set aside specifically for these important safety improvements.

This legislation will provide the necessary funds of $1.31 billion for Amtrak to repair and upgrade the track it owns and operates in the Northeast corridor. This corridor is a prime example of the benefits we can attain when there are transportation choices for travelers. The Northeast corridor has become an invaluable asset to our national transportation system, and it should not be left in disrepair. This bill authorizes funds to enable Amtrak to eliminate its capital backlog of projects, maintain ongoing projects to capital infrastructure, and improve capacity to accommodate projected growth in traffic. It also allows Amtrak to reinvest revenues from operations in the Northeast corridor back into the backlog of capital infrastructure projects.

In a nutshell, this is our long term plan to make passenger rail a part of our balanced transportation system. But in the short run, we must make sure Amtrak's financial foundation is strong at a time when we are relying on them more than ever. Amtrak's ridership has increased consistently, and they now carry over 22 million passengers per year. This legislation will give Amtrak the tools and funding they need to create a modern, efficient passenger railroad. The bill reauthorizes Amtrak for 5 years, and fully funds their capital needs and the operating losses with respect to long-distance service.

This legislation repeals the unrealistic operating self-sufficiency requirements. It also authorizes funding for compliance with environmental standards, and the Americans with Disabilities Act.

This legislation will further aid Amtrak to operate more efficiently. It will require Amtrak to reinvest revenues from non-passenger operations into growth projects outside the Northeast corridor. It will require revenue from the Northeast corridor to be reinvested into capital projects on the Northeast corridor. Finally, it will require an annual independent audit of Amtrak, to be reviewed by the Department of Transportation's Inspector General.

I am pleased my colleagues have joined with me in sponsoring this bill. By developing passenger rail as part of a balanced transportation system, this legislation will lead to the creation of jobs in the short run to stimulate our economy. In the long run, high-speed rail corridors will become a key foundation for our national rail passenger transportation system, which is critical to the strong backbone of a prosperous economy.

Like the interstate highway system, the benefits of passenger rail and Amtrak could be immeasurable, so we have much at stake. While I have outlined an ambitious blueprint, I keep in mind that 50 years ago, the National System of Interstate and Defense Highways was "pie in the sky." Now our successful Dwight D. Eisenhower System of Interstate and Defense Highways and national aviation network are used by many, so much that in many places they are congested and strained to capacity. We should not wait until our current transportation problems reach epidemic proportions; our economy cannot afford it.

Madam President, I ask unanimous consent that the bill and an outline of the finances of this bill be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1991

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; AMENDMENT OF TITLE 49; TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the "National Defense Rail Act".

(b) AMENDMENT OF TITLE 49.—Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or a repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of title 49, United States Code.

(c) TABLE OF CONTENTS.—The table of contents for this Act is as follows:

Sec. 1. Short title; amendment of title 49; table of contents.
Sec. 2. Findings.

TITLE I—RAIL TRANSPORTATION SECURITY

Sec. 101. Amtrak security assistance.
Sec. 102. Study of foreign rail transport security programs.
Sec. 103. Passenger, baggage, and cargo screening.
Sec. 104. Rail security.
Sec. 105. Rail transportation security risk assessment.

TITLE II—INTERSTATE RAILROAD PASSENGER HIGH-SPEED TRANSPORTATION SYSTEM

Sec. 201. Interstate railroad passenger high-speed transportation policy.
Sec. 202. High-speed rail corridor planning.
Sec. 203. Implemenation assistance.
Sec. 204. Designated high-speed rail corridors.
Sec. 205. Labor standards.
Sec. 206. Railway-highway crossings in high-speed rail corridors.
Sec. 207. Authorization of appropriations.

TITLE III—NATIONAL RAILROAD PASSENGER CORPORATION

Sec. 301. National railroad passenger transportation system defined.
Sec. 302. Extension of authorization.
Sec. 303. Additional Amtrak authorizations.
Sec. 304. Northeast Corridor authorizations.
Sec. 305. Long distance trains.
Sec. 306. Short distance trains; State-supported routes.
Sec. 307. Re-establishment of Northeast Corridor Safety Committee.
Sec. 308. On-time performance.
Sec. 309. Amtrak board of directors.
Sec. 310. Independent audit of Amtrak operations; review by DOT IG.

TITLE IV—MISCELLANEOUS

Sec. 401. Rehabilitation, improvement, and security financing.
Sec. 402. Rail passenger cooperative research program.
Sec. 403. Conforming amendments to title 49 reflecting ICC Termination Act.
Sec. 404. Applicability of reversion to Alaska Railroad right-of-way property.

SEC. 2. FINDINGS.

The Congress finds the following:

(1) Financial investment in passenger rail infrastructure is critical, and Federal leadership is required to address the needs of a reliable safe, secure passenger rail network, just as has been used in establishing the interstate highway system and the Federal aviation network.

(2) Lack of investment and attention to the needs of passenger rail infrastructure has resulted in a weak passenger rail network, and has caused a strain on the capacity of other modes of transportation in many areas of the country. According to the Department of Transportation, in 1999 the cost of wasted time and extra fuel consumption due to delays on congested roads was estimated at $78 billion.

(3) Passenger rail is an integral part of the United States transportation system, and, as can be evidenced in the Northeast Corridor, relieves the pressures of congestion on highways and at airports, and creates a more balanced system of transportation alternatives.

(4) Passenger rail service has been a vital instrument in the transportation needs of our Nation. For instance, during World War II, the privately owned, operated, and constructed railroad industry transported 90 percent of all defense freight, and 97 percent of all defense personnel transported to points of embarkation for theaters of action. By the end of the war, railroads accounted for three quarters of the share of the common carrier share of intercity traffic, with airplanes and buses sharing the remaining quarter of traffic.

(5) Significant attention and Federal funding were required to construct the Eisenhower System of Interstate and Defense Highways. The Federal Aid Highway Act of 1956 established a Highway Trust Fund based upon Federal user taxes in order to finance up to 90 percent of the costs of the $25 billion dollar highway construction plan.

(6) Federal policies with respect to investment in aviation resulted in a strengthened aviation industry and the rapid development of air passenger service, and by the late 1960's most rail companies were petitioning the Government to discontinue passenger services because of losses.

(7) Amtrak was established in 1971 by the Rail Passenger Service Act of 1970 to provide passenger rail services in the United States as a public service; at the time of Amtrak's formation, freight railroads were losing money on unprofitable passenger rail operations. Since 1971 Amtrak has received only $25 billion in public subsidies; during that period, the United States invested $750 billion on highways and aviation.

(8) The Amtrak Reform and Accountability Act of 1997, and preceding statutes, resulted in creating conflicting missions for the National Railroad Passenger Corporation of both serving a public function by operating unprofitable long-distance routes while also attempting to operate at a profit. This policy has also restricted Amtrak's profit potential on the Northeast Corridor by limiting the capital expenditures to help defray other costs.

(9) Due to a lack of capital investment, the Northeast Corridor has accumulated a backlog of repair needs, including life safety and security needs. Investment in the capital needs of the Northeast Corridor would result

in capacity improvements which would result in greater utilization of the existing infrastructure.

(10) The Department of Transportation Inspector General's 2001 Assessment of Amtrak's Financial Performance and Requirements (Report #CR-2002-075) found that Amtrak's lack of available capital has impeded its efforts to achieve financial goals.

(11) In order to attempt to meet the mandate of the Amtrak Reform and Accountability Act of 1997, Amtrak has been forced to delay capital improvement projects and other projects which would produce long-term benefits.

(12) The Department of Transportation Inspector General's 2001 Assessment of Amtrak's Financial Performance and Requirements (Report #CR-2002-075) found that Amtrak's most profitable operations are on the Northeast Corridor, where Federal investment in passenger rail infrastructure has been significantly higher than anywhere else in the country.

(13) Federal investments in capital projects to support passenger rail in areas other than the Northeast Corridor would result in improved service and increase profitability.

(14) The need for a balanced interstate and international transportation system that provides a viable alternative to travel by private automobile or commercial aircraft is particularly evident after the events of September 11, 2001.

(15) As a matter of national security, a strong passenger rail network would provide travelers an alternative to highway and air travel, which could lead to reduced United States reliance on foreign oil imports.

(16) In fiscal year 2001, the United States spent less than 1 percent of all transportation modal spending on intercity passenger rail, and since 1998, Amtrak has received only $4.59 billion of the $8.42 billion it has been authorized to receive by Congress.

(17) Passenger rail in the United States has no stable funding source, in contrast to highways, aviation, and transit.

(18) Per capita spending on passenger rail is much higher in other countries than the United States and, in fact, the United States ranks behind other countries including Canada, Japan, France, Great Britain, Italy, Spain, Austria, Switzerland, Belgium, Sweden, Luxembourg, Denmark, Ireland, Norway, the Czech Republic, Finland, Slovakia, Portugal, Poland, South Africa, Greece, and Estonia.

(19) The United States needs to engage in long-term planning to foster and address future passenger transportation growth and show forethought regarding transportation solutions rather than be forced to act due to an impending crisis.

(20) It is in the national interest to preserve passenger rail service in the United States and to maintain the solvency of the National Railroad Passenger Corporation.

(21) Long-term planning and support for passenger rail will help offset the emerging problems created by transportation congestion, and contribute to a cleaner and more environmentally-friendly transportation system.

(22) A comprehensive re-evaluation of our nation's rail passenger policy is required and a clearly defined role for Amtrak and a connected rail passenger network must be established.

(23) The Federal government must take the primary responsibility for developing national railroad passenger transportation infrastructure, and help ensure that it functions as an efficient network. Privatization of the rail passenger industry in Great Britain has been disastrous and passenger service has suffered overall.

(24) The Nation should be afforded the opportunity to receive safe, efficient, and cost-effective rail passenger services, taking into account all benefits to the Nation as a whole.

TITLE I—RAIL TRANSPORTATION SECURITY

SEC. 101. AMTRAK SECURITY ASSISTANCE.

(a) INFRASTRUCTURE SECURITY.—The following amounts are authorized to be appropriated to the Secretary of Transportation for the use of Amtrak for fiscal year 2003:

(1) $26,000,000 for tunnel, bridge, electric traction, and tower security, including closed circuit television cameras, vehicle barriers, lighting, and fencing, of which $19,725,000 shall be obligated or expended on the Northeast Corridor and $6,275,000 shall be obligated or expended outside the Northeast Corridor.

(2) $137,370,000 for interlocking security needs, including closed circuit television cameras, lighting, fencing and vehicle barriers, of which 50 percent shall be obligated or expended on the Northeast Corridor and 50 percent shall be obligated or expended outside the Northeast Corridor.

(3) $12,525,000 for equipment facility security, including closed circuit television cameras, lighting, and vehicle barriers, of which $4,175,000 shall be obligated or expended on the Northeast Corridor and $8,350,000 shall be obligated or expended outside the Northeast Corridor.

(4) $22,140,000 for yard and terminal security, including closed circuit television cameras, lighting, fencing and vehicle barriers, of which $9,225,000 shall be obligated or expended on the Northeast Corridor and $12,915,000 shall be obligated or expended outside the Northeast Corridor.

(5) $2,940,000 for mail and express facilities security, including closed circuit television cameras, lighting, fencing, and vehicle barriers, of which $1,470,000 shall be obligated or expended on the Northeast Corridor and $1,470,000 shall be obligated or expended outside the Northeast Corridor.

(6) $20,125,000 for station security, including closed circuit television cameras, x-ray machines, lighting, fencing and vehicle barriers, of which $7,000,000 shall be obligated or expended on the Northeast Corridor and $13,125,000 shall be obligated or expended outside the Northeast Corridor.

(7) $538,000 for employee identification systems, including improved technology for badges issued to employees and visitors controlled through a centralized database.

(8) $75,000 for bomb-resistant trash containers, of which 50 percent shall be obligated or expended on the Northeast Corridor and 50 percent shall be obligated or expended outside the Northeast Corridor.

(9) $5,800,000 for a passenger information retrieval system to capture security information, create watchlists, and an online history of passengers, of which 50 percent shall be obligated or expended on the Northeast Corridor and 50 percent shall be obligated or expended outside the Northeast Corridor.

(10) $6,200,000 for an incident tracking system to create and maintain an electronic database of data on criminal and operational incidents, of which 50 percent shall be obligated or expended on the Northeast Corridor and 50 percent shall be obligated or expended outside the Northeast Corridor.

(11) $4,300,000 for upgrades to ticket kiosks for photo imaging for identification purposes, of which 50 percent shall be obligated or expended on the Northeast Corridor and 50 percent shall be obligated or expended outside the Northeast Corridor.

(12) $16,750,000 for an incident command system to serve as a second command center and a disaster recovery command site, of which $5,000,000 shall be obligated or expended on the Northeast Corridor and $11,750,000 shall be obligated or expended outside the Northeast Corridor.

(13) $5,000,000 for train locator and tracking systems to provide GPS coordinates for all locomotives, of which 50 percent shall be obligated or expended on the Northeast Corridor and 50 percent shall be obligated or expended outside the Northeast Corridor.

(14) $120,000 for a notification system for integration of GPS information into the central computer systems, of which 50 percent shall be obligated or expended on the Northeast Corridor and 50 percent shall be obligated or expended outside the Northeast Corridor.

(15) $1,245,000 for mail and express shipment software to identify each shipment positively before it is transported by rail, of which $405,000 shall be obligated or expended on the Northeast Corridor and $840,000 shall be obligated or expended outside the Northeast Corridor.

(16) $1,211,000 for mail and express tracking deployment to identify the status of each rail shipment.

(b) SECURITY OPERATIONS.—The following amounts are authorized to be appropriated to the Secretary of Transportation for the use of Amtrak for fiscal year 2003:

(1) $354,000 for hiring 4 police officers, each of whom is to be dedicated to a specific region of the United States, to provide intelligence-gathering and analysis, conduct crime-mapping assessments throughout the entire system, work with law enforcement to prevent terrorist acts and reduce Amtrak's vulnerability, of which 50 percent shall be obligated or expended on the Northeast Corridor and 50 percent shall be obligated or expended outside the Northeast Corridor.

(2) $10,411,000 for the hiring of 150 patrol officers and 48 specialized personnel, of whom 101 would be deployed on the Northeast Corridor and 97 outside the Northeast Corridor.

(3) $11,292,000 for the hiring of 250 security officers, of whom 147 would be deployed on the Northeast Corridor and 103 outside the Northeast Corridor.

(4) $1,828,000 for the hiring of 20 canine bomb teams, of which 14 are to be deployed outside the Northeast Corridor and 10 are to be deployed to mail and express facilities.

(5) $30,761,000 for 90 infrastructure security inspectors to inspect the rights-of-way, bridges, buildings, tunnels, communications and signaling equipment, fencing, gates, barriers, lighting, catenary system, and other security features, of which $21,000,000 is to be obligated or expended on the Northeast Corridor and $10,000,000 is to be obligated or expended outside the Northeast Corridor.

(6) $2,990,000 to expand aviation capabilities for security coverage and patrol capabilities, including equipment, staff, and facilities, of which $997,000 is to be obligated or expended on the Northeast Corridor and $1,993,000 is to be obligated or expended outside the Northeast Corridor.

(7) $1,095,000 for the leasing of 150 vehicles and 10 bicycles to support patrol capabilities, of which $569,000 is to be obligated or expended on the Northeast Corridor and $526,000 is to be obligated or expended outside the Northeast Corridor.

(8) $669,000 for 6 management level positions with responsibility for direction, control, implementation, and monitoring of security systems, including the deployment of the 250 security officers throughout the Amtrak system, of which $446,000 is to be obligated or expended on the Northeast Corridor and $223,000 is to be obligated or expended outside the Northeast Corridor.

(9) $980,000 for applicant background investigations, of which 50 percent shall be obligated or expended on the Northeast Corridor and 50 percent shall be obligated or expended outside the Northeast Corridor.

(10) $457,000 for rapid response teams to respond to and prepare for on-site consequence management, all of which shall be obligated or expended outside the Northeast Corridor.

(c) Equipment Security.—

(1) In general.—The following amounts are authorized to be appropriated to the Secretary of Transportation for the use of Amtrak for fiscal year 2003:

(A) $1,755,000 to provide two-way communication devices for all Amtrak conductors.

(B) $3,000,000 for 2 mobile emergency command and communication units and rapid response teams, 1 to be located in the Midwest and 1 on the West Coast.

(C) $651,000 for 200 to 400 radioactive material detectors to be deployed system-wide, of which $231,000 is to be obligated or expended on the Northeast Corridor and $420,000 is to be obligated or expended outside the Northeast Corridor.

(D) $4,000,000 for hand-held bomb detectors for use by police to inspect baggage and packages.

(E) $1,400,000 to screen express packages before being placed on trains.

(F) $1,305,000 for secure locking devices on mail and express cars that have satellite-monitoring capability.

(G) $10,234,000 for video recording systems on road locomotives, of which $4,859,000 is to be obligated or expended on the Northeast Corridor and $5,375,000 is to be obligated or expended outside the Northeast Corridor.

(H) $6,712,000 to acquire and install satellite-based technology to shut down any locomotive that is not under the control of its crew.

(I) $4,320,000 to install 10 new communications stations to enable radio communications in remote locations and 12 satellite receivers.

(J) $4,000,000 for 4 self-propelled high-speed rail cars designated for selective patrol and enforcement functions, including critical incident response, dignitary protection, and roving rail security inspections.

(2) Allocation.—Except as provided in subparagraphs (B), (C), and (G) of paragraph (1), 50 percent of any amounts appropriated pursuant to paragraph (1) shall be obligated or expended on the Northeast Corridor and 50 percent of such amounts shall be obligated or expended outside the Northeast Corridor.

(d) Availability of Funds.—Amounts appropriated pursuant to subsections (a), (b), and (c) shall remain available until expended.

(e) Prohibition on Use of Equipment for Employment-Related Purposes.—An employer may not use closed circuit television cameras purchased with amounts authorized by this section for employee disciplinary or monitoring purposes unrelated to transportation security.

SEC. 102. STUDY OF FOREIGN RAIL TRANSPORT SECURITY PROGRAMS.

(a) Requirement for Study.—Not later than June 1, 2003, the Comptroller General shall carry out a study of the rail passenger transportation security programs that are carried out for rail transportation systems in Japan, member nations of the European Union, and other foreign countries.

(b) Purpose.—The purpose of the study shall be to identify effective rail transportation security measures that are in use in foreign rail transportation systems, including innovative measures and screening procedures determined effective.

(c) Report.—The Comptroller General shall submit a report on the results of the study to Congress. The report shall include the Comptroller General's assessment regarding whether it is feasible to implement within the United States any of the same or similar security measures that are determined effective under the study.

SEC. 103. PASSENGER, BAGGAGE, AND CARGO SCREENING.

(a) Requirement for Study and Report.—The Secretary of Transportation shall—

(1) study the cost and feasibility of requiring security screening for all passengers, baggage, and mail, express, and other cargo on Amtrak trains; and

(2) report the results of the study, together with any recommendations that the Secretary may have for implementing a rail security screening program to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Transportation and Infrastructure of the House of Representatives one year after the date of enactment of this Act.

(b) Pilot Program.—As part of the study under subsection (a), the Secretary shall conduct a pilot program of random security screening of passengers and baggage at 5 of the 10 busiest passenger rail stations served by Amtrak (measured by the average number of boardings of Amtrak passenger trains) and at up to five additional rail stations served by Amtrak that are selected by the Secretary. In selecting the additional train stations the Secretary shall attempt to achieve a distribution of participating stations in terms of geographic location and size.

SEC. 104. RAIL SECURITY.

(a) Secretary of Transportation.—Section 20103(a) is amended by striking "safety" and inserting "safety, including the security of railroad operations,".

(b) Rail Police Officers.—Section 28101 is amended by striking "the rail carrier" each place it appears and inserting "any rail carrier".

(c) Review of Rail Regulations.—Within 180 days after the date of enactment of this Act, the Secretary of Transportation, in consultation with the Federal Railroad Administration's Rail Safety Advisory Committee, shall review existing rail regulations of the Department of Transportation for the purpose of identifying areas in which those regulations need to be revised to improve rail safety and security.

SEC. 105. RAIL TRANSPORTATION SECURITY RISK ASSESSMENT.

(a) In General.—

(1) Assessment.—The Secretary of Transportation shall assess the security risks associated with rail transportation and develop prioritized recommendations for—

(A) improving the security of rail tunnels, rail bridges, rail switching areas, and other areas identified by the Secretary as posing significant rail-related risks to public safety and the movement of interstate commerce, taking into account the impact that any proposed security measure might have on the provision of rail service;

(B) the deployment of chemical and biological weapon detection equipment;

(C) dealing with the immediate and long-term economic impact of measures that may be required to address those risks; and

(D) training employees in terrorism response activities.

(2) Existing private and public sector efforts.—The assessment shall include a review of any actions already taken to address identified security issues by both public and private entities.

(3) Railroad crossing delays.—The Secretary shall include in the assessment an analysis of the risks to public safety and to the security of rail transportation that are associated with long delays in the movement of trains that have stopped on railroad grade crossings of highways, streets, and other roads for motor vehicle traffic, especially in major metropolitan areas. The Secretary shall include in the recommendations developed under paragraph (1) recommended actions for preventing such delays and reducing the risks identified in the analysis.

(b) Consultation; Use of Existing Resources.—In carrying out the assessment required by subsection (a), the Secretary shall—

(1) consult with rail management, rail labor, and public safety officials (including officials responsible for responding to emergencies); and

(2) utilize, to the maximum extent feasible, the resources and assistance of—

(A) the Federal Railroad Administration's Rail Safety Advisory Committee; and

(B) the Transportation Research Board of the National Academy of Sciences.

(c) Report.—

(1) Contents.—Within 180 days after the date of enactment of this Act, the Secretary shall transmit to the Senate Committee on Commerce, Science, and Transportation and the House of Representatives Committee on Transportation and Infrastructure a report, without compromising national security, containing—

(A) the assessment and prioritized recommendations required by subsection (a); and

(B) any proposals the Secretary deems appropriate for providing Federal financial, technological, or research and development assistance to railroads to assist the railroads in reducing the likelihood, severity, and consequences of deliberate acts of crime or terrorism toward rail employees, rail passengers, rail shipments, or rail property.

(2) Format.—The Secretary may submit the report in both classified and redacted formats if the Secretary determines that such action is appropriate or necessary.

(d) Authorization of Appropriations.—There are authorized to be appropriated to the Secretary $5,000,000 for fiscal year 2003 to carry out this section, such sums to remain available until expended.

TITLE II—INTERSTATE RAILROAD PASSENGER HIGH-SPEED TRANSPORTATION SYSTEM

SEC. 201. INTERSTATE RAILROAD PASSENGER HIGH-SPEED TRANSPORTATION POLICY.

(a) In General.—Chapter 261 is amended by inserting before section 26101 the following:

"§ 26100. Policy

"(a) In General.—The Congress declares that it is the policy of the United States that designated high-speed railroad passenger transportation corridors are the building blocks of an interconnected interstate railroad passenger system that serves the entire Nation.

"(b) Secretary Required To Establish National High-Speed Ground Transportation Policy.—The Secretary of Transportation shall establish the national high-speed ground transportation policy required by section 309(e)(1) of this title no later than December 31, 2002.".

(b) Conforming Amendments.—

(1) The chapter analysis for chapter 261 is amended by inserting before the item relating to section 26101 the following:

"26100. Policy.".

(2) Section 309(e)(1) is amended by striking "Within 12 months after the submission of the study required by subsection (d)," and inserting "No later than December 31, 2002,".

SEC. 202. HIGH-SPEED RAIL CORRIDOR PLANNING.

(a) In General.—Section 26101(a) is amended to read as follows:

"(a) Planning.—

"(1) In general.—The Secretary of Transportation shall provide planning assistance to States or group of States and other public agencies promoting the development of high-speed rail corridors designated by the Secretary under section 104(d) of title 23.

"(2) Secretary may provide direct or financial assistance.—The Secretary may provide planning assistance under paragraph (1) directly or by providing financial assistance to a public agency or group of public agencies to undertake planning activities approved by the Secretary.

"(3) 100 percent federal funding.—The Secretary may not require any portion of the publicly financed costs associated with eligible activities to come from non-Federal sources.

"(4) Priorities to Chicago, Atlanta, and Dallas/Fort Worth.—In determining projects to be undertaken pursuant to this paragraph, the Secretary shall give the highest priorities to undertaking planning in the vicinity of Union Station in Chicago, Illinois, in metropolitan Atlanta, Georgia, and in the Dallas/Fort Worth, Texas, area.".

(b) Conforming and Other Amendments to Section 26101.—Section 26101 is further amended—

(1) by striking subsection (c)(2) and, inserting the following:

"(2) the extent to which the proposed planning focuses on high-speed rail systems, giving a priority to systems which will achieve sustained speeds of 125 miles per hour or greater and projects involving dedicated rail passenger rights-of-way;";

(2) by inserting "and" after the semicolon in subsection (c)(12);

(3) by striking "completed; and" in subsection (c)(13) and inserting "completed.";

(4) by striking subsection (c)(14); and

(5) by adding at the end the following:

"(d) Operators and Certain Service Providers Deemed Rail Carriers.—A person that conducts rail operations, or performs catering, cleaning, construction, maintenance or other services for rail operations, funded or otherwise receiving assistance under this section is deemed to be a rail carrier for purposes of part A of subtitle IV, when so operating or performing such services.".

(c) Conforming Amendment.—Section 511(n)(1) of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 831(n)(1)) is amended by striking "125" and inserting "90".

(d) Financial Assistance To Include Loans and Loan Guarantees.—Section 26105(1) is amended by inserting "loans, loan guarantees," after "contracts,".

(e) Reinvestment of Non-passenger Operating Profit.—Amtrak shall invest any revenue from non-passenger operations in capital needs outside the Northeast Corridor.

SEC. 203. IMPLEMENATION ASSISTANCE.

(a) In General.—Chapter 261 is amended by inserting after section 26101 the following:

"§ 26101A. Implementation of corridor plans

"(a) Implementation Assistance.—

"(1) In general.—The Secretary of Transportation shall provide implementation assistance to States or group of States and other public agencies promoting the development of high-speed rail corridors designated by the Secretary under section 104(d) of title 23. The Secretary shall establish an application and qualification process and, before providing assistance under this section, make a determination on the record that the applicant is qualified and eligible for assistance under this section.

"(2) Secretary may provide direct or financial assistance.—The Secretary may provide implementation assistance under paragraph (1) directly or by providing financial assistance to a public agency or group of public agencies to undertake implementation activities approved by the Secretary.

"(3) 100 percent federal share.—The Secretary may not require any portion of the publicly financed costs associated with eligible activities to come from non-Federal sources.

"(4) Contribution of land.—Notwithstanding paragraph (3), the Secretary may accept land contributed by a State for right-of-way, without regard to whether the State acquired the land directly or indirectly through the use of Federal funds, including transfers from the Highway Trust Fund under section 9503 of the Internal Revenue Code of 1986.

"(5) Priorities to Chicago, Atlanta, and Dallas/Fort Worth.—In determining projects to be undertaken pursuant to this subsection, the Secretary shall give the highest priorities to undertaking implementation assistance in the vicinity of Union Station in Chicago, Illinois, in metropolitan Atlanta, Georgia, and in the Dallas/Fort Worth, Texas, area.

"(6) Special transportation circumstances.—In carrying out this section, the Secretary shall allocate an appropriate portion of the amounts available for implementation assistance to providing appropriate related assistance in any State the rail transportation system of which—

"(A) is not physically connected to rail systems in the continental United States; and

"(B) may not otherwise qualify for high-speed rail implementation assistance due to the constraints imposed on the railway infrastructure in that State due to the unique characteristics of the geography of that State or other relevant considerations, as determined by the Secretary.

"(b) Eligible Implementation Activities.—The following activities are eligible for implementation assistance under subsection (a):

"(1) Security planning and the acquisition of security and emergency response equipment.

"(2) Operating expenses.

"(3) Infrastructure acquisition and construction of track and facilities.

"(4) Highway-rail grade crossing eliminations and improvements.

"(5) Acquisition of rights-of-way, locomotives, rolling stock, track, and signal equipment.

"(c) Criteria for Determining Assistance for Implementation Activities.—The Secretary, in selecting recipients of assistance under subsection (a), shall—

"(1) encourage the use of positive train control technologies;

"(2) require that any project meet any existing safety regulations, and give preference to any project determined by the Secretary to have particularly high levels of safety;

"(3) encourage intermodal connectivity by locating train stations in or near airports, bus terminals, subway stations, ferry ports, and other modes of transportation; and

"(4) ensure a general regional balance in providing such assistance and avoid the concentration of a disproportionate dedication of available financial assistance resources to a single project or region of the country.

"(d) Operators and Certain Service Providers Deemed Rail Carriers.—A person that conducts rail operations, or performs catering, cleaning, construction, maintenance or other services for rail operations, funded or otherwise receiving assistance under this section is deemed to be a rail carrier for purposes of part A of subtitle IV, when so operating or performing such services.".

(b) Rulemaking Required.—Within 90 days after the date of enactment of this Act, the Secretary of Transportation shall initiate a rulemaking to create an application and qualification procedure for providing high-speed rail corridor implementation assistance under section 26101A of title 49, United States Code.

(c) Conforming Amendment.—The chapter analysis for chapter 261 is amended by inserting after the item relating to section 26101 the following:

"26101A. Implementation of corridor plans.".

SEC. 204. DESIGNATED HIGH-SPEED RAIL CORRIDORS.

(a) In General.—The Secretary of Transportation shall give priority in allocating funds authorized by section 26104 of title 49, United States Code, to designated high-speed rail corridors.

(b) Designated High-Speed Rail Corridors.—For purposes of subsection (a), the following shall be considered to be designated high-speed rail corridors:

(1) California Corridor connecting the San Francisco Bay area and Sacramento to Los Angeles and San Diego.

(2) Chicago Hub Corridor Network with the following spokes:

(A) Chicago to Detroit.

(B) Chicago to Minneapolis/St. Paul, Minnesota, via Milwaukee, Wisconsin.

(C) Chicago to Kansas City, Missouri, via Springfield, Illinois, and St. Louis, Missouri.

(D) Chicago to Louisville, Kentucky, via Indianapolis, Indiana, and Cincinnati, Ohio.

(E) Chicago to Cleveland, Ohio, via Toledo, Ohio.

(F) Cleveland, Ohio, to Cincinnati, Ohio, via Columbus, Ohio.

(3) Empire State Corridor from New York City, New York, through Albany, New York, to Buffalo, New York.

(4) Florida High-Speed Rail Corridor from Tampa through Orlando to Miami.

(5) Gulf Coast Corridor from Houston, Texas, through New Orleans, Louisiana, to Mobile, Alabama, with a branch from New Orleans, through Meridian, Mississippi, and Birmingham, Alabama, to Atlanta, Georgia.

(6) Keystone Corridor from Philadelphia, Pennsylvania, through Harrisburg, Pennsylvania, to Pittsburgh, Pennsylvania.

(7) Northeast Corridor from Washington, District of Columbia, through New York City, New York, New Haven, Connecticut, and Providence, Rhode Island, to Boston,

Massachusetts, with a branch from New Haven, Connecticut, to Springfield, Massachusetts.

(8) New England Corridor from Boston, Massachusetts, to Portland and Auburn, Maine, and from Boston, Massachusetts, through Concord, New Hampshire, and Montpelier, Vermont, to Montreal, Quebec.

(9) Pacific Northwest Corridor from Eugene, Oregon, through Portland, Oregon, and Seattle, Washington, to Vancouver, British Columbia.

(10) South Central Corridor from San Antonio, Texas, through Dallas/Fort Worth to Little Rock, Arkansas, with a branch from Dallas/Fort Worth through Oklahoma City, Oklahoma, to Tulsa, Oklahoma.

(11) Southeast Corridor from Washington, District of Columbia, through Richmond, Virginia, Raleigh, North Carolina, Columbia, South Carolina, Savannah, Georgia, and Jessup, Georgia, to Jacksonville, Florida, with—

(A) a branch from Raleigh, North Carolina, through Charlotte, North Carolina, and Greenville, South Carolina, to Atlanta, Georgia; a branch from Richmond, to Hampton Roads/Norfolk, Virginia;

(B) a branch from Charlotte, North Carolina, to Columbia, South Carolina, to Charleston, South Carolina;

(C) a connecting route from Atlanta, Georgia, to Jessup, Georgia;

(D) a connecting route from Atlanta, Georgia, to Charleston, South Carolina; and

(E) a branch from Raleigh, North Carolina, through Florence, South Carolina, to Charleston, South Carolina, and Savannah, Georgia, with a connecting route from Florence, South Carolina, to Myrtle Beach, South Carolina.

(12) Southwest Corridor from Los Angeles, California, to Las Vegas, Nevada.

(c) Other High-Speed Rail Corridors.—For purposes of this section, subsection (b)—

(1) does not limit the term "designated high-speed rail corridor" to those corridors described in subsection (b); and

(2) does not limit the Secretary of Transportation's authority—

(A) to designate additional high-speed rail corridors; or

(B) to terminate the designation of any high-speed rail corridor.

SEC. 205. LABOR STANDARDS.

(a) Employee Protection.—The Secretary of Transportation shall require as a condition of any project financed in whole or in part by funds authorized by this Act that the project be conducted in a manner that provides a fair arrangement at least as protective of the interests of employees who are affected by the project so funded as the terms imposed under arrangements reached under section 141 of the Amtrak Reform and Accountability Act of 1997 (49 U.S.C. 24706 note) on rail carriers.

(b) Labor Standards.—

(1) Prevailing wages.—The Secretary of Transportation—

(A) shall ensure that laborers and mechanics employed by contractors and subcontractors in construction work financed in whole or in part by funds authorized by this Act will be paid wages not less than those prevailing on similar construction in the locality, as determined by the Secretary of Labor under the Act of March 3, 1931 (known as the Davis-Bacon Act; 40 U.S.C. 276a et seq.); and

(B) may make such funds available with respect to construction work only after being assured that required labor standards will be maintained on the construction work.

(2) Wage rates.—Wage rates in a collective bargaining agreement negotiated under the Railway Labor Act (45 U.S.C. 151 et seq.) are deemed for purposes of this subsection to comply with the Act of March 3, 1931 (known as the Davis-Bacon Act; 40 U.S.C. 276a et seq.).

SEC. 206. RAILWAY-HIGHWAY CROSSINGS IN HIGH-SPEED RAIL CORRIDORS.

(a) In General.—The entire cost of construction of projects for the elimination of hazards of railway-highway crossings in designated high-speed rail corridors, including the separation or protection of grades at crossings, the reconstruction of existing railroad grade crossing structures, and the relocation of highways to eliminate grade crossings, may be paid from sums authorized by subsection (k). In any case when the elimination of the hazards of a railway-highway crossing can be effected by the relocation of a portion of a railway at a cost estimated by the Secretary of Transportation to be less than the cost of such elimination by one of the methods mentioned in the first sentence of this section, then the entire cost of such relocation project may be paid from sums authorized by subsection (k).

(b) Classification of Projects.—The Secretary may classify the various types of projects involved in the elimination of hazards of high-speed rail corridor railway-highway crossings, and may set for each such classification a percentage of the costs of construction which shall be deemed to represent the net benefit to the railroad or railroads for the purpose of determining the railroad's share of the cost of construction. The percentage so determined shall in no case exceed 10 per cent of such costs. The Secretary shall determine the appropriate classification of each project.

(c) Liability of Railroad.—Any railroad involved in a project for the elimination of hazards of railway-highway crossings paid for in whole or in part from sums made available under this section shall be liable to the United States for the net benefit to the railroad determined under the classification of such project made under subsection (b). That liability to the United States may be discharged by direct payment to the State transportation department of the State in which the project is located, in which case such payment shall be credited to the cost of the project. The payment may consist in whole or in part of materials and labor furnished by the railroad in connection with the construction of the project. If any such railroad fails to discharge such liability within a 6-month period after completion of the project, it shall be liable to the United States for its share of the cost, and the Secretary shall request the Attorney General to institute proceedings against such railroad for the recovery of the amount for which it is liable under this subsection. The Attorney General is authorized to bring such proceedings on behalf of the United States, in the appropriate district court of the United States, and the United States shall be entitled in such proceedings to recover such sums as it is considered and adjudged by the court that such railroad is liable for in the premises. Any amounts recovered by the United States under this subsection shall be credited to miscellaneous receipts.

(d) Survey and Schedule of Projects.—Each State shall conduct and systematically maintain a survey of all high-speed rail corridor railway-highway crossings to identify those railroad crossings which may require separation, relocation, or protective devices, and establish and implement a schedule of projects for this purpose.

(e) Funds for Protective Devices.—The Secretary shall give priority under this section to the elimination of high-speed rail corridor railway-highway grade crossings, but shall make funds authorized for obligation or expenditure under this section available for the installation of protective devices at high-speed rail corridor railway-highway crossings where appropriate.

(f) Apportionment.—The Secretary shall apportion funds available for obligation and expenditure under this section between high-speed rail corridor railway-highway crossings on the Northeast Corridor and such crossings outside the Northeast Corridor in an equitable fashion, taking into account traffic volume, traffic patterns, frequency of trains, adequacy of existing hazard warnings, and such other factors as the Secretary deems appropriate.

(g) Annual Report.—The Secretary shall report to the Senate Committee on Commerce, Science, and Transportation and the House of Representatives Committee on Transportation and Infrastructure not later than December 30 of each year on the progress being made to implement the railway-highway crossings program authorized by this section and the effectiveness of such improvements. Each report shall contain an assessment of the costs of the various treatments employed and subsequent accident experience at improved locations. The report shall include—

(1) the number of projects undertaken, their distribution by cost range, road system, nature of treatment, and subsequent accident experience at improved locations;

(2) an analysis and evaluation of the program activities in each State, including identification of any State found not to be in compliance with the schedule of improvements required by subsection (d); and

(3) recommendations for future implementation of the railway-highway crossings program under this section and section 130 of title 23, United States Code.

(h) Use of Funds for Matching.—Funds authorized to be appropriated to carry out this section may be used to provide a local government with funds to be used on a matching basis when State funds are available which may only be spent when the local government produces matching funds for the improvement of railway-highway crossings.

(i) Incentive Payments for At-Grade Crossing Closures.—

(1) In general.—Notwithstanding any other provision of this section and subject to paragraphs (2) and (3), the Secretary may make incentive payments to a local government upon the permanent closure by such government of public at-grade high-speed rail corridor railway-highway crossings under its jurisdiction.

(2) Incentive payments by railroads.—The Secretary may not make an incentive payment under paragraph (1) to a local government with respect to the closure of a crossing unless the railroad owning the tracks on which the crossing is located makes an incentive payment to the government with respect to the closure.

(3) Amount of federal incentive payment.—The amount of the incentive payment payable to a local government under paragraph (1) with respect to a crossing may not exceed the lesser of—

(A) the amount of the incentive payment paid to the government with respect to the crossing by the railroad concerned under paragraph (2); or

(B) $7,500.

(j) Coordination With Title 23 Program.—In carrying out this section, the Secretary shall—

(1) implement this section in accordance with the classification of projects and railroad share of the cost as provided in section 646.210 of title 23, Code of Federal Regulations; and

(2) coordinate the administration of this section with the program established by section 130 of title 23, United States Code, in order to avoid duplication of effort and to ensure the effectiveness of both programs.

(k) FUNDING.—Not less than 10 percent of the amounts appropriated for each fiscal year to carry out section 26101A shall be obligated or expended to carry out this section.

SEC. 207. AUTHORIZATION OF APPROPRIATIONS.

Section 26104 is amended to read as follows:

"§ 26104. Authorization of appropriations

"(a) FISCAL YEARS 2003 THROUGH 2008.—There are authorized to be appropriated to the Secretary for each of fiscal years 2003 through 2008—

"(1) $25,000,000 for carrying out section 26101;

"(2) $1,500,000,000 for carrying out section 26101A; and

"(3) $25,000,000 for carrying out section 26102.

"(b) FUNDS TO REMAIN AVAILABLE.—Funds made available under this section shall remain available until expended.

"(c) SPECIAL RULE.—Except as specifically provided in section 26101, 26101A, or 26102, no amount authorized by subsection (a) may be used for obligation or expenditure on the Boston-to-Washington segment of the Northeast Corridor while that segment is receiving Federal funds for capital or operating expenses.".

TITLE III—NATIONAL RAILROAD PASSENGER CORPORATION

SEC. 301. NATIONAL RAILROAD PASSENGER TRANSPORTATION SYSTEM DEFINED.

(a) IN GENERAL.—Section 24102 is amended—

(1) by striking paragraph (2);

(2) by redesignating paragraphs (3), (4), and (5) as paragraphs (2), (3), and (4), respectively; and

(3) by inserting after paragraph (4) as so redesignated the following:

"(5) 'national rail passenger transportation system' means—

"(A) the spine of the Northeast Corridor between Boston, Massachusetts and Washington, D.C.;

"(B) rail corridors that have been designated by the Secretary of Transportation as high-speed corridors, but only after they have been improved to permit operation of high-speed service;

"(C) long-distance routes of more than 750 miles between endpoints operated by Amtrak as of the date of enactment of the National Defense Rail Act; and

"(D) short-distance corridors or routes operated as of the date of enactment of the National Defense Rail Act, unless discontinued by Amtrak.".

(b) AMTRAK ROUTES WITH STATE FUNDING.—

(1) IN GENERAL.—Chapter 247 is amended by inserting after section 27101 the following:

"§ 24702. Transportation requested by States, authorities, and other persons

"(a) CONTRACTS FOR TRANSPORTATION.—Amtrak and a State, a regional or local authority, or another person may enter into a contract for Amtrak to operate an intercity rail service or route not included in the national rail passenger transportation system upon such terms as the parties thereto may agree.

"(b) DISCONTINUANCE.—Upon termination of a contract entered into under this section, or the cessation of financial support under such a contract, Amtrak may discontinue such service or route, notwithstanding any other provision of law.".

(2) CONFORMING AMENDMENT.—The chapter analysis for chapter 247 is amended by inserting after the item relating to section 24701 the following:

"24702. Transportation requested by States, authorities, and other persons".

SEC. 302. EXTENSION OF AUTHORIZATION.

(a) IN GENERAL.—Section 24104(a) is amended—

(1) by striking "and" in paragraph (4);

(2) by striking "2002," in paragraph (5) and inserting "2002; and"; and

(3) by inserting after paragraph (5) the following:

"(6) such sums as are authorized by this title and by the National Defense Rail Act for fiscal years 2003 through 2007,".

(b) REPEAL OF SELF-SUFFICIENCY REQUIREMENTS.

(1) TITLE 49 AMENDMENTS.—Chapter 241 is amended—

(A) by striking the last sentence of section 24101(d); and

(B) by striking the last sentence of section 24104(a).

(2) AMTRAK REFORM AND ACCOUNTABILITY ACT AMENDMENTS.—Title II of the Amtrak Reform and Accountability Act of 1997 (49 U.S.C. 24101 nt) is amended by striking sections 204 and 205.

(3) COMMON STOCK REDEMPTION DATE.—Section 415 of the Amtrak Reform and Accountability Act of 1997 (49 U.S.C. 24304 nt) is amended by striking subsection (b).

(c) LEASE ARRANGEMENTS.—Amtrak may obtain services from the Administrator of General Services, and the Administrator may provide services to Amtrak, under section 201(b) and 211(b) of the Federal Property and Administrative Service Act of 1949 (40 U.S.C. 481(b) and 491(b)) for fiscal year 2003 and each fiscal year thereafter.

(d) MISCELLANEOUS AMTRAK-RELATED AMENDMENTS.—

(1) FINANCIAL POWERS.—Section 415(d) of the Amtrak Reform and Accountability Act of 1997 by adding at the end the following:

"(3) This section does not affect the applicability of section 3729 of title 31, United States Code, to claims made against Amtrak.".

(2) APPLICATION OF D.C. CORPORATION ACT.—Section 24301(e) is amended by striking "title 5, this part, and, to the extent consistent with this part, the District of Columbia Corporation Act (D.C. Code 29-301 et seq.)" and inserting "title 5 and this part".

(3) APPLICATION OF BUY AMERICAN ACT.—Section 24305(f) is amended to read as follows:

"(f) DOMESTIC BUYING PREFERENCES.—The Buy American Act (41 U.S.C. 10a) and section 301 of the Trade Agreements Act of 1979 (19 U.S.C. 2511) apply to Amtrak.".

SEC. 303. ADDITIONAL AMTRAK AUTHORIZATIONS.

(a) EXCESS RRTA.—There are authorized to be appropriated to the Secretary of Transportation for the use of Amtrak for fiscal year 2003, and each fiscal year thereafter, an amount equal to the amount Amtrak must pay under section 3221 of the Internal Revenue Code of 1986 in fiscal years that is more than the amount needed for benefits for individuals who retire from Amtrak and for their beneficiaries.

(b) PRINCIPAL AND INTEREST PAYMENTS.—

(1) PRINCIPAL ON DEBT SERVICE.—There are authorized to be appropriated to the Secretary of Transportation for the use of Amtrak for retirement of principal on loans for capital equipment, or capital leases, the following amounts:

(A) For fiscal year 2003, $105,000,000.

(B) For fiscal year 2004, $93,000,000.

(C) For fiscal year 2005, $105,000,000.

(D) For fiscal year 2006, $108,000,000.

(E) For fiscal year 2007, $183,000,000.

(2) INTEREST ON DEBT.—There are authorized to be appropriated to the Secretary of Transportation for the use of Amtrak for the payment of interest on loans for capital equipment, or capital leases, the following amounts:

(A) For fiscal year 2003, $160,000,000.

(B) For fiscal year 2004, $157,000,000.

(C) For fiscal year 2005, $147,000,000.

(D) For fiscal year 2006, $142,000,000.

(E) For fiscal year 2007, $134,000,000.

(c) ENVIRONMENTAL COMPLIANCE.—There are authorized to be appropriated to the Secretary of Transportation for the use of Amtrak for fiscal year 2003, and each fiscal year thereafter, $30,000,000, of which one-third shall be obligated or expended on the Northeast Corridor and two-thirds shall be obligated or expended outside the Northeast Corridor, in order to comply with environmental regulations.

(d) COMPLIANCE WITH ADA REQUIREMENTS.—

(1) IN GENERAL.—There are authorized to be appropriated to the Secretary of Transportation for the use of Amtrak for each of fiscal years 2003 through 2007, $43,000,000 for access improvements in facilities and stations necessary to comply with the requirements of the Americans With Disabilities Act of 1990 (42 U.S.C. 12162), including an initial assessment of the full set of needs across the national rail passenger transportation system, of which—

(A) $10,000,000 shall be obligated or expended on the Northeast Corridor; and

(B) $33,000,000,000 shall be obligated or expended outside the Northeast Corridor, of which $15,000,000 shall be obligated or expended for long-distance trains.

(2) BEST EFFORTS REQUIREMENT.—If Amtrak fails to meet the period for compliance requirement imposed by section 242(e)(2)(A)(ii)(I) of the Americans With Disabilities Act of 1990 (42 U.S.C. 12162(e)(2)(A)(ii)(I))—

(A) it shall not be considered discrimination for purposes of section 202 of that Act (42 U.S.C. 12132) or section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) if Amtrak demonstrates to the satisfaction of the Secretary of Transportation that—

(i) Amtrak has made substantial progress toward meeting the requirements of section 242(e)(2)(A)(ii)(I) of the Americans With Disabilities Act of 1990 (42 U.S.C. 12162(e)(2)(A)(ii)(I)); and

(ii) Amtrak's failure to meet the period of compliance requirement of that section is attributable to the insufficiency of appropriated funds; and

(B) the period for compliance under section 242(e)(2)(A)(ii)(I) of the Americans With Disabilities Act of 1990 (42 U.S.C. 12162(e)(2)(A)(ii)(I)) shall be extended until—

(i) sufficient funds have been appropriated to the Secretary of Transportation for the use of Amtrak to enable Amtrak to comply fully with the requirements of that section; and

(ii) a reasonable period of time for the completion of necessary construction so funded has passed.

SEC. 304. NORTHEAST CORRIDOR AUTHORIZATIONS.

(a) IN GENERAL.—There are authorized to be appropriated to the Secretary of Transportation for the use of Amtrak for fiscal year 2003, and each fiscal year thereafter, the following amounts:

(1) **$370,000,000** for capital backlog on infrastructure on the Northeast Corridor to bring infrastructure up to state-of-good-repair, including renewal of the South End electric traction system, improvements on bridges and tunnels, and interlocking and signal system renewal.

(2) **$60,000,000** for capital backlog on fleet to bring existing fleet to a state-of-good-repair, including equipment replacement and upgrades necessary to meet current service commitments.

(3) **$40,000,000** for capital backlog on stations and facilities, including improvements to the facility and platform at the existing Penn Station, and bringing maintenance-of-way facilities up to state-of-good-repair.

(4) **$350,000,000** for ongoing capital infrastructure—

(A) to replace assets on a life-cycle basis;

(B) to ensure that a state-of-good-repair is maintained in order to meet safety and reliability standards; and

(C) to meet current service commitments.

(5) **$40,000,000** for ongoing capital fleet investment to sustain regularly scheduled maintenance, including a 120-day cycle of preventive maintenance, and heavy overhauls on a 4-year schedule, with interior enhancements as needed.

(6) **$30,000,000** for ongoing capital improvements to stations and facilities to provide for regular upgrades to stations to meet current service needs, and regular improvements to maintenance-of-equipment and maintenance-of-way facilities.

(7) **$20,000,000** for ongoing technology upgrades of reservation, distribution, financial, and operations systems, including hardware, software, infrastructure, and communications.

(b) LIFE SAFETY NEEDS.—There are authorized to be appropriated to the Secretary of Transportation for the use of Amtrak for fiscal year 2003:

(1) **$798,000,000** for the 6 New York tunnels built in 1910 to provide ventilation, electrical, and fire safety technology upgrades, emergency communication and lighting systems, and emergency access and egress for passengers.

(2) **$57,000,000** for the Baltimore & Potomac tunnel built in 1872 to provide adequate drainage, ventilation, communication, lighting, and passenger egress upgrades.

(3) **$40,000,000** for the Washington, D.C. Union Station tunnels built in 1904 under the Supreme Court and House and Senate Office Buildings to improve ventilation, communication, lighting, and passenger egress upgrades.

(c) INFRASTRUCTURE UPGRADES.—There are authorized to be appropriated to the Secretary of Transportation for the use of Amtrak for fiscal year 2003, **$3,000,000** for the preliminary design of options for a new tunnel on a different alignment to augment the capacity of the existing Baltimore tunnels.

(d) CORRIDOR GROWTH INVESTMENT.—There are authorized to be appropriated to the Secretary of Transportation for the use of Amtrak for corridor growth investments in the Northeast Corridor—

(1) For fiscal year 2003, **$200,000,000.**

(2) For fiscal year 2004, **$300,000,000.**

(3) For fiscal year 2005, **$400,000,000.**

(4) For fiscal year 2006, **$500,000,000.**

(5) For fiscal year 2007, **$600,000,000.**

(e) FINANCIAL CONTRIBUTION FROM OTHER TUNNEL USERS.—The Secretary shall, taking into account the need for the timely completion of all life safety portions of the tunnel projects described in subsection (b)—

(1) consider the extent to which rail carriers other than Amtrak use the tunnels;

(2) consider the feasibility of seeking a financial contribution from those other rail carriers toward the costs of the projects; and carriers if feasible.

(f) AVAILABILITY OF FUNDS.—Amounts appropriated pursuant to this section shall remain available until expended.

(g) REINVESTMENT OF NEC OPERATING PROFIT.—Amtrak shall invest any revenue from operations in the Northeast Corridor in capital needs of the corridor until the backlog of capital improvements are completed under Amtrak's 20-year plan.

SEC. 305. LONG DISTANCE TRAINS.

(a) IN GENERAL.—There are authorized to be appropriated to the Secretary of Transportation for the use of Amtrak for fiscal year 2003, and each fiscal year thereafter, **$360,000,000** for operating costs associated with long distance trains.

(b) CAPITAL BACKLOG AND UPGRADES.—There are authorized to be appropriated to the Secretary of Transportation for the use of Amtrak for fiscal year 2003, and each fiscal year thereafter, **$70,000,000** to reduce the capital backlog and to bring its existing fleet to a state-of-good-repair, including equipment replacement and upgrades necessary to meet current service commitments.

(c) ONGOING CAPITAL INFRASTRUCTURE INVESTMENTS.—There are authorized to be appropriated to the Secretary of Transportation for the use of Amtrak for fiscal year 2003, and each fiscal year thereafter, **$80,000,000** for ongoing capital infrastructure—

(1) to replace assets on a life-cycle basis;

(2) to ensure that a state-of-good-repair is maintained in order to meet safety and reliability standards;

(3) to meet current service commitments; and

(4) to provide funds for investment in partner railroads to operate passenger service at currently committed levels.

(d) CAPITAL FLEET NEEDS.—There are authorized to be appropriated to the Secretary of Transportation for the use of Amtrak for fiscal year 2003, and each fiscal year thereafter, **$50,000,000** for ongoing capital fleet needs to sustain regularly scheduled maintenance, including a 120-day cycle of preventive maintenance, and heavy overhauls on a 4-year schedule, with interior enhancements as needed.

(e) CAPITAL STATIONS AND FACILITIES.—There are authorized to be appropriated to the Secretary of Transportation for the use of Amtrak for fiscal year 2003, and each fiscal year thereafter, **$10,000,000** for ongoing capital stations and facilities needs to provide regular upgrades to stations to meet current service needs, and regular improvements to maintenance-of-way equipment and maintenance-of-way facilities.

(f) TECHNOLOGY NEEDS.—There are authorized to be appropriated to the Secretary of Transportation for the use of Amtrak for fiscal year 2003, and each fiscal year thereafter, **$10,000,000** for ongoing technology needs to upgrade reservation, distribution, financial, and operations systems, including hardware, software, infrastructure, and communications.

SEC. 306. SHORT DISTANCE TRAINS; STATE-SUPPORTED ROUTES.

There are authorized to be appropriated to the Secretary of Transportation for the use of Amtrak for fiscal year 2003, and each fiscal year thereafter, for obligation and expenditure on routes outside the Northeast Corridor—

(1) **$20,000,000** for capital backlog on infrastructure to bring infrastructure up to a state-of-good-repair, including improvements on bridges and tunnels that are approaching the end of their useful life and interlocking and signal system renewal;

(2) **$10,000,000** for capital backlog on its fleet to bring Amtrak's existing fleet as of the date of enactment of this Act to a state-of-good-repair, including equipment replacement and upgrades necessary to meet current service commitments;

(3) **$170,000,000** for ongoing capital infrastructure to replace assets on a life-cycle basis to ensure a state-of-good-repair is maintained in order to meet safety and reliability standards needed to deliver current service commitments, including investment in partner railroads to operate passenger service at currently committed levels.

(4) **$40,000,000** for ongoing capital fleet needs to sustain regularly scheduled maintenance, including a 120-day cycle preventive maintenance schedule, and heavy overhauls on a 4-year schedule, with interior enhancements as needed;

(5) **$10,000,000** for ongoing capital stations and facilities needs to provide regular upgrades to stations to meet current service needs, and regular improvements to maintenance-of-way equipment and maintenance-of-way facilities; and

(6) **$20,000,000** for ongoing technology needs to upgrade of reservation, distribution, financial, and operations systems, including hardware, software, infrastructure and communications.

SEC. 307. RE-ESTABLISHMENT OF NORTHEAST CORRIDOR SAFETY COMMITTEE.

(a) RE-ESTABLISHMENT OF NORTHEAST CORRIDOR SAFETY COMMITTEE.—The Secretary of Transportation shall re-establish the Northeast Corridor Safety Committee authorized by section 24905(b) of title 49, United States Code.

(b) TERMINATION DATE.—Section 24905(b)(4) is amended by striking "January 1, 1999," and inserting "January 1, 2008,".

SEC. 308. ON-TIME PERFORMANCE.

Section 24308 is amended by adding at the end the following:

"(f) ON-TIME PERFORMANCE.—If the on-time performance of any intercity passenger train averages less than 80 percent for any consecutive 3-month period, Amtrak may petition the Surface Transportation Board to investigate whether, and to what extent, delays are due to causes that could reasonably be addressed by a rail carrier over the tracks of which the intercity passenger train operates, or by a regional authority providing commuter service, if any. In carrying out such an investigation, the Surface Transportation Board shall obtain information from all parties involved and make recommendations regarding reasonable measures to improve the on-time performance of the train.".

SEC. 309. AMTRAK BOARD OF DIRECTORS.

(a) IN GENERAL.—Section 24302 is amended to read as follows:

"§ 24302. Board of directors

"(a) COMPOSITION AND TERMS.—

"(1) The board of directors of Amtrak is composed of the following 9 directors, each of whom must be a citizen of the United States:

"(A) The President of Amtrak.

"(B) The Secretary of Transportation.

“(C) 7 individuals appointed by the President of the United States, by and with the advice and consent of the Senate, with an interest, experience, and qualifications in or directly related to rail transportation, including representatives of the passenger rail transportation, travel, hospitality, cruise line, and passenger air transportation businesses, and consumers of passenger rail transportation.

“(2) An individual appointed under paragraph (1)(C) of this subsection serves for 5 years or until the individual's successor is appointed and qualified. Not more than 4 individuals appointed under paragraph (1)(C) may be members of the same political party.

“(3) The board shall elect a chairman and a vice chairman from among its membership. The vice chairman shall serve as chairman in the absence of the chairman.

“(4) The Secretary may be represented at a meeting of the board only by the Deputy Secretary of Transportation, the Administrator of the Federal Railroad Administration, or the General Counsel of the Department of Transportation.

“(b) Pay and Expenses.—Each director not employed by the United States Government is entitled to $300 a day when performing board duties and powers. Each director is entitled to reimbursement for necessary travel, reasonable secretarial and professional staff support, and subsistence expenses incurred in attending board meetings.

“(c) Vacancies.—A vacancy on the board is filled in the same way as the original selection, except that an individual appointed by the President of the United States under subsection (a)(1)(C) of this section to fill a vacancy occurring before the end of the term for which the predecessor of that individual was appointed is appointed for the remainder of that term. A vacancy required to be filled by appointment under subsection (a)(1)(C) must be filled not later than 120 days after the vacancy occurs.

“(d) Bylaws.—The board may adopt and amend bylaws governing the operation of Amtrak. The bylaws shall be consistent with this part and the articles of incorporation.”.

(b) Effective Date.—The amendment made by subsection (a) shall take effect on October 1, 2003. The members of the Amtrak Reform Board may continue to serve until 3 directors appointed by the President under section 24302(a) of title 49, United States Code, as amended by subsection (a), have qualified for office.

SEC. 310. INDEPENDENT AUDIT OF AMTRAK OPERATIONS; REVIEW BY DOT IG.

(a) In General.—Amtrak shall employ an independent financial consultant—

(1) to assess its financial accounting and reporting system;

(2) to design and assist Amtrak in implementing a modern financial accounting and reporting system, on the basis of the assessment, that will produce accurate and timely financial information in sufficient detail—

(A) to enable Amtrak to assign revenues and expenses appropriately to each of its lines of business activity; and

(B) to aggregate expenses and revenues related to infrastructure and distinguish them from expenses and revenues related to rail operations.

(b) Verification of System; Report.—The Inspector General of the Department of Transportation shall review the accounting system designed and implemented under subsection (a) to ensure that it accomplishes the purposes for which it is intended. The Inspector General shall report his findings and conclusions, together with any recommendations, to the Senate Committee on Commerce, Science, and Transportation and the House of Representatives Committee on Transportation and Infrastructure.

(c) Review of Financial Status and Funding Requirements by DOT Inspector General.—The Inspector General of the Department of Transportation shall, as part of the Department's annual assessment of Amtrak's financial status and capital funding requirements review the obligation and expenditure of funds under each such funding document, procedure, or arrangement to ensure that the expenditure and obligation of those funds are consistent with the purposes for which they are provided under this Act.

(d) Authorization of Appropriations.—There are authorized to be appropriated to the Secretary of Transportation for the use of Amtrak $2,500,000 for fiscal year 2003 to carry out subsection (a), such sums to remain available until expended.

TITLE IV—MISCELLANEOUS

SEC. 401. REHABILITATION, IMPROVEMENT, AND SECURITY FINANCING.

(a) Definitions.—Section 102(7) of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 802(7)) is amended to read as follows:

“(7) ‘railroad’ has the meaning given that term in section 20102 of title 49, United States Code; and”.

(b) General Authority.—Section 502 of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 822) is amended—

(1) by striking “Secretary may provide direct loans and loan guarantees to State and local governments,” in subsection (a) and inserting “Secretary shall provide direct loans and loan guarantees to State and local governments, interstate compacts entered into under section 410 of the Amtrak Reform and Accountability Act of 1997 (49 U.S.C 24101 nt),”;

(2) by striking “or” in subsection (b)(1)(B);

(3) by redesignating subparagraph (C) of subsection (b)(1) as subparagraph (D); and

(4) by inserting after subparagraph (B) of subsection (b)(1) the following:

“(C) to acquire, improve, or rehabilitate rail safety and security equipment and facilities; or”.

(c) Extent of Authority.—Section 502(d) of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 822(d)) is amended—

(1) by striking “$3,500,000,000” and inserting “$35,000,000,000”;

(2) by striking “$1,000,000,000” and inserting “$7,000,000,000”; and

(3) by adding at the end the following new sentence: “The Secretary shall not establish any limit on the proportion of the unused amount authorized under this subsection that may be used for 1 loan or loan guarantee.”.

(d) Cohorts of Loans.—Section 502(f) of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 822(f)) is amended—

(1) in paragraph (2)—

(A) by striking “and” at the end of subparagraph (D);

(B) by redesignating subparagraph (E) as subparagraph (F); and

(C) by adding after subparagraph (D) the following new subparagraph:

“(E) the size and characteristics of the cohort of which the loan or loan guarantee is a member; and”; and

(2) by adding at the end of paragraph (4) the following: “A cohort may include loans and loan guarantees. The Secretary shall not establish any limit on the proportion of a cohort that may be used for 1 loan or loan guarantee.”.

(e) Conditions of Assistance.—Section 502 of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 822) is amended—

(1) by striking “offered;” in subsection (f)(2)(A) and inserting “offered, if any;”and

(2) by adding at the end of subsection (h) the following: “The Secretary shall not require an applicant for a direct loan or loan guarantee under this section to provide collateral. The Secretary shall not require that an applicant for a direct loan or loan guarantee under this section have previously sought the financial assistance requested from another source. The Secretary shall require recipients of direct loans or loan guarantees under this section to apply the standards of section 22301(b) and (c) of title 49, United States Code, to their projects.”.

(f) Time Limit for Approval or Disapproval.—Section 502 of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 822) is amended by adding at the end the following:

“(i) Time Limit for Approval or Disapproval.—Not later than 180 days after receiving a complete application for a direct loan or loan guarantee under this section, the Secretary shall approve or disapprove the application.”.

(g) Fees and Charges.—Section 503 of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 823) is amended—

(1) by adding at the end of subsection (k) the following: “Funds received by the Secretary under the preceding sentence shall be credited to the appropriation from which the expenses of making such appraisals, determinations, and findings were incurred.”; and

(2) by adding at the end the following new subsection:

“(l) Fees and Charges.—Except as provided in this title, the Secretary may not assess any fees, including user fees, or charges in connection with a direct loan or loan guarantee provided under section 502.”.

(h) Substantive Criteria and Standards.—Not later than 30 days after the date of the enactment of this Act, the Secretary of Transportation shall publish in the Federal Register and post on the Department of Transportation website the substantive criteria and standards used by the Secretary to determine whether to approve or disapprove applications submitted under section 502 of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 822).

(i) Operators and Service Providers Deemed Rail Carriers.—Section 502 of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 822), as amended by subsection (f), is amended by adding at the end the following:

“(j) Operators and Certain Service Providers Deemed Rail Carriers.—A person that conducts rail operations, or performs catering, cleaning, construction, maintenance, or other services for rail operations, funded or otherwise receiving assistance under this section is deemed to be a rail carrier for purposes of part A of subtitle IV of title 49, United States Code, when so operating or performing such services.”.

SEC. 402. RAIL PASSENGER COOPERATIVE RESEARCH PROGRAM.

(a) In General.—Chapter 249 is amended by adding at the end the following:

“§ 24910. Passenger rail cooperative research program

“(a) In General.—The Secretary shall establish and carry out a rail passenger cooperative research program. The program shall—

"(1) address, among other matters, intercity rail passenger services, including existing rail passenger technologies and speeds, incrementally enhanced rail systems and infrastructure, and new high-speed wheel-on-rail systems;

"(2) give consideration to research on commuter rail, regional rail, freight rail, and other modes of rail transportation that may affect rail passenger transportation due to the interconnectedness of the rail passenger network with other rail transportation services; and

"(3) give consideration to regional concerns regarding rail passenger transportation, including meeting research needs common to designated high-speed corridors, long-distance rail services, and regional intercity rail corridors, projects, and entities.

"(b) CONTENTS.—The program to be carried out under this section shall include research designed—

"(1) to develop more accurate models for evaluating the indirect effects of rail passenger service, including the effects on highway and airport and airway congestion, environmental quality, and energy consumption;

"(2) to develop a better understanding of modal choice as it affects rail passenger transportation, including development of better models to predict ridership;

"(3) to recommend priorities for technology demonstration and development;

"(4) to meet additional priorities as determined by the advisory board established under subsection (c), including any recommendations made by the National Research Council;

"(5) to explore improvements in management, financing, and institutional structures;

"(6) to address rail capacity constraints that affect passenger rail service through a wide variety of options, ranging from operating improvements to dedicated new infrastructure, taking into account the impact of such options on freight and commuter rail operations; and

"(7) to improve maintenance, operations, customer service, or other aspects of existing intercity rail passenger service existing in 2002.

"(c) ADVISORY BOARD.—

"(1) ESTABLISHMENT.—In consultation with the heads of appropriate Federal departments and agencies, the Secretary shall establish an advisory board to recommend research, technology, and technology transfer activities related to rail passenger transportation.

"(2) MEMBERSHIP.—The advisory board shall include—

"(A) representatives of State transportation agencies;

"(B) transportation and environmental economists, scientists, and engineers; and

"(C) representatives of Amtrak, the Alaska Railroad, transit operating agencies, intercity rail passenger agencies, railway labor organizations, and environmental organizations.

"(d) NATIONAL ACADEMY OF SCIENCES.—The Secretary may make grants to, and enter into cooperative agreements with, the National Academy of Sciences to carry out such activities relating to the research, technology, and technology transfer activities described in subsection (b) as the Secretary deems appropriate.".

(b) CONFORMING AMENDMENT.—The chapter analysis for chapter 249 is amended by adding at the end the following:

"24910. Passenger rail cooperative research program".

(c) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Secretary of Transportation $5,000,000 for fiscal year 2003, and each fiscal year thereafter, to carry out section 24910(d) of title 49, United States Code.

SEC. 403. CONFORMING AMENDMENTS TO TITLE 49 REFLECTING ICC TERMINATION ACT.

(a) SECTION 307.—

(1) Section 307 is amended—

(A) by striking "**Interstate Commerce Commission**" in the section heading and inserting "**Surface Transportation Board**";

(B) by striking "Interstate Commerce Commission" in subsection (a) and inserting "Surface Transportation Board"; and

(C) by striking "Commission" each place it appears and inserting "Board".

(2) The chapter analysis for chapter 3 is amended by striking the item relating to section 307 and inserting the following:

"307. Safety information and intervention in Surface Transportation Board proceedings".

(b) SECTION 333.—Section 333 is amended—

(1) by striking "Interstate Commerce Commission" each place it appears and inserting "Surface Transportation Board"; and

(2) by striking "Commission" in subsection (c) and inserting "Board".

(c) SECTION 351.—Section 351(c) is amended by striking "Interstate Commerce Commission" and inserting "Surface Transportation Board".

(d) SECTION 24307.—Section 24307(b)(3) is amended by striking "Interstate Commerce Commission" and inserting "Surface Transportation Board".

(e) SECTION 24308.—Section 24308 is amended—

(1) by striking "Interstate Commerce Commission" in subsection (a)(2)(A) and inserting "Surface Transportation Board"; and

(2) by striking "Commission" each place it appears in subsection (a) and (b) and inserting "Board".

(f) SECTION 24311.—Section 24311 is amended—

(1) by striking "Interstate Commerce Commission" in subsection (c)(1) and inserting "Surface Transportation Board"; and

(2) by striking "Commission" each place it appears in subsection (c) and inserting "Board".

(g) SECTION 24902.—Section 24902 is amended—

(1) by striking "Interstate Commerce Commission" in subsections (g)(2) and (g)(3) and inserting "Surface Transportation Board"; and

(2) by striking "Commission" each place it appears in subsections (g)(2) and (g)(3) and inserting "Board".

(h) SECTION 24904.—Section 24904 is amended—

(1) by striking "Interstate Commerce Commission" in subsection (c)(2) and inserting "Surface Transportation Board"; and

(2) by striking "Commission" each place it appears in subsection (c) and inserting "Board".

SEC.404. APPLICABILITY OF REVERSION TO ALASKA RAILROAD RIGHT-OF-WAY PROPERTY.

Section 601(b) of the Alaska Railroad Transfer Act of 1982 (45 U.S.C. 1209(b)) is amended—

(1) by inserting "(1)" after "(b)";

(2) by redesignating paragraphs (1) and (2) as subparagraphs (A) and (B), respectively; and

(3) by adding at the end the following new paragraph:

"(2)(A) The State-owned railroad may convey all right, title, and interest of the State in any land within the right-of-way to a third party in exchange for other land that, in substitution for the land conveyed, is to be utilized as part of the right-of-way if the continuity of the right-of-way corridor for transportation, communications, and transmission purposes is provided by such use of the substituted land.

"(B) The provisions of this section that require reversion shall apply to the substituted land, as of the effective date of the exchange of that land in a transaction authorized by subparagraph (A), as fully as if the substituted land had been rail properties of the Alaska Railroad as of January 13, 1983.

"(C) Upon the conveyance of land in a transaction authorized by subparagraph (A), any reversionary interest in the land under this section shall terminate.".

NATIONAL DEFENSE RAIL ACT

One-time FY 2003 authorization for Security Funds: $1.26 billion.

Total funds authorized annually for FY 2003 through FY 2007: $4.61 billion.

SECURITY PROVISIONS ($1.26 B IN FY 2003)

$360M for Amtrak security needs, evenly divided between the Northeast Corridor and Non-Northeast Corridor.

$5M for DOT to perform a security assessment of all rail, including freight needs.

$895M for life safety upgrades to tunnels in NY, Balt, DC.

$3M for preliminary design work for the Baltimore tunnels.

FEDERAL HIGH SPEED CORRIDOR DEVELOPMENT ($1.55 B ANNUALLY)

$25M to DOT for Research and Development Activities.

$25M to DOT for Planning.

$1.5B to DOT for Implementation/Construction.

Must be a designated corridor to receive funding. The Northeast Corridor is designated, but not eligible to receive funds under this program if receiving other federal funds.

NORTHEAST CORRIDOR (NEC) ($ .310 B ANNUALLY)

Requires any operating profit on the NEC to be reinvested in NEC infrastructure.

$720M for infrastructure.

$100M for fleet.

$70M for stations/facilities.

$20M for technology upgrades.

$400M for growth (annual average).

COOPERATIVE RESEARCH PROGRAM ($5 M ANNUALLY)

Establishes R & D program at National Academy of Sciences similar to highway and transit cooperative research programs.

NATIONAL RAILROAD PASSENGER CORPORATION (500 M ANNUALLY)

Requires profits from non-passenger activities to be invested in growth activities outside the NEC.

$160M (est.) for mandatory excess Railroad Retirement Payments.

$267M for debt payments (avg.).

$30M for environmental compliance.

$43M for ADA compliance.

$2.5M for onetime external assessment of Amtrak cost accounting.

LONG-DISTANCE TRAINS ($580 M ANNUALLY)

$360M for operating.

$120M for fleet.

$80M for infrastructure.

$10M for stations/facilities.

$10M for technology.

SHORT DISTANCE & STATE-SUPPORTED ROUTES ($270 M ANNUALLY)

$190M annually for infrastructure.

$50M annually for fleet.
$10M annually for stations.
$20M annually for technology.

RAIL PROJECT FINANCING ($350 M ANNUALLY)

Expansion of the DOT's Railroad Rehabilitation and Improvement Financing Program.

$35B authorization for DOT to provide loans and loan guarantees (annual estimated 10% credit risk premium).

Mr. BIDEN. Madam President, as my good friend Senator HOLLINGS has just stated, we are on the brink of a very important decision. Do we continue to underfund a national passenger rail system? Or do we finally stand behind the system, committing to it once and for all?

I agree with my good friend, the chairman of the Commerce Committee, and that's why I joined him in introducing this important bill. For 30 years, I have witnessed Congress dangling a carrot in front of Amtrak's eyes, funding it just enough for it to limp along. And I'll tell you, this has to stop. Now is the time to commit politically and financially to a strong, safe, and efficient passenger rail system. And now is the time to determine once and for all, what exactly it is that we want out of passenger rail service in the country. Should this be a truly national system? And should we devote the resources necessary to maintain and expand this networks?

Senator HOLLINGS and the rest of my colleagues know that I support funding the highway and aviation networks, our Nation has relied upon them for years, and they have served us well. But I look around today and I see crowded skies and congested roads. At the very same time, I see empty rails, with the potential to relieve this transportation burden and serve as a useful alternative for Americans.

As Senator HOLLINGS discussed just now, the events of September 11 further demonstrated, in stark and rigid terms, the necessity of transportation choices. For years I have argued that we need to sit down together and begin an honest and frank discussion in order to create a blueprint for the future of passenger rail.

And, let me tell you this, this bill that I am introducing with Senator HOLLINGS is a good, solid start. Instead of maintaining the status quo, the bill offers a vision and a set of priorities for the future of passenger rail in this country. It says: we need to make sure this system is safe, as September 11 demonstrated it must be. It says: we need to seriously invest in the future of this system, which is high-speed rail. And it says: the Federal Government will need to adequately fund a national passenger rail network, no matter how the system is structured.

And that is something that has always mystified me. When it comes to other forms of transportation, highways and airplanes, we have given them all they ask for, consistently providing full Federal backing. Since 1971, in fact, we have given $750 billion to highways and aviation. In the same period of time, since the birth of Amtrak, we have only given $25 billion to our national passenger rail system. That's only 3 percent of all transportation funding in that period. That is appalling.

If we want a national passenger rail system, and most Americans do, as all the polls indicate, then we are going to have to pay for it, and understand the long-term commitment it takes to get this kind of system up and running. Passenger rail in this country has never had a stable funding source instead, it has been subjected to the whims and follies of the political process, and it has lost this battle time and time again.

Every single industrialized country, France, Japan, Germany, subsidizes a national rail system. For years, we have been living in a fantasy - that somehow, we can have our cake and eat it too: that we could mandate Amtrak to be self-sufficient without giving it nearly enough money to do so. But Amtrak cannot run a national rail network, without adequate levels of Federal investment, and still be expected to be commercially self-sufficient. That is just not rational.

There are two steps, then, in ensuring the future of passenger rail. Short-term, we have got to make sure that we do not allow Amtrak to go bankrupt, or worse, mortgage off their future in a desperate attempt to stay afloat. That is why, alongside many of my colleagues, I have pushed for the full $1.2 billion appropriations amount that Amtrak has requested for next year. This bare-bones minimum will give them the ability to maintain the current state of passenger rail, nothing more, nothing less.

And in the long-term, we need a new vision for the future of national passenger rail so these one-time, bare-bones funding requests are no longer an issue. This bill represents just such a vision. It would invest seriously in the planning and implementation of high-speed rail corridors, which provides the most bang for the buck and which almost every State Governor, Democrat or Republican, has been clamoring for for years. It would provide money for debt payments, which Amtrak has incurred as a direct result of Federal underfunding. It would authorize capital investment funds, to begin to correct the $5.8 billion capital backlog Amtrak faces today. And it would fund operating costs for the long-distance trains that provide essential service to rural areas of the country.

Moreover, it would address the serious security concerns that plague our rail system today. I stood up here months ago, right after one of the worst events in our Nation's history. I stood up here in order to call attention to what I thought, and continue to think, is a dire situation. And that is this matter of rail security. The events of September 11 dramatically and starkly revealed how essential it is that the United States have a national, effective, and secure railroad passenger system. It also exposed how vulnerable that system is right now to terrorist attacks. I have traveled through the train tunnels that Amtrak uses, and let me tell you, these tunnels are just plain frightening, poor ventilation, poor lighting, inadequate evacuation routes.

This reauthorization bill would help the system deal with these tunnels and other gaps in our passenger rail security. A one-time investment of $1.4 billion would provide security fencing, closed circuit television, tunnel rehabilitation, increased security inspections, essential security-related improvements. The Department of Transportation itself has warned several times in the last few years about the necessity of quickly and fully funding Amtrak's security needs. $1.4 billion is a small price to pay to avoid a repeat of September 11.

Finally, this bill would bring a greater level of accountability to the whole structure. As Senator HOLLINGS indicated, the $1.55 billion in funds for high-speed corridor planning and implementation would be run through the Department of Transportation, so that the Federal Government can work together with state and local agencies in promoting the future of our rail system.

This bill, together with the $1.2 billion appropriations for next year, will bring us closer to the type of passenger rail system that our Nation deserves and needs. As my good friend Senator HOLLINGS alluded to, 50 years ago, our leaders had the vision and foresight to stand up and say, we need an interstate highway system, and we need to fund it appropriately. Let us today go forward with this blueprint in hand and create a similar network for passenger rail.

By Mrs. CARNAHAN:

S. 1993. A bill to authorize a military construction project for the construction of a Weapons of Mass Destruction Responder Training Facility at Fort Leonard Wood Missouri; to the Committee on Armed Services.

Mrs. CARNAHAN. Madam President, I rise today to introduce important legislation for homeland defense, the Weapons of Mass Destruction Responder Training Facility Act of 2002. America's war against international terrorism has increased the need to prepare against the threat of weapons of mass destruction, known as WMDs.

Currently the Army's frontline of defense against WMD threats, Fort Leonard Wood, does not have the ability to conduct full-scale, joint training year round. This preparation gap must be closed. Our national security depends on the ability to effectively respond to a WMD attack. That is why I have introduced legislation to create a permanent training facility at Fort Leonard Wood.

Fort Leonard Wood has no dedicated facility for training active duty and National Guard WMD responders. This prevents both joint training and the expansion of coordination among all WMD responders.

Last October, we in this body learned first hand the importance of a coordinated response to WMD attacks. When letters, filled with anthrax, were mailed to members of Congress, 50 of our colleagues in the Senate and their staffs were evicted from the Hart office building for over three months. Experts from several agencies and departments, who never prepared together to respond to a WMD attack, worked to overcome setbacks and difficulties to make sure the Hart building was safe again. I thank them for all their hard work. But we now know that to prepare for future threats, those responsible for responding to WMD attacks must train together.

Constructing of a permanent facility will enable joint training and cooperation of WMD Civil Support Teams; Department of Defense Emergency Responders; Chemical, Biological, Radiological and Nuclear Instillation Support Teams; and Active and Reserve Component Chemical Units. The need to conduct joint operations and training year round is important and immediate. It is vital to national security. This is why the Army has placed the highest priority on building a permanent facility at Fort Leonard Wood.

This legislation will compliment S. 1909, which was introduced by my friend and colleague from Missouri. Senator BOND's legislation calls for the establishment of a unified command for homeland defense, a post both the President and the Secretary of Defense support.

S. 1909 will allow the Department of Defense to more effectively manage homeland defense resources by centrally locating the unified command within the United States, away from a major population center at an Armed Forces facility already in use for WMD training.

Fort Leonard Wood meets all of these requirements and seems like an ideal candidate to fulfill this new and important national security role. But Fort Leonard Wood is not yet ready. While it has taken the lead in preparing WMD responders, there is yet another step to take. We must ensure that the country is prepared for future attacks by establishing a permanent training facility now.

By Mr. KERRY (for himself and Mr. BOND):

S. 1994. A bill to establish a priority preference among certain small business concerns for purposes of Federal contracts, and for other purposes; to the Committee on Small Business and Entrepreneurship.

Mr. KERRY. Madam President, today I am introducing legislation to help our nation's 8(a) Business Development, BD, and HUBZone firms compete more effectively in the Federal marketplace.

This bipartisan legislation, cosponsored by Senator KIT BOND, stems from a 1997 commitment Senator BOND and I made to each other to seek equality between the Small Business Administration's, SBA, 8(a)BD program and the HUBZone program.

Much has been made lately of the SBA's proposed rule to establish "parity" or equality between these two important programs. Some in the contracting community have opposed the proposed rule because they have concerns about the decline in the number of contracts and contract dollar values being awarded to 8(a)BD firms. I share the concerns of the contracting community in this regard, but I do not blame the HUBZone program for this decline. Rather, I blame the current procurement environment.

In 1997, working with then-Chairman of the Senate Committee on Small Business, Senator BOND, I took the necessary steps to protect the 8(a)BD program. In my negotiations with Senator BOND, he agreed to change the legislation creating the HUBZone program from one of HUBZone priority to one of equality between the 8(a)BD and HUBZone programs. Further, we negotiated a 3 percent increase in the Federal Government's small business goal, raising it from 20 percent to 23 percent, in order to accommodate the HUBZone program, which when fully phased in for Fiscal Year 2003 will have a 3 percent governmentwide goal. This increase was put in place specifically to accommodate the HUBZone program and ensure that 8(a)BD firms did not lose Federal contracts to the HUBZone program.

The fact remains, however, despite these protections, that 8(a)BD firms are experiencing a decline in Federal procurement, which some place as high as 34 percent since 1997. The cause of this decline has its roots in the new procurement environment created by the reforms in the mid-1990s, such as passage of the Federal Acquisition Streamlining Act and the Federal Acquisition Reform Act, the regulatory changes to procurement programs in response to the Adarand Inc. v. Pena decision, and reductions in the acquisition workforce. Because negative trends hit minority-owned firms first and hardest, these small businesses have borne a disproportionate share of the percentage decline in Federal contract dollars being awarded to small businesses.

To help combat the negative effects of procurement reform, I have been taking a very close look at the SBA's programs to assist small businesses, especially small businesses owned by socially and economically disadvantaged individuals. The legislation being introduced today is the first step in halting and reversing the decline brought about by procurement reform.

This legislation specifically addresses two critical areas of the 8(a)BD and HUBZone programs. The first deals with the relationship between the two programs when a small business has received both an 8(a)BD and a HUBZone certification, the second deals with the sole-source threshold issue for these firms.

First, an important factor in my decision to support the HUBZone legislation with the negotiated changes to protect the 8(a)BD program was the concept known as "super-priority" or "priority-preference." The priority-preference stems from Congressional intent that firms that are both 8(a)BD and HUBZone certified receive a preference over a firm that has a certification in only one program. In addition, the priority-preference was intended to allow these firms to combine the price evaluation preference available to them under each program, with the understanding that any offeror would still need to meet a "responsiveness" test in terms of their offer. Unfortunately, the new rule proposed by the SBA does not include the priority-preference, and the SBA has issued guidance that states that the priority-preference has no statutory provision to support its creation.

Although I strongly disagree with the SBA's decision to end the priority-preference, this legislation will rectify the situation by creating a statutory priority-preference for firms that have both an 8(a)BD and a HUBZone certification. Such a provision will help combine the benefits of each program and bring additional jobs and opportunities to underdeveloped areas. I view this provision as a win-win for the 8(a)BD and HUBZone contracting communities.

Second, this legislation makes an important update to both the 8(a)BD and HUBZone programs by raising the sole-source thresholds. One of the most important attributes of both of these programs is the authority for small businesses to receive contracts on a sole-source basis. This excellent benefit is limited, however, by a cap on the dollar amount for sole-source contracts. Currently, contracts for goods and services are limited to $3 million, while manufacturing contracts are limited to $5 million. This legislation updates those limits by $1 million for each category—an update that has been needed for some time and that Senator BOND and I nearly succeeded in including in the Small Business Reauthorization Act of 2000. By increasing the sole-source thresholds, the Federal government will immediately put more contract dollars into the hands of 8(a)BD and HUBZone firms.

As I mentioned earlier in my statement, this legislation is merely one step in the process to help reverse the negative trends procurement reform has had on our nation's small businesses.

It is my hope that we can move this legislation through the Senate quickly, and I would urge all of my colleagues to lend their support.

Mr. BOND. Mr. President, I appreciate the opportunity to come to the Floor once again on another bipartisan matter with the distinguished chairman of the Small Business Committee. We have such a constructive working relationship in the Federal procurement issue area, and I always welcome the opportunity to work with the Senator from Massachusetts, Mr. KERRY, to advance small business participation in Government contracting.

This bill we are introducing today will further clarify the relationship between the HUBZone and 8(a) contracting programs. This relationship has been a strongly debated topic lately, although we thought our Committee provided clear guidance on the matter in the 1997 HUBZone Act. In the matter before us, we are clarifying what happens when firms are eligible for both programs and become certified.

The original Small Business Administration regulations on the HUBZone program called for the highest contracting priority to be given to HUBZone 8(a) "dual status" firms. That is, if a firm has been certified in both programs, it moves to the head of the class in getting Government contracts. The HUBZone regulations said that, in a HUBZone set-aside, an 8(a) firm should win over non-8(a) firms. Unfortunately, a comparable change was not included in the 8(a) regulations, to give HUBZone firms a preference in 8(a) set-asides. In a letter to SBA's Acting General Counsel last year, I asked SBA to resolve this inconsistency.

Robert Gangwere, the Acting General Counsel, stated he did not think SBA had the statutory authority to grant a "superpreference" to HUBZone 8(a) dual status firms. Currently, SBA has a proposed rulemaking in progress that deletes the "superpreference" language.

This bill would restore that. In a HUBZone set-aside (a competition restricted only to firms that are HUBZone firms), an 8(a) bidder would have priority over non-8(a) HUBZone bidders. A comparable change would be made in the 8(a) set-aside, giving HUBZone firms priority. I think this is reasonable, in that it encourages firms to take advantage of both programs.

I do have one reservation with this bill. Both the HUBZone program and the Small Disadvantaged Business program, of which 8(a) is a part, offer a 10 percent price evaluation preference under certain circumstances in full-and-open competition. The old SBA rules called for HUBZone 8(a) combined firms to get a 20 percent price evaluation preference, combining both the HUBZone preference and the Small Disadvantaged Business preference. I think 20 percent is excessive.

One of the goals of the small business program is to try to help small firms stabilize and develop, so they can survive in a competitive marketplace. Government contracts are supposed to be a means toward that end. But if a firm requires a 20 percent preference to win a contract, it probably has not done what it needs to do to become efficient and ready for the competitive marketplace. I am concerned that a 20 percent preference will be an unreasonable subsidy for inefficient firms. If a small business bidder is not even able to get within 20 percent of the lowest bidder, it probably is not a viable enterprise, and subsidizing its existence is not the highest and best use of taxpayer monies.

With that reservation, I am happy to cosponsor this measure with the Senator from Massachusetts. I am confident we can come to some kind of accommodation on the price evaluation preference, and look forward to working with him to do so.

By Ms. SNOWE (for herself, Mr. FRIST, Mr. JEFFORDS, Mr. ENZI, Ms. COLLINS, Mr. HAGEL, Mr. DEWINE, and Mr. GREGG):

S. 1995. A bill to prohibit discrimination on the basis of genetic information with respect to health insurance and employment; to the Committee on Health, Education, Labor, and Pensions.

Ms. SNOWE. Madam President, I rise today to introduce the Genetic Information Non-Discrimination in Health Insurance and Employment Act of 2002. I am joined in introducing this bill by Senators FRIST, JEFFORDS, ENZI, COLLINS, HAGEL, DEWINE, and GREGG.

The legislation I am introducing today is the culmination of several months work, though it is, in fact, the second part of an effort that started several years ago. Specifically, in April 1996, I introduced the Genetic Information Nondiscrimination in Health Insurance Act, legislation that was designed to protect people's genetic information and results of genetic testing, or requests for genetic testing, from being used against them by their health insurers. Back then, time was on our side as the completion of the Genome was years off.

However, four years later, in June 2000, everything changed with the announcement that the first working draft of the Human Genome was completed. And since that time, science has continued to hurry forward, further opening the door to early detection and medical intervention through the discovery and identification of specific genes linked to diseases like breast cancer, Huntington's Disease, glaucoma, colon cancer and cystic fibrosis.

Unfortunately, like so many other scientific breakthroughs in history, the completion of the Genome not only brought about the prospect for medical advances, such as improved detection and intervention, but also potential harm and abuse, as the knowledge of individual genetic information could be used against the very same person it is invented to help.

Accordingly, the need for protections against genetic discrimination by both health insurers and employers is becoming more urgent everyday. If, because of concerns about the way the information could be used, people are unwilling to use the potential unlocked by the Genome project to take proactive steps to protect their health and that of their loved ones, then we will never reap the true benefits of this discovery.

While we cannot yet prevent diseases such as breast cancer, genetic testing makes it possible for carriers of these diseases to take extra precautions. In fact, early detection is the best weapon we have to combat many of these diseases we can now identify, and for breast cancer it is a critical component when one considers that almost 192,000 women were struck by the disease last year. Technological advances in screenings coupled with the ability to identify who carries the gene linked to breast cancer can help us in our efforts to reduce this number. The possibilities for this discovery are limited only by the willingness, or unwillingness, of people to use this knowledge.

In 1997, a woman from Maine brought the reality of this dilemma home for me when she wrote of her very real fear of the repercussions associated with genetic testing. Bonnie Lee Tucker has nine women in her immediate family who were diagnosed with breast cancer, and she herself is a survivor. She wrote to me about her fear of having the BRCA test for breast cancer, because she worries it will ruin her daughter's ability to obtain insurance in the future.

Bonnie Lee isn't the only one who has this fear. When the National Institutes of Health offered women genetic testing, nearly 32 percent of those who were offered a test for breast cancer risk declined to take it citing concerns about health insurance discrimination. What good is scientific progress if it cannot be applied to those who would most benefit?

Dr. Francis Collins, the Director of the National Human Genome Research Institute, has testified before Congress about the next step for those involved in the Genome project. He explained that the project's scientists were engaged in a major endeavor to "uncover the connections between particular genes and particular diseases," to apply the knowledge they just unlocked. In order to do this, Dr. Collins said, "we need a vigorous research enterprise with the involvement of large numbers of individuals, so that we can draw more precise connections between a particular spelling of a gene and a particular outcome." However, this effort cannot be successful if people are afraid of possible repercussions of their participation in genetic testing.

The bottom line is that, given the advances in science, there are two separate issues at hand. The first is to restrict discrimination by health insurers and the second to prevent employment discrimination, based upon genetic information.

With regard to health insurance, the issues are clear and familiar, and something the Senate has debated before, in the context of the consideration of larger privacy issues. As Congress debated what is now the Health Insurance Portability and Accountability Act of 1996, we also addressed the issues of privacy of medical information. And any legislation that seeks to fully address these issues must consider the interaction of the new protections with the newly promulgated privacy rule which was mandated by HIPAA, and our legislation does just that.

Now we must ensure that we protect genetic information, genetic tests, as well as information regarding a request for genetic testing, from being used by the insurer against the patient. Genetic information only detects the potential for a genetically linked disease or disorder, and potential does not equal a diagnosis of disease. However, it is critical that this information be available to doctors and other health care professionals when necessary to diagnose, or treat, an illness. It is the difference that we must recognize as we discuss legislation to protect patients from potential discriminatory practices by insurers.

Unlike our legislative history on debating health privacy matters, the issues surrounding protecting genetic information from workplace discrimination is new. And to that end, the legislation I introduce today creates these protections in the workplace. As demonstrated by the Burlington Northern case, the threat of employment discrimination is real and therefore it is essential that we take this information off the table, so to speak, before the use of this information becomes widespread. While Congress has not yet debated this specific type of employment discrimination, we have a great deal of employment case law and legislative history on which to build.

As we considered the need for this type of protection, we agreed that we must extend current law discrimination protections to genetic information. We reviewed current employment discrimination law and considered what sort of remedies people would have for instances of genetic discrimination and if these remedies would be different from those available to people under current law, for instance under the ADA or the EEOC.

The bill we introduce today creates new protections by paralleling current law. In addition it addresses changes in the law that have occurred since the original introduction of my bill and the other bills on this subject. The momentum to address this issue has finally reached a critical mass. Clearly this is an issue whose time has come.

It has been more than eighteen months since the completion of the working draft of the Human Genome. Like a book which is never opened, the wonders of the Human Genome are useless unless people are willing to take advantage of it.

It's my sincere hope that the bi-partisan legislation I introduce today is the beginning of the end of the debate in our effort to ensure that every one of us is just as protected from discrimination because of what is in our genes as we are from our heritages, our genders and our impairments.

Mr. FRIST. Madam President, I rise once again today to speak on the critical issue of genetic discrimination and to proudly join my colleagues, Senators SNOWE, JEFFORDS, COLLINS, ENZI, DEWINE, HAGEL, and GREGG in introducing the Genetic Information Nondiscrimination Act of 2002.

The threat of genetic discrimination, both in the workplace and with respect to health insurance coverage, is one of the most troublesome Congress faces. As our scientific knowledge has improved, the threat of discrimination has increased. As a physician, as a medical researcher, and ranking member of the Subcommittee on Public Health, I have a long and deep interest in this issue, and I believe we have a unique responsibility to ensure that medical and scientific progress does not result in individual harm.

For example, I am deeply troubled by reports of women declining genetic testing out of fear that they may lose their health insurance, even though a genetic test might reveal that a woman is not at high risk and therefore allow her to make more informed health care choices. When I first joined Senator SNOWE to introduce legislation banning genetic discrimination in health insurance in 1998, almost one-third of women offered a test for breast cancer risk at the National Institutes of Health declined, citing concerns about health insurance discrimination. If unchecked and unregulated, this fear of discrimination clearly has the potential to prevent individuals from participating in research studies or taking advantages of new genetic technologies to improve their medical care.

Scientific advances hold the promise of higher quality medical care, yet there is a pressing need for federal legislation to reassure the public that learning this information will not result in a loss of health insurance coverage or in the loss of a job. I am committed to a bipartisan legislative solution, and have worked extensively towards this goal with Senator SNOWE, JEFFORDS, and a number of the members of this Committee over the past several years. I believe that, together, we have made an important step in addressing this through the Genetic Information Nondiscrimination in Health Insurance Act, which has been passed by the Senate on three separate occasions.

Today, we are building on that work, and on the solid foundations established in law by the Civil Rights Act, Americans with Disabilities Act, and Health Insurance Portability and Accountability Act. The Genetic Information Nondiscrimination Act of 2002 builds upon our progress in the health insurance area and expands our previous legislation to address the threat of employment discrimination and health insurance based on genetic information. Moreover, the bill incorporates the most recent scientific understandings in the field of genetics research in establishing protections and defining relevant terms.

I believe that it is incumbent upon us to pass legislation this year that is comprehensive, consistent, reasonable and fair. I am troubled by some legislative approaches that would place these new protections outside of the established framework of our time-tested civil rights laws and that would establish separate protections against genetic discrimination than exist for other types of discrimination. The bill today meets that standard of providing strong protections that are consistent with the current state of scientific knowledge, as well as current law.

I commend my colleagues for their commitment to this issue. I also commend President Bush for his commitment to ensuring strong protections against genetic discrimination and for calling attention to this critical matter. Through this important legislation, we have the opportunity to dispel the threat of discrimination based on an individual's genetic heritage, and I look forward to working with my colleagues to enact this legislation this year.

SUBMITTED RESOLUTIONS

SENATE RESOLUTION 217—RELATIVE TO THE DEATH OF THE HONORABLE HOWARD W. CANNON, FORMERLY A SENATOR FROM THE STATE OF NEVADA

Mr. DASCHLE (for himself, Mr. LOTT, Mr. REID, and Mr. ENSIGN) submitted the following resolution; which was considered and agreed to:

S. RES. 217

Resolved, That the Senate has heard with profound sorrow and deep regret the announcement of the death of the Honorable Howard W. Cannon, formerly a Senator from the State of Nevada.

Resolved, That the Secretary of the Senate communicate these resolutions to the House of Representatives and transmit an enrolled copy thereof to the family of the deceased.

Resolved, That when the Senate adjourns today, it stand adjourned as a further mark of respect to the memory of the deceased Senator.

AMENDMENTS SUBMITTED AND PROPOSED

SA 2980. Mr. DASCHLE (for himself, Mr. BINGAMAN, Mr. REID, Mr. MURKOWSKI, Mr. STEVENS, and Mr. BAYH) proposed an amendment to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) to authorize funding the Department of Energy to enhance its mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, and for other purposes.

SA 2981. Mr. MILLER submitted an amendment intended to be proposed to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) supra; which was ordered to lie on the table.

SA 2982. Mr. MURKOWSKI (for himself and Mr. STEVENS) proposed an amendment to amendment SA 2980 proposed by Mr. DASCHLE (for himself, Mr. BINGAMAN, Mr. REID, Mr. MURKOWSKI, Mr. STEVENS, and Mr. BAYH) to the amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) supra.

TEXT OF AMENDMENTS

SA 2980. Mr. DASCHLE (for himself, Mr. BINGAMAN, Mr. REID, Mr. MURKOWSKI, Mr. STEVENS and Mr. BAYH) proposed an amendment to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) to authorize funding the Department of Energy to enhance its mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, and for other purposes; as follows:

Insert the following after Section 704(d):

"(e) PROHIBITION ON CERTAIN PIPELINE ROUTE.—No license, permit, lease, right-of-way, authorization or other approval required under Federal law for the construction of any pipeline to transport natural gas from lands within the Prudhoe Bay oil and gas lease area may be granted for any pipeline that follows a route that traverses—

"(1) the submerged lands (as defined by the Submerged Lands Act) beneath, or the adjacent shoreline of, the Beaufort Sea; and

"(2) enters Canada at any point north of 68 degrees North latitude."

Insert the following after Section 706(c):

"(d) STATE COORDINATION.—The Federal Coordinator shall enter into a Joint Surveillance and Monitoring Agreement, approved by the President and the Governor of Alaska, with the State of Alaska similar to that in effect during construction of the Trans-Alaska Oil Pipeline to monitor the construction of the Alaska natural gas transportation project. The federal government shall have primary surveillance and monitoring responsibility where the Alaska natural gas transportation project crosses federal lands and private lands, and the state government shall have primary surveillance and monitoring responsibility where the Alaska natural gas transportation project crosses state lands."

SA 2981. Mr. MILLER submitted an amendment intended to be proposed to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) to authorize funding the Department of Energy to enhance its mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, and for other purposes; which was ordered to lie on the table; as follows:

On page 155, between lines 17 and 18, insert the following:

(c) AVERAGE FUEL ECONOMY STANDARDS FOR PICKUP TRUCKS.—

(1) IN GENERAL.—Section 32902(b) of title 49, United States Code (as amended by subsection (b)(3)) is further amended by adding at the end the following new paragraph:

"(6) PICKUP TRUCKS.—The average fuel economy standard for pickup trucks manufactured by a manufacturer in a model year after model year 2004 shall be 20.7 miles per gallon. No average fuel economy standard prescribed under another provision of this section shall apply to pickup trucks.".

(2) DEFINITION OF PICKUP TRUCK.—Section 32901(a) of such title (as amended by subsection (b)) is further amended—

(A) in paragraph (17), by inserting ", other than a pickup truck," after "automobile" in the matter preceding subparagraph (A); and

(B) by adding at the end the following new paragraph:

"(18) 'pickup truck' has the meaning given that term in regulations prescribed by the Secretary for the administration of this chapter, as in effect on January 1, 2002, except that such term shall also include any additional vehicle that the Secretary defines as a pickup truck in regulations prescribed for the administration of this chapter after such date.".

SA 2982. Mr. MURKOWSKI (for himself and Mr. STEVENS) proposed an amendment to amendment SA 2980 proposed by Mr. DASCHLE (for himself, Mr. BINGAMAN, Mr. REID, Mr. MURKOWSKI, Mr. STEVENS, and Mr. BAYH) to the amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) to authorize funding the Department of Energy to enhance its mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, and for other purposes; as follows:

At the end of the amendment insert the following:

On page 142 after line 20 insert a new section as follows and renumber all following sections accordingly:

"'SEC. 708. STATE JURISDICTION OVER IN-STATE DELIVERY OF NATURAL GAS.

"'(a) Any facility receiving natural gas from the Alaska natural gas transportation project for delivery to consumers within the State of Alaska shall be deemed to be a local distribution facility within the meaning of section 1(b) of the Natural Gas Act, and therefore not subject to the jurisdiction of the Federal Energy Regulatory Commission.

"'(b) Nothing in this Subtitle, except as provided in subsection 704(e), shall preclude or affect any future gas pipeline that may be constructed to deliver natural gas to Fairbanks, Anchorage, Matanuska-Susitna Valley, or the Kenai peninsula or Valdez or any other site in the State of Alaska for consumption within or distribution outside the State of Alaska.'

"On page 148 after line 2 insert:

"'SEC. 714. ALASKAN PIPELINE CONSTRUCTION TRAINING PROGRAM.

"'(a) Within six months after enactment of this Act the Secretary of Labor (hereinafter referred to as the 'Secretary') shall submit a report to the Committee on Energy and natural Resources of the United States Senate and the Committee on Resources of the United States House of Representatives setting forth a program to train Alaska residents in the skills and crafts required in the design, construction, and operation of an Alaska gas pipeline system that will enhance employment and contracting opportunities for Alaskan residents. The report shall also describe any laws, rules, regulations and policies which act as a deterrent to hiring Alaskan residents or contracting with Alaskan residents to perform work on Alaska gas pipelines, together with any recommendations for changes. For purposes of this section Alaskan residents shall be defined as those individuals eligible to vote within the State of Alaska on the date of enactment of this Act.

"'(b) Within 1 year of the date the report is transmitted to Congress, the Secretary shall, directly or through grants or cooperative agreements, establish within the State of Alaska, at such locations as the Secretary deems appropriate, training center(s) for the express purpose of training Alaskan residents in the skills and crafts necessary in the design, construction and operation of gas pipelines in Alaska. The training center shall also train Alaskan residents in the skills required to write, offer, and monitor contracts in support of the design, construction, and operation of Alaska gas pipelines.

"'(c) In implementing the report and program described in this section, the Secretary shall consult with the Alaskan Governor.

"'(d) There are authorized to be appropriated to the Secretary such sums as may be necessary, but not to exceed $20,000,000 for the purposes of this section.'.".

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. FEINGOLD. Mr. President, I ask unanimous consent that the Committee on Agriculture, Nutrition, and Forestry be authorized to conduct a nomination hearing during the session of the Senate on Wednesday, March 6, 2002, at 9:30 a.m. The purpose of this hearing will be to consider the following nominations: Thomas Dorr the nominee for Under Secretary of Rural Development; Nancy Bryson, the administration's nominee to serve as general counsel for USDA; and Grace Daniel and Fred Dailey who are nominated to serve on the Board of Federal Agricultural Mortgage Corporation.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

Mr. FEINGOLD. Mr. President, I ask unanimous consent that the Committee on Banking, Housing, and Urban Affairs be authorized to meet during the session of the Senate on Wednesday, March 6, 2002, at 10 a.m., to conduct an oversight hearing on "Accounting and Investor Protection Issues Raised by Enron and Other Public Companies; Oversight of the Accounting Profession, Audit Quality and Independence, and Formulation of Accounting Principles."

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ENVIRONMENT AND PUBLIC WORKS

Mr. FEINGOLD. Mr. President, I ask unanimous consent that the Committee on Environmental and Public Works be authorized to meet on Wednesday, March 6, 2002, at 9:30 a.m., to conduct a hearing to receive testimony on S. 975, the Community Character Act of 2001; and S. 1079, the Brownfield Site Redevelopment Assistance Act of 2001.

The hearing will be held in SD–406.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. FEINGOLD. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Wednesday, March 6, 2002, at 9:30 a.m., to hold a hearing titled, "Dirty Bombs".

Agenda

Witnesses

Panel 1: Dr. Steven E. Koonin, Provost, California Institute of Technology, Pasadena, CA; Dr. Harry C. Vantine, Division Leader, Counterterrorism and Incident Response, Lawrence Livermore National Laboratory, Livermore, CA; Dr. Henry C. Kelly, President, Federation of American Scientists, Washington, DC; and Dr. Donald D. Cobb, Associate Laboratory Director for Threat Reduction, Los Alamos National Laboratory, Los Alamos, NM.

Panel 2: Dr. Richard A. Meserve, Chairman, Nuclear Regulatory Commission, Washington, DC.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. FEINGOLD. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be authorized to meet on Wednesday, March 6, 2002, at 9:30 a.m., to hold a hearing entitled "Who's Doing Work for the Government?: Monitoring, Accountability and Competition in the Federal and Service Contract Workforce."

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INTELLIGENCE

Mr. FEINGOLD. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet during the session of the Senate on Wednesday, March 6, 2002, at 2:30 p.m., to hold a closed hearing on intelligence matters.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON ANTITRUST, COMPETITION AND BUSINESS AND CONSUMER RIGHTS

Mr. FEINGOLD. Mr. President, I ask unanimous consent that the Committee on the Judiciary Subcommittee on Antitrust, Competition and Business and Consumer Rights be authorized to meet to conduct a hearing on Wednesday, March 6, 2002, at 10:30 a.m., in Dirksen 226.

Witness List: Jeremiah W. "Jay" Nixon, Attorney General, State of Missouri, Jefferson City, Missouri; Charles W. Ergen, Chairman and CEO, Echostar Communications, Littleton, Colorado; Edward O. Fritts, President and CEO, National Association of Broadcasters, Washington, DC; Eddy W. Hartenstein, President and CEO, DIRECTV, Inc., El Segundo, California; Gene Kimmelman, Co-Director, Consumers Union, Washington, DC; and Robert Pitofsky, former Chairman of the Federal Trade Commission, Washington, DC.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON COMMUNICATION

Mr. FEINGOLD. Mr. President, I ask unanimous consent that the Subcommittee on Communications of the Committee on Commerce, Science, and Transportation be authorized to meet on Wednesday, March 6, 2002, at 2:30 p.m., on the Nation's wireline and wireless communications infrastructure in light of September 11.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON EMERGING THREATS AND CAPABILITIES

Mr. FEINGOLD. Mr. President, I ask unanimous consent that the Subcommittee on Emerging Threats and Capabilities of Committee on Armed Services be authorized to meet during the session of the Senate on Wednesday, March 6, 2002, at 2:30 p.m., in open session to receive testimony on the nonproliferation programs of the Department of Energy and the Cooperative Threat Reduction Program of the Department of Defense in review of the Defense authorization request for fiscal year 2003.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON PUBLIC HEALTH

Mr. FEINGOLD. Mr. President, I ask unanimous consent that the Committee on Health, Education, Labor, and Pensions, Subcommittee on Public Health, be authorized to meet for a hearing on "Health Tracking: Improving Surveillance of Chronic Conditions and Potential Links to Environmental Exposures," during the session of the Senate on Wednesday, March 6, 2002, at 10 a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON READINESS AND MANAGEMENT SUPPORT

Mr. FEINGOLD. Mr. President, I ask unanimous consent that the Subcommittee on Readiness and Management Support of the Committee on Armed Services be authorized to meet during the session of the Senate on Wednesday, March 6, 2002, at 10 a.m., in open session to receive testimony on Department of Defense financial management.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON TRANSPORTATION

Mr. FEINGOLD. Mr. President, I ask unanimous consent that the Subcommittee on Housing and Transportation of the Committee on Banking, Housing, and Urban Affairs be authorized to meet during the session of the Senate on Wednesday, March 6, 2002, at 2:30 p.m., to conduct an oversight hearing on "Reauthorization of the HUD McKinney-Vento Homeless Assistance Act Programs."

The PRESIDING OFFICER. Without objection, it is so ordered.

PRIVILEGES OF THE FLOOR

Mr. THOMAS. Madam President, I ask unanimous consent that Nancy Perkins, of Senator GREGG's office, have the privilege of the floor throughout the consideration of the energy bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LIEBERMAN. Madam President, first, I ask unanimous consent that Dennis Leaf, a congressional fellow with my office, be given floor privileges for the consideration of the energy bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HOLLINGS. Madam President, I ask unanimous consent that David Matsuda, a fellow from the Department of Transportation, be granted floor privileges during the discussion of the S. 517.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Madam President, I ask unanimous consent that the following members of my staff be allowed the privilege of the floor during the remainder of the consideration of the energy debate: Dave Russell, George

Lowe, Andy Givens, Mark Davis, Melany Alvord, Matt Paxton, and Justin Stiefel.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXECUTIVE SESSION

EXECUTIVE CALENDAR

Mr. REID. Madam President, I ask unanimous consent the Senate proceed to executive session to consider Executive Calendar No. 621, the nomination be confirmed, the motion to reconsider be laid on the table, the President be immediately notified of the Senate's action, any statements be printed in the RECORD, and the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nomination was considered and confirmed as follows:

DEPARTMENT OF ENERGY

Margaret S.Y. Chu, of New Mexico, to be Director of the Office of Civilian Radioactive Waste Management, Department of Energy.

LEGISLATIVE SESSION

The PRESIDING OFFICER. Under the previous order, the Senate will return to legislative session.

APPOINTMENT

The PRESIDING OFFICER. The Chair, on behalf of the majority leader, in consultation with the Republican leader, pursuant to Public Law 68–541, as amended by Public Law 102–246, reappoints Bernard Rapoport of Texas as a member of the Library of Congress Trust Fund Board for a term of five years, upon the expiration of his current term on March 10, 2002.

PERMITTING THE USE OF THE ROTUNDA OF THE CAPITOL

Mr. REID. Madam President, I ask unanimous consent the Senate now proceed to H. Con. Res. 305 which was just received from the House and is now at the desk.

The PRESIDING OFFICER. The clerk will report the concurrent resolution by title.

The assistant legislative clerk read as follows:

> A concurrent resolution (H. Con. Res. 305) permitting the use of the Rotunda of the Capitol for a ceremony to present a gold medal on behalf of Congress to former President Ronald Reagan and his wife Nancy Reagan.

There being no objection, the Senate proceeded to consider the concurrent resolution.

Mr. REID. I ask unanimous consent the concurrent resolution be agreed to, the motion to reconsider be laid upon the table, that any statements relating thereto be printed in the RECORD, with no intervening action or debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

The concurrent resolution (H. Con. Res. 305) was agreed to.

RELATIVE TO THE DEATH OF THE HONORABLE HOWARD W. CANNON

Mr. REID. I ask unanimous consent the Senate proceed to consideration of S. Res. 217, submitted earlier today.

The PRESIDING OFFICER. The clerk will report the resolution by title.

The legislative clerk read as follows:

> A resolution (S. Res. 217) relative to the death of the Honorable Howard W. Cannon, formerly a Senator from the State of Nevada.

There being no objection, the Senate proceeded to consider the resolution.

Mr. REID. I ask unanimous consent resolution be agreed to and the motion to reconsider be laid on the table without any intervening action or debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 217) was agreed to.

(The resolution is printed in today's RECORD under "Submitted Resolutions.")

ORDERS FOR TOMORROW, MARCH 7, 2002

Mr. REID. Madam President, I ask unanimous consent that when the Senate completes its business today, it adjourn until the hour of 10 a.m., Thursday, March 7; that following the prayer and the pledge, the Journal of proceedings be approved to date, the morning hour be deemed expired, the time for the two leaders be reserved for their use later in the day, and the Senate resume consideration of S. 517, the energy bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADJOURNMENT UNTIL 10 A.M. TOMORROW

Mr. REID. Madam President, if there is no further business to come before the Senate, I ask unanimous consent the Senate stand in adjournment under the provisions of S. Res. 217, as a mark of respect to the memory of the deceased Honorable Howard W. Cannon, a Senator from the State of Nevada.

There being no objection, the Senate, at 6:42 p.m., adjourned until Thursday, March 7, 2002, at 10 a.m.

NOMINATIONS

Executive nominations received by the Senate March 6, 2002:

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

JEFFREY D. WALLIN, OF CALIFORNIA, TO BE A MEMBER OF THE NATIONAL COUNCIL ON THE HUMANITIES FOR A TERM EXPIRING JANUARY 26, 2006, VICE RON CHEW.

DEPARTMENT OF JUSTICE

PETER A. LAWRENCE, OF NEW YORK, TO BE UNITED STATES MARSHAL FOR THE WESTERN DISTRICT OF NEW YORK FOR THE TERM OF FOUR YEARS, VICE JOHN PATRICK MCCAFFREY, TERM EXPIRED.

IN THE NAVY

THE FOLLOWING NAMED OFFICER FOR APPOINTMENT IN THE UNITED STATES NAVAL RESERVE TO THE GRADE INDICATED UNDER TITLE 10, U.S.C., SECTION 12203:

To be rear admiral (lower half)

CAPT. WILLIAM D. MASTERS JR., 7837

THE FOLLOWING NAMED OFFICER FOR APPOINTMENT IN THE UNITED STATES NAVAL RESERVE TO THE GRADE INDICATED UNDER TITLE 10, U.S.C., SECTION 12203:

To be rear admiral (lower half)

CAPT. CRAIG O. MCDONALD, 8124

THE FOLLOWING NAMED OFFICERS FOR APPOINTMENT IN THE UNITED STATES NAVAL RESERVE TO THE GRADE INDICATED UNDER TITLE 10, U.S.C., SECTION 12203:

To be rear admiral (lower half)

CAPT. DAVID O. ANDERSON, 4824
CAPT. DAVID J. CRONK, 9384
CAPT. DIRK J. DEBBINK, 0752
CAPT. FRANK F. RENNIE IV, 3148

IN THE AIR FORCE

THE FOLLOWING NAMED OFFICERS FOR APPOINTMENT TO THE GRADE INDICATED IN THE UNITED STATES AIR FORCE UNDER TITLE 10, U.S.C., SECTION 624:

To be colonel

DERRICK K. ANDERSON, 7877
CARL M. ANDREWS, 7741
MARION T. HARNED, 1823
JOE F. JOHNSTON, 7959
WAYNE R. KNUTSON JR., 4937
FROILAN A. SALUTA, 7123
JOSEPH R. WALLROTH, 2636

THE FOLLOWING NAMED OFFICERS FOR APPOINTMENT TO THE GRADE INDICATED IN THE UNITED STATES AIR FORCE UNDER TITLE 10, U.S.C., SECTION 624:

To be colonel

LORAINE H. ANDERSON, 0313
WILLIAM S. ASTLEY, 9862
MARY K. BALLENGEE, 9820
BRIAN K. DECKERT, 5776
JACKSON R. DOBBINS, 6219
ROY T. FRANKLIN, 9606
WILLIAM B. HUFF, 8650
BONNIE C. JOHNSON, 2164
MICHAEL E. JOHNSON, 4906
GEORGE NICOLAS JR., 9515
STEPHEN G. REINHART, 0990
MARK J. WELTER, 6902
MICHAEL E. YOUNG, 1118

THE FOLLOWING NAMED OFFICERS FOR APPOINTMENT TO THE GRADE INDICATED IN THE UNITED STATES AIR FORCE UNDER TITLE 10, U.S.C., SECTION 624:

To be colonel

MARY S. ARMOUR, 8763
DELORES G. FORREST, 1786
ROBERTA L. GOTT, 8016
DAWN M. HARL, 6219

CONFIRMATION

Executive Nomination Confirmed by the Senate March 6, 2002:

DEPARTMENT OF ENERGY

MARGARET S.Y. CHU, OF NEW MEXICO, TO BE DIRECTOR OF THE OFFICE OF CIVILIAN RADIOACTIVE WASTE MANAGEMENT, DEPARTMENT OF ENERGY.

THE ABOVE NOMINATION WAS APPROVED SUBJECT TO THE NOMINEE'S COMMITMENT TO RESPOND TO REQUESTS TO APPEAR AND TESTIFY BEFORE ANY DULY CONSTITUTED COMMITTEE OF THE SENATE.

WITHDRAWAL

EXECUTIVE MESSAGE TRANSMITTED BY THE PRESIDENT TO THE SENATE ON MARCH 06, 2002, WITHDRAWING FROM FURTHER SENATE CONSIDERATION THE FOLLOWING NOMINATION:

FREDERICK R. HEEBE, OF LOUISIANA, TO BE UNITED STATES ATTORNEY FOR THE EASTERN DISTRICT OF LOUISIANA FOR THE TERM OF FOUR YEARS, WHICH WAS SENT TO THE SENATE ON NOVEMBER 1, 2001.

EXTENSIONS OF REMARKS

BIPARTISAN CAMPAIGN REFORM ACT OF 2001

SPEECH OF

HON. ROBERT W. NEY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 13, 2002

The House in Committee of the Whole House on the State of the Union had under consideration the bill (H.R. 2356) to amend the Federal Election Campaign Act of 1971 to provide bipartisan campaign reform:

Mr. NEY. Mr. Chairman, The following information I wish to submit for the RECORD on this matter of Campaign Finance Reform.

NEY-WYNN IS THE EFFECTIVE SOFT MONEY BAN

Perhaps the best way to explain the difference between the "soft money bans" is to elaborate on comments by the President of Common Cause, Scott Harshbarger, panning Ney-Wynn. As you may know, Common Cause strongly supports Shays-Meehan, and was apparently heavily involved in drafting much of its language. He incorrectly asserted that Ney-Wynn is just like Senator Hagel's bill, and that Ney-Wynn continues to let in unregulated and unlimited soft money. Both are false—Ney-Wynn does ban (as opposed to cap) soft money for Federal election activity.

First, with respect to Senator Hagel's approach, I have reviewed both bills, and am of the view that any comparison to Ney-Wynn is an oversimplification. Senator Hagel's bill merely put a limit on the amount of non-federal funds the party committees could accept. It put no restriction whatsoever on how the money could be spent, and would not have dramatically altered how party committees currently operate. Party committees would have still been free to run so-called "soft money issue ads" and engage in other similar activities. It would not have forced the party committees to use federal money for federal election activity.

On the other hand, the Ney-Wynn bill would radically alter how party committees on both sides of the aisle operate. Unlike Hagel, it bans soft money for federal election activity. It bans us from doing so-called "soft money issue ads." In short, Ney-Wynn actually accomplishes what the reformers want—an end to party committee soft money being used in Federal elections via the back door.

With respect to soft money, Ney-Wynn bans the party committees from using it for any Federal election activity. As for the limited amount that party committees will be allowed to accept, all the Ney-Wynn bill does is treat party committees the same as corporate and union PACs, allowing us to use limited soft money contributions for fundraising and administration. And that's all—it can't be transferred, used for issue ads or the like. In fact, Senator McCain himself voted to let this use of soft money continue.

Moreover, Ney-Wynn is consistent with the recent decision in Colorado Republican II, where the Court said that "[a party committee] is in the same position as some individuals and PACs." It also avoids the issue presented in Jacobus v. Alaska and a recent opinion letter from the Attorney General of New Hampshire (finding total contribution bans are unconstitutional). So as to ensure that the Ney-Wynn ban is truly a ban, even voter registration and get out the vote conducted within 120 days of a federal election must be paid for entirely with federal hard dollars. But critically, this limitation still allows the party committees the ability to do voter registration and other outreach.

Several state laws already ban soft money in this way, most notably Texas and New York, and to a certain extent, Florida and California. States that have taken the Shays-Meehan approach tend to be left-of-center, and eventually try some form of public financing. The current Shays-Meehan actually mandates that public financing be studied.

As someone who has intimate knowledge of the financial and political operations of party committees, I believe Ney-Wynn is a radical change. It will force the parties to use hard dollars for our activities, but still allow us the resources to assist our candidates in getting their messages heard. The party committees will remain able to drown out special interest ads, albeit with hard dollars. In sum, Ney-Wynn achieves what ought to be everyone's common goal: allowing the candidate's voice to be the central voice in American politics.

Shays-Meehan will have the opposite effect—it simply attempts to emasculate the political parties, and leave candidates to fend for themselves. It does not make any effort to ensure that parties continue to register voters and involve people in the process. Once the Shays-Meehan experiment inevitably makes matters worse, reformers will then insist that public financing of all Federal elections is the only option left.

As for soft money, Shays-Meehan does not constitute a soft money ban with respect to federal election activity. Contrary to what has been repeated time and time again, "soft money" is neither unlimited nor unregulated. Over 30 states have passed limits or outright bans on corporate and union money, including contributions to state political parties—laws that Shays-Meehan actually preempt. In fact, when the full impact of the two bills is analyzed, particularly in light of the application (or preemption) of state law and the $30 million soft money loophole, Ney-Wynn constitutes the more effective soft money ban. It has the added advantage of requiring disclosure of third-party issue ads that is consistent with judicial precedent.

Please contact me with any questions or concerns.

[Institute of Governmental Studies and Citizens Research Foundation Policy Brief, July 6, 2001]

ASSESSING THE IMPACT OF A BAN ON SOFT MONEY: PARTY SOFT MONEY SPENDING IN THE 2000 ELECTIONS

(By Ray La Raja and Elizabeth Jarvis-Shean)

This policy brief examines how national, state and local parties of the Republicans and Democrats spent soft money in the 2000 Elections. Our findings demonstrate that the state parties, which receive about 83% of their soft money from national party transfers, are the primary venue for soft money spending. About 44% of state party soft money spending went toward media activities, while 15% was invested in mobilization and grassroots activities. Parties target their media and mobilization spending in competitive states. The Democrats rely more on soft money for campaign activity than Republicans. Spending on all campaign activities—media, mobilization and grassroots—has been increasing over the past several election cycles. If soft money is banned—or simply curtailed within 120 days of a general election—it is likely that both media and party building activity will be reduced significantly unless the parties can make up for the shorfall with hard money.

The purpose of this report is to furnish basic data about soft money spending in the 2000 elections as a way to understand the potential impact of campaign finance reform legislation being debated in the 107th Congress. In particular, we consider the effect of a ban on soft money, a provision that remains the centerpiece of a bill sponsored by Senators McCain and Feingold, and passed by the Senate on April 2, 2001. The House of Representatives will soon consider a similar version of the bill. Much of the debate over reform considers the effect of eliminating soft money on party activities. Will the parties be weakened? To what degree are parties using soft money for issue ads? In this report we assess how parties spent their soft money in past elections as a way to understand the likely consequences of banning or restricting soft money.

Soft money includes funds that parties raise that lack the contribution limits set by the Federal Election Campaign Act of 1971 and its amendments. Under federal law, soft money may be used for party building but not direct candidate support. Advocates for banning soft money argue that its elimination is essential for preserving the integrity of the electoral system. Their underlying premise is that soft money corrupts the political process by allowing wealthy donors to trade political money for favorable treatment in policymaking in Congress and the Executive branch. Some argue that even if candidates are not corrupted, voters perceive that the exchange is corrupt or that parties abuse campaign finance laws by using funds illegally to help their candidates. Such perceptions alienate voters from the political process and undermine the legitimacy of the nation's political institutions.

Others argue, in contrast, that a ban on soft money will damage American democracy. Citing several court decisions, they

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.
Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

claim that constraints on political activity run counter to the 1st Amendment. Another line of argument contends that eliminating soft money will weaken an essential political institution in American democracy—the political parties. Removing this resource will weaken parties relative to other political actors such as interest groups, and reduce the party's efforts to get voters to the polls. Rather than reinvigorate political participation, the McCain-Feingold reforms might actually reduce citizen activity.

The arguments on either side deserve rigorous empirical scrutiny. It appears, however, that Congress is poised to enact legislation without considering some basic information about soft money. Drawing on financial data about parties released by the Federal Election Commission, we try to shed some light on the uses of soft money. We are hardly prepared to provide an in-depth analysis to address the claims of either side in this upcoming reform debate in the House. Instead, our goal is to provide an empirical foundation to help policymakers consider carefully the ramifications of their decisions.

The questions we ask are simple, but to our knowledge they have not been addressed adequately. How did parties spend soft money in the 2000 elections? To what extent did they use soft money to finance "issue ads?" How much soft money went toward traditional voter mobilization efforts and other party building activity? Did parties spend differently from prior elections?

Using data provided by the Federal Election Commission we explore these questions about soft money spending. We categorized more than 500,000 entries of itemized expenditures by national, state and local parties in the 2000 elections. Our framework for examining soft money is to consider what would happen if the McCain-Feingold bill was made into law. The key provisions of the bill, as they pertain to party soft money, are the following:

National parties

May raise or spend only hard money (i.e., limited contributions, no labor or corporate contributions).

May not make contributions to non-profits.

State parties

Must use hard money to fund any "federal election activities" (defined as Get-Out-the-Vote, or voter registration in the 120 days preceding an election) during a federal election year.

May fund "federal election activities" with soft money capped at $10,000 from the same source if state laws permit.

Candidates

Banned from raising soft money for "federal election activities."

Non-profits

National parties banned from making or soliciting contributions to nonprofits; candidates banned from raising soft money for non-profits for "federal election activities."

FINDINGS I

How did parties spend soft money in the 2000 Elections?

Parties at the federal, state and local level spent almost half a billion dollars in soft money in the 2000 elections. These funds were spent primarily by the state parties because federal and state regulations are more permissive of soft money spending at this level. The 100 major state parties—Democratic and Republican—spent approximately $340 million in soft money. The national parties, in contrast, spent only $136 million. The national parties, however, raised a good portion of soft money and then transferred it to the state parties. According to the Federal Election Commission, the national committees raised approximately $496 million in soft money and transferred $280 million (56%) to the state parties.

Local parties (158 of them) spent only $4 million. It should be noted that federal, state and local parties spend additional soft money in non-federal elections. But because these funds are not related in any way to a federal election they do not have to be reported to the Federal Election Commission. Therefore, the soft money data we collected pertains only to campaign spending related to federal elections. We should also point out that we are reporting only soft money figures here. By law, parties are required to match soft money with hard money for each activity, using complex accounting guidelines provided by the Federal Election Commission. If we included the hard money figures in several of the subsequent tables, the spending in these categories would be 40% to 50% higher.

For national parties, most soft money (about 43%) is invested in overhead and basic administrative costs of maintaining the party headquarters in Washington. Unsurprisingly, the next largest expenditure is for fundraising (approximately 39%). It appears that little more than 13% of national party spending goes directly into campaigns for media and mobilization activities. Based on our analysis of party spending reports, we believe the bulk of media spending includes the cost of producing and airing television and radio ads. Mobilization spending, in contrast, includes the "ground" activity: registering and identifying voters, Get-Out-the-Vote (GOTV) phonebanks and precinct canvassing, and costs of direct mail. Although the national parties spend a small portion of their soft money on these activities, their investments are significant in absolute terms, investing $10.3 million on media-related activities and $7.4 million on mobilization activities.

State parties use soft money more than other party committees. In the 2000 Elections, they spent 2.5 times as much soft money as national parties. Through transfers, however national parties supply approximately 83% of the soft money that state parties spend for federal related activities. At the state level, 44% of soft money for federal related activities ($149.3 million) is invested in media, a significant increase from the 1996 election in absolute terms, as well as a rise in the portion of the party budget devoted to media. Clearly, state parties are major sponsors of issue ads. Another 12 percent of the budget ($41.8 million) goes toward ground mobilization activities, much of it targeted in competitive states. Only 4% of state party budgets reflect grassroots campaign activity that includes distribution of bumper stickers and pins, the staging of rallies and related volunteer work ($11.3 million). State parties rely heavily on soft money for office upkeep and general administrative expenses ($99.5 million or 29% of budget).

Finally, local parties use very limited amounts of soft money in federal elections. Among the 158 local major parties that submitted campaign finance reports to the Federal Election Commission, their total soft money spending amounted to just $4 million. More than half of this was for party administration and overhead. Only 2% was used for media, 10% was for mobilization work and 5% for grassroots activities. Local parties are obviously more concerned with local elections so it is unsurprising that they spend so little soft money in fedeal election activity. Furthermore, much of their work does not involve the costly technical aspects of modern campaigning such as broadcast media. On the other hand, it seems reasonable to expect that more soft money would make its way to the local level since the intent of amendments to the Federal Election Campaign Act was to encourage grassroots party building.

How does soft money spending in the 2000 elections compare to earlier elections?

One question that arises in the current debate is whether parties have transformed themselves into campaign media organizations through financing issue ads with soft money. The data provide evidence that state parties have become important venues for producing and airing issue ads, something they did not do prior to the 1996 elections. On the other hand, state parties continue to use soft money for party building activities as they have in the past.

In the 2000 elections, state parties invested significantly more soft money directly in campaigns than in prior elections. For example, they spent $149.1 million on media-related activity, more than double their expenditures in 1996. The portion of total party soft money devoted just to media increased from 37% in 1996 to 44% in 2000. Spending on mobilizing voters through the "ground campaign" (telephones, canvassing, direct mail) increased from $16 million in 1996 to almost $42 million in 2000, a boost of 160 percent. The share of the soft money budget devoted to this activity increased from 9 to 12 percent between 1996 and 2000.

In 1998, media and mobilization spending was more evenly distributed than during a presidential election cycle. During the 1998 elections, 17% of soft money went toward media and 12% toward ground mobilization. These figures suggest that the media strategies of presidential campaigns drive much of soft money spending. Nonpresidential contests do not always rely as heavily on a media campaign strategy as presidential contests, even though soft money has played an increasingly important role in financing issue ads for congressional campaigns.

State parties continue to rely a great deal on soft money to maintain the party headquarters, paying for staff salaries, benefits, office equipment and other basic necessities. In the 2000 elections, parties spent almost $100 million on administration, a 38% increase from 1996. Administrative costs reflected 29% of all state party soft money spending in 2000, which was a much smaller portion that in the 1996 elections.

What can we surmise from these data? To the dismay of those seeking definitive evidence to confirm their point of view, the data appear to support both reformers who favor a ban on soft money and those who highlight the virtues of soft money. Advocates of a ban are accurate in observing that the parties abuse their access to soft money by using it for thinly disguised issue ads that actually help the campaigns of particular federal candidates. The parties can hardly claim that their recent media spending is part of a conventional party building strategy when state parties spent virtually no money on issue ads prior to the 1996 elections. On the other hand, those who say a ban on soft money would weaken parties have grounds for concern. It would be wrong to claim that party soft money has not been invested in building the party. Soft money spending on mobilization and grassroots increased substantially with each election for which we have data. It is also clear that soft money pays for a significant share of maintaining the party headquarters.

What effect will the "120-Day Rule" have on party activity?

The McCain-Feingold bill allows parties to spend soft money up until 120 days before the general election, so long as contributions are capped at $10,000 per source. We assume that the motive of this provision is to enable the parties to engage in partybuilding in the early build-up to an election, without letting them use soft money directly in federal campaigns just before the election. With this in mind, we observe how much soft money was spent before and after this 120-day marker. We find that only one-quarter of soft money is spent prior to this 120 day marker. Parties invest the vast majority of soft money within the final four months of the election.

Which activities will be affected the most by the 120-day rule? If the intent of the provision is to root out much of party spending on media activities it might achieve this result. Only 7% of media spending came before the 120-day mark. Of course, under this new rule, parties could simply frontload issue ads (if they learn how to craft ads that do not violate other provisions of the new law). But undoubtedly, the impact of media advertising is strongest closer to the election and party strategists will likely seek ways to get around this new provision. Our hunch is that they will spend soft money on issue ads prior to the 120-day marker, and then invest heavily in "independent" issue ads that require hard money. Recent court decisions protec tthe party's ability to spend without limits when they operate independently from the candidates.

In the effort to eliminate soft money issue ads, it appears that party-building activities will also be affected. Only 9 percent of spending on voter registration and GOTV activities takes place before the 120-day point. Similarly, only 11% of grassroots and traditional party "hoopla" take place before this point. Unsurprisingly, the parties spend significant soft money before the four-month window on maintaining headquarters and raising funds in anticipation of the intense campaign activity to follow. A soft money ban within 120 days of an election will not only reduce party spending on media, but also curtail party building activities Congress intended to encourage through revisions to the Federal Election Campaign Act during the 1970s.

Are there partisan differences in soft money spending?

A common concern among policymakers is the relative effect of a ban on either party. Who might be hurt more by banning soft money, Republicans or Democrats? Surely, party members will not want to change campaign finance laws in ways that put their party at a disadvantage. It appears that the Democrats rely more heavily on soft money for direct campaign activity than Republicans. Democrats, for instance, outspent Republicans $87 million to $62 million on media with their soft money. Similarly, Democrats invested more than Republicans in mobilization with soft money, but the difference is not as great as for media. Republicans use more soft money for party overhead than Democrats, and use it slightly more for fundraising.

The explanation for the Democratic strategy is that the Republicans raise far more hard money than Democrats. It appears, then, that Democrats try to make up for the difference with soft money, using it in ways that might benefit their federal candidates as much as possible. While both parties use soft money to benefit federal candidates directly rather than for generic party building, the Democrats have a far stronger incentive to employ this strategy than Republicans. We can only speculate whether the large figure for "unidentified" expenditures ($18.7 million) suggests that the Democrats are reluctant to reveal the way they use soft money to influence federal campaigns.

Given these findings we expect the Democrats to suffer the most from a soft money ban in the short term, since they use it to make up for their relative deficiency of hard money. Over the long-term the Democrats might be able to reach parity with Republicans hard money fundraising, although traditionally the Democrats have been less successful soliciting small contributions than Republicans.

Table 5 (not shown) is further evidence that soft money is important to both parties in federal elections. It demonstrates that the parties concentrate their money in competitive states. The 10 party organizations that spent the most on media were in states with a highly competitive presidential or Senate campaign, or both. These included 6 Democratic and 4 Republican organizations. The average media expenditure among all 100 state parties was 63 cents per voter. Those in the top 10 spent in the range of $1.91 to $9.73 per voter.

Table 6 (not shown) provides the same analysis for party expenditures on mobilization. The average mobilization expenditure among all 100 state parties was 19 cents per voter. Those in the top 10 spent in the range of 40 cents to $1.39 per voter. Interestingly, Democratic organizations comprised the first 8 of 10 organizations in this top category, demonstrating a preference for this mobilization strategy in tightly contested races. For Democratic organizations, the average expenditure on mobilization was 24 cents per voter, while it was only 14 cents per voter for Republican committees.

SUMMARY POINTS

National parties use soft money mostly for party overhead & operations, as well as fundraising. They also transfer 55 percent of their soft money to state organizations, which perform much of the campaign work.

State parties rely on soft money to perform a variety of campaign activities: Approximately 44% was spent on media ($149.4 million); 29% on party overhead and operations ($99.5 million); and 15% on direct mobilization and grassroots ($53.1 million).

The "120-day rule" that prohibits soft money spending within 120 days of a general election could eliminate as much as 3/4 of soft money spending: 89% of spending on issue ads falls within 120 days of the general election; and 91% of spending on GOTV and registration falls within 120 days of the election.

Democrats will likely be hurt by a ban on soft money more than Republicans in the short term: Democrats spend more soft money on media and mobilization than Republicans. Democratic organizations, on average, spent 85 cents on media per voter and 24 cents on mobilization per voter. Republicans, in contrast, spent 42 cents and 14 cents on media and mobilization per voter, respectively.

The parties concentrate their soft money resources in the closest races: States with competitive presidential contests spent the most on media and mobilization per voter.

The corrupting influence of unlimited soft money contributions and expenditures, whether real or perceived, is cause for concern and perhaps legislative action. Such action should target underlying problems, while attempting to minimize harmful unintended consequences. The McCain-Feingold bill, with its 120-day amendment and $10,000 contribution limit, will eliminate most soft money spending, including spending 12 on thinly disguised candidate ads parading as "issue ads." But it is likely that voter mobilization efforts will be reduced as well. The dramatic increase in soft money media expenditures is driven by the belief that this expensive campaign activity delivers results at the polls. In an effort to prevent corrupt contributions and purge issue ads, the McCain-Feingold bill will constrain the party in other ways. State parties, particularly in states where the parties rely on major donors, will find it more difficult to pay administrative costs, even as they augment efforts to raise money from smaller donors. It is also conceivable that media expenditures will maintain current levels and be paid for with hard money as "independent" party expenditures. Given finite resources, broadly based party-building, including voter registration and mobilization, may suffer the most. Certainly there are no guarantees, but it is a plausible outcome that should be kept in mind as the House begins debate on campaign finance reform.

*598 SOFT MONEY, HARD MONEY, STRONG PARTIES

(Stephen Ansolabehere and James M. Snyder, Jr.)

Political parties are central to current efforts to reform campaign finance in the United States. Party money constitutes approximately half of all campaign funds raised at the national level. Limiting party money is, thus, integral to campaign finance reform. This Article examines what might be gained and lost if regulations on party money are imposed. Proponents of stronger (and better financed) parties conjecture that strong parties increase the ability of voters to hold their representative's accountable. We find that such benefits are, in practice, minimal. Instead, we argue that the main benefits of party money, especially soft money, derive from the parties' campaign activities. Soft money finances state party organizations' voter registration and mobilization efforts, which have substantial effects on turnout. Reducing party money will, thus, reduce participation. The benefits of limitations on party soft money must therefore be weighed against likely reductions in voting that would result.

INTRODUCTION

American campaign finance law is often described as more loophole than law. Congress and the courts, sometimes working at cross-purposes, continually attempt to clarify and perfect existing regulations, but as campaign practices evolve, candidates, parties, individuals, and groups devise clever, new ways to bend the rules. Today, efforts to reform campaign finance focus on the transfer of national party funds to state and local organizations. Political parties raise large sums from individuals, corporations, and other associations. They then channel these funds to state and local party organizations, which in turn conduct campaign activities that indirectly and sometimes directly affect federal elections. This was an intended consequence, a genie that Congress meant to let out of the bottle. Our concern is with the effects of putting the genie back in.

In 1979, Congress amended the Federal Election Campaign Act ("FECA"), [FN1] excluding state and local party building activities from the federal contribution limits. [FN2] The Federal Elections Commission ("FEC") further clarified the law in a series of rulings, which in essence allow individuals and organizations to give unlimited amounts of money to the national parties' "non-federal" accounts. [FN3] Funds in such accounts are intended *599 for "party activities" at the state and local levels, and may not be contributed to or spent in coordination with federal candidates. Behind this exemption, since termed "soft money," lies a simple objective: Strengthen the political parties.

The soft money loophole arose in response to two forces: the sorry state of national parties in the 1970s and the long-held belief among political scientists that stronger national parties would improve the ability of voters to hold government accountable. National parties in the U.S. have never had well-financed organizations. [FN4] and in the 1970s, their situation appeared especially dire. The national party organizations reputedly needed a greater presence in the new world of campaign finance created by FECA, which put candidates at the center of national political campaigns. [EN5] FECA imposed new restrictions on the amounts that national parties could give to candidates and on the ways that the parties could raise money. These restrictions hit the Democratic National Committee ("DNC") particularly hard, as the committee labored under debt from the 1968 and 1972 campaigns.

Soft money also answered a century of political science speculation and theorizing. Political scientists have long argued that the absence of strong national party organizations in the U.S. limits the ability of voters to hold government accountable for public policies. [FN6] In order to hold the government accountable, voters need to face clear, programmatic choices. Party money is one means to this end.

Parties are able to impose discipline on their members, acting as a counterweight to the many special interests that may chip away at the public good behind legislation. [FN7] Expanding party money might also weaken the influence of interest *600 groups by lessening the unique campaign finance advantages of incumbents, which derive substantially from interest group contributions. [FN8] This argument received its most famous expression in a report of the American Political Science Association published in 1950 and entitled "Toward a More Responsible Two-Party System." [FN9]

The committee that crafted the report recommended three concrete changes in the practice of politics that would improve accountability: more programmatic parties, greater democracy within the parties (such as primary elections), and deregulation of the parties' campaign fundraising activities. [FN10] On all three counts, American politics have moved in the direction of the committee's proposals and its vision of responsible party government. The parties within Congress exhibit much more party line voting today than they did in the 1970s, providing voters a much clearer choice. [FN11] Primary elections and other party reforms in the 1960s and 1970s created more democracy within the parties. [FN12] The consequence of those changes in our national politics is the subject of intense scholarly scrutiny. [FN13] Our concern is with the third factor in the contemporary experiment with stronger parties, the money.

Today, the American political parties are prolific fundraisers. In 1998, for example, Democratic and Republican national party organizations raised $445 million for their federal (hard money) accounts, and $224 million for their non-federal (soft money) accounts. [FN14]

Party money has not been heartily embraced by the public, politicians or political scientists. Twice, Congress has nearly closed the soft money loophole. [FN15] Campaign reform bills proposed by Representatives Shays and Meehan and by Senators McCain and Feingold passed the House of Representatives in each of the last two Congresses, and have failed in the Senate only because a minority of senators sustained filibusters. *601 [FN16] Scholarly and popular commentary has similarly turned against party finance, and against soft money in particular. The objections are not that the parties have become too strong. Rather, it is alleged that party finance practices have inadvertently increased the political leverage of interest groups [FN17] and have ruined the ability of government agencies to regulate the system of political finance. [FN18]

Specific objections to soft money emphasize the evasion of existing limits. Following Buckley v. Valeo, [FN19] contribution limits on individuals and groups became the centerpiece of campaign finance regulations in the United States. [FN20] In each election, individuals may give no more than $1,000 to a candidate, up to $20,000 to national party organizations, and a total of no more than $25,000 to all federal candidates. Organizations may give no more than $5,000 to a candidate and $15,000 to national party organizations in each election. The 1979 amendments to FECA provide an avenue through which groups and individuals can avoid these limits, giving unlimited amounts to the parties' non-federal accounts. [FN21] In addition, organizations, especially corporations, can avoid having to set up a separate and segregated fund, commonly called a political action committee ("PAC"), through which the organizations raise money for federal elections. Finally, soft money is widely seen as an evasion of presidential spending limits, as presidential candidates can raise money for the "non-federal" accounts of the DNC and RNC and those funds can be spent in battleground states.

Critics of contemporary campaign finance raise a more generic concern about party money. Interest groups might capture or corrupt the parties, just as they allegedly compromise congressional decisionmaking. Soft money is raised without contribution limits; many of the donations exceed $100,000 and come from corporations, associations, and individuals with strong interests in legislative and executive decisions facing the government. Large donations from a specific interest or industry, it is feared, might convince the party caucuses within Congress or the president to protect that interest. Our aim is to put the essential claims about party money to empirical scrutiny. First, how apt is the traditional view of parties? Does party money produce greater degrees of electoral accountability and legislative discipline? Second, how accurate are contemporary critics of parties? Is party money, especially soft money, swamping the system? Has FECA's system of contribution limits broken down? Finally, what would be the *602 practical political consequences of further constraining party money raised for state and local parties and elections? We analyze these questions through the lenses of campaign finance reforms that would end soft money.

Part I of this paper details how parties raise money and how they handle it, especially in contrast to how candidates raise money. Here we assess how much money would be affected by proposals to close the soft money loophole, and whether the rise of soft money signals the failure of the contribution limits established by FECA. Part II assesses two key claims about party money and party discipline in national politics: that party contributions and expenditures foster electoral competition and that party money creates greater party discipline within the legislature. In this Part we argue that the parties do produce more electoral competition, but that a ban on soft money would have little impact on national party politics. Part III of this paper explores how party money is used at the state level, especially for grass roots activities. Here we project that a complete ban on soft money would significantly curtail grassroots activities of state party organizations and would significantly reduce participation, a consequence that has as yet received little attention in national discussions about campaign finance reform.

I. Party Money Amounts and Accounts

Party money is extremely important: It accounts for nearly half of all campaign money raised at the national level, [FN22] But, as we document, the importance of party money has not changed much over the last twenty years.

To measure the importance of national party fund raising we contrast the resources of parties to those of candidates, rather than to interest groups. There are four reasons for this contrast. First, recent political science scholarship emphasizes that candidates have eclipsed parties as an organizing force in voting behavior and elections. [FN23] The rise of personal voting and the incumbency advantage over the last forty years suggests that many voters focus on the individual politician more and rely on party less. [FN24] Individuals and groups may choose to channel their resources either to parties or individual candidates. The decline of parties is often traced to increases in the campaign resources of individual candidates, especially incumbents, and declines in electoral resources and activities *603 of party organizations. [FN25] Do parties command substantially fewer resources than candidates do? Surprisingly, in our world of candidate-centered campaigns, parties and candidates attract approximately the same amount of money. [FN26]

Second, party committees are essentially campaign operations and are, therefore, most appropriately compared to candidates, rather than to political action committees. Parties seek to win a majority of seats in the legislatures or control of the executive office, and they do so through direct campaigning and by assisting their local campaign organizations. FEC reports reveal that parties are not primarily operations for donating money to candidates. Less than one percent of party money is contributed to federal candidates, and only about ten percent is spent on their behalf. [FN27] FEC audits of party committees reveal that the national Republican and Democratic organizations spend their funds on overhead, fundraising, and their own campaigns to win control over government, including grassroots organizing and television advertising, as well as on recruiting and training candidates and campaign organizers. An audit of the RNC's 1984 accounts revealed that approximately thirty percent of that money was spent on direct campaign activities, such as advertising and field operations; an additional third went to fundraising. [FN28] An audit of the Dukakis campaign in California, and of the California State Democratic party, in 1988 showed that half of the funds went for field operations, such as get-out-the-vote drives, canvassing, and direct mail; twenty percent went for media. [FN29] These figures are remarkably similar to the activities of federal candidates, whose reports to the FEC reveal that thirty percent of congressional campaign money goes for media advertising and about twenty percent goes for grassroots campaign activity. [FN30]

Third, candidates are the relevant benchmarks against which to compare party finance because the government is ultimately organized both by individual politicians and by parties of politicians. The U.S. House and Senate, for example, are organized into committees, which are often tailored to members' and constituents' interests, as well as party hierarchies. If contributors can influence public policy or change the composition *604 of the government with their campaign donations, then they may be able to achieve their ends either through donations to politicians or to party committees. Finally, parties and candidates draw on the same pools of donors—individuals and organizations, especially corporations. But, different restrictions apply to candidate and party fund raising. Donations to federal candidates and party committees fall under the contribution limits imposed by FECA, and individuals and groups face lower contribution limits when they give to candidates than when they give to parties. Also, non-federal party accounts are not subject to federal contribution limits. [FN31]

Table 1 contrasts the receipts of federal candidates and of national party committees over nine election cycles in the 1980s and 1990s. The first and second columns of the table display the amounts raised by congressional (House and Senate) and presidential candidates, respectively. The Presidential funds include public funds provided in the primary and general elections. The third and fourth columns display the parties' federal (hard money) and non-federal (soft money) receipts. [FN32] Official FEC reports on soft money are not available for the early 1980s, and the amounts are presumed to be small. For 1984 and 1988, we include some estimates provided by the Citizens' Research Foundation and other sources.

Table 1. Candidate and Party Funds

Some double counting exists in the table because party committees and candidates may contribute money to each other. Surprisingly little money flows between parties' and candidates' treasuries. Parties contributed only about $5 million directly to candidates in 1998, accounting for less than one percent of candidates' funds. [FN33] In addition, parties' coordinated and independent expenditures totaled $67 million in 1998. In total, parties only spent about ten percent of their funds on federal election campaigns at the national level, and almost all of these expenditures are advertising and other coordinated and independent expenditures made by the parties, rather than direct contributions to candidates. Even less money goes from candidates to parties. Federal candidates contribute only a trace of their money to national party committees. [FN34] Parties and candidates, then, represent distinct campaign fund raising venues in national politics; one does not feed the other. More money flows among the party committees. Twelve percent of soft money in 1994 and ten perent of the soft money in 1998 came from 605 other accounts of the national parties. This indicates that the FEEC reports suggest that there is more soft money than there actually is. Funds transferred from one non-federal account to another are simply double counted. Funds from federal to non-federal accounts should properly be considered federal money, as they were originally raised from individuals and corporations according to federal contribution limits. Actual soft dollars totaled $89.8 million in 1994 and $196.8 million in 1998. [FN35]

The contrast between party and candidate national fundraising helps put the parties in clearer relief. First, the data in Table 1 reveal that under FECA candidates and parties play roughly equal roles in campaign *606 fund raising. Federal and non-federal money, amounted to approximately forty percent of all money raised at the national level in the 1990s. [FN36] The fraction of all money going to candidates in Table 1 is fairly stable, averaging 60 percent, but never more than 65 percent or less than 55 percent. The equality of candidate and party money is somewhat surprising given the emphasis within political science on the rise of "candidate-centered" campaigns. The importance of parties, though, should not be seen as evidence that FECA has gradually broken down. The parties appear to be a constant in American campaign finance, and this is accommodated by FECA.

Second, the parties have changed how they handle their funds somewhat, relying increasingly on non-federal accounts. Much of the recent growth in the parties' treasuries has come through non-federal funds. The hard money accounts of parties have grown much more slowly than the hard money accounts of candidates. From the early 1980s to the late 1990s, House and Senate money (in off-year elections) grew 85 percent. Over that same time period, the federal accounts of the parties grew by only 45 percent. [FN37] Parties have kept pace with candidate fund raising through soft money.

Reports on the amounts of soft money before 1992 are highly incomplete. The Citizens Research Foundation estimated the amount of soft money in 1984 as $22 million, which amounts to about 5 percent of the party money raised that year. [FN38] The figures in Table 1 reveal that by the end of the 1990s soft money had risen to $200 million.

Third, soft money, though it has grown, is still a relatively small fraction of party money and of all money. By the end of the 1990s, non-federal accounts handled slightly less than a third of all party money. Even with this growth, non-federal accounts still handle much less money than federal accounts, and contributions to and expenditures from federal accounts must still comply with contribution limits set by FECA. Table 1 reveals that by the end of the 1990s, soft money accounted for just 15 percent of all money.

Soft money, as it is commonly discussed, has a more negative connotation than simply the amounts of money flowing into non-federal accounts. Soft money has become synonymous with money laundering. Parties, interest groups, and candidates reputedly avoid the limits on group and individual contributions to federal candidates and parties by funneling money raised in national accounts to state and local organizations. The state and local organizations serve merely as fronts for the federal candidates' and parties' campaigns. How much money exceeds the limits?

Total non-federal party money provides an upper bound estimate of the amount of money that is given in order to evade contribution limits *607 on individuals, corporations, and other associations. The figures in Table 1 suggest that the amount evading the contribution limits is small relative to the amounts subject to the limits. Even with the soft money loophole, two-thirds of all contributions to parties go to federal accounts and are subject to contribution limits. Party money constituted about 45 percent of national campaign finance in 1998; non-federal accounts handled only 15 percent of all money raised in 1998 at the national level.

Not all donors to non-federal accounts exceeded the limit that they would have been subject to had they contributed to a federal committee. In 1998, approximately 18,000 different donors gave to the national parties' soft money accounts. Only eleven percent gave more than $20,000 to soft money accounts, which is the limit on contributions to party committees. This relatively small number of donors gave 78 percent of the soft money—that is, $153 million of $196 million. This is a very large amount of money "skirting" the limits, and it is a cause for concern. However, it represents only 12 percent of all money raised by candidates and parties at the national level. [FN39]

Closing the soft money loophole will not force all of the money in parties' non-federal accounts out of politics. A sizable amount of non-federal money ($42.6 million out of $196 million) is raised within contribution limits, and we suspect that federal committees would likely attract these funds if non-federal accounts did not exist. [FN40] In addition, if soft money is banned, donors to these accounts might redirect their contributions to other accounts—to hard money accounts, to candidate accounts, or to state and local organizations directly.

II. Party Money in National Elections

Current campaign finance reform efforts, such as the McCain-Feingold bill, aim to eliminate soft money entirely. If those efforts succeed, what will be the consequences for national and state politics? We turn first to the national level. The concern for national politics, as political scientists have described it, is whether restrictions on party resources would lessen the ability of voters to hold the government collectively accountable. [FN41] Party finances may improve accountability in two ways. First, party contributions and expenditures in national elections might increase electoral competition. In particular, party money is often thought to be a counter-weight to the inequity between individual candidates' resources, most notably the discrepancies between incumbents' and challengers' financial advantages. Second, party money might produce more discipline in Congress, as leaders might be able to use contributions as inducements to keep the party's congressional delegation in *608 line on key votes. Greater discipline within Congress on votes central to the parties' programs would allow the parties to stake out clear policy or ideological positions. As a result, voters would be better able to distinguish the choices they face in the election and to reorient the government if they did not like the direction of the governing party. [FN42]

A further concern is how the parties conduct their own campaigns. If a sizable share of the money goes to voter registration and mobilization, then party money might foster accountability by encouraging people to vote and make their preferences heard. Here, we address the first two concerns; we leave the third issue to the next section, as that is more readily addressed at the state and local level.

A. Does Party Money Increase Electoral Competition?

Many students and observers of Congress complain bitterly about the lack of competition in congressional elections. They cite such facts as the high incumbent reelection rate (averaging over 95 percent since 1980): [FN43] the "vanishing marginals"; [FN44] the incumbency advantage in voteshare, around 8 percent; [FN45] and the huge advantage incumbents have in fundraising. [FN46] Weakening the fundraising capabilities of parties would probably reduce competition. [FN47] Party money flows to more competitive races. [FN48] Also, as we show here, party money flows much more freely to non-incumbents than PAC money does. [FN49] The panels on the left-hand side of Figure I show the natural log of party money (including coordinated expenditures), plotted against the Democratic vote-share, for each House race between 1978 and 1998 that was contested by both major parties. The top left panel shows the relationship between Democratic party money *609 and electoral closeness: the bottom left panel shows the relationship between Republican party money and electoral closeness. A unit change in the logarithmic scale can roughly be interpreted as a one percent change in the variable. The graphs, then, represent how a percentage point change in the Democratic vote share corresponds to a percentage chance in the amount of party and PAC money received. The symbols are "I" for races incumbents. "C" for races with challengers, and "0" for open seat races.

Parties clearly, target closer races. The curves on the left have a distinct inverted-U shape, with a peak at almost exactly .5. showing that Democratic and Republican party committees target close races. Also, the curves are relatively symmetric at about .5, suggesting that the party committees concentrate equally on vulnerable incumbents and credible challengers, and tend to ignore safe incumbents and struggling challengers.

Figure 1: Party versus PAC Contributions as a Function of Democrat's Share of the Vote Won, US House Elections, 1978 to 1998.

The panels on the right-hand side show analogous plots for PAC contributions. Although PACs also tend to target close races, there is one striking difference between PACs and parties. While party contributions drop off sharply in noncompetitive races involving incumbents, PAC contributions do not. PACs give nearly as much to safe incumbents as they give to incumbents who are in trouble. Incumbency of course, is nearly synonymous with victory, as approximately 95 percent of incumbents who *610 seek reelection win. [FN50] The asymmetry suggests that PACs are drawn to candidates who are more likely to win. Elsewhere, we have shown that this behavior is consistent with the argument that interest groups give money as an investment in politics, with some expectation of a return for their donation. [FN51] Also, though this is more difficult to discern from the graph, PACs give significantly more to incumbents than to non-incumbents, holding the vote margin constant.

Specifically, PACs give more money to incumbents than they do to open seat candidates who win by the same vote margin or who compete in districts with similar partisan levels. [FN52] What is more, PACs give more to incumbents who lose by I to 5 percent than they do to challengers who win by I to 5 percent. [FN53] This is not true for the parties. Party contributions act as something of a counterbalance to PAC contributions. A back-of-the-envelope calculation gives some sense of what might happen if party money dries up. Consider all races between 1988 and 1998. On average, Democratic challengers received 14 percent of their total campaign funds (including coordinated and independent expenditures) from party committees, and Republican challengers received almost 11 percent of their funds from parties. The corresponding figures for incumbents were 2.0 percent and 1.7 percent, respectively. In a previous paper, we estimated that the elasticity of challenger vote-share with respect to challenger spending .05 to .08 range. [FN54] Using an intermediate value of .07, a 10 percent reduction in challenger spending implies that the average challenger's vote percent will fall by about 2.5 percentage points.

The effect of this counterweight of parties in specific races for Congress is slight, primarily because parties spend so little money on individual races. We are unsure what the effects on electoral competition and turnover might be if the parties were to spend. say, five times more than they currently do on national elections. This is the world envisioned by proponents of stronger parties. such as Dan Lowenstein, who recommends heavy public subsidy of parties to counteract the incumbency advantage. [FN55] The obstacle to forecasting what this world would be like is that it is unclear what circumstances would lead the parties to shift their *611 resources more heavily into congressional campaigns and away from state and local activities.

The bottom line, though, is that significant reductions in party receipts would not change competition in the national elections appreciably. Complete elimination of party contributions and coordinated and independent expenditures would lower challengers' vote shares by 2.5 percent, but the typical challenger today only receives 35 percent of the vote.

B. Does Party Money Buy "Loyalty" to the Parties?

One way to buy loyalty is to help elect and reelect those who are known to be loyal. There is some evidence that at least for Democrats, party committees give more money to House members who vote in line with their party's leaders. [FN56] The evidence is rather weak, however, and other studies find no effects. [FN57]

Showing that party money actually affects voting records is even trickier, because it is extremely difficult to control for the "baseline" level of party support (how much a member would support the party even if he or she did not receive party money). Leyden and Borrelli claim to show an effect, but it is doubtful that have correctly controlled for the baseline. [FN58]

We find mixed evidence for the first claim. We ran a series of Tobit regressions predicting party money as a function of electoral circumstances and party loyalty in roll call voting, measured as proximity to the parties' medians. [FN59] Using the estimated relationship we can measure the *612 expected amount of party money received by loyal and maverick incumbents. Contrast a Democrat who is at the party's median with one at the 25th percentile of his party (in the conservative or moderate direction). The average Democratic incumbent over the period 1978 to 1998 received about $10,000 from the Democratic party's committees. [FN60] The more moderate Democrat received only about $6,000 from party committees. In other words, the effect of being at the 25th percentile of the Democratic party, rather than at its median, cost the more moderate member about $4,000 in party campaign funds. For Republicans, the corresponding difference between the party's median member and a member at the 25th percentile (again in the moderate direction) is just $206—essentially no effect. [FN61]

These slight effects suggest that further restrictions on federal party contributions and spending money would have relatively little effect on discipline within the party. Nevertheless, these effects measure how we predict loyalty rates to change with modest changes in party contributions. It is unclear what the consequences for party discipline might be if the party committees' presence in candidates' campaigns expanded significantly. What seems more certain is that expanding the parties' campaign activities and expenditures would aid challengers somewhat. Parties contribute and spend money in federal races in ways that foster competition. The sums, however, do not appear large enough to make an appreciable difference in the final election outcomes. If anything, the behavior of the parties in national elections suggests that, if our objective is to increase electoral competition and, thus, electoral accountability, then parties command too little of the money spent in American national elections.

One caveat to this implication is in order. Party money is not politically balanced or neutral: Republican committees regularly raise and spend more money than Democratic committees. This pattern is especially strong in hard money accounts; in 1998. Republican committees raised $285 million and Democratic committees raised $160 million in hard money. Over the last decade (1988 to 1998), Republican national campaign committees raised 65 percent of the party money in federal accounts. [FN62] Soft money is more balanced: Over the last decade, Republican *613 committees have accounted for 55 percent of soft money. [FN63] Thus, complete deregulation of party money would likely benefit Republican committees and candidates, and elimination of the soft money loophole may benefit the Democrats.

III. Party Money in State and Local Elections

Closing the soft money loophole would affect state and local party organizations and the voters they reach much more acutely than it would affect national politics. The effects would be two-fold. First, as we show here, eliminating soft money would seriously reduce the party treasuries in many states. Second, eliminating soft money will significantly reduce the campaign activities that state and local party organizations conduct. Soft money appears to subsidize a wide range of activities, including get-out-the-vote drives, broadcast advertising, and day-to-day operations of the organizations. Of particular concern, cutting federal transfers to the state party organizations will likely reduce grassroots campaign activities and produce lower voter turnout as a result.

To provide a thorough accounting of state parties' financial activities, we chose to profile three states—Idaho, North Carolina, and Ohio—across three election cycles, 1991-92, 1993-94, and 1995-96. [FN64] These states appear representative of the rest of the country. Ohio is the seventh most populous state in the U.S., and it has highly competitive elections. [FN65] North Carolina is a mid-sized state (two-thirds the population of Ohio); it too is highly competitive. [FN66]

Idaho is a small state, and leans strongly toward the Republicans, though Democrats have won statewide and federal offices over the last two decades. [FN67]

These states share some important characteristics. All three states have very complete public reporting of the receipts and expenditures of the parties. [FN68] In all three states, the parties' central or executive committees handle almost all of the parties' campaign money. Idaho's party committees raised a total of $3 million in 1996, $2.4 million of which *614 went to the state committees—the Idaho Democratic Party and the Idaho Republican Party. The remainder was distributed evenly across numerous county party, committees. [FN69] The House and Senate caucus committees controlled relatively little. North Carolina also has extremely active county committees; they tend to be recipients of state party money. [FN70] In Ohio, party money is concentrated in the state committees, though the legislative caucuses have played a relatively more important role in the past. [FN71] In terms of party money, these states span much of the observed variation in transfers from non-federal accounts. Combining the 1996 and 1998 elections, Ohio, with 11 million people, received $10.6 million in soft money, North Carolina, with 7.5 million people, received $7.6 million in soft money, and Idaho, with 1.2 million people, received $2.4 million in soft money. [FN72]

Figure 2: Repub. and Democ. Soft Money in States, 1996–1998

Tabular or graphic material set forth at this point is not displayable.

Figure 2 graphs the combined 1996 and 1998 soft money contributions to state parties of Democratic and Republican national committees. [*615 FN73] The graph shows that Democratic and Republican money increase together. In the figure, California, with 32.7 million people, receives by far the most money ($33 million). Ohio ranks with New York and Illinois as the next largest recipients of soft money over the last two election cycles. North Carolina is in a cluster of states that includes Texas, Pennsylvania, Washington, and Kentucky. Idaho is in a cluster of smaller states including Arkansas, Connecticut, and Massachusetts, which received about $2 million total over the two election cycles. The densest cluster of states in the graph is in the lower left corner. One-third of the states received less than $1 million from national parties non-federal accounts over the two elections.

The importance of soft money to state parties is readily measured as the fraction of state party committees' total receipts that come from non-federal national party accounts. How dependent are the states on non-federal accounts for their resources? Using the reports of the state election finance agencies in Idaho, North Carolina, and Ohio, we calculated the total amount of money raised by the party committees in these states, excluding transfers between state party committees. In Idaho, the Republican and Democratic state and local party committees raised a combined total of $1.4 million in 1992, of which $550,000 was soft, and a total of $3.0 million in 1996, of which $1 million was soft. In North Carolina, the state and local party committees raised a total of $10 million in 1992, of which $4.9 million was soft, and a total of $18 million, $5.7 million of which came from soft money accounts. In Ohio, the state and local party committees amassed total receipts of $24.7 million in 1992, of which $8.1 million was soft, and $19.6 million in 1996, of which $7.6 million was soft.

These figures show that state parties depend heavily on soft money transferred from the national party committees. In all of these cases, more than one-third of the state organizations' total funds came from national "non-federal" accounts. Cutting soft money would significantly reduce state parties' financial resources.

How would reduction of these funds affect state parties' activities? It is often charged that non-federal money merely takes the form of advertising for federal candidates cloaked as state and local party building. This perception appears to be wrong for three reasons.

First, national party committees (such as the DNC-State Account) contribute or transfer money directly to the state party committees rather than spend money in the states, which the national committees might do if they were advertising for federal candidates. Nor is the money that they do spend clearly earmarked. Instead, almost all of the soft money that flows into these states is transferred to the general treasuries of state committees, *616 which are controlled by state party organizations. The ultimate decision about how the money is to be spent, it seems, rests with the state committees, rather than with federal committees or federal candidates.

Second, to the extent that we observe direct national expenditures in the states or earmarked money, these funds are dedicated to overhead, such as office expenditures. Ohio is the clearest example. In 1992, the RNC and DNC spent almost ten million dollars in the state; eighty percent of these funds were dedicated to "office" expenditures.[FN75]

Third, the state party organizations spend considerable sums on field or grassroots campaigning, such as direct mail, precinct walks, and voter registration. Documenting the amounts spent on various activities takes considerable effort. Working with the public reports of the parties filed with the state elections commissions in Idaho, North Carolina, and Ohio, we classified each itemized expenditure by the parties in the 1991–92 and 1995–96 election cycles. [FN76] All told there were over 41,000 separate data entries to classify. We divided the expenditures into a fairly detailed category scheme that paralleled the format developed by Dwight Morris and his collaborators. [FN77] We then aggregated these into several broader categories: "grassroots or direct campaigning," "media campaigning," "overhead," "consulting," "contributions," "transfers," and "fundraising."

The state parties spend fairly constant proportions on each of these categories. For our purposes grassroots and media campaigning are of greatest interest. In North Carolina, in both 1992 and 1996, we estimate that the state parties spent approximately 20 percent of their funds on media advertising and 25 percent on grassroots or direct campaigning. In Idaho, we estimate that the parties spent approximately, 15 percent of their funds on grassroots campaigning in 1992 and 1996. They spent just 4 percent on media in 1992 and 9 percent on media in 1996. In Ohio, we estimate that the parties spent 7 percent on media in 1992 and 5 percent on media in 1996. They, spent 32 percent on grassroots campaigning in 1992 and 27 percent on grassroots campaigning in 1996. In each of these states, the parties spent between 30 and 40 percent of their funds on reaching voters directly, the larger category of voter contact being direct voter contact, such as direct mail and canvassing, not broadcast advertising. [FN78]

How will the elimination of party soft money affect the campaign activities that parties conduct? Between 1992 and 1996 we observe for each state changes in the total receipts of the party treasuries as well as changes in their grassroots, or direct campaign, expenditures. The ratio *617 of the change in grassroots expenditures to the change in total receipts measures how the parties translate marginal changes in their receipts into changes in their activities. From 1992 to 1996, Idaho parties' receipts rose $1.5 million. Their expenditures on direct voter contact rose $250,000. For every additional dollar raised, the Idaho parties spent an additional 16 cents on voter contact. From 1992 to 1996, North Carolina parties' receipts rose $8.4 million. Their expenditures on direct voter contact rose $2.15 million. For every additional dollar raised, the North Carolina parties spent an additional 25 cents on voter contact. From 1992 to 1996, Ohio parties' receipts fell $7 million. Their expenditures on direct voter contact shrank, $1.3 million. For every dollar lost, the Ohio parties reduced expenditures on voter contact 18 cents. [FN79] These figures suggest that every dollar lost by the parties from a reduction in federal transfers would cut expenditures on state parties' direct campaign activities by 20 cents. [FN80] Soft money transfers to these states totaled $13 million in 1996. [FN81] Elimination of these funds, we estimate, would cut the state parties direct campaign expenditures by $2.6 million dollars.

How much would turnout decline? In 1996, 7.5 million people voted in Idaho, North Carolina, and Ohio combined. [FN82] To calculate how many fewer people would have turned out without the soft money subsidy of state grassroots activities, we need to know the cost of getting an additional voter to the polls through these activities. From a series of ingenious field experiments. Alan Gerber and Donald Green have estimated the marginal cost of getting an additional person to the polls through canvassing and related means of voter contact. [FN83] They estimate that mobilizing an additional voter costs between $15 and $20. [FN84] These figures suggest that between 170,000 and 130,000 fewer people would have voted in these states in 1996 without the grassroots activities underwritten by the national parties' soft money. In other words, cutting soft money would have lowered turnout in these states by slightly more than two percentage points. [FN85]

*618 CONCLUSION

Party money poses a dilemma, both for those who advocate stronger and more responsible parties and for those who advocate elimination of soft money to reform campaign finance. Broadly speaking, political parties are thought to be instruments of greater political accountability and mass democracy.

Voters can more readily hold stronger, unified national parties responsible for their actions and redirect government if need be. At least since the 1950s, political scientists have argued that we should strengthen the parties organizationally, and that unregulated party campaign money is one of the main mechanisms through which the United States can achieve stronger parties. [FN86] The devil, though, is in the fund-raising. The parties may have to act irresponsibly toward the public in order to raise funds from wealthy individuals, corporations, and other private concerns.

We have considered the concrete tradeoffs presented by proposals to eliminate soft money. In terms of reducing corruption or undue influence, such proposals, at best, can eliminate money that exceeds existing limits. We estimate that soft money contributions that evade existing contribution limits amounted to approximately $150 million in the 1998 elections. We are unsure what that money buys.

We know of no research that provides reliable estimates of the amount of influence purchased with each additional dollar. If we assume that the influence gained from a dollar contributed within limits is the same as the influence gained from a dollar given outside the limits, then limiting contributions to non-federal party accounts would weaken interest group influence over national politics in the United States somewhat, but this money should not be presumed to have much leverage. Soft money currently accounts for only 12 percent of total national campaign fund raising.

Individual legislators do not depend on these funds at all—if anything these funds are a nuisance, as the expenditures likely go to support their opponents. Thus, if the effects are corrupting, they are not corrupting of individual legislators. Soft money might, however, unduly influence the parties. Even still, the national parties raise two-thirds of their money in hard money donations.

Against these possible consequences must be weighed the possible effects of soft money on the "responsibility" of the parties. We have focused on three of the central arguments about what responsibility means: party discipline in policy-making, national electoral competition, and party building activities, especially grassroots mobilizing.

We believe that the effects of eliminating soft money on the ability of the parties to present voters with clear, programmatic choices would be slight. Contrary to the responsible party argument, party money evidently, does not correspond with significantly more party discipline. *619 Among Democrats party, loyalty within Congress and party contributions are correlated; among Republicans, they are not. And the sums are so small that it seems unlikely that the parties have created greater discipline through their campaign finance committees.

Party money, if it continues to grow, might have substantial consequences for national elections. In particular, party money has the potential to counterbalance interest group contributions in congressional elections. PACs account for most of the incumbency advantage in campaign finance. [FN87] Parties, by contrast, give to close races, as suggested in Figure 2, and spend their money efficiently so as to have the largest effect on electoral outcomes. More party money in congressional elections, at least relative to interest group money, would probably produce much higher electoral competition. However, the parties currently give little to congressional candidates and spend little on individual races.

The most troubling effect of closing the soft money loophole is that it would significantly lessen the electoral presence of state and local party organizations. Debates in Washington on bills designed to eliminate soft money, and many political science and popular journals have discussed the many ramifications of eliminating soft money. Little mention, however, has been made of the consequences for the state parties and the voters that they reach. Closing the loophole will starve many grassroots activities of state and local parties. Eliminating all current soft money expenditures, we estimate, would lead to a 2 percent decline in voter turnout—without soft money, approximately 2 million fewer Americans would have gone to the polls in 1996.

[FN6]. The intellectual history on this is long and storied. See, e.g., Austin Ranney, The Doctrine of Responsible Party, Government: Its Origins and Present State (1962) (providing an excellent history of the American writers advocating strong parties at the close of the 19th century and beginning of the 20th century, including Woodrow Wilson, A. Lawrence Lowell, Henry Jones Ford, and Frank Goodnow). Ranney also offers an assessment of the widely held belief among political scientists in the middle of the 20th century that stronger political parties in the United States are desirable, and discusses the conditions under which such "responsible" parties can be achieved. See id. at 155–63.

[FN7]. E.E. Schattschneider provides the classic description of the struggle between parties and interest groups: The real choice is between a strong party system on the one hand and a system of politics in which congressmen are subjected to minority pressures. The assumption made here is that party government is better than government by irresponsible organized minorities and special interests. The parties are superior because they must consider the problems of government broadly, they submit their fate to an election, and are responsible to the public. E.E. Schattschneider, Party Government 193 (1942). See also Morris P. Fiorina, The Decline of Collective Responsibility in American Politics, 109 Daedalus 25, 27–28 (1980) [hereinafter Fiorina, Decline] (providing a more contemporary formulation of Schattschneider's argument); Anthony King, Running Scared 181–87 (1997) (discussing various ways to strengthen American Political Parties).

[FN46]. See Gary C. Jacobson, Money in Congressional Elections 105–23 (1980); Stephen Ansolabehere & James M. Snyder, Jr., Money and Office, in Continuity and Change in Congressional Elections (David Brady et al. eds., forthcoming 2000).

[FN47]. Of course, it is not clear why increasing competitiveness, per se, is a good thing—rather, it depends on why there is little competition. If it is due to entry barriers of some sort, then it is probably bad. If it is due to the effectiveness of incumbents in giving constituents what they want, then it may not be.

[FN48] This pattern is noted by Gary C. Jacobson, Party Organizations and the Distribution of Campaign Resources, 100 Pol. Sci. Q. 603, 604 (1985–86), and by Paul S. Herrnson, National Party Decision Making, Strategies, and Resource Distribution in Congressional Election, 42 W. Pol. Q. 301, 307–09 (1989).

Alan Gerber, Estimating the Effect of Campaign Spending on Senate Election Outcomes Using Instrumental Variables, 92 Am. Pol. Sci. R. 401 (1998), produces very similar estimates for the U.S. Senate.

[FN55]. See Lowenstein, supra note 8, at 363-64.

[FN56]. See Kevin M. Leyden & Steven A. Borrelli, Party Contributions and Party Unity: Can Loyalty Be Bought? 43 W. Pol. Q. 343, 351-52 (1990) (concluding on the basis of Tobit results that "the Democratic Party, 'rewards' its most loyal members with greater financial aid").

[FN57]. See, e.g., David M. Cantor & Paul Herrnson, Party Campaign Activity and Party Unity in the U.S. House of Representatives, 22 Legis. Stud. Q. 393, 402 (1997) (concluding from the results of regression analyses that "past party unity has no significant effect on the distribution of party assistance in campaign fundraising. . . .").

[FN58]. See Kevin M. Leyden & Steven A. Borrelli, An Investment in Goodwill: Party Contributions and Party Unity Among U.S. House Members in the 1980s, 22 Am. Pol. Q. 421, 421-52 (1994) (reporting an association between party contributions to candidates and the likelihood that the legislator voted similarly to the party leadership). The problem of baselines is that the research does not simultaneously establish how the politician would have voted in the absence of contributions. If, for example, a legislator represented a district similar to the district of a party leader, then that legislator might cast roll call votes in line with the leader not because of party contributions but because such votes represent his or her constituents.

[FN59]. Tobit regression predicts a dependent variable, in this case contributions to and expenditures on behalf of individual candidates that came from political party committees, as a linear combination of many independent variables predicting a single dependent variable. Tobit regressions correct for "censoring" effects due to many 0's in the dependent variable. See generally William H. Greene, Econometric Analysis 962-65 (3d ed. 1997). The regressions include year dummies, district partisanship, opponent total expenditures, and roll call voting scores.

[FN60]. Party money in this analysis consists of contributions and coordinated expenditures combined. The average is for incumbents who received at least some party money contributions. The average for incumbents and non-incumbents combined was $14,000.

[FN61]. In the regressions pooling all years, for Democrats, the coefficient for proximity of roll call voting to the party median is positive and highly significant, with a t-statistic over 6. Looking at each year separately, the effect of proximity to the median for Democrats is significant in all years. For Republicans, the effects in the pooled data and in each year are always insignificant, and in some years have the "wrong" sign.

Soft Money Spending by State Parties: Where Does It Really Go?

(By Ray La Raja and Karen Pogoda)

SUMMARY

In this study we analyze campaign expenditures by state political parties from the 1992 through 1998 elections, which includes disbursements of soft and hard money. We find evidence to support a more complex reality about how soft money is used by parties than is typically conveyed in the news media. While party spending on issue ads increased dramatically in 1996 and 1998, so did party-building activities, such as voter mobilization and grassroots, which were encouraged by amendments to the Federal Election Campaign Act in 1979. We also find that Democratic state parties spend more soft money than Republican parties on media-related activities, such as issue ads, probably to compensate for their lack of hard relative to the Republicans. We conclude with a recommendation that reformers consider some of the positive effects on American elections of party control of campaign resources as they attempt to curb the potential for corruption by restricting or eliminating soft money contributions to parties.

INTRODUCTION

Scarcely a week passes during an election year without news reports of a corporation or wealthy individual making a large soft money contribution to one of the major parties. Election web sites sponsored by nonpartisan organizations and government agencies routinely provide access to data on campaign contributions to candidates and parties. This widespread focus on contributions to and from political committees stems from a genuine concern to expose corruption rooted in the exchange of money. Even without sufficient evidence of corruption, reform advocates continue a single-minded quest to restrict the size of political contributions, without looking at the other side of the equation. What do candidates and their parties do with campaign contributions? Are they spent in ways that encourage or dampen competition? Does party soft money spending generate any public benefits in elections, beyond its intended support for candidates?

A narrow focus on the sources of contributions prevents us from speaking to such questions. In this paper, we try to redress what we see as a one-sided approach to the study of campaign finance, particularly with respect to the soft money issue. We set out to answer a simple question: how do political parties spend soft money? By most journalistic accounts, the conclusion is that parties use soft money to pay for "issue ads" that support the presidential or congressional candidates. Our study demonstrates this partial truth, but also provides evidence to support a more complex reality. In fact, the parties continue to spend a great deal of soft money on traditional party-building functions that mobilize voters through individual contacts.

Why should we care about making such distinctions about party spending? When Congress amended the Federal Election Campaign Act (FECA) in 1979, it made provisions for parties to spend unlimited amounts on so-called party building functions. The earlier version of the FECA in 1974 inhibited state and local parties from participating in the presidential campaign through grassroots activities because of rules limiting contributions to the candidates. The 1979 amendment, which exempted generic party activity from contribution limits for the presidential campaign, was a deliberate effort to increase the party role in American elections. In this study we find that this policy, worked. State parties, in fact, increased mobilization and grassroots activities in the 1990s, largely as a result of the 1979 exemption and the increased use of soft money.

It is unlikely, however, that when Congress made changes to the FECA, members understood the role that soft money would play in paying for issue advocacy, the generic media advertising sponsored by parties that often crosses the line into direct candidate support. Reform advocates argue, with merit, that issue advocacy reduces the distinction between hard and soft money spending. By producing campaign ads that bolster a particular candidate in all but name, parties found a way to get around limits on candidate support. So long as the party avoids the electioneering phrase, "vote for," or something similar, they can pay for these ads with soft money. If parties can use soft money to help their federal candidates, then party contribution limits under FECA are rendered almost meaningless.

We find conclusively that national parties exploited an opportunity to help their nominees for federal offices by channeling funds to state parties for the express purpose of purchasing issue ads. Party-sponsored issue ads increased dramatically in the 1996 and 1998 elections, just when national parties were transferring significant sums of soft money to state parties. We also demonstrate that most media-related spending occurred in states with competitive races for the 1996 presidential and 1998 Senate campaigns.

But our analysis also reveals that party issue ads are only one part of the story. While expenditures on media-related activities surged in 1996, so did spending on grassroots and voter mobilization efforts—the kind of party campaign activity Congress wanted to encourage when it revised the FECA in 1979.

We believe our findings complicate the reform debate considerably. On the one hand, we observe parties violating the spirit, if not the letter, of the law when they pay for issue ads with soft money that help federal candidates. And yet, we also notice that soft money has been used to bolster party activities that citizens, elected officials and political scientists view as positive for democracy. The increased use of soft money is associated with greater spending on political rallies, bumper stickers and yard signs, as well as voter identification and get-out-the-vote programs.

Another healthy sign, especially from the perspective of political scientists, is that state party organizations appear to be growing stronger, if somewhat more reliant on national organizations. Our findings demonstrate that infusions of soft money have augmented activities at party headquarters, as evidenced by increased spending on staff salaries, rent, computers, telephones and other organizational maintenance necessities. For several generations, scholars have worried about the demise of party organizations that formerly played a key role in nominating candidates and pulling together coalitions. Weak parties leave the field open to single-issue interest groups and candidate-centered campaigns that tend to fragment the electorate and subsequently increase the difficulty of governing. To the extent that party organizations are increasingly active in campaigns, we take this as a positive sign of party revitalization. Beyond our preliminary analysis, future research should investigate in greater detail the degree to which party activity reflects "pass throughs" of money for specific candidates or support for a collective and unifying form of campaigning, closer to the model of responsible parties outlined by the American Political Science Association.

We make no assertions about whether soft money strengthens the party system and improves the electoral process. Our findings are merely suggestive. In part, we publish the results of this working paper to give pause to supporters of a ban on soft money from the campaign finance system. By moving too quickly to eliminate party resources, the public may forego potential benefits of stronger parties. Worse, the money that now flows through parties may simply be rechanneled through other, less visible organizations. Experience shows this is not simply plausible but probable. The prospects for effective reform are enhanced through a genuine understanding of the outputs, as well as the inputs, of campaign money.

SOME BACKGROUND

What is soft money?

Soft money is a term developed in the 1980s to differentiate contributions to the party that may be used to support federal candidates directly from those that cannot. Under federal law, the purpose of soft money is for party building and not for direct candidate support. In 1974, when Congress passed amendments to the Federal Election Campaign Act (FECA), it imposed a limit on contributions to the party, and the amount of direct support that parties could provide their candidates, either through cash or in-kind contributions. Individuals could donate no more than $20,000 to parties, and PACs were limited to $15,000. In the late 1970s, leaders of state party organizations lobbied Congress and the Federal Elections Commission (FEC) to permit them to extend the use of soft money to generic party activities that included distribution of lawn signs, bumper stickers and activities aimed broadly at mobilizing the vote. They argued that federal laws limiting party support of presidential candidates constrained them from performing generic party campaign activities that broadly benefited both federal and state candidates. Congress responded with amendments in 1979 permitting state and local parties to spend unlimited funds on "party-building" activities, such as grassroots campaign materials and voter contact activities. It is important to note that Congress did not authorize state committees to use unregulated funds to pay for these activities. State parties were required to use funds raised under the rules of the FECA.

In fact, the so-called soft money loophole did not open until the FEC was faced with the dilemma of providing accounting guidelines to state parties where state laws permitted unrestricted contributions from unions and corporations. In response to a query by the Republican State Committee of Kansas about how to allocate federal and nonfederal expenses incurred by party building activities, the FEC declared that the Kansas Republicans could use their nonfederal fund to pay a reasonable estimate of the nonfederal share of cost. This ruling effectively meant that the party could use a nonfederal fund—which had no constraints on corporate or union contributions under Kansas law—to fund activities that benefited, in part, federal candidates. A 1988 U.S. District court order, pursued by reform activists at Common Cause, required the FEC to provide detailed allocation requirements to prevent the parties from abusing their new ability to use soft money in federal elections. Yet even with the promulgation of specific allocation requirements, the national and state parties continued to seek the advantages of permissive state campaign finance laws to raise and spend nonfederal funds to support their federal candidates through party-building activities.

Since raising unregulated soft money is easier than federal (hard) money, which has contribution limits, the national parties pushed to expand the definition of party-building so they could spend soft money on more campaign activities. Perhaps the most brazen challenge to the 1974 reforms was when the Republican National Committee argued successfully in 1995 that television advertisements focusing on party themes even when candidates are mentioned, should be considered party building and therefore payable with soft money. Once the FEC assented, the major parties crafted television ads, paid for largely with soft money, to help specific federal candidates. During the 1996 presidential election, close observers of the campaigns estimated that $100 million was spent on issue ads by the parties.

Although the FEC attempted to curtail the use of issue ads and other party activities that crossed the line from party building to candidate support, they were blocked by a Supreme Court ruling, *Buckley* v. *Valeo*. In this case, the justices tried to distinguish between constitutionally-protected free speech and electioneering messages. The ruling demonstrated that the courts would narrowly define "electioneering" to include messages that clearly exhorted citizens to vote for or against specific candidates. Under a narrow definition, parties could safely use soft money for issue ads that helped candidates so long as they avoided electioneering language that constituted "express advocacy" for a candidate. Such language includes use of the words, "vote for," "oppose," "support," and the like.

One consequence of Buckley was a deliberate party strategy to funnel money to state parties where complex rules permitted them greater use of soft money. In a presidential election year, national committees must allocate hard money to at least 65 percent of administrative costs. The state parties, in contrast, might pay for the same activity with as little as 25 percent hard money, depending on a formula that considers the ratio of state and federal candidates in the election. Much has been written about party efforts to conceal campaign advertising behind the shroud of state party building, but there has been little systematic analysis to demonstrate the extent of this activity. We collected financial data on the 100 state parties over four elections to examine how parties use soft money.

METHODS

Our analysis is based on expenditure data provided by the Federal Elections Commission (FEC). Since the 1992 election cycle, parties at all levels have been required to maintain two separate accounts, federal and non-federal. The non-federal account is not reported to the FEC because these funds are applied exclusively to nonfederal activities, such as party support for state legislative candidates. The federal account, however, must include itemized expenditures that potentially benefit a federal candidate, even if the spending also helps state and local candidates as well. The FEC calls this "Joint" spending. Party treasurers are required to allocate hard and soft money for joint spending to reflect the federal-nonfederal split of benefits to candidates. To limit the discretion of treasurers—who have an incentive to claim that benefits accrue mostly to state and local candidates so as to avoid using hard money—the FEC promulgated rules determining the proper mix of hard and soft funds for a given kind of joint activity. For example, administrative costs are allocated according to the ratio of federal candidates to total candidates (state and federal) in the state. We use the federal account data, with its matching hard and soft allocations, to determine how parties spend soft money.

We believe the federal account provides us with the greater part of party expenditures. The non-federal account, according to some estimates, accounts for at least an additional 25 percent in soft money that state parties spend exclusively to benefit state and local candidates. State parties are compelled by federal law to use federal accounts whenever they perform some kind of generic party activity that might jointly benefit party candidates up and down the ticket. This requirement ensures that every expense, from routine office costs to voter identification programs, shows up in the federal account. The federal account also includes itemized expenditures on media that parties call "issue advocacy." It is precisely because parties claim that issue advocacy reflects party rather than candidate specific themes that they must report this activity as generic (or joint) in the federal account.

Our study looks at the federal reports submitted to the FEC by the 100 state parties, for election cycles 1992 through 1998. Fortunately, staff at the FEC entered, by hand, each expenditure item in database files from the hard-copy reports submitted by state parties. Using these files, we developed a coding scheme to categorize more than 300,000 itemized expenditure entries in each election cycle. The categories are the following:

Overhead: office related expenses such as rent, salaries, computers, travel, and utilities.

Media: communication expenditures for television, radio and newspaper and production and purchase costs.

Mobilization: costs of contacting individual voters through direct mail, telephone banks, canvassing and voter identification files.

Grassroots: activities that encourage citizen participation in campaigns. Expenditures for rallies, fairs, volunteer precinct walks, banners, slate cards, bumper stickers, and local party support.

Multi-candidate contributions: non-generic in-kind contributions from the party to several candidates, e.g., newspaper ads, that jointly benefit specific federal and state candidates. These are distinct from the direct contributions to candidate committees.

Fundraising: costs associated with joint fundraising for federal, state and local campaigns.

Unidentified: expenditures that could not be determined from FEC reports.

In the following sections, we provide summaries for total soft money expenditures in each of the above categories. We are able to compare the data over four election cycles, 1992 through 1998.

FINDINGS

Are the state parties spending more soft money?

There is little doubt that state parties are more active than ever in election campaigns. Combined soft and hard money spending in the state party federal accounts almost doubled between 1992 and 1996. Undoubtedly, some of this spending is the product of mere "pass throughs," the transfers from the national to state parties to purchase issue ads and other services in support of federal candidates. But as we demonstrate later, state parties have also increased spending on campaign activities that serve party building functions.

Much of this growth in spending has been spurred by additional use of soft money. In the 1996 presidential election the 100 state parties spent $178 million, almost triple the amount of soft money, spent in 1992. Similarly, between the 1994 and 1998 midterm elections the parties doubled their use of soft money, spending a record $187 million. Hard money expenditures have also risen but not at the same rate. Since FEC rules require soft-hard matching for each campaign activity, it is not surprising that hard money spending increases with soft money spending. It appears, however, that soft money pays for a larger portion of activities with each passing election cycle. In 1998, for the first time since 1992 when state parties were required to report soft money spending, they spent more soft than hard money in their federal accounts.

The apparent shift from hard to soft money is not difficult to explain. Soft money is easier to obtain since there are no limits on contributions to parties, except when state laws regulate party fundraising. A party that wants to preserve its hard money for candidate contributions and coordinated expenditures in federal elections will purchase goods and services with soft money whenever possible. Over the four most recent election cycles, the state parties have learned how to match soft and hard money expenditures to maximize the use of the former. One indication that parties behave this way is that direct state party support for federal candidates, mostly in the form of coordinated expenditures increased from $5 million in 1996 to $18 million in 1998. We suspect state parties substituted soft for hard money when paying for many kinds of campaign activities, thereby freeing up additional hard money for direct candidate support.

An important question to ask is whether soft money reported in the federal accounts of state parties is actually controlled by the national parties, whose primary interest is to elect candidates for federal office. To the extent that national party supports the state parties through transfers, we can make the inference that they have some control over state party expenditures. Table 1 (not supplied) gives a sense of how much state parties rely financially on the national parties. The national parties support a larger percentage of state party budgets in 1996 and 1998 than they did earlier, suggesting that they have more influence in state party affairs than in earlier elections. Prior to 1996, national party transfers did not account for more than 14% of the federal accounts of state committees. In the 1996 and 1998 elections, this portion grew to 42% and 31% respectively. Table 1 also illustrates that state parties rely more heavily on national parties for soft money than hard money. National parties provide just under a quarter of the hard money that state parties end up spending, but 65% of the soft money they spent in 1996 and 37% in 1998. It appears that soft money has become a primary means of intraparty support. State parties continue to raise the majority of funds on their own—indeed, they raise more money independently than ever before—but they receive significant support from the national parties. In addition to party transfers, some journalistic accounts report that state parties benefit from soft money contributors who are encouraged to donate to state parties by officials of the national party.

Since national parties provide as much as one-third of state party funds, we suspect that portions of soft money from the national parties are targeted to achieve national party goals, which may differ from the priorities of state organizations. These data demonstrate unequivocally that the direction of resource flows between parties has reversed since the 1960s, when national parties had to solicit contributions from state affiliates. Heard (1960) predicted such a change would create opportunities for party integration and growth, even as it augmented tensions among levels of party.

To summarize, soft money spending by state parties has risen each year since 1992, and outpaced hard money spending in 1998. FEC matching requirements will ensure that soft money spending does not entirely eclipse hard money spending, but it appears parties exploit allocation rules to spend soft rather than hard money. We should note, however, that state parties raise and spend increasing sums of hard money, funds that meet all the requirements of the FECA. Hard money spending doubled between the 1992 and 1996 elections and the state parties are responsible for raising three-fourths of this money themselves. The prospect of securing soft money from the national parties may spur state parties to engage more effectively in raising hard money, precisely because of the federal matching requirements. We also find preliminary evidence that soft money spent on administrative chores fires hard money for contributions and coordinated expenditures in support of federal candidates.

How do state political parties spend soft money?

We now turn to a description of how state parties use soft money in campaigns. As we stated earlier, there is anecdotal evidence, mostly from the news media, describing the use of soft money for issue ads. More systematic scholarly research demonstrates that in key races soft money is invested in the "ground war" of campaigns, through contacts with individual voters using direct mail and telephone banks. Party and campaign finance scholars continue to speculate whether the infusion of soft money in the last two decades has altered patterns of state party activity. Advocates of stronger parties have argued that providing parties with privileged access to campaign resources would reverse the long decline of party organizations. From their perspective, the introduction of soft money into the party system provides an interesting test case for this theory. How will parties behave with this new wealth generated by soft money? Will they spend additional increments to build the party through voter identification programs and grassroots activity? Or will soft money simply buttress candidate-centered campaigns, with the parties serving as pass-throughs to pay for television ads promoting individual nominees?

Our findings will hardly satisfy those who seek support for an opinion that soft money is either good or bad for the party system. In fact, we find elements of what some would consider "bad" as well as "good" spending. On the positive side, we observe that state organizations continue to use funds in ways we traditionally expect of parties: to mobilize voters, provide grassroots paraphernalia like bumper stickers and lawn signs, and, of course, for basic organizational maintenance activities such as paying rent and salaries (overhead) and fundraising. In short, soft money enables parties to spend additional resources on party-building activities.

The election in 1996, however, marked a dramatic shift toward greater spending on media related activities. Whereas the state parties spent just 3 percent of their budgets on media activities in the 1992 presidential election year, four years later this category absorbed more than one-third of their budgets. The shift is more striking in absolute terms: media spending jumped from about $2 million to $65 million. The reasons for this shift have been explained in many journalistic accounts of the 1996 and 1998 campaigns. The increase in media spending in 1996 was a result of campaign strategies pursued by the parties and presidential candidates to saturate critical electoral markets with televised issue ads that benefited the candidates in all but name. Dick Morris, the key Clinton-Gore campaign strategist, urged the DNC to begin televising issue ads in the summer and early fall as a way to shore up a faltering Clinton early in the election and undercut the presumptive GOP nominee, Bob Dole. The RNC, in support of the Dole-Kemp ticket, countered with the same strategy right before and after the convention in July. Apparently, both national parties tried to take advantage of the favorable soft-hard ratios available to state parties by delegating responsibility for purchasing the ads to the latter.

Ironically, soft money spending on issue ads might be an artifact of the sweeping reforms of 1974 that established a system of public financing for presidential candidates. If a candidate accepts public funding, in the primary he faces limits on spending in each state. A competitive race could cause candidates to bump up against these limits rather early in the primary season, especially given the trend toward front-loading of primaries, forcing them to curtail spending severely during the weeks leading up to the convention. Bob Dole, for example, faced several tough and well-funded challengers in 1996. He was forced to spend money fending off Gramm, Buchanan and Forbes. Clinton, in contrast, began using party soft money, as well as primary campaign funds, to attack the GOP and promote his campaign themes for the general election. Dole and the Republicans could only retaliate with party soft money ads, given that the candidate would not receive additional public funds for the general election until after the convention. The late timing of FEC-released public funds leaves a good part of the summer in which either candidate can harm the other through attack ads. The parties joined in the campaign, in part, to bridge the period between the point at which a nominee effectively, but not officially, wins the party nomination, and the official start of the general election season as determined by the end of the party conventions.

The increasing use of soft money for issue ads may also reflect the inadequacy of a public funding system for presidential campaigns that fails to keep pace with rising media costs. A standard thirty-second advertisement during prime time in a major media market can cost in the range of $20,000 to $30,000. Only fifteen years ago, the same ad cost approximately half that amount. Although presidential funding system adjusts for inflation, average media unit costs have risen faster than the average for all other goods and services. More importantly, according to one study, campaign strategists rely increasingly on expensive media-related activities, especially television, which drive up the cost of the entire campaign.

During midterm elections, spending on media decreases without the demands of a national campaign. In the 1998 midterm, the amount spent on media related activities by state parties was cut more than half, to $30 million from two years earlier. But this amount was ten times as much as party spending on similar activities in the 1994 midterm election. The lessons of using party soft money for issue ads in the 1996 presidential campaign had obviously been passed on for congressional elections. According to a study sponsored by the Brennan Center, party spending on issue ads—which includes both state and national organizations—amounted to $25.9 million. This spending accounted for close to 45,000 ads, reflecting about 20 percent of all campaign advertising.

Our data demonstrate clearly that soft money was transferred to state parties to fund media-related activity that comprised mostly issue ads. But assuming that every dollar transfer produced a dollar's worth of issue ads, the fact remains that state parties spent little more than 55 percent of transfers on issue ads in 1996, and 43 percent on them in 1998. Where did the rest of the soft money go? The answer is that parties used "excess" soft money to increase traditional party activities. In 1996, spending on voter mobilization almost doubled from the previous presidential election, rising from $8 million to $16 million. Over the same period, spending on grassroots activities increased sevenfold, from $1.2 to $8.3 million.

These figures, of course, are small in comparison to allocations for media-related activity. One reason is that the cost of bumper stickers, or even telephone banks, is considerably less than that of media-purchases in metropolitan markets. At about ten cents per bumper sticker, one million dollars will purchase 10 million bumper stickers. The same amount will provide about forty ads (30 seconds) on network TV in a major media market during prime time.

Importantly, media spending did not crowd out spending on traditional party activities. The portions of the party budget spent on mobilization and grassroots did not change substantially even when media spending soared. In the 1998 elections, Magleby (2000) reports that the parties, particularly the Democrats, emphasized a "ground war" strategy that involved lots of direct mail, telephone banks and other get-out-the-vote activities. It appears, according to Table 2, that parties used additional soft money in 1998 to intensify mobilization efforts, spending nearly the same portion of their budget on such activities as they did in 1992 and 1994.

Additional soft money has also been used to expand party headquarter operations. In 1992, state parties spent $42 million on overhead, which include payments for salaries, rent and other organizational maintenance costs. By 1998, this total had risen to $107 million. Certainly, we would want to know the degree to which these rising expenses at headquarters reflect sustained organizational growth or temporary surges in activity for the limited campaign season. An analysis of party budgets during the off-election year should resolve whether these costs reflect enduring investments in the party organization. At the very least, the rising costs associated with maintaining party headquarters suggests that state party organizations are a locus of increased campaign activity.

Partisan differences?

To see if parties pursue different strategies with soft money we compare them for the 1996 and 1998 elections. The parties appear to spend similar amounts on all activities except for media, which accounts for much of the Democratic lead. In 1996 the Democratic state parties allocated about $48 million for media, three times as much as the Republicans. The gap for the 1998 midterm election was not as great since neither party spent as much on media, but the Democratic state parties continued to outspend the Republicans at the state level by more than 6 million. We believe these partisan differences exist because the national Democrats, being the relatively poorer party, attempt to exploit soft money for federal races more than Republicans. They do this by transferring soft money to state parties where the spending ratios for soft and hard money are higher, meaning that the state parties can use more soft money than the national parties to pay for the same activity.

The practice of using the state parties for national party goals probably comes at a cost. State parties might dun the national parties for these services by requesting additional transfers of soft money beyond the costs of the services. At the very least, a transfer strategy imposes greater coordination costs on national parties, particularly the Democrats, who appear to do this more often. National parties must monitor the transferred funds to ensure state parties spend them properly. The national Republicans, with a significant advantage in hard money receipts, can more likely avoid this problem by producing and purchasing media services directly, even if they must pay with additional hard money. We suspect that the national committees of the Republican Party outspend their Democratic counterparts on such campaign activities.

The Democratic strategy of transferring soft money to state parties for issue ads is clearly evident from Table 4, not supplied, which lists states with the highest media-related spending. In each of these states there was a close federal electoral contest. In 1996, Ohio was not only a key swing state for the Clinton re-election, but also included six close congressional races. The Ohio Democractic Party spent 10.5 million dollars on media-related activities, almost triple the amount of any other state party. Michigan and Illinois were other key states during the 1996 presidential campaign; the latter also contained a key Senate race and several competitive House races. In Washington, there were at least five critical House elections. Neither party was willing to concede California, the state with the most electoral votes, as well as a good number of competitive congressional races. In 1998, the parties were more evenly matched on media spending with much of its focused in New York. Nevada and Kentucky, the states with highly competitive Senate races.

CONCLUSION

We began with a question about how parties spend soft money. We speculated that soft money was not simply a resource to fund issue ads, but also a primary means to support party organizations and their traditional campaigh activities. Our finding is that parties use soft money in ways that would strike many observers—including those favoring a ban on soft money—as positive. This preliminary study illustrates that parties use soft money to invest in campaign activities that promote party-building and citizen participation. If soft money permits the party to reach additional voters through telephone calls and mail, or generate enthusiasm for political campaigns through rallies and yard signs, then perhaps we are shortchanging American campaigns by cutting off this supply of money. The overemphasis in the news and by public interest advocates on the media strategies of parties obscures the fact that parties do many things with soft money.

Undoubtedly, parties also exploit soft money to fund issue ads through their state organizations. Media-related spending by state parties jumped from just $2 million in 1992 to $65 million in 1996. The Democrats appear to take advantage of a state-sponsored issue ad strategy more than the Republicans, probably because they trail the Republicans in raising hard money. Both parties, however, use most of their soft money to expand party headquarter operations during the campaign. Since 1992, they have more than doubled the amount spent contacting individual voters through various voter identification and get-out-the-vote programs. In the last midterm election, just 16% of soft money went toward issue ads, the same amount that was spent on direct mobilization and grassroots efforts.

Seeing that the lesser part of party soft money goes toward issue ads, we feel compelled to re-examine the question: how is soft money harmful in elections? The obvious answer is that soft money permits candidates, contributors and parties to circumvent federal laws limiting campaign contributions. If party soft money can help a specific candidate by using it to purchase a candidate-tailored advertisement, then corporations, unions or wealthy individuals can simply funnel contributions to candidates through the parties. The potential for the quid pro quo exchange between contributor and policymaker escalates with the increasing size of contributions to the party.

But assume for a moment that party money is "clean." Suppose party money is generated through public subsidies, or raised from contributors in increments that are small enough to prevent corrupt exchanges. Are the spending patterns of parties necessarily harmful in American elections? In this study, we observe that parties spend a significant portion of their cash to build the party as intended by the 1979 amendments to the FECA. It is primarily through soft money that parties have had access to resources that permit them to engage in activities that political scientists, for the most part, view as salutary for the electoral system. If the solution to the problem of corruption is to ban soft money fund raising, then reformers should also consider ways to ensure that parties have access to sufficient resources so they might continue occupying a central role in campaigns.

An earlier set of reforms in 1974 had the effect of weakening party role in campaigns by institutionalizing PACs as legitimate contributors to candidate campaigns. The number of PACs proliferated in the 1970s and early 1980s, providing candidates with an increasing share of their campaign funds. Candidates became more reliant on PACs than on their parties, which encouraged the candidate-centered nature of campaigns. The ever-adaptable American parties exploited the campaign finance regulations to reestablish themselves. Soft money probably helped restore the party role in campaigns, making the candidates less reliant on direct support from PACs. On the other hand, party leaders may now feel beholden to big soft money contributors, a potential problem that should not be overlooked. If the soft money regime encourages interest groups to contribute more frequently through the party leadership, then soft money may simply centralize the corrupt exchange among the most powerful political actors. If this is true we should see greater party unity in congressional voting than in the past, particularly for issues that are important to the most generous party patrons.

The type of party spending that concerns many campaign observers is issue advertisements. In our view, party spending on issue ads is not bad, per se, especially if these ads link the candidate closer to party. Scholars who desire responsible parties would argue that party-sponsored messages create more accountability by promoting themes that unify party candidates around a platform. A recent study by Krasno and Seltz (2000) appears to cast doubt on this theory since only 15 percent of the ads apparently mention the party in the text or graphics. On the other hand, these authors acknowledge that cookie cutter issue ads featuring the same graphics and text are common. We believe these generic ads encourage candidates to use similar themes and symbols across districts and states, which would tend to promote party unity and accountability. The problem, then, is not so much the issue ads themselves, but how they are funded.

The fact that party money goes toward television advertising reflects the reality of campaigning in a mass democracy. Party leaders and their consultants believe television advertising is critical to winning elections so they invest in this form of campaigning. By curtailing party resources, we doubt that party candidates will seek less of this kind of campaign activity. In fact, reform laws that cause the depletion of party resources will likely eliminate "good" spending, such as direct voter contacts, rather than "bad" spending, such as issue ads. Parties will employ a triage strategy that emphasizes media advertising over direct voter contacts and grassroots. The first activities to be shorn are those that support long-term party building and encourage volunteer participation, since these are not of critical interest to incumbents seeking reelection.

We also suspect that the placement of party issue ads encourages electoral competition. The vast literature on campaign contributions suggests that parties allocate campaign resources more efficiently than interest groups, preferring to give money to candidates in the closest races. Interest groups tend to pursue a low risk strategy by giving directly to incumbents who face little competition. Indeed, parties solve a collective action problem by moving resources to where they are needed most, since incumbents are often unwilling to transfer money from their campaign accounts to colleagues who may need it more.

Campaign resources that flow through parties, therefore, will tend to promote competition more than if resources flow directly into candidate committees, or when money is spent independently by interest groups to promote the election of a favored candidate. Using the Krasno and Seltz data for the 1998 elections, we observe a similar pattern of resource distribution in purchasing issue ads. Table 5 (not supplied) demonstrates that parties place almost 60 percent of their issue ads in competitive House elections, a greater percentage than either candidate committees or interest groups. For Senate elections, which are much more competitive, 92 percent of party issue ads appear in competitive elections, whereas 74 percent all candidate-sponsored ads appear in competitive elections. Interest groups provided less than one percent of ads in the 1998 Senate election, but all of these ads were placed in competitive campaigns. The relatively low participation of interest groups in Senate campaigns is probably because media costs are prohibitively high except for the wealthiest organizations.

Candidate-controlled advertising continues to dominate the airwaves, but interest groups and parties are more active than ever. The only institutional counterweight to outside spending by interest groups is the parties. As long as the courts prevent the FEC from regulating issue ads through *Buckley* v. *Valeo*, there is a danger from unilaterally disarming the parties by a ban on soft money. Candidates risk losing control of their campaigns in some very competitive districts. Fearful of being hit by outside spending of interest groups, candidates will no doubt enlist the support of groups favorable to them. Indeed, there is sufficient evidence in the 2000 elections that this is already occurring. The groups most able to produce campaign ads for candidates will likely be the wealthiest, skewing the candidates' obligations toward such groups even more.

We conclude with a policy recommendation that parties retain access to sufficient campaign resources to continue the activities they have pursued with soft money. Our findings suggest that soft funds encourage party-building and party integration, much as Congress desired when it passed amendments to the campaign finance laws in 1979. To reduce the potential for corruption, we recommend that Congress place a cap on soft money contributions or raise the limits on hard money contributions. On the other hand, we believe the distinction between soft and hard money is still valuable. Soft money provides an incentive for national parties to transfer funds to state and local parties, where campaign activities have increased substantially. We believe the likelihood of grassroots work is enhanced at lower levels of party, which afford more participation opportunities for amateurs and volunteers. The national parties may be more reluctant to transfer hard money to state parties for party building when they can use this money themselves for direct candidate support and issue ads.

COMMEMORATION OF THE 90TH ANNIVERSARY OF HADASSAH

HON. DAVID E. BONIOR

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 5, 2002

Mr. BONIOR. Mr. Speaker, last week, thousands of members of Hadassah, the Women's Zionist Organization of America, kicked off celebrations of their ninetieth anniversary.

Throughout the past ninety years, Hadassah has provided invaluable service to a wealth of communities and peoples. As America's largest female organization, this Jewish collective has provided unprecedented assistance to individuals in countless nations, regardless of race, religion or credo. Established in 1912 by Henrietta Szold, Hadassah has set an example of peaceful relations and service both here and abroad.

Founding the largest medical school in Israel, the women of Hadassah have united students from across the Middle East, building bridges through education and service and establishing friendships—all because they understand that this important work will provide a foundation for new forms of unity in the future.

Since its inception, Hadassah members have worked tirelessly to aid both their local and international communities. The Hadassah Medical Organization consistently stands on the cutting edge of technology, assisting regional patients as well as American troops, heads of state and Congressional delegations. Their reach extends throughout the world, building and staffing new hospitals in Zaire and training African and Asian doctors to work in developing nations. Their dedication to American relief work was demonstrated by the medical aid and blood banks provided in the aftermath of the Pearl Harbor attacks.

Today, Hadassah continues their work through medical and civic education, setting an example of excellence for their humanitarian efforts. A leader in community support programs, Hadassah has invested considerable time to providing information to female citizenries. The organization formed youth counseling groups and female career training in the Middle East, while creating the Hadassah Cares programs to champion efforts to raise breast cancer awareness in the United States.

Mr. Speaker, as our nations continue to work to establish a peaceful, just international community, it is my honor to commemorate the ninetieth anniversary of an organization that has demonstrated these qualities in the work they do every day.

HONORING SAL SALAZAR

HON. GEORGE RADANOVICH

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 5, 2002

Mr. RADANOVICH. Mr. Speaker, I rise today to honor the late Sal Salazar on the occasion of the California Restaurant Association commemorating his life with the Lifetime Achievement Award. Mr. Salazar began his remarkable career in the restaurant in 1942 and his family continues the business holding fast to Sal's values and traditional recipes. This award is the Association's highest honor and marks the 60th anniversary of Sal's Mexican Restaurant and pays tribute to a successful entrepreneur, respected community leader, and beloved husband and father.

Mr. Salazar was born in Herez, Zacatecas, Mexico, and came with his parents to Selma, California, in the late 1920's. Sal worked as a farm laborer until he followed an impulse and on August 22, 1942 opened his own taco restaurant. The restaurant grew to include a full Mexican menu and earned regional acclaim.

A great Mexican restaurant was not the only thing that Mr. Salazar gave his community. Sal worked for the Selma Justice Court, Fresno County Superior Court, and California Supreme Court in Sacramento as an interpreter. He also sponsored 14 Mexican families who relocated to California, provided leadership in the formation of a West Selma improvement district that led to its incorporation into the city, and helped his siblings with their education. Sal also served on the Selma Chamber of Commerce, Selma Planning Commission, Selma High School Boosters Club, and Fresno County Grand Jury. In 1945, he served as an alternate on the interpreter staff at the first meeting of the United Nations in San Francisco.

Mr. Speaker, I rise today to honor the memory of Sal Salazar as his family accepts the California Restaurant Association's Lifetime Achievement Award on his behalf. I invite my colleagues to join me in remembering Mr. Salazar for his community service and entrepreneurial spirit and wishing his family and restaurants many more years of continued success.

TRIBUTE TO MARTY MARSHALL, PRESIDENT OF CALIFORNIA SCHOOL FOOD SERVICE ASSOCIATION

HON. ELLEN O. TAUSCHER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 5, 2002

Mrs. TAUSCHER. Mr. Speaker, Marty Marshall is President of the California School Food Service Association, with over 2,500 members, Director of Nutrition Services for Fremont Unified School District, with over 32,000 students, wife, mother, grandmother, and community volunteer. Her life has been, and continues to be, devoted to service to others. Whether to family, co-workers, friends, or fellow professional association members, Marty finds giving of her heart, energy and time to be her greatest pleasure.

As President of the California School Food Service Association, Marty Marshall has worked tirelessly to revitalize the Association by conducting strategic planning sessions, and accomplishing the resulting strategic goals in the areas of organizational structure, internal and external communication, membership, professional image, leadership development, and legislative activity. With her inclusive style of leadership, she has brought together members of all levels including site staff, management, and industry to come to consensus on the goals as well as the necessary steps to achieve them. The membership has expressed enthusiastic appreciation for bringing back some of the traditions and structure that had been lost over the past few years. In addition to her current position as President of CSFSA, Marty has served as President Elect, Chair of the Professional Development, Awards and Scholarships, and Rules and Resolutions Committees, Conference Program Chair, Conference Exhibits Chair, and President of the Josephine P. Morris and Northern California Chapter. She is also currently the Executive Committee Advisor to the Public Policy and Legislative, and Conference Committees.

Marty's theme for her Presidency, "Nutrition and Learning, Hand in Hand," depicts her commitment to children's nutrition education, and the positive effect good nutrition has on a child's learning ability. This has been a timely theme because of current interest amongst California families, schools, and Legislators in children's nutrition issues. Marty testified numerous times during the 2001–2002 session in both Senate and Assembly Committee hearings regarding nutrition and training related legislation. Her testimony contributed strongly to reaching compromise on SB 19, the Pupil Health, Nutrition, and Achievement Act of 2001, signed into law by the Governor, and authored by Senator Escutia.

Marty Marshall was born Martha Elizabeth Knecht in Berkeley, California on August 21, 1946. She grew up in Walnut Creek, where she attended Parkmead Elementary School and Del Valle High School, participating in service and leadership activities in both. In Elementary School she was active in Brownies, Girl Scouts, Job's Daughters and St. Paul's Episcopal Church, and took lessons in flute, piano, and ballet. She was a member of the Student Council, and gave the commencement speech at her eighth grade graduation ceremony. Attending a new high school, as a member of the second graduating class, Marty was in the Leadership Class and on the Student Council all four years, and was a cheer leader for three years, the last of which she was elected as Head Cheer Leader. She was a member of the Latin and French Clubs, tutored special education students, earned a life membership in the California Scholarship Federation, and was selected as Del Valle High School's "Most Outstanding Citizen" by the school staff.

After graduating from High School, Marty Marshall attended the University of California at Berkeley, where she majored in Dietetics. It is here where she met Marilyn Briggs, current Assistant Superintendent of Public Instruction for the California Department of Education Director of the Nutrition Services Division, who has become a lifelong friend and mentor in the area of child nutrition. Marty continued tutoring special education students through her college years, and volunteered in a local convalescent hospital, reading to residents and participating in holiday events. She joined the Alpha Phi sorority, which focuses nationally on activities to support heart health, and participated annually in their fundraising drive.

Before working at Fremont Unified School District, Marty worked for two years as an Assistant Dietitian for a chain of convalescent hospitals. She also worked for six years as the Food Service Instructor for a Federal Training Grant Project where she trained functionally retarded and legally blind clients to work in commercial food service. Here, she developed an Independent Living Skills program for her clients, most of who had recently been released from a state hospital that had closed. She also developed a prescreening program for the Business Enterprise Program for the Blind, to help ensure the success of her clients when they entered this business food service training program. Marty still stays in touch with two of her clients from this Federal Training Project after 30 years.

Marty has worked at Fremont Unified School District for over twenty years as the Director of Nutrition Services. She works hard to combine nutritional integrity with sound business practices, and has earned a USDA Recognition Award each time her program has been audited. She is committed to the children and is known for running her program with the highest of ethics and standards.

Marty is a member of Candle Lighters, a Fremont organization that builds and operates a ghost house each year and donates the proceeds to local charities. She has chaired the Caramel Apple booth and the scheduling of students to work in the house. Over $1,500,000 has been returned to the community over the past 25 years through the efforts of this organization. Marty's husband Steve, and her two children, Chris, 26 and Nicky, 23, participate with her in many of her volunteer activities.

HONORING SUZANNE MUBARAK, FIRST LADY OF EGYPT FOR WINNING THE STEPHEN P. DUGGAN AWARD FOR INTERNATIONAL UNDERSTANDING

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 5, 2002

Mr. LANTOS. Mr. Speaker, I invite my colleagues to join me in paying tribute to Mrs. Suzanne Mubarak, the wife of Egyptian President Hosni Mubarak, upon her receipt of the

Stephen P. Duggan Award for International Understanding on Monday evening of this week. The award, presented by the Institute of International Education and named after the organization's first president, is awarded to distinguished world leaders in the fields of government, education, business and diplomacy in recognition of their commitment to educational exchange and appreciation of other peoples and cultures.

Mrs. Mubarak is indeed a worthy recipient of this honor. She is a sociologist, having received both her bachelors and masters degrees from the American University in Cairo, and she has devoted her efforts to education at all levels. In particular, she has supported the television program Alam Simsim, the Egyptian production of the popular U.S. children's series of the Children's Television Workshop, Sesame Street. When this excellent Egyptian production began its third year in October 2001, Suzanne Mubarak participated in the opening. As in the American model, Alam Simsim helps to build literacy, number skills, education of young girls, and tolerance and understanding.

Mr. Speaker, Mrs. Mubarak's commitment to education, particularly of young women, is most worthy of recognition, and I am delighted that the Institute of International Education (IIE) has made the decision to honor her for her life's work. The Institute was founded in 1919 by two Nobel Laureates, Elihu Root and Nicholas Murray Butler. The purpose of the Institute, in the words of its Chairman Henry Kaufman and its President Allan Goodman, is to "replace ignorance of other cultures and peoples with knowledge and understanding." To this end, the IIE has fostered and supported study in the United States by foreign students and study abroad by American students.

Suzanne Mubarak's commitment to education is consistent with these worthy goals. This was acknowledged in the citation of recognizing her contributions:

"For seven millennia, the world has learned from Egypt. And, even today, we are learning much for your work about the impact that early education has on a child's ability to cope with his or her environment. You have taught us that education must encompass all of life's issues and should enhance the ability of people to interact in society. By your leadership you have demonstrated the overwhelming importance of the education of girls. You have set a new standard for respect and gender equality that will make Egypt and our world safer and more secure for all."

Mr. Speaker, I invite my colleagues in the Congress to join me in paying tribute to Mrs. Suzanne Mubarak for her contribution to international understanding and in honoring her on receiving the Stephen P. Duggan Award.

HONORING HADASSAH

HON. PETER DEUTSCH

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 5, 2002

Mr. DEUTSCH. Mr. Speaker, I rise today to congratulate Hadassah, the Women's Zionist Organization of America, on its 90th Anniversary. Since its beginning, Hadassah has contributed to worthy charities around the world both financially and through volunteer work. Hadassah's tireless efforts have aided in the creation of access to quality health care throughout the Middle East, and Hadassah has always strived for the equal treatment of women in the United States and Israel.

Today, Hadassah, with over 300,000 active members organized throughout the United States, has continued its rich tradition of volunteerism by enacting programs to fight breast cancer and other health related issues affecting women. Hadassah has also sponsored numerous programs to increase the quality of the educational system in the United States.

While Hadassah's interests are primarily education and women's rights, this group has been active in educating its membership on a variety of public policy issues and encouraging civic participation. In a time of increased violence in the Middle East, Hadassah has also remained a staunch advocate of peace and tolerance between Arabs and Jews.

Mr. Speaker, Hadassah has worked since its inception in 1912 to create a higher quality of education and equal rights for women in the United States and the Middle East. It is my sincere belief that as Hadassah continues into the Millennium and to its own hundredth birthday, it will continue to fight for women against disease, violence, and injustice.

RESCUE THE UNINSURED FROM SEA OF UNCERTAINTY

HON. BENJAMIN L. CARDIN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 5, 2002

Mr. CARDIN. Mr. Speaker, the growing epidemic of the uninsured threatens both the social fabric and the economic stability of our nation. If Congress fails to act, soon millions more Americans will be denied their basic right to health care. The Catholic Health Association represents facilities across this country that provide a safety net for uninsured and underinsured citizens in need of medical care. Led by the Reverend Michael D. Place, its president and chief executive officer, CHA is working actively to increase awareness of this crisis. I urge all my colleagues to heed their timely call to action.

[From the Baltimore Sun, Feb. 19, 2002]

RESCUE THE UNINSURED FROM SEA OF UNCERTAINTY

(By Michael D. Place)

WASHINGTON.—In Manchester, N.H., a 6-year-old girl arrives at Catholic Medical Center unable to eat for several days because of medical complications from dental pain.

Why the wait? The little girl's family did not have health insurance.

This child, and so many others across the country, represent the crisis of vulnerability endured by 38 million Americans without any health insurance.

While the girl in Manchester was fortunate enough to live in proximity to a Catholic health facility with high quality emergency care, there are 22 million Americans who live in rural areas that the federal government calls "health profession shortage areas."

Many of these citizens are without health insurance and without access to medical care of any kind. They are at the apex of this health care crisis of vulnerability.

As we struggle to cope with burgeoning numbers of uninsured across the country, rural areas highlight a disturbing trend of funding "drift"—a drift away from subsidized health care coverage for the poor, the unemployed and the disabled.

Rural hospitals were hit hard by the Balanced Budget Act of 1997. It has been estimated that of the $118 billion that the law directed to be cut over five years, $16.8 billion was cut from Medicare funds intended for rural areas. Legislation in the past two years has restored only about $3.8 billion of this money.

For skeptics who believe that rural health care may not be as vital as has been reported, a quick look at a sample state's mortality statistics may be convincing.

In Illinois, rural death rates from all causes from 1992 to 1996 were 1,106.7 deaths for every 100,000 people. This figure compares with 853.8 deaths in Illinois' urban areas.

Sadly, the rural patient base tends to be older, poorer and less medically privileged. For such patients, the small rural hospital is indeed a lifeline in need of preservation.

Whether in rural or urban areas, our cities have no shortage of uninsured and desperate families. In Des Moines, Iowa, a single Catholic hospital—Mercy Medical Center—operates a free clinic through its House of Mercy program. More than 600 people a month come in without insurance, many with acute illness.

In the South Bronx, the Dominican Sisters Family Health Services is a safety net provider in what has been designated the nation's poorest congressional district. Hospital admission rates in that community for children with asthma and pneumonia—conditions that can be prevented with adequate primary care—are five to seven times the rates in more affluent areas of New York City.

Emergency access to basic health care is a stopgap. The emergency room or free clinic is not a substitute for health insurance coverage for access to the same health-care services enjoyed by the more privileged in our society.

And such access is critical not only to ensuring quality of life but also term of life. The heart or cancer patient, treated early and with our best tools, can be offered a much different prospect than the critical care patient who arrives without benefit of early therapy.

During this congressional legislative session, it is increasingly important that we tackle the health care needs of our nation's uninsured. When Congress failed to adopt an economic stimulus package in February, the growing numbers of the recently unemployed and uninsured were dealt a dose of legislative paralysis.

Added to the diminishing set-asides for the "permanent" uninsured, the health care outlook for our nation's poor, uninsured, and under-served population is truly bleak.

We must and can do better.

American society must ensure that each person has access to affordable health care. At a crossroads moment, let us engage in a new national conversation on systemic health care reform, a dialogue from Main Street to Pennsylvania Avenue.

It is time for our nation's public and private leadership, health care providers and faith-based groups to come together and to join all Americans in a search for real and meaningful solutions to this health care challenge.

CONGRATULATING REVEREND BOBBY RAY MORRIS

HON. SAM GRAVES

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 5, 2002

Mr. GRAVES. Mr. Speaker, I rise today to congratulate Reverend Bobby Ray Morris of Lawson, Missouri. Reverend Morris has been the pastor of the Lawson Assembly of God Church for the past 42 years, providing spiritual leadership to generations of Missourians.

In addition to caring for his congregation, Reverend Morris is a positive influence on the community of Lawson. During his distinguished tenure, 25 individuals became pastors, youth leaders, and missionaries. The dedication and guidance of Reverend Morris enabled these individuals to answer their calls to the ministry.

This well-loved and respected man of God is retiring on March 16. Although the Reverend will relinquish his role as leader of the Lawson Assembly of God Church, he will remain a spiritual leader in the community and continue to guide and inspire future generations. Please join me in honoring Reverend Bobby Ray Morris for his life of service to the community of Lawson.

PERSONAL EXPLANATION

HON. HILDA L. SOLIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 5, 2002

Ms. SOLIS. Mr. Speaker, during rollcall vote number 46 on H. Con. Res. 305 I was unavoidably detained. Had I been present, I would have voted “yes”.

PERSONAL EXPLANATION

HON. RUBÉN HINOJOSA

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 5, 2002

Mr. HINOJOSA. Mr. Speaker, I regret that I had to travel to my Congressional District for an important event on February 28, 2002. Had I been present, I would have voted “yes” on rollcall 46.

HONORING ABRAHAM FROST

HON. PETER DEUTSCH

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 5, 2002

Mr. DEUTSCH. Mr. Speaker, today I rise to honor the memory of Abraham Frost, who came to this country from Poland in 1912. Mr. Frost was an individual who was constantly in awe of everything he saw in the United States. For his entire life, he had a deep appreciation for the opportunities this great nation provided to him, and truly enjoyed his work and time spent raising his family. Mr. Frost marveled at the development of modern conveniences such as automobiles and airplanes. He was truly captivated with the possibility of realizing the American Dream. Abraham Frost died in 1976 in Miami Beach, Florida.

Mr. Speaker, the accomplishments of Abraham Frost are a testament to his dedication and his passion for life. He leaves a lasting legacy for both his family and friends.

HUNTING MADE EASY

HON. SAM FARR

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 5, 2002

Mr. FARR of California. Mr. Speaker, I encourage you to read the Time Magazine article entitled “Hunting Made Easy” which describes the “slaughter” of “captive animals to mount their heads on a wall.”

It is a very disturbing article which also raises the question, “Should Congress step in?” The answer is a resounding yes. You can step in by cosponsoring H.R. 3464, the “Captive Exotic Animal Protection Act of 2001”, a bill to combat the unfair and inhumane practice of “canned hunting.” Even hunters are objecting to this gruesome practice.

Hunting Made Easy

(By Jeffrey Kluger)

The exotic Corsican ram trotting about the 100-yard-long pen in central Pennsylvania paid little mind to the men approaching across the field. People were always walking in and out of the pen, as often as not with food for the flock. So the ram didn't resist when the men drove all the animals toward one end of the enclosure. It was only when the first arrow—fired from just yards away—struck it in the haunch that it realized something was up. The ram hobbled off and was struck by a second arrow, then a third. It stood for a moment staring beyond the fence line and then settled onto its haunches, bleeding. A gunshot to the abdomen finished it off—preserving its head as a trophy.

It has never been easy being an animal at the business end of a hunt, but these days it's hard being the hunter too. Dwindling ranges and herds make the ancient business of stalking prey an increasingly difficult proposition. The answer for many Americans is to shift their shooting grounds from the wild to one of the country's growing number of hunting preserves.

By almost any measure, hunting preserves are enjoying a boom. Up to 2,000 may exist in the U.S., with 500 in Texas alone. Many advertise on the Internet and in hunting magazines, and all offer the same thing: the chance to bag a trophy, with none of the uncertainty of hunting in the wild. ‘‘No kill, no pay’’ is the promise many make.

Of course, making good on that guarantee requires bending the prey-and-predator rules. Animals at some preserves are so accustomed to humans that they wander into range at the sound of a rattling feed bucket. Elsewhere they're confined to small patches of woods where they can't elude hunters for long. At others they may never even make it out of their cages before being shot.

Most troubling, it's not just prolific-as-rabbits deer and other common prey that are being killed in such canned hunts, as they're sometimes called; it's rarer creatures too. All manner of exotics—including the Arabian oryx, the Nubian ibex, yaks, impalas and even the odd rhino, zebra or tiger—are being conscripted into the canned-hunt game and offered to sportsmen for ‘‘trophy fees’’ of up to $20,000.

Not surprisingly, these hunts have their critics. A handful of states ban or restrict the practice, and a pair of bills are pending in the U.S. Senate and House of Representatives to prohibit the interstate sale of exotic animals for hunts. Supporters of the hunts object, arguing that exotics are bred in sufficient numbers to support the industry and that many surplus zoo animals could not survive in the wild anyway. Even to some outdoorsmen, however, canned hunts are beginning to look like no hunt at all. ‘‘I started hunting when I was 7 and didn't kill my first deer until I was 16,’’ says Perry Arnold, 52, of Lake City, Fla. ‘‘What they got going on now, that ain't hunting. That's a slaughter.’’

A slaughter is precisely the way canned-hunt foes frame the practice, and the killing of the Corsican ram is not the only horror they point to. The Humane Society of the United States tells stories of its own: the declawed black leopard that was released from a crate, chased by dogs and shot as it hid under a truck; the domesticated tiger that lounged under a tree and watched a hunter approach, only to be shot as it sat. ‘‘Canned hunts are an embarrassment,’’ says California Representative Sam Farr, sponsor of the House bill.

What makes the problem hard to police is the sheer number of exotic animals for sale. There are about 2,500 licensed animal exhibitors in the U.S., and only 200 of them belong to the American Zoo and Aquarium Association, which condemns the sale of exotics to hunting ranches. Even unaffiliated zoos might be reluctant to wade into the canned-hunt market, but many do so unknowingly, selling overflow animals—often products of too successful captive-breeding programs—to middlemen, who pass them into less legitimate hands. The crowding that can result on the ranches leads to animals' being killed not just by hunters but also by diseases that occur in dense populations.

If zoos have trouble keeping track of exotic animals, Washington doesn't even try. The U.S. Fish and Wildlife Service can intervene only if animals are federally protected or if the hunt violates a state law and interstate commerce is involved. Since many cases don't meet those criteria, the animals are essentially orphaned by the feds.

Still, not all hunts on preserves provoke an outcry. Many ranch owners keep exotic animals out of their collections or conduct hunts on grounds that give prey a sporting chance. The Selah Ranch in Austin, Texas, is a 5,500-acre spread covered by Spanish dagger and prickly pear, often with no sign of the elusive animals that live there. ‘‘There are a lot of exotic animals on this place that die of old age,’’ says Mike Gardner, owner of San Miguel Hunting Ranches, which runs Selah.

Here too, however, the odds can be stacked in the hunters' favor. Deer are often lured to feeding stations, where they are serenely unaware of the men in the stilt-mounted tin shack 75 yards away. Such lying in wait—or ‘‘shooting over bait’’—is legal in Texas and defended by hunters. ‘‘It promotes a clean kill,’’ says Gardner. Other sportsmen are troubled by the practice. Stan Rauch of the Montana Bowhunters Association believes that fed animals are tame animals and should thus be off limits. "Animals become habituated to people when they depend on us for food," he says.

Even preserves with no baited killings and lots of room to roam may be less of a square deal than they seem. "If a ranch advertises itself as having 3,500 acres, you need to know if that space is open or broken down into pens and whether there's protective cover or the ground is clear," says Richard Farinato, director of the Humane Society's captive-wildlife protection program.

Concerns such as these are promoting governments to act. More states are being pressed to ban or restrict hunting in enclosures. The House bill, which parallels one introduced in the Senate by Delaware's Joseph Biden, would not drop the hammer on the hunts but would give Washington a way to control the animal traffic.

But the new laws could come at a price. In Texas alone, the hunt industry brings in $1 billion a year; a crackdown could hurt both good ranches and bad. "Cattle prices have stayed the same for 40 years," says Gardner. "To hold on to acreage, you've got to have other sources of income." Safari Club International is worried that since hunting areas are so different, it may be impossible to pass a law that covers them all. "There's no standard to say what is and what isn't fair," says club spokesman Jim Brown. "You know it when you see it."

But there may be a deeper standard than that. If the hunting impulse is as old as humanity, so is the sense of what it truly means to chase and bag an animal. Nature may have intended humans to hunt, but whether it meant to toss ranches, pens and feeding stations into the mix is a question hunters must ask themselves.

YOUNG PEACEBUILDERS ACT OF 2002

HON. MARK UDALL

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 5, 2002

Mr. UDALL of Colorado. Mr. Speaker, today I am introducing the Young Peacebuilders Act of 2002, a bill intended to help young people from regions of conflict around the world learn about conflict resolution, communication, and leadership. The legislation aims to get at one of the root causes of terrorism by enabling young people to interact with each other and gain a greater understanding of their cultures and their differences.

The goal of the Young Peacebuilders Act is to help international youth learn the value of working together to solve problems, break down barriers and mistrust, and avoid the cultural misunderstandings that have plagued their parents' generation. My hope is that the program this bill would establish can be part of a solution that will prevent another September 11 from ever happening again.

The bill would establish a program in the State Department for youth from regions of conflict around the world. The program would provide for visits in the United States of 90 days or less for training in conflict resolution and mutual understanding. Non-profit organizations and other organizations as determined by the Secretary of State would provide training, with the State Department working in conjunction with the Attorney General to establish criteria for eligibility.

With this program, Americans would have another opportunity to respond to President Bush's call for national and community service. I believe that groups like Seeds of Peace and Outward Bound, where I was an educator and director in Colorado for 20 years, could be vehicles for developing leaders of tomorrow and stewards of peace.

At the Colorado Outward Bound School, I saw first-hand how young people developed strong character and leadership skills by working in the outdoors. Our young people are our greatest resource and our future. Building peace requires an investment in new generations of young people around the world. In light of the violence and turmoil in the Middle East and the September 11 attacks, it is clear that this modest investment has never been so timely or needed more urgently.

I look forward to working with my colleagues in the House to move forward with this important initiative, and I am attaching a fact sheet on this bill.

A TRIBUTE TO JODI J. SCHWARTZ

HON. NITA M. LOWEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 5, 2002

Mrs. LOWEY. Mr. Speaker, I rise in tribute to Jodi J. Schwartz, who will be honored on Thursday, March 14, by Kolot: The Center for Jewish Women's and Gender Studies. Jodi's kindness and generosity have made her a dear friend. Her extraordinary ability, inexhaustible devotion, and charismatic personality have made her a leader in the Jewish community.

A partner at Wachtell, Lipton, Rosen and Katz, Jodi still finds time to serve in a leadership capacity for a host of diverse community organizations, including the Jewish Agency for Israel; American Jewish Joint Distribution Committee; the Commission on the Jewish People, a New York UJA-Federation group dealing with the unity and diversity of the Jewish people; Israel Policy Forum; United Jewish Communities; Jewish Board of Family and Children's Services; Jewish Community Relations Council; and the Jewish Council for Public Affairs.

Jodi's appreciation for Jewish causes surfaced while first visiting Israel in the late 1980's with the Young Leadership Cabinet of the United Jewish Appeal. During her fellowship at the Wexner Heritage Foundation in 1990–91, she gained a more robust appreciation for Jewish philosophy and principles. Jodi was later asked to take over as the United Jewish Appeal representative for annual giving at Wachtell, Lipton, Rosen and Katz, and has since returned to Israel more than 50 times.

Jodi received her Bachelor's degree, MBA, and law degree from the University of Pennsylvania and her Master's of Law in Taxation from New York University. She resides in New York with her husband, Steven F. Richman.

Jodi's contributions to New York and the Jewish community are immeasurable. It is my pleasure and privilege to congratulate my dear friend, Jodi J. Schwartz. Kolot could not have chosen a more worthy honoree.

A TRIBUTE TO THE LIFE AND ACHIEVEMENTS OF JAMES H. McKENZIE

HON. MIKE ROSS

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 5, 2002

Mr. ROSS. Mr. Speaker, I rise today to pay tribute to a close personal friend and a distinguished Arkansan who last week lost a courageous four and a half year battle with cancer. His name was James H. McKenzie.

Jim McKenzie was born in my hometown of Prescott, Arkansas, in 1941. After graduating from Prescott High School, he attended the University of Arkansas and was a member of Arkansas Razorback baseball team and the Student Senate and president of Sigma Alpha Epsilon fraternity. He then went on to get his law degree from the University of Arkansas School of Law and served two years on active duty as a Captain in the U.S. Army.

Upon his discharge from active duty, Jim returned to Prescott to practice law. As an attorney, he quickly earned the respect of the legal community and became a leader in the Arkansas Bar Association, serving in many capacities including president. He fulfilled appointments to several committees of the Arkansas Supreme Court and, in 1998, was named outstanding lawyer by the Arkansas Bar.

In our hometown of Prescott, to say that Jim was a respected and notable citizen would be an understatement. He was a pillar in our community. Jim served as president or chairman of the local Chamber of Commerce, the hospital board, and the Kiwanis Club. He was a lifelong, active member of the First United Methodist Church, where he was my Sunday school teacher. He was also a youth sponsor in the church, and he even coached Little League baseball.

Jim McKenzie truly exemplified the ideal of a public citizen. Throughout his life, he was a leader who never hesitated to give his time and energy to help others. For me personally, he was a role model growing up and an inspiration throughout my public service. I am grateful for all he did for our family and for his fellow citizens, and I feel privileged to have had the opportunity to call him a friend. His death is an enormous loss not only to those who knew him well, but also to our community and to our state.

My heart goes out especially to Jim's wife, Betty, their two daughters, Kris and Miki, and their five grandchildren as they deal with the pain of this difficult loss, and I am keeping all of them in my thoughts and prayers. While Jim may no longer be with us, his legacy and his spirit will always live on in all those whose lives he touched.

CLUB 20 STARTING SECOND HALF-CENTURY

HON. MARK UDALL

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 5, 2002

Mr. UDALL of Colorado. Mr. Speaker, I rise today to recognize Club 20 as it starts its second half-century as a forum and advocate for Colorado's majestic western slope region.

Founded in 1953 by the publisher of the Grand Junction Daily Sentinel and a number of business leaders, Club 20 took its name from the 20 counties from which its original membership came. Now it includes 22 counties, 75 incorporated cities and towns, the Southern Ute and Ute Mountain Ute Indian Tribes, 40 chambers of commerce, a number of special districts, and hundreds of businesses and individuals.

In its 50 years of service, Club 20 has been an active participant in lively debates about issues important to the economic vitality and quality of life in the communities of the western slope. From transportation, health care and other social services to the whole range of issues related to federal lands—which make up a large share of this region—Club 20 has been an effective advocate for its members. It has worked to identify issues of concern, inform its members about them, develop as great a degree of consensus as possible regarding ways to address those issues, and, most importantly, communicate to elected officials and others to make sure the voice of its members are heard on important policy matters.

As part of its work, Club 20 members make an annual visit to the nation's capital to meet with Members of Congress and their staffs and officials of the Executive Branch. These trips help inform people in Washington about the issues affecting western Colorado and the views of its citizens. They help us better understand how issues are affecting western Coloradans—people who are directly affected by federal decisions on public lands, agriculture, transportation, rural social services, and water as well as other issues. These direct contacts put a human face on the issues and are very valuable for all of us who work on these matters.

I ask all our colleagues to join me in congratulating Club 20 for its successful 50 years and in wishing them continued success for the next 50 years and beyond.

A TRIBUTE TO ALICE SHALVI

HON. NITA M. LOWEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 5, 2002

Mrs. LOWEY. Mr. Speaker, I rise in tribute to Alice Shalvi, who will be honored on Thursday, March 14, by Kolot: The Center for Jewish Women's and Gender Studies. Mrs. Shalvi, an internationally known scholar and women's rights advocate, has dedicated her life to creating a more just society in Israel.

Alice Shalvi has called Israel home for more than 50 years. Born in Germany and educated in England, she moved to Israel in 1949. The following year Mrs. Shalvi became Professor of English Literature at the Hebrew University, a post she held for 40 years. During her remarkable tenure, she established the English Department at Ben Gurion University of the Negev (1969–1973) and also served as head of the Institute of Languages and Literature at Hebrew University (1973–1976).

Her devotion to the betterment of Israeli women's lives led her to a voluntary role as Principal of Pelech Experimental High School for Religious Girls in Jerusalem, a school dedicated to ensuring equal opportunities for women in Torah study and in every aspect of civil society. She was also the founding Chair of the Israel Women's Network, the country's major advocacy organization on women's rights, and today serves as its honorary President. In 1996, Mrs. Shalvi was appointed rector of the Schechter Institute of Jewish Studies where she later served as President and as Chair of the Executive Committee.

Mrs. Shalvi lives in Jerusalem with her husband, Moshe Shalvi. They have six children, and are blessed with grandchildren.

I am proud to congratulate Alice Shalvi on her tremendous accomplishments. She has devoted her life to enriching the lives of women in Israel, and we are the better for her efforts.

A NATIONAL TREASURE

HON. MIKE ROSS

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 5, 2002

Mr. ROSS. Mr. Speaker, I wish to honor and congratulate a good friend and constituent on a well-deserved recognition for his unique and exemplary commitment to preserving our nation's architectural and cultural heritage.

For over 30 years, Parker Westbrook has dedicated himself to promoting the preservation and rehabilitation of countless buildings, parks, museums and monuments throughout the nation. In Arkansas, he is affectionately and aptly known as "Mr. Preservation." An active member of many states and local preservation foundations, commissions, and councils, Parker's efforts can be observed in numerous places throughout the state, perhaps most notably in the historic town of Old Washington, Arkansas, which briefly served as the state capital.

Parker spent many years in Washington, D.C. working here on Capitol Hill for several members of Arkansas's congressional delegation. His contributions to historical preservation began in 1968 while he was serving as an aide for the last United States Senator J. William Fulbright. At that time, Parker purchased and restored an old Quaker cottage in Waterford, Virginia, for which he received the Excellence in Restoration award from the Loudon County Chamber of Commerce.

His passion for restoration and preservation continued when he returned to Arkansas in the mid 1970s. In the 1980s, he helped create the Historic Preservation Alliance of Arkansas and helped pass an initiative that provides over $3 million per year for preservation in the State of Arkansas. Later, President Clinton appointed him to the National Park System Advisory Board and twice named him to the President's Advisory Council on Historic Preservation.

Friends and colleagues described Parker as dedicated and committed to "volunteerism." His leadership in preservation serves as an example to all of us at a time when our country faces new challenges that demand greater community involvement and public service.

Fittingly, in honor of his decades of work and dedication, the National Trust for Historic Preservation has recently bestowed upon him the prestigious National Preservation Award and declared him a "National Treasury." Parker Westbrook is a "national treasure," a true champion of a noble cause. His accomplishments will undoubtedly be admired and appreciated by this and future generations for many years to come.

YOUNG PEACEBUILDERS ACT OF 2002

HON. MARK UDALL

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 5, 2002

Mr. UDALL of Colorado. Mr. Speaker, the Young Peacebuilders Act of 2002 recognizes that our young people are our greatest resource and our future. It also recognizes that promoting international cooperation and increased mutual understanding—in effect, building peace—requires an investment in new generations of young people.

This legislation would offer young people from regions of conflict opportunities to develop strong character, integrity, and leadership skills, and would help them to learn about conflict resolution and communication. The bill is intended to instill hope—instead of fear—in the hearts of the world's young people, as well as in the hearts of Americans who are at a loss as to how to view the months and years ahead.

For 20 years, Representative UDALL was director of the Colorado Outward Bound School, where he saw first-hand how young people developed strong character and leadership skills by working in the outdoors. Outward Bound and similar programs in the U.S. could help international youth learn the value of working together to solve problems, as well as to help them avoid the cultural misunderstanding that have plagued their parents' generation.

The Young Peacebuilders Act of 2002 would establish a program in the Department of State for youth from regions of conflict. The program would provide for visits in the United States of 90 days or less for training in conflict resolution and mutual understanding. Training would be provided by non-profit organizations and other organizations as determined by the Secretary of State. The State Department, working in conjunction with the Attorney General, would establish criteria for eligibility for participation. The bill would authorize $2 million for each fiscal year to carry out this Act.

PERSONAL EXPLANATION

HON. ROBIN HAYES

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 5, 2002

Mr. HAYES. Mr. Speaker, due to a scheduling conflict, I was unable to be present for rollcall Nos. 41 and 42. Let the record reflect that, had I been present, I would have voted "yea" on each of these votes.

LIMITS FOR FARM PAYMENTS

HON. NICK SMITH

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 5, 2002

Mr. SMITH of Michigan. Mr. Speaker are we going to have a vote of "yea" or "nay" on limits for farm payments?

I would first offer a quote by the President from last August, "There's a lot of medium-sized farmers that need help, and one of the things that we're going to make sure of as we restructure the farm program next year is that the money goes to the people it's meant to help."

The following is a dear Colleague sent out yesterday and signed by Representatives NICK SMITH, MARCY KAPTURE, JOHN HOSTETTLER, EARL POMEROY, EARL BLUMENAUER, DAN MILLER, DOUG BEREUTER, and TAMMY BALDWIN, and I quote, As the farm bill conferees begin deliberations, I ask for your help in bringing about meaningful federal farm policy with limits on how much money a farm can receive. As President Bush has said, we should work to send him a bill that directs support to those it was meant to help, namely small and mainstream family farms.

In response to the Dear Colleague letter dated February 27, 2001 from Representatives CHAMBLISS and BERRY, one thing should be made clear: there are no effective limits for price support payments farmers may receive in current law, or in the House-passed farm bill. When the $150,000 limit is reached, any producer can continue to receive unlimited price support benefits through loan forfeitures and certificates. According to the Environmental Working Group's website (www.ewg.org) the top 5 recipients from 1996–2000 were: Riceland Foods, Inc. $49 million; Farmers Rice Corporation, $38.2 million; Harvest States Coop, $23.8 million; Tyler Farms, $28.2 million; Producers Rice Mill, Inc., $19.8 million. Do we really want federal farm policy that gives unlimited support to huge farm operations?

Last October, the Smith payment limitation amendment was brought before the House under the 5-minute debate rule. Despite the time limit on debate and organized opposition, the amendment fell just 26 votes short of passage. However, payment limitations successfully moved in the Senate farm bill by a vote of 66–31. Now we must resist the efforts of those who seek to thwart our efforts to cap farm subsidies. Unlike what has been suggested, most states do not have a single farmer who would be affected by the limitations we are trying to establish.

If you have any questions or would like to sign on to the letter of Representatives POMEROY and BEREUTER requesting payment limitations, contact Representative POMEROY's office, Representative BEREUTER's Office, or Representative SMITH's office.

HONORING REINHARDT COLLEGE

HON. BOB BARR

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 2002

Mr. BARR of Georgia. Mr. Speaker, there are a select group of people who reach out to make the world a better place, and truly make an impact on the lives of others. Dr. and Mrs. Floyd A. Falany are two such individuals. They worked tirelessly at Reinhardt College for 25 years, to bring students, faculty, and alumni the best they could offer as an educational and colligate experience.

Since first coming to Reinhardt in 1973, one of Dr. Falany's dreams was to bring a church to the campus. He saw that dream become a reality, when Reinhardt opened its doors to a new sanctuary in 1987. Aware of the importance of music and the performing arts, not only to a well-rounded educational facility, but also to a community, Dr. Falany's next goal became the construction of a state-of-the-art performance center. I am pleased to say that as of January 2002, Dr. Falany's second dream has also been brought to life.

The Floyd A. and Fay W. Falany Performing Arts Center was first announced in 1998, following the completion of its ambitious fund-raising campaign. An anonymous donor contributed the center's name gift, asking it be named for the former Reinhardt president and his wife. It holds eight practice rooms, six classrooms, two rehearsal spaces, two production/control rooms, four dressing areas, a green room, storage space, 15 offices, and a 350-seat auditorium with seven balcony areas. Taking 14 months to build, the project ran a total of $9 million. It houses both the music and communications departments of the college; the music department began holding classes in the building in January, and the communications and business school will join in the fall.

The first service was held in the center on Saturday, February 16, 2002, honoring the Falanys and the dedication of the center to the school. The next ceremony will be in April for the school's annual "Celebration Event," at which the college's trustees, advisors, alumni board, and ministerial association officers will meet to attend a performance by the Atlanta Symphony Orchestra.

I ask my fellow members to, please join me in congratulating Reinhardt College, on the successful completion of its new performing arts center, and in thanking Dr. and Mrs. Flanay for their continued dedication to their work, to the students of Reinhardt College, to God, and to their community.

TRIBUTE TO RETIRING WENTWORTH MILITARY ACADEMY PRESIDENT

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 2002

Mr. SKELTON. Mr. Speaker, let me take this opportunity to pay tribute to Colonel (Ret.) Jerry Brown, former President of Wentworth Military Academy, for the service he has given to the academy for the last seven years.

Colonel Brown's time as president of the academy has been marked with many accomplishments. Some of Colonel Brown's achievements include orchestrating the building of new barracks and an accreditation visit by the Higher Learning Commission of the North Central Association. Brown was also instrumental in forming the Wentworth Foundation, created to gather funds for capital improvements at the school.

As he prepares to spend more time with his family, I know that Members of the House will join me in expressing appreciation for his dedication to Wentworth Military Academy.

HONORING THE LIFE AND ACHIEVEMENTS OF EDWARD DURELL STONE

HON. JOHN BOOZMAN

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 2002

Mr. BOOZMAN. Mr. Speaker, I rise today to honor Edward Durell Stone on the 100th anniversary of his birth.

Born in 1902, Edward Durell Stone attended the University of Arkansas before becoming one of the most celebrated architects in American history. He is famous for designing recognizable buildings including the Museum of Modern Art, The U.S. Embassy in New Delhi and the Standard Oil Building, better known as the Amoco Building in Chicago. The latter still stands as the ninth tallest building in the world.

My colleagues here in Washington, DC are very familiar with one of his designs in particular, as many of them have enjoyed concerts, plays and performances at the Kennedy Center.

Stone left Arkansas for New York City, but eventually returned to design a number of notable buildings, including the University of Arkansas's Fine Arts Center, the Medical Center Hospital in Little Rock and the Pine Bluff Civic Center.

Today, Edward Durell Stone's family are in Fayetteville, Arkansas joining the University in celebrating his life and touring the house in which he grew up in. That house, the Walker-Stone House, is on the National Register of Historic Places and is now home to my Fayetteville District Office.

Mr. Speaker, I thank you for the opportunity to honor Edward Durell Stone and I yield back the balance of my time.

A SPECIAL TRIBUTE TO JAMES BLAKE OF TIFFIN, OH, A TRUE AMERICAN HERO

HON. PAUL E. GILLMOR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 2002

Mr. GILLMOR. Mr. Speaker, it is with great pride that I rise today to recognize a true hero. Since September 11, the definition of a hero has changed dramatically. People who selflessly put their lives on the line for others have always been recognized as heroes, but their deeds are even more appreciated today.

One of my constituents fits this description, James Blake from Tiffin, Ohio. Three days after the Christmas 2001 holiday, Mr. Blake, a truck driver for Fry Foods, and his son, Zach, were traveling on Interstate 80 in Pennsylvania, returning home after a trip to New York City. Over his CB radio, he heard of an accident ahead of him caused by a snow squall. When he and his son came across the accident scene, they saw that it involved a tanker truck that was loaded with powdered iron, an extremely flammable substance. Debbie Weeda and her three children were wedged in their car under the tanker. Her car on fire, her youngest trapped, she screamed for help. Mr. Blake reacted without regard for his own safety, running to the burning car to save Dominick, age 1, who was trapped in his car seat. On his first try, he was unable to extract the child. Wielding his pocketknife, he returned a second time and cut the restraints that trapped the infant. Having extricated Dominick from the burning car, the children, their mother and the Blakes fled the scene just before the tanker exploded.

Mr. Speaker, James Blake is a true hero. Today, at a time when the forces of evil have threatened our way of life, Mr. Blake exhibited the American spirit. I thank Mr. Blake, his son, and the countless fire and rescue personnel who put their lives on the line for others. Mr. Blake, you are a truly selfless American.

TRIBUTE TO MR. JAMES T. McCAIN

HON. JAMES E. CLYBURN

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 2002

Mr. CLYBURN. Mr. Speaker, I rise today to pay tribute to a lifelong friend and mentor, Mr. James T. McCain of Sumter, South Carolina. "Nooker" as he is affectionately known, is an extraordinary man who has contributed greatly, not only to his community and state, but the entire nation. He started his professional career as an educator. But his most lasting contributions were made as a civil rights activist. An accomplished author, his long-standing commitment to the struggle for equality is legendary throughout the nation. He is married to the former Ida M. Channault of Georgia, and they have three children.

Nooker was born on March 8, 1905 in Sumter, South Carolina, where he resides. He graduated from Morris College in Sumter, and continued his education in Philadelphia, Pennsylvania where he received a Masters of Education Degree from Temple University. His talents were displayed over subsequent years as an outstanding educator. He held positions as a teacher, principal, college professor, registrar and dean. The Negro Educational Review nationally recognized Mr. McCain's unique abilities in 1952 when he was named Runner-up in a nation-wide Classroom Teacher of the Year project conducted.

In addition to his incredible contributions as an educator, Mr. McCain has dedicated his life to seeking full citizenship, civil rights and absolute equality for minorities in our country. Through his participation in such civil rights efforts as the sit-ins, Freedom Rides and picketing during the sixties, Mr. McCain displayed his willingness to put the good of the people ahead of his own safety. He served as Field Secretary and Director of Organization of the Congress of Racial Equality (CORE) for nine years. His affiliation with CORE called for him to courageously work in numerous communities throughout the South during the turbulent 60's when civil rights activities were hazardous work. He later served as Director of the Citizenship, Education, Scholarship, Education and Defense Fund for Racial Equality in South Carolina.

Mr. McCain has made his mark on the civil rights movement, not only through his actions, but also through his publications. He was an inductee into the University South Caroliniana Society, and has contributed countless volumes on the civil rights movement to the South Carolina Library. He is co-author of the publication, Political Strength: How to get it, a guide to effective community action.

Throughout his life, "Nooker" has been active in many facets of his community. His past and present professional and civic affiliations include Associate Director, South Carolina Council on Human Relations; President and Treasurer, Palmetto Education Association; Vice Chairman, South Carolina Economic Opportunity Board; Coordinator Sumter Black Political caucus; Charter President, Sumter Branch of the N.A.A.C.P.; 1st Vice Chairman, Wateree Community Actions, Inc.; Boy Scouts of America; Lay Advisory Board, Sumter High School; Sumter Count Council on Aging, and the Governor's Council on Human Affairs for South Carolina. He is a recipient of the Order of the Palmetto, the highest honor that a South Carolina Governor can bestow on an individual. He has also been recognized as the Outstanding Senior Citizen of the Year for South Carolina. Mr. McCain continues his community involvement as a trustee emeritus of the Mt. Zion Missionary Baptist Church.

Mr. Speaker, I ask that you and my colleagues join me in wishing my first baseball coach and lifelong political mentor—Mr. James T. "Nooker" McCain—a Happy 97th Birthday which, God willing, he will celebrate on Friday, March 8th. I wish him good luck and Godspeed.

PAYING TRIBUTE TO RALPH NEWBY

HON. SCOTT McINNIS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 2002

Mr. McINNIS. Mr. Speaker, I would like to take this opportunity to recognize a truly dedicated teacher at Otero Junior College, Mr. Ralph Newby. Ralph has dedicated countless hours to helping others understand and succeed in the field of computer studies at OJC. He has gone far beyond what is required in the classroom and touched the lives of his students in such a profound way that he was recently named OJC Teacher of the Year. Mr. Speaker, I feel that it is only appropriate during this moment of distinction for Ralph that we, as a body of Congress recognize his efforts.

For fifteen years, Ralph has remained dedicated and committed to his students in their pursuit of computer studies. He has consistently kept up on the ever-evolving world of computers in order to give his students the best skills for their future jobs. He is known to his colleagues and his students for his loyalty, his willingness to be involved in their lives and his innovative teaching style. However, he is best known for his perseverance in his teaching; he will not quit trying new methods until his students fully understand a concept. Ralph has served his fellow teachers as the Chair of the Faculty Assembly and he has served his state as the Vocational and Technology Advisor to the State Community Colleges.

Ralph is not only an extraordinary educator but also a pillar of the community. He has been involved in organizing the Arkansas Valley Career Fair, regional FBLA conferences, Kids College, and Phi Beta Lambda. Ralph also coaches recreational sports, sponsors a marching band and is involved in church activities. He is also known as a loving father and husband.

Mr. Speaker, it is a great privilege to recognize Ralph for his service to his community and the students whose life he has changed. The diligence and commitment demonstrated by Ralph Newby certainly deserves the recognition of this body of Congress, and this nation. Ralph's achievements as a teacher serves as a symbol to teachers throughout Colorado, and indeed the entire nation. The honor of OJC teacher of the year is proof that hard work is rewarded. It is people like Ralph who help to ensure that our future generations are guaranteed the opportunity to improve their lives through the resource of education. Congratulations Ralph, and thank you for all of your hard work.

TRIBUTE TO THE CARL AND GLESSIE YOUNG COMMUNITY AUDITORIUM

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 2002

Mr. SKELTON. Mr. Speaker, let me take this means to recognize the city of Marshfield, Missouri, and the generosity of Carl and Glessie Young on the grand opening of the Carl and Glessie Young Community Auditorium. During a recent visit to Webster County, I attended the grand opening of this facility, which will serve the community and the students in Marshfield for many years to come.

The auditorium was made possible through a local bond issue and a generous donation from Carl and Glessie Young. This facility will be home to community and school plays, musical performances, concerts and speech and debate competitions. It will provide a teaching facility for the nearby schools.

Mr. Speaker, the citizens of Marshfield can be proud of their new 21,000 square foot, state-of-the-art facility. I know the Members of the House will join me in congratulating all of Marshfield on completing this fine addition to their community.

HONORING SAILING TEAMS FROM TEXAS A&M AT GALVESTON, TEXAS A&M UNIVERSITY AND UNIVERSITY OF TEXAS

HON. NICK LAMPSON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 2002

Mr. LAMPSON. Mr. Speaker, I rise today to honor the sailing teams from Texas A&M at Galveston, Texas A&M University, and the University of Texas for their heroism. I am amazed at the selflessness that these young people displayed.

On Saturday, February 23, 2002, Texas A&M University at Galveston was hosting a sailing team-racing regatta. As the sailboats were maneuvering for the start of the race, a mini van carrying a total of six people drove at high speed off a dead-end road and flew approximately 80 feet out over the water and sank. The van landed within 30 feet of the starting line.

Participants from the regatta yelled to shore for someone to call 911 and then swam in the 60-degree water to the van and made repeated dives in an effort to rescue the people trapped inside. The rescuers called for rocks from the shore to smash the windows open and other students began swimming the rocks out to the site. An anchor from the regatta motorboat was also used to smash the windows.

Over a period of ten minutes while the van was submerged the participants successfully rescued the five unconscious occupants, brought them to shore and administered first aid/CPR. The students rescued two adult women and three children, four years old, six years old and seven months old. The driver of the van, who purposely drove the van into the water and escaped on his own, is incarcerated and faces attempted capital murder charges.

Mr. Speaker, these students, many of whom were injured themselves from broken glass, showed astonishing courage. Today, I would like to recognize them on the floor of the U.S. House of Representatives. These brave sailors are:

Coach Gerard Coleman, Brence Bedwell, Jenipher Cate, Megan Chrostowski, Kelly Cunningham, Capt. Jeffrey Daigle, Kelly Gallop, Kevin Gunn, James Loynes, Chris Noll, Robin Roger, Joseph Richardson, Bill Self, Julie Svaton, Danna Svejkosky, Lloyd Towns, Judkey Reed, Mr. Shannon Galway, Capt. Jake Scott, Jennifer Doreck, John Gross, Spencer Ogden, Mike Curtin, Sarah Lakhani, Varun Idnani, Jennifer Curtin, and Scott Marsden.

On behalf of the city of Galveston, I would like to express my thanks to these courageous sailors who showed no regard for their own safety when it came to rescuing the people trapped inside that van. They make me proud to be a Texan. God bless.

HONORING THE JUNIOR ROTC CLASS OF CASS HIGH SCHOOL, GEORGIA

HON. BOB BARR

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 2002

Mr. BARR of Georgia. Mr. Speaker, at a time when the country remains understandably concerned about national and homeland security, it is reassuring to see a bring young group of students interested not only in becoming part of our military programs, but taking it upon themselves to begin one of their own. High school students who participate in Junior Reserve Officer Training Corps learn practical information that teach leadership, foster patriotism, and polish individual character; all traits that can be applied in every professional arena, whether or not they become part of the U.S. military directly.

I am proud to say that in the 7th District of Georgia, we have a wonderful program at Cass High School in Bartow County. The lengths to which the support system at Cass went in order to start their JROTC program early, is a true testament to their dedicated service. It was quite an ordeal for the students, faculty, and parents of Cass students to get JROTC classes up and running. Under normal conditions it takes five years for the application process to be completed, but in this case the school board was petitioned and the program rushed through.

The rapid implementation of the program can be attributed largely to two determined students: seniors Matt Barnes and Sarah Cavazzini. The two students recognized the need for a course that promoted maturity, discipline, and commitment. Educator Jeannie Buck says she has seen students turn a full circle due to the program. Sara Cavazzini was one of the first girls to be in the JROTC technology program, and became very involved in the engineering efforts of the program as well. She plans to continue here education at Auburn University's Navy ROTC program. Matt Barnes became interested in the military when he joined the Junior Silver Air Patrol in sixth grade. As a result of his success in that organization, he was awarded the Silver Air Patrol Award. Matt's desire to continue his education regarding the armed forces motivated him to initiate the JROTC program at Cass. Matt plans to join the military following graduation in June.

JROTC courses at Cass are under the direction of Brent Bunkley, and are support by a large network of teachers, administrators, parents, and other students. Students are responsible for purchasing their own uniforms, and parental support is the primary means by which the classes are kept afloat. Teens enrolled in JROTC earn class credit, as well as life-long lessons such as discipline, teamwork, and leadership.

The Cass High School JROTC program has made itself available for appearances at parades, and the presentation of colors for athletic events. I would like to commend the JROTC students at Cass for their foresight and dedication, as well as the parents and faculty who supply their own time and money to ensure the best for the future of their students. I hope my fellow members of the House join in applauding the JROTC program and in particular, the program at Cass High School in Bartow County, Georgia.

HONORING THE LIFE OF DARRYL FRANCIS

HON. JOHN BOOZMAN

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 2002

Mr. BOOZMAN. Mr. Speaker, I rise today to pay tribute to the memory of Mr. Darryl R. Francis of Fort Smith, Arkansas.

Darryl Francis passed away Feb. 8, 2002 in the arms of his beloved wife, Sherrian. He was survived by a large group of family and friends who will miss his contributions to their lives dearly.

Born in 1912, Darryl Francis grew up in Ridgeway, Mo. After receiving his bachelor's degree in agriculture at the University of Missouri College of Agriculture in 1936, he began a career in banking that led him to the position of President of the Memphis branch of the Federal Reserve Bank of St. Louis.

In 1976, Mr. Francis moved to Fort Smith, Arkansas to be closer to his family. He took the position of President, CEO and chairman of the board of Merchants National Bank, from which he retired in 1982 to take care of his former wife, Loretta, who suffered from Alzheimer's disease.

Mr. Francis was responsible for the modern reputation of the Federal Reserve Bank of St. Louis. He lead them to take revolutionary steps in emphasizing the importance of inflation as a national problem. He showed that money creation held the central role in the inflation process.

In 1966 he was awarded the Golden Step Award of the Agri-Business Club of St. Louis in recognition of his achievements resulting in a major economic impact on the St. Louis area. He also received the Citation of Merit Award from the University of Missouri Agriculture Alumni Association. He was named to a special U.S. delegation to Honduras in the 1950's to help set up a new banking system. He was honored in 2000 by the Federal Reserve by their dedication of the 25th annual Economic Policy Conference to him. His contributions to the world of banking and the systems used by that world will not be forgotten.

Mr. Speaker, thank you for giving me the opportunity to honor the memory of Mr. Darryl Francis.

IN MEMORY OF MOLLY PORTER

HON. MICHAEL N. CASTLE

OF DELAWARE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 2002

Mr. CASTLE. Mr. Speaker, it is with deep sadness that I report the death of Molly Porter, 34, of Smyrna, Delaware. Molly passed away on March 1, 2002, in the prime of her life. For the past five years, Molly has been a valued employee of the Delaware Public Archives in Dover, Delaware. Molly's work ensured that the history of Delaware was preserved and available for all Delawareans, and she helped many more people, firsthand, in their desire to learn more about their family, their state and their country. Her service to the citizens of Delaware and this country was a model for public service. She worked to help others and, in so doing, contributed to the quality of life in Delaware. She will not be forgotten. The state of Delaware has lost a true public servant, and our thoughts and prayers are with her family and friends at this time.

PAYING TRIBUTE TO G. MARVIN BEEMAN

HON. SCOTT McINNIS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 2002

Mr. McINNIS. Mr. Speaker, I would like to take this opportunity to pay tribute to Marvin Beeman and thank him for his extraordinary contributions to the National Western Horse Show. His life-long dedication to both his job, as a large animal veterinarian, and to the National Western Horse Show, as its manager, is surpassed only by the level of integrity and honesty with which he has conducted himself each and every day while at his posts. As the manager of the National Western Horse Show, he will always be remembered as a man with the utmost dedication and talent, and will continue to be known as a leader in the veterinary field. As he celebrates his retirement, let it be known that I, along with each and every person with whom he has worked and the people of Colorado, are eternally grateful for all that he has done for the National Western Horse Show and for the state.

Marvin has dedicated his entire life to the care and treatment of horses. Growing up on a 23,000-acre ranch, which was owned by the Phipps family, his father was a professional huntsman who managed the horses and hounds of the ranch and taught him how to care for and appreciate horses. At as early an age as seven years old, Marvin realized that he wanted to be a horse vet. He doggedly pursued his dream, and earned a doctorate in veterinary medicine from Colorado State University in 1957. Shortly after, he began working at the Littleton Large Animal Clinic, where he has worked ever since.

Marvin has had a distinguished career as a large animal veterinarian. He is the past president of the American Association of Equine Veterinary Practitioners, chief huntsman for the Arapahoe Hunt Club, and the only vet to be a trustee on the American Horse Council. In addition, he serves on the American Quarter Horse Association research committee and was inducted into the AQHA Hall of Fame. In 1997, Marvin took the prestigious post of Horse Show Manager at the National Western, where he served until retiring after the 2002 show. During his tenure, he markedly improved the quality of the show, as well as increased interest in it. Because of his dedication, knowledge and hard work, he will be sorely missed by everyone involved in the National Western, and by the thousands of people who enjoyed his work each and every year.

Mr. Speaker, it is clear that Marvin Beeman is a man of unparalleled dedication and commitment to the National Western Horse Show, to his veterinary practice and to the people of Colorado. It is his unrelenting passion for each and every thing he does, as well as his spirit of honesty and integrity with which he has always conducted himself, that I wish to bring before this body of Congress. He is a remarkable man, who has achieved extraordinary things throughout his career, and it is my privilege to extend to him my congratulations on his retirement from the National Western Horse Show and wish him the best in his future endeavors.

A SPECIAL TRIBUTE TO YVONNE N. DARLING ON HER RETIREMENT FROM THE OTTAWA COUNTY BOARD OF ELECTIONS

HON. PAUL E. GILLMOR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 2002

Mr. GILLMOR. Mr. Speaker, it is with great pride that I rise today to recognize a woman who has served the Fifth Congressional District with patriotism, devotion, and kindness. Today, Yvonne N. Darling of Elmore, Ohio will be retiring from the Ottawa County Board of Elections. For the last eight years, she has ensured the accuracy and sanctity of Ottawa County elections. Her dedication and optimism will not be forgotten.

Mrs. Darling's service to our country started long before she came to Northwest Ohio. She began her marriage as a military wife, making her own sacrifice while her husband, Jim, served our country. After his retirement, Mrs. Darling and her husband returned to Elmore, Ohio where she joined the Ottawa County Republican Central Committee. Taking on a leadership role, she served as Women's Club Treasurer. As an Elmore Village Councilwoman for 8 years, she again demonstrated how important it is to give back to your community. Most recently, she has served on the Ottawa County Board of Elections ensuring that our elections are safe and accurate.

Since 1975, Mrs. Darling has been an active member of the American Legion Post 269 and her efforts speaks for themselves. As the Chairman of the Americanism Committee, Mrs. Darling helps foster a sense of patriotism in high school students across Ottawa County. She motivates young people to give back to their communities and encourages them to reach for their dreams. At every opportunity she has made a positive impact on her community and the people around her.

Mr. Speaker, Mrs. Darling is an example of how American values can make a difference in each of our communities. Her passion for service and charity towards all will remain an important staple in the Elmore community for many years to come. I ask my colleagues of the 107th Congress to join me in saluting Mrs. Yvonne N. Darling and wishing her the very best in her future endeavors.

TRIBUTE TO STAN SLOSS

HON. MARK UDALL

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 2002

Mr. UDALL of Colorado. Mr. Speaker, I rise today to ask my colleagues to join me in celebrating the 60th birthday of Stan Sloss, who serves as my Senior Legislative Counsel and heads my legislative staff.

I would not ordinarily take the time of my colleagues to thank a member of my personal staff, but Stan is so well known and beloved by members on both sides of the aisle, and his reputation is so well regarded, that I believe it is entirely appropriate to commemorate his birthday in a journal that he has known so well and to which he has contributed so much.

Many of you know Stan and have had an opportunity to work with him over the years. Stan's distinguished service has resulted in his becoming a valued resource—not only as an experienced voice on substantive policy issues, but also for his knowledge of the venerated but often byzantine procedures of the House. I heavily draw upon his experience, expertise and diplomatic operating style.

A native of Glenwood Springs, Colorado, Stan is a graduate of Amherst College and the Harvard Law School. He came to Washington, DC in the late 1960s, working first in the General Counsel's office of the Atomic Energy Commission. He next spent some time in private practice, and among other things spent some time in Alaska working on some issues related to the Alaska Native Claims Settlement Act of 1971.

Stan's congressional career started in 1975 when he joined the staff of what was then known as the Interior and Insular Affairs Committee. He served as counsel to the Mines and Mining Subcommittee, chaired by Representative PATSY MINK. He assisted with some important amendments to the Coal Leasing Act that were passed over the veto of President Ford and with a variety of other measures that came before that Subcommittee.

In 1977, Stan became a counsel to the new Subcommittee on General Oversight and Alaska Lands, chaired by former Representative John F. Seiberling. In this capacity, Stan worked with both Representative Seiberling and my father, Morris K. Udall, who was the Chairman of the full Interior Committee. Stan helped draft a number of key parts of the legislation that became the Alaska National Interest Lands Conservation Act (ANILCA), particularly those related to subsistence uses by Alaska's Native peoples. Stan staffed hearings throughout the lower 48 states and Alaska and was one of the many key professional staff who helped shape the final legislation. ANILCA was a milestone in conservation, setting aside more than 100 million acres of Alaska's most pristine, public lands—an area larger than the State of California—and more than doubling the size of the nation's systems of national parks, wildlife refuges, wilderness and wild and scenic rivers.

In addition to ANILCA, Stan has been involved with many other laws and regulations affecting the public lands and natural resources. He served as Representative Seiberling's staff counsel to the Select Committee on the Outer Continental Shelf (OCS). That Committee developed the 1978 Amendments to the Outer Continental Shelf Lands Act, which shifted the focus of debate on the OCS away from just energy production to a more balanced approach, which included greater protection for the environment. He also played a key role in connection with a variety of other measures, including the Colorado Wilderness Act of 1980 and the Military Lands Withdrawal Act of 1986.

When John Seiberling retired in 1987, Stan remained on the Interior Committee staff, serving under former Representative Bruce Vento, chairman of the Subcommittee on National Parks and Public Lands. He was involved in development of legislation, including the Arizona Desert Wilderness Act sponsored by my father, the Colorado Wilderness Act of 1993 that included legislation developed by my predecessor, Representative David Skaggs, and the California Desert Protection Act.

In 1995, Stan left the Resources Committee to become the Legislative Director for David Skaggs. Representative Skaggs was a member of the Interior Subcommittee of the Appropriations Committee, so Stan was able to use his familiarity with public lands issues to assist in connection with those issues as they arose in that new context. He also dealt with the contentious issues related to Rocky Flats and the other sites in the DOE nuclear-weapons complex.

Stan was one of the first people I hired following my election in November 1998. I was fortunate to have someone who worked for my predecessor and so was familiar with the Second Congressional District. As a newly elected Member of the Resources Committee, I also appreciated his familiarity with matters within its jurisdiction as well as the more senior members and the Committee staff.

At my office, Stan has made important contributions in drafting legislation to establish Rocky Flats as a national wildlife refuge after it is cleaned up and closed. He also has worked on the Udall-McInnis wilderness bill for James Peak, and fire prevention legislation I have proposed with my colleague, Mr. HEFLEY.

Stan's work has not been confined to the environmental arena. His keen intellect, common sense and sharp legal analysis have been invaluable on the wide range of issues and topics that face all members every day. He has been especially effective in tutoring many of the younger members of my staff on the inner workings of the House, the nuances of legislative drafting and as an example of the highest standard of professionalism for congressional staff.

Like any thoughtful and accomplished lawyer, Stan is often fond of saying that he "can argue it flat or argue it round", and his objectivity is legendary in our office. Having said that, however, I also know that beneath his always calm demeanor and his ability to see all sides of a question, there beats the heart of a man who is passionate about doing the "right thing." Stan has never compromised his firm and unswerving commitment to civil rights and liberty. He loves the absurdity that is sometimes politics, but he doesn't allow political analysis to get in the way of his strongly held views about the majesty of our constitution.

Stan is a public servant in the best sense. He brings a work ethic and code of professionalism that is always focused on the promotion of policies that best serve the environment, the public good and the values of honesty and bipartisanship that are the hallmarks of American democracy at its best. His contributions to my office, the offices of my predecessors, the House Resources Committee and the whole House of Representatives—and ultimately the people of the United States—serve as an example of a professional life that commands both respect and affection. I wish Stan a happy birthday and many productive years ahead.

THE CONGRESSIONAL GLAUCOMA CAUCUS URGES AMERICANS TO GET SCREENED THROUGH CAPITOL VISION

HON. ELIJAH E. CUMMINGS

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 2002

Mr. CUMMINGS. Mr. Speaker, I rise today to address the issue of glaucoma awareness and the importance of early detection to prevent blindness among Americans.

Glaucoma, a debilitating eye disease that strikes without warning and often without symptoms, blinds more than 5,500 Americans annually. While impacting all Americans, glaucoma is the leading cause of blindness in African-Americans. Because eye damage from glaucoma cannot be reversed, early detection and treatment are the only ways to prevent vision impairment and blindness.

As a member of the Congressional Glaucoma Caucus, I am pleased to announce that glaucoma will take on a renewed emphasis on March 6, as the Congressional Glaucoma Caucus, Friends of the Congressional Glaucoma Caucus Foundation and Pharmacia Corporation join forces to bring glaucoma awareness and screenings to those at risk around the United States.

Capitol Vision, the call-to-action and educational campaign, will challenge Americans to learn more about glaucoma and encourage them to take positive steps to protect their vision. Capitol Vision will especially emphasize the importance of glaucoma awareness among African-Americans, who are three to four times more likely to go blind from glaucoma than are Caucasians. We will also raise awareness of the Medicare Improvement Act—effective since January 2002—that adds Medicare coverage of annual glaucoma screenings for people who are at high risk for glaucoma.

Rep. Charles B. Rangel (D-New York); Bud Grant, CEO, Friends of the Congressional Glaucoma Caucus Foundation; Eve Higginbotham, M.D., Professor and Chair, Department of Ophthalmology, University of Maryland School of Medicine; Paul Chaney, Vice-President, Global Ophthalmology Business, Pharmacia Corporation; Herman Washington, WHUR-FM; and Sharon Matthews, a glaucoma patient, will join me to kick off the campaign with a media briefing in the Rayburn building on March 6 in Washington, D.C. Capitol Vision will then travel to communities throughout the country to provide free glaucoma screenings. The first screening will take place in Rep. Rangel's district in late March.

I am honored to join forces with such a distinguished group to tackle a very important health concern. I strongly encourage other members of Congress to join us in our efforts to promote early detection of glaucoma so that we can eradicate a disease that steals the sight of many Americans.

IN HONOR OF JAMES M. SMITH

HON. DENNIS J. KUCINICH

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 2002

Mr. KUCINICH. Mr. Speaker, I rise today in recognition of James M. Smith, who is retiring after 30 years of distinguished service on the Cuyahoga County District Board of Health, 28 of which he served as President. Mr. Smith's unwavering commitment to public service has been invaluable to the people of Cuyahoga County. His integrity, intelligence, and unselfish commitment will be greatly missed.

Mr. Smith grew up in Nebraska where as early as high school he displayed leadership as president of his senior class. After high school he served his country during WWII in the Navy and the Naval Corp. He went on to attend the University of Michigan where he earned a BBA degree from the School of Business Administration and a JD from the law school. He then moved to Cleveland where he opened his own law practice which he ran for many years before merging with the firm founded by William R. Van Aken in 1977. He became a senior partner in what is now called, Van Aken & Bond.

Throughout his career Mr. Smith has displayed continued leadership and community involvement in the Cleveland area. He spent 10 years beginning in 1959 as a Councilman in the city of Highland Heights, the last three as President of the Council. He has served as an officer and member of the board of directors of many Cleveland based corporations as well as a member of various civil organizations.

James M. Smith's educational background, professional experience and extensive community involvement in Cleveland made him an ideal candidate to serve as President of the Cuyahoga County District Board of Health. His leadership, vision and genuine concern for the people of Cuyahoga County have led the department to be a leader in public health issues statewide. On behalf of the residents of Cuyahoga County and the city of Cleveland I would like to express sincere gratitude to the years of devoted service by James M. Smith.

I ask my colleagues to join me in rising to honor this truly remarkable public servant for his distinguished years of service to the Cleveland community.

H.R. 1542, THE INTERNET FREEDOM AND BROADBAND DEPLOYMENT ACT

HON. RICK BOUCHER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 2002

Mr. BOUCHER. Mr. Speaker, I rise today in full support of the Tauzin-Dingell bill, H.R. 1542. Included as a part of that bill by means of the Manager's Amendment is an antitrust savings clause. This is an important addition to the bill and the authors, the Chairman of the Committee on Energy and Commerce and the Chairman of the Committee on the Judiciary, are to be congratulated on the development of this amendment.

Regulatory and antitrust laws serve different functions. This amendment recognizes and embraces that fact as it preserves the antitrust laws and it indicates that these laws are not affected by H.R. 1542, the Telecommunications Act of 1996, nor the Communications Act of 1934. Second, and equally important, is the fact that it does not overrule nor affect any court case interpreting those laws including the Goldwasser case. The savings clause preserves this case law as well. Third, when the savings clause uses the term antitrust laws, such term includes antitrust defenses and immunities.

Congress and the courts have recognized how ill-equipped antitrust courts are to serve as regulatory agencies. That's why the 1996 Act replaced judicial supervision under the AT&T consent decree with regulatory supervision of the process through which competition in the telecom industry would be jump-started. If we had simply abolished the AT&T consent decree and left all these details to antitrust enforcement agencies, private litigants, and the courts, five bad results would have occurred.

First, the courts would have been flooded with regulatory tasks they are not suited to handle. It was a formidable task having one federal judge trying to micromanage the telecommunications industry under a consent decree. We did not repeat that experiment by authorizing many state and federal antitrust courts to undertake the same tasks.

Second, the antitrust enforcement agencies, including the Department of Justice, would have been called on to duplicate, second guess, and perhaps contradict the telecommunications policy decisions Congress instead decided to entrust to the FCC and to the state commissions. We need the enforcement agencies to enforce the antitrust laws, not establish telecommunications policy or duplicate the regulatory expertise of other agencies.

Third, incumbent carriers would not have been subject to many of the requirements they now face. By this bill, we limit regulation in the broadband segment of the industry, but we leave in place many regulatory requirements imposing on carriers duties they do not have under the antitrust laws.

Fourth, as courts reached different and inconsistent conclusions in different cases, chaos would reign in an infrastructure industry critical to our economy and our nation's security.

Fifth, we would bog down the deregulatory process through the protracted process of antitrust litigation in which cases often drag out for many years and, in some cases, decades.

The 1996 Act assigns responsibility for working out the difficult details of interconnection and other transitional arrangements to private parties, state regulators, and the FCC. Antitrust laws are not expanded or diminished in any way by the 1996 Act or this Act. Among the antitrust laws preserved by the savings clause in the Managers' Amendment are the well-crafted and carefully applied judicial doctrines that govern the manner through which antitrust courts coordinate their activities with those of the regulatory agencies to avoid potential incompatibilities that might otherwise occur. We did not expand or diminish the antitrust laws, or the manner in which the courts apply those laws, when we enacted the Telecommunications Act of 1996. We will not do so now by enacting this Act.

PAYING TRIBUTE TO CLARA HORAN

HON. SCOTT McINNIS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 2002

Mr. McINNIS. Mr. Speaker, I would like to take this opportunity to honor a woman whose passion for life and whose incredible human spirit is an inspiration to us all. Clara Horan, a Colorado resident of almost sixty years, who will soon achieve an extraordinary milestone, celebrating her one-hundredth birthday with four generations of her friends and family.

Clara was born on April 11, 1902 in Elba, Nebraska. She was raised by her parents, Peter and Katherine Andrzejewski, on a cattle, corn and wheat farm with her eight brothers and sisters. On December 7, 1921, Clara married Lloyd Horan of Cotesfield, Nebraska. The couple relocated to Mesa, Colorado in 1943, and then moved to Clifton, Colorado five years later. Her friends and family fondly refer to her as "Grandma."

Incredibly, Clara is the matriarch of a family that includes 3 children, 8 grandchildren, 16 great-grandchildren and 10 great-great-grandchildren. It is an impressive lineage of which she is extremely proud, and which, more importantly, is extremely proud of her. She has been a member of St. Ann's Church in Palisade, Colorado for nearly 25 years, and continues to volunteer on a weekly basis at the Migrant Center in Palisade. She still loves to attend to her garden, and finds time to fish on Grand Mesa. The remarkable longevity of Clara's life is a testament to the extraordinary passion for life that she has always carried with her, and her family and friends are all fortunate to be able to share in a life as rich and varied as hers.

Mr. Speaker, it is with great pleasure that I bring to the attention of this body of Congress the life and spirit of such an incredible woman. She has lived her life with extraordinary passion and kindness, and possesses an innate ability to brighten and invigorate the lives of those around her. She is truly an inspiration to all of us, and I, along with the many people whose lives she has touched, am honored to recognize her tremendous accomplishment in reaching her one-hundredth birthday, and more importantly, her passion for life and indomitable human spirit.

RECOGNIZING JOHN PLACK AS TOP STUDENT VOLUNTEER IN PRUDENTIAL FINANCIAL'S SPIRIT OF COMMUNITY AWARDS

HON. CAROLYN McCARTHY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 2002

Mrs. McCARTHY of New York. Mr. Speaker, I rise in recognition of John Plack, my constituent from New Hyde Park who has been chosen as a top student volunteer in Prudential Financial's Spirit of Community Awards, a nationwide program honoring young people for outstanding acts of volunteerism. John is one of only nine students from New York chosen for this award. He will receive an engraved bronze Distinguished Finalist medallion in the Prudential Spirit of Community Award ceremony.

John is a sixteen-year-old junior at New Hyde Park Memorial High School. John's project was to create the "Children Helping Children Remembrance Quilt." He headed the worldwide effort to make remembrance quilts from squares displaying personalized messages of condolence and hope for children affected by the September 11 terrorist attacks.

Thanks to John our community will always remember the support and help given by the world to New York during a desperate time. Children everywhere will always be aware of the contributions made by many to a city in need. Our community can rest assured that its future is in good hands with people like John demonstrating outstanding public service.

The awards, presented by Prudential Financial in partnership with the National Association of Secondary School Principals, honor young people for outstanding community service. This year, a record 28,000 youth volunteers across the country were considered for these awards.

John's ideas and creativity show his vision and determination to make the world a better place. It is refreshing to see such a young person with such a mature outlook and it bodes well for our future generations. I applaud John for his hard work, generosity and leadership. Long Island is proud to commend such a talented young individual.

We are fortunate to have John Plack in Nassau County.

HEART OF A CHAMPION PROGRAM

HON. KAY GRANGER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 2002

Ms. GRANGER. Mr. Speaker, each of us shudders in horror when we hear about a school shooting or about the drug and alcohol abuse that haunts our youth. We immediately want to do something—perhaps draft new legislation—something, anything, that will make things "safe" for our children and grandchildren.

As a former teacher with three children of my own, I know the anxiety and anguish that students and their parents often experience in facing the world today—it can be a very scary place.

So, last December, I sponsored a Safe Schools Summit in Fort Worth, Texas. Five hundred middle school and high school students from across my district participated in this 3-hour session. They were students of all races and backgrounds, male and female. The purpose of this summit was to hear directly from the students about how they felt in their schools. It was an amazing day, and the students produced some remarkable and somewhat surprising results.

Today, I want to talk about what the students said about character education. The students told me that they would feel safer at their schools if there were greater attention to the development of character in those schools. We found that students overwhelmingly support character education in their school, by nearly 80%. I knew that parents and educators were supportive of quality character education programs, but I learned through that gathering of students that, these young people also know that character is the critical element for creating safer schools. Yes, there are mechanical and physical elements, of a safe school, but these students identified a "human" element of safe schools, and character is a critical aspect of that element. To simplify, these students know that in order to have safe schools, we must have safe students.

On February 4th, what I believe will be one of the most effective character education programs in the nation was launched in my district. The Heart of a Champion character development program is a one-of-a-kind curriculum that combines video, and audio, with a print curriculum, to reach today's "sight and sound" generation on a year-round basis. Heart of a Champion's founder, Steve Riach, has created a comprehensive in-class program to reinforce positive character traits and virtues, and demonstrate examples of persons with high character to students in our schools.

Using positive role models, the Heart of a Champion program tells the stories of widely known athletes—stories that demonstrate virtues such as commitment, perseverance, integrity, courage, honesty, discipline, responsibility and fairness. These stories, and the application lessons that follow, encourage students to examine these character traits, and inspire them to embrace and integrate those traits into their own lives. It is a winning formula.

The Heart of a Champion program, has already received the endorsement of several key national community and educational groups, and their representatives will meet with members of the Department of Education later this month. I believe there is nothing else like this program available for schools today. I am in full support of this program and believe it will have a dramatic impact.

President Bush has repeatedly said that character education in our nation's schools is of great importance in this day. He is aware that each year, 10 million school kids abuse alcohol or drugs; that 65 percent of youth in school say they are sexually active by the 12th grade; and that 80 percent admit to cheating in school. We know there is a problem that needs our attention. I believe that character education programs like Heart of a Champion are a solution for this generation.

My fellow members of the House, we all agree our young people are the most valuable asset we have for our nation's future. That is why I believe the Heart of a Champion program is so necessary for our country at this time. This program will provide our kids with the character our society so desperately needs; will give them direction for the future, and will create champions in our schools, homes, and communities—young men and women of character who will become leaders for the next generation. But that can only happen if leaders like you and I show our young people that we truly care about them, by getting behind this program and helping to see that no young person is "left behind" in the development of their character.

Mr. Speaker, I invite all of my colleagues to get to know the Heart of a Champion program. I am confident that you will see the powerful impact it can have on the youth of your cities and counties. Today, it is impacting my district. Tomorrow, with your help and support, it could make a difference in yours.

COMMENDING TONY MONROE

HON. GEORGE RADANOVICH

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 2002

Mr. RADANOVICH. Mr. Speaker, I rise today to recognize Tony Monroe for his commitment to his community through service to disadvantaged youth and gang members in the Fresno area. Mr. Monroe rides a horse in some of the roughest neighborhoods and encourages those he encounters to find a better way of life.

Mr. Monroe has made numerous personal sacrifices to continue his service. Previously, he was a Fresno reserve police officer and a Santa Cruz County deputy sheriff. Now, he offers the children and youth a chance to feed his horse and talk about God, gangs, and life in general. A young Fresnan met Tony six years ago when he was an angry and violent street fighter. This young man credits Mr. Monroe with helping him get his life turned around.

The community has also responded by helping Tony with supplies and assistance. Jensen's Armstrong Stables houses two of Mr. Monroe's horses in exchange for maintenance work. All three of his horses, Max, Gumby, and Impact, were donated when his first horse died. This generosity shows how warmly received and appreciated Mr. Monroe is in the community.

Mr. Speaker, I rise to commend Tony Monroe for his community service and dedication to helping those in need. I encourage my colleagues to join me in wishing Mr. Monroe many more years of continued success.

PERSONAL EXPLANATION

HON. XAVIER BECERRA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 2002

Mr. BECERRA Mr. Speaker, on Tuesday, March 5, 2002, I was unable to cast my floor vote on roll call number 47, on the Motion to Suspend the Rules and Agree, as Amended to H. Con. Res. 305, a Resolution Permitting the Use of the Rotunda of the Capitol for a Ceremony to Present a Gold Medal on Behalf of Congress to Former President Ronald Reagan and his wife Nancy Reagan.

Had I been present for the vote, I would have voted "aye" on roll call vote 47.

CALIFORNIA UNIVERSITY OF PENNSYLVANIA INTERMODAL TERMINAL FUNDING

HON. FRANK MASCARA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 2002

Mr. MASCARA. Mr. Speaker, I submit to the RECORD a letter I have sent to Secretary Norman Mineta of the U.S. Department of Transportation. My letter is to clarify to the D.O.T. the intended use of an earmark I requested in TEA 21 for an intermodal transportation terminal on the campus of California University of Pennsylvania. I requested that earmark in order to fund an intermodal facility that would help connect the main campus to the new campus over one mile away. Now, the campus has an exciting opportunity to create a low speed magnetic levitation system connection between the two campuses and this intermodal facility would be a vital part of the system.

HOUSE OF REPRESENTATIVES,
Washington, DC, March 6, 2002.

HON. NORMAN MINETA,
Secretary, U.S. Department of Transportation,
Washington, DC.

DEAR SECRETARY MINETA: I write to clarify the intended use of funding I have obtained for an important project in my district. Over the years I have been working with California University of Pennsylvania officials to acquire funding for a much needed intermodal facility on the campus. Consequently, I have secured a $1 million TEA-21 earmark and other related earmarks for the University to construct an intermodal facility/transportation improvement project.

My intent for funding the intermodal facility was to support a people-mover system to connect the main university campus to the new auxiliary campus in the Roadman Park area. This area is approximately 1.25 miles away on a mountain ridge above the main campus and the fastest growing area of the university. Ultimately, this area will house over 750 students and be the location of the University's Sports Complex.

This people-mover transportation system is critical to the intermodal center and the University's Master Plan, which identifies a need to demonstrate a safe transportation connection between these parcels of land.

California University of Pennsylvania officials have had extensive discussions with the Pennsylvania Department of Transportation and the General Atomics Urban Maglev team to demonstrate the urban Maglev people-mover technology. I am fully supportive of this initiative which is consistent with the intent of the original earmarks that I obtained for the intermodal facility at California University of Pennsylvania.

Any Federal earmarks referencing the California University of Pennsylvania intermodal project should address the Urban Maglev people-mover demonstration project. All costs incurred to date and any cost incurred in the future as part of this project should be considered eligible.

I am a strong supporter of this important project, and am firmly committed to bringing a Maglev system to the campus of California University of Pennsylvania.

Sincerely,

FRANK MASCARA,
Member of Congress.

PAYING TRIBUTE TO HOWARD ROLAND

HON. SCOTT McINNIS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 2002

Mr. McINNIS. Mr. Speaker, it is with profound sadness that I rise today to recognize the life and contributions of the former County Commissioner and livestock auctioneer Howard Roland. His life-long dedication to both his job and the people of Mesa County is matched only by the level of integrity and honesty with which he conducted himself each and every day. As his family mourns his loss, I think it is appropriate to remember Howard and pay tribute to him for his many contributions to his community.

Howard began his service to Mesa County as County Commissioner in 1975. He served in this position with dedication and distinction until 1979. Howard was also renowned throughout the region for his honesty and integrity as an auctioneer. Using these qualities and his extraordinary knowledge of the stock show business, Howard opened the Grand Junction Livestock center in 1966. Howard will be remembered by his community as a humble man who was dedicated to both his work as a civil servant and as an auctioneer.

Mr. Speaker, it is my privilege to pay tribute to Howard Roland for his contributions to the Mesa County community. He was known for his kind heart and gentle demeanor, which he displayed throughout his life. His dedication to his fellow man certainly deserves the recognition of this body of Congress and this nation. I would like to extend my thoughts and deepest sympathies to Howard's family and friends during this time of remembrance and bereavement.

IN HONOR OF DANIEL PEARL

HON. ANNA G. ESHOO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 2002

Ms. ESHOO. Mr. Speaker, on February 21, 2002, the world learned of the horrific and senseless murder of Wall Street Journal reporter Daniel Pearl. An extraordinary American and a courageous and talented journalist, Pearl was killed in the pursuit of truth. Abducted in Karachi, Pakistan, Pearl was investigating potential connections between alleged shoe-bomber Richard Reid and radical fundamentalists in Pakistan. His death represents a tragedy not only for his wife Marianne, now seven months pregnant, and their family, but for all humanity.

Daniel Pearl's murder left an indelible mark on the world of journalism. A colleague who had the privilege of knowing Pearl is Don Kazak, a highly respected senior staff writer and former editor of the Palo Alto Weekly. It was at the Weekly that Pearl, then a student at Stanford University, began his career in journalism as an Editorial Intern during the spring of 1984.

Mr. Speaker, I respectfully submit for the RECORD a tribute to Daniel Pearl written by Don Kazak and published in the Palo Alto Weekly on February 27, 2002. I share it with my colleagues who I'm sure will find it as poignant and instructive as I did.

[From the Palo Alto Weekly, Feb. 27, 2002]

OUR TOWN: "IS THAT OUR DANNY?"

(By Don Kazak)

There is always distance between us and what we read in the newspaper or watch on the evening news.

These are usually events happening far away, which don't touch us.

The Sept. 11 terrorist attacks touched many, and shocked, angered or numbed the nation, but for most there was still a distance. As much as I felt for what happened, it was other people, somewhere else.

And then I heard about Wall Street Journal Danny Pearl being captured by a radical Islamist group. He had been a reporter for the Journal for 12 years. It was a big, international news story—but it touched me deeply and personally, along with others at the Weekly and at Stanford University.

Pearl was based in Pakistan and had traveled to Karachi, which is kind of the Wild West of Pakistan, to interview radical Islamists.

Then there was the photo of him sitting head bowed, hands tied, with a gun to his head.

Like many of the rest of rest of us, I have a hard time putting a label on what is right or wrong. Maybe I've covered too many stories for too many years.

The Weekly has employed editorial interns for many years. They are basically low-paid college help to get some newspaper experience as part of their education. These have been mostly terrific kids, bright and eager.

We've had so many interns over the years that they kind of blur together for me.

But I remember Danny, Stanford class of 1985. He had a bright smile and was obviously very talented. He's one of those I distinctly remember, and I recoiled at the image of him with a gun to his head.

I was the editor of the Weekly when Pearl was an intern, and when the news broke about his capture Carol Blitzer, an editor then and now, asked me, "Is that our Danny?"

Carol later received an e-mail from Kathleen Donnelly, a former Weekly reporter and Mercury News writer, now living in Seattle, which confirmed: That is our Danny.

He was so good-natured when he was here that it is hard to envision him as a hard-edged hard-news reporter. But that's what he has been and what he has been doing, chasing a difficult story in a dangerous place.

Eight journalists have already been killed trying to cover the mess in Afghanistan, because they wanted to "get the story."

I have a lavish photo book, "Requiem," about the Vietnam War, the war of my youth, the war I marched against. In it are the photos of photographers who died covering the wars in Southeast Asia, 135 of them.

I don't know if I would have had the courage to do what Danny Pearl was doing. But I sense the desire to get the story. He wanted to know—which is what drives all good journalists.

He and his wife were expecting their first child when he was kidnapped, adding to the pathos. Now that baby will grow up without ever knowing his or her father.

As a reporter, it has been bred deep within me not ever to take sides. I'm just a reporter, trying to make sense of what I see and hear for our readers. But no one can make sense of his death.

Now, it turns out he was killed not just because he was an American reporter, but because he was also a Jew.

Sometimes I think people who ignore what's going on the world around them have an easier time, because they don't have to feel for what is happening. But some things touch even the people once removed, reading a newspaper or watching the news on TV. This was one of those times.

When the World Trade Center towers collapsed, it was a tragedy for thousands of people and their families, friends, co-workers, all of us. There is still one photo which haunts me, taken on the fly by a Magnum photographer who didn't see what he shot until he looked at his film later.

In the photo, there are dozens of people outside the windows of the upper floors of one of the World Trade Center towers, fires billowing below them. They were there, looking out of the building, and they all died.

That was impersonal, because it was just people in the photo, none of whom I knew.

And then there was the photo of Danny Pearl with a gun to his head, killed for trying to get the story.

INTRODUCTION OF A BILL CONCERNING AGENT-DRIVERS AND COMMISSION-DRIVERS

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 2002

Mr. CRANE. Mr. Speaker, I rise to announce the introduction of legislation that will clarify the rules for determining whether certain agent-drivers and commission-drivers are employees for the purpose of FICA and FUTA taxes. Under present law, the determination of whether a worker is an employee or an independent contractor for Federal tax purposes is determined under a common law facts and circumstances test. An employer-employee relationship generally exists if the person contracting for the services has the right to control not only the result to be accomplished by the services, but also the means and details by which the result is accomplished.

Under a special statutory rule in section 3121(d)(3) of the Internal Revenue Code, agent-drivers and commission-drivers, who are independent contractors but are engaged in distributing meat, vegetable, bakery, beverage (other than milk) products, or laundry or dry-cleaning services, are treated as "statutory employees" solely for FICA and FUTA tax purposes if (1) their services are part of a continuing relationship with the person for whom services are performed; (2) the distributor's service contract contemplates that he or she will perform substantially all of the services personally; and (3) the distributor does not have a substantial investment in facilities used in performance of services, excluding facilities used for transportation.

In a reversal of its long-standing ruling position, the IRS issued GCM 39853 in 1991, which held that investments in distribution rights and territories were akin to investments in the intangible assets of education, training, and experience. The legislative history to section 3121(d)(3) had indicated that investments in education, training, and experience were not to be treated as investments in "facilities." The GCM analogized an investment in a distribution right or territory to an investment in education, training, and experience, and accordingly concluded that an investment in a distribution right or territory was not to be considered an investment in "facilities." This reversal has created much uncertainty, particularly in the baking industry, with respect to independent contractor drivers, who have made substantial investments in their businesses and have been paying Social Security taxes with their federal tax returns. While the IRS may contend that the GCM is no longer in force, I believe that it is being applied by various field agents.

For example, at least four companies have endured prolonged audits in which the IRS challenged the status of bakery drivers based on the GCM. In each of those audits, the IRS agreed that bakery drivers were independent contractors under the common law test, but sought to treat them as statutory employees by ignoring their substantial investment in ownership of their routes.

This is not only an unfair result, but has caused great confusion in the bakery industry. This amendment attempts to clear up that confusion and correct that inequity.

An investment in a distribution night or territory specifically and directly relates to, facilitates, and is used in the performance of the distribution services in question. In contrast, education, training, and experience have a more general, attenuated, and indirect relationship to distribution services. Accordingly, my bill will clarify the statute to reflect Congressional intent that an investment in facilities can include an investment in a distribution night or territory, in contrast to an investment in education, training, and experience. Thus, an independent contractor driver who is engaged in distributing meat, vegetable, bakery, beverage (other than milk) products, or laundry or dry-cleaning services and who has a substantial investment in his or her distribution fight or territory will not be treated as a statutory employee.

IN HONOR OF INTERNATIONAL WOMEN'S DAY

HON. SAM FARR

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 2002

Mr. FARR of California. Mr. Speaker, International Women's Day began in our Nation. It was not a gift from Members of Congress, nor from the well-clothed captains of industry, but rather a victory achieved by the women who sewed the suits they wore. It was these women, garment workers, who went on strike March 8, 1857, demanding the bread of economic security and the roses of a better life.

At an international conference held fifty-three years later, German socialist Clara Zetkin asked for an international women's day to mark the strike of the garment workers in the United States. Her request was met with unanimous support, and International Women's Day was born.

More than 11,000 babies will be born in our Nation today. These children will eventually inherit many of the problems the Federal Government strives to solve. To prepare them to assume responsibility for progressive government leadership, we must ensure their health, give them adequate nutrition, educate them, allow them equal opportunities, and inspire them with knowledge of the accomplishments which generations of women have contributed to the world.

And so, as we celebrate International Women's Day this Saturday, we must recommit ourselves to the betterment of the lives of and equal opportunities for our daughters, our wives, our sisters, and our mothers. We do this to honor all women, and especially those on strike during the early spring of 1857, who remind us of our capacity to improve our lives and the lives of those around us.

THE PRESERVING PATIENT ACCESS TO PHYSICIANS ACT

HON. NANCY L. JOHNSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 2002

Mrs. JOHNSON of Connecticut. Mr. Speaker, on the first of this year, a 5.4 percent across-the-board Medicare payment cut went into effect for doctors caring for seniors. Under the present payment system, further deep cuts are in store for the future. In some areas of the country doctors are no longer accepting new Medicare patients because payments no longer fairly recognize the changing health care needs of today's seniors nor the increasingly complex and difficult environment doctors must work under.

With malpractice insurance skyrocketing, nursing costs rising, diagnostic and treatment options expanding rapidly, and paperwork burdens exploding, these cuts are unjustifiable and unfair! They result from an arbitrary formula that ignores the real costs of providing health care. According to the American Medical Association, Medicare payments to doctors have increased only 18.5 percent in the last 10 years, an average of 1.1 percent per year, which pales in comparison to the skyrocketing costs of providing health care.

To now cut payment rates 5 percent for four years will, without question, force early retirements among physicians who are primarily serving our seniors, or force physicians to limit the number of Medicare patients they serve. More seriously, in the long run under-reimbursing our doctors in yet another public health care program will discourage the top quality students medicine has traditionally attracted and erode the world famous quality of American medicine.

Today, I am introducing legislation that would implement the recommendations of the Medicare Payment Advisory Commission (MedPAC) and reform Medicare's doctor payment formula. The bill repeals the Sustainable Growth Rate (SGR) system that has resulted in unpredictable payment increases and cuts. If left in place, the present SGR system is projected to cut physician payments by more than 20 percent over the next several years. My bill increases payments to physicians by 2.5 percent in 2003 and ties future updates to an index similar to the Medicare Economic Index, making the system for adjusting physician payments similar to that for adjusting Medicare payments to other providers. While much work remains to be done to understand and manage the cost of this common-sense reform, rational payment rates are essential to maintaining the quality of Medicare.

I am committed to providing physicians with a more stable, predictable, and fair payment formula. Absent such reform, we will shortchange our physicians and threaten both access to care and quality of care for our seniors.

HONORING 2002 MEN AND WOMEN OF HEART GALA HONOREES

HON. NICK LAMPSON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 2002

Mr. LAMPSON. Mr. Speaker, I rise today to honor the 2002 Men and Women of Heart Gala honorees. The honorees have dedicated themselves to their communities and to service. I am proud to represent them here in Washington. The recipients are: Anita Fogtman, Colin Fox, Norman Frede, Kathleen Harlan, Bette Johnson, Bill Lowes, Victor Maria, Floyd H. Myers, Charlotte Tetter, and Paula Orcutt Thomas.

These citizens were presented this award for their committed and caring service to their fellow Texans, and have helped make their communities better places for all.

NEWLY RELEASED DOCUMENTS SHOW PERSECUTION OF BELIEVERS BY CHINESE GOVERNMENT

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 2002

Mr. WOLF. Mr. Speaker, an organization called the Committee for Investigation on Persecution in China has compiled an unparalleled trove of documents concerning religious persecution by authorities of the People's Republic of China (PRC). The organization's president, Li Shixiong, has compiled an extensive archive that documents some 22,000 testimonies about persecution of Christians in China.' This archive also contains court transcripts, internal PRC government documents and photographs.

The work of the Committee for Investigation on Persecution in China provides a unique insight into how the PRC persecutes and imprisons people of faith, and restricts religious freedom throughout the country.

Attached for our colleagues is a copy of an article about the work of the Committee for Investigation on Persecution in China that appeared in the March 11, 2002, issue of the magazine Christianity Today.

[From Christianity Today, Mar. 11, 2002]

"NEW" CHINA: SAME OLD TRICKS

TOP COMMUNISTS, DESPITE THEIR DENIALS, ENDORSE ARREST AND TORTURE OF CHINESE CHRISTIANS BY THE THOUSANDS

(By Tony Carnes)

A Chinese Christian refugee in New York, working with Christians in China, has compiled an extensive new archive documenting brutal religious persecution that has caused more than 100 deaths and thousands of injuries.

Activist Li Shi-xiong, head of the New York City-based Committee for Investigation on Persecution of Religion in China, believes these documents establish that communist rulers at the highest levels take an active role in persecuting house-church Christians. In the past, top leaders in China have blamed repression on overzealous local officials.

The New York committee timed its unveiling of the archive to influence President Bush during his February trip to China.

The archive is a 10-foot-high stack of 22,000 testimonies about persecution of Chinese Christians. It includes court transcripts, internal government documents, and photographs. Experts call it the largest collection ever assembled on the persecuted church in China.

"The secret documents alone are extremely rare and incredibly important," says Carol Hamrin, a star China analyst who recently retired from the State Department. The mammoth collection, which Li calls a "truth bomb," includes 5,000 detailed testimonies of Chinese Christians describing their arrests, interrogations, and jailings. Many account include photographs of the persecuted believers, including injuries they suffered while in custody. Some case files include official arrest and court records. The largest number of testimonies comes from central Henan Province, where persecution has dramatically escalated since 1999. Li's group has also collected partial reports on 17,000 others, mostly Christians, persecuted for their religious beliefs.

Li is also documenting the cases of 117 religious people who have died while in official custody, 700 who have been put in labor camps, and 550 who are wanted by the police but are in hiding. He is also investigating 300 police officers accused of being especially abusive.

Freedom House's Nina Shea has written that Li's archive is a "tremendous work." Shea, a member of the U.S. Commission on International Religious Freedom, marvels at Li's "dedication to the cause of religious freedom and his amazing work in the documentation of so many thousands of cases of the persecution of China's Christians." Freedom House, an advocacy organization founded in 1941 by Eleanor Roosevelt, plans to make extensive use of the archive.

China scholar Brent Fulton, head of China Source in Los Angeles, is aware of the archive but has not examined its contents. He says the documents indicate the "degree of seriousness" with which China approaches unregistered religious groups. "They see the unregistered groups as a national security threat."

Li and the New York committee believe that going public with the archive will build international political pressure on China's leaders to end their repression of religion. Fulton foresees the government searching for those who leaked the documents. He also expects more crackdowns. But, he says, "The long-term response to the release of these papers will be good."

A SENSITIVE TIME

The revelation of the archive comes at a sensitive time for China. Political leaders say that the nation of 1.3 billion people faces wrenching changes related to its entrance into the World Trade Organization (WTO) last December. WTO membership will lower trade barriers, enabling China to compete for trade on a more level playing field. Certain parts of China's economy, such as high tech, are expected to do well. Others, such as the inefficient and subsidized industrial and agricultural sectors, may be pummeled. Millions of unskilled laborers could be thrown out of work.

Seeking to maintain its grip on society, the Chinese government since 1999 has been waging a campaign against "cults," such as the Falun Gong movement. (Falun Gong adherents use physical exercise as a spiritual discipline.) China's officials are trying now to eliminate what they consider undesirable movement, because WTO membership will bring additional international pressure on China to improve its poor record on human rights. "[China's] officials spell out that the anti-cult campaign is a preparation for the further opening of society because of China joining the World Trade Organization," Hamrin says. But, Fulton adds, "There are in fact a lot of cult groups that are doing bad things."

Says Eric Burklin, president of Colorado-based China Partner, "China wants to have a positive image with the rest of the world. The government can't really discern the cults from the non-cults because [China's top leaders] are atheistic."

The archive makes it clear that repression of religion is official state policy at the highest levels—not merely a local and sporadic phenomenon, as China usually claims. In the documents, officials say the cults are "soaking into" and weakening the foundations of state authority. Officials link rising religious-influence to the increased influence of Western cultural values of democracy and equality.

In public, Chinese leaders are vague on what actually constitutes a cult. "Cults are not religions," Premier Zhu Rong Ji said in a December meeting on religion. Critics say this approach allows authorities to crack down on any groups they do not like—including many house churches. These churches typically do not register with the government-sponsored Three-Self Patriotic Movement.

While there is no consensus on the number of Christians in China, Operation World estimates the presence of 45 million people in house churches and another 40 million members and adherents in the official church. There are about 12 million Catholics in China, in both state and unofficial groups.

Hamrin, who favors improving trade relations with China, says that this latest government repression will worsen matters. "This massive campaign against millions of their people will exacerbate social tensions"

AGGRESSIVE ACTIONS

In a recent public pronouncement, China's government declared that religion has never fared better. Ye Xiaowen, the head of the Religious Affairs Bureau, toured the United States last year. Ye claimed that the government had initiated a "golden time" for religion. China's president, Jiang Zemin, recently told a U.S. congressional delegation in Beijing, "I am looking forward to seeing a church on one side of every village and a mosque on the other side."

During the second week of December, top communist leaders gathered in Beijing to discuss religion policy. Jiang led off with a speech declaring, "The influence of religion on political and social lives in today's world should never be underestimated."

In lower-profile gatherings, however, the talk tilts toward-intensive surveillance of religion, according to Li's archival materials. In a speech, a local public security official in charge of religion quoted Hu Jintao, likely to be the next leader of China, on the proper approach to a "cult": "Watch and follow its direction and deal with it by law at the proper time." As the orders filter down, local leaders often act aggressively. A provincial security chief says, "Talk less and smash the cult quietly."

Li's archive documents how the anti-cult campaign was quickly broadened to include many well-known Protestant groups. In just one example, on August 18, 2001, authorities raided three offices of the South China Church. They arested 14 people, using fists and electric clubs to obtain accusations against the pastor.

"The central government is defining whole groups as targets of extreme measures," says Hamrin, who produced the U.S. State Department's first annual reports on religious freedom and persecution in China. For example, more than 300 Chinese associated with the Falun Gong movement have died while in China's custody.

Increasingly, groups are targeted not just for breaking civil laws on registration and holding unauthorized meetings, but for their beliefs and religious doctrine. The government, the archive shows, especially dislikes preaching about "the end of the world" or teaching that "the Lord can heal a person of disease."

According to the archive, the Ministry of Public Security spells out five characteristics of a cult, ranging from the clearly defined "deifying its top leader" to the grab bag of "stirring up and deceiving others." (See "What China's Secret Documents Reveals")

The documents show that officials are especially wary of unregistered church groups that attempt to link with other unregistered groups. In such cases, the archive shows, officials are returning to the fierce battles from the era of Mao Zedong, China's first communist ruler, from 50 years ago. This has led to tremendous abuses. In April 2000, officials put Peter Xu's Born Again Movement on their cult list. Officials set quotas for arrests, putting pressure on local police to obtain confessions. Police often beat, slap, and use electric shocks to obtain those confessions.

Leaders of the large South China Church organization also have been hit hard by recent arrests. A document from a police official in the provincial religion office hints that poorly trained police in Hebei Province are resorting to abusive interrogation methods instead of quiet information-gathering. The archive reveals several recent cases of local police trying to bribe the families of people they had killed under interrogation. Leaders of the South China Church report, "On July 20, 2001, we heard the news that Yu Zongju was tortured to death. The police did not inform her family until her body started to smell. They asked her family to meet them in a restaurant. They paid them $8,000 and warned them to keep quiet."

CHRISTIAN NETWORKS "MUTATE"

Last year, the Bush administration sponsored a resolution for the United Nations Commission on Human Rights that condemned Beijing's human rights record. Amnesty International reported in 2001 that China's use of torture was widespread and systematic.

China analysts such as Hamrin say that the Chinese government, wishing to improve its image internationally, probably will respond favorably to pressure to improve human rights.

"China has really developed and they have tasted too much freedom to go back," says Eric Burklin of China Partner. "There would be major bloodshed if they tried to go back to Maoist times."

But Li's archive shows that China's emerging strategy for dealing with the house-church movement is comprehensive and difficult for outsiders to counter. Officials gain access through informants, harass leaders, block communication, and strip churches of financial assets, including church buildings and homes.

The government notes in the documents that house-church Christians already have a means to resist these new efforts at repression. House-church leaders reportedly are creating networks that constantly mutate. Leaders communicate with wireless phones and hard-to-trace Web sites. In response, the government has begun building a national computer network known as the "Golden Shield" in order to conduct Internet surveillance and information-gathering.

Meanwhile, the impact of Li's archives promises to be seismic. "It's a bombshell," Shea says.

TRIBUTE TO ABELARDO "ARBIE" VILLARREAL

HON. JOE BACA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 2002

Mr. BACA. Mr. Speaker, today I pay tribute to the memory of a man who was very special to me and to the entire Inland Empire community, Abelardo "Arbie" Villarreal, a longtime professor at San Bernardino Valley College.

Like a ray of sunshine, Arbie came to San Bernardino Valley College (SBVC) in 1971 to teach English, mainly to foreign students. A tall, thin, meticulously groomed man with sharp, angular features and a ready smile, Arbie was easily recognized on campus. He was the first ESL teacher at SBVC, and he was able to reach out to the community by establishing ties between the college and the area's rapidly growing Spanish-speaking population.

Arbie was a great asset to Valley College and was recognized as "Outstanding Professor." He was awarded a Fulbright Scholarship/Fellowship to teach abroad, which allowed him to live and teach in Switzerland for two years. His knowledge of foreign languages easily opened doors for him in Europe. He spoke Spanish and Italian fluently and managed in French and Portuguese.

Last summer, Arbie was awarded a faculty fellowship to spend six marvelous weeks in Washington, D.C. working at the U.S. Department of Agriculture. He was surprised to reunite with several friends now settled in Washington who he met almost 40 years ago during a training program to join the new and exciting Peace Corps. Arbie spent two unforgettable years in Colombia with the Peace Corps.

Arbie was born in Texas but raised in Albuquerque, New Mexico. His mother, Amelia, and his older brother, Gilbert, still live in New Mexico. Arbie's twin, Hilly, also moved to California like his brother to teach at Cal State Los Angeles. Arbie's youngest brother, Albert, followed his beautiful Texan bride back to Texas.

Arbie was exuberant, well-prepared, good-looking, fun to be with, and curious about the world. He was so curious, in fact, that in order to learn more about Italy, he married his Italian student Maria, his wife of 28 years. Together they enjoyed their friends, travels, romantic candlelight dinners in their patio, the theater, music, Victorian dances, and books that they read to each other.

Arbie was loved, admired and respected by his adoring students, the faculty and staff of Valley College, and by his countless friends spread across two continents. Arbie's illness and death hit the San Bernardino Valley College campus very hard. During his hospitalization in September 2001, students organized a blood drive in his honor. More than 50 people donated blood while some people had to be turned away because turnout was so high.

Arbie's widow, Maria said that her husband loved life and battled his disease courageously. While he was in Washington over the summer, he developed pain in his lower back. Initially, this was the only symptom, and as he was a healthy man, he though it was just a strained muscle until he was diagnosed with kidney cancer.

Arbie passed away on Wednesday, February 27, 2001 surrounded by his loving family. The Villarreal family set up the Abelardo "Arbie" Villarreal Memorial Scholarship Fund for students at San Bernardino Valley College. Friday, March 8, 2001, the college will hold a memorial service in his honor.

And so Mr. Speaker, I submit this loving memorial to be included in the archives of the history our country. It is men like Arbie who make this nation great. Arbie leaves a legacy of lives filled with education and enrichment of knowledge for those whose lives he touched.

TRIBUTE TO THE COLORADO CHERRY CREEK DIVERSITY CONFERENCE

HON. BOB SCHAFFER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 2002

Mr. SCHAFFER. Mr. Speaker, it is an honor to rise today to congratulate the Colorado Cherry Creek Diversity Conference Executive Council. On February 2, 2002 students from 79 schools attended the conference that was held at Cherry Creek High School in Englewood, Colorado.

The Cherry Creek Diversity Conference was created as an opportunity for Colorado high school students to come together and discuss issues of diversity in their schools. Since the first year, when 18 schools participated, the conference has grown to include over 850 student representatives from 79 high schools and 150 adult volunteers. The conference gives an annual Human Rights Award to a Colorado organization that promotes diversity, as well as a scholarship to one attendee who has worked in his or her school to foster a more harmonious school environment.

The event was almost entirely planned and coordinated by the executive council, which was co-chaired by Nicholas Ferguson of Elizabeth, Colorado, and Challona Coleman of Aurora, Colorado. To put together this year's conference, students from 22 schools met once a week to plan the one-day event that included motivational speaker Michael Simmons, small-group discussions and more than sixty workshops. Janet Sammons, a teacher at Cherry Creek High School helped guide the students into making this year's conference an overwhelming success.

I applaud the efforts of Colorado high school students to improve relations between all people no matter their race, religion, or creed. As stated in the Pledge of Allegiance, we are "one nation, under God, indivisible, with liberty and justice for all."

I ask the House to join me in thanking high school students from across Colorado who participated in the Colorado Cherry Creek Diversity Conference, and also the executive committee for their hard work and success.

PAYING TRIBUTE TO SANDRA WILKINS

HON. SCOTT McINNIS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 2002

Mr. McINNIS. Mr. Speaker, I would like to take this opportunity to pay tribute to Sandra Wilkins and thank her for her extraordinary contributions in the Chaffee County Treasurer's Office. Her life-long dedication to both her job and the people of Chaffee County is matched only by the level of integrity and honesty with which she has conducted herself each and every day while at her post. She will always be remembered as an employee with the utmost dedication and talent, and will continue to be known as a leader in her community. As she celebrates her retirement, let it be known that I, along with each and every person with whom she has worked and the people of Chaffee County, are eternally grateful for all that she has accomplished in her more than 30 years of public service.

Sandra went to work in the Chaffee County Treasurer's Office in 1971, working for John Hughes. After Mr. Hughes retired in 1986, Sandra ran successfully for the post of county treasurer, and was subsequently re-elected three times. For over 30 years, Sandra has selflessly given her time, energy and unrelenting commitment to the people of Chaffee County, and although Chaffee County is no doubt sad to lose her services, everyone is happy that she will now have more time to travel, relax, and enjoy her well-deserved retirement.

Mr. Speaker, it is clear that Sandra Wilkins is a woman of unparalleled dedication and commitment to both her professional endeavors and the people of her community. It is her unrelenting passion for each and every thing she does, as well as her spirit of honesty and integrity with which she has always conducted herself, that I wish to bring before this body of Congress. She is a remarkable woman, who has achieved extraordinary things in her career and for her community. It is my privilege to extend to her my congratulations on her retirement and wish her the best in her future endeavors.

CONGRESS BEARS THE RESPONSIBILITY TO ENSURE THE SOLVENCY OF SOCIAL SECURITY

HON. ALCEE L. HASTINGS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 2002

Mr. HASTINGS of Florida. Mr. Speaker, I rise today to join with my colleagues in expressing my concern about the Administration's budget and how it jeopardizes the Social Security Trust Fund.

I would like to begin by reminding my friends that within the last year, the overall cumulative surplus has shrunk from $5.6 trillion to about $1.6 trillion; this is a difference of approximately $4 trillion in one year. Also last month, the Administration expressed the need for legislation that would raise the statutory debt ceiling in order to prevent a national default. Add the proposal to raid the Social Security Trust Fund surplus into this mix, and we have got a situation that the Democrats have been warning about and objecting to for the last year.

Mr. Speaker, the war on terrorism and homeland security are very important, but so is the economic well being of this country. We will support the Administration in the war on terrorism, but we will oppose any legislation that disregards the economic well-being and future prosperity of our citizens. National security and homeland security can be achieved without penalizing, Social Security and Medicare.

According to a Social Security primer published in September 2001 by the Congressional Budget Office, over the next three decades, the number of people over 65 years of age will rise by 90 percent, whereas the number of people below 65 years of age will rise by only 15 percent. This is a major demographic shift that will stretch the Social Security program to its fullest.

In his budget for FY 2003, the President is seeking more than $2 trillion in spending. This implies that for the rest of his term, the government will have to consistently dip into the Social Security Trust Fund surplus to fund its day to day operations. All this, despite the promises made by the Administration last year to leave the Social Security surplus untouched. It was in February 2001, in his address to the joint session of Congress, that the President stated that his budget will protect all $2.6 trillion of the Social Security surplus. Other Republicans echoed the same promise. A promise that they are trying to break as we speak. With these facts blatantly staring us in the face, we should be ensuring Social Security benefits for the public and not dissolving them.

It is true that the American citizens are concerned about national and homeland security. But, they are also concerned about their Social Security and Medicare benefits. We cannot and should not accomplish one at the expense of the other. It is time to keep the promises we made to the American public and ensure that the Social Security surplus is intact for the benefit of the current and future workforce.

HONORING THE NEW FAITH CHURCH AND PASTOR T.R. WILLIAMS

HON. KEN BENTSEN

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 2002

Mr. BENTSEN. Mr. Speaker, I rise to congratulate the New Faith Church located at 4315 West Fuqua Street, Houston, Texas, and the Reverend Theodore Roosevelt (T.R.) Williams, Sr., celebrating 25 years of service to the Houston community.

The New Faith Church was organized on February 27, 1977, as the New Faith Missionary Baptist Church. Under the leadership of its original and current pastor, the Reverend T.R. Williams Sr., and an initial body of fifty-two members, adopted the church motto which came from Nehemiah 4:6, . . . "for the people had a mind to work." Beginning in March 1977, services were held in Magnolia Lodge Masonic Hall at 2792 McGowen, and less than one year later on January 15, 1978, Pastor Williams and a membership of 142 entered New Faith's present church home on Fuqua.

From its inception, New Faith's priorities have been in accord with God's directives, and members served the church through participation in Bible Study, Deacons, Brotherhood, Junior and Senior Missions, Junior and Senior Usher Board, Adult, Youth and Sunshine Choir, and Boy and Girl Scouting programs. New Faith also has a tape ministry where quality cassette recordings of all worship services and special programs are made available at nominal cost. In addition, they have a premarital course to assist engaged couples in building a life together on a spiritual foundation and a leadership course to prepare men as spiritual leaders both at home and at church.

Under the leadership of Reverend Williams, the congregation has grown to more than 1,600 members with facilities on more than ten acres of property. Reverend Williams is assisted by Reverend Drew E. Marshall, Assistant Pastor; and the Minister of Music, Reverend Ronald J. Materre; Minister of Prison Care, Reverend Christopher Lumpkin; Minister of Pastoral Care, Reverend Rosetta Whitfield; Minister of Christian Education, Reverend Lekesha Barnett; Minister of Youth and Young Adults, Reverend Howard Earle; and Minister of Children, Sheryl Williams Edmonson. Additionally, a number of dedicated and talented individuals, both paid staff and volunteers, support the broader ministries and the demands of the church family through their day to day commitment and active involvement in church operations.

Mr. Speaker, I congratulate Pastor Williams on his 25 years of service to the New Faith Church and to all the members of New Faith Church as they look back on 25 years of service to their community. I wish them continued success as they build on the strong sense of community they have established in the city of Houston.

THE FUTURE OF SOCIAL SECURITY

HON. CAROLYN McCARTHY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 2002

Mrs. McCARTHY of New York. Mr. Speaker, I rise to discuss the future of Social Security.

Social Security is the basis of the American worker's retirement. Given the essential role it plays for every generation, regardless of gender, race, or socioeconomic status, I believe all my colleagues join me in support of this program.

Unfortunately, that is where our common ground ends.

We all know Social Security is in danger, and we all know something must be done. We just disagree as to how we can accomplish this difficult—yet necessary—task.

Each year, more Americans retire and begin collection of Social Security, but not enough people are joining the workforce to supplement the depleting funds. We must find a way to finance the Social Security Trust Fund without cutting guaranteed benefits.

I firmly believe investment is a critical part of the American worker's future, but I don't believe the government can promote investment at the expense of current retirees. Today, as my generation approaches retirement age, and we plan our finances for the future, I count on receiving Social Security benefits.

I don't recommend the American public rely solely on Social Security for their retirement. I want every generation to think constructively about their retirement by saving and investing money outside of Social Security. Since I want my constituents to retire in comfort, I want to make sure their money is secure. That is why I support pension reform legislation, why I believe each and every American worker should be actively involved in their finances, and why I know Social Security must be saved—not replaced by an alternative and faulty solution.

There is nothing to debate—if Congress doesn't do something to strengthen and finance Social Security, the trust fund will run out in 2038. My colleagues and I are good at waiting until the last minute to solve a problem . . . but this isn't one with which we should play political games.

THE EMERGENCY CONTRACEPTION EDUCATION ACT

HON. LOUISE McINTOSH SLAUGHTER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 2002

Ms. SLAUGHTER. Mr. Speaker, I am pleased to introduce today, along with my Senate colleague PATTY MURRAY, The Emergency Contraception Education Act. This bipartisan legislation will help educate women and health care providers across the nation about this important method of contraception. EC has often been called "the nation's best kept secret" because so few women in this country know that, in emergency situations, something is available that can prevent pregnancy after sexual intercourse.

It is estimated that almost 90 percent of women aged 18–44 have either never heard of emergency contraception, or don't know the key facts critical to the use of emergency contraception. Only one percent of women aged 18–44 have used emergency contraception. Were information about this important contraceptive choice readily available, the incidence of abortion could be drastically reduced. Our legislation is an attempt to get this information to precisely the women and health care professionals who need it.

One of the reasons this bill is so necessary is because there is so much confusion surrounding emergency contraception. EC is not abortion; it is not RU–486; it is contraception. Regardless of one's position on abortion, we should all be able to support emergency contraception. EC will reduce unintended pregnancies, and therefore reduce abortions.

Proof of the effectiveness of EC's ability to reduce unwanted pregnancies is found in Senator MURRAY'S home state of Washington, where emergency contraception is available without a prescription at pharmacies. In Washington State, pharmacy access to emergency contraception has helped produce the largest declines in adolescent pregnancy and in abortion rates in the last 20 years.

This legislation has been endorsed by the American College of Obstetricians and Gynecologists (ACOG). I hope that my colleagues in both the House and Senate will join Senator MURRAY and me, as well as the health professionals of ACOG, in championing this important reproductive health option for women across the country.

TRIBUTE TO LAVINIA M.C. HARTFIELD

HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 2002

Mr. KILDEE. Mr. Speaker, I rise today to offer congratulations to Mrs. Lavinia M.C. Hartfield upon her retirement from the International Free and Accepted Modern Masons and Order of the Eastern Star. Mrs. Hartfield will be honored at the National Midwest District Convention to be held in Grand Rapids, Michigan on March 9.

For the past 51 years Mrs. Hartfield has faithfully served this organization in a wide variety of positions. As one of the original founding members of the International Free and Accepted Modern Masons Mrs. Hartfield has remained a dynamic force in moving the organization forward. She is the first national district Grand Matron for the National Midwest District. The district consists of the states of Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, and Wisconsin. She serves on the First Supreme Board of Directors, the Corporate Secretary, the Grand Matron of the Edith Sampson Grand Chapter Order of the Eastern Star for the State of Michigan for the past four years and Secretary of the Exalted Degree Department of the organization. She was elected Supreme Recording Secretary at the first International Masons and Order of the Eastern Star Supreme Convention in Canton, Ohio and is still serving in that position.

Lavinia Hartfield has carried the principles of the International Free and Accepted Modern Masons of charity, benevolence and education into other areas of her life. As a member of the NAACP, The Urban League, and the Greater Flint Council of Churches she has worked to bring charitable service to everyone she meets. Honored by her peers, she was honored in 1975 by the Zeta Phi Beta Fraternal Sorority as the "Zeta Woman of the Year."

Rooted in the Bible and Christian doctrine, Mrs. Hartfield has returned her God-given musical talent to the Lord's service at Macedonia Missionary Baptist Church. Since her early childhood, Lavinia has provided musical inspiration to the congregation. Working tirelessly as the choir director, music coordinator, and gospel soloist she is presently carrying on the Lord's work as the assistant choir director.

Mr. Speaker, I ask the House of Representatives to join me in honoring Mrs. Lavinia Hartfield as she retires from active service with the International Free and Accepted Modern Masons and Order of the Eastern Star. Along with her husband of 47 years, Dr. Turner S. Hartfield, Lavinia Hartfield has served God, her community, her church and her family with zeal, compassion, and courage.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Meetings scheduled for Thursday, March 7, 2002 may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

MARCH 8

9:30 a.m.
Joint Economic Committee
To hold hearings to examine the employment-unemployment situation for February 2002.
311, Cannon Building

10 a.m.
Appropriations
Energy and Water Development Subcommittee
To hold hearings on proposed budget estimates for fiscal year 2003 for the U. S. Army Corps of Engineers and the Bureau of Reclamation, Department of the Interior.
SD–138

MARCH 11

1:30 p.m.
Governmental Affairs
International Security, Proliferation and Federal Services Subcommittee
To hold hearings to examine the Central Intelligence Agency national intelligence estimate of foreign missile development and the ballistic missile threat through 2015.
SD–342

MARCH 12

9:30 a.m.
Environment and Public Works
Superfund, Toxics, Risk, and Waste Management Subcommittee
To hold hearings to examine environmental enforcement.
SD–406

10 a.m.
Appropriations
Commerce, Justice, State, and the Judiciary Subcommittee
To hold hearings on proposed budget estimates for fiscal year 2003 for the Department of State.
SD–138

Finance
To hold hearings to examine welfare reform issues.
SD–215

Health, Education, Labor, and Pensions
Public Health Subcommittee
To hold hearings to examine solutions for uninsured patients.
SD–430

2:30 p.m.

Armed Services

Emerging Threats and Capabilities Subcommittee

To hold hearings on proposed legislation authorizing funds for fiscal year 2003 for the Department of Defense and the Future Years Defense Program, focusing on special operations military capabilities, operational requirements, and technology acquisition.

SR–222

Governmental Affairs

International Security, Proliferation and Federal Services Subcommittee

To hold hearings on S.1800, to strengthen and improve the management of national security, encourage Government service in areas of critical national security, and to assist government agencies in addressing deficiencies in personnel possessing specialized skills important to national security and incorporating the goals and strategies for recruitment and retention for such skilled personnel into the strategic and performance management systems of Federal agencies.

SD–342

Environment and Public Works

To hold hearings to examine the President's proposed budget request for fiscal year 2003 for the First Responder Initiative.

SD–406

MARCH 13

9:30 a.m.

Armed Services

Personnel Subcommittee

To hold hearings on proposed legislation authorizing funds for fiscal year 2003 for the Department of Defense Health Program.

SR–232A

Environment and Public Works

To hold hearings to examine the economic and environmental risks associated with increasing greenhouse gas emmissions.

SD–406

Governmental Affairs

To resume hearings to examine public health and natural resources, focusing on implementation of environmental laws.

SD–342

10 a.m.

Appropriations

Commerce, Justice, State, and the Judiciary Subcommittee

To hold hearings on proposed budget estimates for fiscal year 2003 for the Department of Commerce.

SD–116

Judiciary

Technology, Terrorism, and Government Information Subcommittee

To hold hearings to examine the worldwide connection between drugs and terrorism.

SD–226

Banking, Housing, and Urban Affairs

To hold oversight hearings on the implementation of the Transportation Equity Act for the 21st Century (105–178).

SD–538

10:30 a.m.

Appropriations

Legislative Branch Subcommittee

To hold hearings on proposed budget estimates for fiscal year 2003 for the Library of Congress and the Congressional Research Service.

SD–124

2:30 p.m.

Commerce, Science, and Transportation

To hold hearings on the nominations of Robert Watson Cobb, of Maryland, to be Inspector General, and Major General Charles F. Bolden, Jr., United States Marine Corps, to be Deputy Administrator, both of the National Aeronautics and Space Administration.

SR–253

Intelligence

To hold closed hearings to examine pending intelligence matters.

SH–219

MARCH 14

9:30 a.m.

Armed Services

To hold hearings on proposed legislation authorizing funds for fiscal year 2003 for the Department of Defense, focusing on the atomic energy defense activities of the Department of Energy.

SH–216

Commerce, Science, and Transportation

To hold hearings to examine.

SR–253

Commerce, Science, and Transportation

To hold hearings on the proposed National Defense Interstate Rail Act.

SR–253

10 a.m.

Veterans' Affairs

To hold joint hearings with the House Committee on Veterans' Affairs to examine the legislative presentations of the Gold Star Wives of America, the Fleet Reserve Association, the Air Force Sergeants Association, and the Retired Enlisted Association.

345, Cannon Building

Judiciary

To hold hearings to examine competition, innovation, and public policy concerning digital creative works.

SD–226

2 p.m.

Veterans' Affairs

To hold hearings on the nomination of Robert H. Roswell, of Florida, to be Under Secretary for Health, and the nomination of Daniel L. Cooper, of Pennsylvania, to be Under Secretary for Benefits, both of the Department of Veterans Affairs.

SR–418

Foreign Relations

To hold hearings on the nomination of Richard Monroe Miles, of South Carolina, to be Ambassador to Georgia; the nomination of James W. Pardew, of Arkansas, to be Ambassador to the Republic of Bulgaria; and the nomination of Peter Terpeluk, Jr., of Pennsylvania, to be Ambassador to Luxembourg.

SD–419

MARCH 15

10 a.m.

Appropriations

Energy and Water Development Subcommittee

To hold hearings on proposed budget estimates for fiscal year 2003 for the Department of Energy.

SD–138

MARCH 19

9:30 a.m.

Armed Services

To hold hearings to examine the worldwide threat to United States interests (to be followed by closed hearings in SH–219).

SH–216

10 a.m.

Appropriations

Commerce, Justice, State, and the Judiciary Subcommittee

To hold hearings on proposed budget estimates for fiscal year 2003 for the National Oceanic and Atmospheric Administration and the Small Business Administration.

SD–138

MARCH 20

10 a.m.

Judiciary

Technology, Terrorism, and Government Information Subcommittee

To hold hearings to examine identity theft and information protection.

SD–226

2 p.m.

Veterans' Affairs

To hold joint hearings with the House Committee on Veterans' Affairs to examine the legislative presentations of American Ex-Prisoners of War, the Vietnam Veterans of America, the Retired Officers Association, the National Association of State Directors of Veterans Affairs, and AMVETS.

345, Cannon Building

MARCH 21

10 a.m.

Appropriations

Commerce, Justice, State, and the Judiciary Subcommittee

To hold hearings on proposed budget estimates for fiscal year 2003 for the Federal Bureau of Investigation, Immigration and Naturalization Service, and the Drug Enforcement Administration, all of the Department of Justice.

SD–116

APRIL 10

10:30 a.m.

Judiciary

Antitrust, Competition and Business and Consumer Rights Subcommittee

To hold hearings to examine cable competition, focusing on the ATT-Comcast merger.

SD–226

CANCELLATIONS

MARCH 19

9:30 a.m.

Armed Services

To hold hearings on worldwide threats to United States interests; to be followed by closed hearings (in Room SH–219).

SH–216

HOUSE OF REPRESENTATIVES—*Thursday, March 7, 2002*

The House met at 10 a.m.

The Chaplain, the Reverend Daniel P. Coughlin, offered the following prayer:

Lord God, ever-attentive to our deepest needs, answer the prayers of the Members of Congress and bring them closer and closer to You.

Lord, once you draw souls close to You, people desire to hold on to Your presence, and so they pray. Then to give flesh and blood to prayerful sentiments and words they enter into the realm of self-denial. Finally, personal sacrifice, Lord, never seems worthwhile until it benefits another. So there are these three practices: prayer, fasting and acts of charity. The three are really one, giving life to each other as they bring us closer to You, O Lord.

When we deny ourselves food, drink and any portion of daily life, we gain an inner reminder of being poor and in need. To sincerely petition You, Lord, one needs to first have listened to the pleas of another. Once in the simplicity of heart a person can admit the little they have and still deny self just a portion, then that person has something to offer another from the heart, be that time or a cup of water.

Transform hearts, O Lord, by the Spirit of freedom and peace, then we will have something to offer the world, now and forever. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER. Will the gentleman from Kansas (Mr. TIAHRT) come forward and lead the House in the Pledge of Allegiance.

Mr. TIAHRT led the Pledge of Allegiance as follows:

> I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Monahan, one of its clerks, announced that the Senate agreed to the following resolution:

S. RES. 217

Resolved, That the Senate has heard with profound sorrow and deep regret the announcement of the death of the Honorable Howard W. Cannon, formerly a Senator from the State of Nevada.

Resolved, That the Secretary of the Senate communicate these resolutions to the House of Representatives and transmit an enrolled copy thereof to the family of the deceased.

Resolved, That when the Senate adjourns today, it stand adjourned as a further mark of respect to the memory of the deceased Senator.

The message also announced, that the Senate has passed without amendment a concurrent resolution of the House of the following title:

H. Con. Res. 305. Concurrent Resolution permitting the use of the Rotunda of the Capitol for a ceremony to present a gold medal on behalf of Congress to former President Ronald Reagan and his wife Nancy Reagan.

The message also announced that pursuant to Public Law 85–874, as amended, the Chair, on behalf of the President of the Senate, appoints the Senator from Nevada (Mr. REID) to the Board of Trustees of the John F. Kennedy Center for the Performing Arts, vice the Senator from Mississippi (Mr. LOTT)

The message also announced that pursuant to Public Law 68–541, as amended by Public Law 102–246, the Chair, on behalf of the Majority Leader, in consultation with the Republican Leader, reappoints Bernard Rapoport of Texas as a member of the Library of Congress Trust Fund Board for a term of five years, upon the expiration of his current term on March 10, 2002.

CONGRATULATIONS TO MIAMI DADE COMMUNITY COLLEGE

(Ms. ROS-LEHTINEN asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. ROS-LEHTINEN. Mr. Speaker, I would like to congratulate a special educational center located in my congressional district, Miami Dade Community College, which confers more degrees than any other college in the country. Run by Dr. Eduardo Padron, the college includes the much-acclaimed School of Aviation and Visitor Services.

The School of Aviation and Visitor Services provides three Associate in Science degrees: professional pilot technology, aviation administration, and aviation maintenance management. The school's programs provides workforce development, education, and training for South Florida's number one industry, travel and tourism.

The program is growing under the leadership of Harry Hoffman, the interim campus president; Dr. Joyce Crawford-Martinez, academic and student dean; Mario Guerrier, school director; and Marjan Mazza, the chairperson of the Eig-Watson School of Aviation.

Please join me in recognizing Miami Dade Community College's School of Aviation and Visitor Services, and especially Lois and Harvey Watson for their generous donation to the school, and Dr. Eduardo Padron for his unwavering dedication to academic excellence.

MEDICARE PRESCRIPTION DRUG BENEFIT

(Mr. ROSS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROSS. Madam Speaker, I was pleased to read in Wednesday's New York Times that my Republican colleagues are working on a prescription drug benefit that will encourage the use of generic drugs.

In January, the gentlewoman from Missouri (Mrs. EMERSON) and I introduced a bipartisan bill in the House that would create a voluntary, but guaranteed, Medicare prescription drug benefit for all seniors. We call it Medicare Part D.

Under our plan, seniors would pay an affordable monthly premium, an annual $250 deductible, and a 20 percent co-pay on the cost of their medicine. This 20 percent co-pay will truly promote the use of lower-cost generic drugs and provide real savings for our seniors.

Our bill gives seniors the freedom to choose their pharmacy and their medicines.

Madam Speaker, the Emerson-Ross bill is a comprehensive, common-sense plan. I urge my colleagues to join us in supporting this bipartisan legislation that will truly modernize Medicare to include medicine for all seniors.

TRIBUTE TO NEVADAN SOLDIERS WHO DIED IN BATTLE AGAINST TERRORISM

(Mr. GIBBONS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GIBBONS. Madam Speaker, today I rise to recognize two Nevada heroes, heroes who recently lost their

☐This symbol represents the time of day during the House proceedings, e.g., ☐1407 is 2:07 p.m.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

lives in our Nation's war to defend freedom and defeat terrorism.

Private First Class Matthew Commons is one of the most recent casualties in our war against terrorism. A graduate of Boulder City High School, Pfc. Commons was killed Monday in the mountains of eastern Afghanistan.

Last month, our State mourned the loss of Army Specialist Jason Disney. A resident of Fallon, Nevada, and a graduate of Churchill County High School, Specialist Disney was the 20th American to die in the conflict of these young heroes.

Our sympathies and condolences go out to the families of these young men. Please know that Pfc. Commons and Specialist Disney will be missed, but that their courage, valor, and patriotism will never be forgotten.

May God bless these heroes and God bless all of our fellow Americans fighting for freedom and against terror.

STOP VIOLENCE AGAINST WOMEN

(Mrs. CAPPS asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. CAPPS. Madam Speaker, I rise to highlight Lifetime television's campaign to Stop Violence Against Women. This violence crosses all economic, cultural, racial, religious and educational lines. It is a multi-faceted problem with no easy solution. But prevention through education and awareness is key to ending the cycle of abuse perpetuated against nearly one-third of American women.

I will soon introduce legislation to dramatically increase the scale of intervention by urging every health care provider to screen women, age 18 and older, for domestic violence. My bill would also provide health care professionals with the training needed to assess women for signs of abuse.

In the confidential environment of a doctor's office or clinic, health care professionals would serve as a bridge to the criminal justice system. Routine screening for domestic violence would unlock options a woman may not otherwise pursue and allow her to see that shelter and advocacy services may be useful to her.

Madam Speaker, I commend all who have worked unwaveringly to bring the issue of violence against women to the forefront.

DAY OF PRAYER FOR BURMA

(Mr. PITTS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PITTS. Madam Speaker, for years the people of Burma have suffered horrifying brutality, torture, rape, forced labor and destruction of homes and villages. Entire communities are forced to live in hiding in the jungles without access to medical care or education for their children because the military dictatorship of Burma continues to attack villagers who refuse to allow drug production on their land or who will not bow to the illegitimate authority of the SPDC.

Approximately 300,000 Burmese are now refugees in Thailand, Bangladesh, and India. When Rev. David Eubank visited with Daw Aung San Suu Kyi, leader of the National League of Democracy in 1997, she suggested inviting churches from around the world to pray for the people of Burma.

Since then, people from all faith backgrounds around the world now join each March to pray for peace for the people of Burma.

Madam Speaker, I urge the American people and this body to join me in praying for freedom and peace for the people of Burma.

MOURNING ARI HALBERSTAM

(Mr. WEINER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WEINER. Madam Speaker, today is the twenty-third of Adar, 5762 on the Jewish calendar, the Yahrzeit, or anniversary, of the passing of Ari Halberstam. It was 8 years ago today that he died as a result of wounds suffered in a terrorist attack on the Brooklyn Bridge March 1, 1994.

America awakened to terrorism on September 11, but for years there were Imams in mosques in the United States, who were inciting hatred and glorifying terrorism. For years, there were voices trying to bring this to our attention, one of the loudest of which was Devorah Halberstam, the mother of Ari. When she was told that her son's death was a result of simple road rage, she refused to let the authorities whitewash history. It was not just because of her son, it was because she realized back then what so many of us did not realize until September 11, that terrorism can happen in the United States and that, unless we are willing to confront terrorism, we are doomed to see it happen again.

On December 5, 2000, the FBI finally classified Ari's death as a terrorist incident. While it was heartening to see that they had abandoned their dogmatic view, this was a hollow victory. For 6 years, the FBI did not admit what it truly was. So today, as the candles burn in honor of Ari Halberstam, let us pause to remember the boy who was taken from us and let us stop to think of the lessons we should learn and let us pray that we have the wisdom to prevent attacks such as these from happening again.

CONGRESS PRAYS FOR MARTIN AND GRACIA BURNHAM

(Mr. TIAHRT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TIAHRT. Madam Speaker, today marks day 285 that Martin and Gracia Burnham have been held captive by Muslim terrorists in the Philippines.

Yesterday, in a video made by the Abu Sayyaf group, the Muslim terrorists, they confirmed their direct connection to the al Qaeda. Martin Burnham was forced to read a statement of grievances by the Muslims. The terrorists, through Martin, said they were targeting Americans and Europeans.

Martin and Gracia are innocent Americans, God-fearing people who are simply trying to make the world a better place. In a recent letter from Paul and Oreta Burnham, Martin's parents, they wrote, "We pray that we will soon be able to pass on to you good news of Martin and Gracia's release, but until then continue praying and believing God will see their release and being reunited again with their family."

At a time when the Nation is directly confronting terrorists in Afghanistan, contending with recession and unemployment and quietly fearing an additional attack, it would be easy to lose faith. I encourage our citizens to look at the strength exhibited by the Burnham family. Their plight is grave, but their enduring optimism and faith in God is a beacon of hope for us all.

Please join me in praying for Martin and Gracia's safe release, for the welfare of their family and friends, and for all of us that we share the Burnham's strong faith and use it to make our world a better place.

BALTIMORE ZOO WELCOMES ALASKA

(Mr. BLUMENAUER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BLUMENAUER. Madam Speaker, at times it seems that so much that we deal with on this floor is beyond our control. Yet it seems that there are small steps that we can take to make a difference.

One such step is a livable community promotes humane treatment of animals, whether in our community or the wild. Wild animals, such as polar bears, should be allowed to remain in their natural habitat and be contained only in spaces that directly replicate their natural environment, such as accredited zoos.

Many have been appalled at the polar bears languishing in sweltering temperatures in the Suarez Brothers Circus in Puerto Rico. I am happy to report that yesterday U.S. marshals and agents with the U.S. Fish and Wildlife

Service rescued Alaska, one of the polar bears. It turns out that the origins and identity of this polar bear may have been false on the Suarez Brothers' import permit obtained when entering the United States. If true, the circus would be violating international and domestic wildlife protection laws.

I applaud the U.S. Fish and Wildlife Service for taking this action. I understand that Alaska will be housed at the Baltimore Zoo, and I think we can look forward to welcoming her to a safe and healthy environment. We can only hope the other six will be spared a life of misery performing circus tricks in tropical climates.

□ 1015

RECOGNIZING VOLUNTEER EFFORTS OF NATIONAL ROOFING CONTRACTORS ASSOCIATION TO REBUILD PENTAGON ROOF

(Mr. GARY G. MILLER of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GARY G. MILLER of California. Madam Speaker, I rise to recognize the small roofing contracting companies who have donated labor, funds and supplies to rebuild over an acre of the Pentagon's roof.

On September 11, the Pentagon experienced severe structural damage when terrorists flew American Airlines Flight 77 into the building. The massive fire caused by thousands of gallons of jet fuel destroyed over 40,000 square feet of the slate roof.

At the urging of Northern Virginia Roofing, a contracting company owned by a husband and wife team in Falls Church, Virginia, the National Roofing Contractors Association negotiated an agreement with the Department of Defense to give the Pentagon a new roof. To date, nearly $400,000 in cash and supplies has been raised by small roofing contracting companies who felt compelled to defeat the terrorists in their own special way.

INTERNATIONAL WOMEN'S DAY

(Ms. BALDWIN asked and was given permission to address the House for 1 minute.)

Ms. BALDWIN. Madam Speaker, tomorrow is International Women's Day. This is a day when women from all countries come together to celebrate a common struggle for justice, equality, and peace. It is a day that celebrates the acts of bravery and determination by ordinary women who have played an extraordinary role in the history of women's rights.

Women have made incredible progress in the last 9 decades since the first International Women's Day was celebrated. However, we are still seeing overwhelming numbers of acts of violence against women. Worldwide, domestic battery is epidemic, and it is estimated that one of every three women and girls has been beaten or sexually assaulted in her lifetime. We must reaffirm our commitment to ending discrimination and violence against women.

Those who say that ending domestic violence is impossible need only look at the progress made in Afghanistan to know that we can make a difference. On this International Women's Day, we should be proud of the progress we have made, but recommit to end violence everywhere.

MOURNING LOSS OF MITCH TYLER, HOKE COUNTY, NORTH CAROLINA, SUPERINTENDENT OF SCHOOLS

(Mr. HAYES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HAYES. Madam Speaker, I rise today to join Hoke County, North Carolina, in mourning the loss of one of our most respected citizens, Superintendent of Schools Mitch Tyler. At the age of 46, Mitch was taken from us far too early, and we will feel the loss to our community for years to come. Mitch had been superintendent for less than 2 years, but his more than 20 years in education, from the State and university levels to Hoke and Cumberland County, made him a well-known, trusted figure and a respected role model.

Mitch, a Robeson County native, started his career in Hoke County. He was a teacher or administrator at West Hoke Elementary, J.W. McLauchlin Elementary and the Turlington School. From 1989 to 1992, he was principal of Hoke County High School. He also worked as a coordinator of Hoke County's Indian education program, a senior assistant to State Superintendent Mike Ward and a director of the University of North Carolina at Pembroke where he was a liaison to region schools.

He was a tireless and selfless advocate for children and an enthusiastic consensus-builder encouraging camaraderie, teamwork, and self-respect among teachers and staff. They knew they could trust his word and that he would do things right. Mitch was also a man of faith who served as assistant pastor and Sunday school teacher at Shannon Assembly of God.

Today we mourn the loss of Mitch Tyler, a man of great character and a leader who always strived to do what was best for children. Barbara and I join the Hoke County community in prayer for Mitch's wife and two teenage children as they grieve the loss of husband and father. Yet we celebrate the life of one who lived so well. Our thoughts and prayers are with you.

COMMEMORATING 50TH ANNIVERSARY OF FAITH COMMUNITY CREDIT UNION

(Mrs. JONES of Ohio asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. JONES of Ohio. Madam Speaker, I rise this morning to celebrate the 50th anniversary of Faith Community Credit Union. Faith Community Credit Union is headed by my good friend, Rita Haynes; and in the 50 years of this credit union, this credit union has come from a small church credit union to being a community credit union where they now in fact have the opportunity to administer Small Business Administration loans to small businesses in our communities.

Last week I had the opportunity to address the National Credit Union Association, and I was introduced by my good friend Rita Haynes. I want to celebrate the great work that the Faith Community Credit Union has done for our community. It has even taken the step of trying to provide loans for people who are being subjected to predatory lenders and those payday loans that you have seen all over the TV where people come in and say to you, get a loan this week and you can pay it off next week with next week's check, and then what do you do with the money that you do not have at that time?

I am so pleased that credit unions are stepping in where many other financial institutions have stepped out. I again rise to celebrate Faith Community Credit Union's 50th anniversary.

SUSAN B. ANTHONY

(Mrs. MYRICK asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. MYRICK. Madam Speaker, I rise today to honor Susan B. Anthony and her contributions to the struggle for women's rights many, many years ago.

March is Women's History Month and the perfect time to recognize this incredible woman who truly shaped our country's history and society. She remains one of our Nation's greatest champions, not just for the rights of women but for the rights of all Americans. In addition to the work she did for women and women's rights, she was a leading advocate against the evil of slavery in her day.

Another piece of her legacy that is often brushed over but equally important is her commitment to the rights of unborn children. She opposed abortion because she championed equal rights for all. She did not see a difference in fighting for women's rights and protecting the right to life for all children. She fought for both.

As we think back on Susan B. Anthony's tireless work to promote the dignity of all life, let us renew our own commitment to fight for equal rights, especially for unborn children who have no voice to fight for themselves.

AIRLINE SAFETY

(Mr. INSLEE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. INSLEE. Madam Speaker, I rise to inform my colleagues that when they get on their airplanes this evening or tomorrow morning, it is highly, highly unlikely that the checked baggage that will go into the belly of their airplanes will be checked for explosives. Despite the passage of 4 months after this House and the other Chamber and the President signed into law a requirement that 100 percent of all the checked baggage be screened for bombs, not one single bomb-detection piece of equipment in response to that legislation has been installed in an American airport. The reason for that is that finally, 6 months after September 11, the Federal Government finally this week got around to placing an order for the first 100, about 5 percent of what we need, of these machines to get this job done. We have to buy 2,000 of these machines to get this job done, and 6 months after this event the Federal Government still has only ordered 100.

We want to urge the administration to act with greater dispatch to meet this 100 percent target. We were told this week the Inspector General said the target of December will not be met. We want to make sure the administration moves and moves quickly. We need to get this job done.

WELFARE REFORM

(Mr. WILSON of South Carolina asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WILSON of South Carolina. Madam Speaker, I rise today to endorse welfare reform in America. There was an excellent lead editorial this week in the Carolina Morning News of Savannah dated March 4, and I quote:

"The 1996 welfare reform bill, passed by a Republican Congress and signed by President Clinton, stands as one of the great social policy successes of the last 50 years. It was to the cycle of dependency on the dole what the collapse of the Berlin Wall was to communism, both literally and symbolically."

America provides more opportunities to its people than any other country in the world, and our educational system and entrepreneurial spirit are unmatched. Therefore, we should work with President Bush to ensure all Americans have jobs and can fulfill themselves to the highest of their abilities.

Madam Speaker, as the newest member of the Welfare Reform Action Team, I am confident, working together, we can assist more and more people to achieve the American dream. I fully support welfare reforms that will accomplish this important task.

CBO PREDICTS SURPLUS FOR 2003

(Mr. KIRK asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KIRK. Madam Speaker, the $74 billion Bush tax relief plan is already yielding benefits in the form of accelerated economic activity. According to yesterday's estimates from the Congressional Budget Office, higher economic growth added $23 billion to Federal revenue in fiscal year 2002 and $16 billion in fiscal year 2003. Congress' nonpartisan analysts now show a $5 billion surplus in fiscal year 2002; and if we exercise fiscal discipline as we consider new programs and set the budget targets, this new revenue brings a balanced budget within reach for fiscal year 2003.

That is good surplus news. CBO is changing budget estimates released just 2 months ago. I applaud their quick response to new economic information. However, we need to do more. We need real-world budget estimates that incorporate the effects of economic incentives on proposed policy changes. We need to hold our budget analysts accountable every year for the difference between what they have told us would happen and what actually happened. With that, we can improve future budget projections and make sure this economy is rolling again.

ECONOMIC SECURITY AND RECOVERY ACT OF 2001

Ms. PRYCE of Ohio. Madam Speaker, by direction of the Committee on Rules, I call up House Resolution 360 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 360

Resolved, That upon adoption of this resolution it shall be in order to take from the Speaker's table the bill (H.R. 3090) to provide tax incentives for economic recovery, with the Senate amendment thereto, and to consider in the House, without intervention of any point of order, a motion offered by the chairman of the Committee on Ways and Means or his designee that the House concur in the Senate amendment with the amendment printed in the report of the Committee on Rules accompanying this resolution. The Senate amendment and the motion shall be considered as read. The motion shall be debatable for one hour equally divided and controlled by the chairman and ranking minority member of the Committee on Ways and Means. The previous question shall be considered as ordered on the motion to final adoption without intervening motion.

The SPEAKER pro tempore (Mrs. EMERSON). The gentlewoman from Ohio (Ms. PRYCE) is recognized for 1 hour.

Ms. PRYCE of Ohio. Madam Speaker, for the purpose of debate only, I yield the customary 30 minutes to the gentleman from Florida (Mr. HASTINGS) pending which I yield myself such time as I may consume. During consideration of this resolution, all time yielded is for the purpose of debate only.

Madam Speaker, House Resolution 360 provides for a single motion offered by the chairman of the Committee on Ways and Means, or his designee, that the House concur in the Senate amendment with the amendment printed in the report of the Committee on Rules accompanying the resolution. This resolution waives all points of order against consideration of the motion to concur in the Senate amendment with an amendment. It provides an hour of debate in the House equally divided and controlled by the chairman and ranking minority member of the Committee on Ways and Means. Finally, the resolution provides that the previous question shall be considered as ordered on the motion to final adoption without intervening motion.

Madam Speaker, this is this body's fourth attempt to find the middle ground. This is the House's fourth attempt to address the needs of unemployed Americans and to provide a needed boost to our economy. This House is putting forth a solution in order to build a consensus.

The amendment made in order under this resolution includes special depreciation allowances for certain property and a 5-year carryback of net operating losses. If we help businesses, we help create much needed jobs. It provides an additional 13 weeks of temporary extended unemployment benefits for those who have exhausted their regular benefits. It includes the liberty zone tax benefits for reconstruction of New York City. Finally, it extends a number of expiring, yet very important, provisions such as tax credits for electric vehicles, the welfare-to-work tax credit, the Archer medical savings accounts, tax credits for production of alternative energy sources, work opportunity tax credits, temporary assistance to needy families, or TANF, and that is to name just a few.

Madam Speaker, while the economy is currently showing strong signs of recovery, many workers still face the harsh realities of unemployment. The economic downturn that began at the end of the year 2000 and that was exacerbated by the tragic events of September 11 left many Americans unexpectedly out of work.

☐ 1030

We need to make sure this economy moves in the right direction and that these folks get the help that they need.

By adopting this motion, we will give crucial assistance to Americans who, through no fault of their own, were separated from their occupations, and will ensure that these Americans can care for their loved ones, keep their homes, and feed their children. I urge Members not to turn their backs on American workers, because it is their entrepreneurship, their risk-taking, and their strong work ethic that are driving the forces behind the greatest economy in all the world.

Accordingly, I urge my colleagues to support this rule and the motion to be offered by the gentleman from California (Mr. THOMAS). It is our hope that the other body will accept this initiative so that we can quickly move this important legislation to the President's desk for his signature.

We need to get unemployed Americans the help they need and deserve, not only in the form of extended benefits; but also it is essential that we get them jobs.

Madam Speaker, I reserve the balance of my time.

Mr. HASTINGS of Florida. Madam Speaker, I yield myself such time as I may consume.

Mr. HASTINGS of Florida. First, Madam Speaker, let me thank the gentlewoman from Ohio (Ms. PRYCE), my colleague and friend, for yielding me this time.

Madam Speaker, I do not plan to take much time this morning. This House well knows the views of many of us, and I certainly have expressed my views on the topic of economic recovery, job growth stimulation, and tax cuts and credits.

The amendment which we focus on this morning is fairly narrow and straightforward. It extends unemployment benefits for 13 weeks for those workers whose benefits are set to expire within the next several weeks. This amendment also includes a number of incentives for reconstruction efforts centered around Ground Zero in New York City and extends the Temporary Assistance to Needy Families supplemental grants program.

Frankly, I feel proud that we can get this assistance to these workers, and my colleagues on the other side are to be complimented in that regard, and to those who are doing all they can to assist in the revitalization of New York City.

Candidly, Madam Speaker, I am less proud, however, of what this Congress still has not done for the rest of the country and all those who have been impacted as a result of the events of September 11. I note again, as I did yesterday in the Committee on Rules, and as I have done a multiplicity of times since not long after September 11, this Congress has not done nearly enough to help those whose economic livelihood has been severely devastated since the terrorist attacks of 6 months ago.

On September 24, barely 2 weeks after the attacks, the gentlewoman from Pennsylvania (Ms. HART) and I introduced a comprehensive measure to help this country's workers. Our bill, H.R. 2946, would not only extend unemployment benefits, it would also increase job training opportunities and extend health care and insurance benefits to those who desperately need it.

Now, 5 months and nearly 160 bipartisan cosponsors later, the House has still not acted on the Hart-Hastings bill. We are doing a little this morning. But let me say this with the certainty of a clarion: we have not done enough.

I will continue to say we have not done enough until we do. I will continue to ask the chairman of the Committee on Ways and Means, and I will continue to ask the chairman of the Committee on Education and the Workforce and I will continue to ask the chairman of the Committee on Commerce to move the Hastings-Hart bill through their respective committees with alacrity and bring it to the House floor at once.

Madam Speaker, near the end of this debate, I will call on my colleagues to defeat the previous question. If the previous question is defeated, I will offer an amendment to the rule that would allow the House to vote on an amendment to provide States with a temporary increase in their Medicaid matching rate because of the increased number of people who are unemployed and, therefore, do not have health insurance. As I noted a moment ago, millions of American jobs have been lost since September 11. Far too often, with that job loss, comes the loss of health insurance.

When people get sick, they still need care, whether they can pay for it or not. The cost of this care often falls on the State through its Medicaid program. Our amendment would greatly ease the increased financial burden that many States and certainly my State of Florida now faces.

Madam Speaker, I urge a "no" vote on the previous question; and if the previous question is defeated, as I indicated, I will offer an amendment to the rule that will allow the House to vote on an amendment to provide States with a temporary increase in their Medicaid matching rate. As I said a few minutes ago, it has been nearly 6 months since the events of September 11.

Our economy, which is already in an economic downturn, has worsened considerably. The cost of this care often falls on States through its Medicaid program. This amendment will greatly ease the increased financial burden that many States now face.

Madam Speaker, I urge a "no" vote on the previous question and a vote instead to support an amendment that will help States to offset the cost of increased health costs due to the high levels of unemployment.

PREVIOUS QUESTION FOR H. RES. 360—ECONOMIC SECURITY AND RECOVERY ACT OF 2001

Strike all after the resolving clause and insert:

That upon the adoption of this resolution it shall be in order to take from the Speaker's table the bill (H.R. 3090) to provide tax incentives for economic recovery, with the Senate amendment thereto, and to consider in the House, without intervention of any point of order, a motion offered by the Chairman of the Committee on Ways and Means or his designee that the House concur in the Senate amendment with the amendment printed in the report of the Committee on Rules accompanying this resolution. The Senate amendment and the motion shall be considered as read. The motion shall be debatable for one hour equally divided and controlled by the Chairman and ranking minority member of the Committee on Ways and Means. The previous question shall be considered as ordered on the motion and on any amendment thereto to final adoption without intervening motion except the amendment specified in section 2 if offered by Representative Rangel of New York or his designee, which shall be in order without intervention of any point of order or demand for division of the question, shall be considered as read, and shall be separately debatable for one hour equally divided and controlled by the proponent and an opponent.

SEC. 2. The amendment referred to in the first section of this resolution is as follows:

At the appropriate place, insert the following:

SEC. . TEMPORARY INCREASES OF MEDICAID FMAP FOR FISCAL YEAR 2002.

(a) PERMITTING MAINTENANCE OF FISCAL YEAR 2001 FMAP.—Nothwithstanding any other provision of law, but subject to subsection (d), if the FMAP determined without regard to this section for a State for fiscal year 2002 is less than the FMAP as so determined for fiscal year 2001, the FMAP for the State for fiscal year 2001 shall be substituted for the State's FMAP for fiscal year 2002, before the application of this section.

(b) GENERAL 1.50 PERCENTAGE POINTS INCREASE.—Notwithstanding any other provision of law, but subject to subsections (d) and (e), for each State for each calendar quarter in fiscal year 2002, the FMAP (taking into account the application of subsection (a)) shall be increased by 1.50 percentage points.

(c) FURTHER INCREASE FOR STATES WITH HIGH UNEMPLOYMENT RATES.—

(1) IN GENERAL.—Notwithstanding any other provision of law, but subject to subsections (d) and (e), the FMAP for a high unemployment State for a calendar quarter in fiscal year 2002 (and any subsequent calendar quarter in such fiscal year regardless of whether the State continues to be a high unemployment State for a calendar quarter in such fiscal year) shall be increased (after the application of subsections (a) and (b)) by 1.50 percentage points.

(2) HIGH UNEMPLOYMENT STATE.—For purposes of this subsection, a State is a high unemployment State for a calendar quarter if, for any 3 consecutive month period beginning on or after June 2001 and ending with the second month before the beginning of the calendar quarter, the State has an average seasonally adjusted unemployment rate that exceeds the average weighted unemployment rate during such period. Such unemployment rates for such months shall be determined based on publications of the Bureau of Labor Statistics of the Department of Labor.

(3) AVERAGE WEIGHTED UNEMPLOYMENT RATE DEFINED.—For purposes of paragraph (2), the

average weighted unemployment rate for a period is—

(A) the sum of the seasonally adjusted number of unemployed civilians in each State and the District of Columbia for the period, divided by

(B) the sum of the civilian labor force in each State and the District of Columbia for the period.

(d) 1-Year Increase in Cap on Medicaid Payments to Territories.—Notwithstanding any other provision of law, with respect to fiscal year 2002, the amounts otherwise determined for Puerto Rico, the Virgin Islands, Guam, the Northern Mariana Islands, and American Samoa under section 1108 of the Social Security Act (42 U.S.C. 1308) shall each be increased by an amount equal to 3.093 percentage points of such amounts.

(e) Scope of Application.—The increases in the FMAP for a State under this section shall apply only for purposes of title XIX of the Social Security Act and shall not apply with respect to—

(1) disproportionate share hospital payments described in section 1923 of such Act (42 U.S.C. 1396r–4); and

(2) payments under titles IV and XXI of such Act (42 U.S.C. 601 et seq. and 1397aa et seq.).

Madam Speaker, I yield back the balance of my time.

Ms. PRYCE of Ohio. Madam Speaker, I yield myself such time as I may consume to remind my colleagues that this body has done its job. It has looked for consensus, and it has found a solution. This motion to help unemployed workers as they look for jobs will give a boost to them and also a small boost to the businesses that can help create those jobs. I urge my colleagues to support this rule and the underlying motion so that it can be sent finally to the President for his signature.

Madam Speaker, I urge a "yes" vote, I yield back the balance of my time, and I move the previous question on the resolution.

The SPEAKER pro tempore (Mrs. Emerson). The question is on ordering the previous question.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. HASTINGS of Florida. Madam Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

Pursuant to clause 9 of rule XX, the Chair will reduce to 5 minutes the minimum time for electronic voting, if ordered, on adoption of the resolution.

The vote was taken by electronic device, and there were—yeas 217, nays 192, not voting 25, as follows:

Ms. VELÁZQUEZ, Ms. ESHOO, Ms. HOOLEY of Oregon and Messrs. STUPAK, BISHOP, and JOHN changed their vote from "yea" to "nay".

Mr. EVERETT and Mr. CASTLE changed their vote from "nay" to "yea".

So the previous question was ordered.

The result of the vote was announced as above recorded.

Stated against:

Ms. SOLIS. Mr. Speaker, during rollcall vote No. 51 on ordering the previous question I was unavoidably detained. Had I been present, I would have voted "nay."

The SPEAKER pro tempore (Mrs. Emerson). The question is on the resolution.

The resolution was agreed to.

A motion to reconsider was laid on the table.

Mr. THOMAS. Madam Speaker, pursuant to House Resolution 360 I call up from the Speaker's table the bill (H.R. 3090) to provide tax incentives for economic recovery, with a Senate amendment thereto, and ask for its immediate consideration in the House.

The Clerk read the title of the bill.

The text of the Senate amendment is as follows:

Senate amendment:

Strike out all after the enacting clause and insert:

SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the "Temporary Extended Unemployment Compensation Act of 2002".

(b) TABLE OF CONTENTS.—The table of contents of this Act is as follows:

Sec. 1. Short title; table of contents.
Sec. 2. Federal-State agreements.
Sec. 3. Temporary extended unemployment compensation account.
Sec. 4. Payments to States having agreements under this Act.
Sec. 5. Financing provisions.
Sec. 6. Fraud and overpayments.
Sec. 7. Definitions.
Sec. 8. Applicability.

SEC. 2. FEDERAL-STATE AGREEMENTS.

(a) IN GENERAL.—Any State which desires to do so may enter into and participate in an agreement under this Act with the Secretary of Labor (in this Act referred to as the "Secretary"). Any State which is a party to an agreement under this Act may, upon providing 30 days written notice to the Secretary, terminate such agreement.

(b) PROVISIONS OF AGREEMENT.—Any agreement under subsection (a) shall provide that the State agency of the State will make payments of temporary extended unemployment compensation to individuals—

(1) who—

(A) first exhausted all rights to regular compensation under the State law on or after the first day of the week that includes September 11, 2001; or

(B) have their 26th week of regular compensation under the State law end on or after the first day of the week that includes September 11, 2001;

(2) who do not have any rights to regular compensation under the State law of any other State; and

(3) who are not receiving compensation under the unemployment compensation law of any other country.

(c) COORDINATION RULES.—

(1) TEMPORARY EXTENDED UNEMPLOYMENT COMPENSATION TO SERVE AS SECOND-TIER BENEFITS.—Notwithstanding any other provision of law, neither regular compensation, extended compensation, nor additional compensation under any Federal or State law shall be payable to any individual for any week for which temporary extended unemployment compensation is payable to such individual.

(2) TREATMENT OF OTHER UNEMPLOYMENT COMPENSATION.—After the date on which a State enters into an agreement under this Act, any regular compensation in excess of 26 weeks, any extended compensation, and any additional compensation under any Federal or State law shall be payable to an individual in accordance with the State law after such individual has exhausted any rights to temporary extended unemployment compensation under the agreement.

(d) EXHAUSTION OF BENEFITS.—For purposes of subsection (b)(1)(A), an individual shall be deemed to have exhausted such individual's rights to regular compensation under a State law when—

(1) no payments of regular compensation can be made under such law because the individual has received all regular compensation available to the individual based on employment or wages during the individual's base period; or

(2) the individual's rights to such compensation have been terminated by reason of the expiration of the benefit year with respect to which such rights existed.

(e) WEEKLY BENEFIT AMOUNT, TERMS AND CONDITIONS, ETC. RELATING TO TEMPORARY EXTENDED UNEMPLOYMENT COMPENSATION.—For purposes of any agreement under this Act—

(1) the amount of temporary extended unemployment compensation which shall be payable to an individual for any week of total unemployment shall be equal to the amount of regular compensation (including dependents' allowances) payable to such individual under the State law for a week for total unemployment during such individual's benefit year;

(2) the terms and conditions of the State law which apply to claims for regular compensation and to the payment thereof shall apply to claims for temporary extended unemployment compensation and the payment thereof, except where inconsistent with the provisions of this Act or with the regulations or operating instructions of the Secretary promulgated to carry out this Act; and

(3) the maximum amount of temporary extended unemployment compensation payable to any individual for whom a temporary extended unemployment compensation account is established under section 3 shall not exceed the amount established in such account for such individual.

SEC. 3. TEMPORARY EXTENDED UNEMPLOYMENT COMPENSATION ACCOUNT.

(a) IN GENERAL.—Any agreement under this Act shall provide that the State will establish, for each eligible individual who files an application for temporary extended unemployment compensation, a temporary extended unemployment compensation account.

(b) AMOUNT IN ACCOUNT.—

(1) IN GENERAL.—The amount established in an account under subsection (a) shall be equal to 13 times the individual's weekly benefit amount.

(2) WEEKLY BENEFIT AMOUNT.—For purposes of paragraph (1)(B), an individual's weekly benefit amount for any week is an amount equal to the amount of regular compensation (including dependents' allowances) under the State law payable to the individual for such week for total unemployment.

SEC. 4. PAYMENTS TO STATES HAVING AGREEMENTS UNDER THIS ACT.

(a) GENERAL RULE.—There shall be paid to each State that has entered into an agreement under this Act an amount equal to 100 percent of the temporary extended unemployment compensation paid to individuals by the State pursuant to such agreement.

(b) DETERMINATION OF AMOUNT.—Sums under subsection (a) payable to any State by reason of such State having an agreement under this Act shall be payable, either in advance or by way of reimbursement (as may be determined by the Secretary), in such amounts as the Secretary estimates the State will be entitled to receive under this Act for each calendar month, reduced or increased, as the case may be, by any amount by which the Secretary finds that the Secretary's estimates for any prior calendar month were greater or less than the amounts which should have been paid to the State. Such estimates may be made on the basis of such statistical, sampling, or other method as may be agreed upon by the Secretary and the State agency of the State involved.

(c) ADMINISTRATIVE EXPENSES.—There are appropriated out of the employment security administration account (as established by section 901(a) of the Social Security Act (42 U.S.C. 1101(a)) of the Unemployment Trust Fund, without fiscal year limitation, such funds as may be necessary for purposes of assisting States (as provided in title III of the Social Security Act (42 U.S.C. 501 et seq.)) in meeting the costs of administration of agreements under this Act.

SEC. 5. FINANCING PROVISIONS.

(a) IN GENERAL.—Funds in the extended unemployment compensation account (as established by section 905(a) of the Social Security Act (42 U.S.C. 1105(a))), and the Federal unemployment account (as established by section 904(g) of such Act (42 U.S.C. 1104(g))), of the Unemployment Trust Fund (as established by section 904(a) of such Act (42 U.S.C. 1104(a))) shall be used, in accordance with subsection (b), for the making of payments (described in section 4(a)) to States having agreements entered into under this Act.

(b) CERTIFICATION.—The Secretary shall from time to time certify to the Secretary of the Treasury for payment to each State the sums described in section 4(a) which are payable to such State under this Act. The Secretary of the Treasury, prior to audit or settlement by the General Accounting Office, shall make payments to the State in accordance with such certification by transfers from the extended unemployment compensation account, as so established (or, to the extent that there are insufficient funds in that account, from the Federal unemployment account, as so established) to the account of such State in the Unemployment Trust Fund (as so established).

SEC. 6. FRAUD AND OVERPAYMENTS.

(a) IN GENERAL.—If an individual knowingly has made, or caused to be made by another, a false statement or representation of a material fact, or knowingly has failed, or caused another to fail, to disclose a material fact, and as a result of such false statement or representation or of such nondisclosure such individual has received any temporary extended unemployment compensation under this Act to which such individual was not entitled, such individual—

(1) shall be ineligible for any further benefits under this Act in accordance with the provisions of the applicable State unemployment compensation law relating to fraud in connection with a claim for unemployment compensation; and

(2) shall be subject to prosecution under section 1001 of title 18, United States Code.

(b) REPAYMENT.—In the case of individuals who have received any temporary extended unemployment compensation under this Act to which such individuals were not entitled, the State shall require such individuals to repay those benefits to the State agency, except that the State agency may waive such repayment if it determines that—

(1) the payment of such benefits was without fault on the part of any such individual; and

(2) such repayment would be contrary to equity and good conscience.

(c) RECOVERY BY STATE AGENCY.—

(1) IN GENERAL.—The State agency may recover the amount to be repaid, or any part thereof, by deductions from any regular compensation or temporary extended unemployment compensation payable to such individual under this Act or from any unemployment compensation payable to such individual under any Federal unemployment compensation law administered by the State agency or under any other Federal law administered by the State agency which provides for the payment of any assistance or allowance with respect to any week of unemployment, during the 3-year period after the date such individuals received the payment of the temporary extended unemployment compensation to which such individuals were not entitled, except that no single deduction may exceed 50 percent of the weekly benefit amount from which such deduction is made.

(2) OPPORTUNITY FOR HEARING.—No repayment shall be required, and no deduction shall be made, until a determination has been made, notice thereof and an opportunity for a fair hearing has been given to the individual, and the determination has become final.

(d) REVIEW.—Any determination by a State agency under this section shall be subject to review in the same manner and to the same extent

as determinations under the State unemployment compensation law, and only in that manner and to that extent.

SEC. 7. DEFINITIONS.

In this Act, the terms “compensation”, “regular compensation”, “extended compensation”, “additional compensation”, “benefit year”, “base period”, “State”, “State agency”, “State law”, and “week” have the respective meanings given such terms under section 205 of the Federal-State Extended Unemployment Compensation Act of 1970 (26 U.S.C. 3304 note).

SEC. 8. APPLICABILITY.

An agreement entered into under this Act shall apply to weeks of unemployment—

(1) beginning after the date on which such agreement is entered into; and

(2) ending before January 6, 2003.

MOTION OFFERED BY MR. THOMAS

Mr. THOMAS. Madam Speaker, I offer a motion.

The SPEAKER pro tempore. The Clerk will designate the motion.

The text of the motion is as follows:

Mr. THOMAS moves that the House concur in the Senate amendment with an amendment, as follows:

In the amendment of the Senate, strike the matter proposed to be inserted by the Senate and insert the following:

SECTION 1. SHORT TITLE; ETC.

(a) SHORT TITLE.—This Act may be cited as the “Job Creation and Worker Assistance Act of 2002”.

(b) REFERENCES TO INTERNAL REVENUE CODE OF 1986.—Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1986.

(c) TABLE OF CONTENTS.—

Sec. 1. Short title; etc.

TITLE I—BUSINESS PROVISIONS

Sec. 101. Special depreciation allowance for certain property acquired after September 10, 2001, and before September 11, 2004.
Sec. 102. Carryback of certain net operating losses allowed for 5 years; temporary suspension of 90 percent AMT limit.

TITLE II—UNEMPLOYMENT ASSISTANCE

Sec. 201. Short title.
Sec. 202. Federal-State agreements.
Sec. 203. Temporary extended unemployment compensation account.
Sec. 204. Payments to States having agreements for the payment of temporary extended unemployment compensation.
Sec. 205. Financing provisions.
Sec. 206. Fraud and overpayments.
Sec. 207. Definitions.
Sec. 208. Applicability.
Sec. 209. Special Reed Act transfer in fiscal year 2002.

TITLE III—TAX INCENTIVES FOR NEW YORK CITY AND DISTRESSED AREAS

Sec. 301. Tax benefits for area of New York City damaged in terrorist attacks on September 11, 2001.

TITLE IV—MISCELLANEOUS AND TECHNICAL PROVISIONS

Subtitle A—General Miscellaneous Provisions

Sec. 401. Allowance of electronic 1099's.
Sec. 402. Excluded cancellation of indebtedness income of S corporation not to result in adjustment to basis of stock of shareholders.
Sec. 403. Limitation on use of nonaccrual experience method of accounting.
Sec. 404. Exclusion for foster care payments to apply to payments by qualified placement agencies.
Sec. 405. Interest rate range for additional funding requirements.
Sec. 406. Adjusted gross income determined by taking into account certain expenses of elementary and secondary school teachers.

Subtitle B—Technical Corrections

Sec. 411. Amendments related to Economic Growth and Tax Relief Reconciliation Act of 2001.
Sec. 412. Amendments related to Community Renewal Tax Relief Act of 2000.
Sec. 413. Amendments related to the Tax Relief Extension Act of 1999.
Sec. 414. Amendments related to the Taxpayer Relief Act of 1997.
Sec. 415. Amendment related to the Balanced Budget Act of 1997.
Sec. 416. Other technical corrections.
Sec. 417. Clerical amendments.
Sec. 418. Additional corrections.

TITLE V—SOCIAL SECURITY HELD HARMLESS; BUDGETARY TREATMENT OF ACT

Sec. 501. No impact on social security trust funds.
Sec. 502. Emergency designation.

TITLE VI—EXTENSIONS OF CERTAIN EXPIRING PROVISIONS

Sec. 601. Allowance of nonrefundable personal credits against regular and minimum tax liability.
Sec. 602. Credit for qualified electric vehicles.
Sec. 603. Credit for electricity produced from certain renewable resources.
Sec. 604. Work opportunity credit.
Sec. 605. Welfare-to-work credit.
Sec. 606. Deduction for clean-fuel vehicles and certain refueling property.
Sec. 607. Taxable income limit on percentage depletion for oil and natural gas produced from marginal properties.
Sec. 608. Qualified zone academy bonds.
Sec. 609. Cover over of tax on distilled spirits.
Sec. 610. Parity in the application of certain limits to mental health benefits.
Sec. 611. Temporary special rules for taxation of life insurance companies.
Sec. 612. Availability of medical savings accounts.
Sec. 613. Incentives for Indian employment and property on Indian reservations.
Sec. 614. Subpart F exemption for active financing.
Sec. 615. Repeal of requirement for approved diesel or kerosene terminals.
Sec. 616. Reauthorization of TANF supplemental grants for population increases for fiscal year 2002.
Sec. 617. 1-year extension of contingency fund under the TANF program.

TITLE I—BUSINESS PROVISIONS

SEC. 101. SPECIAL DEPRECIATION ALLOWANCE FOR CERTAIN PROPERTY ACQUIRED AFTER SEPTEMBER 10, 2001, AND BEFORE SEPTEMBER 11, 2004.

(a) IN GENERAL.—Section 168 (relating to accelerated cost recovery system) is amended by adding at the end the following new subsection:

“(k) SPECIAL ALLOWANCE FOR CERTAIN PROPERTY ACQUIRED AFTER SEPTEMBER 10, 2001, AND BEFORE SEPTEMBER 11, 2004.—

“(1) ADDITIONAL ALLOWANCE.—In the case of any qualified property—

“(A) the depreciation deduction provided by section 167(a) for the taxable year in which such property is placed in service shall include an allowance equal to 30 percent of the adjusted basis of the qualified property, and

“(B) the adjusted basis of the qualified property shall be reduced by the amount of such deduction before computing the amount otherwise allowable as a depreciation deduction under this chapter for such taxable year and any subsequent taxable year.

“(2) QUALIFIED PROPERTY.—For purposes of this subsection—

“(A) IN GENERAL.—The term ‘qualified property’ means property—

“(i)(I) to which this section applies which has a recovery period of 20 years or less,

“(II) which is computer software (as defined in section 167(f)(1)(B)) for which a deduction is allowable under section 167(a) without regard to this subsection,

“(III) which is water utility property, or

“(IV) which is qualified leasehold improvement property,

“(ii) the original use of which commences with the taxpayer after September 10, 2001,

“(iii) which is—

“(I) acquired by the taxpayer after September 10, 2001, and before September 11, 2004, but only if no written binding contract for the acquisition was in effect before September 11, 2001, or

“(II) acquired by the taxpayer pursuant to a written binding contract which was entered into after September 10, 2001, and before September 11, 2004, and

“(iv) which is placed in service by the taxpayer before January 1, 2005, or, in the case of property described in subparagraph (B), before January 1, 2006.

“(B) CERTAIN PROPERTY HAVING LONGER PRODUCTION PERIODS TREATED AS QUALIFIED PROPERTY.—

“(i) IN GENERAL.—The term ‘qualified property’ includes property—

“(I) which meets the requirements of clauses (i), (ii), and (iii) of subparagraph (A),

“(II) which has a recovery period of at least 10 years or is transportation property, and

“(III) which is subject to section 263A by reason of clause (ii) or (iii) of subsection (f)(1)(B) thereof.

“(ii) ONLY PRE-SEPTEMBER 11, 2004, BASIS ELIGIBLE FOR ADDITIONAL ALLOWANCE.—In the case of property which is qualified property solely by reason of clause (i), paragraph (1) shall apply only to the extent of the adjusted basis thereof attributable to manufacture, construction, or production before September 11, 2004.

“(iii) TRANSPORTATION PROPERTY.—For purposes of this subparagraph, the term ‘transportation property’ means tangible personal property used in the trade or business of transporting persons or property.

“(C) EXCEPTIONS.—

“(i) ALTERNATIVE DEPRECIATION PROPERTY.—The term ‘qualified property’ shall not include any property to which the alternative depreciation system under subsection (g) applies, determined—

“(I) without regard to paragraph (7) of subsection (g) (relating to election to have system apply), and

“(II) after application of section 280F(b) (relating to listed property with limited business use).

"(ii) Qualified New York Liberty Zone Leasehold Improvement Property.—The term 'qualified property' shall not include any qualified New York Liberty Zone leasehold improvement property (as defined in section 1400L(c)(2)).

"(iii) Election out.—If a taxpayer makes an election under this clause with respect to any class of property for any taxable year, this subsection shall not apply to all property in such class placed in service during such taxable year.

"(D) Special rules.—

"(i) Self-constructed property.—In the case of a taxpayer manufacturing, constructing, or producing property for the taxpayer's own use, the requirements of clause (iii) of subparagraph (A) shall be treated as met if the taxpayer begins manufacturing, constructing, or producing the property after September 10, 2001, and before September 11, 2004.

"(ii) Sale-leasebacks.—For purposes of subparagraph (A)(ii), if property—

"(I) is originally placed in service after September 10, 2001, by a person, and

"(II) sold and leased back by such person within 3 months after the date such property was originally placed in service,

such property shall be treated as originally placed in service not earlier than the date on which such property is used under the leaseback referred to in subclause (II).

"(E) Coordination with section 280F.—For purposes of section 280F—

"(i) Automobiles.—In the case of a passenger automobile (as defined in section 280F(d)(5)) which is qualified property, the Secretary shall increase the limitation under section 280F(a)(1)(A)(i) by $4,600.

"(ii) Listed property.—The deduction allowable under paragraph (1) shall be taken into account in computing any recapture amount under section 280F(b)(2).

"(F) Deduction allowed in computing minimum tax.—For purposes of determining alternative minimum taxable income under section 55, the deduction under subsection (a) for qualified property shall be determined under this section without regard to any adjustment under section 56.

"(3) Qualified leasehold improvement property.—For purposes of this subsection—

"(A) In general.—The term 'qualified leasehold improvement property' means any improvement to an interior portion of a building which is nonresidential real property if—

"(i) such improvement is made under or pursuant to a lease (as defined in subsection (h)(7))—

"(I) by the lessee (or any sublessee) of such portion, or

"(II) by the lessor of such portion,

"(ii) such portion is to be occupied exclusively by the lessee (or any sublessee) of such portion, and

"(iii) such improvement is placed in service more than 3 years after the date the building was first placed in service.

"(B) Certain improvements not included.—Such term shall not include any improvement for which the expenditure is attributable to—

"(i) the enlargement of the building,

"(ii) any elevator or escalator,

"(iii) any structural component benefiting a common area, and

"(iv) the internal structural framework of the building.

"(C) Definitions and special rules.—For purposes of this paragraph—

"(i) Commitment to lease treated as lease.—A commitment to enter into a lease shall be treated as a lease, and the parties to such commitment shall be treated as lessor and lessee, respectively.

"(ii) Related persons.—A lease between related persons shall not be considered a lease. For purposes of the preceding sentence, the term 'related persons' means—

"(I) members of an affiliated group (as defined in section 1504), and

"(II) persons having a relationship described in subsection (b) of section 267; except that, for purposes of this clause, the phrase '80 percent or more' shall be substituted for the phrase 'more than 50 percent' each place it appears in such subsection."

(b) Effective Date.—The amendments made by this section shall apply to property placed in service after September 10, 2001, in taxable years ending after such date.

SEC. 102. CARRYBACK OF CERTAIN NET OPERATING LOSSES ALLOWED FOR 5 YEARS; TEMPORARY SUSPENSION OF 90 PERCENT AMT LIMIT.

(a) In General.—Paragraph (1) of section 172(b) (relating to years to which loss may be carried) is amended by adding at the end the following new subparagraph:

"(H) In the case of a taxpayer which has a net operating loss for any taxable year ending during 2001 or 2002, subparagraph (A)(i) shall be applied by substituting '5' for '2' and subparagraph (F) shall not apply.".

(b) Election To Disregard 5-Year Carryback.—Section 172 (relating to net operating loss deduction) is amended by redesignating subsection (j) as subsection (k) and by inserting after subjection (i) the following new subsection:

"(j) Election To Disregard 5-Year Carryback for Certain Net Operating Losses.—Any taxpayer entitled to a 5-year carryback under subsection (b)(1)(H) from any loss year may elect to have the carryback period with respect to such loss year determined without regard to subsection (b)(1)(H). Such election shall be made in such manner as may be prescribed by the Secretary and shall be made by the due date (including extensions of time) for filing the taxpayer's return for the taxable year of the net operating loss. Such election, once made for any taxable year, shall be irrevocable for such taxable year.".

(c) Temporary Suspension of 90 Percent Limit on Certain NOL Carryovers.—

(1) In general.—Subparagraph (A) of section 56(d)(1) (relating to general rule defining alternative tax net operating loss deduction) is amended to read as follows:

"(A) the amount of such deduction shall not exceed the sum of—

"(i) the lesser of—

"(I) the amount of such deduction attributable to net operating losses (other than the deduction attributable to carryovers described in clause (ii)(I)), or

"(II) 90 percent of alternative minimum taxable income determined without regard to such deduction, plus

"(ii) the lesser of—

"(I) the amount of such deduction attributable to the sum of carrybacks of net operating losses for taxable years ending during 2001 or 2002 and carryforwards of net operating losses to taxable years ending during 2001 and 2002, or

"(II) alternative minimum taxable income determined without regard to such deduction reduced by the amount determined under clause (i), and".

(2) Effective date.—The amendment made by this subsection shall apply to taxable years ending before January 1, 2003.

(d) Effective Date.—Except as provided in subsection (c), the amendments made by this section shall apply to net operating losses for taxable years ending after December 31, 2000.

TITLE II—UNEMPLOYMENT ASSISTANCE

SEC. 201. SHORT TITLE.

This title may be cited as the "Temporary Extended Unemployment Compensation Act of 2002".

SEC. 202. FEDERAL-STATE AGREEMENTS.

(a) In General.—Any State which desires to do so may enter into and participate in an agreement under this title with the Secretary of Labor (in this title referred to as the "Secretary"). Any State which is a party to an agreement under this title may, upon providing 30 days' written notice to the Secretary, terminate such agreement.

(b) Provisions of Agreement.—Any agreement under subsection (a) shall provide that the State agency of the State will make payments of temporary extended unemployment compensation to individuals who—

(1) have exhausted all rights to regular compensation under the State law or under Federal law with respect to a benefit year (excluding any benefit year that ended before March 15, 2001);

(2) have no rights to regular compensation or extended compensation with respect to a week under such law or any other State unemployment compensation law or to compensation under any other Federal law;

(3) are not receiving compensation with respect to such week under the unemployment compensation law of Canada; and

(4) filed an initial claim for regular compensation on or after March 15, 2001.

(c) Exhaustion of Benefits.—For purposes of subsection (b)(1), an individual shall be deemed to have exhausted such individual's rights to regular compensation under a State law when—

(1) no payments of regular compensation can be made under such law because such individual has received all regular compensation available to such individual based on employment or wages during such individual's base period; or

(2) such individual's rights to such compensation have been terminated by reason of the expiration of the benefit year with respect to which such rights existed.

(d) Weekly Benefit Amount, Etc.—For purposes of any agreement under this title—

(1) the amount of temporary extended unemployment compensation which shall be payable to any individual for any week of total unemployment shall be equal to the amount of the regular compensation (including dependents' allowances) payable to such individual during such individual's benefit year under the State law for a week of total unemployment;

(2) the terms and conditions of the State law which apply to claims for regular compensation and to the payment thereof shall apply to claims for temporary extended unemployment compensation and the payment thereof, except—

(A) that an individual shall not be eligible for temporary extended unemployment compensation under this title unless, in the base period with respect to which the individual exhausted all rights to regular compensation under the State law, the individual had 20 weeks of full-time insured employment or the equivalent in insured wages, as determined under the provisions of the State law implementing section 202(a)(5) of the Federal-State Extended Unemployment Compensation Act of 1970 (26 U.S.C. 3304 note); and

(B) where otherwise inconsistent with the provisions of this title or with the regulations or operating instructions of the Secretary promulgated to carry out this title; and

(3) the maximum amount of temporary extended unemployment compensation payable to any individual for whom a temporary extended unemployment compensation account is established under section 203 shall not exceed the amount established in such account for such individual.

(e) ELECTION BY STATES.—Notwithstanding any other provision of Federal law (and if State law permits), the Governor of a State that is in an extended benefit period may provide for the payment of temporary extended unemployment compensation in lieu of extended compensation to individuals who otherwise meet the requirements of this section. Such an election shall not require a State to trigger off an extended benefit period.

SEC. 203. TEMPORARY EXTENDED UNEMPLOYMENT COMPENSATION ACCOUNT.

(a) IN GENERAL.—Any agreement under this title shall provide that the State will establish, for each eligible individual who files an application for temporary extended unemployment compensation, a temporary extended unemployment compensation account with respect to such individual's benefit year.

(b) AMOUNT IN ACCOUNT.—

(1) IN GENERAL.—The amount established in an account under subsection (a) shall be equal to the lesser of—

(A) 50 percent of the total amount of regular compensation (including dependents' allowances) payable to the individual during the individual's benefit year under such law, or

(B) 13 times the individual's average weekly benefit amount for the benefit year.

(2) WEEKLY BENEFIT AMOUNT.—For purposes of this subsection, an individual's weekly benefit amount for any week is the amount of regular compensation (including dependents' allowances) under the State law payable to such individual for such week for total unemployment.

(c) SPECIAL RULE.—

(1) IN GENERAL.—Notwithstanding any other provision of this section, if, at the time that the individual's account is exhausted, such individual's State is in an extended benefit period (as determined under paragraph (2)), then, such account shall be augmented by an amount equal to the amount originally established in such account (as determined under subsection (b)(1)).

(2) EXTENDED BENEFIT PERIOD.—For purposes of paragraph (1), a State shall be considered to be in an extended benefit period if, at the time of exhaustion (as described in paragraph (1))—

(A) such a period is then in effect for such State under the Federal-State Extended Unemployment Compensation Act of 1970; or

(B) such a period would then be in effect for such State under such Act if section 203(d) of such Act were applied as if it had been amended by striking "5" each place it appears and inserting "4".

SEC. 204. PAYMENTS TO STATES HAVING AGREEMENTS FOR THE PAYMENT OF TEMPORARY EXTENDED UNEMPLOYMENT COMPENSATION.

(a) GENERAL RULE.—There shall be paid to each State that has entered into an agreement under this title an amount equal to 100 percent of the temporary extended unemployment compensation paid to individuals by the State pursuant to such agreement.

(b) TREATMENT OF REIMBURSABLE COMPENSATION.—No payment shall be made to any State under this section in respect of any compensation to the extent the State is entitled to reimbursement in respect of such compensation under the provisions of any Federal law other than this title or chapter 85 of title 5, United States Code. A State shall not be entitled to any reimbursement under such chapter 85 in respect of any compensation to the extent the State is entitled to reimbursement under this title in respect of such compensation.

(c) DETERMINATION OF AMOUNT.—Sums payable to any State by reason of such State having an agreement under this title shall be payable, either in advance or by way of reimbursement (as may be determined by the Secretary), in such amounts as the Secretary estimates the State will be entitled to receive under this title for each calendar month, reduced or increased, as the case may be, by any amount by which the Secretary finds that the Secretary's estimates for any prior calendar month were greater or less than the amounts which should have been paid to the State. Such estimates may be made on the basis of such statistical, sampling, or other method as may be agreed upon by the Secretary and the State agency of the State involved.

SEC. 205. FINANCING PROVISIONS.

(a) IN GENERAL.—Funds in the extended unemployment compensation account (as established by section 905(a) of the Social Security Act (42 U.S.C. 1105(a)) of the Unemployment Trust Fund (as established by section 904(a) of such Act (42 U.S.C. 1104(a)) shall be used for the making of payments to States having agreements entered into under this title.

(b) CERTIFICATION.—The Secretary shall from time to time certify to the Secretary of the Treasury for payment to each State the sums payable to such State under this title. The Secretary of the Treasury, prior to audit or settlement by the General Accounting Office, shall make payments to the State in accordance with such certification, by transfers from the extended unemployment compensation account (as so established) to the account of such State in the Unemployment Trust Fund (as so established).

(c) ASSISTANCE TO STATES.—There are appropriated out of the employment security administration account (as established by section 901(a) of the Social Security Act (42 U.S.C. 1101(a)) of the Unemployment Trust Fund, without fiscal year limitation, such funds as may be necessary for purposes of assisting States (as provided in title III of the Social Security Act (42 U.S.C. 501 et seq.)) in meeting the costs of administration of agreements under this title.

(d) APPROPRIATIONS FOR CERTAIN PAYMENTS.—There are appropriated from the general fund of the Treasury, without fiscal year limitation, to the extended unemployment compensation account (as so established) of the Unemployment Trust Fund (as so established) such sums as the Secretary estimates to be necessary to make the payments under this section in respect of—

(1) compensation payable under chapter 85 of title 5, United States Code; and

(2) compensation payable on the basis of services to which section 3309(a)(1) of the Internal Revenue Code of 1986 applies.

Amounts appropriated pursuant to the preceding sentence shall not be required to be repaid.

SEC. 206. FRAUD AND OVERPAYMENTS.

(a) IN GENERAL.—If an individual knowingly has made, or caused to be made by another, a false statement or representation of a material fact, or knowingly has failed, or caused another to fail, to disclose a material fact, and as a result of such false statement or representation or of such nondisclosure such individual has received an amount of temporary extended unemployment compensation under this title to which he was not entitled, such individual—

(1) shall be ineligible for further temporary extended unemployment compensation under this title in accordance with the provisions of the applicable State unemployment compensation law relating to fraud in connection with a claim for unemployment compensation; and

(2) shall be subject to prosecution under section 1001 of title 18, United States Code.

(b) REPAYMENT.—In the case of individuals who have received amounts of temporary extended unemployment compensation under this title to which they were not entitled, the State shall require such individuals to repay the amounts of such temporary extended unemployment compensation to the State agency, except that the State agency may waive such repayment if it determines that—

(1) the payment of such temporary extended unemployment compensation was without fault on the part of any such individual; and

(2) such repayment would be contrary to equity and good conscience.

(c) RECOVERY BY STATE AGENCY.—

(1) IN GENERAL.—The State agency may recover the amount to be repaid, or any part thereof, by deductions from any temporary extended unemployment compensation payable to such individual under this title or from any unemployment compensation payable to such individual under any Federal unemployment compensation law administered by the State agency or under any other Federal law administered by the State agency which provides for the payment of any assistance or allowance with respect to any week of unemployment, during the 3-year period after the date such individuals received the payment of the temporary extended unemployment compensation to which they were not entitled, except that no single deduction may exceed 50 percent of the weekly benefit amount from which such deduction is made.

(2) OPPORTUNITY FOR HEARING.—No repayment shall be required, and no deduction shall be made, until a determination has been made, notice thereof and an opportunity for a fair hearing has been given to the individual, and the determination has become final.

(d) REVIEW.—Any determination by a State agency under this section shall be subject to review in the same manner and to the same extent as determinations under the State unemployment compensation law, and only in that manner and to that extent.

SEC. 207. DEFINITIONS.

In this title, the terms "compensation", "regular compensation", "extended compensation", "additional compensation", "benefit year", "base period", "State", "State agency", "State law", and "week" have the respective meanings given such terms under section 205 of the Federal-State Extended Unemployment Compensation Act of 1970 (26 U.S.C. 3304 note).

SEC. 208. APPLICABILITY.

An agreement entered into under this title shall apply to weeks of unemployment—

(1) beginning after the date on which such agreement is entered into; and

(2) ending before January 1, 2003.

SEC. 209. SPECIAL REED ACT TRANSFER IN FISCAL YEAR 2002.

(a) Repeal of Certain Provisions Added by the Balanced Budget Act of 1997.—

(1) In general.—The following provisions of section 903 of the Social Security Act (42 U.S.C. 1103) are repealed:

(A) Paragraph (3) of subsection (a).

(B) The last sentence of subsection (c)(2).

(2) Savings provision.—Any amounts transferred before the date of enactment of this Act under the provision repealed by paragraph (1)(A) shall remain subject to section 903 of the Social Security Act, as last in effect before such date of enactment.

(b) Special Transfer in Fiscal Year 2002.—Section 903 of the Social Security Act is amended by adding at the end the following:

"Special Transfer in Fiscal Year 2002

"(d)(1) The Secretary of the Treasury shall transfer (as of the date determined under paragraph (5)) from the Federal unemployment account to the account of each State in the Unemployment Trust Fund the amount determined with respect to such State under paragraph (2).

"(2)(A) The amount to be transferred under this subsection to a State account shall (as determined by the Secretary of Labor and certified by such Secretary to the Secretary of the Treasury) be equal to—

"(i) the amount which would have been required to have been transferred under this section to such account at the beginning of fiscal year 2002 if—

"(I) section 209(a)(1) of the Temporary Extended Unemployment Compensation Act of 2002 had been enacted before the close of fiscal year 2001, and

"(II) section 5402 of Public Law 105–33 (relating to increase in Federal unemployment account ceiling) had not been enacted,

minus

"(ii) the amount which was in fact transferred under this section to such account at the beginning of fiscal year 2002.

"(B) Notwithstanding the provisions of subparagraph (A)—

"(i) the aggregate amount transferred to the States under this subsection may not exceed a total of $8,000,000,000; and

"(ii) all amounts determined under subparagraph (A) shall be reduced ratably, if and to the extent necessary in order to comply with the limitation under clause (i).

"(3)(A) Except as provided in paragraph (4), amounts transferred to a State account pursuant to this subsection may be used only in the payment of cash benefits—

"(i) to individuals with respect to their unemployment, and

"(ii) which are allowable under subparagraph (B) or (C).

"(B)(i) At the option of the State, cash benefits under this paragraph may include amounts which shall be payable as—

"(I) regular compensation, or

"(II) additional compensation, upon the exhaustion of any temporary extended unemployment compensation (if such State has entered into an agreement under the Temporary Extended Unemployment Compensation Act of 2002), for individuals eligible for regular compensation under the unemployment compensation law of such State.

"(ii) Any additional compensation under clause (i) may not be taken into account for purposes of any determination relating to the amount of any extended compensation for which an individual might be eligible.

"(C)(i) At the option of the State, cash benefits under this paragraph may include amounts which shall be payable to 1 or more categories of individuals not otherwise eligible for regular compensation under the unemployment compensation law of such State, including those described in clause (iii).

"(ii) The benefits paid under this subparagraph to any individual may not, for any period of unemployment, exceed the maximum amount of regular compensation authorized under the unemployment compensation law of such State for that same period, plus any additional compensation (described in subparagraph (B)(i)) which could have been paid with respect to that amount.

"(iii) The categories of individuals described in this clause include the following:

"(I) Individuals who are seeking, or available for, only part-time (and not full-time) work.

"(II) Individuals who would be eligible for regular compensation under the unemployment compensation law of such State under an alternative base period.

"(D) Amounts transferred to a State account under this subsection may be used in the payment of cash benefits to individuals only for weeks of unemployment beginning after the date of enactment of this subsection.

"(4) Amounts transferred to a State account under this subsection may be used for the administration of its unemployment compensation law and public employment offices (including in connection with benefits described in paragraph (3) and any recipients thereof), subject to the same conditions as set forth in subsection (c)(2) (excluding subparagraph (B) thereof, and deeming the reference to 'subsections (a) and (b)' in subparagraph (D) thereof to include this subsection).

"(5) Transfers under this subsection shall be made within 10 days after the date of enactment of this paragraph.".

(c) Limitations on Transfers.—Section 903(b) of the Social Security Act shall apply to transfers under section 903(d) of such Act (as amended by this section). For purposes of the preceding sentence, such section 903(b) shall be deemed to be amended as follows:

(1) By substituting "the transfer date described in subsection (d)(5)" for "October 1 of any fiscal year".

(2) By substituting "remain in the Federal unemployment account" for "be transferred to the Federal unemployment account as of the beginning of such October 1".

(3) By substituting "fiscal year 2002 (after the transfer date described in subsection (d)(5))" for "the fiscal year beginning on such October 1".

(4) By substituting "under subsection (d)" for "as of October 1 of such fiscal year".

(5) By substituting "(as of the close of fiscal year 2002)" for "(as of the close of such fiscal year)".

(d) Technical Amendments.—(1) Sections 3304(a)(4)(B) and 3306(f)(2) of the Internal Revenue Code of 1986 are amended by inserting "or 903(d)(4)" before "of the Social Security Act".

(2) Section 303(a)(5) of the Social Security Act is amended in the second proviso by inserting "or 903(d)(4)" after "903(c)(2)".

(e) Regulations.—The Secretary of Labor may prescribe any operating instructions or regulations necessary to carry out this section and the amendments made by this section.

TITLE III—TAX INCENTIVES FOR NEW YORK CITY AND DISTRESSED AREAS

SEC. 301. TAX BENEFITS FOR AREA OF NEW YORK CITY DAMAGED IN TERRORIST ATTACKS ON SEPTEMBER 11, 2001.

(a) In General.—Chapter 1 is amended by adding at the end the following new subchapter:

"Subchapter Y—New York Liberty Zone Benefits

"Sec. 1400L. Tax benefits for New York Liberty Zone.

"SEC. 1400L. TAX BENEFITS FOR NEW YORK LIBERTY ZONE.

"(a) Expansion of Work Opportunity Tax Credit.—

"(1) In general.—For purposes of section 51, a New York Liberty Zone business employee shall be treated as a member of a targeted group.

"(2) New york liberty zone business employee.—For purposes of this subsection—

"(A) In general.—The term 'New York Liberty Zone business employee' means, with respect to any period, any employee of a New York Liberty Zone business if substantially all the services performed during such period by such employee for such business are performed in the New York Liberty Zone.

"(B) Inclusion of certain employees outside the new york liberty zone.—

"(i) In general.—In the case of a New York Liberty Zone business described in subclause (II) of subparagraph (C)(i), the term 'New York Liberty Zone business employee' includes any employee of such business (not described in subparagraph (A)) if substantially all the services performed during such period by such employee for such business are performed in the City of New York, New York.

"(ii) Limitation.—The number of employees of such a business that are treated as New York Liberty zone business employees on any day by reason of clause (i) shall not exceed the excess of—

"(I) the number of employees of such business on September 11, 2001, in the New York Liberty Zone, over

"(II) the number of New York Liberty Zone business employees (determined without regard to this subparagraph) of such business on the day to which the limitation is being applied.

The Secretary may require any trade or business to have the number determined under subclause (I) verified by the New York State Department of Labor.

"(C) New york liberty zone business.—

"(i) In general.—The term 'New York Liberty Zone business' means any trade or business which is—

"(I) located in the New York Liberty Zone, or

"(II) located in the City of New York, New York, outside the New York Liberty Zone, as a result of the physical destruction or damage of such place of business by the September 11, 2001, terrorist attack.

"(ii) Credit not allowed for large businesses.—The term 'New York Liberty Zone business' shall not include any trade or business for any taxable year if such trade or business employed an average of more than 200 employees on business days during the taxable year.

"(D) Special rules for determining amount of credit.—For purposes of applying subpart F of part IV of subchapter B of this chapter to wages paid or incurred to any New York Liberty Zone business employee—

"(i) section 51(a) shall be applied by substituting 'qualified wages' for 'qualified first-year wages',

"(ii) the rules of section 52 shall apply for purposes of determining the number of employees under subparagraph (B),

"(iii) subsections (c)(4) and (i)(2) of section 51 shall not apply, and

"(iv) in determining qualified wages, the following shall apply in lieu of section 51(b):

"(I) QUALIFIED WAGES.—The term 'qualified wages' means wages paid or incurred by the employer to individuals who are New York Liberty Zone business employees of such employer for work performed during calendar year 2002 or 2003.

"(II) ONLY FIRST $6,000 OF WAGES PER CALENDAR YEAR TAKEN INTO ACCOUNT.—The amount of the qualified wages which may be taken into account with respect to any individual shall not exceed $6,000 per calendar year.

"(b) SPECIAL ALLOWANCE FOR CERTAIN PROPERTY ACQUIRED AFTER SEPTEMBER 10, 2001.—

"(1) ADDITIONAL ALLOWANCE.—In the case of any qualified New York Liberty Zone property—

"(A) the depreciation deduction provided by section 167(a) for the taxable year in which such property is placed in service shall include an allowance equal to 30 percent of the adjusted basis of such property, and

"(B) the adjusted basis of the qualified New York Liberty Zone property shall be reduced by the amount of such deduction before computing the amount otherwise allowable as a depreciation deduction under this chapter for such taxable year and any subsequent taxable year.

"(2) QUALIFIED NEW YORK LIBERTY ZONE PROPERTY.—For purposes of this subsection—

"(A) IN GENERAL.—The term 'qualified New York Liberty Zone property' means property—

"(i)(I) which is described in section 168(k)(2)(A)(i), or

"(II) which is nonresidential real property, or residential rental property, which is described in subparagraph (B),

"(ii) substantially all of the use of which is in the New York Liberty Zone and is in the active conduct of a trade or business by the taxpayer in such Zone,

"(iii) the original use of which in the New York Liberty Zone commences with the taxpayer after September 10, 2001,

"(iv) which is acquired by the taxpayer by purchase (as defined in section 179(d)) after September 10, 2001, but only if no written binding contract for the acquisition was in effect before September 11, 2001, and

"(v) which is placed in service by the taxpayer on or before the termination date.

The term 'termination date' means December 31, 2006 (December 31, 2009, in the case of nonresidential real property and residential rental property).

"(B) ELIGIBLE REAL PROPERTY.—Nonresidential real property or residential rental property is described in this subparagraph only to the extent it rehabilitates real property damaged, or replaces real property destroyed or condemned, as a result of the September 11, 2001, terrorist attack. For purposes of the preceding sentence, property shall be treated as replacing real property destroyed or condemned if, as part of an integrated plan, such property replaces real property which is included in a continuous area which includes real property destroyed or condemned.

"(C) EXCEPTIONS.—

"(i) 30 PERCENT ADDITIONAL ALLOWANCE PROPERTY.—Such term shall not include property to which section 168(k) applies.

"(ii) ALTERNATIVE DEPRECIATION PROPERTY.—The term 'qualified New York Liberty Zone property' shall not include any property described in section 168(k)(2)(C)(i).

"(iii) QUALIFIED NEW YORK LIBERTY ZONE LEASEHOLD IMPROVEMENT PROPERTY.—Such term shall not include any qualified New York Liberty Zone leasehold improvement property.

"(iv) ELECTION OUT.—For purposes of this subsection, rules similar to the rules of section 168(k)(2)(C)(iii) shall apply.

"(D) SPECIAL RULES.—For purposes of this subsection, rules similar to the rules of section 168(k)(2)(D) shall apply, except that clause (i) thereof shall be applied without regard to 'and before September 11, 2004'.

"(E) ALLOWANCE AGAINST ALTERNATIVE MINIMUM TAX.—For purposes of this subsection, rules similar to the rules of section 168(k)(2)(F) shall apply.

"(c) 5-YEAR RECOVERY PERIOD FOR DEPRECIATION OF CERTAIN LEASEHOLD IMPROVEMENTS.—

"(1) IN GENERAL.—For purposes of section 168, the term '5-year property' includes any qualified New York Liberty Zone leasehold improvement property.

"(2) QUALIFIED NEW YORK LIBERTY ZONE LEASEHOLD IMPROVEMENT PROPERTY.—For purposes of this section, the term 'qualified New York Liberty Zone leasehold improvement property' means qualified leasehold improvement property (as defined in section 168(k)(3)) if—

"(A) such building is located in the New York Liberty Zone,

"(B) such improvement is placed in service after September 10, 2001, and before January 1, 2007, and

"(C) no written binding contract for such improvement was in effect before September 11, 2001.

"(3) REQUIREMENT TO USE STRAIGHT LINE METHOD.—The applicable depreciation method under section 168 shall be the straight line method in the case of qualified New York Liberty Zone leasehold improvement property.

"(4) 9-YEAR RECOVERY PERIOD UNDER ALTERNATIVE SYSTEM.—For purposes of section 168(g), the class life of qualified New York Liberty Zone leasehold improvement property shall be 9 years.

"(d) TAX-EXEMPT BOND FINANCING.—

"(1) IN GENERAL.—For purposes of this title, any qualified New York Liberty Bond shall be treated as an exempt facility bond.

"(2) QUALIFIED NEW YORK LIBERTY BOND.—For purposes of this subsection, the term 'qualified New York Liberty Bond' means any bond issued as part of an issue if—

"(A) 95 percent or more of the net proceeds (as defined in section 150(a)(3)) of such issue are to be used for qualified project costs, .

"(B) such bond is issued by the State of New York or any political subdivision thereof,

"(C) the Governor or the Mayor designates such bond for purposes of this section, and

"(D) such bond is issued after the the date of the enactment of this section and before January 1, 2005.

"(3) LIMITATIONS ON AMOUNT OF BONDS.—

"(A) AGGREGATE AMOUNT DESIGNATED.—The maximum aggregate face amount of bonds which may be designated under this subsection shall not exceed $8,000,000,000, of which not to exceed $4,000,000,000 may be designated by the Governor and not to exceed $4,000,000,000 may be designated by the Mayor.

"(B) SPECIFIC LIMITATIONS.—The aggregate face amount of bonds issued which are to be used for—

"(i) costs for property located outside the New York Liberty Zone shall not exceed $2,000,000,000,

"(ii) residential rental property shall not exceed $1,600,000,000, and

"(iii) costs with respect to property used for retail sales of tangible property and functionally related and subordinate property shall not exceed $800,000,000.

The limitations under clauses (i), (ii), and (iii) shall be allocated proportionately between the bonds designated by the Governor and the bonds designated by the Mayor in proportion to the respective amounts of bonds designated by each.

"(C) MOVABLE PROPERTY.—No bonds shall be issued which are to be used for movable fixtures and equipment.

"(4) QUALIFIED PROJECT COSTS.—For purposes of this subsection—

"(A) IN GENERAL.—The term 'qualified project costs' means the cost of acquisition, construction, reconstruction, and renovation of—

"(i) nonresidential real property and residential rental property (including fixed tenant improvements associated with such property) located in the New York Liberty Zone, and

"(ii) public utility property (as defined in section 168(i)(10)) located in the New York Liberty Zone.

"(B) COSTS FOR CERTAIN PROPERTY OUTSIDE ZONE INCLUDED.—Such term includes the cost of acquisition, construction, reconstruction, and renovation of nonresidential real property (including fixed tenant improvements associated with such property) located outside the New York Liberty Zone but within the City of New York, New York, if such property is part of a project which consists of at least 100,000 square feet of usable office or other commercial space located in a single building or multiple adjacent buildings.

"(5) SPECIAL RULES.—In applying this title to any qualified New York Liberty Bond, the following modifications shall apply:

"(A) Section 146 (relating to volume cap) shall not apply.

"(B) Section 147(d) (relating to acquisition of existing property not permitted) shall be applied by substituting '50 percent' for '15 percent' each place it appears.

"(C) Section 148(f)(4)(C) (relating to exception from rebate for certain proceeds to be used to finance construction expenditures) shall apply to the available construction proceeds of bonds issued under this section.

"(D) Repayments of principal on financing provided by the issue—

"(i) may not be used to provide financing, and

"(ii) must be used not later than the close of the 1st semiannual period beginning after the date of the repayment to redeem bonds which are part of such issue.

The requirement of clause (ii) shall be treated as met with respect to amounts received within 10 years after the date of issuance of the issue (or, in the case of a refunding bond, the date of issuance of the original bond) if such amounts are used by the close of such 10 years to redeem bonds which are part of such issue.

"(E) Section 57(a)(5) shall not apply.

"(6) SEPARATE ISSUE TREATMENT OF PORTIONS OF AN ISSUE.—This subsection shall not apply to the portion of an issue which (if issued as a separate issue) would be treated as a qualified bond or as a bond that is not a private activity bond (determined without regard to paragraph (1)), if the issuer elects to so treat such portion.

"(e) ADVANCE REFUNDINGS OF CERTAIN TAX-EXEMPT BONDS.—

"(1) IN GENERAL.—With respect to a bond described in paragraph (2) issued as part of an issue 90 percent (95 percent in the case of a bond described in paragraph (2)(C)) or more of the net proceeds (as defined in section 150(a)(3)) of which were used to finance facilities located within the City of New York, New York (or property which is functionally related and subordinate to facilities located within the City of New York for the furnishing of water), one additional advanced refunding after the date of the enactment of this section and before January 1, 2005, shall be allowed under the applicable rules of section 149(d) if—

"(A) the Governor or the Mayor designates the advance refunding bond for purposes of this subsection, and

"(B) the requirements of paragraph (4) are met.

"(2) BONDS DESCRIBED.—A bond is described in this paragraph if such bond was outstanding on September 11, 2001, and is—

"(A) a State or local bond (as defined in section 103(c)(1)) which is a general obligation of the City of New York, New York,

"(B) a State or local bond (as so defined) other than a private activity bond (as defined in section 141(a)) issued by the New York Municipal Water Finance Authority or the Metropolitan Transportation Authority of the State of New York, or

"(C) a qualified 501(c)(3) bond (as defined in section 145(a)) which is a qualified hospital bond (as defined in section 145(c)) issued by or on behalf of the State of New York or the City of New York, New York.

"(3) AGGREGATE LIMIT.—For purposes of paragraph (1), the maximum aggregate face amount of bonds which may be designated under this subsection by the Governor shall not exceed $4,500,000,000 and the maximum aggregate face amount of bonds which may be designated under this subsection by the Mayor shall not exceed $4,500,000,000.

"(4) ADDITIONAL REQUIREMENTS.—The requirements of this paragraph are met with respect to any advance refunding of a bond described in paragraph (2) if—

"(A) no advance refundings of such bond would be allowed under any provision of law after September 11, 2001,

"(B) the advance refunding bond is the only other outstanding bond with respect to the refunded bond, and

"(C) the requirements of section 148 are met with respect to all bonds issued under this subsection.

"(f) INCREASE IN EXPENSING UNDER SECTION 179.—

"(1) IN GENERAL.—For purposes of section 179—

"(A) the limitation under section 179(b)(1) shall be increased by the lesser of—

"(i) $35,000, or

"(ii) the cost of section 179 property which is qualified New York Liberty Zone property placed in service during the taxable year, and

"(B) the amount taken into account under section 179(b)(2) with respect to any section 179 property which is qualified New York Liberty Zone property shall be 50 percent of the cost thereof.

"(2) QUALIFIED NEW YORK LIBERTY ZONE PROPERTY.—For purposes of this subsection, the term 'qualified New York Liberty Zone property' has the meaning given such term by subsection (b)(2).

"(3) RECAPTURE.—Rules similar to the rules under section 179(d)(10) shall apply with respect to any qualified New York Liberty Zone property which ceases to be used in the New York Liberty Zone.

"(g) EXTENSION OF REPLACEMENT PERIOD FOR NONRECOGNITION OF GAIN.—Notwithstanding subsections (g) and (h) of section 1033, clause (i) of section 1033(a)(2)(B) shall be applied by substituting '5 years' for '2 years' with respect to property which is compulsorily or involuntarily converted as a result of the terrorist attacks on September 11, 2001, in the New York Liberty Zone but only if substantially all of the use of the replacement property is in the City of New York, New York.

"(h) NEW YORK LIBERTY ZONE.—For purposes of this section, the term 'New York Liberty Zone' means the area located on or south of Canal Street, East Broadway (east of its intersection with Canal Street), or Grand Street (east of its intersection with East Broadway) in the Borough of Manhattan in the City of New York, New York.

"(i) REFERENCES TO GOVERNOR AND MAYOR.—For purposes of this section, the terms 'Governor' and 'Mayor' mean the Governor of the State of New York and the Mayor of the City of New York, New York, respectively.".

(b) CREDIT ALLOWED AGAINST REGULAR AND MINIMUM TAX.—

(1) IN GENERAL.—Subsection (c) of section 38 (relating to limitation based on amount of tax) is amended by redesignating paragraph (3) as paragraph (4) and by inserting after paragraph (2) the following new paragraph:

"(3) SPECIAL RULES FOR NEW YORK LIBERTY ZONE BUSINESS EMPLOYEE CREDIT.—

"(A) IN GENERAL.—In the case of the New York Liberty Zone business employee credit—

"(i) this section and section 39 shall be applied separately with respect to such credit, and

"(ii) in applying paragraph (1) to such credit—

"(I) the tentative minimum tax shall be treated as being zero, and

"(II) the limitation under paragraph (1) (as modified by subclause (I)) shall be reduced by the credit allowed under subsection (a) for the taxable year (other than the New York Liberty Zone business employee credit).

"(B) NEW YORK LIBERTY ZONE BUSINESS EMPLOYEE CREDIT.—For purposes of this subsection, the term 'New York Liberty Zone business employee credit' means the portion of work opportunity credit under section 51 determined under section 1400L(a).".

(2) CONFORMING AMENDMENT.—Subclause (II) of section 38(c)(2)(A)(ii) is amended by inserting "or the New York Liberty Zone business employee credit" after "employment credit".

(3) EFFECTIVE DATE.—The amendments made by this subsection shall apply to taxable years ending after December 31, 2001.

(c) CLERICAL AMENDMENT.—The table of subchapters for chapter 1 is amended by adding at the end the following new item:

"Subchapter Y—New York Liberty Zone Benefits.".

TITLE IV—MISCELLANEOUS AND TECHNICAL PROVISIONS

Subtitle A—General Miscellaneous Provisions

SEC. 401. ALLOWANCE OF ELECTRONIC 1099'S.

Any person required to furnish a statement under any section of subpart B of part III of subchapter A of chapter 61 of the Internal Revenue Code of 1986 for any taxable year ending after the date of the enactment of this Act, may electronically furnish such statement (without regard to any first class mailing requirement) to any recipient who has consented to the electronic provision of the statement in a manner similar to the one permitted under regulations issued under section 6051 of such Code or in such other manner as provided by the Secretary.

SEC. 402. EXCLUDED CANCELLATION OF INDEBTEDNESS INCOME OF S CORPORATION NOT TO RESULT IN ADJUSTMENT TO BASIS OF STOCK OF SHAREHOLDERS.

(a) IN GENERAL.—Subparagraph (A) of section 108(d)(7) (relating to certain provisions to be applied at corporate level) is amended by inserting before the period ", including by not taking into account under section 1366(a) any amount excluded under subsection (a) of this section".

(b) EFFECTIVE DATE.—

(1) IN GENERAL.—Except as provided in paragraph (2), the amendment made by this section shall apply to discharges of indebtedness after October 11, 2001, in taxable years ending after such date.

(2) EXCEPTION.—The amendment made by this section shall not apply to any discharge of indebtedness before March 1, 2002, pursuant to a plan of reorganization filed with a bankruptcy court on or before October 11, 2001.

SEC. 403. LIMITATION ON USE OF NONACCRUAL EXPERIENCE METHOD OF ACCOUNTING.

(a) IN GENERAL.—Paragraph (5) of section 448(d) is amended to read as follows:

"(5) SPECIAL RULE FOR CERTAIN SERVICES.—

"(A) IN GENERAL.—In the case of any person using an accrual method of accounting with respect to amounts to be received for the performance of services by such person, such person shall not be required to accrue any portion of such amounts which (on the basis of such person's experience) will not be collected if—

"(i) such services are in fields referred to in paragraph (2)(A), or

"(ii) such person meets the gross receipts test of subsection (c) for all prior taxable years.

"(B) EXCEPTION.—This paragraph shall not apply to any amount if interest is required to be paid on such amount or there is any penalty for failure to timely pay such amount.

"(C) REGULATIONS.—The Secretary shall prescribe regulations to permit taxpayers to determine amounts referred to in subparagraph (A) using computations or formulas which, based on experience, accurately reflect the amount of income that will not be collected by such person. A taxpayer may adopt, or request consent of the Secretary to change to, a computation or formula that clearly reflects the taxpayer's experience. A request under the preceding sentence shall be approved if such computation or formula clearly reflects the taxpayer's experience.".

(b) EFFECTIVE DATE.—

(1) IN GENERAL.—The amendments made by this section shall apply to taxable years ending after the date of the enactment of this Act.

(2) CHANGE IN METHOD OF ACCOUNTING.—In the case of any taxpayer required by the amendments made by this section to change its method of accounting for its first taxable year ending after the date of the enactment of this Act—

(A) such change shall be treated as initiated by the taxpayer,

(B) such change shall be treated as made with the consent of the Secretary of the Treasury, and

(C) the net amount of the adjustments required to be taken into account by the taxpayer under section 481 of the Internal Revenue Code of 1986 shall be taken into account over a period of 4 years (or if less, the number of taxable years that the taxpayer used the method permitted under section 448(d)(5) of such Code as in effect before the date of the enactment of this Act) beginning with such first taxable year.

SEC. 404. EXCLUSION FOR FOSTER CARE PAYMENTS TO APPLY TO PAYMENTS BY QUALIFIED PLACEMENT AGENCIES.

(a) In General.—The matter preceding subparagraph (B) of section 131(b)(1) (defining qualified foster care payment) is amended to read as follows:

"(1) In general.—The term 'qualified foster care payment' means any payment made pursuant to a foster care program of a State or political subdivision thereof—

"(A) which is paid by—

"(i) a State or political subdivision thereof, or

"(ii) a qualified foster care placement agency, and".

(b) Qualified Foster Individuals To Include Individuals Placed by Qualified Placement Agencies.—Subparagraph (B) of section 131(b)(2) (defining qualified foster individual) is amended to read as follows:

"(B) a qualified foster care placement agency.".

(c) Qualified Foster Care Placement Agency Defined.—Subsection (b) of section 131 is amended by redesignating paragraph (3) as paragraph (4) and by inserting after paragraph (2) the following new paragraph:

"(3) Qualified foster care placement agency.—The term 'qualified foster care placement agency' means any placement agency which is licensed or certified by—

"(A) a State or political subdivision thereof, or

"(B) an entity designated by a State or political subdivision thereof,

for the foster care program of such State or political subdivision to make foster care payments to providers of foster care.".

(d) Effective Date.—The amendments made by this section shall apply to taxable years beginning after December 31, 2001.

SEC. 405. INTEREST RATE RANGE FOR ADDITIONAL FUNDING REQUIREMENTS.

(a) Amendments to the Internal Revenue Code of 1986.—

(1) Special rule.—Clause (i) of section 412(l)(7)(C) (relating to interest rate) is amended by adding at the end the following new subclause:

"(III) Special rule for 2002 and 2003.—For a plan year beginning in 2002 or 2003, notwithstanding subclause (I), in the case that the rate of interest used under subsection (b)(5) exceeds the highest rate permitted under subclause (I), the rate of interest used to determine current liability under this subsection may exceed the rate of interest otherwise permitted under subclause (I); except that such rate of interest shall not exceed 120 percent of the weighted average referred to in subsection (b)(5)(B)(ii).".

(2) Quarterly contributions.—Subsection (m) of section 412 is amended by adding at the end the following new paragraph:

"(7) Special rules for 2002 and 2004.—In any case in which the interest rate used to determine current liability is determined under subsection (l)(7)(C)(i)(III)—

"(A) 2002.—For purposes of applying paragraphs (1) and (4)(B)(ii) for plan years beginning in 2002, the current liability for the preceding plan year shall be redetermined using 120 percent as the specified percentage determined under subsection (l)(7)(C)(i)(II).

"(B) 2004.—For purposes of applying paragraphs (1) and (4)(B)(ii) for plan years beginning in 2004, the current liability for the preceding plan year shall be redetermined using 105 percent as the specified percentage determined under subsection (l)(7)(C)(i)(II).".

(b) Amendments to the Employee Retirement Income Security Act of 1974.—

(1) Special rule.—Clause (i) of section 302(d)(7)(C) of such Act (29 U.S.C. 1082(d)(7)(C)) is amended by adding at the end the following new subclause:

"(III) Special rule for 2002 and 2003.—For a plan year beginning in 2002 or 2003, notwithstanding subclause (I), in the case that the rate of interest used under subsection (b)(5) exceeds the highest rate permitted under subclause (I), the rate of interest used to determine current liability under this subsection may exceed the rate of interest otherwise permitted under subclause (I); except that such rate of interest shall not exceed 120 percent of the weighted average referred to in subsection (b)(5)(B)(ii).".

(2) Quarterly contributions.—Subsection (e) of section 302 of such Act (29 U.S.C. 1082) is amended by adding at the end the following new paragraph:

"(7) Special rules for 2002 and 2004.—In any case in which the interest rate used to determine current liability is determined under subsection (d)(7)(C)(i)(III)—

"(A) 2002.—For purposes of applying paragraphs (1) and (4)(B)(ii) for plan years beginning in 2002, the current liability for the preceding plan year shall be redetermined using 120 percent as the specified percentage determined under subsection (d)(7)(C)(i)(II).

"(B) 2004.—For purposes of applying paragraphs (1) and (4)(B)(ii) for plan years beginning in 2004, the current liability for the preceding plan year shall be redetermined using 105 percent as the specified percentage determined under subsection (d)(7)(C)(i)(II).".

(c) PBGC.—Clause (iii) of section 4006(a)(3)(E) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1306(a)(3)(E)) is amended by adding at the end the following new subclause:

"(IV) In the case of plan years beginning after December 31, 2001, and before January 1, 2004, subclause (II) shall be applied by substituting '100 percent' for '85 percent'. Subclause (III) shall be applied for such years without regard to the preceding sentence. Any reference to this clause by any other sections or subsections shall be treated as a reference to this clause without regard to this subclause.".

SEC. 406. ADJUSTED GROSS INCOME DETERMINED BY TAKING INTO ACCOUNT CERTAIN EXPENSES OF ELEMENTARY AND SECONDARY SCHOOL TEACHERS.

(a) In General.—Section 62(a)(2) (relating to certain trade and business deductions of employees) is amended by adding at the end the following:

"(D) Certain expenses of elementary and secondary school teachers.—In the case of taxable years beginning during 2002 or 2003, the deductions allowed by section 162 which consist of expenses, not in excess of $250, paid or incurred by an eligible educator in connection with books, supplies (other than nonathletic supplies for courses of instruction in health or physical education), computer equipment (including related software and services) and other equipment, and supplementary materials used by the eligible educator in the classroom.".

(b) Eligible Educator.—Section 62 is amended by adding at the end the following:

"(d) Definition; Special Rules.—

"(1) Eligible educator.—

"(A) In general.—For purposes of subsection (a)(2)(D), the term 'eligible educator' means, with respect to any taxable year, an individual who is a kindergarten through grade 12 teacher, instructor, counselor, principal, or aide in a school for at least 900 hours during a school year.

"(B) School.—The term 'school' means any school which provides elementary education or secondary education (kindergarten through grade 12), as determined under State law.

"(2) Coordination with exclusions.—A deduction shall be allowed under subsection (a)(2)(D) for expenses only to the extent the amount of such expenses exceeds the amount excludable under section 135, 529(c)(1), or 530(d)(2) for the taxable year.".

(c) Effective Date.—The amendments made by this section shall apply to taxable years beginning after December 31, 2001.

Subtitle B—Technical Corrections

SEC. 411. AMENDMENTS RELATED TO ECONOMIC GROWTH AND TAX RELIEF RECONCILIATION ACT OF 2001.

(a) Amendments Related to Section 101 of the Act.—

(1) In general.—Subsection (b) of section 6428 is amended to read as follows:

"(b) Credit Treated as Nonrefundable Personal Credit.—For purposes of this title, the credit allowed under this section shall be treated as a credit allowable under subpart A of part IV of subchapter A of chapter 1.".

(2) Conforming amendments.—

(A) Subsection (d) of section 6428 is amended to read as follows:

"(d) Coordination with Advance Refunds of Credit.—

"(1) In general.—The amount of credit which would (but for this paragraph) be allowable under this section shall be reduced (but not below zero) by the aggregate refunds and credits made or allowed to the taxpayer under subsection (e). Any failure to so reduce the credit shall be treated as arising out of a mathematical or clerical error and assessed according to section 6213(b)(1).

"(2) Joint returns.—In the case of a refund or credit made or allowed under subsection (e) with respect to a joint return, half of such refund or credit shall be treated as having been made or allowed to each individual filing such return.".

(B) Paragraph (2) of section 6428(e) is amended to read as follows:

"(2) Advance refund amount.—For purposes of paragraph (1), the advance refund amount is the amount that would have been allowed as a credit under this section for such first taxable year if—

"(A) this section (other than subsections (b) and (d) and this subsection) had applied to such taxable year, and

"(B) the credit for such taxable year were not allowed to exceed the excess (if any) of—

"(i) the sum of the regular tax liability (as defined in section 26(b)) plus the tax imposed by section 55, over

"(ii) the sum of the credits allowable under part IV of subchapter A of chapter 1 (other than the credits allowable under subpart C thereof, relating to refundable credits)."

(b) Amendment Related to Section 201 of the Act.—Subparagraph (B) of section 24(d)(1) is amended by striking "amount of credit allowed by this section" and inserting "aggregate amount of credits allowed by this subpart".

(c) Amendments Related to Section 202 of the Act.—

(1) Corrections to credit for adoption expenses.—

(A) Paragraph (1) of section 23(a) is amended to read as follows:

"(1) In general.—In the case of an individual, there shall be allowed as a credit against the tax imposed by this chapter the amount of the qualified adoption expenses paid or incurred by the taxpayer."

(B) Subsection (a) of section 23 is amended by adding at the end the following new paragraph:

"(3) $10,000 CREDIT FOR ADOPTION OF CHILD WITH SPECIAL NEEDS REGARDLESS OF EXPENSES.—In the case of an adoption of a child with special needs which becomes final during a taxable year, the taxpayer shall be treated as having paid during such year qualified adoption expenses with respect to such adoption in an amount equal to the excess (if any) of $10,000 over the aggregate qualified adoption expenses actually paid or incurred by the taxpayer with respect to such adoption during such taxable year and all prior taxable years."

(C) Paragraph (2) of section 23(a) is amended by striking the last sentence.

(D) Paragraph (1) of section 23(b) is amended by striking "subsection (a)(1)(A)" and inserting "subsection (a)".

(E) Subsection (i) of section 23 is amended by striking "the dollar limitation in subsection (b)(1)" and inserting "the dollar amounts in subsections (a)(3) and (b)(1)".

(F) Expenses paid or incurred during any taxable year beginning before January 1, 2002, may be taken into account in determining the credit under section 23 of the Internal Revenue Code of 1986 only to the extent the aggregate of such expenses does not exceed the applicable limitation under section 23(b)(1) of such Code as in effect on the day before the date of the enactment of the Economic Growth and Tax Relief Reconciliation Act of 2001.

(2) CORRECTIONS TO EXCLUSION FOR EMPLOYER-PROVIDED ADOPTION ASSISTANCE.—

(A) Subsection (a) of section 137 is amended to read as follows:

"(a) EXCLUSION.—

"(1) IN GENERAL.—Gross income of an employee does not include amounts paid or expenses incurred by the employer for qualified adoption expenses in connection with the adoption of a child by an employee if such amounts are furnished pursuant to an adoption assistance program.

"(2) $10,000 EXCLUSION FOR ADOPTION OF CHILD WITH SPECIAL NEEDS REGARDLESS OF EXPENSES.—In the case of an adoption of a child with special needs which becomes final during a taxable year, the qualified adoption expenses with respect to such adoption for such year shall be increased by an amount equal to the excess (if any) of $10,000 over the actual aggregate qualified adoption expenses with respect to such adoption during such taxable year and all prior taxable years."

(B) Paragraph (2) of section 137(b) is amended by striking "subsection (a)(1)" and inserting "subsection (a)".

(3) EFFECTIVE DATE.—The amendments made by this subsection shall apply to taxable years beginning after December 31, 2002; except that the amendments made by paragraphs (1)(C), (1)(D), and (2)(B) shall apply to taxable years beginning after December 31, 2001.

(d) AMENDMENTS RELATED TO SECTION 205 OF THE ACT.—

(1) Section 45F(d)(4)(B) is amended by striking "subpart A, B, or D of this part" and inserting "this chapter or for purposes of section 55".

(2) Section 38(b)(15) is amended by striking "45F" and inserting "45F(a)".

(e) AMENDMENTS RELATED TO SECTION 301 OF THE ACT.—

(1) Section 63(c)(2) is amended—

(A) in subparagraph (A), by striking "subparagraph (C)" and inserting "subparagraph (D)",

(B) by striking "or" at the end of subparagraph (B),

(C) by redesignating subparagraph (C) as subparagraph (D),

(D) by inserting after subparagraph (B) the following new subparagraph:

"(C) one-half of the amount in effect under subparagraph (A) in the case of a married individual filing a separate return, or", and

(E) by inserting the following flush sentence at the end:

"If any amount determined under subparagraph (A) is not a multiple of $50, such amount shall be rounded to the next lowest multiple of $50."

(2)(A) Section 63(c)(4) is amended by striking "paragraph (2) or (5)" and inserting "paragraph (2)(B), (2)(D), or (5)".

(B) Section 63(c)(4)(B)(i) is amended by striking "paragraph (2)" and inserting "paragraph (2)(B), (2)(D),".

(C) Section 63(c)(4) is amended by striking the flush sentence at the end (as added by section 301(c)(2) of Public Law 107–17).

(f) AMENDMENT RELATED TO SECTION 401 OF THE ACT.—Section 530(d)(4)(B)(iv) is amended by striking "because the taxpayer elected under paragraph (2)(C) to waive the application of paragraph (2)" and inserting "by application of paragraph (2)(C)(i)(II)".

(g) AMENDMENTS RELATED TO SECTION 511 OF THE ACT.—

(1) Section 2511(c) is amended by striking "taxable gift under section 2503," and inserting "transfer of property by gift,".

(2) Section 2101(b) is amended by striking the last sentence.

(h) AMENDMENT RELATED TO SECTION 532 OF THE ACT.—Section 2016 is amended by striking "any State, any possession of the United States, or the District of Columbia,".

(i) AMENDMENTS RELATING TO SECTION 602 OF THE ACT.—

(1) Subparagraph (A) of section 408(q)(3) is amended to read as follows:

"(A) QUALIFIED EMPLOYER PLAN.—The term 'qualified employer plan' has the meaning given such term by section 72(p)(4)(A)(i); except that such term shall also include an eligible deferred compensation plan (as defined in section 457(b)) of an eligible employer described in section 457(e)(1)(A).".

(2) Section 4(c) of Employee Retirement Income Security Act of 1974 is amended—

(A) by inserting "and part 5 (relating to administration and enforcement)" before the period at the end, and

(B) by adding at the end the following new sentence: "Such provisions shall apply to such accounts and annuities in a manner similar to their application to a simplified employee pension under section 408(k) of the Internal Revenue Code of 1986.".

(j) AMENDMENTS RELATING TO SECTION 611 OF THE ACT.—

(1) Section 408(k) is amended—

(A) in paragraph (2)(C) by striking "$300" and inserting "$450", and

(B) in paragraph (8) by striking "$300" both places it appears and inserting "$450".

(2) Section 409(o)(1)(C)(ii) is amended—

(A) by striking "$500,000" both places it appears and inserting "$800,000", and

(B) by striking "$100,000" and inserting "$160,000".

(3) Section 611(i) of the Economic Growth and Tax Relief Reconciliation Act of 2001 is amended by adding at the end the following new paragraph:

"(3) SPECIAL RULE.—In the case of plan that, on June 7, 2001, incorporated by reference the limitation of section 415(b)(1)(A) of the Internal Revenue Code of 1986, section 411(d)(6) of such Code and section 204(g)(1) of the Employee Retirement Income Security Act of 1974 do not apply to a plan amendment that—

"(A) is adopted on or before June 30, 2002,

"(B) reduces benefits to the level that would have applied without regard to the amendments made by subsection (a) of this section, and

"(C) is effective no earlier than the years described in paragraph (2).".

(k) AMENDMENTS RELATING TO SECTION 613 OF THE ACT.—

(1) Section 416(c)(1)(C)(iii) is amended by striking "EXCEPTION FOR FROZEN PLAN" and inserting "EXCEPTION FOR PLAN UNDER WHICH NO KEY EMPLOYEE (OR FORMER KEY EMPLOYEE) BENEFITS FOR PLAN YEAR".

(2) Section 416(g)(3)(B) is amended by striking "separation from service" and inserting "severance from employment".

(l) AMENDMENTS RELATING TO SECTIONS 614 and 616 OF THE ACT.—

(1) Section 404(a)(12) is amended by striking "(9)," and inserting "(9) and subsection (h)(1)(C),".

(2) Section 404(n) is amended by striking "subsection (a)," and inserting "subsection (a) or paragraph (1)(C) of subsection (h)".

(3) Section 402(h)(2)(A) is amended by striking "15 percent" and inserting "25 percent".

(4) Section 404(a)(7)(C) is amended to read as follows:

"(C) PARAGRAPH NOT TO APPLY IN CERTAIN CASES.—

"(i) BENEFICIARY TEST.—This paragraph shall not have the effect of reducing the amount otherwise deductible under paragraphs (1), (2), and (3), if no employee is a beneficiary under more than 1 trust or under a trust and an annuity plan.

"(ii) ELECTIVE DEFERRALS.—If, in connection with 1 or more defined contribution plans and 1 or more defined benefit plans, no amounts (other than elective deferrals (as defined in section 402(g)(3))) are contributed to any of the defined contribution plans for the taxable year, then subparagraph (A) shall not apply with respect to any of such defined contribution plans and defined benefit plans.".

(m) AMENDMENT RELATING TO SECTION 618 OF THE ACT.—Section 25B(d)(2)(A) is amended to read as follows:

"(A) IN GENERAL.—The qualified retirement savings contributions determined under paragraph (1) shall be reduced (but not below zero) by the aggregate distributions received by the individual during the testing period from any entity of a type to which contributions under paragraph (1) may be made. The preceding sentence shall not apply to the portion of any distribution which is not includible in gross income by reason of a trustee-to-trustee transfer or a rollover distribution.".

(n) AMENDMENTS RELATING TO SECTION 619 OF THE ACT.—

(1) Section 45E(e)(1) is amended by striking "(n)" and inserting "(m)".

(2) Section 619(d) of the Economic Growth and Tax Relief Reconciliation Act of 2001 is amended by striking "established" and inserting "first effective".

(o) AMENDMENTS RELATING TO SECTION 631 OF THE ACT.—

(1) Section 402(g)(1) is amended by adding at the end the following:

"(C) CATCH-UP CONTRIBUTIONS.—In addition to subparagraph (A), in the case of an eligible participant (as defined in section 414(v)), gross income shall not include elective deferrals in excess of the applicable dollar amount under subparagraph (B) to the extent that the amount of such elective deferrals does not exceed the applicable dollar amount under section 414(v)(2)(B)(i) for the taxable year (without regard to the treatment of the elective deferrals by an applicable employer plan under section 414(v)).".

(2) Section 401(a)(30) is amended by striking "402(g)(1)" and inserting "402(g)(1)(A)".

(3) Section 414(v)(2) is amended by adding at the end the following:

"(D) AGGREGATION OF PLANS.—For purposes of this paragraph, plans described in clauses (i), (ii), and (iv) of paragraph (6)(A) that are maintained by the same employer (as determined under subsection (b), (c), (m) or (o)) shall be treated as a single plan, and plans described in clause (iii) of paragraph (6)(A) that are maintained by the same employer shall be treated as a single plan.".

(4) Section 414(v)(3)(A)(i) is amended by striking "section 402(g), 402(h), 403(b), 404(a), 404(h), 408(k), 408(p), 415, or 457" and inserting "section 401(a)(30), 402(h), 403(b), 408, 415(c), and 457(b)(2) (determined without regard to section 457(b)(3))".

(5) Section 414(v)(3)(B) is amended by striking "section 401(a)(4), 401(a)(26), 401(k)(3), 401(k)(11), 401(k)(12), 403(b)(12), 408(k), 408(p), 408B, 410(b), or 416" and inserting "section 401(a)(4), 401(k)(3), 401(k)(11), 403(b)(12), 408(k), 410(b), or 416".

(6) Section 414(v)(4)(B) is amended by inserting before the period at the end the following: ", except that a plan described in clause (i) of section 410(b)(6)(C) shall not be treated as a plan of the employer until the expiration of the transition period with respect to such plan (as determined under clause (ii) of such section)".

(7) Section 414(v)(5) is amended—

(A) by striking ", with respect to any plan year," in the matter preceding subparagraph (A),

(B) by amending subparagraph (A) to read as follows:

"(A) who would attain age 50 by the end of the taxable year,", and

(C) in subparagraph (B) by striking "plan year" and inserting "plan (or other applicable) year".

(8) Section 414(v)(6)(C) is amended to read as follows:

"(C) EXCEPTION FOR SECTION 457 PLANS.—This subsection shall not apply to a participant for any year for which a higher limitation applies to the participant under section 457(b)(3).".

(9) Section 457(e) is amended by adding at the end the following new paragraph:

"(18) COORDINATION WITH CATCH-UP CONTRIBUTIONS FOR INDIVIDUALS AGE 50 OR OLDER.— In the case of an individual who is an eligible participant (as defined by section 414(v)) and who is a participant in an eligible deferred compensation plan of an employer described in paragraph (1)(A), subsections (b)(3) and (c) shall be applied by substituting for the amount otherwise determined under the applicable subsection the greater of—

"(A) the sum of—

"(i) the plan ceiling established for purposes of subsection (b)(2) (without regard to subsection (b)(3)), plus

"(ii) the applicable dollar amount for the taxable year determined under section 414(v)(2)(B)(i), or

"(B) the amount determined under the applicable subsection (without regard to this paragraph).".

(p) AMENDMENTS RELATING TO SECTION 632 OF THE ACT.—

(1) Section 403(b)(1) is amended in the matter following subparagraph (E) by striking "then amounts contributed" and all that follows and inserting the following:

"then contributions and other additions by such employer for such annuity contract shall be excluded from the gross income of the employee for the taxable year to the extent that the aggregate of such contributions and additions (when expressed as an annual addition (within the meaning of section 415(c)(2))) does not exceed the applicable limit under section 415. The amount actually distributed to any distributee under such contract shall be taxable to the distributee (in the year in which so distributed) under section 72 (relating to annuities). For purposes of applying the rules of this subsection to contributions and other additions by an employer for a taxable year, amounts transferred to a contract described in this paragraph by reason of a rollover contribution described in paragraph (8) of this subsection or section 408(d)(3)(A)(ii) shall not be considered contributed by such employer.".

(2) Section 403(b) is amended by striking paragraph (6).

(3) Section 403(b)(3) is amended—

(A) in the first sentence by inserting the following before the period at the end: ", and which precedes the taxable year by no more than five years", and

(B) in the second sentence by striking "or any amount received by a former employee after the fifth taxable year following the taxable year in which such employee was terminated".

(4) Section 415(c)(7) is amended to read as follows:

"(7) SPECIAL RULES RELATING TO CHURCH PLANS.—

"(A) ALTERNATIVE CONTRIBUTION LIMITATION.—

"(i) IN GENERAL.—Notwithstanding any other provision of this subsection, at the election of a participant who is an employee of a church or a convention or association of churches, including an ofganization described in section 414(e)(3)(B)(ii), contributions and other additions for an annuity contract or retirement income account described in section 403(b) with respect to such participant, when expressed as an annual addition to such participant's account, shall be treated as not exceeding the limitation of paragraph (1) if such annual addition is not in excess of $10,000.

"(ii) $40,000 AGGREGATE LIMITATION.—The total amount of additions with respect to any participant which may be taken into account for purposes of this subparagraph for all years may not exceed $40,000.

"(B) NUMBER OF YEARS OF SERVICE FOR DULY ORDAINED, COMMISSIONED, OR LICENSED MINISTERS OR LAY EMPLOYEES.—For purposes of this paragraph—

"(i) all years of service by—

"(I) a duly ordained, commissioned, or licensed minister of a church, or

"(II) a lay person,

as an employee of a church, a convention or association of churches, including an organization described in section 414(e)(3)(B)(ii), shall be considered as years of service for 1 employer, and

"(ii) all amounts contributed for annuity contracts by each such church (or convention or association of churches) or such organization during such years for such minister or lay person shall be considered to have been contributed by 1 employer.

"(C) FOREIGN MISSIONARIES.—In the case of any individual described in subparagraph (D) performing services outside the United States, contributions and other additions for an annuity contract or retirement income account described in section 403(b) with respect to such employee, when expressed as an annual addition to such employee's account, shall not be treated as exceeding the limitation of paragraph (1) if such annual addition is not in excess of the greater of $3,000 or the employee's includible compensation determined under section 403(b)(3).

"(D) ANNUAL ADDITION.—For purposes of this paragraph, the term 'annual addition' has the meaning given such term by paragraph (2).

"(E) CHURCH, CONVENTION OR ASSOCIATION OF CHURCHES.—For purposes of this paragraph, the terms 'church' and 'convention or association of churches' have the same meaning as when used in section 414(e).".

(5) Section 457(e)(5) is amended to read as follows:

"(5) INCLUDIBLE COMPENSATION.—The term 'includible compensation' has the meaning given to the term 'participant's compensation' by section 415(c)(3).".

(6) Section 402(g)(7)(B) is amended by striking "2001." and inserting "2001).".

(q) AMENDMENTS RELATING TO SECTION 643 OF THE ACT.—

(1) Section 401(a)(31)(C)(i) is amended by inserting "is a qualified trust which is part of a plan which is a defined contribution plan and" before "agrees".

(2) Section 402(c)(2) is amended by adding at the end the following flush sentence:

"In the case of a transfer described in subparagraph (A) or (B), the amount transferred shall be treated as consisting first of the portion of such distribution that is includible in gross income (determined without regard to paragraph (1)).".

(r) AMENDMENTS RELATING TO SECTION 648 OF THE ACT.—

(1) Section 417(e) is amended—

(A) in paragraph (1) by striking "exceed the dollar limit under section 411(a)(11)(A)" and inserting "exceed the amount that can be distributed without the participant's consent under section 411(a)(11)", and

(B) in paragraph (2)(A) by striking "exceeds the dollar limit under section 411(a)(11)(A)" and inserting "exceeds the amount that can be distributed without the participant's consent under section 411(a)(11)".

(2) Section 205(g) of the Employee Retirement Income Security Act of 1974 is amended—

(A) in paragraph (1) by striking "exceed the dollar limit under section 203(e)(1)" and inserting "exceed the amount that can be distributed without the participant's consent under section 203(e)", and

(B) in paragraph (2)(A) by striking "exceeds the dollar limit under section 203(e)(1)" and inserting "exceeds the amount that can be distributed without the participant's consent under section 203(e)".

(s) AMENDMENT RELATING TO SECTION 652 OF THE ACT.—Section 404(a)(1)(D)(iv) is amended by striking "PLANS MAINTAINED BY PROFESSIONAL SERVICE EMPLOYERS" and inserting "SPECIAL RULE FOR TERMINATING PLANS".

(t) AMENDMENTS RELATING TO SECTION 657 OF THE ACT.—Section 404(c)(3) of the Employee Retirement Income Security Act of 1974 is amended—

(1) by striking "the earlier of" in subparagraph (A) the second place it appears, and

(2) by striking "if the transfer" and inserting "a transfer that".

(u) AMENDMENTS RELATING TO SECTION 659 OF THE ACT.—

(1) Section 4980F is amended—

(A) in subsection (e)(1) by striking "written notice" and inserting "the notice described in paragraph (2)",

(B) by amending subsection (f)(2)(A) to read as follows:

"(A) any defined benefit plan described in section 401(a) which includes a trust exempt from tax under section 501(a), or", and

(C) in subsection (f)(3) by striking "significantly" both places it appears.

(2) Section 204(h)(9) of the Employee Retirement Income Security Act of 1974 is amended by striking "significantly" both places it appears.

(3) Section 659(c)(3)(B) of the Economic Growth and Tax Relief Reconciliation Act of 2001 is amended by striking "(or" and inserting "(and".

(v) AMENDMENTS RELATING TO SECTION 661 OF THE ACT.—

(1) Section 412(c)(9)(B) is amended—

(A) in clause (ii) by striking "125 percent" and inserting "100 percent", and

(B) by adding at the end the following new clause:

"(iv) LIMITATION.—A change in funding method to use a prior year valuation, as provided in clause (ii), may not be made unless as of the valuation date within the prior plan year, the value of the assets of the plan are not less than 125 percent of the plan's current liability (as defined in paragraph (7)(B)).".

(2) Section 302(c)(9)(B) of the Employee Retirement Income Security Act of 1974 is amended—

(A) in clause (ii) by striking "125 percent" and inserting "100 percent", and

(B) by adding at the end the following new clause:

"(iv) A change in funding method to use a prior year valuation, as provided in clause (ii), may not be made unless as of the valuation date within the prior plan year, the value of the assets of the plan are not less than 125 percent of the plan's current liability (as defined in paragraph (7)(B)).".

(w) AMENDMENTS RELATING TO SECTION 662 OF THE ACT.—

(1) Section 404(k) is amended—

(A) in paragraph (1) by striking "during the taxable year",

(B) in paragraph (2)(B) by striking "(A)(iii)" and inserting "(A)(iv)",

(C) in paragraph (4)(B) by striking "(iii)" and inserting "(iv)", and

(D) by redesignating subparagraph (B) of paragraph (4) (as amended by subparagraph (C)) as subparagraph (C) of paragraph (4) and by inserting after subparagraph (A) the following new subparagraph:

"(B) REINVESTMENT DIVIDENDS.—For purposes of subparagraph (A), an applicable dividend reinvested pursuant to clause (iii)(II) of paragraph (2)(A) shall be treated as paid in the taxable year of the corporation in which such dividend is reinvested in qualifying employer securities or in which the election under clause (iii) of paragraph (2)(A) is made, whichever is later.".

(2) Section 404(k) is amended by adding at the end the following new paragraph:

"(7) FULL VESTING.—In accordance with section 411, an applicable dividend described in clause (iii)(II) of paragraph (2)(A) shall be subject to the requirements of section 411(a)(1).".

(x) EFFECTIVE DATE.—Except as provided in subsection (c), the amendments made by this section shall take effect as if included in the provisions of the Economic Growth and Tax Relief Reconciliation Act of 2001 to which they relate.

SEC. 412. AMENDMENTS RELATED TO COMMUNITY RENEWAL TAX RELIEF ACT OF 2000.

(a) AMENDMENT RELATED TO SECTION 101 OF THE ACT.—Section 469(i)(3)(E) is amended by striking clauses (ii), (iii), and (iv) and inserting the following:

"(ii) second to the portion of such loss to which subparagraph (C) applies,

"(iii) third to the portion of the passive activity credit to which subparagraph (B) or (D) does not apply,

"(iv) fourth to the portion of such credit to which subparagraph (B) applies, and".

(b) AMENDMENT RELATED TO SECTION 306 OF THE ACT.—Section 151(c)(6)(C) is amended—

(1) by striking "FOR EARNED INCOME CREDIT.—For purposes of section 32, an" and inserting "FOR PRINCIPAL PLACE OF ABODE REQUIREMENTS.—An", and

(A) in the heading, by striking "SECURITIES.—" and inserting "SECURITIES AND SECURITIES FUTURES CONTRACTS TO SELL.—",

(B) by inserting after "closing of a short sale of" the following: "(or the sale, exchange, or termination of a securities futures contract to sell)",

(C) in paragraph (2), by inserting after "short sale of" the following: "(or securities futures contracts to sell)", and

(D) by adding at the end the following:

"For purposes of this subsection, the term 'securities futures contract' has the meaning provided by section 1234B(c).".

(3)(A) Section 1233(e)(2) is amended by striking "and" at the end of subparagraph (C), by striking the period and inserting "; and" at the end of subparagraph (D), and inserting after subparagraph (D) the following:

"(E) entering into a securities futures contract (as so defined) to sell shall be considered to be a short sale, and the settlement of such contract shall be considered to be the closing of such short sale.".

(B) Section 1234B(b) is amended by inserting after "or this section," the following: "or in section 1233,"

(e) EFFECTIVE DATE.—The amendments made by this section shall take effect as if included in the provisions of the Community Renewal Tax Relief Act of 2000 to which they relate.

SEC. 413. AMENDMENTS RELATED TO THE TAX RELIEF EXTENSION ACT OF 1999.

(a) AMENDMENTS RELATED TO SECTION 545 OF THE ACT.—Section 857(b)(7) is amended—

(1) in clause (i) of subparagraph (B), by striking "the amount of which" and inserting "to the extent the amount of the rents", and

(2) in subparagraph (C), by striking "if the amount" and inserting "to the extent the amount".

(b) EFFECTIVE DATE.—The amendments made by this section shall take effect as if included in section 545 of the Tax Relief Extension Act of 1999.

SEC. 414. AMENDMENTS RELATED TO THE TAXPAYER RELIEF ACT OF 1997.

(a) AMENDMENTS RELATED TO SECTION 311 OF THE ACT.—Section 311(e) of the Taxpayer Relief Act of 1997 (Public Law 105–34; 111 Stat. 836) is amended—

(1) in paragraph (2)(A), by striking "recognized" and inserting "included in gross income", and

(2) by adding at the end the following new paragraph:

"(5) DISPOSITION OF INTEREST IN PASSIVE ACTIVITY.—Section 469(g)(1)(A) of the Internal Revenue Code of 1986 shall not apply by reason of an election made under paragraph (1).".

(b) EFFECTIVE DATE.—The amendments made by this section shall take effect as if included in section 311 of the Taxpayer Relief Act of 1997.

SEC. 415. AMENDMENT RELATED TO THE BALANCED BUDGET ACT OF 1997.

(a) AMENDMENT RELATED TO SECTION 4006 OF THE ACT.—Section 26(b)(2) is amended by striking "and" at the end of subparagraph (P), by striking the period and inserting ", and" at the end of subparagraph (Q), and by adding at the end the following new subparagraph:

"(R) section 138(c)(2) (relating to penalty for distributions from Medicare+Choice MSA not used for qualified medical expenses if minimum balance not maintained).".

(b) EFFECTIVE DATE.—The amendment made by this section shall take effect as if included in section 4006 of the Balanced Budget Act of 1997.

SEC. 416. OTHER TECHNICAL CORRECTIONS.

(a) COORDINATION OF ADVANCED PAYMENTS OF EARNED INCOME CREDIT.—

(1) Section 32(g)(2) is amended by striking "subpart" and inserting "part".

(2) The amendment made by this subsection shall take effect as if included in section 474 of the Tax Reform Act of 1984.

(b) SPECIAL RULE RELATED TO WASH SALE LOSSES.—

(1) Section 1256(f) is amended by adding at the end the following new paragraph:

"(5) SPECIAL RULE RELATED TO LOSSES.—Section 1091 (relating to loss from wash sales of stock or securities) shall not apply to any loss taken into account by reason of paragraph (1) of subsection (a).".

(2) The amendment made by this subsection shall take effect as if included in section 5075 of the Technical and Miscellaneous Revenue Act of 1988.

(c) DISCLOSURE BY SOCIAL SECURITY ADMINISTRATION TO FEDERAL CHILD SUPPORT AGENCIES.—

(1) Section 6103(l)(8) is amended—

(A) in the heading, by striking "STATE AND LOCAL" and inserting "FEDERAL, STATE, AND LOCAL", and

(B) in subparagraph (A), by inserting "Federal or" before "State or local".

(2) The amendments made by this subsection shall take effect on the date of the enactment of this Act.

(d) TREATMENT OF SETTLEMENTS UNDER PARTNERSHIP AUDIT RULES.—

(1) The following provisions are each amended by inserting "or the Attorney General (or his delegate)" after "Secretary" each place it appears:

(A) Paragraphs (1) and (2) of section 6224(c).

(B) Section 6229(f)(2).

(C) Section 6231(b)(1)(C).

(D) Section 6234(g)(4)(A).

(2) The amendments made by this subsection shall apply with respect to settlement agreements entered into after the date of the enactment of this Act.

(e) Amendment Related to Procedure and Administration.—

(1) Section 6331(k)(3) (relating to no levy while certain offers pending or installment agreement pending or in effect) is amended to read as follows:

“(3) Certain rules to apply.—Rules similar to the rules of—

“(A) paragraphs (3) and (4) of subsection (i), and

“(B) except in the case of paragraph (2)(C), paragraph (5) of subsection (i),

shall apply for purposes of this subsection.”.

(2) The amendment made by this subsection shall take effect on the date of the enactment of this Act.

(f) Modified Endowment Contracts.—Paragraph (2) of section 318(a) of the Community Renewal Tax Relief Act of 2000 (114 Stat. 2763A–645) is repealed, and clause (ii) of section 7702A(c)(3)(A) shall read and be applied as if the amendment made by such paragraph had not been enacted.

SEC. 417. CLERICAL AMENDMENTS.

(1) The subsection (g) of section 25B that relates to termination is redesignated as subsection (h).

(2) The second sentence of section 42(h)(3)(C) is amended by striking “the amounts described in” and all that follows through the period and inserting “the amounts described in clauses (ii) through (iv) over the aggregate housing credit dollar amount allocated for such year.”

(3) Clause (ii) of section 42(m)(1)(B) is amended by striking the second “and” at the end of subclause (II) and by inserting “and” at the end of subclause (III).

(4) Section 51A(c)(1) is amended by striking “51(d)(10)” and inserting “51(d)(11)”.

(5) The flush sentence at the end of clause (ii) of section 56(a)(1)(A) is amended by striking “such 1250” and inserting “such section 1250”.

(6) Section 151(c)(6)(B)(iii) is amended by inserting “as” before “such terms”.

(7) Section 170(e)(6)(B)(i)(III) is amended by striking “2000,” and inserting “2000),”.

(19)(A) Section 6227(d) is amended by striking “subsection (b)” and inserting “subsection (c)”.

(B) Section 6228 is amended—

(i) in subsection (a)(1), by striking “subsection (b) of section 6227” and inserting “subsection (c) of section 6227”,

(ii) in subsection (a)(3)(A), by striking “subsection (b) of”, and

(iii) in subsections (b)(1) and (b)(2)(A), by striking “subsection (c) of section 6227” and inserting “subsection (d) of section 6227”.

(C) Section 6231(b)(2)(B)(i) is amended by striking “section 6227(c)” and inserting “section 6227(d)”.

(20) Section 1221(b)(1)(B)(i) is amended by striking “1256(b))” and inserting “1256(b)))”.

(21) Section 159 of the Community Renewal Tax Relief Act of 2000 (114 Stat. 2763A–624) is amended by striking “fuctions” and inserting “functions”.

(22) The amendment to section 170(e)(6)(B)(iv) made by section 165(b)(1) of the Community Renewal Tax Relief Act of 2000 (114 Stat. 2763A–626) shall be applied as if it struck “in any of the grades K–12”.

(23) Section 618(b)(2) of the Economic Growth and Tax Relief Reconciliation Act of 2001 (Public Law 107–16; 115 Stat. 108) is amended—

(A) in subparagraph (A) by striking “203(d)” and inserting “202(f)”, and

(B) in subparagraphs (C), (D), and (E) by striking “203” and inserting “202(f)”.

(24)(A) Section 525 of the Ticket to Work and Work Incentives Improvement Act of 1999 (Public Law 106–170; 113 Stat. 1928) is amended by striking “7200” and inserting “7201”.

(B) Section 532(c)(2) of such Act (113 Stat. 1930) is amended—

(i) in subparagraph (D), by striking “341(d)(3)” and inserting “341(d)”, and

(ii) in subparagraph (Q), by striking “954(c)(1)(B)(iii) and inserting “954(c)(1)(B)”.

SEC. 418. ADDITIONAL CORRECTIONS.

(a) Amendments Related to Section 202 of the Economic Growth and Tax Relief Reconciliation Act of 2001.—

(1) Subsection (h) of section 23 is amended—

(A) by striking “subsection (a)(1)(B)” and inserting “subsection (a)(3)”, and

(B) by adding at the end the following new flush sentence:

“If any amount as increased under the preceding sentence is not a multiple of $10, such amount shall be rounded to the nearest multiple of $10.”

(2) Subsection (f) of section 137 is amended by adding at the end the following new flush sentence:

“If any amount as increased under the preceding sentence is not a multiple of $10, such amount shall be rounded to the nearest multiple of $10.”

(b) Amendments Related to Section 204 of the Economic Growth and Tax Relief Reconciliation Act of 2001.—Section 21(d)(2) is amended—

(1) in subparagraph (A) by striking “$200” and inserting “$250”, and

(2) in subparagraph (B) by striking “$400” and inserting “$500”.

(c) Effective Date.—The amendments made by this section shall take effect as if included in the provisions of the Economic Growth and Tax Relief Reconciliation Act of 2001 to which they relate.

TITLE V—SOCIAL SECURITY HELD HARMLESS; BUDGETARY TREATMENT OF ACT

SEC. 501. NO IMPACT ON SOCIAL SECURITY TRUST FUNDS.

(a) In General.—Nothing in this Act (or an amendment made by this Act) shall be construed to alter or amend title II of the Social Security Act (or any regulation promulgated under that Act).

(b) Transfers.—

(1) Estimate of secretary.—The Secretary of the Treasury shall annually estimate the impact that the enactment of this Act has on the income and balances of the trust funds established under section 201 of the Social Security Act (42 U.S.C. 401).

(2) Transfer of funds.—If, under paragraph (1), the Secretary of the Treasury estimates that the enactment of this Act has a negative impact on the income and balances of the trust funds established under section 201 of the Social Security Act (42 U.S.C. 401), the Secretary shall transfer, not less frequently than quarterly, from the general revenues of the Federal Government an amount sufficient so as to ensure that the income and balances of such trust funds are not reduced as a result of the enactment of this Act.

SEC. 502. EMERGENCY DESIGNATION.

Congress designates as emergency requirements pursuant to section 252(e) of the Balanced Budget and Emergency Deficit Control Act of 1985 the following amounts:

(1) An amount equal to the amount by which revenues are reduced by this Act below the recommended levels of Federal revenues for fiscal year 2002, the total of fiscal years 2002 through 2006, and the total of fiscal years 2002 through 2011, provided in the conference report accompanying H. Con. Res. 83, the concurrent resolution on the budget for fiscal year 2002.

(2) Amounts equal to the amounts of new budget authority and outlays provided in this Act in excess of the allocations under section 302(a) of the Congressional Budget Act of 1974 to the Committee on Finance of the Senate for fiscal year 2002, the total of fiscal years 2002 through 2006, and the total of fiscal years 2002 through 2011.

TITLE VI—EXTENSIONS OF CERTAIN EXPIRING PROVISIONS

SEC. 601. ALLOWANCE OF NONREFUNDABLE PERSONAL CREDITS AGAINST REGULAR AND MINIMUM TAX LIABILITY.

(a) In General.—Paragraph (2) of section 26(a) is amended—

(1) by striking “RULE FOR 2000 AND 2001.—” and inserting “RULE FOR 2000, 2001, 2002, AND 2003.—”, and

(2) by striking “during 2000 or 2001,” and inserting “during 2000, 2001, 2002, or 2003,”.

(b) Conforming Amendments.—

(1) Section 904(h) is amended by striking “during 2000 or 2001” and inserting “during 2000, 2001, 2002, or 2003”.

(2) The amendments made by sections 201(b), 202(f), and 618(b) of the Economic Growth and Tax Relief Reconciliation Act of 2001 shall not apply to taxable years beginning during 2002 and 2003.

(c) Effective Date.—The amendments made by this section shall apply to taxable years beginning after December 31, 2001.

SEC. 602. CREDIT FOR QUALIFIED ELECTRIC VEHICLES.

(a) In General.—Section 30 is amended—

(1) in subsection (b)(2)—

(A) by striking "December 31, 2001," and inserting "December 31, 2003,", and

(B) in subparagraphs (A), (B), and (C), by striking "2002", "2003", and "2004", respectively, and inserting "2004", "2005", and "2006", respectively, and

(2) in subsection (e), by striking "December 31, 2004" and inserting "December 31, 2006".

(b) Conforming Amendments.—

(1) Subparagraph (C) of section 280F(a)(1) is amended by adding at the end the following new clause:

"(iii) Application of subparagraph.—This subparagraph shall apply to property placed in service after August 5, 1997, and before January 1, 2007.".

(2) Subsection (b) of section 971 of the Taxpayer Relief Act of 1997 is amended by striking "and before January 1, 2005".

(c) Effective Date.—The amendments made by this section shall apply to property placed in service after December 31, 2001.

SEC. 603. CREDIT FOR ELECTRICITY PRODUCED FROM CERTAIN RENEWABLE RESOURCES.

(a) In General.—Subparagraphs (A), (B), and (C) of section 45(c)(3) are both amended by striking "2002" and inserting "2004".

(b) Effective Date.—The amendments made by subsection (a) shall apply to facilities placed in service after December 31, 2001.

SEC. 604. WORK OPPORTUNITY CREDIT.

(a) In General.—Subparagraph (B) of section 51(c)(4) is amended by striking "2001" and inserting "2003".

(b) Effective Date.—The amendment made by subsection (a) shall apply to individuals who begin work for the employer after December 31, 2001.

SEC. 605. WELFARE-TO-WORK CREDIT.

(a) In General.—Subsection (f) of section 51A is amended by striking "2001" and inserting "2003".

(b) Effective Date.—The amendment made by subsection (a) shall apply to individuals who begin work for the employer after December 31, 2001.

SEC. 606. DEDUCTION FOR CLEAN-FUEL VEHICLES AND CERTAIN REFUELING PROPERTY.

(a) In General.—Section 179A is amended—

(1) in subsection (b)(1)(B)—

(A) by striking "December 31, 2001," and inserting "December 31, 2003,", and

(B) in clauses (i), (ii), and (iii), by striking "2002", "2003", and "2004", respectively, and inserting "2004", "2005", and "2006", respectively, and

(2) in subsection (f), by striking "December 31, 2004" and inserting "December 31, 2006".

(b) Effective Date.—The amendments made by subsection (a) shall apply to property placed in service after December 31, 2001.

SEC. 607. TAXABLE INCOME LIMIT ON PERCENTAGE DEPLETION FOR OIL AND NATURAL GAS PRODUCED FROM MARGINAL PROPERTIES.

(a) In General.—Subparagraph (H) of section 613A(c)(6) is amended by striking "2002" and inserting "2004".

(b) Effective Date.—The amendment made by subsection (a) shall apply to taxable years beginning after December 31, 2001.

SEC. 608. QUALIFIED ZONE ACADEMY BONDS.

(a) In General.—Paragraph (1) of section 1397E(e) is amended by striking "2000, and 2001" and inserting "2000, 2001, 2002, and 2003".

(b) Effective Date.—The amendment made by subsection (a) shall apply to obligations issued after the date of the enactment of this Act.

SEC. 609. COVER OVER OF TAX ON DISTILLED SPIRITS.

(a) In General.—Paragraph (1) of section 7652(f) is amended by striking "January 1, 2002" and inserting "January 1, 2004".

(b) Effective Date.—The amendment made by subsection (a) shall apply to articles brought into the United States after December 31, 2001.

SEC. 610. PARITY IN THE APPLICATION OF CERTAIN LIMITS TO MENTAL HEALTH BENEFITS.

(a) In General.—Subsection (f) of section 9812, as amended by the Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 2002, is amended to read as follows:

"(f) Application of Section.—This section shall not apply to benefits for services furnished—

"(1) on or after September 30, 2001, and before January 10, 2002, and

"(2) after December 31, 2003.".

(b) Effective Date.—The amendment made by subsection (a) shall apply to plan years beginning after December 31, 2000.

SEC. 611. TEMPORARY SPECIAL RULES FOR TAXATION OF LIFE INSURANCE COMPANIES.

(a) Reduction in Mutual Life Insurance Company Deductions Not To Apply in Certain Years.—Section 809 (relating to reduction in certain deductions of material life insurance companies) is amended by adding at the end the following:

"(j) Differential Earnings Rate Treated as Zero for Certain Years.—Notwithstanding subsection (c) or (f), the differential earnings rate shall be treated as zero for purposes of computing both the differential earnings amount and the recomputed differential earnings amount for a mutual life insurance company's taxable years beginning in 2001, 2002, or 2003.".

(b) Effective Date.—The amendment made by this section shall apply to taxable years beginning after December 31, 2000.

SEC. 612. AVAILABILITY OF MEDICAL SAVINGS ACCOUNTS.

(a) In General.—Paragraphs (2) and (3)(B) of section 220(i) (defining cut-off year) are each amended by striking "2002" each place it appears and inserting "2003".

(b) Conforming Amendments.—

(1) Paragraph (2) of section 220(j) is amended by striking "1998, 1999, or 2001" each place it appears and inserting "1998, 1999, 2001, or 2002".

(2) Subparagraph (A) of section 220(j)(4) is amended by striking "and 2001" and inserting "2001, and 2002".

(c) Effective Date.—The amendments made by this section shall take effect on January 1, 2002.

SEC. 613. INCENTIVES FOR INDIAN EMPLOYMENT AND PROPERTY ON INDIAN RESERVATIONS.

(a) Employment.—Subsection (f) of section 45A is amended by striking "December 31, 2003" and inserting "December 31, 2004".

SEC. 614. SUBPART F EXEMPTION FOR ACTIVE FINANCING.

(a) In General.—

(1) Section 953(e)(10) is amended—

(A) by striking "January 1, 2002" and inserting "January 1, 2007", and

(B) by striking "December 31, 2001" and inserting "December 31, 2006".

(2) Section 954(h)(9) is amended by striking "January 1, 2002" and inserting "January 1, 2007".

(b) Life Insurance and Annuity Contracts.—

(1) In general.—Subparagraph (B) of section 954(i)(4) is amended to read as follows:

"(B) Life insurance and annuity contracts.—

"(i) In general.—Except as provided in clause (ii), the amount of the reserve of a qualifying insurance company or qualifying insurance company branch for any life insurance or annuity contract shall be equal to the greater of—

"(I) the net surrender value of such contract (as defined in section 807(e)(1)(A)), or

"(II) the reserve determined under paragraph (5).

"(ii) Ruling request, etc.—The amount of the reserve under clause (i) shall be the foreign statement reserve for the contract (less any catastrophe, deficiency, equalization, or similar reserves), if, pursuant to a ruling request submitted by the taxpayer or as provided in published guidance, the Secretary determines that the factors taken into account in determining the foreign statement reserve provide an appropriate means of measuring income.".

(c) Effective Date.—The amendments made by this section shall apply to taxable years beginning after December 31, 2001.

SEC. 615. REPEAL OF REQUIREMENT FOR APPROVED DIESEL OR KEROSENE TERMINALS.

(a) In General.—Subsection (e) of section 4101 is hereby repealed.

(b) Effective Date.—The amendment made by subsection (a) shall take effect on January 1, 2002.

SEC. 616. REAUTHORIZATION OF TANF SUPPLEMENTAL GRANTS FOR POPULATION INCREASES FOR FISCAL YEAR 2002.

Section 403(a)(3) of the Social Security Act (42 U.S.C. 603(a)(3)) is amended by adding at the end the following:

"(H) Reauthorization of grants for fiscal year 2002.—Notwithstanding any other provision of this paragraph—

"(i) any State that was a qualifying State under this paragraph for fiscal year 2001 or any prior fiscal year shall be entitled to receive from the Secretary for fiscal year 2002 a grant in an amount equal to the amount required to be paid to the State under this paragraph for the most recent fiscal year in which the State was a qualifying State;

"(ii) subparagraph (G) shall be applied as if '2002' were substituted for '2001'; and

"(iii) out of any money in the Treasury of the United States not otherwise appropriated, there are appropriated for fiscal year 2002 such sums as are necessary for grants under this subparagraph.".

SEC. 617. 1-YEAR EXTENSION OF CONTINGENCY FUND UNDER THE TANF PROGRAM.

Section 403(b) of the Social Security Act (42 U.S.C. 603(b)) is amended—

(1) in paragraph (2), by striking "and 2001" and inserting "2001, and 2002"; and

(2) in paragraph (3)(C)(ii), by striking "2001" and inserting "2002".

The SPEAKER pro tempore. Pursuant to House Resolution 360, the gentleman from California (Mr. Thomas) and the gentleman from New York (Mr. Rangel) each will control 30 minutes.

The Chair recognizes the gentleman from California (Mr. Thomas).

Mr. THOMAS. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, this morning one of the things that we really need to establish in this package, that we hope the

Senate will take up relatively quickly and pass without trying to amend so that we can send to the President a package which extends unemployment and which produces a modest assistance, as Chairman Greenspan indicated, perhaps a little bit of insurance to make sure that the economy moves forward.

One of the things that needs to be understood from the beginning is this is not a stimulus package. When you have an economy that generates $10 trillion a year, $41 billion over 10 years in no way can be called a stimulus. For example, the underlying bill, H.R. 3090, which the Senate amended and sent back to us which the House sent to the Senate in October was a stimulus bill. It generated $160 billion worth of assistance to individuals and to businesses over a 10-year period. The other body killed that bill. The leadership over there decided that they did not want a stimulus.

I will admit it took us a little while to fully appreciate the fact that they did not want a stimulus package to help the economy recover. We sent them three adjusted bills. We did not send the same thing each time. We examined the package. We made adjustments. We searched forever, as a governing majority is supposed to do, for something that would reach agreement; and today we have in front of us what we believe certainly should and hopefully will reach agreement.

Just several weeks ago, my colleagues on the other side of the aisle were imploring us to just pass what the Senate sent us. To remind Members of what it was the Senate sent us, it was naked, the most minimal unemployment package, irreducibly minimum, and that is what the Senate could do. And we were urged by our colleagues on the other side of the aisle, why do we not take that up and pass it? That is all we can do. That is all we should do, and we should do it now.

I am pleased to say that we are not just doing that. I think today the House will pass a package which certainly cannot in any way be called a stimulus but is certainly not the irreducible minimum, almost the affront to Americans that was contained in the Senate-passed package and which was urged to be adopted by us by our friends on the other side of the aisle.

To give Members an idea of how a number of folks have not been able to understand what is going on, I would offer today's Washington Post which begins with the headline "House GOP Relents In Fight Over Stimulus."

No, we are not relenting. We have conceded that the Senate leadership has been able to kill stimulus. They have succeeded. So we are not relenting. Ironically, it goes on in the very first paragraph that says that the bill, that we have agreed to legislation "that will focus largely on new benefits for unemployed workers." Will focus largely on benefits for unemployed workers.

The bill is $41 billion over 10 years. Over that 10-year period, out of the $41 billion, $2.7 billion is for unemployed. The $38 billion remainder is for reduction of taxes to small business, medium business, job-creating provisions. And only the Washington Post could say that 7 percent of something is largely focused on. That shows you how far off the Washington Post is.

It then goes on and says that the bill closely tracks a Senate proposal to provide unemployment. No, it does not closely track a Senate proposal. It is far better than the Senate proposal. The proposal we have for unemployment benefits not only provides the 13 weeks and uses a trigger for those benefits lower than current law, but it says if a State continues to match the 4 percent trigger rather than the 5 plus trigger in the current law, the 4 percent is President Bush's request to utilize as a trigger, and we thought that was appropriate. But if you run out of your initial 13 weeks and your State still has greater than 4 percent unemployment, there is an automatic trigger of an additional 13 weeks; and if you run out of those 13 weeks and your State finds itself above the 4 percent unemployment rate, there is an automatic trigger, et cetera, et cetera, et cetera.

What we are trying to do is to make sure that the Senate cannot continue to hold hostage unemployment insurance benefits for those who through no fault of their own cannot find employment. We sent the Senate a package in October, and here we are in March debating. Our hope is when this passes by a large bipartisan vote the Senate will take this up and send it to the President, because the House's unemployment proposal says, once we do this, it is on automatic trigger. If the conditions are there, it will be renewed automatically. The Senate does not do that.

So how in the world somebody could say that this closely tracks the Senate is beyond me. Of course, and unless what they want to do is to make it look like the Republicans in the House have "relented."

Now, obviously, there is a motive for doing that. But, most importantly, the motive should be that we help people in need, that we make sure that we create a bridge. We do a modest insurance package for growth in this economy so we can recover. I cannot believe that anyone carried out the kind of stalling tactics that occurred over on the Senate side in the hopes that the economy would stumble or that the economy would not recover as rapidly as it otherwise would, and I hope no one stands in the way of this modest package or amends it over in the Senate to try to make a point from the leadership's side over in the Senate that we want our fingerprints all over this or we want to delay any longer.

The time for delay is over. The time for passage is here, today in the House, tomorrow at the latest in the Senate, so that we can get this measure to the President and let him sign it. It is about time.

Madam Speaker, I reserve the balance of my time.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair would remind all Members that during the course of this debate Members should refrain from characterizing Senate action or inaction and should refrain from urging Senate action.

Mr. RANGEL. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, let me take advantage of this rare opportunity when I agree with the chairman of the Ways and Means Committee. I would like to get his attention for a moment so that I give him his usual opportunity to respond. I am so desperately trying so hard to get the gentleman from California's (Mr. THOMAS) attention. It is so difficult.

I just wanted the gentleman to know that I agree with him that the Washington Post is in serious error in suggesting that the Republicans in the House of Representatives have relented.

□ 1115

The Republicans do not know how to relent. The hostages of those 8 million people who are unemployed and without health benefits have not been freed completely by the Republican leadership. As the gentleman pointed out, he could not resist putting tax benefits that in the first 3 years cost some $100 billion, or as the gentleman pointed out, a projected $43 billion.

The glee that the gentleman takes in suggesting that we are only providing $2.7 billion for the unemployed as opposed to the incentives that we are paying for the corporate structure. No, he is not relenting; he is responding to the outrage that has been felt by people throughout this country that since 9–11 the gentleman has ignored the people who are unemployed. The gentleman has taken their pain, their misery, their loss of homes and jobs and dreams and tuition, and he has put this into what the gentleman calls a stimulus package.

Now, the stimulus package always included not relieving pain for the unemployed but always accelerating tax benefits for the rich, or repealing the alternative minimum tax or something that had nothing to do with those victims that were unemployed. So when my colleague suggests that it is the other body that has loaded up the bill, what, are we in Alice in Wonderland? Did we not just get a bill from them passed by Republicans and Senators saying to just do employment compensation? My colleague could not resist jumping on that with all of the things that make the Republican Campaign Committee happy.

So I agree with the gentleman from California (Mr. THOMAS), this is not a stimulus package, nor should the unemployed be held hostage by so-called stimulus tax cuts. The ratio of tax benefits to the corporation and easing a little pain to the unemployed, my God, would let us know there is not too much compassion here. Will we grab this and run with it, even though it is not paid for? Well, it is paid for out of the monies coming in from the Social Security Trust Fund, but we do not have that many options, considering the box that the leadership has placed us in as relates to the spend-down of the surplus.

So, let the record reflect that I agree with most all that the gentleman has said. This is not a stimulus package. The GOP, as my colleague likes it to be called, does not know how to relent. There is an area of some tiny relief here for the unemployed. The gentleman had to resist giving some decent health benefits to this, and the fact that it is not paid for, so what else is new?

Madam Speaker, I ask unanimous consent to allow the gentleman from California (Mr. MATSUI) to manage the remainder of my time.

The SPEAKER pro tempore (Mrs. EMERSON). Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. THOMAS. Madam Speaker, I yield myself such time as I may consume. And if my colleague from New York would not rapidly leave the Chamber, what I would have responded to him was that perhaps he forgets back in September, on the trade adjustment assistance package, the House placed more than $2 billion available for those individuals who lost their jobs in relation to the tragic events of September 11. Notwithstanding the fact it was on trade adjustment, we said that would be handled in the same fashion.

When the gentleman talks about relieving the pain of the unemployed, he focuses on unemployment payments, as though being more generous on unemployment payments is how he relieves the pain of the unemployed. What the President so eloquently said in his State of the Union was that what this is all about is jobs. And the last time I checked, if we want to be an employee, we need to have an employer.

What he calls benefits to the rich and the corporations, anybody else, who understands how this economy works, would say we are trying to create jobs. And when he says we do not have compassion for the unemployed, this sounds like a repeat of the welfare debate when they considered compassion holding people hostage to government payments. That is compassion? We believe compassion is making sure the economy grows so that people can have a job and have the dignity and respect of having a job, instead of making sure that we tie them to unemployment payments so we can show how compassionate we are in relieving the pain of unemployment by giving them a government check.

I think that pretty well draws the line between the President and our approach to trying to deal with these issues and our friends on the other side of the aisle. They define compassion as a government check, they define taking care of the pain of the unemployed by giving them more government money, and we define it as growing the economy, creating jobs and letting people have the dignity of work. That is real compassion for those who, through no fault of their own, have no job at the present time.

Madam Speaker, I reserve the balance of my time.

Mr. MATSUI. Madam Speaker, I yield myself such time as I may consume to just point out to the Members that the gentleman from New York (Mr. RANGEL) is leaving not as a sign of discourtesy to the Chair, but he has been summoned to the White House to talk about some of the New York issues. He is meeting with the President. In fact, he is a little late at this moment. So he does wish that people understand that he is leaving for the purpose of meeting with the President.

Madam Speaker, I yield 2 minutes to the distinguished gentlewoman from the State of Connecticut (Ms. DELAURO).

Ms. DELAURO. Madam Speaker, at last, 6 months after the September 11 attacks, with a damaged and already troubled economy, the House is poised to extend unemployment benefits for workers in this great Nation who have lost their jobs through no fault of their own. At last.

For 6 months, Democrats have stood firm on a plan that was one part good economics and one part basic human decency. The Republican leadership balked. They have equivocated, squirmed; and they have shifted in their seats at the mere mention of passing a bill that extended unemployment benefits and health care benefits for workers of this country, something that this Nation has done historically in difficult times in our country.

And they were opposed to doing this if the bill did not include corporate tax handouts for the largest corporations, for the Enrons of the world. Since that time, over a million and a half people have seen their unemployment benefits expire. In fact, just yesterday the House was ready to consider a fourth sham bill that again had no chance of making it to the President's desk. And since that time, another 11,000 Americans have lost their benefits.

Well, my friends, time ran out on the Republican House leadership. And just as we witnessed their misguided approach to airline security last November, their stubborn effort to defy the will of the American people has again ended in defeat; a defeat for the Republicans, but, albeit belatedly, a victory for American workers.

Now, what we need to do is to undertake the effort to make sure that those who have suffered unemployment and who have lost their health benefits that what we will do is to work to make sure that we assist them and our States to provide them with the opportunity to include people who have lost their jobs and their health benefits to get those benefits. It is about time.

Mr. THOMAS. Madam Speaker, it is my pleasure to yield 1 minute to the gentleman from New York (Mr. HOUGHTON), a valued member of the Committee on Ways and Means.

Mr. HOUGHTON. Madam Speaker, first of all, I would like to thank the gentleman from California (Mr. THOMAS) for all the work he has done, and I thank the gentleman from California (Mr. MATSUI); but the chairman of the committee has been extraordinary in hanging with this program and trying to get something we could vote on.

Look, there are lots of different things, and I will not go through the litany in terms of unemployment provisions and in terms of helping small businesses, because the thing I would like to do is just say thank the gentleman to the gentleman on behalf of New York, on behalf of the liberty zone, on behalf of all those people who need your help. And that is the only thing I have to say today.

Mr. MATSUI. Madam Speaker, I yield 2 minutes to the distinguished gentlewoman from Ohio (Mrs. JONES).

Mrs. JONES of Ohio. Madam Speaker, today, we finally have an opportunity to do something for the worker. I can remember back in September talking about the airline security bill and talking about the fact that many of my family members are employed in the airline industry, my father having carried bags for United Airlines for some 38 years. And every time I go through that airport, I see these men who have been carrying bags for years making $2 an hour, and unable to get tips to supplement their families and help their families. But the discussion kept going on: we are going to help the workers, we are going to help the workers, we are going to help the workers. Well, finally, we are doing that.

And unlike some who say that we as Democrats see compassion as an unemployment check, I do not see compassion as an unemployment check. I see compassion that we ought to exhibit all during this year and years to come as Members of the House: compassion for affordable housing for people who cannot afford housing, compassion for people who need health care, who cannot afford a health care credit. Because if I do not have any money, I cannot pay for health care and then get a credit. I see compassion as giving opportunities for people to have a job at a living wage and have a job where they can work and get a health care benefit that they do not then have to pay for.

I understand compassion. I see compassion. And I am not going to give support of business to the Republican Party, because Democrats support business. I serve on the Committee on Small Business, and I am here to help business. But we cannot help business and not help the workers who help to build the business. I am glad for workers. Thank God we have got unemployment compensation.

Mr. THOMAS. Madam Speaker, I yield myself such time as I may consume.

Ms. DUNN. Madam. Speaker, will the gentleman yield for a colloquy?

Mr. THOMAS. I yield to the gentlewoman from Washington.

Ms. DUNN. Madam Speaker, I appreciate this legislation. It is going to do great things for the State of Washington, which is the second highest in unemployment in the Nation right now.

Mr. Chairman, I want to clarify a couple of points, that dislocated workers in Washington State will receive the following benefits in this order:

First, the regular State benefits of up to 30 weeks; second, the regular 50–50 shared Federal and State extended benefits up to 13 weeks, that the Governor can elect to suspend; third, the 13-week extended benefits, fully paid for by the Federal Government; and, fourth, States with high unemployment rates, like Washington State at 7.5 percent, would be eligible for an additional 13 weeks, fully paid by the Federal Government; and lastly, fifth, once all these resources are exhausted, displaced workers in Washington State will be eligible to use state-funded benefits already available under State law. Is that the gentleman's understanding?

Mr. THOMAS. Madam Speaker, reclaiming my time, I tell the gentlewoman that that is my understanding. That is the way we intended to write the legislation, and in conferring with the Department of Labor, they have indicated to us that that is the appropriate interpretation. However, we will insist on a letter from the Department of Labor assuring us that that is in fact the way they will interpret the legislation.

Ms. DUNN. Madam Speaker, I thank the gentleman.

Mr. DICKS. Madam. Speaker, will the gentleman yield?

Mr. THOMAS. I yield to the gentleman from Washington.

Mr. DICKS. Madam Speaker, I want to compliment the chairman and my colleague, the gentlewoman from Washington (Ms. DUNN), for their effort here. This is a very important problem. The chairman was gracious in working with us on the Trade Adjustment Assistance Act, and I want to thank him for this effort here to clarify the law.

Mr. THOMAS. Once again reclaiming my time, Madam Speaker, I tell the gentleman that our intent is to maximize the opportunities for those who are unfortunately unemployed, not to create conflict; and we believe we have done that.

□ 1130

Mr. MATSUI. Madam Speaker, I yield 2 minutes to the gentleman from Indiana (Mr. ROEMER).

Mr. ROEMER. Madam Speaker, if we were playing a baseball game, it would be three strikes and then out. This is not the third but the fourth time that we have tried to do this bill in the right and the balanced and the appropriate and the bipartisan way.

We finally have it right, and so we are playing by the House rules that we can do it three or four or five times. We finally have balance in this bill: Balance between helping our businesses in a tough time, in a recession, maybe coming out of this recession slowly, and helping them with a 30 percent first year depreciation bonus. Importantly, we have help for our families, our unemployed, our children, people across Indiana that have seen unemployment rates almost double over the past year.

Madam Speaker, we have seen nationally the unemployment rate go to 7.9 million people, almost 2 million people more than a year ago. This is important because the cost of this bill has come down, too. We are coming out of the recession. Mr. Greenspan is saying good things about recovery, and the price of this has gone down from $127 billion to $99 billion, to now $41 billion over 10 years. That is good for our budget. It is good for our families. It is good for our businesses. We have arrived at the right balance.

Madam Speaker, I intend to vote for this bill. It will be a bipartisan bill, and I am glad we finally have it right.

Mr. THOMAS. Madam Speaker, I yield 2 minutes to the gentleman from Arizona (Mr. HAYWORTH), a valued member of the Committee on Ways and Means; and, lest we forget, somebody who represents the world champions in baseball, which was a point made by the previous speaker.

Mr. HAYWORTH. Madam Speaker, I listened with great interest to the gentleman from Indiana who started with the point of gamesmanship. He spoke about three strikes and being out. A more complete exposition on the rules on baseball, four balls and one walks.

Sadly, there are some in this town who just walked away. One definition of balance, to deprive the creation of job opportunity to strike balance for unemployment checks, that type of false compassion.

Let me suggest, Madam Speaker, this is not a game. Those who will come to this well and cry crocodile tears as to their compassion for the unemployed are missing the boat.

Our President made the point, true compassion is not an unemployment check, it is a paycheck from a job. When we turn our back on tax policy that creates economic opportunities and jobs, in the unrealistic and almost plaintive cry that somehow these are tax breaks for the rich, they fail to understand.

Madam Speaker, there are many in Arizona and across America who grow cynical with the shenanigans in Washington and grow cynical with those who would put political career advancement in front of the needs of the very people they purport to champion. Indeed, there are those in the dominant media culture who almost cheerlead for that somewhat cockeyed view of how to help people.

Good people can disagree, but once again we have taken a step today, more modest, to help those who need help, people we could have helped in October, in December, once again in December, and in February. At long last, we will rally. How sad it is that we do not get balance for economic opportunity at all, but we do take the steps necessary.

Mr. MATSUI. Madam Speaker, I yield 2 minutes to the gentlewoman from California (Ms. MILLENDER-McDONALD).

Ms. MILLENDER-McDONALD. Madam Speaker, I thank the gentleman from California (Mr. MATSUI) and also the chairman for bringing this bill to the floor, as well as the ranking member.

Madam Speaker, today we are considering amendments to H.R. 3090, the Job Creation and Worker Assistance Act. As a ranking member of the Subcommittee on Workforce, Empowerment and Government Programs, I embrace this bill. However, I would have wanted to see more for small businesses and more tax credits than what we have, especially for the unemployed. I would like to have seen a more equitable bill, but this bill that is under consideration is a drastic improvement over the first bill that was introduced into the House.

The major improvement to the bill is an extension of unemployment benefits for 13 weeks. I am sure unemployed workers throughout America will be comforted by this good news. Further, the bill reauthorizes TANF, the supplemental grant program and contingency fund, throughout the end of 2002. For families that have endured tough economic times, this reauthorization should provide some measure of relief.

I am also pleased to note that my colleagues in the House demonstrate a compassion for the long-suffering victims affected by the events of September 11 by including measures that provide temporary tax breaks and incentives for reconstruction of the World Trade Center neighborhood of New York City.

Madam Speaker, this is a bill that we can support. It does not have all of the benefits that I would have wanted to see, but as the ranking member of the Subcommittee on Workforce, Empowerment, and Government Programs, I welcome this bill. After months of wrangling over the economic stimulus bill, we have a bill that speaks to both business and unemployed workers.

Mr. THOMAS. Madam Speaker, I yield 3 minutes to the gentleman from Illinois (Mr. WELLER).

Mr. WELLER. Madam Speaker, let me first begin by complimenting the gentleman from California (Mr. THOMAS) for his perseverance in working to get this economy going again. Today, the fourth time, will be the charm. I hope that the bipartisan support we are hearing for this legislation to help unemployed workers, as well increase investment and the creation of jobs, will go through the Senate and be signed into law.

There is an interesting headline in the paper today, "Congressional Budget Office Predicts 2 Years of Surpluses, Credits Tax Rebate for Rebound in Budget." The nonpartisan Congressional Budget Office gives credit to the President's tax cut for the improved situation with our budget, as well as the rebound we are beginning to see in this economy.

This legislation before us is important today. We have laid-off workers. They are running out of unemployment benefits. We extend them. The program that we have before us is better than what the other body has suggested.

We also answer a very important question, and that is, what drove job creation in the last decade? It was investment, investment in the creation of jobs. For example, particularly in the technology and telecommunications sector, a tremendous amount of investment in the 1990s drove the creation of two-thirds of the jobs, the new jobs in our economy. That area has been hard hit by the recession we are currently under.

Madam Speaker, there are two provisions in this legislation that are tremendous incentives for investment and the creation of jobs: the accelerated depreciation, a 30 percent expensing, what some call the bonus depreciation. It is a tremendous incentive in the creation of jobs. Some of us have auto manufacturers or pickup truck manufacturers. Others have those that produce computers or telecommunications equipment. When someone has an incentive to buy those type of assets, there is a worker who manufactures that product, installs that product, services that product, and there is a worker who operates that product. The 30 percent expensing is a tremendous incentive for investment in creation of jobs.

NOL carry-back will allow companies to go back 5 years if they are losing money. The NOL carry-back is a tremendous incentive to invest in jobs. Companies are losing money. They need an opportunity to create capital that they can invest and keep their companies moving forward. The NOL carry-back will allow them to go back 5 years, essentially get a tax refund, use that money to invest in job creation, putting workers and their companies back to work, and giving more workers the opportunity to go back to work.

Madam Speaker, this legislation deserves bipartisan support. Let us invest in new jobs and give those who are unemployed today the opportunity to go back to work.

Mr. MATSUI. Madam Speaker, I yield 2 minutes to the gentleman from Maryland (Mr. CARDIN).

Mr. CARDIN. Madam Speaker, I thank the gentleman for yielding me this time and thank the gentleman for his work on many of the issues that we are considering today.

Madam Speaker, I want to talk about three issues in this bill that are very important. One deals with unemployment insurance, and the others deal with our welfare system.

I am pleased we now have these three provisions in a package that has a good chance of not only passing this body but the other body and being signed by the President of the United States. I congratulate the gentleman from California (Mr. THOMAS), the gentleman from California (Mr. MATSUI), and the gentleman from New York (Mr. RANGEL) for bringing forward a package that can be signed into law.

The provision I am referring to is the 13-week extension of unemployment insurance. We have been in recession for the last year. People, through no fault of their own, cannot find employment. It is important that we extend the unemployment insurance benefits. This 13 weeks will help 80,000 people a week who are exhausting their current unemployment insurance benefits.

The other two provisions deal with our welfare system. We extend the supplemental grants to those States who depend upon the supplemental grants in order to fund their welfare programs. Maryland is not one of those States, so the people in my State do not benefit, but it is an important program, and I applaud the effort that will finally get that enacted into law.

The other provides for the contingency fund within the TANF welfare program.

Madam Speaker, we are in a recession. We are going to be calling upon our social safety net programs more in the coming year. It is important that we provide within the TANF program the extra resources that our States are going to need in order to deal with the people that cannot find employment during this very difficult time.

Madam Speaker, for those three reasons I compliment all that are involved. These are three important provisions and are worthy of the support of this Chamber, and I thank all who are responsible for making it possible.

Mr. THOMAS. Madam Speaker, I yield 1 minute to the gentleman from Pennsylvania (Mr. GEKAS).

Mr. GEKAS. Madam Speaker, the inclusion of the extension of unemployment compensation benefits in this bill, of course, is the core, and it is a pretty good outcome for our unemployed.

I would have added one feature to it which I presented to the Committee on Rules but learned that it was premature to do so but which would have lifted an additional burden from the backs of our unemployed, namely a proposition that I have offered to eliminate income taxes on the receipt of unemployment compensation benefits. My proposition would make it retroactive to January, 2001.

Just as the unemployed began to creep up in numbers after the recession started, and exacerbated by September 11 when a whole new crew of unemployed Americans came before the unemployment boards, now is the time to consider lifting the burden of income taxes that applies to those benefits.

The chairman of the Committee on Ways and Means assured me that we would have discussion on this proposition; and when the time comes for that discussion, I ask the support of all of the Members because it is an unfair proposition to have our unemployed receive an unemployment compensation check and then have to calculate it in their taxes. We want to see that eliminated.

Mr. MATSUI. Madam Speaker, I yield 1 minute to the gentleman from Texas (Mr. GREEN).

Mr. GREEN of Texas. Madam Speaker, I rise in support of the bill. This is the first time I have been able to say that on the floor, and maybe the fourth time is the charm. The need is urgent to help our displaced workers and encourage investment through depreciation.

☐ 1145

This bill extends unemployment insurance benefits for workers who have used their benefits up without yet finding a job. In my own area in Houston, our laid-off workers are a result of September 11, the airline employees and the travel industry, and from the Enron situation. They will benefit from this. Since September 21, about 2 million families have run out of unemployment benefits, 81,000 per week.

That will help us nationwide. We should have done this months ago in a bipartisan manner, but the Republican leadership insisted three times before that the tax breaks for the wealthy and corporations be included. In previous recessions, we have always passed an unemployment extension, but this time again we held it hostage, and now I am glad we are finally going to see it happen.

The concern I have, though, is ultimately we went from last year saving Social Security first to making it last. It looks like we have put tax cuts first. Again I am glad the committee has come up with this bill. It is a good compromise. Hopefully, the Senate will adopt it.

Mr. THOMAS. I thank the gentleman for his kind words.

Madam Speaker, I yield 1 minute to the gentleman from Texas (Mr. SAM JOHNSON), a valued member of the Committee on Ways and Means.

Mr. SAM JOHNSON of Texas. Madam Speaker, it has been over 100 days since President Bush demanded that Congress pass legislation to create jobs and spur our economy. Today, we are trying to help the unemployed and we might finally succeed.

Republicans are asking our Senate over there to put the American people first and their political ambitions second. Nothing should stand in the way of this bill, because it targets those that need help, the unemployed, our businesses and our economy. I know the people of South Dakota and Missouri are tired of these political games and so am I. We are just trying to make America strong by creating new, high-paying, long-term jobs. This bill does just that. Vote for America's workers. Vote for this commonsense bill.

Mr. MATSUI. Madam Speaker, I yield 3 minutes to the distinguished gentlewoman from Florida (Mrs. THURMAN).

Mrs. THURMAN. Madam Speaker, I am actually here to support the bill. I, like many of my friends, am glad we have a piece of legislation before us that does address some of the issues that many of us have been concerned about and certainly one that we can find consensus. It is good to know that we in fact can find consensus and come to agreement on some issues that are facing many, many people in this country.

I would just say that what we are hearing today is there has been about 80,000 Americans who are losing their unemployment benefits each week. According to one estimate, about 1.6 million people have totally exhausted their benefits since the September 11 tragedy. This 13-week extension certainly will go a long way to help them and their families during this crisis time.

I would say I am disappointed that we could not up some of the Medicaid dollars. I think that would have been a right direction for our States. Our States are looking to us for some leadership on this issue. They, as we all know, are in serious problems in their States; and Medicaid is an area in which they have asked for some relief. In saying that, though, I think the chairman knows that in the last couple of months, we have talked in the committee about the TANF grants and issues. In fact, we are going to be at a Federal-State conference on Monday. My State of Florida has continually brought this issue to our attention. It is my understanding we are going to get about 10 percent of our total. I do not know what exact number that is, but certainly it is going to go a long way in helping us.

I think there are also some important issues in here on the extenders. Our business partners that come in to talk to us constantly are saying to us, the extenders are something we have to go through every time. We are very concerned that this is not going to happen.

I would just say that I think that the extenders and one that I am very much interested in certainly was the wind which is also an alternative energy issue, one that we should be paying close attention to in these times.

All in all, I also think that we met some of the criteria that Mr. Greenspan and others have said that will also help us in stimulating this economy. I thank our chairman and our ranking member and members of this committee who got together and figured out that there was a way to go and get some things done around here that helps the American people. We thank them for that.

Mr. MATSUI. Madam Speaker, I yield 2 minutes to the gentleman from New Jersey (Mr. PALLONE).

Mr. PALLONE. Madam Speaker, let me first start out by saying that I am very pleased that the Republican leadership dropped the bill yesterday which would have complicated matters and brought up what is essentially a clean bill today on the unemployment compensation so we can get this passed and give that extra 13 weeks to our constituents. That is so important. I am pleased at the fact that they were willing to listen to Democrats and others that were asking that that be done.

However, I did want to say that the issue of health care for people who are displaced, for displaced workers, is still very important and needs to be addressed. One of the concerns I have, which some of my colleagues have mentioned, which is that with the States piggybacking on this Federal depreciation rule, many of the States are now concerned that they are going to be losing significant amounts of money and that they will not be able to afford to keep everyone on their Medicaid rolls. In my home State of New Jersey, which faces like a 12 percent deficit from the previous Republican administration, our Governor is saying a big part of that is Medicaid. So we do not want to aggravate the situation, making it more difficult for States to provide health care for people who do not have a job or who are low income.

What I would like to see, and this is what I would ask, is that the Republican leadership allow at some point in the next few weeks the opportunity for the Democrats and all of us to address the problem of health care. Democrats have talked about expanding COBRA. Democrats have talked about giving more money to States to deal with this Medicaid problem. We have to recognize the fact that given the recession and the amount of displaced workers, there are a lot more uninsured and their problems are only going to be addressed if we deal with public programs and try to help the States with Medicaid, if we deal with COBRA, if we deal with some of these health care initiatives that actually make a difference and provide people with health insurance.

The tax credits that the Republicans have been talking about are not going to help the uninsured. Very few people are going to be able to buy into the individual market; and if anything, the Republican proposals with their tax credits undermine the employer-based system. That is why we brought it up on the previous question today that we voted "no," because we do not want to undermine the employer-based system with these tax credits that the Republican leadership has proposed.

Mr. THOMAS. Madam Speaker, it is my pleasure to yield 2½ minutes to the gentleman from Ohio (Mr. PORTMAN), a member of the Committee on Ways and Means.

Mr. PORTMAN. Madam Speaker, I tell my friend who just spoke on the other side of the aisle that we had an opportunity to help States in regard to health care in the previous three bills that came to this floor for economic stimulus. I do not know whether the gentleman was on those, whether he voted for them or not; but we have had that opportunity, and we will have it in the future because this House will act to deal with the issue of the uninsured.

I thought it would be helpful to talk for a second about how we got to where we are right now. Let us start with why we are here. We are here because of the recession, and we are here because of the horrible events of September 11 and the deepening of the recession that that caused. In reaction to that, the House back in October, 5 months ago, passed legislation on this floor, then again passed it in December, then again passed it in February, each time focusing on two things: one, helping those who are unemployed, including the extension of unemployment insurance; and, second, helping to get the economy back on track so we can get people back to work. That has been the focus of all the three previous efforts. Each time as the House has passed these bills with practically unanimous Republican support and some support from the other side of the aisle, these bills have been blocked by the other body. Despite the fact that we believe there is a majority of the other body that supports the legislation, at least the legislation in December and the legislation in February, the other body has chosen to block that legislation, despite the fact that during this time the recession has dragged on and on and on.

That is why we are here today, because as the other body has blocked each of these good-faith efforts again to get people back to work, the House has reacted by altering the legislation, trying to address the very concerns that were raised on the floor of the other body and some concerns that were raised on the other side of the aisle here so that the bill which was brought forward in December, the bill which was brought forward in February, was altered from the original legislation to try to be sure we could get through that Senate gauntlet, excuse me, the other body's gauntlet and get the bill to the President for signature because we care about helping people who are unemployed but also care deeply about getting people back to work and re-creating those jobs in the American economy.

The House stayed focused on that every time. The House stayed focused on helping people. Now we are here. The other body finally blocked legislation indicating to us that now we need to alter the bill again. We have once again done so. This time we have fewer incentives for jobs, but still have incentives for jobs. We kept at it. Again, I must say that I applaud the chairman's personal perseverance and patience in this effort. I think, frankly, politically many people argued we should have done something else, we should have blamed the Senate or the other body for blocking this legislation. Instead, we have persevered. We have done what we can to try to get this bill done.

Again today we are hearing on the other side of the aisle more support for this legislation. I certainly hope the other body is listening, because it is time. It is 5 months too late; but it is time for us to move to help those who are unemployed, to extend unemployment insurance, to provide other assistance but also to help get people back to work, to put in place some incentives so that new jobs can be created and folks can get back to work helping the U.S. economy.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mrs. EMERSON). The Chair would once again remind all Members that during the course of this debate, Members should refrain from characterizing Senate action, including urging Senate action.

PARLIAMENTARY INQUIRY

Mr. THOMAS. Madam Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. THOMAS. In terms of not representing or characterizing Senate action, does that also refer to characterizing Senate inaction?

The SPEAKER pro tempore. The gentleman is correct.

Mr. MATSUI. Madam Speaker, I yield 2 minutes to the distinguished gentleman from California (Mr. DOOLEY).

Mr. DOOLEY of California. Madam Speaker, I am very pleased today that we finally have put together a stimulus package that will enjoy significant bipartisan support, and it will engender this significant bipartisan support because it is focused. It is focused on enacting tax cuts that will really result in increased economic activity. It focuses on providing needed benefits to New York. It focuses on providing needed benefits to our unemployed workers. And unlike some of the past stimulus bills that were brought before this House, it is focused on tax cuts that will really make a difference in the immediate term.

There has been some characterization that we did not have a stimulus bill signed into law before this or through the past 5 months because of a failure of one body or the other to take action. I think the reason we do not have a bill that is signed into law already was because we failed to work in a bipartisan fashion to structure a bill that would be focused on the immediate tax cuts that would provide that economic stimulus that was balanced to the appropriate benefits that needed to be provided to the unemployed workers in this country. I do not think we should be surprised that today when we pass this measure out of the House with broad bipartisan support that it is quite likely that we will see a bill that will be enacted and sent to the President's desk. There is a very simple lesson there, I think, that by working together and by being focused and finding a bill that can find that common ground, we can make a difference, we can advance policies that will ensure that we can see greater economic activity, and we can advance benefits that are going to provide some relief to a lot of the hard-working Americans who, unfortunately, have lost their jobs over the past few months.

Mr. THOMAS. Madam Speaker, it is my pleasure to yield 2½ minutes to the gentleman from Louisiana (Mr. MCCRERY), chairman of the Subcommittee on Select Revenue Measures of the Committee on Ways and Means.

Mr. MCCRERY. Madam Speaker, I first want to talk about why Republicans have stuck to our guns on insisting that extension of unemployment benefits be coupled with tax cuts for business so that they might create jobs and pull us out of this recession.

I am going to quote from an online publication of Business Week magazine from yesterday:

"Federal Reserve Chairman Alan Greenspan has repeatedly pointed out that the current recession was triggered by business cutbacks and said he'll need to see improved corporate demand before he's convinced the recovery is sustainable.

"Surveys of corporate buyers have consistently shown they plan only a gradual pickup in spending this year. Only 15 percent of respondents to a National Association of Manufacturers survey released on February 20 said they would increase capital spending by more than 5 percent in the first half of 2002.

□ 1200

"For the second half of 2002, only 25 percent of respondents said they expect to increase spending by more than 5 percent, but 54 percent said their increase would be in the zero- to 5-percent range."

There is certainly a need, if we want to get out of this recession, if we want to create jobs and put people back to work, there is a need to give corporate America an incentive to invest; capital investment. That is what Chairman Greenspan is talking about.

Therefore, we have stuck to our guns and we have won today. We have a package that is going to pass this floor and go to the other body and, hopefully, will be passed there, that will not only give some relief to the unemployed in the form of benefit checks, but it will also give them some hope in the form of a future job.

Now, let us talk about the unemployment compensation benefits in this bill, because they are important. The gentleman from Maryland touched on them, but he did not go far enough in describing what is in this bill. Besides the extension of the 13 weeks of unemployment benefits, we also do what is known as a Reed Act distribution. That means that we are finally going to give to the States adequate monies for administration of the unemployment compensation system in the States, primarily the employment services portion of that system. That is what Congress has been shortchanging the States on for years now.

In this bill, we are going to make good on our promise to give them adequate funds to administer this program to get people back to work.

Mr. MATSUI. Madam Speaker, I yield 1 minute to the gentleman from Virginia (Mr. MORAN).

Mr. MORAN of Virginia. Madam Speaker, when we have bills that are the result of real compromise before us, it is incumbent upon us to find real consensus. The fact is that this is a balanced bill, and extending unemployment benefits for another 3 months makes sense. We all agree on that.

I also agree on the tax incentives. The capital equipment that is going to be purchased as a result of the 30 percent accelerated depreciation probably would have happened anyway, but it is going to happen now, it is going to be concentrated, it is going to give a real jump-start to the economy, and it is going to get those folks on unemployment now back into the workforce. Even the 5-year loss carry-back makes sense.

This is the kind of thing where the money that we are providing is going to be invested immediately for the productivity of our workforce with the capital investment, and it is going to be invested in the kind of plant and equipment that will ensure that these companies will be sustainable.

We have a great thing going for us. We have had a mini recession. There are certain things that we need to do to fill gaps, to build capacity in the economy, and we need to make sure that our working families cân provide for their children.

This does it. It should be approved, and it should be approved unanimously.

Mr. THOMAS. Madam Speaker, I thank the gentleman for his kind words.

Madam Speaker, I yield 1 minute to the gentlewoman from Washington (Ms. DUNN), a member of the Committee on Ways and Means.

Ms. DUNN. Madam Speaker, I am pleased to hear preliminary reports that indicate that our economy might be back on track, but in Washington State, recovery will take longer. Our unemployment continues to go up, not down, for each round of Boeing layoffs. At 7.5 percent, it is the second highest in the Nation. Many analysts have projected it will grow to 8 percent, the highest unemployment in the Nation. So we can see why providing the benefits that we provide for unemployed people in this bill is crucial, but it is not enough, Madam Speaker.

It is also crucial to provide some help for businesses so that they will invest in workers and keep people employed. We know it is the private sector that creates jobs. Assisting them needs to be a focus of our recovery efforts. The tax provisions in this bill will encourage Washington State companies to begin investing again and keep people employed.

I urge passage of this bill.

Mr. MATSUI. Madam Speaker, I yield 1 minute to the distinguished gentleman from New Jersey (Mr. ANDREWS).

Mr. ANDREWS. Madam Speaker, I rise in support of this bill because of what it does and what it does not do. I commend and thank the leadership of both parties for bringing us a bill that extends unemployment benefits, that provides meaningful incentives for people to invest in capital goods and get the business economy rolling again.

I also support the bill because it is not nearly as large as the other plans that were before us just a few weeks and months ago. The looming problem in this economy is the budget deficit. This bill adds only marginally to the budget deficit in the short run, and I believe it will subtract from it in the long run. But that problem is not going away. We are once again going to run this government on borrowed money, I believe because of the unduly large tax cut enacted last summer.

We have done a good job today in addressing the short-term problem, but we have a bigger job to do in the weeks and months ahead in addressing the looming train wreck with Social Security in the American economy because we are once again going to go back to the bad old days of the 1980s of running this government on borrowed money.

Let us stimulate this economy today, but let us solve the long-term problems in the future.

Mr. THOMAS. Mr. Speaker, it is my pleasure to yield 2 minutes to the gentleman from Pennsylvania (Mr. ENGLISH), a member of the Committee on Ways and Means.

Mr. ENGLISH of Pennsylvania. Mr. Speaker, I thank the chairman for yielding me this time.

I am here to express support for a bill that House Republicans are once again putting forward before the House in response to the pleas of American workers who have been laid off in the Arctic climate of this recession.

Mr. Speaker, it is critical that we pass this legislation, but, unfortunately, we have been missing many opportunities. Three times already we have passed the substance of this legislation with additional stimulus built in, passed it, and sent it to where it has been blocked by partisan obstructionism which I have neither the time, nor the inclination, nor the flexibility, under the rules of this House, to adequately explore.

What is important here is that we are laying forward a bill that helps American workers by extending unemployment benefits for 13 weeks. At a time when workers are having difficulty finding another job, they need that extension. It provides clear tax incentives for investment in good-paying jobs.

I represent a manufacturing district. This is precisely the sort of incentive that will allow manufacturers to pour money into capital equipment, modernize their production lines, improve productivity, and successfully compete globally. This is precisely the kind of incentive that is going to allow them to become more competitive and also boost the economy now at a critical time when it needs a boost.

The legislation that we face is the right mix in order to try to provide some relief for an economy that is still dragging and still very much at risk.

Mr. Speaker, it is critical that we pass this legislation now. If we cannot get the full-blown stimulus package that House Republicans have been advocating and that the President has been advocating, it is critical that we move this legislation forward to try to address at least some of the more obvious problems that we are facing.

Mr. MATSUI. Mr. Speaker, I yield 3½ minutes to the distinguished gentleman from the State of Washington (Mr. MCDERMOTT), a member of the Committee on Ways and Means.

Mr. MCDERMOTT. Mr. Speaker, I am really pleased that we finally got the hunting season settled for mourning doves yesterday so that we could finally get down and do something important.

Since September 12 when we tried to give $15 billion to the airline executives and stockholders, we have refused to deal directly and simply with the unemployment question. We have always had to have it wrapped with a whole bunch of tax cuts.

Now, we are out here today to pass a bill, and the price has gotten down low enough that a lot of us will support it. It will go out of here almost unanimously. We are going to give $14 billion over the next 3 years to the unemployed and $100 billion to the employers in the form of tax cuts.

We had a famous member of the other body from our State who used to say, I would like to find a one-armed economist, because on the one hand they say things are going up and on the other hand they say things are going down. I do not know whether this bill is for the going ups or the going downs, because I hear that the recession is all over, that we have pulled out of it already because of all of the great things we have done. So why do we need this stimulus package? Why are we putting in $100 billion taken from the Social Security money?

Over the next 3 years, the workers in this country are going to be paying Social Security so they can give a tax break to their bosses to buy more machines. Now, if we are out of the recession, then why do we need this stimulus package? We clearly need the money for unemployment for the 1.1 million people who have lost their jobs and lost their unemployment since 9-11. That is clear. But there is not any evidence that I see, at least from my State, that says they are all coming back to work now.

Now, if a guy has a plant and he has equipment, why is he going to go out and invest in more unless there is a market? If you have, as we have, an 8 percent unemployment rate in Seattle, anybody investing to make more, I guess it can just sit in the warehouse. That would be good business, I guess, although I have never run a business, so I would not know if it is a good idea. But it does not seem very smart to buy a bunch of machinery for something that one cannot sell. Until the economy starts and people are back working, it is going to be very hard to convince people to go and buy more high-priced electronic equipment and all of the things that have gone down.

Now, what is really aggravating about this is you will not give us a chance to have a pay-for, no chance to pay for it. No, no, no. This is the plan that says, if you are in a hole, keep digging. We are in a hole, and we are going to dig another $100 billion deeper, and we could reverse that. We could do something about that if we could have hearings and actually have meetings on this, but these things keep popping out of the committee without anybody ever having a chance to talk about them. We find out that, after all of these months, the State of Washington, we have to have a letter from the Department explaining how it is going to work.

I urge everyone to vote for a bad compromise.

Mr. THOMAS. Mr. Speaker, my understanding is the gentleman said that he was in favor of the bill? I did not hear the closing pitch. How ironic.

Mr. Speaker, it is my pleasure to yield 1½ minutes to the gentleman from Missouri (Mr. HULSHOF), a member of the Committee on Ways and Means.

Mr. HULSHOF. Mr. Speaker, I rise in support of the Job Creation and Worker Assistance Act.

This, Mr. Speaker, is the least we could do; literally, this is the least we could do, because of the political climate in which we find ourselves. This is a pragmatic solution.

There have been a number of speakers who lament the fact that we have not provided worker assistance in the past, and I would remind my colleagues that we have provided that assistance in the three prior true stimulus bills. Perhaps we have missed some opportunities, because we also had some health assistance for displaced workers. My colleagues may recall we had some simplification of the capital gains holding period that a lot of small businesses have been asking us about. We had relief from the punitive Alternative Minimum Tax, which, I remind my colleagues, economically hits businesses at a time when they can least afford to be hit with this tax; that is, times of economic slowdown.

Interestingly, the gentleman from Texas who spoke earlier talked about tax breaks for wealthy corporations. And yet, if these corporations are so wealthy, then why are we including a net operating loss carry-back?

The fact is that these economic downtimes have caused many businesses to become awash in red ink. Ford Motor Company, for instance, that was on the top 10 recipients of additional tax relief on a chart that my colleagues on the other side of the aisle used recently, announced a layoff of a plant in St. Louis, Missouri, which is going to affect about 2,500 workers.

Notwithstanding that, I think that this is a good bill and, as I have said before, inaction is not an option. I am glad that the House is finally acting.

Mr. MATSUI. Mr. Speaker, I yield the balance of my time to the distinguished gentlewoman from the State of California (Ms. PELOSI), the Democratic whip.

Ms. PELOSI. Mr. Speaker, I thank the gentleman for yielding and for his leadership on this very important issue.

Well, here we are 6 months later, four legislative attempts and millions of jobs lost, finally passing a package to extend unemployment benefits for those affected by the recession and the September 11 tragedy.

□ 1215

We have to review this legislation today in the context of this past year. One year ago, when the Clinton administration left office, we had the strongest economy in the history of our country. We had the biggest budget surplus in a generation.

What a difference a year makes. Under the Bush economic package, we started into a recession, we started into reversing the tendency towards surplus and moved into deficit, and we have been advancing policies under the Republican leadership in the House to raid Social Security.

Within that context came September 11, when we already had an economy moving into a recession. What a tragedy it was in so many respects for our country. Immediately this House acted, and probably appropriately, to bail out the airline industry in a matter of days from September 11.

Many of us wanted to vote in tandem for that bill and a bill that would help bail out all of the workers who lost their jobs as a result of September 11 in the airline industry and in the related hospitality industry.

But no, the emergency was only for the industry, and the workers would have to wait. So in good spirits and with good will, we voted for the airline bailout bill with the thought that the worker bailout would shortly come before us.

Six months later, we still do not have that comprehensive worker bailout bill on the floor. What we have before us today is the very least that we could do, the very least that we could do, to extend for 13 weeks the unemployment benefit package for the workers. Now we are at record numbers, 8 million unemployed in our country, record numbers of people going on unemployment every day.

So when we talk about this bill before us today, we say that at long last we can be relevant to the pain and suffering in the families of America's working people because we will extend the benefits. But this, as I said, is the very least that we can do. Much more needs to be done.

That is why next week the Democrats will launch a discharge petition calling to expand the number of people who would be available for unemployment benefits: temporary workers, those below a certain wage scale. It would also include in it a health package benefit, so that there would be funding to allow people to take advantage of COBRA extension of their health benefits, because health benefits are a very, very important part of the job, and should be a very important part of an unemployment benefit package.

Mr. Speaker, today we certainly vote to extend the benefits for American workers' families, but we recognize that this, as I said, is the very least that we can do.

The fight continues. Next week we will continue with the discharge petition.

Mr. THOMAS. Mr. Speaker, I yield myself such time as I may consume.

First of all, Mr. Speaker, I want to thank the gentlewoman for her discordant, partisan remarks.

Mr. Speaker, I am very pleased to yield the remainder of our time to the gentleman from Illinois (Mr. HASTERT), the Speaker of the House of Representatives.

Mr. HASTERT. Mr. Speaker, I thank the gentleman for yielding time to me.

Mr. Speaker, I think today we have a bill that I hope we can vote for on both sides of the aisle. At least, that sounds like the debate that we have had.

Two or 3 weeks ago, we had a bill on the floor that basically did the same thing. We also had health care provisions. Last Monday, I received a letter from the minority leader that said "I don't want UI and health care benefits put together in this bill." We took it out. Now we have a bill that basically has UI benefits.

We have three things that I think are important for this country, not only helping those people who are out of work, and they need help, but also, most people who are out of work will tell us one thing: They want a job. It is our job to help create jobs in this country.

There are some fundamental things we can do. First of all, all American families that work have accumulated some kind of wealth, either through

401(k)s or mutual funds or savings accounts or pensions. They lost value after September 11. Luckily, that value is starting to come back, and people are seeing that their savings are starting to be restored.

But that is a valuable asset that we have in this country. That is a valuable asset for every American family. We need to get confidence in those markets that people will put money back in again and see that value rise.

The second thing that we needed to do is get confidence in consumers, because what this Congress has done over the past 3 years is paid down $450 billion of public debt, so we do not have the Federal Government out there competing with the private sector for capital. We have helped keep interest rates low.

I say "helped keep" because the Federal Reserve has helped us, but they have been able to help us because we have done what we have done. With low interest rates, we read that housing starts are up 6 million last year, unprecedented in a time of recession, but this helped keep the economy going. The auto industry is going. A lot of things are starting back up. We have helped that happen. This bill will give consumers confidence, also.

The third thing that we needed to do, and we will do in this bill, is to help amass capital in very crucial spots so that money will be invested in creating jobs. Creating jobs is not a hocus-pocus, or it is not something where we wave a wand over and it just happens. We have to create it. We have to make sure that there is capital amassed so people invest in new ideas, new construction, new capital equipment, and the ideas that create jobs in this country. That has been this Nation's strength. We do it in this bill.

We are going to be successful in the bill because 2 weeks ago we did not wave a white flag and say, "We will just pass UI and we will roll over dead." We fought back, we got a good piece of legislation. I think that the Senate ought to pick this legislation up and pass it.

Mrs. CHRISTENSEN. Mr. Speaker, I rise in support of H.R. 3090, the Job Creation and Worker Assistance Act. I am pleased that we appear to be finally on our way towards giving relief to the millions of Americans who have exhausted their unemployment benefits.

I want to thank the Chairman and Ranking Democrat of the Ways and Means Committee, Representatives THOMAS and RANGEL for including the annual Tax Extenders bill in the H.R. 3090 which includes the very important extension of the Rum Cover-Over for the Virgin Islands and Puerto Rico. The Rum Rebate, as it is known in my district, is critically important because it is used to secure the bonds that the Government of Virgin Islands issues to pay for the public infrastructure needs of the territory.

Mr. Speaker, I applaud the leadership you and your fellow majority leadership members have shown in crafting an unemployment extension bill which has strong bipartisan support and which has a good chance of becoming law soon because it does not contain any of the controversial tax breaks that were included in earlier bills such as the repeal of the corporate minimum tax. On balance this is a good bill and I urge my colleagues to support its passage.

Mrs. MALONEY of New York. Mr. Speaker, I rise to express my relief that we are finally voting on legislation that will help unemployed Americans.

I have heard countless stories of working men and women who cannot find jobs in these uncertain economic times. Families have been crying out for help, and it's time that we give them the relief that they need.

The aftershocks of 9/11 have affected thousands of workers. In my state alone, unemployment has increased by almost 2 percent since last January.

More than one hundred thousand New Yorkers were displaced by the terrorist attacks, and they shouldn't shoulder the economic burden of 9/11 alone.

Federal grants to extend unemployment make sense not only for New York, but for the nation as a whole.

I am pleased that this legislation contains the 13-week extension of unemployment benefits.

However, we must continue our efforts to ensure that laid-off workers without health care benefits obtain the coverage that they need.

I only hope that this relief will not linger in conference so that workers will not have to worry about paying rent, sending their children to college, or going to the doctor.

It's time to pass this benefits package.

Mr. POMEROY. Mr. Speaker, I rise in strong support of H.R. 3090, the Job Creation and Worker Assistance Act of 2002. I only regret that it took five months for the majority to bring forward a responsible, bipartisan bill that provides assistance to unemployed workers, helps stimulate investment in our economy, but does not further harm our long-term budget outlook. Although the delay is unfortunate, we have a good bill on the floor today and I urge my colleagues to support it.

First, the bill helps unemployed workers by extending the limit on unemployment insurance from 26 to 39 weeks. Importantly, the bill also expands UI benefits by providing funds to assist part-time workers who have lost their jobs. At a time when 80,000 workers per week are exhausting their UI benefits, the 13-week extension in this bill is sorely needed. This Congress has been promising for months to help displaced workers; the bill before us finally delivers on that promise.

Second, the bill encourages new investment to help lift our sputtering economy. It provides businesses with a 30 percent bonus depreciation for plant and equipment placed in service after the terrorist attack of September 11. This will give businesses a powerful incentive to expand their operations and grow the economy. In addition, the bill extends the net operating loss carry-back from two years to five, so that businesses can take advantage of their loss deductions, freeing up funds for new investment.

Third, the bill extends expiring tax credits, including the Welfare-to-Work Tax Credit and the Work Opportunity Tax Credit. Importantly for North Dakota, the bill extends the taxable income limit for oil production from marginal wells and the tax credit for wind energy production. North Dakota is not only a major producer of oil, it is number one in the nation in the potential for energy generation from wind. Both of these provisions will be of significant benefit to my home state.

Finally, the provisions of this bill are temporary, which has two benefits. First, it will encourage businesses to act now, when new investment is needed most to boost the economy. Second, it will minimize the harm to the long-term budget outlook. As each of us knows, the 10-year budget is projected to divert $1.56 trillion from the Social Security trust fund. By limiting the term of these provisions, we stimulate the economy without setting back our efforts to balance the budget without using Social Security.

Mr. Speaker, I support this legislation and urge its adoption.

Mr. BLUMENAUER. Mr. Speaker, I rise today in strong support of the Job Creation and Worker Assistance Act of 2002. In extending unemployment benefits for 13 weeks, this legislation goes a long way toward providing critical economic assistance to workers and small businesses around the country.

The current economic downturn has had a tremendous impact on the Pacific Northwest. The State of Oregon, in particular, has the highest unemployment rate in the country. Some of our most important market sectors, such as technology, agriculture, and forestry, have been hard hit in the last year. This legislation will help our state and our nation until people get back to work.

The bill before us today strikes a balance between the need to assist our country's workers while recognizing the very real financial constraints our government is facing. The 13-week extension of unemployment benefits will help the many in my district who have had trouble regaining employment due to the events of September 11th and the economic downturn and have exhausted their regular benefits.

In addition, I strongly support the provisions of the legislation on accelerated depreciation. Under current law, the recovery period for most personal property through the depreciation process is anywhere from three to 25 years. This legislation would allow a temporary additional first-year deduction of 30 percent for property that generally has a recovery period of 20 years or less, and was purchased on or after September 11, 2001. Small businesses and individuals around the country will be able to use this provision to recover more of their capital costs more quickly, in turn allowing them to use these funds to employ more workers and purchase more goods and services.

Finally, this legislation extends a number of important tax provisions, such as welfare-to-work, the tax credit for electric vehicles, wind and bio mass and, perhaps most important, tax incentives to encourage reconstruction and redevelopment of the New York "Liberty Zone" surrounding the World Trade Center.

These tax incentives will provide further stimulus to those sectors of the economy desperately in need of assistance, while improving the livability of our communities.

Mr. Speaker, this legislation is absolutely necessary to ensure that workers in Oregon communities and across the country can provide for their families until they get back to work. I urge my colleagues to support the legislation.

Mr. UDALL of New Mexico. Mr. Speaker, it gives me great pleasure to rise today in support of a worker assistance measure that will finally benefit the men and women who need it the most—the unemployed. I am also happy to see that we were finally able to work in a bipartisan fashion to get important legislation crafted for individuals strongly in need of help.

I cannot tell you, Mr. Speaker, how many phone calls my office received from people who were nearing the end of their unemployment benefits, and were still struggling to find employment despite constant efforts to do so. Unfortunately, since last fall, Republicans have been playing nothing more than dirty pool by pushing so-called stimulus packages with accelerated tax cuts, corporate AMT refunds running back to 1986, and poorly conceived health insurance tax credits.

Nevertheless, as the old adage goes, "it's better late than never." And, although Federal Reserve Chairman Greenspan is on the Hill today proclaiming that economic recovery is "well under way," there are thousands of Americans, and many of New Mexicans who are still not seeing the benefits of a recovering economy. That is why I am glad the majority finally decided to do what is right and bring forth a real, meaningful worker assistance bill without controversial tax breaks.

I am pleased to support this legislation and urge my colleagues to do the same. Worker assistance is long overdue.

Mr. SHOWS. Mr. Speaker, today we are considering a measure to extend unemployment benefits for an additional 13 weeks.

On Monday we will mourn the 6-month anniversary of September 11. However, with this anniversary comes issues that Congress must address. Among those is the fact that unemployment benefits will expire on Monday. Unemployed Americans are counting on us to help them get through another difficult situation.

We keep hearing about the need to stimulate our sagging economy. Tough economic times were made worse in the aftermath of September 11th, but I can tell you that back in Mississippi too many people were losing their jobs before then.

And we can only blame ourselves for enacting trade policies that have sent Mississippi jobs packing across our borders. We did it with NAFTA and I am afraid we're going to do it again with Fast Track.

Since September 2001, more than 1.3 million Americans have exhausted their unemployment benefits. In Mississippi alone, more than 7,200 men and women have exhausted their benefits since November, compared to 4,700 unemployment workers during the same time period in 2000—a 54 percent increase. And we continue to experience new factory closures every week in Mississippi.

So, while we argue over ways to jump-start our sluggish economy, it is just as important that we help the victims of that economy.

This Congress has had ample opportunity to help our unemployed—our once working American families—but the leadership of this body chose not to act. This is why I filed the discharge petition to bring this bill to the floor. It's too bad we had to resort to this measure—to bypass regular order—to force action on this essential measure.

However, at least today we will and rectify this economic situation and help American workers who need their government to work for them in this difficult time.

Mr. HINOJOSA. Mr. Speaker, I rise today in support of the Job Creation and Workers Assistance Act, H.R. 3090. On behalf of my constituents in the 15th Congressional District of Texas, which has suffered from a chronic double-digit unemployment rate for decades, this bill is long overdue. I am glad that the majority decided to bring a bill to the floor upon which we have broad agreement, and which will be well received by the other body—the Senate.

Mr. Speaker, this bill represents the kind of constructive compromise that must be the cornerstone of our efforts to create public policy that promotes job growth and economic prosperity. This bill includes provisions that will provide much-needed relief to our unemployed workers who have been losing their benefits. It also provides effective and immediate tax relief that will help businesses to survive these difficult economic times and lead our Nation to renewed economic growth.

I applaud my colleagues on both sides of the aisle for coming together to craft this "economically sound" bill in our Nation's time of need, and I urge support for the resolution and the bill.

Mr. ETHERIDGE. Mr. Speaker, I rise in strong support of H.R. 3090, the Job Creation and Worker Assistance Act. This bill, like the bill the Senate passed a few weeks ago, extends unemployment benefits for 13 weeks and provides temporary tax relief for businesses that will truly help stimulate our economy. H.R. 3090 represents the kind of temporary, immediate and affordable relief I advocated for months.

Mr. Speaker, for months, the House Leadership has continued to bring up only sham tax bills instead of relief for unemployed workers. In fact, the worker relief package we are considering today could have been law months ago if House Republicans had not insisted on attaching controversial and ineffective tax breaks for special corporate interests to previous stimulus packages.

While the relief contained in H.R. 3090 is a step in the right direction, we must not stand pat. As we approach the six-month anniversary of the terrible events of September 11, Congress must pass additional common sense legislation to jump-start our economy and put our people back to work. We must address the issue of health insurance for the unemployed. Mr. Speaker, providing health insurance for the unemployed and extending unemployment benefits must go hand in hand. And we should enact visionary policies to prompt long-term economic growth, prosperity and opportunity for all Americans willing to work hard to make the most of their God-given abilities. I am hopeful that Congress will address these important priorities in the coming months.

The SPEAKER pro tempore (Mr. LATOURETTE). All time for debate has expired.

Pursuant to House Resolution 360, the previous question is ordered on the motion.

The question is on the motion offered by the gentleman from California (Mr. THOMAS).

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. THOMAS. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 417, nays 3, not voting 15, as follows:

☐ 1246

Mr. BERRY changed his vote from "nay" to "yea".

So the motion was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Stated for:

Ms. SOLIS. Mr. Speaker, during rollcall vote No. 52 on H.R. 3090, to provide tax incentives for economic recovery I was unavoidably detained. Had I been present, I would have voted "yea."

PERSONAL EXPLANATION

Ms. SANCHEZ. Mr. Speaker, I was attending an important business meeting in Mexico with President Vicente Fox on March 7th dealing with International Women's Day.

Had I been present and voting, I would have voted "nay" on rollcall No. 51 and "yea" on rollcall No. 52.

GENERAL LEAVE

Mr. THOMAS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the motion just agreed to.

The SPEAKER pro tempore (Mr. LATOURETTE). Is there objection to the request of the gentleman from California?

There was no objection.

LEGISLATIVE PROGRAM

(Ms. PELOSI asked and was given permission to address the House for 1 minute.)

Ms. PELOSI. Mr. Speaker, I rise to inquire about the schedule for next week.

Mr. ARMEY. Mr. Speaker, will the gentlewoman yield?

Ms. PELOSI. I yield to the gentleman from Texas.

Mr. ARMEY. Mr. Speaker, I am pleased to announce that the House has completed its legislative business for the week.

The House will next meet for legislative business on Tuesday, March 12, at 12:30 p.m. for morning hour and 2 p.m. for legislative business. The House will consider a number of measures under suspension of the rules, a list of which will be distributed to Members' offices tomorrow. Mr. Speaker, that list will include the Born Alive Infant Protection Act.

On Tuesday, recorded votes will be postponed until 6:30. On Wednesday and on Thursday, I have scheduled H.R. 2341, the Class Action Fairness Act of 2002, for consideration in the House. I would also like to note that the Committee on the Judiciary has completed its markup of H.R. 2146, the Two Strikes and You're Out Child Protection Act; and I will be expecting to put that bill on the floor next week as well.

I thank the gentlewoman for yielding.

Ms. PELOSI. Mr. Speaker, reclaiming my time, I thank the gentleman for the schedule, but could he be more specific about the day that the Class Action Fairness Act of 2002 will be brought up?

Mr. ARMEY. Mr. Speaker, if the gentlewoman will continue to yield, we expect that bill to be on the schedule for Wednesday. I think we would plan on that.

Ms. PELOSI. Mr. Speaker, I thank the gentleman for that specific answer.

ADJOURNMENT TO MONDAY, MARCH 11, 2002

Mr. ARMEY. Mr. Speaker, I ask unanimous consent that when the House adjourns today, it adjourn to meet at 2 p.m. on Monday next.

The SPEAKER pro tempore (Mr. LAHOOD). Is there objection to the request of the gentleman from Texas?

There was no objection.

HOUR OF MEETING ON TUESDAY, MARCH 12, 2002

Mr. ARMEY. Mr. Speaker, I ask unanimous consent that when the House adjourns on Monday, March 11, 2002, it adjourn to meet at 12:30 p.m. on Tuesday, March 12, for morning hour debates.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. ARMEY. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule be dispensed with on Wednesday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

PERMISSION FOR COMMITTEE ON THE JUDICIARY TO HAVE UNTIL 7 P.M., MONDAY, MARCH 11, 2002, TO FILE A REPORT ON H.R. 2341, CLASS ACTION FAIRNESS ACT OF 2001

Mr. ARMEY. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary have until 7 p.m. on Monday, March 11, 2002, to file a report to accompany the bill (H.R. 2341) to amend the procedures that apply to consideration of interstate class actions to assure fairer outcomes for class members and defendants, to outlaw certain practices that provide inadequate settlements for class members, to assure that attorneys do not receive a disproportionate amount of settlements at the expense of class members, to provide for clearer and simpler information in class action settlement notices, to assure prompt consideration of interstate class actions, to amend title 28, United States Code, to allow the application of the principles of Federal diversity jurisdiction to interstate class actions, and for other purposes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

ANNOUNCEMENT BY COMMITTEE ON RULES REGARDING AMENDMENTS TO H.R. 2341, CLASS ACTION FAIRNESS ACT OF 2001

(Mr. DREIER asked and was given permission to address the House for 1 minute.)

Mr. DREIER. Mr. Speaker, the Committee on Rules may meet on Tuesday, March 12, 2002, to grant a rule for the consideration of H.R. 2341, the Class Action Fairness Act.

The Committee on Rules may grant a rule which would require amendments be printed in the CONGRESSIONAL RECORD prior to their consideration on the floor. Any Member wishing to offer an amendment should submit 55 copies of the amendment and one copy of a brief explanation of the amendment to the Committee on Rules in room H-312 in the Capitol no later than 1 p.m. on Tuesday, March 12.

The Committee on the Judiciary intends to file its report on the bill on Monday, March 11. The Committee on Rules will post the Committee on the Judiciary version of the bill on the Web site of the Committee on Rules as soon as it becomes available. Members should draft their amendments to the bill as reported by the Committee on the Judiciary.

Mr. Speaker, Members should use the Office of Legislative Counsel to ensure their amendments are properly drafted and should check with the Office of the Parliamentarian to make sure their amendments comply with the rules of the House.

PROVIDING AMOUNTS FOR FURTHER EXPENSES OF PERMANENT SELECT COMMITTEE ON INTELLIGENCE IN SECOND SESSION OF 107TH CONGRESS

Mr. NEY. Mr. Speaker, I ask unanimous consent that the Committee on House Administration be discharged from further consideration of the resolution (H. Res. 359) providing amounts for further expenses of the Permanent Select Committee on Intelligence in the second session of the One Hundred Seventh Congress, and ask for its immediate consideration in the House.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

Mr. HOYER. Mr. Speaker, reserving the right to object, I take this time to ask the distinguished chairman of the Committee on House Administration for an explanation of his unanimous consent request.

Mr. NEY. Mr. Speaker, will the gentleman yield?

Mr. HOYER. I yield to the gentleman from Ohio.

Mr. NEY. Mr. Speaker, House Resolution 359 is a supplemental funding resolution for the House Permanent Select Committee on Intelligence.

Mr. Speaker, as my colleagues know, each Congress passes a committee funding resolution to authorize committee spending. My colleague and I, the gentleman from Maryland, passed a very good and effective committee funding resolution that keeps the House in proper movement.

This process normally occurs at the beginning of each Congress. The committee funding process for the 107th Congress was completed in March of 2001 with the overwhelming passage and overwhelming bipartisan agreement of House Resolution 84, a bipartisan initiative which not only provided committees with the necessary resources to carry out their important work, but which also set new standards for allocating funds between majority and minority staffs.

I want to again thank the gentleman from Maryland and all the members of the committees, both sides of the aisle, ranking members and Chairs of the committees, for their tremendous and great cooperation.

Those funds more than adequately provided for committees to do the necessary work which they are charged to do in the 107th Congress. Unfortunately, because of the tragic and devastating attacks of September 11, we find it necessary to come to the House floor to seek additional spending authority for the House Permanent Select Committee on Intelligence.

The increased spending authority would be used to fund a joint bicameral inquiry with our counterparts from the other body into the activities of the intelligence community before, during, and since the September 11 terrorist attacks. Among the purposes of this joint effort is ascertaining why the intelligence community did not learn of the conspiracy to launch the September 11 attacks in advance and to identify what, if anything, might be done to better position the intelligence community to warn of and prevent future terrorist attacks and other threats in the 21st century.

The investigation will principally focus on the U.S. intelligence agencies and their activities, as well as the interaction between intelligence agencies and nonintelligence entities associated with our national security. Based on their findings, the committee may seek to enact changes in order to remedy any systemic deficiencies revealed by the joint inquiry.

The decision to conduct a bicameral bipartisan review by the two intelligence committees is supported by both the gentleman from Florida (Mr. GOSS), chairman, and the gentlewoman from California (Ms. PELOSI), the ranking member of the House Permanent Select Committee on Intelligence, along with the chairman and ranking member of the Senate Select Committee on Intelligence.

Review of the activities of the intelligence community through this joint effort is necessary for several reasons. To begin with, the two intelligence committees, House and Senate, are best suited by experience and practice to protect classified information. Since a significant portion of the investigation must include review and access to highly sensitive classified materials in order to fully understand intelligence actions, review by both committees is appropriate and needed.

Second, due to the fact that our Nation will be involved for some time in the war against terrorism, a bicameral review will allow the most effective use of time and manpower for those agencies that are still involved in protecting, investigating, and compiling information for our continued campaign against terror.

Third, by offering to approach the investigation in this manner, the committees have secured White House assurances that access to critical information necessary to do a thorough job will absolutely be provided.

And, finally, the unprecedented nature of the terrorist attacks demands an unprecedented response. An inquiry by the elected representatives of the people will ensure that we give the American people the explanation they deserve regarding the events of that infamous day.

The inquiry will consist of joint hearings, both open and closed, and will be conducted once the initial data gathering and interviews are completed. The inquiry is expected to last through the 107th Congress and could quite possibly extend into the next Congress, though this resolution only authorizes funds for this Congress.

Should the work continue into the 108th Congress, the House rules regarding interim committee funding will be used to continue funding the committee, the inquiry, and all other committees as usual.

So, Mr. Speaker, we come to the floor today with a resolution to authorize $1.6 million in additional spending authority for the House Permanent Select Committee on Intelligence. Although the committee already received an increase in its funding for efforts regarding terrorism, that effort is looking more broadly into terrorism and our Nation's preparedness rather than focusing in, in a comprehensive way, on the specific day of September 11. As I stated earlier, the resources made available to the committee which were allocated in the beginning of the committee funding process for the 107th could not have possibly taken into account what happened to this country on September 11. That is why it is necessary for us to augment both the funding levels and staff levels for the committee so that they may conduct a proper inquiry.

The amount being requested is approximately one-half of the total amount needed to hire staff and cover related administrative expenses, such as office supplies, travel, and computer systems. The other body, in separate action, has already allocated funds to its committees for the same purposes.

With that, Mr. Speaker, I ask for support of this resolution. We all know if we fail to learn from the mistakes of the past we are doomed to repeat them. I hope this inquiry will help us to learn from our mistakes so we can avoid a recurrence of these horrific events.

In closing, I would also note that this House was ahead of its time. Because last year, when we did the funding resolution, we gave the proper increases to the Permanent Select Committee on Intelligence before we ever could have dreamed what would have happened here in the United States. This, again, I think, is ahead of its time so that we can look back into what happened to help us in the future, not only to protect the United States but to, frankly, protect the world.

I thank the distinguished gentleman from Maryland for not only his cooperation but for yielding to me.

Mr. HOYER. Further reserving my right to object, Mr. Speaker, I yield to the gentlewoman from California (Ms. PELOSI), the distinguished ranking member of the Permanent Select Committee on Intelligence and the minority whip.

Ms. PELOSI. Mr. Speaker, I thank the gentleman from Maryland for his leadership and that of the distinguished chairman for facilitating this request and bringing it to the floor.

Mr. Speaker, I support this legislation.

Next Monday is the six-month anniversary of the terrorist attacks in New York City, Pennsylvania, and at the Pentagon. With the war against the al Qaeda network, and terrorism generally, well underway, it is important that the process of determining why the September 11 attacks were not prevented receive appropriate attention in Congress.

The performance of the intelligence agencies is an essential part of the September 11 story, and it is the responsibility of the House and Senate intelligence committees to thoroughly assess that performance. It is the judgment of the committees that a joint inquiry is the best way to get at the facts and recommend changes as supported by the facts. The committees intend that the inquiry will ascertain why the agencies did not learn of the attacks in advance and identify what, if anything, might be done to better position the agencies to warn of, or prevent, future terrorist actions against the United States.

The joint inquiry will be a considerable challenge and will require additional resources, primarily for staff. The measure now under consideration provides these resources, and I urge its adoption so that we may proceed as quickly as possible on this important task. Additional resources and staff positions have been provided by the Senate. It should be made clear that, although we intend for this inquiry to be comprehensive as far as the intelligence agencies are concerned, it will not be exhaustive of all of the issues surrounding the September 11 attacks. Other committees may want to examine matters within their jurisdiction and, at some point, it may be appropriate to consider the creation of an entity outside of Congress to take an across the board look at all of the components of the September 11 disaster. Our purpose in undertaking this joint inquiry, and in seeking funds to do it properly, is not to foreclose any other review, but to ensure that the intelligence committees properly discharge the oversight responsibility given to them by the House and Senate.

Mr. HOYER. Mr. Speaker, under my reservation of objection, I certainly join the chairman of the Committee on House Administration in strong support of this funding resolution, which I think is appropriate, and I congratulate both the chairman and the ranking member, as well as the other body for the process that they have adopted to proceed on this matter, which I think will be efficient and effective.

Mr. GOSS. Mr. Speaker, I rise today to express my strongest possible support for the passage of this resolution, which will provide urgently needed funds to support an unprecedented bipartisan and bicameral inquiry. This joint congressional inquiry, involving the Members and staff of both the House Permanent Select Committee on Intelligence and the Senate Select Committee on Intelligence, has several critical tasks: first, to review the events and the actions of our Government leading up to the terrorist attacks of last September; second, to ascertain accountability within our Government for the management of counterterrorist and homeland security functions, focusing specifically on our intelligence mechanisms; and third, to ensure that our Government is properly informed and prepared with accurate and timely intelligence to stop current and future terrorist attacks against our Nation and our people.

This joint inquiry is being handled on an urgent basis by the leadership of both parties in both Houses and with the full cooperation of the relevant agencies of the executive branch. This inquiry is critically important to enhancing our Nation's security against the threat posed by global terrorism and to strengthening public confidence that our intelligence and law enforcement agencies are fully prepared to defuse the terrorist threats that now confront our Nation.

I want to thank the Ranking Member for her participation and her counsel in structuring the joint inquiry with the other body. I also want to express my sincere appreciation to Chairman NEY and Mr. HOYER of the House Administration Committee for their close cooperation and advice in moving the joint inquiry forward on an expedited basis.

Mr. HOYER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The Clerk read the resolution, as follows:

H. RES. 359

Resolved,

SECTION 1. FURTHER EXPENSES OF THE PERMANENT SELECT COMMITTEE ON INTELLIGENCE.

For further expenses of the Permanent Select Committee on Intelligence, there shall be paid out of the applicable accounts of the House of Representatives not more than $1,600,000.

SEC. 2. LIMITATION.

Amounts shall be available under this resolution for expenses incurred during the period beginning at noon on January 3, 2002, and ending immediately before noon on January 3, 2003.

SEC. 3. VOUCHERS.

Payments under this resolution shall be made on vouchers authorized by the Permanent Select Committee on Intelligence, signed by the chairman of such committee, and approved in the manner directed by the Committee on House Administration.

SEC. 4. REGULATIONS.

Amounts made available under this resolution shall be expended in accordance with regulations prescribed by the Committee on House Administration.

SEC. 5. ADJUSTMENT AUTHORITY.

The Committee on House Administration shall have authority to make adjustments in amounts under section 1, if necessary to comply with an order of the President issued under section 254 of the Balanced Budget and Emergency Deficit Control Act of 1985 or to conform to any reduction in appropriations for the purposes of such section 1.

The resolution was agreed to.

A motion to reconsider was laid on the table.

SPECIAL ORDERS

The SPEAKER pro tempore. Under the Speaker's announced policy of January 3, 2001, and under a previous order of the House, the following Members will be recognized for 5 minutes each.

HONORING OZARKS SOLDIERS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Missouri (Mr. BLUNT) is recognized for 5 minutes.

Mr. BLUNT. Mr. Speaker, in the last few days, beginning on Saturday, two individuals from my congressional district gave their lives in Afghanistan: one, a 34-year-old warrant officer in Special Forces; another, a 31-year-old sergeant, both of whom had clearly dedicated their lives and, in so many ways, dedicated their own families to protecting our freedoms and protecting our country.

As I was thinking about what I wanted to say today about them on the House floor, I read an editorial from a Springfield, Missouri, newspaper yesterday; and I think I would like to just enter that editorial in the RECORD and share it today as we think about the fact that we honor these men and women and the others who are putting their lives in harm's way for us.

Let me share that material with the Speaker and the Members here and then enter it fully in the RECORD. The editorial starts out: "From the beginning of the war in Afghanistan, President Bush has warned Americans to be prepared for casualties. Now we have them, and the pain of this war has been felt in the Ozarks. It has taken two of our neighbors: Chief Warrant Officer Stanley Harriman. Sergeant Philip J. Svitak.

□ 1300

"Harriman, a Strafford High School graduate, was the first American to die in the ground offensive on al Qaeda and Taliban strongholds in eastern Afghanistan. Svitak, of Joplin, was among the seven soldiers killed in incidents involving two American helicopters.

"They are not faceless casualties. They were flesh-and-blood men who touched others in their hometowns. Harriman was described as soft-hearted, sensitive to the suffering of others, yet a fierce competitor on the football or baseball field. Svitak was an only child who wanted to be like his parents, who both served in the Navy in the 1960s. Each leaves a wife and two young children.

"Harriman and Svitak were devoted to the Army and their country. 'Stanley died for you and you and you,' his wife, Sheila Harriman, told reporters at Fort Bragg, North Carolina, 'and for your freedom. All Stanley ever wanted to do was be an American soldier.'

"Both soldiers knew the dangers of their jobs. Both knew that by making the military their career, they could be asked to put their lives on the line for their country at any time.

"Roseann Svitak said her son 'told me before he went, Mom, the terrorists have to be stopped.' He said, 'If they send me over there and anything happens to me, I am proud to die for my country.'

"Both men were sent. Both died, leaving friends, family, children to grieve and remember. They join John Willett and Craig Amundson, Ozarks natives who died in the September 11 attacks on New York and Washington. They are, for us in southwest Missouri, the faces of this war.

"Six months after those attacks, the Nation has largely returned to life as normal. Networks seek to reduce news programming to make room for more entertainment. Crash reality shows move back up in the ratings. Politicians again plot for their advantage.

"Yet the war continues, not a mop-up action but a full-scale assault. Our neighbors are on the front line. Our neighbors are dying. That ultimate sacrifice ought to mean something. The politicians will tell us it is in defense of liberty, and they are right. But it is up to us to decide what we will do with this liberty. Will we use it to keep the government honest, to be aware of what is happening in the rest of the world, to assure all Americans equal opportunity? Or will we use it to pay more attention to contestants on Survivor than soldiers in Afghanistan?

"Ozarkers are dying for freedom. How will we honor their sacrifice?"

[From the Springfield News Leader, Mar. 6, 2002]

HOW WILL WE HONOR OZARKS SOLDIERS?

Harriman and Svitak died fighting for our freedom.

From the beginning of the war in Afghanistan, President Bush has warned Americans to be prepared for casualties. Now we have them, and the pain of this war has been felt in the Ozarks. It has taken two more of our neighbors:

Chief Warrant Officer Stanley Harriman.

Sgt. Philip J. Svitak.

Harriman, a Strafford High School graduate, was the first American to die in the ground offensive on al-Qaida and Taliban strongholds in eastern Afghanistan. Svitak, of Joplin, was among the seven soldiers killed in incidents involving two American helicopters.

They are not faceless casualties. They were flesh-and-blood men who touched others in their hometowns. Harriman was described as soft-hearted, sensitive to the suffering of others, yet a fierce competitor on the football or baseball field. Svitak was an only child who wanted to be like his parents, who both served in the Navy in the 1960s.

Each leaves a wife and two young children.

Harriman and Svitak were devoted to the Army and their country. "Stanley died for you and you and you," his wife, Sheila Harriman, told reporters at Fort Bragg, NC, "and for your freedom. All Stanley ever wanted to do was be an American soldier."

Both soldiers knew the dangers of their jobs. Both knew that by making the military their career, they could be asked to put their lives on the line for their country at any time.

Roseann Svitak said her son "told me before he went, 'Mom, the terrorists have to be stopped.' He said, 'if they send me over there and anything happens to me . . . I'm proud to die for my country.'"

Both men were sent. Both died, leaving friends, family, children to grieve and remember.

They join John Willett and Craig Amundson, Ozarks natives who died in the Sept. 11 attacks on New York and Washington. They are, for us in southwest Missouri, the faces of this war.

Six months after those attacks, the nation has largely returned to life as normal. Networks seek to reduce news programming to make room for more entertainment. Crass reality shows move back up in the ratings. Politicians again plot for their advantage.

Yet the war continues, not a mop-up action but a full-scale assault. Our neighbors are on the front line. Our neighbors are dying.

That ultimate sacrifice ought to mean something. The politicians will tell us it is in defense of liberty, and they are right. But it is up to us to decide what we will do with this liberty. Will we use it to keep government honest, to be aware of what is happening in the rest of the world, to assure all Americans equal opportunity? Or will we use it to pay more attention to contestants on "Survivor" than soldiers in Afghanistan.

Ozarkers are dying for freedom. How will we honor their sacrifice?

ASSISTING VETERANS WITH PRESCRIPTION DRUG COPAYMENTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. STRICKLAND) is recognized for 5 minutes.

Mr. STRICKLAND. Mr. Speaker, I rise today to urge my colleagues in this House to sign on to a bill which I have introduced, H.R. 2820. H.R. 2820 is a bill that would help our veterans.

In the early part of February, 2002, a decision was made to increase the prescription co-payment for veterans from $2 a prescription to $7 a prescription. To me this is an unacceptable action and it hurts our veterans, many of whom live on fixed incomes and simply cannot absorb this increased cost.

To put it in perspective, the Veterans Hospital in southern Ohio, where I serve, tells me that the average veteran who gets a prescription medication there on average gets 10 or more prescriptions. So if we take $7 a prescription and we multiply it by 10, that is $70 per month. Many of these veterans receive a 3-month supply of medications at a time. Three times $70 is $210. If I multiply the cost of a 1-month supply of medication at $7 per prescription for 10 prescriptions, that is $840 per year.

Mr. Speaker, I think this is an unnecessary burden to place upon our veterans. We hear a lot of lofty rhetoric in this Chamber about how we appreciate the fact that so many American citizens are willing to serve in our military, and many of them give their lives and limb in order to protect our freedoms.

It seems so inappropriate at this time in our Nation's history to place this additional burden upon our veterans. So I have introduced H.R. 2820. I have over 75 cosponsors at this time, bipartisan cosponsors, and I am happy to say the gentleman from Ohio (Mr. NEY) has introduced this legislation with me. This legislation is very simple. It would simply return the cost of the co-payment for a prescription drug from the $7 that has been imposed down to the $2 level where it has been. It would freeze the co-payment at the $2 per prescription level for the next 5 years.

Mr. Speaker, surely when we can find the resources to give a $15 billion bailout to our airline industry, surely when we can find the resources to give tax breaks, surely when we can find the resources to do a whole host of other things in this Chamber, we can find the resources that will enable us to keep from imposing this additional burden upon our Nation's veterans.

So, once again, I ask all of my colleagues of both parties in this House to simply cosponsor H.R. 2820 so that we can remove this burden which has been placed upon our veterans.

Mr. Speaker, in closing, I would like to mention another burden for our veterans. For category 7 veterans, there is a proposal that we would place upon them an annual $1,500 deductible when they go to our veterans' health centers and clinics and hospitals to receive medical attention. This also seems like something that we should take action to prevent in this Chamber. I urge my colleagues, this is something that we can do. We ought to do it. I believe if Members talk to veterans around the country, this is something that they are keenly aware of and keenly object to.

We can solve this problem regarding the prescription co-pay by passing this very simple but important piece of legislation, H.R. 2820.

PRESIDENTIAL DECISION ON STEEL IMPORTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. BROWN) is recognized for 5 minutes.

Mr. BROWN of Ohio. Mr. Speaker, I rise to comment on President Bush's decision to levy up to a 30 percent tariff on steel imports coming into the United States. I am glad the President took a step forward, something that we hoped he would do, but he did much less than we asked. Steel companies, steelworkers, elected officials representing steel States, asked the President to levy 40 percent tariffs for 4 years, something to level the playing field for imported steel in the United States.

The International Trade Commission had found that steel companies in foreign lands, especially in Russia, Brazil, Korea, and China had violated international trade laws by subsidizing and selling into our market illegally priced steel, so-called dumping. The President had the option of levying tariffs up to 40 percent for 4 years. That is clearly what we needed for LTV in Cleveland, for RTI in Lorain, for CSC in Warren, Ohio, and steel companies all over this great country from Alabama to Ohio to Michigan, to Indiana, wherever steel is made in the United States.

Unfortunately, the President's decision to do up to 30 percent, understanding that it was not 30 percent in every case but up to 30 percent for only 3 years, fell short on that mark. It also fell short because the 30 percent is phased out during those 3 years.

The second thing that the President neglected to do was deal with the issue of legacy costs. That is those costs of health care and pensions that companies have promised to steelworkers that in many cases the commitment will not be met.

So on the one hand steelworkers with their health care are left out in the cold, those people who are retired. Second, those companies that absorbed legacy costs are in a competitive disadvantage with the rest of the world because most countries have universal health coverage provided by a government program, while in the United States in our employment-employer based health care system, the steel companies and other companies pay for the cost of the health care. So that puts us at a competitive disadvantage there.

It also is an argument for universal coverage because all American companies are at a competitive disadvantage when the government provides the health care in a Medicare-type system that most countries around the world have. Yet, in America, employers must pick up those health care costs.

The third problem with the President's decision on steel and where he fell short and the reason for my disappointment is that the President opened up several loopholes in his tariff proposals, in his tariff enactments. For instance, there is a Mexico exception which allows companies in China, Korea, Japan and other places to sell their steel into Mexico at very low or nonexistent tariff rates. Then Mexico will sell that steel into the United States at a zero tariff because of the North American Free Trade Agreement.

So that Mexico exception allows those companies which have illegally priced their steel according to the International Trade Commission to back-door their steel through Mexico into the United States at no tariff. All Mexico has to do, if even that, is a Mexican company needs to do a little value added to the steel, stamp Made in Mexico, and send it into the United States.

Mr. Speaker, that could be a difficult thing to do, except that we do not police our borders well enough. We do not have tariff and customs inspectors in as nearly a comprehensive way as we ought to have.

Those are the problems with the Bush tariff plan. One, it is not 40 percent over 4 years. It falls woefully short. Second, it does not deal with the legacy costs which is unfair to those retirees. LTV workers lose their health care March 31. Other retirees have already lost theirs. It does not deal with the legacy costs for those companies that are continuing to produce steel. And, third, it creates the Mexico exception. That will hurt our steel industry. It is a question of national security. That will hurt our steelworkers. It is a question of our communities.

TRIBUTE TO TECHNICAL SERGEANT JOHN A. CHAPMAN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. MCINTYRE) is recognized for 5 minutes.

Mr. MCINTYRE. Mr. Speaker, I offer my deepest condolences to the family and friends of Technical Sergeant John A. Chapman of the Twenty-fourth Special Tactics Squadron of the United States Air Force who gave his life in the service of our country. I join with his family and friends in paying tribute to him for his ultimate sacrifice on behalf of our Nation. My prayers are for his family.

John Chapman was a decorated soldier who readily and courageously participated in Operation Enduring Freedom. Among his many awards and decorations were: two Air Force Commendation Medals, two Air Force Achievement Medals, and two Joint Service Achievement Medals.

This tragedy should act as a reminder to all Americans that the liberties we hold dear are neither free nor secure. Our freedoms are earned and protected by our servicemen and women. They risk their lives so that freedom may survive.

☐ 1315

Technical Sergeant Chapman's courage in the face of danger reflects a character born of his commitment to his family as a devoted husband, father, and son, and his commitment to his many friends and to our country.

We owe Technical Sergeant John Chapman our sincere appreciation for his 17 years of committed service to our Nation. His determination, devotion, and dedication to freedom should serve as an example for us all. It is important that we not only remember John as an excellent and dedicated airman and family man but also as the American hero that he is.

May God bless him and his family and those who have served with him. May God bless our great country. We indeed are a better Nation because of John Chapman and those who serve with him in our Nation's Armed Forces.

IMMIGRATION

The SPEAKER pro tempore. Under the Speaker's announced policy of January 3, 2001, the gentleman from Colorado (Mr. TANCREDO) is recognized for 60 minutes as the designee of the majority leader.

Mr. TANCREDO. Mr. Speaker, recently a study was conducted by the GAO, the General Accounting Office. It was to look into the degree of fraud in the immigration benefits program. I have oftentimes, Mr. Speaker, taken the microphone for the purpose of identifying what I believe to be our serious concerns in this particular agency. There are, of course, many people who work in this agency, many people who are assigned especially on the border, assigned with the task of trying to defend our borders, trying to actually make sure that people do not come into the country illegally.

This is an overwhelming task. I commend those people for doing everything they can to uphold the laws of the United States. But it is something I have likened to trying to keep back a flood with a sieve because of the variety of conflicting laws that have been passed by this Congress, because of the culture within the INS which has absolutely no support for upholding the laws, the immigration laws of this land, and because they are just overwhelmed by the numbers. I have often brought those things to the attention of the Congress. I have personally been to the border. Several Members and I took a CODEL down there just a month and a half ago or so. We observed firsthand the problems that are confronted by our people there on the border. I know and I sympathize and I understand their problems. They not only face the daunting task of trying to deal with the hundreds of thousands of people a day that come into the United States and determine whether or not they are coming here legally, for what purpose, for how long and that sort of thing, and they not only face the, as I say, conflicting laws that have been passed by Congress, some designed to enhance border security, others designed to degrade it, but they are also, it is apparent now, working within a system that is broken beyond the ability for us to fix it. In their own system, they realize that they cannot look to anyone higher up on the ladder, those people that are there today who, as I say, are in the trenches, either on the borders or the people who work in customs, all of them recognize that the system in which they are operating is broken.

Recently, I returned from overseas. As my wife and I were going through customs at JFK in New York, the lady looked up and she said, "I think I recognize you. I actually watch C-SPAN. I think I recognize you. Aren't you on?" I said, "Yes, I have been on often talking about immigration-related issues."

She just hung her head the minute I said it, she said, "Oh, yeah, that's right, it is such a mess. Don't get me started on this. I don't know where to start. It is a mess." Her brief response to the word immigration, immigration policy, is I think probably the best analogy I can give you to the whole system. It is a mess. That is the best example I can give you, the best definition of the system I can give you. It is a mess. This recent report of the GAO is just the most recent example of the problem.

We have actually had over the course of the last 10 years several reports done by a variety of different agencies all on the INS talking about the inefficiency in the organization, their inability to get the job done, even referencing their lack of a true desire to get the job done.

Mr. Speaker, the INS, as you know, is divided into two parts at the present time. They have two different functions within the same organization. Maybe that is part of the problem, because these responsibilities conflict with one another. One part of the INS, Immigration and Naturalization Service, is designed to be what I call the immigration social work side, that is, to find benefits for people coming to the United States, hopefully legally, help them get their green card, help them get visas, all the things that are attendant to people coming into the United States legally and then being able to function when they get here. All of that stuff is part of their responsibility.

Then on the other side, of course, is the enforcement arm. The INS is supposed to be the agency to which we go when we say, look, we are concerned about the number of people coming across the border illegally; we are concerned about not knowing who is here, when they are here and what they are doing here and we are supposed to rely on them to do something about it.

But, as you know, as most of the Members of this body know, the INS is completely incapable and to some extent it is not really desirous of taking on that role. There are literally scores of examples to show that. The fact that 19 of these hijackers on September 11 came here on visas, some of them, of course, then expired, some people were here illegally at the time that it happened and the inability of the INS to control that process is a dramatic example, one dramatic event that happened as a result of their inability to actually know who is in the United States, know for what purpose they are here and know when they have overstayed their visa, for instance, so that they can in fact be deported. But the INS pays little, if any, attention; and they will tell you when you call them and ask them, do you actually go out and look for people who are here illegally. Their answer is, Well, of course not. That's not our job.

I was on the radio not too long ago with a lady who is the spokesperson for the INS in the Denver area and she said, really, that is not what they do anymore. They do not go out on sites and look for people who are here illegally. Really, our job is just to explain to them why they are here illegally and then help them get benefits. That was her statement. It was almost incredible, but that was what she said. That is what they think, that it is not their job. They will say, well, we do not have the resources, we do not have the time; but what they actually should add to it is, we do not have the inclination. It is really not in our makeup. It is not what we want to do. We want to be the social work side of it. That is what we can do well. We do not really do this very well, this sort of becoming a policeman. We do not like that idea. So they shy away from it.

We have had calls in my office from incredibly frustrated INS inspectors, from INS agents, sometimes who have been on board for 30 years. The caucus that I head, the Immigration Reform Caucus, has actually held hearings bringing these people in so they can talk and vent some of their frustration. It is incredible the stories they tell. They have every reason to be frustrated, because they work for an agency that is dysfunctional; and they are trying to do a job that is not supported by the agency itself. It would drive you nuts. I can certainly understand it.

We have had calls from judges who will tell us that they are immigration law judges, and they are also frustrated by the fact that day after day after day they see people in front of them who have committed crimes in the United States besides, by the way, being here, probably many of them, illegally but they have committed crimes and they are aliens and so they are ordered to be deported by a judge. But because they turn that function over to the INS right after the gavel falls and the person is ordered to be deported, they turn that function over to the INS and the INS simply looks the other way.

So at this point in time, we have at least, and I underline at least, because when you ask the INS for specific information, they come back with the same response. In fact, it is the logo that I have designed for the INS. It should be on their letterhead. It should be on their Web site. When you click on INS, a little figure should pop up that looks like this, a guy shrugging his shoulders going, "I don't know, I'm not sure. Maybe. Could be." Because when you ask them anything, that is exactly what happens. They respond with, "I don't know. I'm not sure. Could be." When you ask them how many people have actually been ordered to be deported but have not in fact left the country, you get this: "I'm not sure. I don't know." Probably around 300,000, they will say, 300,000 people.

Remember, Mr. Speaker, we are not talking about people who are just here illegally. As we know, that is probably 10 or 11 million people here illegally. We are not talking about people who have just overstayed their visas. Certainly they number in the millions, also. We are talking about people who have violated the law. They have robbed a bank, they stole money from somebody on the street, they shot somebody, they raped somebody and then they got arrested. And because of their violation of an American law, they were ordered to be deported. But they do not get deported. They walk away. No one has the slightest idea where they are, 300,000 of them. But the INS says, well, that is not really my thing, that is not really what I am too interested in. We are really on the immigration social work side of things. That is where we concentrate our efforts and that is certainly where we concentrate all of our resources. We have quadrupled the budget for the INS over the last several years. Quadrupled. It has gone almost entirely to the social work side. Very little has gone into defending our borders.

Time and time again we have seen that the INS has absolutely no concern about the people who are here illegally. If you call right now, if a local policeman, for instance, picks somebody up on the street, it may be a traffic violation, it may be disturbance of the peace, whatever, and they find that that person is here illegally, they could, although hardly anyone does anymore because they know it is futile, they could call the INS and they could say, look, I have someone here who has done X, Y and Z and they are here illegally. What do you want me to do? The INS would say, well, go ahead, let them go. Get their name, and we will try to get back to them. Sometimes even people that have gone through this process and are ordered to be deported or who are coming up for their deportation will get a letter, it is actually called a "run letter" in the lexicon because it means the minute you get it, it says something like, look, we know you have violated the law so please report here in 2½ months for deportation.

Yes, right, thank you, of course I will be there with my bags all packed. I do not think many people show up. It is called a run letter for a purpose, because when they get it they run. It is idiotic. Why should we even waste the stamp? The local law enforcement agency calls up and says, these people are here illegally and they tell them, let them go. We have had in Colorado instances where people have been picked up on the highway for violating some traffic law, the van opens, there are 15 people inside, they are all illegal. That is when they are lucky, that is when they have not run off the road and had the van get into an accident. We have had, of course, many people killed on the highways. It ended up that they were being transported through the State of Colorado. It is a big transportation hub, I am told, for illegal immigration.

But, of course, we call the INS and nothing happens. They tell them, we really have not got the time, we have not got the people, so just forget about it. So at this time very few people actually even do anything; very few law enforcement agencies do anything like, say, call the INS because they have got somebody. They know it is futile. They know there is absolutely no reason to do it. And even after September 11, even after that, we find very little happening inside the INS that would lead us to believe there is a change of heart, a change of the culture, an emphasis on trying to actually keep people out of the country who are here illegally.

It is incredible that we can say that after the most horrific event this country has ever experienced in terms of an act of terror, and, I pray to God, the most horrific event it will ever experience. But, of course, you and I know, Mr. Speaker, we have been told over and over and over again by our Permanent Select Committee on Intelligence here in the House, by members of that committee, we have been told by members of the Armed Forces, we hear it from the Secretary of Defense almost nightly that, in fact, we probably will be experiencing other acts of violence of this nature, of terrorism.

Once again I pray to God that none of them would ever reach the level of damage as that that occurred on the 11th of September, but we do not know. We know, we believe, something will happen. We hear that all the time. There are alerts that are being offered, issued all the time. Yet even with all of that, we have not been able to get the INS, and this Congress, as a matter of fact, we have not been able to get anything out of this Congress that would force the INS to do a better job.

□ 1330

Amazing. We have responded to the President's call by increasing the budget for the armed services and for the homeland defense, and I am totally in favor of it. I vote in favor of very few budget increases on this floor, but I certainly do vote for increases in the area of defense for one reason: It is our single responsibility. It is the most important thing we do here.

I know it is hard to believe, but I certainly think the Constitution would back me up when I say it is more important; the defense of this Nation is more important than health and human services. It is more important than the education budget. It is more important than transportation. It is more important than anything else we do. So I am more than willing to increase the budget for those agencies through my vote.

But what is amazing is that we have taken very specific and very direct action in beefing up the military, and thank God we have. They will; as the President said so eloquently when he addressed the Nation, they will always make us proud, and they do. They are fighting overseas today as we speak. American blood is being shed in foreign lands in defense of this Nation, and it is the right and proper thing to do.

Who knows? We may soon be in other countries besides Afghanistan. I would agree with the proposal that we need to do something wherever terrorism raises its head or shows its tentacle, whether it is in Iran, Iraq, Georgia, or the Philippines. Wherever it is, I am willing to say we should try and go there and stamp it out.

But why is it, Mr. Speaker, that we are so willing and able as a body to do that, while we are just as unwilling to do anything significant to improve our own defenses here in this country? How is it that we can ignore the fact that we still have people coming across the borders illegally? We still have thousands of people coming across the border every single day illegally. We have not really paid much attention to that. We have paid mostly lip service to it.

It is, for one thing, a fact of political life that we are concerned about raising the issue of immigration reform for fear of the political fallout in the United States. But from whom, I ask, Mr. Speaker. From whom should we be expecting opposition?

Yes, certainly from the Democratic Party, because they recognize that massive immigration will eventually lead to what they believe will lead to more voters for the Democrat candidate. So they will do anything they can, and have done everything they can, to stop any sort of immigration reform, and they want them essentially to come in, legally or illegally, it does not matter. Eventually, they believe it will accrue to their political benefit.

On our side, we, of course, hear from people who are business owners, who say to us, I have to have these people because no one else will do the job. So turn a blind eye to illegal immigration. Let them come in. We need them.

We certainly do not want to be seen as a party that is anti-immigration, or anti-ethnic group; and certainly, I guarantee my colleagues, Mr. Speaker, I am not either of those two things. I am not anti-immigration. I certainly have nothing against any ethnic group coming into this country.

The issue is, how much, how many, for what purpose, and will we be able to control it? That is the issue. Do we want open borders? Do we want the elimination of our borders?

There are people who, in fact, do. President Vicente Fox has stated very publicly that he expects in the next 20 years to not have a border between the United States and Mexico. I have talked with members of his cabinet who share that exact same vision: The head of a newly created agency in Mexico that would translate into the Ministry for Mexicans Living Outside of Mexico, an interesting cabinet level position, I would certainly say.

I have talked to Mr. Hernandez, the newly appointed minister in this particular cabinet level department, and he has stated clearly to me that he does not believe that there are two countries. He says they are just a region. That is all. It is not two countries, he says.

Well, now, this may be a very legitimate debate topic. There may very well be people on the floor of the House and in the administration in the United States, and certainly we know in Mexico, who believe that we should not have borders, that we should meld ourselves into sort of a United States of the North American continent and beyond, perhaps, South America, too. A European Union model. I know all of these things are actually in the sights of many people. That is what they think we are going to do.

Well, okay, let us debate that issue, right here, a bill on the floor. I would like a bill to go the committee of reference to eliminate the borders and to join hands with all of the people on the North American continent in some sort of confederation, with common currency, all of the stuff that the European Union is doing.

I will vote no, I will tell my colleagues. I will vote no. But that is okay. That is just my vote. If a majority of the Members of this body and the President agree, that is the way it will be.

But what I do not like happening, Mr. Speaker, is that that is exactly where we are heading, only without any sort of legal justification, without an actual law being passed, without a decision being made by this Congress or by this President. We will look at some point in time in the future back and say, gee, how did all of this happen? We sort of eliminated the borders. They do not really exist anymore.

Well, that may be true; and, as I say, it may be a good thing. I do not think so, but let us debate. Let us at least have this issue come to the floor. Let us not pretend that we are not just expanding immigration for all of these altruistic reasons.

There are political reasons, both in the United States and in Mexico, for massive immigration. It is the hope of a number of people in Mexico, of the government of Mexico that enough people will be here to eventually influence the policy of the United States vis-a-vis Mexico. It is the hope of people in the United States that we can somehow attract these people and get them involved. It is the hope of the labor unions that they can get all of the newly arrived immigrants, whether they are legal or illegal, into labor unions, so all of a sudden we have labor in support of massive immigration.

And then there are certainly altruistic reasons why even the President of the United States will support it.

I believe that the President is a man who does speak from his heart. I believe that. I go to bed every single night thanking God that George Bush is the President of the United States. Let me get that clear and out here on the table. And especially not the alternative that we had in the last election. So that is not an issue. I am a 100 percent solid supporter. No, I am not 100 percent, because this issue is one with which I disagree with the President. But I believe it comes from his heart when he is saying that he wants to expand immigration. I just think he is wrong.

I have a responsibility here to vote my conscience, and I certainly will do that, and I will speak out against it. It is not being disloyal to the President. It is simply an issue with which I disagree that he brings up, his point of view.

I believe that there are massive implications for immigration in the United States, especially in the numbers that we are talking about today. It is something we are going to have to deal with politically, economically, culturally. There are a whole raft of fascinating topics that can be brought up when we begin to debate on immigration. But as long as we are going to have borders, however, as long as there are still lines on a map that actually divide the United States from other places in the world, from other countries, then, of course, they should be meaningful.

What is the purpose of a border, we should ask ourselves, and what is our responsibility as a national government to defend them?

It is again a unique position we find ourselves in at the Federal level, establishing immigration policy. States cannot do it. States have to deal with our decisions. With our decisions to abandon the border comes a host of problems that confront every State in the Nation, some more dramatically than others.

California, Texas, New Mexico, Arizona, Florida and other States that face massive immigration, legal and illegal, are faced with building schools as fast as they can, building highways, building hospitals, their social service budgets are busting at the seams, all because they are being inundated by people coming here, as they have come for many years, to seek a better life.

There is one unique kind of situation that is developing, however, Mr. Speaker, in that we are witnessing an interesting phenomenon with the recent arrivals into the United States. Undeniably, they are coming here because they want a better life, because they see job opportunities that are not available to them in their homeland. That is exactly why most of our relatives, most of our grandparents or great grandparents or whatever, this is why they came. That is not different.

But, in the past, the vast majority of people coming into the United States were seeking not only economic opportunity but they were seeking a new life, a new experience, a new country that they could become a part of, and they were anxious to cut the ties that bound them to the country of their origin. They were willing to speak the language for a while but very, very intent upon moving to the English language as quickly as possible, because they recognized that it was the way they could move up the economic ladder in this country. And it was also because, as my grandparents used to say to each other, they would say "speak America," not English, but "speak America." They were the immigrants of the late 1800s, early 1900s.

They would get into arguments. I remember Sunday drives, and they would get in an argument in the back seat and my grandmother would yell at my grandfather, "speak America," because it meant more to her. She knew that the word was "English," but what she was conveying was something else. She was intent, as was my grandfather, on making themselves and their children and their grandchildren American in every way that they could.

Mr. Speaker, I am a relatively new immigrant, in a way. That is to say, I was born here, but my family is only third generation. I am only third generation. My grandparents came here, as I said, in the late 1800s; and it is intriguing to me that in my life, the second generation after that, there was absolutely no attachment to the country of my grandparents' birth, other than I knew where it was. We had the cuisine that represented Italian ancestry, and that was it, really. That was it. There was certainly no political allegiance that my or my grandparents or my parents held to the country from which they came.

Today, however, we are witnessing something quite different. We are witnessing a flood of people into the United States who do not wish to cut those ties. They wish to retain the political, cultural, and linguistic ties of the country of their origin, and we encourage it in the United States. Believe me, our own policies here, this radical, what I would call radical, multiculturalism certainly encourages that kind of separate status, the Balkanization of America.

I can tell my colleagues that this is the case. We can actually show empirical evidence. This is not just theory. It is a different sort of situation today because I think that has always been brought up whenever immigration issues are discussed that, well, it is different today than it was before. Well, it is different today. Today, there are 6 million people here in the United States, at least; this is our best estimate so far, at least 6 million people in the United States who claim dual citizenship. Now, this is an interesting thing. It has never been this high.

Well, for the longest time one could not do that in the United States, and one is not really supposed to now. You cannot really become a citizen. You are supposed to swear allegiance to the United States and no allegiance to any foreign dictator or potentate, I think the word is. But, in fact, people do retain their citizenship, as a result of Mexico allowing their citizens to retain their citizenship just a few years ago, and the numbers shot up to 6 million people.

□ 1345

Now, I am stating, Mr. Speaker, that I do not believe that we would have had this same phenomenon, not even the same percentage of immigrants coming to the United States in the early 1900s, late 1800s. I do not believe we would have had the same percentage of people seeking to retain their citizenship of the country of origin. Because they came for a different purpose.

Now, I am not suggesting that this is a nefarious thing, that these are not people coming here with the intent to do us harm for the most part. That is certainly true. But it does, in fact, bode ill for the United States. It really puts the emphasis on pluribus and not on unum. Out of many, one. It puts the emphasis on many, and we really do not get to the one. And that is happening to us, and most people I think understand it. I know that most Americans understand it.

Poll after poll after poll indicates a desire on the part of the American people and, by the way, even recent immigrants to reduce the number of people coming, to take a break, take a breather here, to not let people come in illegally, and to not do something like give amnesty for those people who are here illegally.

I will get to that in just a moment because, I am afraid to say it, but I am disappointed that I have to say it, but the fact is we will probably be once again facing this proposal. I know the White House is pushing it. I understand the leadership of the Congress; at least the House anyway, has agreed to bring it up, maybe even as soon as next week.

But let me go back for a moment to the INS and talk about my concerns there.

I have already discussed the incredible degree of dysfunctionality, if you will, in that particular agency, especially on the enforcement side. They are incapable or nondesirous of actually doing anything for enforcement. I think that is blatantly clear. I cannot imagine anybody here, no matter how supportive they are of immigration, I cannot imagine anybody actually defending the INS and their ability to actually accomplish anything.

And we must not think very much of it, Mr. Speaker. We must not think very much of the agency itself, because we just appointed a guy to the head of it, a good friend of the minority leader in the other body, a good friend of a number of Members in the other body. This is a gentleman that we appointed to head the INS. A nice man. I have met him.

Let me tell what you his qualifications are for the job. He was the Sergeant at Arms of the other body. That is it. That is it. He had been a staffer, I think, some many years back. He had been the Sergeant of Arms for years. Of course, he knew many Members over there; and, lo and behold, he is the new head of the INS. So we must not think very much of the agency, I suppose. It is sort of a toss or a throwaway.

We should think more about it because it is charged with an incredibly important function. It just does not carry it out, and it really cannot because not only, as I say, is the problem with the enforcement side but now comes that GAO report that I mentioned earlier on. February 15 the report was issued, titled "GAO Report Finds 'Pervasive and Serious Problems With Immigration Benefit Fraud' ".

Now, remember, Mr. Speaker, this is the other side of what they do. This is what they are supposed to do well. This is the social work side, and this is what they tout. This is what they will state that they are really all about.

The lady that I debated who was the spokesperson for the INS in Denver, this is what she said they do. They help people. They are there to get people their benefits. That is what she said.

Well, here is what the GAO report just found. "Immigration benefit fraud is a significant problem that threatens the integrity of the legal immigration system. Aliens apply to the Immigration and Naturalization Service for such benefits as naturalization, work authorization and adjustment of status. Immigrants benefit fraud involves attempts by aliens to obtain such benefits through illegal means."

Oh, my goodness. Could that be happening? Ask the INS, how much fraud is there, and they give you the low go. I am not sure. Probably a lot.

"The report also details the Immigration and Naturalization Service failure to root out fraud in the immigration benefits application process." In other words, they know there is fraud. They do not care.

The Chairman of the House Committee on the Judiciary, the gentleman from Wisconsin (Mr. SENSENBRENNER), stated, and I quote, "This report raises a whole host of troubling homeland security threats posed by an immigration benefits process wrought with fraud. In fact, the GAO study finds the INS does not know the extent of the problem."

There we go again. Hey, who knows? Probably a lot.

The gentleman from Wisconsin (Mr. SENSENBRENNER) continues, "Based on this report I am not confident that the INS is not giving green cards to al Qaeda operatives. We have a complete failure by the INS to take the steps necessary to protect the people of the United States and the immigration system itself from criminals manipulating the benefits process. These findings support the urgent need for a comprehensive legislative restructuring of the INS."

Is that not the truth? Underline comprehensive, by the way. Underline comprehensive.

We know what will happen in this body, Mr. Speaker. I am sure you are aware as much as anyone else how difficult it is to actually reform an agency of the Federal government and do so quite significantly, comprehensively, very difficult. We will take a stab at it. We will introduce something. It will get watered down in both Houses, and we will end up thinking, was this really what we were trying to do? Is this really reform? Maybe we have changed a few names.

I am worried about it, but, nonetheless, we have got to try to do something, again, as the gentleman from Wisconsin (Mr. SENSENBRENNER) says, "comprehensively."

Here are some of the findings from the GAO report. Now, please understand that the GAO is not an agency with a given bias here. These people, if anything, we would expect them to be more on the side of the agency itself that they are investigating. But get this, Mr. Speaker. A 90 percent fraud rate. A 90 percent fraud rate was found in one review of a targeted group of 5,000 petitions. A follow-up analysis of about 1,500 petitions found only one was not fraudulent.

Please let me repeat that. I just do not know if you got that. A 90 percent fraud rate was found in the review of the targeted group of 5,000 petitions. Follow-up analysis of about 1,500 found only that one was not fraudulent.

This is what they are supposed to do well, remember. "Benefit fraud is a comparatively low priority within the INS," it went on to say. "Without improvement in its benefit fraud investigations the INS's inability to detect the number of ineligible aliens improperly applying for benefits will be hampered."

Next, "A senior INS official has testified to Congress that criminal aliens and terrorists manipulate the benefit application process to facilitate expansion of their illegal activities, such as crimes of violence, narcotic trafficking, terrorism and entitlement fraud. GAO was told by an INS official that fraud is probably involved in about 20 to 30 percent of all applications filed." They wish it was that low.

"The INS approach to addressing benefit fraud is fragmented and unfocused. There is no assurance that INS reviews are adequate for detecting non-compliance or abuse during application processing."

These are all findings of the GAO study. This is not my analysis. This is the GAO policy of the part of the activity of the INS that they are supposed to do well.

"Some adjudication officers had to sneak over to the operations unit to discuss fraud-related issues because adjudication officers are discouraged from taking the time to discuss questionable cases with investigators.

"INS officials said that fraud is rampant across the country and out of control." That is the part they are probably sure of. I know there is a lot of it, they would say. "INS officials indicate that the immigration benefit fraud problem will increase as smugglers and other criminal enterprises use fraud as other means of bringing illegal aliens, including criminal aliens, into the country."

By the way, please understand we are not talking about Mexico here for these types of problems. We are talking about Russia. We are talking about China. We are talking about countries all over the world who are perpetrating this fraud in order to advance certain illegal activities.

"The INS fails to balance its responsibility to provide immigration benefits with its duty to detect fraud in the immigration process. The GAO concluded that emphasis has been placed on timely processing of applications, allowing quality to suffer. This has contributed to the increase in benefit fraud."

Now, this is the GAO report; and it probably, as most reports of this nature, only skims the surface. This is probably just the tip of the iceberg. But even if it is the whole thing, for heaven's sake, why would we not say we have a massive problem here?

Mr. Speaker, with this in mind, with this picture I have tried to paint of an agency, dysfunctional in nature, incompetent, inefficiently run, headed by a gentleman, again, nice enough fellow but who was the Sergeant of Arms at the Senate, that is it. That is it. This is the agency to which we entrust the sanctity of our border, maintaining that, creating it, because that certainly is not a place with which you can apply that term today.

This is to whom we turn in a time when terrorism poses enormous threats to our very survival. This is the agency that we turn to.

Now, when we were on the border, Mr. Speaker, as I mentioned to you not too long ago, several Members and I went down on a congressional delegation. We talked to literally scores of people who were working on the border at the time. We talked to our immigration officials. We talked to people in the embassy, people who were important for visa processing. We talked to people right on the border, border control agents; and to a person they recognized that they were facing unbelievable challenges and that they were not really doing all that well.

But what they said to us is, please do not do anything to make the job worse. And we said, well, like what? They said, like this amnesty issue. Do not do that again. Every time you start talking about amnesty up there, meaning here, the flood turns into a tidal wave. Because, of course, what do we think would happen?

Is it illogical to assume that if we allow everybody who is here legally or even a large portion of them if they are here illegally, if we allow them amnesty, would that not simply encourage a lot of people to come across the border in hopes of obtaining exactly the same thing in a short time and not going through the regular process, not doing what millions of other people have to do, fill out the paperwork, go through the process of immigration, wait in line and wait your turn? Why would not they just simply come across?

Well, they do. Of course they do. And they said, please do not do that again.

I got back here that night to find that, in fact, we were preparing an amendment to do exactly that. The President had asked for it. The leadership was preparing it. We had quite a little tussle in our conference about that, and a decision was made shortly thereafter to not pursue it. A wise decision, I think.

But because the President is going to Mexico in just a few weeks, just a couple of weeks, there is strong desire on the part of the administration to allow him to take with him this issue, an amnesty. So I am told in a relatively short time, maybe next week, the House will be once again debating whether or not we are going to give amnesty to people here illegally.

Now, again, it is almost incredible that we have to say that this is a bad idea. Again, I support the President in almost every single one of his efforts, domestic and foreign policy combined. But on this he is wrong.

We should not reward people for breaking our laws. And whether we call it a fine or just a revenue enhancement thing, having them pay a little extra money to get in here, I am told that maybe the thinking is having them pay $1,000 and that would be the fine for having broken our laws. What does that mean to the whole world? Come up with a grand and come on in.

□ 1400

That is all it means. It means do not go through the system. Do not be a fool. Why would you actually go through the system? Why would you wait in line? Why would you do it legally? There is an easier way. Come across the border, get into the United States through a visa, by any way you can, by ship, by plane, just get here, stay here, overstay your visa, meld into the populace at large and forget about it. Because pretty soon somebody will say "Olly, Olly, Ox In Free," and we will let them in.

This is a bad idea. It may be done for political reasons; it may be done out of all truism. I do not know. It does not matter. It is a bad idea. There is a security issue we must deal with.

Mr. SIMMONS. Mr. Speaker, will the gentleman yield?

Mr. TANCREDO. I yield to the gentleman from Connecticut.

Mr. SIMMONS. Mr. Speaker, I simply wanted to congratulate the gentleman on his brilliant articulation of the topic.

Mr. TANCREDO. Reclaiming my time, Mr. Speaker, I would say to the gentleman that we will see how brilliant it is once we get a vote on this issue and whether or not we are able to convince anybody, but I thank the gentleman for those kind words.

Mr. Speaker, I know there is an agreement of political muscle being applied on this. The Speaker of the House is going to bring it, the President of the United States wants it, but most people in this country do not. Even yesterday, Mr. Speaker, something very interesting happened. I was told about this, I did not witness it myself; but I understand the President was speaking to the National Hispanic Chamber of Commerce and he was getting applause in all the right places for everything he said and everything he was doing in talking about the troops, talking about our war against terrorism; and then he said, and by the way, I am going to push for 245(i) extension. There was not, as I am told, there was not a single person in the audience who put their hands together in applause.

This is not something that most people who came here legally want. They understand the problem. They do not want to encourage illegal immigration. They came here legally. They know that that is the right way to do it. We should not be pandering to any other groups or organizations, to the immigration lobbyists. We should not be doing that. We are not going to benefit from it politically. Nothing we will ever do will ever satisfy groups like La Raza and others, these immigration advocacy groups. Nothing will ever satisfy them until the complete elimination of the borders actually occurs.

It is not a good idea. Every time I go to Mexico and I talk to them in Mexico, I ask them, what is it they are looking for? They always talk to me about the circularity. They want people coming to the United States, said the foreign minister, we want people coming to the United States, we want them working, we want them sending money back to Mexico, and then, as President Vincente Fox said, I want them coming home to retire in Mexico. Well, I would say that I am all for the circularity issue, but I would narrow the time frame quite dramatically to something we call a "guest worker program."

People need a job, and people need workers. Great. We establish a guest worker program, one that really and truly is viable. People come in, they take the jobs that are available for them, and we protect their rights as workers. We do not let them be abused by employers who may want to take advantage of them because they would be here illegally under other circumstances. So we can protect their rights and also protect our own rights as a Nation by determining who comes and how many and how long they stay by establishing a good guest worker program.

But they do not want that. They simply want us to abandon the border. They do not want people just coming to the United States working and then going home; they want them just coming to the United States. And, as I say, there are political reasons for that in Mexico; there are political reasons for that here in the United States. But we should at least speak out on it. We should at least speak out against it.

For one thing, Mr. Speaker, we would be giving the task of determining who is eligible for this amnesty to the Department of Justice and, more specifically, to the, guess what, to the INS. Now, Mr. Speaker, what more do I have to say about this organization that could possibly convince the people here that this is not the right organization to give such a responsibility to?

I cannot imagine that anybody thinks that fraud would not be rampant in all of the applications, or at least a huge majority that would be approved by this organization. Because, after a while, they just get the stamp out. As the clock winds out, they just get the stamp out. I would go back to this last comment that was made about the INS, about their only real intent is to move the paperwork quickly and efficiently. That is all they care about.

So they get the stamp out, they will let people in, and they will not have gone through a background check that is the same kind of background check they would have in the country from which they originated. And, therefore, we become even more vulnerable to the kind of terrorist activity that we have seen and that we anticipate.

Mr. Speaker, there are many, many battles that we will fight with regard to this immigration issue, some very, very broad in nature, some very specific. This is a specific one. Extension of 245(i). People listening to this might hear that, but that is simply a euphemism for the word "amnesty." This is not a good thing for us to do. It is not good public policy. Most people in the United States agree with that statement.

Why are we doing it? What is the reason we are in such a rush to get this in front of us? Why is there so much pressure being placed on us to do something most people in the country are absolutely opposed to, and in their heart of hearts, I think most Members are absolutely opposed to it? How they will vote, I am not sure, because there is, of course, this element of having the administration backing it. But I assure my colleagues that whether this administration or any other supports this kind of proposal, it is the wrong thing to do. And I for one will speak out against it as loudly as I can, as vociferously as I can, and as often as I can.

I recognize fully well that there are only two things I have in this body, and that is my voice and my vote; and I will use both of them as effectively as I possibly can to stop what I believe to be a tragedy in the making, and that is the disuniting of America, as Arthur Schlesinger, Jr., puts it in his brilliant essay, "The Disuniting of America."

That is really what the issue is about here, whether this Nation will actually sustain itself. And, therefore, it is my responsibility to speak out against it regardless of who is pushing it, the President or Speaker.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 1983

Mr. SIMMONS (during special order of Mr. TANCREDO). Mr. Speaker, I ask unanimous consent that my name be removed as a cosponsor of H.R. 1983.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

APPOINTMENT OF ADDITIONAL CONFEREES ON H.R. 2646, FARM SECURITY ACT OF 2001

The SPEAKER pro tempore (Mr. LAHOOD). Without objection, the Chair appoints additional conferees on the bill (H.R. 2646) to provide for the continuation of agricultural programs through fiscal year 2011, as follows:

From the Committee on the Budget, for consideration of section 197 of the Senate amendment, and modifications committed to conference:

Messrs. NUSSLE, SUNUNU, and SPRATT.

From the Committee on Education and the Workforce, for consideration of sections 453-5, 457-9, 460-1, and 464 of the Senate amendment, and modifications committed to conference:

Messrs. CASTLE, OSBORNE, and KILDEE.

From the Committee on Energy and Commerce, for consideration of sections 213, 605, 627, 648, 652, 902, 1041, and 1079E of the Senate amendment, and modifications committed to conference:

Messrs. TAUZIN, BARTON of Texas and DINGELL.

From the Committee on Financial Services, for consideration of sections 335 and 601 of the Senate amendment, and modifications committed to conference:

Messrs. OXLEY, BACHUS, and LAFALCE.

From the Committee on International Relations, for consideration of title III of the House bill and title III of the Senate amendment, and modifications committed to conference:

Messrs. HYDE, SMITH of New Jersey, and LANTOS.

From the Committee on the Judiciary, for consideration of sections 940-1 of the House bill and sections 602, 1028-9, 1033-5, 1046, 1049, 1052-3, 1058, 1068-9, 1070-1, 1098 and 1098A of the Senate amendment, and modifications committed to conference:

Mr. SENSENBRENNER, Mr. GREEN of Wisconsin and Ms. BALDWIN.

From the Committee on Resources, for consideration of sections 201, 203, 211, 213, 215-7, 262, 721, 786, 806, 810, 817-8, 1069, 1070, and 1076 of the Senate amendment, and modifications committed to conference:

Messrs. HANSEN, YOUNG of Alaska, and KIND.

From the Committee on Science, for consideration of sections 808, 811, 902-3, and 1079 of the Senate amendment, and modifications committed to conference:

Messrs. BOEHLERT, BALLENGER, and HALL of Texas.

From the Committee on Ways and Means, for consideration of sections 127 and 146 of the House bill and sections 144, 1024, 1038 and 1070 of the Senate amendment, and modifications committed to conference:

Messrs. THOMAS, HERGER and RANGEL.

There was no objection.

MIKE PARKER FORCED TO RESIGN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Mississippi (Mr. TAYLOR) is recognized for 5 minutes.

Mr. TAYLOR of Mississippi. Mr. Speaker, when I was a kid, and when a guy named Mike Parker was a kid, it was fairly common for schoolteachers to talk about a story. We do not know if it is true or not, but they certainly told kids about a young man who, as a child, had a hatchet, and he took that hatchet to his father's favorite cherry tree and chopped it down. And when his father confronted him very angrily over whether or not he had done that, he said, Sir, I cannot tell a lie, I chopped down that cherry tree.

We do not know whether or not that is true, but it certainly is an important lesson. The important lesson is that the person who is said to have told the truth went on to become the father of our country, and this town is named after him. I regret to say that that sort of reward seems missing in this town right now.

I know of another person who in this town just last week told the truth and for that he was asked to resign. That person is my fellow Mississippian, Mike Parker, a former member of this body who served in both the Democrat and Republican Parties.

Mike appeared before the Subcommittee on Energy and Water Development of the Committee on Appropriations last week. As the head of the United States Army Corps of Engineers, the Under Secretary of the Army for that job, Mike told the Members of that committee that he did not feel that the budget was enough. He went on to say that he felt like the Office of Management and Budget had intentionally underestimated the amount of money that would be needed to run the Corps of Engineers.

That is the agency that builds the levees that keeps low-lying communities from flooding; that dredges channels so that inland commerce can take place; that dredges the channels for oceangoing ships; that agency that helps people with their sewage problems, with their drainage problems. He said that the administration's budget did not have enough money in it for him to do his job.

He went on to say that he felt like the Office of Management and Budget intentionally low-balled that to try to make the President's budget look a little closer to being balanced than it really was, and knowing that Congress would put the money back in the budget. He even went so far as to say that the Constitution of the United States under article I gives Congress the power to decide where the money goes, not the administration. The administration is certainly correct to request a budget, but it is Congress' job to pass a budget.

For telling the truth, my friend Mike Parker was fired. He was actually asked to resign. And what is really interesting about this town of half truths is that it was just 3 years ago on this very floor that a majority of my colleagues and I voted to impeach a sitting President because we felt like he had lied under oath. But when someone just last week tells the truth, he is asked to resign.

Mr. Speaker, I think that is a shame, and I think it is a horrible reflection on our Nation. I think it is a horrible reflection on this administration. Mike Parker did the right thing. This town is awash in debt because we are awash in half truths. Finally, somebody came forward and said this is the way to do it. You gave me a job to do. I have left my farm in Mississippi, I have left my business in Mississippi, my wife has left a successful accounting firm to come here all so we could serve our country. I have told you the truth, and my reward for telling the truth is to fire me.

☐ 1415

Mr. Speaker, it is a shame. So for Mike Parker and all of the folks out there who tell the truth, I want to say I am grateful, the people in Mississippi. I deeply regret that the President of the United States did the wrong thing; but Mike, I know you did the right thing.

Just recently there was a book published called "The Dereliction of Duty." I am told it was written by a historian at West Point who researched the early stages of the Vietnam War, and makes a very compelling case that the Joint Chiefs of Staff at that time knew that President Johnson had no intention of winning that war. And what he cites as a dereliction of duty is those generals and those admirals at the time, knowing that the President had no clear plan for victory, were not willing to risk their careers and step forward and say "This is wrong. I am not going to let the kids in my command die," in what they knew to be a failed effort.

Mike Parker had the guts to say this is wrong and point out the way that it should be and tell the truth. So, Mike, they may have had a dereliction of duty, but you did not. For the sake of myself and again speaking on behalf of the people of Mississippi, we are proud of you, Mike. God bless you.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Ms. JACKSON-LEE of Texas (at the request of Mr. GEPHARDT) for today on account of business in the district.

Mrs. MEEK of Florida (at the request of Mr. GEPHARDT) for today after 11:30 a.m. on account of personal reasons.

Ms. SOLIS (at the request of Mr. GEPHARDT) for today on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. STRICKLAND) to revise and extend their remarks and include extraneous material:)

Mr. PALLONE, for 5 minutes, today.

Ms. NORTON, for 5 minutes, today.

Ms. WATSON of California, for 5 minutes, today.

Mr. STRICKLAND, for 5 minutes, today.

Mr. BROWN of Ohio, for 5 minutes, today.

Mr. MCINTYRE, for 5 minutes, today.

Mr. TAYLOR of Mississippi, for 5 minutes, today.

(The following Member (at the request of Mr. BLUNT) to revise and extend his remarks and include extraneous material:)

Mr. BLUNT, for 5 minutes, today.

SENATE ENROLLED JOINT RESOLUTION SIGNED

The SPEAKER announced his signature to an enrolled joint resolution of the Senate of the following title:

S.J. Res. 32. A joint resolution congratulating the United States Military Academy at West Point on its bicentennial anniversary, and commending its outstanding contributions to the Nation.

ADJOURNMENT

Mr. TAYLOR of Mississippi. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 2 o'clock and 16 minutes p.m.) under its previous order, the House adjourned until Monday, March 11, 2002, at 2 p.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 8 of rule XII, executive communications were taken from the Speaker's table and referred as follows:

5775. A letter from the Principal Deputy Associate Administrator, Environmental Protection Agency, transmitting the Agency's final rule—Hydrogen Peroxide; An Amendment to an Exemption from the Requirement of a Tolerance [OPP-301217; FRL-6822-7] (RIN: 2070-AB78) February 26, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

5776. A letter from the Principal Deputy Associate Administrator, Environmental Protection Agency, transmitting the Agency's final rule—Approval and Promulgation of Implementation Plans; California State Implementation Plan Revision; Interim Final Determination that State has Corrected the Deficiencies [CA 248-0293c; FRL-7149-7] received February 26, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

5777. A letter from the Principal Deputy Associate Administrator, Environmental Protection Agency, transmitting the Agency's final rule—Approval and Promulgation of Implementation Plans; State of Iowa [Iowa 0127-1127a; FRL-7151-7] received February 26, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

5778. A letter from the Principal Deputy Associate Administrator, Environmental Protection Agency, transmitting the Agency's final rule—Approval and Promulgation of Operating Permits Program; State of Iowa [IA 0126-1126a; FRL-7151-9] received February 26, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

5779. A letter from the Principal Deputy Associate Administrator, Environmental Protection Agency, transmitting the Agency's final rule—North Carolina: Final Authorization of State Hazardous Waste Management Program Revision [FRL-7150-6] received February 26, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

5780. A letter from the Principal Deputy Associate Administrator, Environmental Protection Agency, transmitting the Agency's final rule—Revisions to the California State Implementation Plan, San Joaquin Valley Unified Air Pollution Control District [CA 169- 0323; FRL-7148-8] received February 26, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

5781. A letter from the Principal Deputy Associate Administrator, Environmental Protection Agency, transmitting the Agency's final rule—Revisions to the California State Implementation Plan, El Dorado Air Pollution Control District [CA248-0293a; FRL-7149-6] received February 26, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

5782. A letter from the Principal Deputy Associate Administrator, Environmental

Protection Agency, transmitting the Agency's final rule—Interim Final Determination that the State of California Has Corrected Deficiencies and Stay of Sanctions, San Joaquin Valley Unified Air Pollution Control District [CA 250–0317c; FRL–7146–1] received February 21, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

5783. A letter from the Principal Deputy Associate Administrator, Environmental Protection Agency, transmitting the Agency's final rule—Interim Final Determination that the State of California Has Corrected Deficiencies and Stay of Sanctions, Kern County Air Pollution Control District [CA 256–0319c; FRL–7139–2] received February 21, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

H.R. 218: Mr. Hilliard, Mr. Taylor of Mississippi, and Mr. Platts.

H.R. 250: Mr. Inslee and Mr. Roemer.

H.R. 303: Mr. Hulshof.

H.R. 778: Mr. King.

H.R. 808: Mr. Lynch.

H.R. 858: Mr. Bonior.

H.R. 902: Mr. Rohrabacher, Mr. Sabo, and Mr. Berman.

H.R. 951: Mr. Mica, Ms. Roybal-Allard, and Mr. Goss.

H.R. 1051: Mr. Delahunt and Mr. Brady of Pennsylvania.

H.R. 1053: Mr. Bonior.

H.R. 1055: Mr. Bonior.

H.R. 1070: Mr. Smith of Michigan.

H.R. 1073: Mr. Hayes.

H.R. 1076: Mr. Grucci.

H.R. 1109: Mr. Mica and Mr. Oxley.

H.R. 1158: Mr. Shays.

H.R. 1167: Mr. Snyder and Mr. Moore.

H.R. 1168: Mr. Snyder, Mr. Wilson of South Carolina, and Ms. Dunn.

H.R. 1201: Ms. Waters.

H.R. 1213: Mr. Mascara, Mr. Gekas, and Mr. Pallone.

H.R. 1214: Mr. Gekas.

H.R. 1265: Mr. Clay and Mrs. Capps.

H.R. 1310: Mr. Frank.

H.R. 1354: Mr. Davis of Illinois.

H.R. 1400: Mr. Murtha.

H.R. 1475: Mr. Kind, Mr. Hilliard, and Mr. Tiahrt.

H.R. 1522: Mr. Lipinski.

H.R. 1609: Mr. Spratt, Mr. Kucinich, and Mr. Udall of Colorado.

H.R. 1626: Mr. Holden.

H.R. 1723: Mr. Lynch.

H.R. 1899: Mr. Lampson.

H.R. 1904: Mrs. Jones of Ohio, Mr. Blagojevich, Ms. Woolsey, and Ms. Rivers.

H.R. 1919: Mr. Hostettler.

H.R. 1987: Mr. Reynolds.

H.R. 2189: Mr. Herger.

H.R. 2219: Ms. Lofgren.

H.R. 2230: Mr. Filner.

H.R. 2254: Mr. McGovern.

H.R. 2335: Mr. George Miller of California and Mr. Oberstar.

H.R. 2341: Mr. Foley, Mr. Sullivan, and Mr. Tiberi.

H.R. 2527: Mr. Pastor, Ms. DeLauro, Mr. Capuano, Mr. Boswell, Mr. Sawyer, Mr. Sessions, and Mrs. Meek of Florida.

H.R. 2570: Mr. Blagojevich and Mr. Cummings.

H.R. 2610: Mr. Gillmor, Ms. Harman, and Mr. Ganske.

H.R. 2629: Mrs. Capito, Ms. Baldwin, and Mr. Meehan.

H.R. 2649: Mr. Gekas, Mr. Tancredo, Ms. McKinney, Mr. Pickering, Mr. Tom Davis of Virginia, and Mr. Watkins.

H.R. 2695: Mr. Matsui and Mr. Ballenger.

H.R. 2740: Mrs. Clayton and Mr. Watt of North Carolina.

H.R. 2813: Mr. Olver.

H.R. 3080: Ms. Norton and Ms. Carson of Indiana.

H.R. 3130: Mr. Goodlatte and Mr. Smith of Texas.

H.R. 3131: Mrs. Capps, Mr. Frost, Mr. Chambliss, Mr. Calvert, Mr. Costello, and Mr. Greenwood.

H.R. 3157: Mrs. Wilson of New Mexico.

H.R. 3192: Mr. Owens and Mrs. Mink of Hawaii.

H.R. 3246: Mrs. Thurman.

H.R. 3267: Mr. Clay.

H.R. 3278: Mr. Pascrell.

H.R. 3284: Mr. Clay.

H.R. 3321: Mr. John, Mr. Clay, Mrs. Mink of Hawaii, Mr. Stump, and Ms. McCarthy of Missouri.

H.R. 3324: Mr. Schiff, Ms. Woolsey, and Mr. Thompson of California.

H.R. 3356: Mrs. Tauscher and Mr. Turner.

H.R. 3363: Mr. Langevin, Mr. McNulty, Mr. Lipinski, Mr. Allen, Mr. Price of North Carolina, and Mr. McGovern.

H.R. 3374: Mr. Owens, Mr. Ford, Mr. Frost, Mr. Conyers, Mrs. Meek of Florida, Mr. Underwood, Ms. Watson, and Mr. McGovern.

H.R. 3389: Mrs. Capps, Mr. Jeff Miller of Florida, Mr. Bilirakis, Mr. Watt of North Carolina, Mr. Diaz-Balart, Ms. McCollum, Mr. Hastings of Florida, and Ms. Hooley of Oregon.

H.R. 3414: Mr. Phelps and Mr. Watt of North Carolina.

H.R. 3430: Mr. Frank.

H.R. 3486: Mr. Goode.

H.R. 3488: Mr. Towns and Mrs. Thurman.

H.R. 3524: Mr. Pastor, Ms. Velázquez, and Mr. LaTourette.

H.R. 3561: Mr. Gekas.

H.R. 3574: Mrs. Thurman.

H.R. 3581: Mr. Underwood and Ms. Millender-McDonald.

H.R. 3585: Mr. Barrett.

H.R. 3605: Mr. Souder.

H.R. 3617: Mr. Filner.

H.R. 3626: Mr. Stupak and Mr. Gutknecht.

H.R. 3659: Mr. Langevin and Mr. Kennedy of Rhode Island.

H.R. 3694: Mr. Ballenger, Mr. Moore, Mr. Putnam, Mr. Ramstad, Mr. Tancredo, Mr. Kind, Mrs. Christensen, Mr. Sherman, Mr. Davis of Florida, Ms. DeGette, Mrs. Clayton, Mr. Hilliard, Mr. Clay, Ms. Jackson-Lee of Texas, Ms. McCarthy of Missouri, Mrs. Meek of Florida, Mr. Scott, Mr. Allen, Mr. Reyes, Mr. Wynn, Mr. Hoyer, and Mr. Cooksey.

H.R. 3713: Mr. Stupak.

H.R. 3717: Mr. Holden, Mr. Keller, Ms. Watson, Mr. Combest, Mr. Boswell, Mr. Barr of Georgia, and Mr. Udall of Colorado.

H.R. 3731: Mr. Quinn.

H.R. 3733: Mr. Kucinich, Mr. Baldacci, Mr. McGovern, and Ms. Brown of Florida.

H.R. 3745: Ms. Jackson-Lee of Texas.

H.R. 3754: Mr. McNulty.

H.R. 3770: Mr. Stark, Mr. Shimkus, and Ms. Dunn.

H.R. 3792: Mr. Isakson, Mr. Johnson of Illinois, Mr. Towns, Mr. Boehlert, and Mr. Stupak.

H.R. 3794: Mr. Ferguson, Ms. Lofgren, Ms. Velázquez, Mr. Davis of Illinois, and Ms. Eshoo.

H.R. 3802: Mr. Otter.

H.R. 3818: Ms. Lee and Mr. Mascara.

H.R. 3833: Mr. Sullivan, Mr. Brown of Ohio, and Mr. Gillmor.

H.R. 3834: Mr. Gordon.

H.R. 3838: Mrs. Thurman.

H.J. Res. 6: Mr. Quinn, Mr. Gillmor, and Mr. Forbes.

H.J. Res. 40: Mr. Rahall and Mr. John.

H. Con. Res. 315: Mr. Shimkus, Mr. Pickering, Mr. Shows, Mr. Hostettler, Mr. Schaffer, and Mr. Goode.

H. Con. Res. 318: Mr. Terry and Mr. Ballenger.

H. Con. Res. 341: Ms. Eshoo.

H. Res. 302: Mr. Graves, Mr. Buyer, Mr. Norwood, and Mr. Wicker.

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 7 of rule XII, sponsors were deleted from public bills and resolutions as follows:

H.R. 1983: Mr. Simmons.

PETITIONS, ETC.

Under clause 3 of rule XII, petitions and papers were laid on the clerk's desk and referred as follows:

52. The SPEAKER presented a petition of the Legislature of Franklin County, relative to Resolution No. 317 petitioning the Congress of the United States to pass without delay and for the President of the United States to sign into law "The State Budget Relief Act of 2001"; to the Committee on Energy and Commerce.

53. Also,a petition of the City Council of the City of Groves, Texas, relative to Resolution 2000-17 petitioning the Congress of the United States in expressing an collective desire to rid the world of terrorism of global reach; jointly to the Committees on International Relations and Armed Services.

SENATE—*Thursday, March 7, 2002*

The Senate met at 10 a.m. and was called to order by the Honorable HARRY REID, a Senator from the State of Nevada.

The PRESIDING OFFICER. Today's prayer will be by Rev. Leonard B. Jackson, Associate Minister of the First African Methodist Episcopal Church, Los Angeles, CA.

PRAYER

The guest Chaplain offered the following prayer:

Eternal Father, from differing ways we come to this Senate Chamber in manifold thoughts, hopes, and fears, but together we join our hearts as one to ask that You hear our humble prayers:

God of our weary years, God of our silent tears, You have brought us thus far on our way; cast Your shadow of love upon this Senate. Lord, grant us guidance that we may not betray our stewardship, neither mistaking the nature of our obligations nor taking for granted our charge. As we perform our sworn duty, may we stand with You, work for You, and bear with You the heavy yoke of righteousness and truth.

Father, our petition today is that You will bless the trailblazers who have paved the way and laid the foundation of our great Nation. Lord, alone we are not worthy but we can do all things through Him who strengthens us. Lord, we don't know what tomorrow holds, but we know the hand that holds tomorrow. Please keep us forever in the path we pray, so all people may share the reality of one nation under God, with liberty and justice for all.

God bless America.

Amen.

PLEDGE OF ALLEGIANCE

The Honorable HARRY REID led the Pledge of Allegiance, as follows:

> I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER (Mrs. CLINTON). The clerk will read a communication to the Senate from the President pro tempore (Mr. BYRD).

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, March 7, 2002.

To the Senate:

Under the provisions of rule I, paragraph 3, of the Standing Rules of the Senate, I hereby appoint the Honorable HILLARY RODHAM CLINTON, a Senator from the State of New York, to perform the duties of the Chair.

ROBERT C. BYRD,
President pro tempore.

Mrs. CLINTON thereupon assumed the chair as Acting President pro tempore.

The ACTING PRESIDENT pro tempore. The Senator from California is recognized.

THE GUEST CHAPLAIN

Mrs. BOXER. Madam President, I am so delighted today to welcome Reverend Jackson to our Senate family. Senator FEINSTEIN and I are so very proud of him and of the First African Methodist Episcopal Church of Los Angeles. Anyone who has visited the First African Methodist Episcopal Church of Los Angeles comes away uplifted and comes away in many ways a changed person. It is an ecumenical experience, if I might say that, because what the Reverend said today is what guides that church—that all of us should be righteous and seek justice and seek the truth. Of course, if we did that every day in this Senate and justice prevailed and truth prevailed and righteousness prevailed, this country would be on the best course.

I thank him from the bottom of my heart for that message which he gave us so quickly, but it is a very deep message which I hope we will all take to heart.

Welcome, Reverend Jackson.

Thank you, Madam President. I yield the floor.

The ACTING PRESIDENT pro tempore. The Senator from Nevada.

SCHEDULE

Mr. REID. Madam President, this morning the Senate will again resume consideration of the energy bill. There will be rollcall votes on amendments throughout the day. We understand that the first amendment will be offered by Senator VOINOVICH dealing with Price-Anderson. That should not take too long. We hope we can complete that early on. Senator BINGAMAN will then offer the next amendment.

We hope to make significant progress on this bill today and tomorrow and complete the legislation next week.

RESERVATION OF LEADER TIME

The ACTING PRESIDENT pro tempore. Under the previous order, leadership time is reserved.

NATIONAL LABORATORIES PARTNERSHIP IMPROVEMENT ACT OF 2001

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will now resume consideration of S. 517, which the clerk will report.

The assistant legislative clerk read as follows:

> A bill (S. 517) to authorize funding the Department of Energy to enhance the mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, and for other purposes.

Pending:

> Daschle/Bingaman further modified amendment No. 2917, in the nature of a substitute.

Mr. REID. Madam President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. SMITH of Oregon. Madam President, I ask unanimous consent the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. SMITH of Oregon. Madam President, I ask unanimous consent to speak for 2, maybe 3 minutes as in morning business.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

(The remarks of Mr. SMITH of Oregon are printed in today's RECORD under "Morning Business.")

Mr. SMITH of Oregon. Madam President, I yield the floor and suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. VOINOVICH. Madam President, I ask unanimous consent the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

AMENDMENT NO. 2983 TO AMENDMENT NO. 2917, AS FURTHER MODIFIED

Mr. VOINOVICH. Madam President, I send an amendment to the desk and ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. The clerk will report the amendment.

The assistant legislative clerk read as follows:

> The Senator from Ohio [Mr. VOINOVICH], for himself, Mr. BINGAMAN, Mr. SMITH of New Hampshire, Mr. DOMENICI, Ms. LANDRIEU, Mr. MURKOWSKI, Mr. HAGEL, Mr. CRAPO, Mr. THOMAS, Mr. INHOFE, Mr. THOMPSON, Mr.

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

BOND, Mr. CAMPBELL, Mr. FRIST, Mr. KYL, and Mr. CRAIG, proposes an amendment numbered 2983 to amendment No. 2917.

Mr. VOINOVICH. Madam President, I ask unanimous consent reading of the amendment be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To reauthorize the Price-Anderson Act)

On page 115, strike line 5 and all that follows through page 119, line 10 and insert the following:

Subtitle A—Price-Anderson Act Reauthorization

SEC. 501. SHORT TITLE.

This subtitle may be cited as the "Price-Anderson Amendments Act of 2002".

SEC. 502. EXTENSION OF INDEMNIFICATION AUTHORITY.

(a) INDEMNIFICATION OF NUCLEAR REGULATORY COMMISSION LICENSEES.—Section 170 c. of the Atomic Energy Act of 1954 (42 U.S.C. 2210(c)) is amended—

(1) in the subsection heading, by striking "LICENSES" and inserting "LICENSEES"; and

(2) by striking "August 1, 2002" each place it appears and inserting "August 1, 2012".

(b) INDEMNIFICATION OF DEPARTMENT OF ENERGY CONTRACTORS.—Section 170 d.(1)(A) of the Atomic Energy Act of 1954 (42 U.S.C. 2210(d)(1)(A)) is amended by striking ", until August 1, 2002,".

(c) INDEMNIFICATION OF NONPROFIT EDUCATIONAL INSTITUTIONS.—Section 170 k. of the Atomic Energy Act of 1954 (42 U.S.C. 2210(k)) is amended by striking "August 1, 2002" each place it appears and inserting "August 1, 2012".

SEC. 503. DEPARTMENT OF ENERGY LIABILITY LIMIT.

(a) INDEMNIFICATION OF DEPARTMENT OF ENERGY CONTRACTORS.—Seciton 170 d. of the Atomic Energy Act of 1954 (42 U.S.C. 2210(d)) is amended by striking paragraph (2) and inserting the following:

"(2) In agreements of indemnification entered into under paragraph (1), the Secretary—

"(A) may require the contractor to provide and maintain financial protection of such a type and in such amounts as the Secretary shall determine to be appropriate to cover public liability arising out of or in connection with the contractual activity; and

"(B) shall indemnify the persons indemnified against such liability above the amount of the financial protection required, in the amount of $10,000,000,000 (subject to adjustment for inflation under subsection t.), in the aggregate, for all persons indemnified in connection with such contract and for each nuclear incident, including such legal costs of the contractor as are approved by the Secretary.".

(b) CONTRACT AMENDMENTS.—Section 170 d. of the Atomic Energy Act of 1954 (42 U.S.C. 2210(d)) is further amended by striking paragraph (3) and inserting the following:

"(3) All agreements of indemnification under which the Department of Energy (or its predecessor agencies) may be required to indemnify any person under this section shall be deemed to be amended, on the date of the enactment of the Price-Anderson Amendments Act of 2002, to reflect the amount of indemnity for public liability and any applicable financial protection required of the contractor under this subsection.".

(c) LIABILITY LIMIT.—Section 170 e.(1)(B) of the Atomic Energy Act of 1954 (42 U.S.C. 2210(e)(1)(B)) is amended

(1) by striking "the maximum amount of financial protection required under subsection b. or"; and

(2) by striking "paragraph (3) of subsection d., whichever amount is more" and inserting "paragraph (2) of subsection d.".

SEC. 504. INCIDENTS OUTSIDE THE UNITED STATES.

(a) AMOUNT OF INDEMNIFICATION.—Section 170 d.(5) of the Atomic Energy Act of 1954 (42 U.S.C. 2210(d)(5)) is amended by striking "$100,000,000" and inserting "$500,000,000".

(b) LIABILITY LIMIT.—Seciton 170 e.(4) of the Atomic Energy Act of 1954 (42 U.S.C. 2210(e)(4)) is amended by striking "$100,000,000" and inserting "$500,000,000".

SEC. 505. REPORTS.

Section 170 p. of the Atomic Energy Act of 1954 (42 U.S.C. 2210(p)) is amended by striking "August 1, 1998" and inserting "August 1, 2008".

SEC. 506. INFLATION ADJUSTMENT.

Section 170 t. of the Atomic Energy Act of 1954 (42 U.S.C. 2210(t)) is amended—

(1) by redesignating paragraph (2) as paragraph (3); and

(2) by adding after paragraph (1) the following:

"(2) The Secretary shall adjust the amount of indemnification provided under an agreement of indemnification under subsection d. not less than once during each 5-year period following July 1, 2002, in accordance with the aggregate percentage change in the Consumer Price Index since—

"(A) that date, in the case of the first adjustment under this paragraph; or

"(B) the previous adjustment under this paragraph.".

SEC. 507. CIVIL PENALTIES.

(a) REPEAL OF AUTOMATIC REMISSION.—Section 234A b.(2) of the Atomic Energy Act of 1954 (42 U.S.C. 2282a (b)(2)) is amended by striking the last sentence.

(b) LIMITATION FOR NOT-FOR-PROFIT INSTITUTIONS.—Subsection d. of section 234A of the Atomic Energy Act of 1954 (42 U.S.C. 2282a(d)) is amended to read as follows:

"d. (1) Notwithstanding subsection a., in the case of any not-for-profit contractor, subcontractor, or supplier, the total amount of civil penalties assessed under subsection a. may not exceed the total amount of fees paid within any one-year period (as determined by the Secretary) under the contract under which the violation occurs.

"(2) For purposes of this section, the term 'not-for-profit' means that no part of the net earnings of the contractor, subcontractor, or supplier inures, or may lawfully inure, to the benefit of any natural person or for-profit artificial person.".

(c) EFFECTIVE DATE.—The amendments made by this section shall not apply to any violation of the Atomic Energy Act of 1954 occurring under a contract entered into before the date of enactment of this section.

SEC. 508. TREATMENT OF MODULAR REACTORS.

Section 170 b. of the Atomic Energy Act of 1954 (42 U.S.C. 2210(b)) is amended by adding at the end the following:

"(5)(A) For purposes of this section only, the Commission shall consider a combination of facilities described in subparagraph (B) to be a single facility having a rated capacity of 100,000 electrical kilowatts or more.

"(B) A combination of facilities referred to in subparagraph (A) is 2 or more facilities located at a single site, each of which has a rated capacity of 100,000 electrical kilowatts or more but not more than 300,000 electrical kilowatts, with a combined rated capacity of not more than 1,300,000 electrical kilowatts.".

SEC. 509. EFFECTIVE DATE.

The amendments made by sections 503(a) and 504 do not apply to any nuclear incident that occurs before the date of the enactment of this subtitle.

Mr. VOINOVICH. Madam President, I rise today to offer the Price-Anderson reauthorization bill as an amendment to the Energy Policy Act. Last year, as the former chairman of the Nuclear Safety Subcommittee, I introduced the Price-Anderson reauthorization bill, S. 1360, that reauthorizes the insurance program for commercial nuclear reactors.

The Price-Anderson Act was first passed back in 1957 and has been renewed three times since then. The current authorization expires on August 1 of this year.

This amendment provides the insurance program for commercial nuclear powerplants and Department of Energy contractor employees. In my State of Ohio, this is very important for the contractor employees who are currently working at the Mound and Fernald facilities, former sites of nuclear facilities of the Department of Energy.

This is the type of must-pass legislation that keeps the trains of Government running on time.

I think it is important to note that during the previous administration, both the Department of Energy and the Nuclear Regulatory Commission issued reports to Congress recommending the reauthorization of Price-Anderson.

The DOE and the NRC reports also called for a doubling of the annual premium paid by the nuclear reactors from $10 million to 20 million.

This recommendation was made prior to the relicensing process. At that time, the Nuclear Regulatory Commission projected that up to half of our nuclear reactors would be retired instead of being relicensed. We have something like 103 nuclear reactors out there.

However, thanks to regulatory improvements made in the process, largely due to the oversight of the Nuclear Safety Subcommittee, the NRC believes that most of our nuclear reactors will be in fact relicensed. Therefore, the NRC issued a statement last year revising their projections and recommending that the annual premium not be increased. This amendment follows those recommendations.

It is important for the American public to understand how the Price-Anderson liability program works. First of all, it is important to understand it is not a Federal subsidy. The nuclear industry actually funds the program. Each nuclear powerplant purchases liability insurance to cover the first $200 million from private insurers for immediate response in the case of an accident. If the costs exceed $200 million and additional funds are needed, all the other nuclear reactors—and there are 103 of them—contribute up to $88 million each. That totals $9.3 billion.

These funds are contributed by other reactors in increments of $10 million per year. If more than the $9.3 billion would be needed, Congress could then go back to the industry and demand a larger contribution.

I know of no other industry in which all of the competitors agree up front to pay for the mistakes or acts of God that impact upon any one company.

In addition, I know of no facilities of any type anywhere in the country which are insured for $9.3 billion. It is incredible.

It is also important to note for the American public that the industry does something else that is very unusual. It waives its traditional tort defenses so that the fund begins making payments immediately instead of fighting out claims in the courts. If we had some kind of a nuclear disaster somewhere, as we did at Three Mile Island, immediately the insurance companies start paying out claims. As a matter of fact, after Three Mile Island, claims offices were on the site within 24 hours. It provides more insurance coverage for Americans and provides the coverage up front.

America's nuclear energy industry currently provides approximately 20 percent of our energy, while fossil fuels, such as oil, coal, and natural gas, provide the bulk of the remainder. Nuclear energy is particularly used in the northeast part of the United States.

Nuclear power is a safe and reliable energy source. It is also a zero-emission source of energy.

As I discussed in the Senate on Tuesday, just since the nuclear energy has prevented 62 million tons of sulfur dioxide, a key component of acid rain, and 32 million tons of nitrogen oxide, a precursor to ozone, from being released into the atmosphere. It has probably contributed more to a reduction in emissions than any other source of energy but for solar and wind and hydroelectric.

This has had a tremendous positive effect on the environment and public health. In my view and in the view of many, coal and nuclear power have been inappropriately demonized over the last few years. These characterizations are patently unfair if we look at the record.

Both are efficient and cost-effective sources of energy, and given our current energy consumption rates, we are going to be dependent upon them for the foreseeable future.

The truth is, we are not meeting our energy needs currently domestically. And if we look at 20-year projections, we are going to need another 30 percent production of energy if we are going to be competitive.

We are taking steps to make coal a cleaner burning fuel. We should also do whatever we can to promote a safe and efficient nuclear energy industry for our Nation and encourage the development of new nuclear reactors such as modular reactors which we have been discussing of late. Reauthorizing the Price-Anderson Act is a major step in that direction.

I thank my colleagues for cosponsoring this amendment: Senators BINGAMAN, BOB SMITH, INHOFE, MURKOWSKI, DOMENICI, LANDRIEU, HAGEL, CRAPO, THOMAS, BOND, CAMPBELL, and FRIST. I urge all of my colleagues to support this amendment. This should not be something that is extremely controversial. It is long overdue. It is something we have had since 1957. We should get on with it and make it part of Senator DASCHLE's energy legislation.

I yield the floor.

The ACTING PRESIDENT pro tempore. The Senator from New Mexico.

Mr. BINGAMAN. Madam President, I commend the Senator for offering this amendment. I am cosponsoring the amendment. Title V of the underlying bill we are debating renews the provisions of the Price-Anderson Act that relate to Department of Energy contractors, but it does not renew those that relate to NRC licensees.

The reason is that jurisdiction over the contractor provisions was in the Energy Committee, which was where we were largely developing this bill. The jurisdiction over the NRC licensee provisions is in the Environment Committee that Senator SMITH chaired. Some members of the Environment Committee asked us not to include provisions that were under its jurisdiction in this substitute. The pending amendment Senator VOINOVICH has offered now provides a substitute for the Price-Anderson provisions in the underlying bill.

It repeats the provisions that renew DOE contractor portions of Price-Anderson that are already there, and in addition, it adds the new provisions related to the NRC licensee part of the act.

Let me give a short summary of what the pending amendment would do. Section 502 of the amendment extends the NRC's indemnification authority for another 10 years. That has been recommended by the Nuclear Regulatory Commission, and it is part of what Senator VOINOVICH is proposing. It extends the indemnification authority of the Department of Energy indefinitely. That is also consistent with the 1998 report of the Department of Energy.

Section 503 of the amendment raises the liability limit for DOE contractors and hence the amount that DOE indemnifies its contractors up to $10 billion, which would be adjusted in the future for inflation.

Under current law, the liability limit for DOE contractors is tied to the maximum liability of Nuclear Regulatory Commission licensees, which is currently at $9 billion.

Section 504 increases the liability limits and indemnification for accidents involving government-owned nuclear facilities or devices located outside the United States from the $100 million, where it presently is, to $500 million. This increase also was recommended by the Department of Energy. It is consistent with international nuclear liability standards.

Section 505 requires both the Department of Energy and the Nuclear Regulatory Commission to submit new reports on the need to continue or modify the act in 2008.

Section 506 requires the Secretary of Energy to adjust the $10 billion liability limit every 5 years for inflation. This is consistent also with the provision in existing law that requires the Nuclear Regulatory Commission to adjust the limit for Nuclear Regulatory Commission licensees.

Section 507 repeals two provisions in current law that exempt nonprofit Department of Energy contractors from civil penalties for nuclear safety violations.

Section 507 subjects nonprofit contractors to set civil penalties. It limits the total amount of those penalties to the fee the contractor receives in any year under the contract.

Finally, section 508 provides two or more so-called "modular" reactors that are located at one site should be treated as a single nuclear powerplant for purposes of assessing premiums under the Price-Anderson Act. This provision has been added to allow for the use of some of the new advanced technology reactor designs that make use of several small reactor modules to do the work of a single large nuclear reactor. The provision will permit the NRC to treat a collection of these modules at a single site as a single reactor for Price-Anderson purposes.

In summary, the Price-Anderson Act has served this nation well for 45 years, by enabling utilities to generate 20 percent of our Nation's electricity with nuclear power, universities to conduct important nuclear research, and corporations to build nuclear weapons for our national defense without the threat of unlimited liability.

At the same time, the act has ensured that the public will be compensated in the event of a nuclear accident, that adequate funds will be available to pay claims, and that victims will be able to recover through an efficient no-fault liability system, which waives many of the legal obstacles that would confront victims in the absence of the act.

The important pending amendment renews this important law with a minimum number of changes, and in ways consistent with the strong recommendations we have received from the two agencies charged with administering it. I urge its adoption.

The ACTING PRESIDENT pro tempore. The Senator from New Hampshire is recognized.

Mr. SMITH of New Hampshire. Madam President, I rise in very strong support of the Voinovich-Bingaman Price-Anderson amendment.

Senator VOINOVICH has long been a leader at the EPW Committee on nuclear issues. I am proud to join him as a cosponsor of this amendment. Last year, Senator VOINOVICH introduced S. 1360 to reauthorize Price-Anderson for NRC licensees—a bill of which I was an original cosponsor, as the ranking member of the Environment and Public Works Committee. I am also pleased to be joining my colleagues on both the Energy Committee and on my own committee in cosponsoring this amendment. I especially thank Senator BINGAMAN for his cooperation with us on this issue.

Price-Anderson addresses two classes of nuclear facilities: commercial nuclear reactors and Federal nuclear facilities operated by "DOE contractors." It combines both NRC licensee and DOE contractor provisions of Price-Anderson.

I want to speak for a couple of minutes to the provisions of the amendment that deal with NRC licensees, as that is where the EPW Committee has focused its efforts. It does two very simple things. No. 1, it reauthorizes Price-Anderson for NRC licensees for an additional 10 years—consistent with NRC recommendations. Secondly, the amendment recognizes that new nuclear technologies—technologies that provide smaller, modular, cost-effective, and even safer reactors—are on the horizon. That is the future. This amendment allows for that new technology to come forth and to be used.

For the purposes of secondary protection requirements, this amendment treats modular reactor facilities containing modules of 100 to 300 megawatts, up to a total of 1,300 megawatts, as a single facility.

These modular units—now being developed—are the future of nuclear power, and it is important that Price-Anderson recognize the difference between these smaller modular units and the current larger facilities. Again, this legislation—this amendment—will allow for this modular concept to take hold and bring us into the future with nuclear power.

The background has been stated on Price-Anderson by my colleagues, but just briefly to summarize, it was a law passed in 1957 in order to provide immediate compensation in the event of a nuclear accident.

Price-Anderson is the best mechanism for providing the highest level of compensation in the shortest period of time, without having to put victims through an arduous and protracted legal process.

Equally important, it is the best deal for the taxpayer. With Price-Anderson, if there were a nuclear accident or incident, up to $9.5 billion would be available to compensate any victims. Not one dime of that money would come from taxpayers. It comes from a combination of insurance coverage and the industry itself—the entire nuclear industry pooling their collective resources—and this is compensation without having a lengthy judicial process to determine liability or culpability. So the law requires the insured and the insurers to waive most standard legal defenses. Fault does not need to be established. That is very important. Absent Price-Anderson, victims would have to rely on the court system, and damages would effectively be limited by the assets of a single company.

It is unlikely that any one company, on its own, would ever be capable of paying out $9.5 billion in damages in the case of an accident. So the bottom line is that without Price-Anderson there would be less money available and it would take years for the dollars to work their way through the courts and then to those who need immediate assistance. That assumes there would be something left after the lawyers have taken their share. We don't know whether that would be the case or not. It is likely that the taxpayer, via Congress, would already have stepped in and provided whatever financial assistance was needed. The events of September 11 showed how quickly Congress can act in a disaster situation.

Price-Anderson is a good deal for the taxpayers, for the industry, and for victims seeking damages.

I understand there are those who don't like nuclear energy and will see the Price-Anderson debate as a means to stop nuclear power. I respect the rights and integrity of those who hold this view. I don't think they are right. We will have a lot of energy needs in the coming decades, and nuclear power can provide them cleanly and efficiently.

There are enormous benefits to nuclear power. The majority of energy generated in New Hampshire is from nuclear power from the Seabrook nuclear powerplant—about 60 percent of it to be exact. I wonder where we would be today for our energy needs had that reactor not been built, in spite of the controversy and hard times we had to get it built. Seabrook Station has proven to be a safe, reliable source of power, not only for New Hampshire but for a large part of New England.

These are great benefits. They are tremendous benefits. It can't be overlooked. I have spent the better part of 2 years working to come up with a bipartisan plan for reducing utility emissions without compromising our long-term energy security. In fact, Senator VOINOVICH has been a valued partner in that effort.

Nuclear power allows us to generate enormous amounts of energy at low cost and with zero emissions. I know the issue of the waste comes up and it is very controversial; that is an issue we are going to have to confront. But when you are talking about emissions, this nuclear power is safe and efficient. It allows us to generate this power, as I said, at low cost with zero emissions, no SO_X, NO_X, mercury, and no carbon dioxide. Zero.

Nuclear provides 20 percent of our Nation's energy production, with no emissions. We need to be able to not have that diminished further as these powerplants get older and older. One way to do that is with this modular concept for which we provide. If we want clean air and energy security, nuclear has to be a part of any reasonable energy plan.

We should be encouraging the development of new, more effective and safe nuclear technologies. I am not saying this to the exclusion of other sources of power—renewables such as water, wind, solar, and others; we are not excluding those. We want to continue to do research there. I want to make it clear from this Senator's position, it is not only about nuclear power, it is all sources of power that can be efficient, clean, and produce what we need.

At a minimum, we ought not to be discouraging this kind of technology and what this nuclear industry can do. If we don't reauthorize Price-Anderson, we effectively kill all the new promising technologies that are the next generation of emissions-free power production. We can't afford to do that.

This amendment recognizes the recommendations made by the NRC, and they should be adopted. Price-Anderson enjoys strong bipartisan support in this body, as well as on the other side of the Capitol in the House.

Again, I thank Senator VOINOVICH and Senator BINGAMAN for their leadership. It has been a pleasure to work with them and Senator INHOFE on nuclear issues in the committee. They deserve a great deal of credit—Senators VOINOVICH and INHOFE—for the work they have done. I particularly thank my friends on the Energy Committee for their collective effort in bringing this bipartisan amendment to the floor—in particular, Senators MURKOWSKI, DOMENICI and, again, Senator BINGAMAN.

Madam President, I urge my colleagues to support this bipartisan amendment to reauthorize the Price-Anderson Act. I yield the floor.

The ACTING PRESIDENT pro tempore. The Senator from Idaho.

Mr. CRAIG. Madam President, I join my colleague from New Hampshire in thanking Senator VOINOVICH, Senator INHOFE, a good number of folks on our side of the aisle, and certainly a good number on the Democratic side of the aisle for crafting what I think is truly a bipartisan amendment to a necessary and important mix of our energy portfolio in this country.

As you know, the Price-Anderson Act provides a substantial amount of the necessary insurance protection for the commercial sector to deal with nuclear energy in our country.

The Price-Anderson Act removed the deterrent to private sector participation in nuclear activities when there was a substantial threat of liability.

As we know, the historic management of our nuclear facilities on the private side, the commercial side of the equation has proven to be very successful and very safe throughout their operation.

The kind of protection we have offered in no way has ever deterred or lessened the desire or the responsibility of good management. In fact, the Nuclear Regulatory Commission has not only ensured that by its constant and vigilant oversight—and certainly the private sector in operating these reactors for the benefit of the country has known that—but has demonstrated that very clearly. It is truly one of the great success stories of energy generation in our country that is not often told.

Why? Because when we talk nuclear, there are automatic reactions and some risks are argued even though those risks have never effectively played out in an area of effective regulation, quality management of the kind we have seen historically within the nuclear industry of this country.

Price-Anderson is an act that has been working well since its origination in 1957. We will need nuclear energy as we meet the growing energy needs of our country. My colleague from New Hampshire was just talking about clean energy and its importance. There is no cleaner energy than that which is produced by a nuclear reactor and electrical generator. That has clearly demonstrated itself historically.

All I can say today is, thank goodness that 20 percent of our energy basket in this country is nuclear. I wish it were more. If it were more, I think we would have less concern today about the climate change issue and other issues such as greenhouse gases released into the environment. That is going to push us, as it should, toward ever-increasing higher levels of technology and the application of that technology to make cleaner fuels.

While doing that, many of us in this body and the other body have recognized the value of advancing nuclear reactor design. Over the last several years, Senator DOMENICI from New Mexico, chairing the Appropriations Energy Subcommittee, and I have worked to increase budgets to allow for that kind of experimentation and development.

The administration in its new budget has come forth with a proposal called 2010 to invest money in the new technologies of nuclear reactors, to get that technology to the marketplace and to the private sector and to allow an ever-increasing amount of our energy portfolio to become nuclear generated.

As a result, reauthorization of the Price-Anderson Act is absolutely critical because without it, and without that kind of protection, the reality of expanding that energy base simply would not happen.

As we know, just in the last 3 weeks the President has proposed a new and dramatic direction for climate change in our country with the bringing together of science, the application of new computer models, and the idea of not picking winners and losers but allowing the great technology and the human mind in this country to lead the world to a cleaner environment.

We cannot get there and have an abundance of energy that will drive this wonderful economy of ours and create the jobs that it can and has created without nuclear energy as a part of it. There is no technology today that builds at those levels of commercial power production without nuclear energy being a part of it and an increasing part of that overall energy basket.

That is why we are here today. I think that is why we have arrived at a bipartisan approach to this issue. Some of my colleagues on the other side of the aisle who a decade ago were archcritics of nuclear energy are quietly saying today: We recognize that new technology in this area, new reactor design, has to come about if we are going to lead the world and have safer and more abundant forms of energy. That is why this overall energy bill is critical, with all of the new approaches that we bring, along with assuring current levels of hydrocarbon production and new levels of hydrocarbon production, and, at the same time, clearly technology and the application of that brings us to a cleaner environment that can be and must be abundant in energy.

I do appreciate the opportunity to speak briefly on the reauthorization of the Price-Anderson Act. It is an important part of any national energy policy for our country. I am confident it can pass because it has been brought before this body in a bipartisan effort.

Madam President, I yield the floor.

The ACTING PRESIDENT pro tempore. The Senator from Nevada.

Mr. REID. I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. REID. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. JEFFORDS. Mr. President, I want to express my concern about the provisions of this amendment, and state my reasons for opposing it.

As Chairman of the Committee on Environment and Public Works, which has jurisdiction over the licensing and regulation by the Nuclear Regulatory Commission of the Nation's commercial nuclear power plants, I have a very strong interest in the application of the provisions of Price-Anderson.

Under the Atomic Energy Act of 1954, the Nuclear Regulatory Commission has the obligation to assure the safety and security of our Nation's nuclear power plants, and to oversee compensation to the public in the event of a catastrophic accident. This is the most serious of responsibilities.

My State of Vermont receives much of its power from the Vermont Yankee Nuclear Power Plant. While I am supportive of nuclear power and the many benefits it brings, I am deeply and personally aware of the potential dangers to the public that a nuclear power plant could pose, should something go wrong.

Since the events of September 11, of course, intense scrutiny has been given to security at nuclear plants, and chairman of the EPW Committee, I am committed to ensuring that our obligations to protect the public are fully met. Because this amendment fails to satisfy that responsibility,I must oppose it.

The Price-Anderson Act establishes a system of liability, and compensation to the general public for damages in the event of a nuclear accident, an "extraordinary nuclear occurrence" in the language of the Atomic Energy Act. The current language provides that every commercial reactor having a rated capacity of 100,000 electrical kilowatts or more must obtain insurance as provided in the act.

Section 508 of the amendment would make an exception for modular reactors, which are small reactors in the 100 to 110 kilowatt range, that must be clustered together in order to be economically viable. The amendment would treat them as a group of units comprising a single nuclear reactor. This would prevent each module from being treated, for purposes of liability coverage under Price-Anderson, as an individual reactor. Without this protection, construction of these modular reactors would not in all likelihood be economically viable.

The safety and performance of these reactors is still a matter of considerable speculation. I am not satisfied that these issues have been sufficiently reviewed within my committee or elsewhere to justify encouraging their continued development at this time. Particularly with the events of September 11 heavy in our hearts and in our minds, I believe we must act with due caution in authorizing activities which we are not fully satisfied meet our obligations for protection of the public health and safety.

Along those same lines, there are a number of issues relating to the adequacy of Price-Anderson that should be given greater scrutiny following the events of September 11. We must determine whether liability limits established under the Act are sufficient, given the potential for terrorist attack as we now perceive it. In so doing, we must carefully examine what are likely to be the full scale impacts to the public from a terrorist attack resulting in an "extraordinary nuclear occurrence."

We have requested this information from the Nuclear Regulatory Commission, but have not yet received a full response. I intend to work with my colleagues to develop language to address some of these concerns. I do not believe the amendment adequately addresses these issues, and for that reason, I will oppose it.

AMENDMENT NO. 2984 TO AMENDMENT NO. 2983

Mr. REID. Madam President, I send an amendment to the desk.

The ACTING PRESIDENT pro tempore. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Nevada [Mr. REID] proposes an amendment numbered 2984 to amendment No. 2983.

Mr. REID. Madam President, I ask unanimous consent that the reading of the amendment be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

In lieu of the matter to be inserted, insert the following:

SEC. 5 . FINANCIAL PROTECTION FOR LICENSEES.

(a) STANDARD DEFERRED PREMIUM.—Section 170b.(1) of the Atomic Energy Act of 1954 (42 U.S.C. 2210(b)(1)) is amended in the third sentence by striking "$63,000,000 (subject to adjustment for inflation under subsection t.), but not more than $10,000,000 in any 1 year" and inserting "$88,000,000 (subject to adjustment for inflation under subsection t.), but not more than $20,000,000 in any 1 year (subject to adjustment for inflation under subsection t.)".

(b) . FINANCIAL HARDSHIP.—Section 170b.(2)(A) of the Atomic Energy Act of 1954 (42 U.S.C. 2210(b)(2)(A)) is amended by striking "paragraph (1)" and all that follows and inserting "paragraph (1) for any facility if more than 1 nuclear incident occurs in any 1 calendar year.".

(c) NEW LICENSES.—Section 170c. of the Atomic Energy Act of 1954 (42 U.S.C. 2210(c)) is amended—

(1) by striking "The Commission" and inserting the following:

"(1) LICENSES ISSUED ON OR BEFORE AUGUST 1, 2002.—The Commission"; and

(2) by adding at the end the following:

"(2) LICENSES ISSUED AFTER AUGUST 1, 2002.—After August 1, 2002, as a condition to receiving a license for a utilization facility under this Act, the applicant, before receiving the license, shall obtain insurance coverage from the private insurance market for the full potential liability (including the public liability and any other liability) of the person that might arise as a result of a nuclear incident at the utilization facility.

SEC. 5 . GUARANTEE OF DEFERRED PREMIUM; FINANCIAL QUALIFICATIONS.

Section 170b. of the Atomic Energy Act of 1954 (42 U.S.C. 2210(b)) is amended by adding at the end the following:

"(5) GUARANTEE OF DEFERRED PREMIUM.—

"(A) CONDITION OF INDEMNIFICATION.—Not later than 180 days after the date of enactment of this paragraph, and not less frequently than each year thereafter, the Commission, in consultation with the Securities and Exchange Commission, shall, as a condition of indemnification, require each licensee to demonstrate that the licensee has the financial ability to pay the full potential retrospective premium for each reactor through 1 or more of—

"(i) a surety bond;

"(ii) a letter of credit or loan;

"(iii) an insurance policy; or

"(iv) maintenance of an escrow deposit of government securities in reserves, a trust, or an equivalent instrument.

"(B) REORGANIZATION PROCEEDINGS.—If a licensee or creditors of a licensee file a petition under chapter 11 of title 11, United States Code, for reorganization of the licensee, the Commission—

"(i) shall review the ability of the licensee to—

"(I) pay the full amount of prospective and standard deferred premiums; and

"(II) ensure that adequate funds will be available for safe operation of the licensed facility; and

"(ii) if the Commission determines that the licensee is unable to meet the requirements of clause (i), shall not renew any indemnification of the licensee under this section.

"(6) FINANCIAL QUALIFICATIONS.—

"(A) IN GENERAL.—The Commission, in consultation with the Securities and Exchange Commission, shall establish criteria and procedures for determination of the minimum financial qualifications for new licensees (including license transferees) to ensure that the new licensee has the resources and instruments necessary to—

"(i) operate safely if it becomes necessary to shut down a reactor for 12 months or longer; and

"(ii) ensure payment of prospective and deferred premiums under this subsection.

"(B) CONDITION.—A license shall be conditioned on meeting and maintaining the minimum financial qualifications established under subparagraph (A).".

SEC. 5 . PRESIDENTIAL COMMISSION ON INCIDENT CONSEQUENCES.

Section 170(l) of the Atomic Energy Act of 1954 (42 U.S.C. 2210(l)) is amended—

(1) in paragraph (1), by striking "1988" and inserting "2002";

(2) in paragraph (2)—

(A) in subparagraph (A), by striking "not less than 7 and not more than 11 members" and inserting "6, 8, 10, or 12 members"; and

(B) in subparagraph (B), by striking "not more than a mere majority of the members are of the same political party" and inserting "there are equal numbers of members of each major political party"; and

(3) by striking paragraph (3) and inserting the following:

"(3) DUTIES.—

"(A) IN GENERAL.—The study commission shall conduct a comprehensive study of the economic, public health, and environmental impacts of nuclear incidents that may result in a full breach of containment and uncontained meltdown at a facility built in accordance with an existing design or a proposed design.

"(B) INPUTS.—The matters to be studied under subparagraph (A) include—

"(i) for each existing and proposed facility—

"(I) the public health effects; and

"(II) the economic costs attributable to public health effects, property damage, environmental damage, and evacuation and resettlement of affected populations;

of a worst-case nuclear incident; and

"(ii) the ability of the licensee of each existing or proposed facility to pay the standard deferred premium for a potential occurrence at each covered facility of the licensee and at a facility that is not covered by the licensee.

"(C) SENSITIVITY ANALYSIS.—

"(i) IN GENERAL.—In studying the matters under subparagraph (B)(i), the study commission shall conduct a sensitivity analysis based on various modeling input assumptions to determine the maximum potential consequences of a worst-case nuclear incident.

"(ii) ASSUMPTIONS.—The assumptions on which the sensitivity analysis is based shall include assumptions regarding—

"(I) nuclear incident scenarios;

"(II) weather patterns;

"(III) traffic patterns; and

"(IV) human behavior that may have an effect on evacuation of persons threatened by a nuclear incident.".

SEC. 5 . ACTS OF TERRORISM.

Section 11q. of the Atomic Energy Act of 1954 (42 U.S.C. 2014(q)) is amended—

(1) by striking "q. The term" and inserting the following:

"q. NUCLEAR INCIDENT.—

"(1) IN GENERAL.—The term"; and

(2) by adding at the end the following:

"(2) OCCURRENCES.—

"(A) IN GENERAL.—In paragraph (1), the term 'occurrence' includes an act that the President determines to have been an act of domestic terrorism or international terrorism (as those terms are defined in section 2331 of title 18, United States Code).

"(B) NO JUDICIAL REVIEW.—A determination of the President under subparagraph (A) shall not be subject to judicial review.".

SEC. 5 . TREATMENT OF NUCLEAR REACTOR FINANCIAL OBLIGATIONS.

Section 523 of title 11, United States Code, is amended by adding at the end the following:

"(f) TREATMENT OF NUCLEAR REACTOR FINANCIAL OBLIGATIONS.—Notwithstanding any other provision of this title—

"(1) any funds or other assets held by a licensee or former licensee of the Nuclear Regulatory Commission, or by any other person, to satisfy the responsibility of the licensee, former licensee, or any other person to comply with a regulation or order of the Nuclear Regulatory Commission governing the decontamination and decommissioning of a nuclear power reactor licensed under section 103 or 104b. of the Atomic Energy Act of 1954 (42 U.S.C. 2133, 2134(b)) shall not be used to satisfy the claim of any creditor in any proceeding under this title, other than a claim resulting from an activity undertaken to satisfy that responsibility, until the decontamination and decommissioning of the nuclear power reactor is completed to the satisfaction of the Nuclear Regulatory Commission;

"(2) obligations of licensees, former licensees, or any other person to use funds or other assets to satisfy a responsibility described in paragraph (1) may not be rejected, avoided, or discharged in any proceeding under this title or in any liquidation, reorganization, receivership, or other insolvency proceeding under Federal or State law; and

"(3) private insurance premiums and standard deferred premiums held and maintained in accordance with section 170b. of the Atomic Energy Act of 1954 (42 U.S.C. 2210(b)) shall not be used to satisfy the claim of any creditor in any proceeding under this title, until the indemnification agreement executed in accordance with section 170c. of that Act (42 U.S.C. 2210(c)) is terminated.".

Mr. REID. Madam President, the Price-Anderson Act was created nearly 50 years ago to stimulate the fledgling nuclear power industry by shielding owners from the full cost of an accident. The nuclear industry is now a mature electric industry and is no longer in need of liability protection.

The Price-Anderson Act has actually led to a decrease in the amount of private insurance available instead of increasing it. In the 1950s, the private insurance industry was willing to insure an accident for $50 million despite limited experience with the new technology. Today, the private insurance industry only provides $200 million in insurance. I say only, Madam President. Think about that. One accident, think what it would do.

On public radio today, there was a segment that dealt with your State, New York. What would happen if a dirty bomb were dropped on New York? What is a dirty bomb? A dirty bomb could be TNT surrounded by the same piece of equipment that is used to irradiate food. That little piece of equipment would cause 1 out of 100 people in New York City to develop cancer.

Madam President, $200 million sounds like a lot of money, but it is not very much money when we talk about the damage nuclear power can cause.

Today, Price-Anderson serves to shield the nuclear power industry from the true costs of producing power, providing an unfair economic advantage over other traditional and alternative electrical sources. For example, wind has a tax credit—or, if we extend it, will have and has had one—solar, geothermal, nothing; biomass, nothing; but yet we give this sweetheart deal to nuclear power. The nuclear power industry must assure compensation to the public in the event of an accident, as any other business. The nuclear power industry must not shirk its responsibility.

Although an event we hope is unlikely, we are also hopeful that an accident never occurs. We must acknowledge the possibility of a catastrophic event. We know that the Titanic was unsinkable but, of course, it sank on its first voyage.

To address the shortcomings I have spoken about, and more, my amendment would modernize the Price-Anderson coverage for existing reactors and would require new reactors to obtain private insurance to cover the full amount of a nuclear accident. It would raise the maximum annual contribution for reactor owners from $10 million to $20 million. The Nuclear Regulatory Commission recommended this increase in 1998 and then backed down.

My amendment also would require each reactor owner to guarantee the full financial commitment of each reactor using hard money resources such as surety bonds, letters of credit, private insurance, escrow deposit accounts. Currently, the NRC requires only a 3-month cashflow statement to demonstrate the reactor owner can pay $10 million. Based upon Enron accounting and Andersen accounting, this is not the way to do it.

My amendment would establish a Presidential commission to examine the public health and environmental consequences of a catastrophic accident. My amendment would protect the Price-Anderson payments for victims if the owner of a reactor filed for bankruptcy.

Finally, my amendment would require the President to determine if an intentional act against a nuclear powerplant was an act of terrorism covered under Price-Anderson.

Together, these amendments make Price-Anderson a viable system, perhaps, or at least a more viable system, for existing reactors and take away the training wheels for the next generation of nuclear powerplants so they can succeed on their own merits. Taken together, this amendment will let the nuclear industry stand on its own two feet. Taken together, these amendments will protect the environment and the American people for generations to come.

This is a very serious issue with which we are dealing. A resident of the Chair's State, Christy Brinkley, who is a famous woman—not only because of how she looks but how she thinks—has become really involved in things nuclear. She has testified at hearings in Washington.

Our committee, of which the Presiding Officer is a member, held a hearing on Price-Anderson. We do not have all the jurisdiction of Price-Anderson. The Energy Committee that is handling this bill has some of the jurisdiction. But if there were ever things legislative that the Environment Committee should deal with, it would be nuclear power. Christy Brinkley is one of many who recognize the problems involved.

Every environmental—I should not say every environmental group; there may be a few missing, but most environmental groups in Washington signed a letter supporting the amendment I have offered, recognizing that it is important Price-Anderson be changed. It is not fair the way things now are. Why should they have the benefit of government handouts, really, when other electricity generators do not? My amendment would give financial protection for licensees. It would be a guarantee of preferred premium. There would be financial qualifications. We would have a Presidential commission on incident consequences.

Of course, the section clarifies acts of terrorism involving nuclear licensees would be covered under Price-Anderson, but this section directs the President to determine whether an attack on a nuclear powerplant is an act of terrorism or an act of war for the purposes of paying claims for public liability.

The act and regulations under Price-Anderson are really flawed. Most operators meet the current provisions through a loophole. That is to make sure they are financially sound to respond to what largess the Federal Government has given them. But even there they "Enron" us. The acting regulations are flawed in this regard. Most operators meet the current provisions through a loophole by providing only an annual certified financial statement, which is essentially an auditor's statement. The public deserves, especially in light of what has happened since the Enron debacle, more protection than that offered by a potentially misleading certified financial statement, particularly, as I have mentioned, after the Enron mess involving its financial auditor, Arthur Andersen.

The amendment I have submitted would ensure real financial safeguards such as a bond, a letter of credit, or a loan. Escrow funds, or even insurance, would be the only measure of a nuclear operator's ability to meet its financial obligations to the public.

Under the present legislation, I repeat, all that is needed is an annual certified financial statement showing there is a cashflow or something can be generated, not then but within 3 months. All operators who propose to build new plants to produce electricity from nuclear power, particularly in the context of deregulated wholesale electricity markets, should be expected to incorporate the cost of obtaining insurance, the economics of generating electricity, but not under Price-Anderson. Many of these companies are owned by limited liability corporations, thinly capitalized, highly leveraged, legally structured to avoid exposing their parent corporate entity to liability in the event of insolvency and, of course, in the event of accident.

This amendment establishes minimal financial qualifications to ensure operators can meet their monetary obligations to the public in the event of an accident or terrorist attack. This amendment is supported by the U.S. PIRG, the Environmental Defense Fund, Union of Concerned Scientists, Defenders of Wildlife, Sierra Club, Friends of the Earth, Nuclear Information Resources, League of Conservation Voters, Taxpayers for Common Sense, National Environmental Trust, National Resources Defense Council, Public Citizens Critical Mass, STAR, Safe

Energy Communications Council, and Greenpeace.

A 1992 analysis of energy subsidies by the U.S. Department of Energy indicates a Federal regulation that continues to have a cost-reducing effect on the nuclear power industry is simply unfair. These liability limits provide a subsidy to the nuclear industry to the degree private insurance premiums paid by operators of individual plants are reduced.

In 1983—almost 20 years ago—the NRC concluded the liability limits were sufficiently significant to constitute a subsidy, and it has really been magnified during the last 19 years. However, a quantification of the amount of subsidy was not attempted at that time.

One of the questions raised is: Are acts of terrorism covered by Price-Anderson? The Nuclear Regulatory Commission indicated, in response to questions from the same hearing I have talked about earlier, on January 23, courts would likely have to settle the question. We had leading scholars present from the legal academic world, and they said it would lead to significant delay or even termination of victim compensation.

Are victims guaranteed to receive payments from reactors that file chapter XI bankruptcy? In the same hearing we had in January, the Nuclear Regulatory Commission stated that the NRC could potentially face a conflict with other claims in a bankruptcy proceeding if there were an accident sufficient to trigger these industry payments. The NRC would presumably require a licensee to pay the assessment, but the bankruptcy court could order the licensee to pay it. The NRC also indicated it would support legislation to address this concern.

In the Economist magazine, they have a very in-depth article about nuclear power generally. Among other things in this long article of May 19 of last year, they talk about when costing nuclear power, it is essential to remember the scope, scale, and subtlety of the subsidy it receives. Liability insurance is a good example of this subsidy. The American industry's official position is there is no subsidy involved in Price-Anderson. To do that, you would have to be without any common sense, let alone academic prowess.

Since there is no subsidy involved, why not let the act lapse when it comes up for renewal next year? What we were told by our Vice President is that it needs to be renewed; if not, nobody will invest in nuclear powerplants.

That answers the question.

In the end, the article continues, nuclear energy's future may be skewed by the same sword that is making it fashionable today, the deregulation of electricity markets.

Why is that? Because, Madam President, right now nuclear power is the most expensive, even with the subsidies. Yet the article continues: Liberalization is also exposing the true economics of new plants and is aiming a fierce spotlight at the hefty subsidies that nuclear power has long enjoyed. As these fade, the industry once again will be brought down to earth.

Now, this is not me speaking. This is from the Economist magazine. They say these are significant subsidies and once they are attached, nuclear power will no longer be in vogue.

The New York Times published an article entitled "Hard Questions On Nuclear Power," written last year. Among other things, they say the Congress will need to take a close look at whether it should renew one of the industry's economic underpinnings, the so-called Price-Anderson Act, that limits companies' liability in the event of an accident. If the industry is safe, they may not need such subsidized protection.

A lot of this has come to light following September 11, and whether we have to be more concerned about acts of terrorism. I know the Presiding Officer, this Senator, and the junior Senator from Connecticut, Mr. LIEBERMAN, have looked closely at the safety of nuclear powerplants. He is right. They have different standards at different plants, different companies, different private contractors. If someone going through a baggage checkpoint is examined by someone who works for the Federal Government, should we not have a system whereby nuclear powerplants have Federal employees? The answer is yes. They should not have rent-a-cops determining the safety of those facilities.

Today, thinly capitalized, limited liability corporations operate nearly half of the Nation's nuclear reactors. Taxpayers, I suggest, by default, shoulder secondary insurance costs whenever it is determined insurance claims would constitute undue hardship.

It is reported the NRC did not require the company purchasing the single largest fleet of 16 reactors to provide adequate evidence of financial stability as a condition of granting a license. Some advocates of Price-Anderson argue that because the Government indemnity has never been used, we don't need to worry about it. Price-Anderson is not a subsidy, they say. However, every legal scholar has said it is. Price-Anderson allows utilities to commit less capital to insuring nuclear plants so that the act results in a reallocation of resources away from more highly valued uses, so it is indeed a subsidy. Think of its advantage over solar, geothermal, biomass, clean coal, and certainly natural gas.

Despite continuing claims concerning the safety of nuclear power, the amount of private liability insurance available has actually declined in real terms since 1957. The reason is they figured ways to get around that. The Nuclear Regulatory Commission report states it is unlikely that the amount of available liability insurance would increase much beyond the $200 million level without strong pressure from outside the insurance industry. The obvious question is, What could be expected with repeal of Price-Anderson? One could argue, as Richard Howell does, that the more likely result is that sufficient insurance will be provided to maintain the viability of the industry.

These companies make a lot of money. As every other business, they will buy insurance to cover their liability. Why should the Federal Government have to provide that? Utilities needing more liability insurance would have an incentive to accept stricter safety standards from insurance companies. An increase in the role of the insurance industry would be a welcome development by regulators and an economic incentive for safe operating methods and not relying on the Federal Government to give them a subsidy.

If Price-Anderson were allowed to expire, the determination for what sort of tort liability, strict liability, or negligence to which the plants are subject reverts to States. We have been debating in the Senate for the many years I have been here whether or not we will have a national standard for product liability. The answer is no. We let the States determine that. That is the way it should be.

AMENDMENT NO. 2984, WITHDRAWN

I will withdraw my amendment. I hope people will vote against this amendment. I know there will be people wanting to vote for this simply because the two managers of the legislation support this legislation. I have the greatest respect for my friend from New Mexico. He has been somebody I have looked up to the entire time I have been in the Senate. I will continue to look up to him even though he is wrong on this issue. He is simply wrong. Price-Anderson needs to be changed.

I hope Senators vote against this mischievous and unworthy amendment. It is not good for the country. It is not good for the country for so many reasons, not the least of which is the liability aspect of it, not the least of which the Federal Government should get out of subsidizing nuclear power. But also, if we got rid of this amendment, people living near nuclear powerplants would know there is sufficient insurance to take care of their family if something went wrong.

I ask unanimous consent to withdraw my amendment.

The PRESIDING OFFICER (Mr. CARPER). Without objection, the amendment is withdrawn.

The amendment (No. 2984) was withdrawn.

Mr. REID. I ask for the yeas and nays on the Voinovich amendment.

The PRESIDING OFFICER. Is there a sufficient second?

There does not appear to be a sufficient second.

Mr. VOINOVICH. Mr. President, I will mention that I have the highest regard for Senator REID. Much of what he just discussed came up in the committee hearing we had. Perhaps the Presiding Officer was at the meeting.

Mr. REID. Could I ask my friend to yield for a brief second?

I will ask for the yeas and nays on the Senator's amendment. It is my understanding everyone wants to vote on it. We did not get a second from the Republicans.

I ask for the yeas and nays on the Voinovich amendment No. 2983.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. MURKOWSKI. I apologize to the majority whip and the manager of the bill. I apologize. I have not been active in the discussion this morning. But as I understand it, the Senator from Nevada offered a second degree which he intends to withdraw—or is it withdrawn? It is withdrawn, so we are on Price-Anderson. I certainly support the call for the yeas and nays.

It is my understanding the majority side will introduce the next amendment. At this time I wonder if they will indicate what that amendment might be.

Mr. BINGAMAN. Mr. President, in response to my friend from Alaska, once the debate is concluded on the Price-Anderson amendment Senator VOINOVICH has offered, it is our intent to set that aside and go to an amendment on hydraulic fracturing, which I would offer. I think Senator INHOFE and various other Senators are cosponsoring that.

Then I believe it is the whip's intent to have us stack a couple of votes on those two issues right after lunch.

Mr. REID. If the Senator will yield for a minute, we are now showing to the minority the proposal. We have two votes at 2 o'clock, with the time between now and 2 o'clock to be divided to speak on both amendments, Price-Anderson and also the hydraulic fracturing. We would have a vote on both those. We are not in a position to offer that as a unanimous consent agreement because we have to clear it with the two leaders, but that is the intention.

Mr. MURKOWSKI. Mr. President, what I am concerned about is the whip indicated 2 o'clock. Will we break for lunch or is it the intention to go right through?

I just have been alerted there are a couple of our Members who are going to want to speak on the fracturing amendment. Unless there is any extended debate, I am certainly willing to agree to a vote at 2 o'clock. Obviously, we are about through with Price-Anderson.

Mr. REID. If the Senator from Alaska will yield, I think we are just about finished on Price-Anderson. The Senator from Ohio wants to speak, and maybe the Senator from New Mexico, briefly, on it. But I think we will have quite a bit of time on fracturing.

I will propound that at a subsequent time.

Mr. MURKOWSKI. I assure the whip we want to work with him. We have a couple of more Members, I am advised, who want to speak very briefly on Price-Anderson. We are going to urge them to come here now and speak, and then we will have no objection to moving to the fracturing.

Mr. REID. If the Senator will yield, it doesn't matter if they come now or later. The agreement will be that during this next period of time they can speak on either amendment.

Mr. MURKOWSKI. Either amendment; that is certainly fair enough.

I am going to make a short statement on Price-Anderson. Since the second degree has been withdrawn, I will not belabor that other than to say I am very pleased the Senator from Nevada saw fit to withdraw it because had his amendment prevailed, clearly it would have basically amounted to the demise of the nuclear industry from the standpoint of any future facilities being built, because that is the whole justification of Price-Anderson. I will put that behind me and simply support speaking of the Price-Anderson reauthorization amendment.

I think Congress has been derelict in not resolving this issue some time ago. It is an important issue, to encourage further development of our nuclear industry.

For those who are critical of the nuclear industry, I remind you it has an extraordinary safety record, considering the hyperpublicity given to almost any irregularity associated with the operation of the plants.

The point is, to a large degree the system has worked. Any mechanical function has a certain degree of exposure. So you back it up with checks and balances. When you talk about Three Mile Island and the mistakes that were made, the reality is the system worked. If you talk about what happened in Chernobyl, you recognize human activity overrode the systems, which is just what happened when the *Exxon Valdez* went on the rocks. It was human activity—inattentive, in spite of the bells and whistles—that simply allowed this ship in a 10.5-mile-wide channel to hit a rock.

My point is I think the nuclear industry in this country deserves a fair assessment of its extraordinary record. As a consequence, I think we must recognize the significant contribution nuclear energy makes.

It is emission free. As we look at concern over global warming/emission reductions, the one area that generates tremendous potential, even further than the 20 percent of the electric power generation that comes from nuclear energy, is the nuclear industry.

The critics who would like to see this industry simply go away and not expand have to come up with an alternative, other than conservation, because conservation is simply not enough. Conservation will not pick up for the 20 percent of our energy mix that comes from nuclear energy. So we must continue to recognize the nuclear industry is going to play a greater role in the future if we want to meet our energy needs and protect our air quality.

It is interesting to look on occasion at what the Joneses do. In France, obviously, nuclear power has been accepted. It is the area of technology that has the highest recognition in the higher educational system of France. The Japanese are moving towards greater dependence on nuclear energy because of the significant advantages associated with that.

One of the problems, of course, is the nuclear waste issue. We will be getting into that at a later time. But I think it represents the frustration here in the United States with our nuclear industry, not being able to come to grips with what we do with the waste that is generated by the reactors that, of course, are subject to yearly examination when their fuel rods are removed. The question is, What is done with that high-level waste and how is it stored? It is not designed to be permanently stored necessarily in casks. We even embarked on an effort to try to find a repository. The solution appears to have been a selection in Nevada, at Yucca Mountain.

I think it should be recognized we have expended some $7 billion of taxpayers' money on this repository at Yucca Mountain in Nevada. I think we should also recognize the ratepayers have paid, for this nuclear power, into a special fund, which was supposed to fund the construction of a site, that expended approximately $11 billion. So the Federal Government entered into a contractual relationship to take that waste in 1998.

Mr. President, 1998 has come and gone and the Federal Government has not lived up to the terms of its contractual agreements. It is in violation of its contract. As a consequence, litigation associated with suits filed against the Federal Government are somewhere in the area of $40 billion. As we simply put off the decisionmaking process, what to do with this waste, clearly the liability to the taxpayer continues. So we simply have to come to grips with this issue.

I am pleased to say this administration is facing it head on with a series of steps and procedures that will eventually get us to a final decision on how and on what terms this waste is stored, so we can get on with a clear bridge, if you will, to what we are going to do with the waste. That will, to a large degree, address the expansion of nuclear energy in this country because we are not going to expand nuclear production, nuclear energy, until we resolve what to do with that waste.

It is important we get this issue behind us. But an important part of this, indeed, is Price-Anderson because that supplies, if you will, the necessary underwriting by the Federal Government of catastrophic exposure.

Solid nuclear baseload power provides our grids with stability and reliability. In California alone, nuclear supplies about 16 percent of the energy. Without it, last summer the California energy situation would have faced a collapse. High natural gas prices and low uranium prices help to make electricity produced by nuclear some of the cheapest in the country. Perhaps someday we might reach the fabled "too cheap to meter" goal. I am not sure that is going to happen, but nevertheless it is a reasonable objective.

We have had, as I have indicated, safe and efficient operation of U.S. plants. They are operating at record efficiencies as they have recognized the procedural efficiencies.

The point is that they are very efficient, and as a consequence they have become very attractive investments. We have seen more concentration by utility companies picking up some of the newer and more efficient plants.

In 1999, U.S. nuclear reactors achieved close to 90 percent efficiency. The total efficiency increase during the nineties at the existing plants was the equivalent to approximately 23 1,000-megawatt powerplants. I think that is pretty significant. During the 1990s, a 10-year period of existing plants, the equivalent efficiency was 23 1,000-megawatt powerplants. I think that more or less speaks for itself relative to the advantages and attractiveness of nuclear power. Keep in mind that this is clean, it is nonemitting generation.

With that efficiency, the industry is on an upswing. Four or five years ago, you wouldn't have thought you would hear talk about buying and selling plants, or even building new plants. Today the discussion is occurring.

By the end of the 2002, the Chicago-based Exxon corporation will have invested a total of $25 million in a South African venture to build a pebble bed modular reactor.

I see my friend from New Mexico, the senior Senator, in the Chamber. He is very familiar with this particular technology, which I think provides greater attractiveness for the nuclear industry.

If we ever hope to achieve energy security and energy independence in this country, we cannot abandon the nuclear option which is an important and integral part of our energy mix. Our economy depends on nuclear energy. Our national security depends on nuclear energy. Our environment depends on nuclear energy. And our future, to a large degree, depends on nuclear energy.

Critical to the future continuation of this industry is Price-Anderson. I have been a strong advocate of reauthorization of Price-Anderson. Senator BINGAMAN and I have worked together with our staff to agree on language in the last Congress to renew the Price-Anderson Act. Both of our comprehensive energy bills introduced in the first session of this Congress contain the same language based on recommendations from the Department of Energy and the Nuclear Regulatory Commission. Renewal of the act was supported by the last administration. Renewal of the act was also one of President Bush's 105 recommendations in the national energy policy. For over 40 years, the act has ensured ample insurance for the industry, and it will provide a mechanism for the prompt payment to victims in the unlikely event of a nuclear exposure of some kind. Renewal of this act is necessary if we are to continue nuclear energy, new plants, and ensure the relicensing of our existing plants.

I don't understand really why the majority leader excluded the NRC licensees from the substitute. But this amendment is going to rectify that oversight.

I am very pleased to see the level of support on the floor of the Senate. I thank the Senator from Ohio, Mr. VOINOVICH, for his leadership in this area, and Senator DOMENICI and Senator BINGAMAN, chairman of the Energy Committee.

I yield the floor.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. Mr. President, I am very pleased that early in the discussion of the energy bill an amendment on Price-Anderson extension is before the Senate. I am also very pleased that it has so many cosponsors and that it is very bipartisan, in particular on the issue of nuclear power and its role in America and the world's future. If we are looking for the energy of the future and if we are looking to have clean air, obviously nuclear power has to be looked at.

I am grateful that today Senator BINGAMAN, the manager of the bill and chairman of the committee, is a cosponsor of the Voinovich amendment. It also has a number of other Senators as cosponsors, all of whom from time to time have expressed great interest in nuclear energy.

I also would like to commend the manager of the bill, even though we didn't mark up all the way through the committee. Senator BINGAMAN's staff, the majority staff, are fully aware of the nuclear power issues that confront our country.

If there are Senators who wonder why there are not a series of amendments on nuclear power and its future that are going to be offered—there will be two or three—it is because this bill contains general type language that will permit nuclear power to be a player in the future. If, in fact, there are utility companies here and elsewhere in the world privately and publicly owned that want to produce nuclear power because of its efficiency and, equally important, because clean electricity is produced, and if we are worried about underdeveloped countries developing and using a lot of energy, and because America needs more energy over the next 20 or 30 years, it is good that we have not locked out the option of nuclear energy.

There are some things that could be said about nuclear power in terms of the shortage we have found ourselves in. Just the past year, we found that of all the power sources in the country, the cheapest after hydropower is, and has been for some time, nuclear power. Per unit of electricity, the cheapest power generation of any major size in America has been nuclear power.

Nuclear powerplants have gone without incident or accident for years. As a matter of fact, they have increased productive capacity in the neighborhood of from 70 to 75 percent of capacity to the low 90s for this entire period of time when we needed more energy because we were in the position as a nation of being sort of ambivalent about our energy supply. We weren't quite sure where we were going.

There are also some exciting occurrences in terms of the next generation of nuclear powerplants. Perhaps before we finish we will have time to discuss events that are occurring around the world. Even American companies are thinking about nuclear plants in terms of future supply of electricity.

The future is very bright. New technology will make nuclear power safer, if that can be. It will make it cheaper. It will permit us to locate nuclear powerplants more easily. They won't have to be the large-megawatt plants. They can be small and rather mobile plants built much more easily than in the past, and with far less permit time with the kind of work we have to do in that regard.

Already the United States is ahead of the crisis. We have begun to build back into our Department of Energy some significant nuclear activities. We have had an Energy Department during the last 25 years when the Department was acting as if it were embarrassed about nuclear power and didn't even want it to be part of the Department of Energy. It is back, and we are now spending some money every year to help generate enthusiasm among engineers and those who would join the corps of experts in physics and chemistry and the like who will work on nuclear powerplants in the future.

In producing this bill, Senator BINGAMAN took many of the things we had appropriated and made them permanent law with reference to the future of nuclear power.

I will insert in the RECORD at a later time, rather than itemize them now, the numerous areas where the bill already takes into consideration the need for us to put nuclear power on a neutral footing with other kinds of power and to see if we can't come out winners both as to energy and as to the environment.

So I want to state my very strong support for the renewal of Price-Anderson, which is going to expire later this year—I think in August. It has been extended by Congress three times since becoming law in 1957. Price-Anderson provides a framework for payment of public liability claims for any accident at a commercial nuclear powerplant. This law is vital to ensure that our taxpayers continue to receive the benefits of nuclear energy and allows the industry to consider the construction of new plants.

The Price-Anderson amendment, as it is structured—the one that is pending—takes care of and provides coverage for future plants. Some have wanted to cover the past but not the future. I am very pleased, and am certain that those who think there is a new day for the production of energy in the United States ahead, and that it might involve nuclear power, are also strongly supportive and delighted that this amendment is the broad amendment that also covers the future, not just the past.

Many bills pending before the Senate incorporate renewal of Price-Anderson. As I indicated, I have introduced a bill, S. 472, which contained renewal provisions. I was very pleased that 18 cosponsors joined me in that bill. Earlier bills from Senator BINGAMAN and Senator MURKOWSKI had also incorporated renewal.

This renewal amendment should enjoy strong bipartisan support in the Senate. I am very pleased that it will receive strong support because that in and of itself sends a signal that was not around 10 or 15 years ago when we thought we had an abundance of energy and the supply was not a problem. There was a small cadre of those who did not like nor want us involved in nuclear power. They prevailed. It would appear that we are moving in the direction of a neutral approach and that nuclear power will have to prove itself alongside all the other energy sources as being efficient and safe and the kind of power that we would truly like to have in our country, and it would be good for the world.

In addition to coverage of commercial nuclear plants, Price-Anderson enables companies to accept the challenges that are involved in the cleanup of past nuclear weapons activities without charging the Government for insurance for coverage of very large possible, although highly unlikely, claims. It assures the availability of funds to provide prompt compensation to any member of the public who is harmed by nuclear activities. Without renewal, no new nuclear powerplants would be covered and progress on the cleanup of weapons activities could indeed be seriously jeopardized.

That will not be the case once we have reported out a bill. Hopefully, before this year ends, the Senate and the House will find a way to do that.

Since taxpayer funds are not used to pay claims resulting from a nuclear incident, there is no "subsidy" to industry, as some claim. Over the last 43 years of Price-Anderson protection, the insurance pools, never the Federal Government, have paid claims totaling $180 million. Price-Anderson, with its risk-pooling among all nuclear companies, provides a far greater measure of certainty to the public for any liabilities that any one company could provide.

Again, I appreciate Senator BINGAMAN's work on the basic bill, the underlying bill, as it pertains to nuclear power and various activities that will bring it into the future and line itself up along with other major energy sources not only for America but for the world.

One area involves the appropriate treatment for nonprofit contractors. We have agreed that these contractors should have some degree of liability, but we have carefully limited their liability to the fee they are receiving at the time of any penalty. Without such a limitation, nonprofits could undertake a contracting role with the Department, but they would have to charge excessive fees to the Government and, obviously, would not be awarded any kind of work.

There is a second provision for the treatment of modular reactors. When Price-Anderson was first drafted, it was assumed that all commercial reactors would be very large, maybe 1,000 megawatts or even more. But lately, there is growing interest in very small powerplants that might utilize modular construction and deliver much less power, perhaps only 100 megawatts per module.

These small plants have some very interesting features, of which the most important is the ability to make them absolutely safe against meltdown incidents. Yes, that is a reality. That is what those who are inventing and putting together these new modular constructed powerplants, with new technology, will be able to do. They will not, by their own physics, be able to have a meltdown.

I appreciate that this version of an extended Price-Anderson law provides equitable treatment for modular reactors to ensure that the act becomes viable in the future and is not a disincentive to considering new technology of the kind that is exciting many people.

The renewal of Price-Anderson is one of the key actions needed to ensure that nuclear energy continues to provide clean, safe power for our Nation.

Again, I am grateful for the leadership shown by the chairman of the committee. I am hoping that before this year is out, we will come out of conference with a Price-Anderson that is intact and that contains the language that is before the Senate today. We will have done something worthwhile.

For those who wonder if anything is happening on this energy bill that is good and healthy and salutary and futuristic, I hope they will join us in saying that we did one thing, and it became less and less controversial, that is to extend the underpinnings, in terms of liability coverage, the underpinnings of nuclear power for today and nuclear power for the future.

I yield the floor and thank the Chair for recognition.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. VOINOVICH. Mr. President, I ask unanimous consent that Senator LINCOLN be added as a cosponsor of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. VOINOVICH. I think it is significant, Mr. President, that the two Senators from New Mexico—one a Republican and one a Democrat—are both cosponsors of this amendment. I do not believe there is anyone in this country who speaks out more eloquently on behalf of nuclear power than Senator DOMENICI. This has been a cause of his for many years. I think it is important that he underscored the fact that not only does this deal with the nuclear power industry, but it also deals specifically with the cleanup of over 100 DOE facilities; that without this legislation the contractors would not be willing to go forward with the work they are now doing at those facilities. And it also provides a situation so that in the event that new reactors come on board—that is, more nuclear power facilities are built—that it would include those new facilities.

Before I conclude on this amendment, I would like to point out and clarify the fact that the $10 million this bill continues to be asked for is adequate to get the job done.

With the Presiding Officer's permission, I would like to read from the testimony of William F. Kane, who is the Deputy Executive Director for Reactor Programs because I think, in a nutshell, he can clarify to our colleagues just exactly what this is about.

In his testimony on January 23rd, he said:

> Further developments in the electric generating industry since the 1998 report to Congress have led the Commission to review its

> 1998 recommendations and to reevaluate its recommendation that Congress consider increasing the annual installment to $20 million. There is now a heightened interest in extending the operating life for most, if not all, of the currently operating power reactors, and some power companies are now examining whether they wish to submit applications for new reactors or complete construction of reactors that have been deferred. As a result, contrary to our former recommendations, the commission does not believe there is now justification for raising the maximum annual retrospective premium of $10 million. The level is adequate and does not need to be changed.

He went on to say:

> In summing up, I would like to leave these thoughts with you: To date, the United States Government has not paid a penny for claims against nuclear power licensees. In the event a serious accident were to occur, over $9 billion would be available to pay compensation for any personal injury or offsite property damage. The money will come from insurance policies bought by the industry and from retrospective premiums that will be paid by the industry. If these funds are inadequate, Congress will be called upon to decide what action is needed to provide assistance to those harmed. We believe the public is protected by the broad base of prompt funding. The Price-Anderson Act further aids the public by establishing important procedural reforms for claims arising from nuclear accidents. It channels liabilities to the licensee, establishes a single Federal form for all claims, eliminates the need to prove fault, requires waivers of other significant defenses, makes prompt settlements possible, and if litigation is needed, establishes the legal management process to assure fairness and equity and distribution of damages.

That lays it out in a nutshell in terms of why it is that we need to reauthorize Price-Anderson.

It is my understanding the Senator from New Mexico will be introducing another amendment. For the Members of the Senate, those who still would like to speak on Price-Anderson will be able to continue to do that, as well as those who will be supporting Senator Bingaman's amendment.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. BINGAMAN. Mr. President, just a couple of other words about the Price-Anderson amendment: First, I thank my colleague from New Mexico for his kind words about provisions that are included in this bill. He has authored many of those provisions, particularly the ones related to nuclear power, and he has been a tireless advocate for peaceful use of nuclear power in this country for many years. We are all well aware of that.

We have included in the bill those provisions he suggested which clearly do contemplate and envision continued contributions by the nuclear power industry to our energy needs. That is certainly my purpose and, I know, the purpose of Senator Voinovich as well. We were talking in one of the asides about the fact that the Price-Anderson Act was originally proposed by Representative Price from Illinois, Mel Price, and also by Senator Clinton Anderson from New Mexico. It has served the country well for 45 years, as we have indicated before. We think it is important that it continue to do so.

Mr. President, I ask unanimous consent that the amendment be set aside, and it be in order for me to send another amendment to the desk for consideration.

The PRESIDING OFFICER. Is there objection?

Mr. INHOFE. Reserving the right to object, I would like to ask the Senator from New Mexico, could I have maybe 2 minutes to say something about Price-Anderson? I am anxious to get to the next amendment.

Mr. BINGAMAN. I withdraw my request, Mr. President.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. INHOFE. Mr. President, we have been talking about a complete energy policy for America. This is a bipartisan effort. I tried to get the Reagan administration to do it, then the Bush administration, the Clinton administration. None of them had done it. Now we have an opportunity to do it. An essential part of that is going to be nuclear energy. Maybe it has been said before, but I only want to put into the Record that after going through this long arduous thing on ambient air and the problems of other forms of energy, each year the U.S. nuclear powerplants prevent 5.1 million tons of sulphur dioxide, 2.4 million tons of nitrogen oxide, and 164 million metric tons of carbon from entering the earth's surface.

Consequently, there are many people who were out protesting against nuclear energy just 20 years ago who now realize this is an abundant and safe and cheap form of energy.

It is necessary in order to do that to have the Price-Anderson Act reauthorized.

I yield the floor

AMENDMENT NO. 2986 TO AMENDMENT NO. 2917

Mr. BINGAMAN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, the pending amendment is set aside. The clerk will report.

The bill clerk read as follows:

> The Senator from New Mexico [Mr. Bingaman], for himself, Mr. Baucus, Mr. Bond, Mr. Breaux, Mr. Campbell, Mr. Conrad, Mr. Dorgan, Mr. Inhofe, Ms. Landrieu, Mrs. Lincoln, and Mr. Thomas, proposes an amendment numbered 2986 to amendment No. 2917.

. Mr. BINGAMAN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To study whether there is a need to regulate hydraulic fracturing)

At the end of title VI, add the following new section:

"SEC. 610. HYDRAULIC FRACTURING.

"Section 1421 of the Safe Drinking Water Act (42 U.S.C. Sec. 300h) is amended by adding at the end the following:

"(e) Hydraulic Fracturing for Oil and Gas Production.—

(1) Study of the effects of hydraulic fracturing.—

"(A) In general.—As soon as practicable, but in no event later than 24 months after the date of enactment of this subsection, the Administrator shall complete a study of the known and potential effects on underground drinking water sources of hydraulic fracturing, including the effects of hydraulic fracturing on underground drinking water sources on a nationwide basis, and within specific regions, States, or portions of States.

"(B) Consultation.—In planning and conducting the study, the Administrator shall consult with the Secretary of the Interior, the Secretary of Energy, the Ground Water Protection Council, affected States, and, as appropriate, representatives of environmental, industry, academic, scientific, public health, and other relevant organizations. Such study may be accomplished in conjunction with other ongoing studies related to the effects of oil and gas production on groundwater resources.

"(C) Study elements.—The study conducted under subparagraph (A) shall, at a minimum, examine and make findings as to whether—

"(i) such hydraulic fracturing has endangered or will endanger (as defined under subsection (d)(2)) underground drinking water sources, including those sources within specific regions, states or portions of States;

"(ii) there are specific methods, practices, or hydrogeologic circumstances in which hydraulic fracturing has endangered or will endanger underground drinking water sources; and

"(iii) there are any precautionary actions that may reduce or eliminate any such endangerment.

"(D) Study of hydraulic fracturing in a particular type of geologic formation.—The Administrator may also complete a separate study on the known and potential effects on underground drinking water sources of hydraulic fracturing in a particular type of geologic formation.

"(i) If such a study is undertaken, the Administrator shall follow the procedures for study preparation and independent scientific review set forth in subparagraphs (1)(B) and (C) and (2) of this subsection. The Administrator may complete this separate study prior to the completion of the broader study of hydraulic fracturing required pursuant to subparagraph (A) of this subsection.

"(ii) At the conclusion of independent scientific review for any separate study, the Administrator shall determine, pursuant to paragraph (3), whether regulation of hydraulic fracturing in the particular type of geologic formation addressed in the separate study is necessary under this part to ensure that underground sources of drinking water will not be endangered on a nationwide basis, or within a specific region, State or portions of a state. Subparagraph (4) of this subsection shall apply to any such determination by the Administrator.

"(iii) If the Administrator completes a separate study, the Administrator may use the information gathered in the course of such a study in undertaking her broad study to the extent appropriate. The broader study need not include a reexamination of the conclusions reached by the Administrator in any separate study.

“(2) INDEPENDENT SCIENTIFIC REVIEW.—

“(A) IN GENERAL.—Prior to the time the study under paragraph (1) is completed, the Administrator shall enter into an appropriate agreement with the National Academy of Sciences to have the Academy review the conclusions of the study.

“(B) REPORT.—Not later than 11 months after entering into an appropriate agreement with the Administrator, the National Academy of Sciences shall report to the Administrator, the Committee on Energy and Commerce of the House of Representatives, and the Committee on Environment and Public Works of the Senate, on the—

“(i) findings related to the study conducted by the Administrator under paragraph (1);

“(ii) the scientific and technical basis for such findings; and

“(iii) recommendations, if any, for modifying the findings of the study.

“(3) REGULATORY DETERMINATION.—

“(A) IN GENERAL.—Not later than 6 months after receiving the National Academy of Sciences report under paragraph (2), the Administrator shall determine, after informal public hearings and public notice and opportunity for comment, and based on information developed or accumulated in connection with the study required under paragraph (1) and the National Academy of Sciences report under paragraph (2), either:

“(i) that regulation of hydraulic fracturing under this part is necessary to ensure that underground sources of drinking water will not be endangered on a nationwide basis, or within a specific region, State or portions of a State; or

“(ii) that regulation described under clause (i) is unnecessary.

“(B) PUBLICATION OF DETERMINATION.—The Administrator shall publish the determination in the Federal Register, accompanied by an explanation and the reasons for it.

“(4) PROMULGATION OF REGULATIONS.—

“(A) REGULATION NECESSARY.—If the Administrator determines under paragraph (3) that regulation by hydraulic fracturing under this part is necessary to ensure that hydraulic fracturing does not endanger underground drinking water sources on a nationwide basis, or within a specific region, State or portions of a State, the Administrator shall, within 6 months after the issuance of that determination, and after public notice and opportunity for comment, promulgate regulations under section 1421 (42 U.S.C. 300h) to ensure that hydraulic fracturing will not endanger such underground sources of drinking water. However, for purposes of the Administrator's approval or disapproval under section 1422 of any State underground injection control program for regulating hydraulic fracturing, a State at any time may make the alternative demonstration provided for in section 1425 of this title.

“(B) REGULATION UNNECESSARY.—The Administrator shall not regulate or require States to regulate hydraulic fracturing under this part unless the Administrator determines under paragraph (3) that such regulation is necessary. This provision shall not apply to any State which has a program for the regulation of hydraulic fracturing that was approved by the Administrator under this part prior to the effective date of this subsection.

“(C) EXISTING REGULATIONS.—A determination by the Administrator under paragraph (3) that regulation is unnecessary will relieve all States (including those with existing approved programs for the regulation of hydraulic fracturing) from any further obligation to regulate hydraulic fracturing as an underground injection under this part.

“(5) DEFINITION OF HYDRAULIC FRACTURING.—For purposes of this subsection, the term ‘hydraulic fracturing’ means the process of creating a fracture in a reservoir rock, and injecting fluids and propping agents, for the purposes of reservoir stimulation related to oil and gas production activities.

“(6) SAVINGS.—Nothing in this subsection shall in any way limit the authorities of the Administrator under section 1431 (42 U.S.C. 300i).”.

Mr. BINGAMAN. Mr. President, this is a bipartisan amendment offered by myself, Senator INHOFE from Oklahoma, and by various other of our colleagues—Senators BAUCUS, BOND, BREAUX, CAMPBELL, CONRAD, DORGAN, LANDRIEU, LINCOLN, and THOMAS. I thank my colleagues.

The proposed amendment concerns hydraulic fracturing. That is a valuable tool in reducing our dependence on foreign energy supplies. It is one that the oil and gas industry uses on a very regular basis. It is necessary if we are to develop the majority of our onshore natural gas wells. Hydraulically fractured wells produce about 10 trillion cubic feet of natural gas annually. Through injecting fluids under high pressure, hydraulic fracturing creates pathways for gas to flow to the well.

The amendment I have sent to the desk and have offered sets up a study process to determine whether high fracturing should be regulated by the Federal Government under the Safe Drinking Water Act. Let me give the context for this proposed amendment.

States already have the authority to regulate hydraulic fracturing. They do that through measures such as requiring casing or lining of oil and gas wells where those wells cross through aquifers. The State regulatory programs have been effective to date. And although there have been over a million hydraulic fracturing jobs conducted in the last 5 years, there have been zero confirmed instances of hydraulic fracturing contaminating drinking water. There is not one time that contamination has been established.

Where no one has been able to confirm any harm from hydraulic fracturing, it is sensible to study whether there is a real problem before we rush forward to impose additional Federal regulation. That is precisely what the amendment I have sent to the desk would do.

The Environmental Protection Agency must first study whether hydraulic fracturing has any effects on underground sources of drinking water. After that, the National Academy of Sciences, as an independent scientific body, would review EPA's study. Then based upon all the evidence, EPA must determine whether in addition to State regulation, Federal regulation of hydraulic fracturing under the Safe Drinking Water Act is necessary to protect underground sources of drinking water.

While the study is being prepared, States would fully retain their own existing programs and EPA would fully retain its emergency powers to prevent any contamination of drinking water that would immediately threaten public health.

The proposed amendment's reliance on existing State programs while a study is prepared has received extensive bipartisan support. It has received that support both in the Senate but also in the executive branch. During both the previous administration, the Clinton administration, and the current administration, the EPA has maintained that Federal regulation of hydraulic fracturing is not required.

In fact, the previous administration's EPA argued in Federal court—I quote from one of their briefs:

> Alabama is appropriately regulating production of methane via hydraulic fracturing. There is no need for EPA to supplant these efforts.

The previous administration's EPA also cited the absence of any evidence that hydraulic fracturing has harmed drinking water and Alabama's close regulation of hydraulic fracturing in denying a 1994 petition to impose Federal regulations on Alabama.

Mr. President, let me at this point submit for the record a letter from Carol Browner, then the head of the EPA, sent to David Ludder, general counsel for the Legal Environmental Assistance Foundation. This is a 1995 letter in which she says:

> EPA does not regulate—and does not believe it is legally required to regulate—the hydraulic fracturing of methane gas production wells under its UIC program.

Continuing the quotation:

> There is no evidence that the hydraulic fracturing at issue has resulted in any contamination or endangerment of underground sources of drinking water.

I ask unanimous consent that that letter be printed in the RECORD at the end of my statement.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See Exhibit 1.)

Mr. BINGAMAN. Mr. President, a cautionary word. We will need to use hydraulic fracturing of gas wells over the next decade. An unneeded regulation of hydraulic fracturing could make some of these wells uneconomical to produce and could defeat our important efforts to increase our energy independence—particularly as it relates to natural gas.

My proposed amendment would sensibly allow hydraulic fracturing to assist efforts to increase our energy independence, while studying whether there is any known environmental harm that would require Federal regulation. For this reason, I urge my colleagues to vote for this amendment.

I yield the floor.

EXHIBIT 1

EPA,
Washington, DC, May 5, 1995.

DAVID A. LUDDER, Esq.,
General Counsel, Legal Environmental Assistance Foundation, Inc., Tallahassee, FL.

DEAR MR. LUDDER: The Environmental Protection Agency (EPA) has received and carefully reviewed your May 3, 1994, Petition for Promulgation of a Rule Withdrawing Approval of Alabama's Underground Injection Control (UIC) Program. Based on that review, I have determined that Alabama's implementation of its UIC Program is consistent with the requirements of the Safe Drinking Water Act (42 U.S.C. §300h, et seq.) and EPA's UIC regulations (40 C.F.R. Part 145). EPA does not regulate—and does not believe it is legally required to regulate—the hydraulic fracturing of methane gas production wells under its UIC Program.

There is no evidence that the hydraulic fracturing at issue has resulted in any contamination or endangerment of underground sources of drinking water (USDW). Repeated testing, conducted between May of 1989 and March of 1993, of the drinking water well which was the subject of this petition failed to show any chemicals that would indicate the presence of fracturing fluids. The well was also sampled for drinking water quality and no constituents exceeding drinking water standards were detected. Moreover, given the horizontal and vertical distance between the drinking water well and the closest methane gas production wells, the possibility of contamination or endangerment of USDWs in the area is extremely remote. Hydraulic fracturing is closely regulated by the Alabama State Oil and Gas Board, which requires that operators obtain authorization prior to all fracturing activities.

Accordingly, I have decided to deny your petition. Enclosed you will find a detailed response to each contention in your petition, which further explains the basis for this denial.

Sincerely,
CAROL M. BROWNER.

The PRESIDING OFFICER. The Senator from Oklahoma is recognized.

Mr. INHOFE. Mr. President, first of all, I ask that Senator TIM HUTCHINSON and Senator VOINOVICH be added as cosponsors of this amendment and the Price-Anderson amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. INHOFE. Mr. President, first of all, I thank my colleague from New Mexico. I am happy to join him in proposing this amendment. I think it is very important for a number of reasons. I just came from the Senate Armed Services Committee, where we had all four of the chiefs of the services. We were talking about this war that we are prosecuting right now. We were talking about the Nation's security.

I can remember all the way back in the 1980s, when then-Secretary of the Interior Don Hodel and I went around the country and talked about the fact that an energy policy is something that is important to our Nation's security. It is a national security issue, not an energy issue. Consequently—and I said this a minute ago—this has not been a partisan thing. We tried to get President Reagan to come up with an energy policy. He would not do it. I thought George "the first," coming from the oil fields, would have one, but he didn't do it either. The last administration didn't do it.

A national energy policy is really necessary for national security reasons. Right now, we are dependent upon foreign countries for 57 percent of our energy supply—something that is not acceptable, particularly right now in a time of war.

Where does this issue of hydraulic fracturing come in? I am from Oklahoma, and I understand we have a tremendous reserve down there in terms of marginal production. I started many years ago—probably before many fellow Members were born—in the oil fields in cable tool rigs—something they used before rotaries—the pounding method. I realized at that time how much this meant to the country and how much our shallow production meant.

When we talk about energy policy, we talk about nuclear, as we did in the last amendment, and we talk about ANWR—and it is necessary to get into some of the deep stuff.

In terms of marginal production—wells that have 15 barrels a day, or less, and a comparable amount for gas wells—this has a tremendous prospect to be an important ingredient in a national energy policy. If we had all of the gas wells that have been plugged in the last 10 years, or oil wells that have been plugged, producing today—marginal wells, producing 15 barrels or less—it would equal more than what we are currently importing from Saudi Arabia. So it is necessary to have these wells.

How does hydraulic fracturing fit into this equation? This system has been used—I remember using it myself—since the 1940s. In the 1940s, we had a system of injection in order to get maximum production in both oil and gas wells. Not one time in that period of time—after over a million wells have used this process—has there been any kind of damage to the environment. In the last 15 years, there have been over 100,000 wells using this, with no damage to the environment.

As the Senator from New Mexico points out, this is not a partisan thing. The Clinton administration supported this, the Bush administration supports this, and Carol Browner supported this when I served as chairman of one of the subcommittees of the Environment and Public Works Committee. This is necessary to have, and it does no harm to the environment.

I am honored to join my colleague, Senator BINGAMAN, in supporting this amendment and in saying this is a necessary part of the national energy policy.

I ask unanimous consent that a letter from Carl Smith Assistant Secretary, Office of Fossil Energy, of the Department of Energy be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF ENERGY,
Washington, DC, March 7, 2002.

Hon. JEFF BINGAMAN,
Chairman, Committee on Energy and Natural Resources, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: As the Senate considers legislation to address our growing dependence on imported oil and to consider ways to promote the production on of our domestic energy resources, I am concerned that the impact of possible restrictions on the use of hydraulic fracturing, the most commonly used technique to stimulate domestic oil and gas wells, may not be well known or fully understood. Therefore, I thought it would be useful to provide you with some information on the essential role this technology plays in today's oil and gas industry.

Hydraulic fracturing is used on approximately two thirds of the onshore gas wells drilled in the United States today and since its inception in 1947, it has enabled the production of over eight billion barrels of North American oil reserves that otherwise would have been unrecovered. It is estimated that hydraulically fractured gas wells produce 10 Tcf of natural gas annually, or nearly sixty percent of the gas produced from domestic gas wells. Further, production of one of our fastest growing sources of onshore natural gas supplies, coalbed methane, would be seriously diminished if hydraulic fracturing was unavailable. Approximately seventy-five percent of the 1.5 Tcf of coal bed methane produced annually comes from wells that were hydraulically fractured.

I would also point out that hydraulic fracturing offers several environmental benefits. By increasing the production of oil and gas from reservoirs that have lower flow rates, hydraulic fracturing reduces the number of wells needed to deplete the reservoir, thereby protecting the environment by minimizing the waste volumes and surface disturbance associated with oil and gas drilling. Also, by increasing the amount of methane recovered from mineable coal seams prior to the start of mining activities, hydraulic fracturing promotes coal mine safety and lowers the amount of methane gas that escapes during mining operations, a significant source of greenhouse gas emissions.

On August 24, 2000, while still Secretary of Energy for the State of Oklahoma, I had the opportunity to raise these points at a workshop held here in Washington by the Environmental Protection Agency (EPA). Also speaking at that workshop was Tom Stewart, Executive Vice President of the Ohio Oil and Gas Association. I managed to find a copy of his remarks on the internet and I thought you might be interested in them. They mirrored many of the comments I heard from my colleagues during the workshop. Tom noted that, "With very limited exceptions, hydraulic fracturing was used to complete over 55,000 Ohio wells drilled since 1970. Exploitation of the tight Clinton sand would not have been possible without fracturing. The hydraulic fracturing process made the modern Ohio oil and gas industry."

In September 2001, the Department of Energy's concern with the impact of proposed restriction on the use of hydraulic fracturing, led the Office of Fossil Energy to ask the National Energy Technology Laboratory's Strategic Center for Natural Gas to conduct a study on, "Quantifying the Impact of Hydraulic Fracturing in Meeting U.S. Natural Gas Supply Requirements". The number and types of stimulation treatments (hydraulic fracturing) will be quantified, treatment costs will be identified, and natural gas production and price relationships will be reviewed and projected. Results of this study will be available in May of this year but I anticipate that some useful information regarding the important role of hydraulic fracturing will be available over the next few weeks. I will provide this information to you as it becomes available.

I welcome the opportunity to bring this very important matter to your attention. If you need more information or have any questions please contact Peter Lagiovane of my office. He can be reached at, 202–586–8116 or via email at, *peter.lagiovane@hq.doe.gov*.

Sincerely,

Carl Michael Smith,
Office of Fossil Energy.

Mr. INHOFE. I yield the floor.

Mr. JEFFORDS. Mr. President, I wish to express my opposition and deep concern to the amendment being offered from my good friend from New Mexico, Senator BINGAMAN.

This amendment would prohibit the Environmental Protection Agency from regulating hydraulic fracturing, an oil and gas operation which the U.S. Court of Appeals for the 11th Circuit has held should be regulated under the Safe Drinking Water Act. As chairman of the Committee on Environment and Public Works, which has jurisdiction over the Safe Drinking Water Act, I am very disappointed that this matter is being added to the Energy bill without my committee having held hearings on the matter. Hydraulic fracturing is a method for stimulating recovery of natural gas and coalbed methane by fracturing rock formations through the injection of highly pressurized water treated with various additives. There is substantial question as to the nature of these additives—which are not closely regulated under most state and Federal laws—and whether they have the potential to migrate to public sources of drinking water when hydraulic fracturing occurs.

The amendment would in essence overturn the finding by the Court of Appeals that hydraulic fracturing must be regulated under the Safe Drinking Water Act. The amendment would require EPA to conduct a study to determine whether hydraulic fracturing would contaminate groundwater. Only after completing the study would EPA be free to regulate the activity and protect drinking water wells, unless during the interim the EPA found emergency circumstances. I do not believe the record provides ample support for a conclusion that little harm will occur during the course of this study, and the EPA should not be barred from regulating hydraulic fracturing until the study is completed. Further, I do not believe the EPA should be the sole determiner of whether these activities should ultimately be regulaed. That issue is properly within the realm of Congress to decide. Such a decision should be made after the benefit of full congressional review. That has not occurred here.

This is not a question of blocking oil and gas development. Oil and gas development has been proceeding briskly within the State of Alabama since the EPA instituted new regulations under the Safe Drinking Water Act for hydraulic fracturing operations, pursuant to the order of the court. Nobody has gone out of business. The industry simply objects to additional costs they are incurring, costs which appear to be relatively minor, and which are directed solely to helping protect the adequacy of the public's drinking water supplies. This matter is squarely within the jurisdiction of the Committee on Environment and Public Works, and as chairman, I must object to inclusion of this amendment within the energy bill, without the matter being properly examined and dealt with within the committee.

For the above reasons, I oppose the amendment.

The PRESIDING OFFICER. The Senator from Nevada is recognized.

Mr. REID. Mr. President, I ask unanimous consent that the time until 2 p.m. today be for debate with respect to the following amendments: the pending Voinovich amendment No. 2983, and a Bingaman or designee amendment regarding hydraulic fracturing to be offered; with the time to be equally divided and controlled with respect to these amendments; that there be no second-degree amendments in order prior to a vote in relation to these amendments; that the votes with respect to these amendments occur in the order offered; and that if an amendment is not disposed of, the Senate continue the vote sequence which was not disposed of previously.

Before asking that the request be agreed to, I yield to my friend from New Mexico for sending a modification to the desk.

AMENDMENT NO. 2986, AS MODIFIED

Mr. BINGAMAN. Mr. President, I send a modification to the desk.

The PRESIDING OFFICER. The Senator has a right to modify his amendment. The amendment is so modified.

The amendment (No. 2986), as modified, is as follows:

At the end of title VI, add the following new section:

"SEC. 610. HYDRAULIC FRACTURING.

"Section 1421 of the Safe Drinking Water Act (42 U.S.C. Sec. 300h) is amended by adding at the end the following:

"(e) Hydraulic Fracturing for Oil and Gas Production.—

"(1) Study of the Effects of Hydraulic Fracturing.—

"(A) In general.—As soon as practicable, but in no event later than 24 months after the date of enactment of this subsection, the Administrator shall complete a study of the known and potential effects on underground drinking water sources of hydraulic fracturing, including the effects of hydraulic fracturing on underground drinking water sources on a nationwide basis, and within specific regions, States, or portions of States.

"(B) Consultation.—In planning and conducting the study, the Administrator shall consult with the Secretary of the Interior, the Secretary of Energy, the Ground Water Protection Council, affected States, and, as appropriate, representatives of environmental, industry, academic, scientific, public health, and other relevant organizations. Such study may be accomplished in conjunction with other ongoing studies related to the effects of oil and gas production on groundwater resources.

"(C) Study elements.—The study conducted under subparagraph (A) shall, at a minimum, examine and make findings as to whether—

"(i) such hydraulic fracturing has endangered or will endanger (as defined under subsection (d)(2)) underground drinking water sources, including those sources within specific regions, states or portions of States;

"(ii) there are specific methods, practices, or hydrogeologic circumstances in which hydraulic fracturing has endangered or will endanger underground drinking water sources; and

"(iii) there are any precautionary actions that may reduce or eliminate any such endangerment.

"(D) Study of hydraulic fracturing in a particular type of geologic formation.—The Administrator may also complete a separate study on the known and potential effects on underground drinking water sources of hydraulic fracturing in a particular type of geologic formation.

"(i) If such a study is undertaken, the Administrator shall follow the procedures for study preparation and independent scientific review set forth in subparagraphs (1)(B) and (C) and (2) of this subsection. The Administrator may complete this separate study prior to the completion of the broader study of hydraulic fracturing required pursuant to subparagraph (A) of this subsection.

"(ii) At the conclusion of independent scientific review for any separate study, the Administrator shall determine, pursuant to paragraph (3), whether regulation of hydraulic fracturing in the particular type of geologic formation addressed in the separate study is necessary under this part to ensure that underground sources of drinking water will not be endangered on a nationwide basis, or within a specific region, State or portions of a state. Subparagraph (4) of this subsection shall apply to any such determination by the Administrator.

"(iii) If the Administrator completes a separate study, the Administrator may use the information gathered in the course of such a study in undertaking her broad study to the extent appropriate. The broader study need not include a reexamination of the conclusions reached by the Administrator in any separate study.

"(2) Independent scientific review.—

"(A) In general.—Prior to the time the study under paragraph (1) is completed, the Administrator shall enter into an appropriate agreement with the National Academy of Sciences to have the Academy review the conclusions of the study.

"(B) Report.—Not later than 11 months after entering into an appropriate agreement with the Administrator, the National Academy of Sciences shall report to the Administrator, the Committee on Energy and Commerce of the House of Representatives, and the Committee on Environment and Public Works of the Senate, on the—

"(i) findings related to the study conducted by the Administrator under paragraph (1);

"(ii) the scientific and technical basis for such findings; and

"(iii) recommendations, if any, for modifying the findings of the study.

"(3) REGULATORY DETERMINATION.—

"(A) IN GENERAL.—Not later than 6 months after receiving the National Academy of Sciences report under paragraph (2), the Administrator shall determine, after informal public hearings and public notice and opportunity for comment, and based on information developed or accumulated in connection with the study required under paragraph (1) and the National Academy of Sciences report under paragraph (2), either:

"(i) that regulation of hydraulic fracturing under this part is necessary to ensure that underground sources of drinking water will not be endangered on a nationwide basis, or within a specific region, State or portions of a State; or

"(ii) that regulation described under clause (i) is unnecessary.

"(B) PUBLICATION OF DETERMINATION.—The Administrator shall publish the determination in the Federal Register, accompanied by an explanation and the reasons for it.

"(4) PROMULGATION OF REGULATIONS.—

"(A) REGULATION NECESSARY.—If the Administrator determines under paragraph (3) that regulation by hydraulic fracturing under this part is necessary to ensure that hydraulic fracturing does not endanger underground drinking water sources on a nationwide basis, or within a specific region, State or portions of a State, the Administrator shall, within 6 months after the issuance of that determination, and after public notice and opportunity for comment, promulgate regulations under section 1421 (42 U.S.C. 300h) to ensure that hydraulic fracturing will not endanger such underground sources of drinking water. However, for purposes of the Administrator's approval or disapproval under section 1422 of any State underground injection control program for regulating hydraulic fracturing, a State at any time may make the alternative demonstration provided for in section 1425 of this title.

"(B) REGULATION UNNECESSARY.—The Administrator shall not regulate or require States to regulate hydraulic fracturing under this part unless the Administrator determines under paragraph (3) that such regulation is necessary. This provision shall not apply to any State which has a program for the regulation of hydraulic fracturing that was approved by the Administrator under this part prior to the effective date of this subsection.

"(C) EXISTING REGULATIONS.—A determination by the Administrator under paragraph (3) that regulation is unnecessary will relieve all States (including those with existing approved programs for the regulation of hydraulic fracturing) from any further obligation to regulate hydraulic fracturing as an underground injection under this part.

"(5) DEFINITION OF HYDRAULIC FRACTURING.—For purposes of this subsection, the term 'hydraulic fracturing' means the process of creating a fracture in a reservoir rock, and injecting fluids and propping agents, for the purposes of reservoir stimulation related to oil and gas production activities.

"(6) SAVINGS.—Nothing in this subsection shall in any way limit the authorities of the Administrator under section 1431 (42 U.S.C. 300i).

"SEC. 611. AUTHORIZATION OF APPROPRIATIONS.

"There are authorized to be appropriated to the Administrator of the Environmental Protection Agency $100,000 for fiscal year 2003, to remain available until expended, for a grant to the State of Alabama to assist in the implementation of its regulatory program under section 1425 of the Safe Drinking Water Act.".

The PRESIDING OFFICER. Is there objection to the unanimous consent request?

Without objection, it is so ordered.

Mr. REID. Mr. President, for Members, we have until 2 p.m. today to debate these two amendments. We have been told other people want to speak on Price-Anderson, and certainly others want to talk about hydraulic fracturing. We also have some people who have indicated to me and others that they wish to do so. This would be an appropriate time to do that.

The PRESIDING OFFICER. Who yields time?

Mr. INHOFE. I yield the Senator from Alabama 5 minutes.

The PRESIDING OFFICER. The Senator from Alabama is recognized.

Mr. SESSIONS. Mr. President, I thank the Chair and I thank Senator INHOFE for giving me this time. I particularly thank Senator INHOFE and Senator BINGAMAN for their leadership in moving forward on the hydraulic fracturing issue.

The purpose of this bill is to help us produce more energy, and cleaner energy, to meet our energy needs more at home from our domestic sources, but also to do it in a cleaner way. There are a lot of things we can do to make that happen.

One significant and important event is to deal with the hydraulic fracturing issue. I believe we can make some progress. This is a process that is used for the production of coalbed methane. They use high-pressure water, carbon dioxide and sand to create microscopic fractures in coal seams, and that releases the methane that is in that coal seam. That is the basic process.

Of course, carbon dioxide is readily available in the atmosphere. It is not a pollutant, the sand is not a pollutant, and water is not a pollutant. They have never believed that this process in any way was a polluting enterprise.

Most States in which hydraulic fracturing is used—including my State of Alabama—have implemented regulations to ensure that hydraulic fracturing continues to be used in a safe manner. The technique has been used safely by coalbed methane oil and gas producers for over 15 years, and there has never been a single event of contamination to underground drinking sources.

The history of this issue is kind of simple. Currently, EPA has directed the state of Alabama to regulate hydraulic fracturing under the Safe Drinking Water Act. Neither EPA nor Congress ever intended to be regulating this procedure. However, in 1995 a lawsuit was filed against EPA.

This was Carol Browner's EPA, which was very aggressive in regulating anything that needed to be regulated. They claimed that the hydraulic fracturing in Alabama should be regulated under not an obscure but a significant rule called the Underground Injection Control Program that was established by the Safe Drinking Water Act.

The Underground Injection Control Program was designed to regulate the disposal of hazardous waste underground, but fluids and sand used in hydraulic fracturing certainly are not hazardous waste.

The lawsuit was filed and the EPA defended it. They said we should not be regulating this. They defended it in court: It did not fit within the purposes of the UIC Program, and that the State of Alabama already sufficiently regulated the process, and the procedure itself posed little risk to underground drinking water sources or to the environment.

In 1997, the Eleventh Circuit Court of Appeals, in analyzing the statute written by Congress, found that the language in the statute, whether Congress intended to cover it or not, reading the plain wording, covered injection of carbon dioxide and sand in the ground and it is covered by the Safe Drinking Water Act. We have been trying to do something about this situation for quite some time. It has been a burdensome process.

Congress has come up with a number of ideas. The EPA pretty well indicated at the beginning they supported fixing this problem, and we have moved forward on it. I believe this compromise which Senator BINGAMAN and Senator INHOFE have talked about—a thorough scientific review—will show that there is no environmental degradation whatsoever. Once that is done, we can fix this process and get it back into the normal scheme of things.

This is a big impact on my State. We are the second-largest producer of coalbed methane in the country. It is a process that started in Alabama. The technology was developed in Alabama. I guess that is why they picked on our State to file the lawsuit. As a result, this has had a significant adverse impact on the State of Alabama.

We have had 300 new hydraulic fracturing proposals submitted since the lawsuit.

The PRESIDING OFFICER (Mr. CLELAND). The Senator's time has expired.

Mr. SESSIONS. I ask I be allowed 2 additional minutes.

Mr. BINGAMAN. Mr. President, I yield another 5 minutes to the Senator.

Mr. SESSIONS. Mr. President, I thank the Senator. That is very generous.

It has fallen particularly hard on the Alabama Department of Environmental Management whose budget is strapped at this time. Their financial problems have made a lot of news, frankly. Since this is a matter of national importance, I believe it is appropriate that Alabama, which is the

State most adversely impacted at this time within the Eleventh Circuit where the court ruling applies, be given some compensation toward the cost of administering and reviewing these 300-plus proposals.

I am pleased we were able to work out an agreement that **$100,000** will be authorized for that purpose. I am pleased Senator BINGAMAN and Senator INHOFE, as I understand it, have agreed that if this continues to be a problem or if there is sound evidence that additional moneys are required to do this—more than the **$100,000** that will be approved—they will consider that in conference as we move forward with the bill. .

Methane is one of the cleanest of all burning fuels. Methane produces good energy and, at the same time, it is very clean energy. The fact that we can draw the cleanest of all burning fuels from land within the United States is a good thing that we should be promoting. This is the kind of energy production that should be promoted in the country. I am glad we are moving forward finally to get this settled so we can enhance the production of coalbed methane throughout the country. It will be a good step forward.

In conclusion, this is a new source. Every Btu of energy we take from gas, or from gasoline and oil, that we purchase from outside our country is a drain on the wealth of this country. It generates economic activity in the country from which we purchase it. It does not generate economic activity in the United States. It is a net transfer of American wealth. That is why I believe this is not just an oil industry issue, this is not a big business issue, this is not simply an environmental or non-environmental issue. I believe we need to increase energy production in America because it is a matter of economic importance. It generates jobs and wealth in our country, not in Venezuela and the kind of government they have there, or Saudi Arabia, or Iraq. It creates wealth in the United States. It keeps our dollars here. It generates jobs here.

To me, there is no more worthwhile energy production than one of the cleanest of all: Coalbed methane. I am pleased we are moving forward, even though it is going to take a little longer than I would like, to get this regulatory matter settled and to enhance this production. It will be good for America.

I thank the Chair.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. INHOFE. Mr. President, I thank the Senator from Alabama. We have been working on this for a long time. For 4 years, we have actually had an amendment that would accomplish this. The approach we are taking now is the right approach because it is letting scientists decide, not people who come to this Chamber and say hysterically there is going to be harm done to the environment. We can look at history, and, as we have said several times before, of the over 1 million of these processes that have taken place, there is not one bit of evidence of a problem to the environment.

I have a letter from the Ground Water Protection Council. It is a group of EPAs throughout America. They strongly endorse this amendment.

I ask unanimous consent that this letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

GWPC,
Oklahoma City, OK, March 7, 2002.

U.S. Senate,
Washington, DC.

DEAR SENATOR: The Ground Water Protection Council (GWPC) strongly encourages you to support the Bingaman-Inhofe Hydraulic Fracturing Amendment.

The GWPC is a national association of state agencies who regulate the nation's ground water and underground injection control programs. Our members and Board of Directors are professional geologists, hydrologist, geo-chemists and petroleum engineers.

As the state agencies charged with protecting the nation's ground water supplies and regulating the oil and gas industry, we are very concerned that failure to pass the amendment would result in an additional and unnecessary regulatory burden on both states and the industries they regulate, with no environmental benefit.

We are aware of a March 6, 2002 letter to you opposing the Bingaman-Inhofe Hydraulic Fracturing Amendment and have the following comments:

In no state is the oil and gas industry exempt from the requirements of the Safe Drinking Water Act. A number of activities conducted as part of oil and gas exploration and production are regulated under the UIC program, including injection of produced water and some related wastes. Hydraulic fracturing is fundamentally different because it is part of the well completion process, does not "dispose of fluids" and is of short duration, with most of the fluids being immediately removed.

Fracturing fluids do not contain MTBE. Fracturing fluids may contain small amounts of other hazardous chemicals but constituents such as benzene do not appear in fluids that would be used in fracturing shallow formations. Such fluids are used in deeper formations that are usually thousands of feet below the strata that drinking water wells actually tap into.

Any "regulatory rollback" would occur only after careful EPA study and only if EPA determined, based on the study and the peer review by NAS, that federal regulation of hydraulic fracturing is not necessary.

The letter ignores the fact that states already regulate underground injection and hydraulic fracturing. In fact, the "exclusive deal" for the oil industry that is alleged in the letter was in actually a recognition by Congress in 1980 that states were already effectively regulating oil and gas exploration and production activities and had done so for years. Congress further recognized that it did not make sense to change these effective state programs by making the states comply with redundant federal regulations.

The letter alleges that hydraulic fracturing threatens underground sources of drinking water. The letter does not allege that hydraulic fracturing has actually resulted in adverse impacts to USDWs because no such impacts have ever been confirmed.

The proposed amendment would not "overturn two Court of Appeals decisions." It certainly would not overturn LEAF II. In fact, it codifies LEAF II. It doesn't even overturn LEAF I, but would allow EPA to determine that the current state/EPA regulatory partnership is working effectively and that additional federal regulation is not necessary.

The proposed amendments would not "fully suspend" regulation of hydraulic fracturing. Current state regulations would be unaffected and remain in force.

On behalf of the Ground Water Protection Council, we again urge you to support the Hydraulic Fracturing Amendment.

Sincerely,

MICHEL J. PAQUE,
GWPC Executive Director.

Mr. INHOFE. Mr. President, again, we are saying let's not get emotional about this. Let's not come up with all kinds of accusations. Instead, let's let science decide. Right now, scientific studies subjected to an independent peer review is an appropriate way to determine if Federal regulation of hydraulic fracturing is necessary. The required National Academy of Sciences review of EPA's findings approves an independent verification of the study's results. When the study does come in, it does not necessarily mean EPA has to follow the dictates, the results of this study, but they can and they may decide to do another study. At least we are letting the scientists make a decision as to who is right.

I cannot overemphasize, as the Senator from Alabama talked about how clean natural gas is, how clean it is. That is not even debatable. It is in such plentiful supply. We need this.

Eighty percent of the wells that are done have to use this technique in order to produce the natural gas that is necessary to fully utilize that source. So I think this is a very balanced approach, and it is certainly bipartisan.

I applaud our Senator from New Mexico, along with others who have joined us in supporting this amendment.

I yield the floor.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. BINGAMAN. Mr. President, I also commend the Senator from Alabama for his effort in this regard. I do think his proposed modification of our amendment makes a good deal of sense, and we were very pleased to accept that. He does have some peculiar problems in Alabama in trying to implement their regulatory program, and I think clearly we want to see that State succeed. That is his objective as well. So I am glad we could accommodate that concern.

I yield the floor.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BINGAMAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BINGAMAN. Mr. President, I ask unanimous consent that the time during the quorum call be counted equally against all the Senators who are controlling time.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BINGAMAN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. SESSIONS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SESSIONS. Mr. President, I would like to share some thoughts as we move toward a vote on the Price-Anderson nuclear liability amendment that will be coming up later this afternoon. It is an important amendment. It represents an extension of current policy, and it is something we should do. The reason we should do that, I am so firmly convinced, is that nuclear power is an important component of our national energy mix. One out of every five times Americans turn on their light bulbs, one out every five times Americans turn on their refrigerators, or turn on anything else, one out every five times Americans use electricity, that electricity is produced thanks to nuclear power.

Currently, 20 percent of our supply comes from nuclear power. I think it is time for us to consider not only maintaining that but actually increasing that percentage. The Palo Verde Nuclear Generation Station in Arizona, for example, generates more electricity annually than any other power plant of any kind, including coal, oil, natural gas, and hydropower. We simply have to realize the potential of this energy source and join many of the other leading nations in the world in continuing to implement nuclear as a major component of our energy mix.

The Energy Information Agency predicts a 30-percent increase in the demand for electricity in this country by the year 2015—a 30-percent increase in demand over the current level. Twenty percent of our power today comes from nuclear power. France produces over 60 percent from nuclear. Japan produces nearly 50 percent of its electricity from nuclear power sources. In 10 countries, there are 29 nuclear plants currently under construction. The United States has none. We should be following suit. We simply do not need to allow the rest of the world to get ahead of us on the question of producing power by nuclear energy.

I have enjoyed visiting our nuclear plants in Alabama. The Tennessee Valley Authority is setting records for safety, reliability, and productivity at their Browns Ferry plant. They have 1,000-plus employees making high wages and producing a steady source of energy 24 hours a day. They have the time to shut down those plants for refurbishing, and the cost has been reduced quite significantly. It is an important part of our energy mix.

Shortly after I came to the Senate, I attended the 44th Annual Session of the North Atlantic Assembly in Scotland. Members of parliaments from throughout the North Atlantic nations attended. At that meeting, the Ambassador to the United Nations International Energy Agency appointed by President Clinton, John B. Ritch, III, stated in his presentation that electricity demands will double in the world by 2050 and the one technology capable of meeting a large baseload with negligible greenhouse emissions is nuclear power.

He added:

> In the century ahead, mankind must place great reliance on harnessing the nuclear genie and using it to maximum effect, if our needs are to be met and our security preserved.

In fact, he went into some detail about the cost and the benefits of alternative sources of power. He concluded that they all have some benefit but that none can even come close to meeting this huge surge in demand the world is going to be facing in the decades to come.

Nuclear energy is a clean source of energy. It is environmentally friendly. I am astounded we have the debate that we have over whether or not nuclear energy is a positive thing for the environment. It most certainly is. Nothing else can produce this kind of source of power with no air pollution from it.

We would never have air as clean as we have today if we dropped all our nuclear plants and started producing that energy with coal or oil. We could not come close to that. According to a study conducted by Energy Resources International, nuclear energy has prevented the release into the atmosphere of 219 million tons of sulfur dioxide, 98 million tons of nitrogen oxide, and 2 billion tons of carbon dioxide since 1973.

Annually, nuclear power prevents the release of 5.1 million tons of sulfur dioxide, 2.4 million tons of nitrogen oxide, and 33 million metric tons of carbon.

In Alabama, there are currently two nuclear powerplants: Browns Ferry and Farley. In 1999, those powerplants avoided the release of approximately 163,000 tons of sulfur dioxide emissions, 90,000 tons of nitrogen oxide emissions, and 6.8 million metric tons of carbon emissions.

The building blocks of ozone, that we know is not a good thing in our atmosphere, as we have created it in man-made quantities—an irritant to our lungs, a health risk to children and the elderly—are not emitted at all by nuclear powerplants. Ozone precursors are fossil fuel produced.

Implementing nuclear energy is the only way we can meet our projected energy demand while simultaneously reducing the release of sulfur dioxide and nitrous oxides. Furthermore, nuclear energy does not emit carbon dioxide, which is what people blame for global warming. That is a matter I think people cannot dispute.

It strikes me as hypocritical that those who complain most and express the most fear about global climate change are, in general—but not always—the same people who are against nuclear power. Many of these people, I believe, unfortunately, are not rational on this subject. People have referred to them as "nuke kooks." But, whatever, they are obsessed with blocking nuclear power.

A few years ago the American Society of Mechanical Engineers, a reputable professional organization composed of innovative individuals, engineers, who design solutions to meet our energy needs, issued a paper regarding climate change. In the paper, they made numerous statements regarding the importance of nuclear to our energy mix. They stated:

> It is unlikely, however, that a worldwide, stable atmospheric carbon dioxide concentration—

That is, a stable amount of carbon dioxide in the air—

> can be reached without the use of nuclear, renewable, and biomass energy for electric power generation.

Our legislation significantly promotes biomass and renewable energy. There is little in this bill to really increase nuclear power.

I continue to quote:

> Assuming that the historical trend continues in which electricity consumption follows economic growth, it becomes essential that the U.S. environmental policies include retention of existing nuclear power generation capacity. Indeed, these policies should include development and implementation of additional nuclear power reactors to meet a growing demand for electricity. . . .

Looking at this matter objectively, just at the overall picture of our energy demands, it is clear to me that nuclear energy is the only viable solution to meeting both our energy demands and our environmental objectives. It will produce power required to meet our energy needs in a safe and environmentally friendly way.

People say: It is risky. It is dangerous. The people who live near the nuclear reactors in Alabama with whom I meet and talk are very strong supporters of nuclear power. The overwhelming majority of Americans favor nuclear power. They favor the expansion of nuclear power.

But let's talk about the safety record.

The nuclear energy sector has, in any way you look at it, a stellar safety record. We have not lost one life in this country—ever—as a result of a nuclear power accident in the history of this country. How many people have we lost in accidents with trucks and trains carrying coal, or with pipelines carrying natural gas, or in coal mines, or in other ways where lives are lost in the production of other unclean sources of energy, the kind of sources of energy that produce NOx and SOx and the kind of adverse exposures to health that come from fossil fuels? So we have those kinds of unhealthy actions, too, in addition to just the safety factor in producing the energy.

The main reason the nuclear industry is so safe is that it is overseen—originally by the Atomic Energy Commission and now the Nuclear Regulatory Commission. As a member of the Environment and Public Works Committee at the time, we had a number of hearings about the oversight by NRC. They are meticulously reviewing and monitoring nuclear plants all over America. They do that on a constant basis. They are exceeding other countries in the cost of their supervision and in the minutiae of it. But we have not had any accidents.

We had the problem at Three Mile Island. A major sea change has occurred since then. A recent study has shown that no one suffered injury from the Three Mile Island accident, even though, if you asked Americans, they would probably think people were injured from it. But a scientific study has indicated there were no injuries, whatsoever, as a result of that accident.

But since then, we have learned and we have stepped up, even to a much higher degree, our supervision by the Nuclear Regulatory Commission of nuclear plants. I do not believe we will see that ever happen again. I believe we would react so much better, if anything were to begin to happen like that, that we would not see that kind of event occur again.

We are also looking at new and special ways to produce nuclear power, new kinds of reactors where it would be impossible to have a nuclear reactor explosion or break.

Last June, at the Economic Club of Chicago, in a major address, Alan Greenspan, Chairman of the Federal Reserve Board—the architect, I suppose, of our economy—talking about what America needed to do, made this statement:

> Given the steps that have been taken over the years to make nuclear energy safer, and the obvious environmental advantages it has in terms of reducing emissions, the time has come for us to consider whether or not we can overcome the impediments to tapping its potential more fully.

Doesn't he always have a nice way of saying those things?

I think it is time for us to consider the impediments to the expansion of nuclear energy. I agree with him, especially in light of our goal of cleaning up our air.

Every year, the Federal Government provides tax credits and financial incentives for solar cells and wind turbines and biomass sources. I supported many of those. We are not providing anything here for nuclear energy. I think we need to consider that.

Many people have objected, saying, you have no place to put nuclear waste, and this is, somehow, the Achilles' heel of nuclear power. They act as if the amount of nuclear waste would cover the entire State of Rhode Island, I suppose, and that nuclear waste is so hazardous, if you move it on a rail or truck, it could blow up and kill us all.

The truth is, if a truck loaded with nuclear waste were to roll over or a train were to roll over, as Senator MURKOWSKI says, it does not blow up, it does not flow off into the air; you just pick it back up, put it on the track, and send it off.

We can move nuclear waste. There is no danger in that. It is an irrational thing that we have created this idea that somehow it is greatly disastrous and risky to move nuclear waste to an acceptable site to store it.

I applaud the work of the Secretary of Energy, Spence Abraham, a former Member of this body, and President Bush who are moving forward with a decision on Yucca Mountain to store this waste. It is the culmination of decades of scientific study, consultation with science and environmental advisers, and meetings with leaders and citizens in Nevada. Finding a safe and central repository is mandated by a law passed years ago, and it is also necessary for America's homeland security. For example, 40 percent of our Navy's fleet is powered by nuclear power. The lack of a repository drives up the cost of nuclear power, rendering this clean power generation less economical than it would be and less competitive.

Certainly one of the main reasons we are not building new plants today is because of the waste problem. Of course, those who oppose nuclear energy, I strongly believe—and a fair person would agree—have used this as a tool to attack nuclear power and not allow us to proceed in a rational way.

Nuclear materials are now stored in 131 aboveground facilities in 39 States in America; 161 million Americans live within 75 miles of these sites. One central site in the Nevada desert, where we exploded nuclear bombs on the surface when we were first learning how to make nuclear bombs, provides much more protection for America, much more security, and is much cheaper than keeping all these other sites that have been ongoing.

Nobody has ever been injured from the 131 sites we now have. They are going to bury it in the ground, spending billions of dollars paid for by the nuclear energy companies, part of the rates they charge, to fund this site. We need to use that. We have the ability to solve this problem, to move ahead with it. The only objection I can see, other than some of the people in Nevada that oppose it, is that it would relieve an objection, it would remove an objection that the antinuclear supporters have used to hide behind in their opposition to nuclear power.

This nuclear liability amendment we will be voting on this afternoon is critical to helping us maintain, not expand but maintain our current clean source of 20 percent of our electricity. We ought to pass that. We ought to open our eyes to the possibilities for the world for the expansion of nuclear power.

It has been said that the lifespan of human beings on this globe who have ready access to nuclear power electricity is twice that of countries where it is not readily available. Electricity is one of the great discoveries in the history of mankind. If you don't think so, what would it be like to have to cook by fire every day or wash your clothes in the river? It is an energy system that has done so much for the world.

We have large portions of this world—think about India, China, South America, not nearly at full capacity on electricity—that could use much more electricity. How are we going to produce it? What will happen to our global warming theorists when they start using coal and other fossil fuels in huge numbers to meet their growing demands for power around the world? Do they think they are not going to expand their electricity? How could we ask them not to? How could we ask a poor country where people are dying at 40 and 45 years of age, with all the adverse consequences, not counting the quality of life, to not expand their energy? They are not going to be able to do it solely with solar and windmills and biomass. It is just not there; the numbers are not there.

Yes, we can do conservation. Yes, we can reduce our use. Yes, we could be more efficient. I visited an Alabama plant not long ago that makes refrigerators. That product they produce uses one-half the electricity of one of the same size used 10 years ago, but you can't go much lower. It takes a certain amount of electricity to run a refrigerator. We have a limit on how much we can conserve.

In fact, many of our better and easier steps toward improving efficiency have already been found. We are using them. The new steps to make ourselves more energy efficient are out there. Many more can be done. But they will not make as big an impact as the ones we have already undertaken. That is the law of science.

It would be an error of colossal proportions for our environment, for safe energy, and for low-cost power, if we do not deal with the question of nuclear liability. I believe we will do that. I am confident we will pass it later on this afternoon.

We also need to, as a nation, shake off the misinformation about nuclear power. Look at it. Consider the fact that we lost not one life in America as a result of the production of nuclear power, that we have not lost any lives as a result of breathing pollutants, as we probably have, as we certainly have, from coal and other plants, as a result of breathing the air around nuclear plants.

This is a good environmental issue. It is a good energy issue. It has the potential to move us forward. We need to be thinking about the great potential to make the plants that are more modern and more efficient and even more safe than today. In fact, some can be designed that make it impossible to release radioactive material.

I know we will be voting later on this afternoon on this amendment. I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. NELSON of Florida). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Mr. President, I ask unanimous consent that the vote that is now scheduled for 2 o'clock today be rescheduled for 2:15 p.m. under the same conditions of the previous unanimous consent agreement, and the only change I request is between the first and second vote there be 2 minutes equally divided for those who wish to speak on the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. SESSIONS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SESSIONS. Mr. President, I have some further comments specifically addressing the Price-Anderson insurance program for nuclear powerplants that we will be voting on a little later this afternoon, maybe around 2:15. Making some points about the details of it, 45 years ago the nuclear power industry said if they were going to go forward with this new source of power, they wanted to be able to develop an insurance program that would work and that would assure the communities in which they are building these plants they would be operated safely, and if something bad occurred that everybody would be compensated.

Those communities have been confident in that process ever since, but the act does expire and it is time for us to extend it. It would be a terrible mistake if we did not. It would cause quite a bit of heartburn.

I will share a few thoughts about how this insurance program works. I believe people would feel good about it and want to go forward with it. The average business in America that does the things they do every day may have products on their premises that are somewhat dangerous. If a terrorist or somebody blows it up and it kills people, it is not their fault. They are not liable. They did not do anything wrong. They were not negligent. They were not irresponsible. They were not reckless, and they did business in a safe way.

Of course, the nuclear power industry operates precisely the way the Nuclear Regulatory Commission tells them to operate, in a safe fashion. At any rate, they are doing what they can to comply with the law and the regulations, and they have had this insurance policy. Each plant has a $200 million policy for which they are personally responsible. If anything happens, they carry their own $200 million policy. The entire industry has come together and pooled up to $9 billion of a policy, and this is sort of structured by the Price-Anderson Act, and it is all paid for by the nuclear power industry.

Above that, if something were to happen so badly above that, then the Federal Government would have liability to pay under Price-Anderson. That is what our American communities have had a right to expect. They were told that when the plants were built, and we need to continue that policy today. We certainly do not need to stop it. I believe the votes are there, and we will pass an extension of Price-Anderson. It would be a bad thing, cause unnecessary heartburn, would be a breach of the fundamental promises of the Federal Government that we do that if we did not extend it, and also it could weaken the nuclear power industry, further containing any hope of expansion of this 20 percent of our electric-generating capacity that produces no pollution.

As I noted earlier, the U.S. nuclear powerplants prevent 5.1 million tons of sulfur dioxide from being emitted into the atmosphere, 2.4 million tons of nitrogen oxide, NO_X, and 164 metric tons of carbon from entering the Earth's atmosphere. That is the kind of thing they do on a regular basis, producing power cleanly and safely for the benefit of humankind throughout this country.

For over 45 years, Price-Anderson has provided a guaranteed compensation to the public in the event a nuclear accident were to occur. It provided coverage for precautionary evacuations and out-of-pocket expenses, reducing delays that are inherent in any kind of lawsuit that would have been filed, maybe taking years. It guaranteed prompt payment by the insurance companies; no lawsuits. You are liable. You accept strict liability, which is not the law, as I noted, for other businesses, and it consolidated the matters in a single Federal court so promptness and efficiency and fairness can occur. That is a good policy. We ought not to end it now.

It is important for safe and clean power to be continued to be produced for America, and I believe we will have a strong vote in favor of it this afternoon. Thus, I note there is concern by people, but even in Three Mile Island the total amount expended was less than $200 million, compensating everybody and doing all the things necessary to test and examine and make sure the community was safe; $191 million. That would all be covered by that insurance company's own policy, that power company's own policy. If it went above that, up to $9 billion, then the industry would pay for it. Only above that would the taxpayers have any risk. I think it is a good bargain for America. It is a sound program. We ought to continue it.

I yield the floor.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Mr. President, I was with Senator LOTT during the lunch hour and was not able to hear all the remarks of the Senator from Alabama, my friend, Mr. SESSIONS, but my staff did outline for me some of the things he said.

This is not the time and the place for a discussion, debate, on things nuclear in the true sense of the word. That time will come.

Price-Anderson points up the problems we have with nuclear power. If in fact nuclear power was such a good deal, why does it need a subsidy? Wouldn't any other utility love to have the Federal Government backing its liability? That is, in effect, what Price-Anderson does.

Many years ago, when nuclear power was an experiment and was in its infancy, and we, the Government, Congress, the President, decided to give it a shot in the arm to see if it would work, even back then everyone recognized the dangers of nuclear power. We have had since then Three Mile Island and other problems. It was simply a question that they could not get the places insured.

We are now told these places are so safe, there is no reason for the subsidy. If these places are so safe, they should be able to buy insurance. If they can't buy insurance, then the amendment I offered should have been followed; that is, there should be real, true accounting in determining liability of these companies. It is clear the nuclear power industry is now a mature electricity industry that no longer needs liability protection.

Price-Anderson has actually led to a decrease in the amount of private insurance available. In the 1950s the private insurance industry was willing to insure an accident for $50 million, despite experience with the new technology. Today, the private insurance industry only provides $200 million insurance. That does not keep up with inflation.

One of the things that is wrong with Price-Anderson is, how do they determine the $200 million that they have available in case there is an accident? What they should do is have a surety bond, a letter of credit, some type of escrow account, or perhaps government securities or insurance.

If there were ever an Enron example, it is this. They have a showing that they either have a cashflow or cash reserve that can be generated and would be available within 3 months. Not now—within 3 months. That is, as far as I am concerned, sheer foolishness.

I wasn't born yesterday. I know this amendment is going to be agreed to, but it should not be agreed to. I think nuclear power should stand on its own two feet. In Nevada, we are trying to develop large windmill factories to produce electricity. They are going to put up their own money. There is no Government assurance if somebody gets hurt out there the Government will pick up the expense. The same is true with solar, geothermal, biomass, coal, and natural gas. So Price-Anderson should fail.

As I have indicated earlier today, virtually every environmental group in America is opposed to this legislation.

I offered an amendment. I talked about it this morning. Every environmental group was in favor of my amendment. But we have a situation now where this amendment is being pushed forward. As I said in the presence of my friend, the junior Senator from New Mexico, I am disappointed he is cosponsoring this amendment. I think it is wrong. I think we should follow the Friends of the Earth, Sierra Club, Environmental Defense Fund, the Union of Concerned Scientists, Defenders of Wildlife, USPIRG, Safe Energy Communications Council, Natural Resources Defense Council, National Environmental Policy Act Trust, Nuclear Information Resource Service, League of Conservation Voters, Taxpayers for Common Sense, Public Citizens for Critical Mass, and STAR. These are entities that are concerned about the environment and they say Price-Anderson is not good for the environment.

So I hope Members will look closely at what they are doing. There will be a few votes against this. There should be a lot more. I am very disappointed that we cannot slow this down.

This bill is important legislation for the country, and I recognize that. I think the work we did yesterday was so important, to allow a pipeline to come from Alaska. That would have 50 million tons of steel to construct the pipeline. It would be 2,100 miles of pipe creating 400,000 jobs. That is what we should be doing.

About 40 trillion cubic feet of natural gas can come down that pipeline. That is big. Of course, this is relatively new. It wasn't many years ago that natural gas was just pumped out into the environment. It served no purpose. Now, of course, we use it to power many of our powerplants in America today.

As I said earlier, there is going to be a time in the next several months to talk in more detail about nuclear waste, but this is not the time or the place to do it. I look forward to a vote in approximately 20 minutes to take care of the matter that Senator BINGAMAN offered dealing with hydraulic fracturing, and also the amendment dealing with the Price-Anderson legislation. I hope the Price-Anderson legislation gets a significant number of votes against it.

Mr. INHOFE. Mr. President, I ask how much time remains on both sides.

The PRESIDING OFFICER. The Senator from Oklahoma, on his side of the aisle, has no time remaining.

Mr. REID. If the Senator from Oklahoma wishes time, how much time does he wish?

The PRESIDING OFFICER. The Senator from Nevada has 21 minutes remaining.

Mr. INHOFE. Five minutes?

The PRESIDING OFFICER. The Senator is recognized for 5 minutes.

Mr. INHOFE. Mr. President, I thank the Senator from Nevada for giving me some of his time, particularly since we are not in agreement with each other on one of the two votes that will be taking place.

I spent 30 years of my life in the insurance business. I know the Chair knows a little bit about this business—he spent some time there, too. I think the Price-Anderson program as an insurance program is a good deal for the public. For over 45 years, Price-Anderson has provided immediate and substantial private compensation to the public in the event of a nuclear accident. It has provided coverage for precautionary evacuations, out-of-pocket expenses, has reduced delays that are inherent in court cases, and has consolidated all cases into a single Federal court.

I think it is also important to recognize it has never cost the Government any money. This is not a Government program.

Going back to my third point, if we didn't have something like this, then we would be dependent upon the tort system in this country. We are going to hear about the delays and the cost. This is one of the programs that has been successful for 45 years. When it gets down to some of the people who are opposing the program, they are actually opposed to nuclear energy.

I am old enough to remember back in the 1960s and 1970s, the hysteria that hit the streets when they were talking about nuclear energy and picketing and protesting. As the years went by, other problems came up with other forms of generation of energy.

We went through a long period of time during the Clinton administration with the EPA coming up with some ambient air targets that were not realistic. It created great problems. So we started talking about all the pollutants, emission problems, refineries—keeping in mind all during that discussion our refineries were at 100 percent capacity. Yet we were trying to add more and more problems to them with new source review and other programs, making it just a very expensive program.

During that time, a lot of the people who 20 years before had been picketing because they were opposed to nuclear energy, realized that nuclear energy is safe now, it is clean, and it is abundant.

The thing that I stress when we are talking about energy is we want all forms of energy—we want renewables, we want nuclear energy, we want fossil fuels, we want all the forms of energy because we do not want an energy crisis.

As far as nuclear energy is concerned, we are only dependent on that for 20 percent of our energy needs. France is 80 percent dependent. I think we will see in the future that percentage is going to have to go up until some of the renewables and other experimental systems come into play where we can depend on them for an abundance of energy. Until then, we are going to have to be using some of the energy sources that we know work and work today. Certainly this is one of them.

The assistant majority leader also mentioned we will have two votes starting at 2:15. The other is on hydraulic fracturing. I think it is important to talk about that in the same vein because there you are talking about natural gas. I am from Oklahoma. We know a little bit about natural gas. We know it is among the cleanest forms of energy out there. It is plentiful. It is inexpensive. But as far as being plentiful, one of the problems we are having is we have to be sure that we can maintain what we are doing right now in bringing natural gas out of the ground.

Right now, and for the next couple of years, we will be able to do that. However, because of the court decision that has already been discussed on the floor by a number of the Senators, we could be having a problem. The system, the procedure of hydraulic fracturing where you are forcing the natural gas or the oil out of the rock formations, is one that has been proven and has been used since the 1940s.

We are talking about 60 years we have been doing this. In 60 years and over 1 million wells where we have used this procedure, we have yet to have any environmental problem. So it kind of blows my mind there would be people, after 60 years of success, who would say there might be an environmental problem with it. There is no environmental problem with it.

The only problem right now is a court case for which we are going to have to go ahead and complete a study.

It is important for all my colleagues to realize on this vote today all we are talking about is completing the study that is underway right now. The EPA does not have to follow the guidelines of that study. They can authorize another study. But this amendment is to at least let science step in and say: Since there has not been a problem before, here are the risks of a problem in the future. If there is not a problem, we need to go ahead and eliminate that obstacle so we will be able to continue using that system.

Mr. President, 80 percent of the wells right now—and it is a higher percentage when you go to my State of Oklahoma because most of those are marginal wells, wells with 15 barrels a day or less—but 80 percent of them are going to have to use hydraulic fracturing. That system is necessary in order to come up with the natural gas we need.

Mr. REID. Mr. President, I started out my legal career as an attorney for insurance companies. I did lots of trial work representing insurers in automobile accidents, hospitals, and hotels. I have some knowledge of insurance. I have no question that Price-Anderson gives the nuclear generators a subsidy and an unfair advantage.

Having said that, I want to comment briefly on some of the things my friend from Alabama said, I am told, about nuclear power and the high-level nuclear repository that is being contemplated in Nevada.

First of all, the GAO said there are 292 scientific investigative reports for which the Department of Energy is waiting. It wasn't time to go forward with that.

In addition to that, the Nuclear Waste Technical Review Board, led by the prominent American scientist, Jared Cohon, who was dean of the forestry department at Yale and is now president of Carnegie Mellon, and his group have said that the science at Yucca Mountain is poor.

I think before we get into a long debate here on the floor, which we are not going to do—I said there will be another time to do that—Leader GEPHARDT issued a statement just 2 days ago decrying the Department of Energy's action recently dealing with nuclear waste saying that, among other things,, St. Louis passed a resolution saying nuclear waste should not be brought through their city. There are other things, and we will talk about those later.

I hope we can move forward generally on this legislation. By tomorrow we will have spent a whole week on this. I am not certain how much more time Senator DASCHLE can afford to stay on this. We have debt limits, campaign finance, and a lot of other things to deal with. I hope those who believe this bill needs a lot more work will move forward as quickly as possible and do what they think in the way of amendments will improve this legislation, of course recognizing that a conference committee will take place. I think we should do everything we can to move this legislation as quickly as possible.

I suggest the absence of a quorum.

The PRESIDING OFFICER (Mrs. CARNAHAN). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. INHOFE. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. INHOFE. Madam President, I know our side is out of time. I would like to ask if I could have a couple minutes.

Mr. REID. Madam President, does the Senator from North Dakota wish to speak prior to the vote at 2:15?

The Senator from Oklahoma may have 3 minutes. Will that be adequate?

Mr. INHOFE. That is fine.

Madam President, I respectfully disagree with what the Senator from Nevada said about the subsidy. The Federal Government does not use taxpayer money to pay claims in the event of a nuclear incident. There has been no subsidy in the 43 years of Price-Anderson protection. The nuclear insurance pool is not the Federal Government. It has paid a total of, I believe, $191 million in claims. The Price-Anderson Act ensures that full compensation will be available in the event of a nuclear attack. In the absence of the law, members of the public filing claims would need to overcome substantial obstacles of tort law for recovery. As we all know, that is very expensive and very time consuming.

I think the key here is that no public funds have ever been paid out. For that reason, there is no way one can say this is a subsidized program.

The Federal Government provides insurance mechanisms for losses associated with agricultural disasters, floods, banks, savings and loans; to pay for home mortgages, Social Security, Medicare, crime, and maritime accidents. It is not unusual for the Federal Government to do it. But under the current law, the limitation on liability exists for oil spills, bankruptcy, and workers compensation, but not in the case of nuclear accident. While it is very common for the Federal Government to expend moneys to underwrite and to be in the insurance business many times to compete with the insurance industry, in this case it isn't true. There is no subsidy involved.

I am sure my time has expired. I yield the floor. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. REID. Madam President, I ask unanimous consent the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from New Mexico.

Mr. BINGAMAN. Madam President, what is the regular order?

The PRESIDING OFFICER. The Senate is to vote on amendment No. 2983.

Mr. BINGAMAN. Is that vote to occur immediately or is there time to speak?

The PRESIDING OFFICER. At 2:15.

Mr. BINGAMAN. I see Senator VOINOVICH.

That is the Price-Anderson amendment, I believe.

The PRESIDING OFFICER. The Senator is correct.

Mr. BINGAMAN. I thank the chair.

VOTE ON AMENDMENT NO. 2983

The PRESIDING OFFICER. Under the previous order, the question occurs on agreeing to amendment No. 2983 offered by the Senator from Ohio. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. REID. I announce that the Senator from Massachusetts (Mr. KENNEDY) is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 78, nays 21, as follows:

NOT VOTING—1

Kennedy

The amendment (No. 2983) was agreed to.

Mr. REID. I move to reconsider the vote.

Mr. INHOFE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2986, AS MODIFIED

The PRESIDING OFFICER. Under the previous order, there are now 2 minutes evenly divided prior to a vote on the Bingaman amendment No. 2986, as modified. Who yields time?

Mr. BINGAMAN. Madam President, I ask unanimous consent that Senator ROCKEFELLER be listed as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BINGAMAN. Madam President, this amendment sets up a study process to determine whether hydraulic fracturing should be regulated by the Federal Government under the Safe Drinking Water Act. It is a bipartisan amendment with many cosponsors. It is good policy. It is a policy that was supported by the Clinton administration. It is now supported by the current administration.

I yield the remainder of my time to the Senator from Oklahoma.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. INHOFE. Madam President, I ask unanimous consent that the following Senators be added as cosponsors: Senators ENZI, MURKOWSKI, SESSIONS, and NICKLES.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. INHOFE. Madam President, I wish to add to the remarks of the Senator from New Mexico. This procedure is being used today. It has been used since the 1940s. Over 1 million wells have used hydraulic fracturing. There has never been any documented case of any environmental damage.

The PRESIDING OFFICER. The Senator's time has expired. Who yields time in opposition?

Mr. MURKOWSKI. May I take the remainder of the time? I simply want to advise Senators that, indeed, this matter has been cleared by both the minority and majority, and we concur in its adoption. It is the right thing to do.

The PRESIDING OFFICER. The question is on agreeing to amendment No. 2986, as modified.

Mr. THOMAS. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The clerk will call the roll.

The legislative clerk called the roll.

Mr. REID. I announce that the Senator from Massachusetts (Mr. KENNEDY) is necessarily absent.

The PRESIDING OFFICER (Mr. CORZINE). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 78, nays 21, as follows:

NOT VOTING—1

Kennedy

The amendment (No. 2986), as modified, was agreed to.

Mr. INHOFE. I move to reconsider the vote.

Mr. BINGAMAN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BINGAMAN. At this point, I believe Senator CRAIG has an amendment he wishes to offer that we can agree to and voice vote. Then I have amendments on behalf of Senator AKAKA that I would like to handle the same way.

The PRESIDING OFFICER. The Senator from Idaho.

AMENDMENT NO. 2987

Mr. CRAIG. Mr. President, I send the amendment to the desk.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Idaho [Mr. CRAIG] proposes an amendment numbered 2987.

Mr. CRAIG. Mr. President, I ask unanimous consent reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To provide for multiple-year authorization for the fusion energy sciences program)

Strike subsection (e) of section 1254 and insert the following:

"(e) AUTHORIZATION OF APPROPRIATIONS.—From amounts authorized under section 1251, the following amounts are authorized for activities under this section and for activities of the Fusion Energy Science Program:

"(1) for fiscal year 2003, $335,000,000;
"(2) for fiscal year 2004, $349,000,000;
"(3) for fiscal year 2005, $362,000,000; and
"(4) for fiscal year 2006, $377,000,000.".

Mr. CRAIG. Mr. President, this amendment authorizes outyear funding levels for the Department of Energy Fusion Energy Sciences Program.

I appreciate Chairman BINGAMAN incorporating provisions of my bill on fusion science research in the Daschle-Bingaman substitute bill. However, the Daschle-Bingaman substitute did not incorporate outyear funding authorizations for the Fusion Energy Sciences Program. This technical amendment authorizes funding for fiscal years 2003 through 2006.

While we grapple with short-term remedies to our energy problems, we need to stay focused on long-term investment in those areas which have the potential to help secure our energy future. I believe fusion energy has the potential.

I appreciate the support of the chairman on this issue. It is our understanding we might be able to voice vote this.

Mr. BINGAMAN. Mr. President, I support the amendment. I think this will improve the bill. I urge all Senators to support this amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2987) was agreed to.

Mr. BINGAMAN. Mr. President, I am informed Senator MCCAIN is ready to offer his amendment.

AMENDMENT NO. 2979

Mr. MCCAIN. Mr. President, I call up amendment No. 2979 which is at the desk, and I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Arizona [Mr. MCCAIN], for himself, Mr. HOLLINGS, Mrs. MURRAY, Mr. BINGAMAN, Mr. BREAUX, Mr. SMITH of Oregon, Mr. DOMENICI, Mrs. HUTCHISON, and Mr. WYDEN, proposes an amendment numbered 2979.

Mr. McCAIN. Mr. President, I ask unanimous consent reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The amendment can be found in the RECORD of Tuesday, March 5, 2002, on page S 1542.)

Mr. McCAIN. Mr. President, I understand the Senator from Alaska has a second-degree amendment to the pending amendment. I know the Senator from Alaska is very busy. I have a statement which is probably about 10 or 15 minutes long, but if the Senator from Alaska wishes to propose his second-degree amendment, I am willing to delay in my statement.

Mr. MURKOWSKI. I can wait.

Mr. McCAIN. Mr. President, over a year ago the Senate passed S. 235, the Pipeline Safety Improvement Act. That bill was approved by a vote of 98–0 on February 8, 2001, and is designed to promote both public and environmental safety by reauthorizing and strengthening our Federal pipeline safety programs which expired in September 2000.

While the Senate has now passed pipeline safety legislation in both the 106th and the 107th Congresses, the other body has yet to take meaningful action to address pipeline safety. Despite efforts to encourage the other body to approve pipeline safety legislation and help prevent not only needless deaths and injuries but also environmental and economic disasters, there has been little movement by the House on this important issue. Therefore, the Senate must take whatever action we can to advance pipeline safety legislation.

Today I offer the Pipeline Safety Improvement Act as an amendment to the pending energy bill. I believe it is appropriate to consider this issue in the context of energy legislation. I believe it is appropriate to consider this issue in the context of the post-September 11 environment. I think it is appropriate to consider this issue in the context that it is an issue which really needs to be addressed.

The Senator from Alaska, it is my understanding, will be proposing an amendment that has to do with the damage to the Alaskan pipeline, which is probably an important amendment.

When one looks at this chart of the natural gas and hazardous liquid pipelines of the United States, the first conclusion one draws is that there is a need for pipeline safety and security. I don't need to draw scenarios as to what could happen in the event of the disruption or destruction of one of these pipelines, many of which carry material which is highly toxic and hazardous. I am pleased to be joined in this bipartisan effort by Senators HOLLINGS, MURRAY, BINGAMAN, BREAUX, SMITH, DOMENICI, HUTCHISON, WYDEN, and TORRICELLI. Our goal is to enact comprehensive legislation for pipeline safety for the public, the environment, and the economy.

The Office of Pipeline Safety, within the Department of Transportation Research and Special Programs Administration, oversees the transportation of about 65 percent of the petroleum and most of the natural gas transported in the United States. The Office of Pipeline Safety regulates the day-to-day safety of 3,000 pipeline operators with more than 1.6 million miles of pipeline. I repeat, 1.6 million miles of pipeline. It also regulates more than 200 hazardous liquid operators with 155,000 miles of pipelines, as depicted on this chart. This chart shows the red lines as the liquid pipelines and the dark-colored lines as natural gas pipelines.

Given the immense array of pipelines that traverse our Nation, reauthorization of our pipeline safety programs is critical to the safety and security of thousands of communities and millions of Americans nationwide. That is why it is appropriate to include pipeline safety provisions as a key component of any comprehensive energy legislation under consideration.

The amendment being offered today is the product of many months of hearings, bipartisan compromise, and cooperation that began during the 106th Congress. During the past 2 years, my colleagues and I have made repeated statements discussing the critical need to enact pipeline safety improvement legislation.

That necessity has been demonstrated by a number of tragic accidents in recent years.

For example, In June 1999, a fatal pipeline accident occurred in Bellingham, WA, when gasoline leaked from an underground pipeline and was subsequently ignited. That accident resulted in the deaths of two boys and a young man, in addition to a number of injuries and severe environmental damage to the area.

Other tragedies have occurred. On August 19, 2000, a natural gas transmission line ruptured in Carlsbad, NM, killing 12 members of two families. On September 7, 2000, a bulldozer in Lubbock, TX, ruptured a propane pipeline, resulting in the death of a police office. In total, 71 fatalities have occurred as a result of pipeline accidents over the past 3 years.

I think that number is worth repeating: 71 fatalities over the last 3 years have occurred. Meanwhile, Congress has not acted to enact legislation which, in the view of many experts, possibly could have prevented these fatalities. That is a pretty onerous burden, it seems to me, that is placed on us as legislators in our failure to act.

I regret to report that just yesterday, there was a pipeline explosion near Jeffersonville, KY. Thankfully, no fatalities have been reported, but I am informed it caused a fire so intense that it was picked up on a Federal Government satellite. Clearly, the amendment we are proposing today is not only timely but urgent.

As I mentioned, the Senate has worked to improve pipeline safety and reduce the risk of future accidents. During the last Congress, with the assistance of a bipartisan group of Senators, including Senators Slade Gorton and PATTY MURRAY, the Senate passed the Pipeline Safety Improvement Act of 2000. Unfortunately, the House failed to approve pipeline safety legislation so we were never able to send a measure to the President.

When the 107th Congress convened, one of the first legislative actions taken by the Senate was to consider and pass S. 235, the pipeline safety Improvement Act of 2001, a measure nearly identical to what we passed in the prior Congress. Early attention by the Senate demonstrated our firm commitment to improving pipeline safety. Once again, my colleagues and I are seeking to advance pipeline safety legislation by offering this amendment.

I would be remiss if I didn't point out that despite the tragic accidents I highlighted earlier, the pipeline industry generally has a good safety record relative to other forms of transportation. According to the Department of Transportation, pipeline related incidents dropped nearly 80 percent between 1973 and 1998, and the loss of product due to accidental ruptures has been cut in half. From 1989 through 1998, pipeline accidents resulted in about 22 fatalities per year—far fewer than the number of fatal accidents experienced among other modes of transportation. But this record should not be used as an excuse for inaction on legislation to strengthen pipeline safety.

The pipeline safety program expired nearly 18 months ago. Congress as a whole must address this critical public and environmental safety issue. We need to reauthorize the pipeline safety programs. We need to provide additional funding for safety enforcement and research and development efforts, as well as provide for increased State oversight authority and facilitate greater public information sharing at the local community level.

Let me describe the major provisions of the amendment which is nearly identical to S. 235:

First, it would require the implementation of pipeline safety recommendations issued in March 2000 by the Department of Transportation Inspector General to RSPA. The Inspector General found several glaring safety gaps at Office of Pipeline Safety and it is incumbent upon us all to do all we can to ensure that the Department affirmatively acts on these critical problems.

The amendment would also require the Secretary of Transportation, the RSPA Administrator, and the Director of the Office of Pipeline Safety to respond to all NTSB pipeline safety recommendations within 90 days of receipt. The Department's responsiveness to the National Transportation Safety Board pipeline safety recommendations has been poor at best. while current law requires the Secretary to respond to the NTSB no later than 90 days after receiving a safety recommendation, there are no similar requirements at RSPA. Therefore, this legislation statutorily require RSPA and Office of Pipeline Safety to respond to each and every pipeline safety recommendation it receives from the NTSB and to provide a detailed report on what action is plans to initiate in response to the recommenation.

The amendment would require pipeline operators to submit to the Secretary of Transportation a plan designed to improve the qualifications for pipeline personnel. At a minimum, the qualification plan would have to demonstrate that pipeline employees have the necessary knowledge to safely and properly perform their assigned duties and would require testing and periodic reexamination of the employees' qualifications.

It would also require the Department of Transportation to issue regulations mandating pipeline operators to periodically determine the adequacy of this pipeline to safely operate and to implement integrity management programs to reduce identified risks. The regulations would require operators to base their integrity management plans on risk assessment to periodically assess the integrity of their pipeline and to take steps to prevent and mitigate unintended releases, such as improving leak detection capabilities or installing restrictive flow devices. The integrity management provisions will not only be critical to advancing pipeline safety, but also to addressing potential security concerns, which is a shared goal among all the sponsors of this amendment.

The amendment also would require pipeline operators to carry out a continuing public education program to advise municipalities, school districts, businesses, and residents about a variety of pipeline safety-related matters, including pipeline locations. It would also direct pipeline operators to initiate and maintain communication with State emergency response commissions and local emergency planning committees and to share with these entities information critical to addressing pipeline safety and mitigating risks.

The amendment further directs the Secretary to develop and implement a comprehensive plan for the collection and use of pipeline-related data in a manner that would enable DOT to conduct incident trend analyses and evaluations of operator performance. Operation would be required to report incident releases greater than 5 gallons, compared to the current reporting requirement of 50 barrels. In addition, the Secretary would be directed to establish a national depository of data to be administered by the Bureau of Transportation Statistics in cooperation with RSPA.

In recognition of the critical importance of technology applications in promoting transportation safety across all modes of transportation, the legislation directs the Secretary to focus on technologies to improve pipeline safety as part of the Department's research and development efforts. Further, the amendment includes provisions advanced by Senator BINGAMAN, myself, and others, to provide for a collaborative R&D effort directed by the Department of Transportation with the assistance of the Department of Energy and the National Academy of Sciences.

The amendment would provide for a 3-year authorization, with increased funding for Federal pipeline safety activities, the State grant program, and research and development efforts.

Additionally, the amendment requires operators, in the event of an accident, to make available to the DOT or NTSB all records and information pertaining to the accident and to assist in the investigation to the extent reasonable. It also includes provisions concerning serious accidents that provide for a review to ensure the operator's employees can safely perform their duties. In addition, pipeline employees would be afforded the same whistle-blower protections as are provided to employees in other modes of transportation. These protections are nearly identical to the protections aviation-related employees were granted in the Wendell H. Ford Aviation and Investment Reform Act for the 21st Century, P.L. 106-181.

I want to point out this amendment includes a few minor modifications to the Senate-passed version of S. 235. It extends the authorization period for an additional fiscal year which is necessary to reflect the fact that a year has passed since we considered S. 235. The amendment would fund pipeline safety programs for fiscal years 2003, 2004, and 2005 at $64 million annually.

The amendment also includes two new provisions intended to address pipeline security concerns heightened in the wake of the September 11 attacks. While the pipeline safety provisions were not originally developed as security legislation, I believe it is our duty to address identified security concerns and will certainly consider any security-related proposals brought to our attention in the future by the administration and other interested parties.

In the meantime, the amendment seeks to strike a balance between public access to pipeline information and the need to restrict security sensitive information. It would tie the new information disclosure requirements of the legislation to the existing Freedom of Information Act standards that restrict the release of certain information based on national security and national defense concerns. Again, it would apply current FOIA exemption standards to the public disclosure provisions to protect information critical to national security and defense. As this and other security-related measures continue through the legislative process, I plan to work with my colleagues to ensure the proper handling of security sensitive data within the Federal Government. Security sensitive information must not be released into the wrong hands. This amendment should afford useful protection in the near term.

Finally, the amendment would authorize the Secretary to provide technical assistance to pipeline operators and state and local officials to ensure that they are adequately prepared to respond to terrorist attacks or threats that could impact pipelines.

We must ensure that the Department has the tools it needs to carry out its critical pipeline safety responsibilities, to advance research and development efforts, and to protect pipeline security sensitive data. I urge my colleagues to join with me in demonstrating their strong support for improving pipeline safety by voting for this amendment. I remain hopeful that the Congress will approve pipeline safety legislation before we receive another call to action by another tragic accident.

We have not reauthorized pipeline safety. It is important that we do so. It has lapsed.

We can see by this chart the miles and miles of pipeline that cross America. Many of them are perfectly safe. There are others that clearly need renewed attention and renewed regulations as embodied in this bill. There are 3,000 gas pipeline operators with more than 1.6 million miles of pipeline and 200 hazardous liquid operators with 155,000 miles of pipeline.

I don't like to refer to nor discuss various scenarios for acts of terror, but I think this chart in itself depicts the urgent need for reauthorization of this legislation. Also, it is of interest and value to put a human face on some of these issues and the importance of them.

As I mentioned in my remarks earlier, there was a tragic accident in Bellingham, WA. Two young boys were killed. I will not describe the circumstances of their deaths. It aroused the entire community.

With the assistance of Senator MURRAY and Senator Gorton, hearings were held in Bellingham on this issue, its cause, and what needed to be done. The people, the families, and the mayor of Bellingham came to Washington, DC, to testify before the Commerce Committee.

Senator MURRAY, other Senators, and I made a commitment to the people of that community who were directly impacted by the tragic deaths of these children and to the people of this Nation that we would do everything we could to enact legislation—to act as is our responsibility—to see that there wouldn't be a recurrence of the tragedy and that no other family in America would undergo the agony and pain of the families of Bellingham, WA.

We passed that bill on February 8, 2001. Yet the other body has not acted. I think that is very unfortunate. That is why I feel compelled to come today with this amendment on the energy bill in hopes that it will now either be part of this bill or the other body will act on this very important legislation which not only has to do with spillage of toxic waste, or hazardous materials, or fires, such as just happened yesterday, but which in some cases tragically endangers the lives of our citizens. I know of no greater responsibility than to try to do everything in our power to prevent a recurrence.

I thank the managers of the bill for their consideration of this legislation. I again applaud Senator MURRAY for her tremendous efforts and dedication on this issue—not only the issue but for her sympathy and the concern she showed to the families and the people in that community who were deeply impacted by the accident.

I hope we can do this to fulfill our responsibilities.

I yield the floor.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. MURKOWSKI. Mr. President, I compliment Senator McCAIN and members of the Commerce Committee for bringing this matter up.

I would like to be added as a cosponsor to the amendment.

As all are aware, Senator McCAIN's amendment is similar to the one submitted last February. It passed this body by a vote of 98 to 0. I feel quite confident that we can dispose of it favorably. Certainly, Senator McCAIN and others have been diligent in making sure Congress addresses the issue. Safety is an extremely important component of energy policy.

Senator McCAIN has indicated the highlights of the legislation. I will not be repetitive.

The pipeline, as we know, provides this country with supplies of oil and natural gas in a very efficient manner. I believe we will hear from the Senator from Washington relative to the tragedy that occurred in Bellingham and New Mexico as well.

But clearly these incidents highlight that some pipelines are aging, and the increased demand for energy is putting more and more pressure on these pipelines. It is appropriate that there be oversight adequate to ensure that wear and tear does not result in tragedies such as we have already seen. The public must have confidence in safety. This legislation will facilitate that.

We are fortunate in this country to have a network of pipelines, as the Senator from Arizona has shown on the map, because it is much more efficient than moving by rail or by truck. I think it enables us to have relatively abundant and inexpensive energy in the manner in which we move it. No other country has a network as efficient as the United States as far as pipeline transfer of energy is concerned. But we cannot become complacent. We must improve the safety of these pipelines.

I certainly welcome the changes to existing law made by the legislation that will improve the overall safety of the pipelines. When this legislation is enacted, it will be the strongest and most comprehensive safety measure ever approved by Congress. At the same time, it will avoid responses that would lead to a lack of investment in pipelines without any measure to improve safety.

I think we can all agree, given our a reliance on energy in our everyday lives, that we recognize the significance of this legislation and the contribution it is going to make of ensuring the confidence of the American people that indeed the pipeline network is safe. Accordingly, I urge the Senate to agree to this amendment.

Mr. President, I am going to offer a second degree amendment, which I understand has been circulated.

The PRESIDING OFFICER. The Senator from Alaska.

AMENDMENT NO. 2988 TO AMENDMENT NO. 2979

Mr. MURKOWSKI. Let me outline the necessity of the second-degree amendment.

We have a unique situation in Alaska with the 800-mile Trans-Alaska Pipeline which moves about 20 percent of the total crude oil produced in this country but is not protected in the sense of the pipeline safety act because our pipeline is completely within the State's borders. I am not going to argue with those who have analyzed this. But clearly our rivers are in interstate commerce. The fish in the rivers are in interstate commerce. But even though our pipeline goes basically from the Arctic Ocean to the Pacific Ocean it apparently may not be protected under the criminal penalties of the pipeline safety act.

As a consequence, the amendment I am about to offer includes intrastate pipelines that transport gas in interstate commerce within the criminal penalty section of the pipeline safety act that currently only protects interstate pipelines.

An incident occurred in my State of Alaska last fall where an individual fired a weapon and hit the 800-mile Trans-Alaska Pipeline.

The evidence indicates that perhaps the individual fired approximately 5 or 6 shots. Ordinarily, we are told, the steel in a pipeline is such that it is very unlikely there could be a penetration by a bullet more than the circumference of the bullet, and very doubtful if that.

It is interesting to note the history of that pipeline. It has been bombed. It has had dynamite wrapped around it. And it has been shot at, and finally an individual did penetrate the surface of the pipeline with a bullet.

Now, the defendant was allegedly intoxicated at the time, so we really do not know how many times he shot at it or whether he kept moving up closer until he hit it. But despite the importance of the contribution of the pipeline to the Nation's flow of oil—as I have indicated, once contributing 25 percent, and now it is at about 20 percent; it has a capacity unused of a million barrels a day—we were unable to prosecute due to the loopholes in Federal law. Instead, the State prosecuted the individual for the wrongdoing.

We believe there is no reason the Federal Government should not have been able to prosecute this crime since it involved infrastructure that is so important to our Nation's energy. This amendment closes that loophole in the Pipeline Safety Act and ensures that the Federal Government will be able to prosecute such cases in the future. It assures that both natural gas pipeline facilities and hazardous liquid pipeline facilities that are intrastate are protected as well.

It will protect those facilities even if the facility is within the confines of one individual State's borders, as long as the pipeline is used in interstate or foreign commerce or in any activity affecting interstate or foreign commerce. I think this is important because even though some pipelines may be confined to one State, such as ours, the Trans-Alaska Pipeline, they certainly affect interstate commerce.

The amendment will enable the Federal Government to prosecute individuals who threaten infrastructure which is integral to the transportation of important energy resources throughout our country. And I think from the standpoint of our State of Alaska, it relieves some of the responsibility on our State troopers in recognizing, indeed, this would be considered a Federal responsibility as well.

So, Mr. President, I send to the desk a second-degree amendment to the McCain amendment.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from Alaska [Mr. MURKOWSKI] proposes an amendment numbered 2988 to amendment No. 2979.

Mr. MURKOWSKI. Mr. President, I ask unanimous consent reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place, insert the following:

SEC. . CRIMINAL PENALTIES FOR DAMAGING OR DESTROYING A FACILITY.

Section 60123(b) of title 49, United States code, is amended—

(1) by striking "or" after "gas pipeline facility" and inserting a comma; and

(2) by inserting after "liquid pipeline facility" the following: ", or either an intrastate gas pipeline facility or an intrastate hazardous liquid pipeline facility that is used in interstate or foreign commerce or in any activity affecting interstate or foreign commerce".

Mr. MURKOWSKI. Mr. President, my understanding is that the floor manager has indicated we would have a vote on this at some point. I do not need a rollcall vote on my second-degree. I would leave it up to the Senator from Arizona to determine his intent for a vote on his underlying amendment.

Mr. McCAIN. If the Senator will yield, I am told it is the preference of the majority leader that a vote would be set for sometime tomorrow morning.

Mr. REID. Mr. President, if my friend will yield, I have spoken to the Senator from Arizona. He has agreed to accept a vote on this in the morning. We believe that even though this vote will, I think, be overwhelmingly in support for the McCain amendment, we need to send a strong message to the House, so we want a rollcall vote on this. So the plan is to work on this as long as anyone else wants to speak on it.

It is my understanding the Senator from New Mexico will accept the second-degree amendment of the Senator from Alaska and that we will then have other people speak on the McCain amendment. When that is completed, the Senator from California will offer an amendment. We will not complete the amendment of the Senator from California because the Senator from Texas and others wish to speak on that. However, there is another amendment that the Senator from New Mexico is going to offer later today.

We would vote first on the McCain amendment in the morning, probably at about a quarter to 10, and then we would vote, subsequent to that, on the amendment of the Senator from New Mexico. But we have to work this out. The majority leader knows about this, but not the details. We will confirm that with him and the minority leader at a subsequent time.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. BINGAMAN. Mr. President, I think this is a good second-degree amendment. I suggest we go ahead and adopt it at this point, and then, as the Senator from Nevada indicated, have the scheduled vote on the McCain amendment tomorrow.

I know Senator MURRAY from Washington is waiting to speak on the McCain amendment, as is Senator BREAUX from Louisiana.

Mr. MURKOWSKI. Mr. President, I would like to discuss with my colleagues an issue that relates to pipeline safety. I am concerned about an incident that occurred in Alaska last fall. The Senator may recall hearing in the news about an individual who fired a weapon and hit the Trans-Alaska Pipeline.

Mr. McCAINE. I do recall hearing about that incident.

Mr. HOLLINGS. I remember reading about the incident as well.

Mr. MURKOWSKI. Well, the individual was allegedly intoxicated when the Trans-Alaska Pipeline was damaged. Unfortunately, the U.S. Attorney's Office was unable to prosecute the individual for damaging the line due to some loopholes in the Federal law. One of those loopholes will be closed by my amendment to pipeline safety that includes intrastate pipelines that transport gas in interstate commerce within the criminal laws that currently only protect interstate pipelines. However, there was another problem with the case. The defendant was allegedly intoxicated at the time, and the statute requires proof that he "knowingly and willfully" damaged the pipeline pursuant to Section 60123(b) of title 49, United States Code. Therefore, due to this higher standard of intent, known as specific intent, it appears that he had a diminished capacity defense. It does not seem that this type of vandalism crime should be held to such a standard.

Mr. McCAIN. I understand the Senator's concern but also know that if we lower the intent standard in Section 60123(b) of title 49, we want to ensure that a person cannot be held criminally liable for negligence.

Mr. MURKOWSKI. I understand that concern as well and certainly do not want someone criminally prosecuted unless there was intent. I was wondering if the Senator would agree to work with me to see if we can find a compromise that would address the intent issue.

Mr. McCAIN. I would be happy to work with the Senator on the issue.

Mr. HOLLINGS. I would be interested in working on it as well.

Mr. BINGAMAN. I understand the concerns of the issue also and would agree to work with all Senators to see if we can address this intent issue prior to the end of consideration of energy legislation.

Mr. DOMENICI. Mr. President, I am pleased to co-sponsor an amendment to modernize our nation's pipeline safety programs. As you know, the Senate passed this legislation on February 8th of last year, by a vote of 98–0. Because it has not yet been acted on in the House, I am pleased to see that we are working to get this important legislation enacted in another way.

As we all remember, the issue of our country's pipeline safety came to the forefront after tragic explosions in Bellingham, Washington, and later, in my own state of New Mexico.

On August 19, 2000, twelve members of an extended family were on a camping and fishing trip along the Pecos River near Carlsbad, New Mexico. Just after midnight, a natural gas pipeline exploded, sending a 350 foot high ball of flame into the air. Six of the campers died instantly. The six remaining family members later died from their horrific injuries.

We have to make sure that tragedies like this do not occur again. What I am here to do today, is to work so that we don't have to think twice before camping with our families and friends.

Pipelines carry almost all of the natural gas and 65 percent of the crude oil and refined oil products. Three primary types of pipelines form a network of nearly 2.2 million miles, 7,000 of which lie in my own state of New Mexico.

Pipelines stretch across our country. They allow us to obtain energy resources quickly and economically.

In light of the energy crisis in California, and in the west in general, the value of our nation's pipeline system is obvious. We must have access to energy.

Therefore, pipelines and the potential hazards they pose affect us all. It is time that we do something to ensure our safety while protecting our access to energy.

This amendment:

Significantly increases States' role in oversight, inspection, and investigation of pipelines.

Improves and expands the public's right to know about pipeline hazards.

Dramatically increases civil penalties for safety and reporting violations.

Increases reporting requirements of releases of hazardous liquids from 50 barrels to five gallons.

Provides important whistle blower protections prohibiting discrimination by pipeline operators, contractors or subcontractors.

Furthermore, the legislation would provide much needed funding for research and development in pipeline safety technologies.

In fact, technology currently exists that might have detected weaknesses in pipelines around Carlsbad. Unfortunately, due to insufficient funding those products have yet to reach the market.

La Sen Corporation in my own state of New Mexico has developed technology that can detect faulty pipelines where current pipeline inspection technology is not usable. La Sen's Electronic Mapping System can be very effective even in pipelines where conventional pig devices cannot be used.

Pipeline inspection is costly and slow. Innovative new technologies could allow us to inspect all 2.2 million miles of pipeline each year in a cost effective manner. Today, pipeline inspection technology only covers 5–10 miles per day at a cost of $50 per mile. Again, La Sen's technology can survey 500 miles per day at a cost of $32 per mile.

The bottom line is that today, we can take action that will hopefully make pipelines safer.

I encourage my colleagues to recognize the potential dangers that pipelines pose and to minimize those dangers by agreeing to this amendment.

The PRESIDING OFFICER. Is there further debate on the second-degree amendment No. 2988?

Mr. MURKOWSKI. Mr. President, I urge adoption of the amendment.

The PRESIDING OFFICER. If not, the question is one agreeing to the amendment.

The amendment (No. 2988) was agreed to.

Mr. MURKOWSKI. I thank the chairman and the Presiding Officer.

The PRESIDING OFFICER. The Senator from Washington.

AMENDMENT NO. 2979

Mrs. MURRAY. Mr. President, I rise today in strong support of this amendment. I take this opportunity to thank the Senator from Arizona, Mr. McCAIN, for his leadership, his perseverance, and his tremendous work on the issue of pipeline safety.

As he said, many of us became aware of this issue on June 10, 1999, when a gasoline pipeline ruptured in my home State of Washington, killing three young people and really shattering our sense of security.

The Senator from Arizona was tremendous in his work with us as we brought that family here to Washington, DC. As he stated, the community, the mayor, so many people came here. His commitment to follow through with hearings and legislation, and to pass it out of the Senate, has just been really noted and respected in the State of Washington. And like he, I have difficulty standing here and speaking to those families today and telling them the House has still not acted, which is why we are on the floor of the Senate during the energy debate, once again, passing this legislation.

As I said, when that tragedy happened, I discovered that there were inadequate laws, insufficient oversight and inspection, and a real lack of public awareness about the dangers of these pipelines. So I began to work on a national effort to raise pipeline safety standards. I testified before Congress, and I introduced the first pipeline safety bill in the 106th Congress.

As the Senator from Arizona said, we passed legislation in the Senate in September of 2000, and again in February of 2001; and those bills passed without dissent, on a bipartisan basis, with leadership from both sides.

I am proud to have worked with several Senators, including Senators HOLLINGS, INOUYE, BREAUX, WYDEN, BROWNBACK, BINGAMAN, DOMENICI, CORZINE, TORRICELLI, and my colleague, Senator CANTWELL, in this Congress, and my colleague in the previous Congress, Senator Gorton.

But, again, I especially thank Senator McCAIN for his work on pipeline safety. I have to say that without his attention to this issue over the last several years, I really doubt we would have accomplished what we have so far. I know that all of the advocates and I appreciate Senator McCAIN's leadership on this issue, and I am looking forward to continuing to work with him on this and many other critical safety issues before us.

The bill that the Senate passed was the strongest pipeline safety bill ever passed by either body of Congress. It improves the qualification and training of pipeline personnel. It improves pipeline inspections and prevention practices. It expands the public's right to know. It raises the penalties for safety violators. It increases the States' ability to expand their safety activities. It invests in new technology to improve pipeline safety. It provides whistleblower protection. It increases funding to improve pipeline safety. And it recognizes State citizen advisory committees.

Despite the Senate's quick, measured, and deliberate work on this issue, as I stated, and as the Senator from Arizona said, the House of Representatives has blocked progress on this initiative. A couple of weeks ago, the House finally held a hearing on pipeline safety; and that was the first one that was held in 2 years on this issue. I understand they intend to move to a markup very soon, and that is encouraging. I am also encouraged that House Members from the Washington delegation, especially Representative RICK LARSEN, are working really hard to make progress on this issue.

I have to say, unfortunately, that the bill they intend to mark up excludes many of the important safety measures we put into the Senate bill, including strong inspection and testing requirements and adequate operator qualification standards. So overall I remain skeptical that the House will eventually pass a comprehensive bill, and that is why I am especially pleased that Senator McCAIN has introduced this amendment. I am here to support that effort.

The amendment before us is nearly identical to the bill that has passed the Senate unanimously 2 years in a row. We did, however, make a needed change for national security purposes. September 11 has shown us that our transportation infrastructure is vulnerable to attack by terrorists, so we included a provision that would give the Secretary of Transportation the discretion to withhold public information about pipelines if the Secretary believed it would compromise national security. The standard would be the same as the current one used under the Freedom of Information Act.

I am very proud to cosponsor this amendment. We all know if we want meaningful legislation to move on to the President, it will have to be attached to a piece of legislation such as the energy bill. The history of this legislation in the House requires that we proceed in this manner.

In addition to working on this bill, I am also using my position as chair of the Senate Transportation Appropriations Subcommittee to keep the pressure up and to secure the funding we need to hire inspectors, to enforce safety regulations, and to support the States with their efforts. I have held several hearings in Washington, DC, and I have questioned the Transportation Secretary and others about our progress on pipeline safety. I have met with the new head of the office that oversees pipeline safety at the Department of Transportation, and I told her exactly what I expect the department to do to improve pipeline safety. I have not hesitated to push the department to issue new pipeline safety rules and regulations.

In my position as chair of the Senate Transportation Appropriations Subcommittee, I worked to pass a bill that provides record funding for the Office of Pipeline Safety. Overall it provides more than $58 million for that office. That is $11 million more than the fiscal year 2001 funding level. That budget included funding for 26 new staff positions, from safety inspectors to researchers. OPS requested those positions, and my bill fully funds those new hires.

Finally, it provides needed resources within OPS for critical testing, safety programs, and R&D. I plan to continue to work in the Appropriations Committee to make sure the funding is there to do the adequate testing and oversight of our pipeline infrastructure.

When it comes to pipeline safety, we have taken a major step forward, especially in funding, but we still have to raise the standards nationally with legislation.

I urge my colleagues to support our efforts to move this critical legislation forward to the President for his signature. From Carlsbad, NM, to Bellingham, WA, communities across this country are counting on us to protect them.

I yield the floor.

Ms. CANTWELL. Mr. President, I rise in support of the amendment and would like to take a few minutes to describe why this is so important.

I have stood on this floor before and described an incident that occurred in my State just 3 years ago. In a park near Bellingham, WA, an aging pipeline burst, sending a blast of flames that engulfed two 10-year-old boys. Both of those boys died in that blast and one young man drowned after being overcome by fumes. But that incident wasn't the first, nor the last. This was only one of numerous pipeline accidents in the State of Washington, which has suffered 47 reported incidents and more than $10 million in property damage in just the 15 years from 1984 to 1999.

I would like to think that many of those accidents could have been prevented if the agency responsible for regulating that industry had been more diligent. This week we begin a substantial debate about increasing the domestic supply of affordable energy, but a significant part of that debate hinges on the integrity and reliability of our Nation's energy infrastructure. And that debate must not overlook the critical importance of our citizens' safety as we work to secure and transport increasingly larger amounts of these resources. For many of us in this body, the issue of safety has hit close to home. We have seen the loss of human life; the devastation to families and communities; and the significant property damage associated with mismanagement of our pipeline infrastructure. But this is not simply about the personal tragedies in our states.

The tremendous efforts to finally pass this legislation—by the sponsor of the pipeline safety bill, Senator MCCAIN, Senator HOLLINGS, my colleague Senator MURRAY, and so many others—are based on a continuing pattern of oversight failures by the Office of Pipeline Safety. Many of my colleagues have already referenced the June 2000 report by the GAO, which found persistent failures by OPS to implement congressional mandates. That report indicated that in 22 of 49 cases, OPS ignored congressional direction and failed to follow statutory requirements. And since 1990, our Nation has suffered literally hundreds of pipeline-related deaths. Now, we have more than 2.2 million miles of pipelines traversing this nation, carrying almost all of the natural gas and 65 percent of the crude oil and refined oil products. Obviously, we don't want to hinder the effective transportation of these products that are so critical to our national economy. But we can and must do a better job of ensuring the public safety.

My colleague Senator MURRAY has been instrumental in the ongoing efforts to improve the public disclosure of pipeline information. Obviously we need to employ common sense in restricting access to information that poses a real national security threat to our communities and our nation—but I believe that we must apply the highest standards in assessing those security risks and providing the most complete information possible to our public safety officials and to the public at large, so that they can take steps to protect their own communities from potential disasters.

This amendment seeks to balance these equally important objectives—security and public disclosure—that are both intended to enhance the public safety. I am also pleased that this amendment maintains a critical provision that I had worked to pass along with my colleagues, Senator CORZINE, Senator TORRICELLI, and Senator MURRAY, which would ensure the assessments of nearly all pipeline systems at least once every 5 years. This is an issue of tremendous importance if we are going to make real strides in prevention of accidents. If we do not know the fundamental state of integrity of these systems and facilities, we cannot identify real threats to our communities. We passed this legislation by a wide margin last year and the other body has failed to finish the job. I urge my colleagues to join me in supporting this amendment and finally getting the job done to better protect our constituents, and better protect our fuel supply.

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. BREAUX. Mr. President, I join my colleagues in supporting the legislation and amendment pending before the Senate. This will be the third time the Senate has passed this legislation. You would think that eventually it is going to get done. It has failed to pass the House, although the House at one point had an identical provision and it passed. It passed with a majority, but they took it up under suspension of the rules, and they needed two-thirds majority, so it did not pass.

This legislation will now pass the Senate for a third time and is still waiting on the House to take action on it, which will send it ultimately to the President for his signature.

There are literally millions and millions of gas and hazardous liquid pipelines that cover the United States. Every State has natural gas pipelines and oil pipelines that traverse through various parts of individual States and carry literally billions and billions of cubic feet of natural gas every day, 24 hours a day, 7 days a week, 365 days out of the year.

Gas comes from my State of Louisiana, from the Gulf of Mexico. It goes to California. It goes to Florida, to Maine, to New Jersey. It goes all the way up to the Midwest and throughout the United States. We have gas coming from the north that serves markets in the southern lower 48. This is an intricate pattern, a complicated transportation system that is absolutely needed and necessary. Without the extent of the natural gas pipeline system, this country would simply not be able to operate.

It provides energy for plants. It provides energy for factories. It provides heat and also cooling elements to family homes, to businesses, to offices throughout the United States. This, indeed, is one of the most sophisticated, complicated systems that man has ever devised in order to transport energy.

Is there potential and likely sometimes accidents that happen? The answer is yes. There were two tragic accidents—one in the State of Senator MURRAY, Washington, one in the State of Senator BINGAMAN, New Mexico—that were tragic and unfortunate. They should never have happened. But if you look at it from the perspective of the millions and millions of miles of the transportation system, with the good that it provides, it is absolutely clear that these systems must be protected.

We need to do a better job of ensuring their safety and security, their protection from normal accidents, as well as insulate them to the maximum extent possible from terrorist activities and even from deranged activities such as of the drunk shooting out the Alaskan pipeline in the State of Senators STEVENS and MURKOWSKI. We can do that.

There is not a form of transportation in this country that does not have accidents that happen: Airplanes crash; trains run off tracks; trucks run off highways; accidents happen; people are injured; people are killed.

The answer is not to eliminate the system but to better ensure the security of the systems, to build better trucks, to better investigate the drivers, to better inspect their licenses, to build better airplanes, to correct deficiencies in airplanes, to require better training for pilots.

As we do those things for those other means of transportation, it is also incumbent that we provide better and adequate inspections and guarantee that pipelines are built to the highest standards possible from an engineering and technical capability, and also that people are involved in the decisions as to where pipelines are actually built and where they are laid in order to let the public know what is near them in order for them to be aware.

It is interesting to note that pipelines are things you never see. Every day, every hour, every minute they are providing efficiency in terms of transportation of energy. Pipelines are buried under the sea, under the ground. People don't see them. They don't know they are there. But they are there to do a very effective job to provide for the security of this country.

This legislation will also provide for better security and better safety for the general public to make sure that while we are transporting billions and billions of cubic feet of natural gas, we are also doing it as safely as we possibly can.

Previous speakers have talked about the structure of the legislation. I support it. It is good legislation. It has brought both the pipeline companies, as well as citizens, to the same table to negotiate with government officials to get a system in place that we can be proud of and will assure the system continues to work as it has in the past with the maximum degree of safety that is humanly possible. This legislation goes a long way toward doing that.

This is the third time the Senate will pass this legislation. We urge our colleagues in the other body to do it just once.

I rise in support of amendment No. 2979 to S. 517, the Pipeline Safety Improvement Act of 2002, which will enhance the safety of our interstate pipeline systems. As you may recall, the Senate passed this legislation last February as one of the first orders of business of the 107th Congress. This bill is the product of over 3 years of work and recent compromise and I urge my colleagues to join me in support.

The aim of the bill is to ensure the safety and security of natural gas and hazardous liquid pipelines. I appreciate the considerable number of hours that went into creating this bill by all of the parties. I also am satisfied by the spirit of compromise that infused the parties' diligent efforts. As a result of their cooperative work we have a bill that reaffirms our efforts to oversee the safety of gas and hazardous liquid pipelines effectively without interfering with the pipeline operators and owners ability to provide service to our nation and without compromising national security.

Last Congress, the Senate passed an almost identical version of this bill by unanimous consent. Unfortunately, in my opinion, the bill was not passed by the House of Representatives under the expedited procedures of suspension of the rules, because it did not pass with a two-thirds majority, although a majority supported the measure, 232–158.

Last February, the Senate again approved this bipartisan legislation, yet we are still awaiting action by the House on this measure. Today, we are offering this legislation as an amendment to S. 517 in an effort to focus attention on this important safety matter and work toward reconciling our legislation with the House of Representatives. I hope that we can continue to work with all of the interested parties as the legislation moves though the legislative process.

Over the past few years, we have experienced two major pipeline accidents, one in Bellingham, WA, and the other near Carlsbad, NM. While these tragic accidents happened, we need to take all necessary steps to ensure that other accidents are not waiting to happen. I think that this legislation will increase the tools available to OPS to ensure that our pipeline system is as safe as possible. I would ask that OPS use the tools that we provide to ensure the appropriate level of oversight of pipeline safety practices.

While there were many who worked with Senators McCAIN and HOLLINGS on the Commerce Committee to ensure passage of pipeline safety legislation, I would like to recognize, in particular, the efforts of Senators MURRAY and BINGAMAN. Senator MURRAY doggedly pursued changes to increase the level of safety and public participation in pipeline safety, and she worked closely with other Commerce Committee members to ensure a reasonable and fair compromise. Senator BINGAMAN was instrumental in helping bolster the bill's provisions on research and development, in fact, he authored provisions to focus our research on progressive areas that will help us develop better systems of early detection, and to ensure that we can avoid accidents such as those that occurred in Bellingham, WA, and near Carlsbad, NM.

A floor amendment which was accepted during consideration of S. 235 last February mandates a 5-year integrity inspection period for pipelines. Since passage of the S. 235 last February, I understand that studies, conducted by Batelle and Energy and Environmental Analysis, Inc., indicate that a 5-year period for integrity inspections will cause significant impacts on natural gas consumers as a result of pipeline capacity reductions resulting from such a short inspection period. I want to bring these studies to the attention of my colleagues as we prepare to move this important piece of pipeline safety legislation to conference.

Lastly, I would like to address one change to the legislation since Senate passage last year. Since September 11, we have all recognized that the way the Government has done business may change due to security concerns. In the past, we have made efforts to expand the amounts of information made available to the public, including encouraging electronic access to more data and information on pipelines. Today, we must balance the concerns of national security with the needs of law-abiding citizens who live and work alongside pipelines. We have included language which, in my opinion, fairly addresses the concerns of the public in obtaining pipeline safety information and enables the Government to safeguard information which could be used to do harm or for terrorist activities.

This bill is good legislation. It will require greater safety and oversight of our Nation's pipeline system. The bill also allows for a greater degree of public participation in the process of pipeline safety, without jeopardizing national security, updates the penalties that would be levied for misconduct and provides whistle blower protection for employees who reveal misconduct. The bill also provides for Federal investment in research which will help us be more efficient and effective in providing a safer and more secure system. I urge my colleagues to support this measure.

I yield the floor.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. BINGAMAN. I know the Senator from California is here to offer her amendment. Before we set this amendment aside, let me speak briefly about it.

It is very important that we pass the McCain amendment once again to make the point to the House of Representatives that this is a priority for our Nation and this is vitally needed legislation.

In my State, we lost 12 people as a result of a tragic breach or break in a high-pressure gas pipeline south of Carlsbad, NM. I visited the site. I saw the tremendous damage that was done when that pipeline broke without any warning and essentially killed a great many people who were there camping beside the Pecos River. This is a tragedy that should have been enough to galvanize action in Washington. When you add it to the other tragedy, which has been talked about here several times, in Washington State, it is clear to me this is legislation that should be passed quickly and moved to the President for signature.

I very much hope, when we vote tomorrow on the McCain amendment, there will be a resounding vote, as there has been in the past, and that we will finally get the House of Representatives to give attention to this issue and to pass it quickly.

As I understand it, at this point it is the desire of the Senator from California to offer an amendment. I ask unanimous consent that the pending amendment be set aside so that she may offer her amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2989 TO AMENDMENT NO. 2917

Mrs. FEINSTEIN. Mr. President, I rise to introduce an amendment on behalf of Senators CANTWELL, WYDEN, BOXER, LEAHY, and DURBIN to provide price transparency when energy derivatives are traded and to give the Commodity Futures Trading Commission oversight authority for such transactions. Let me set the framework for this amendment.

I send the amendment to the desk.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from California [Mrs. FEINSTEIN], for herself, Ms. CANTWELL, Mr. WYDEN, Mrs. BOXER, Mr. LEAHY, and Mr. DURBIN, proposes an amendment numbered 2989 to amendment No. 2917.

Mrs. FEINSTEIN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The text of the amendment is printed in today's RECORD under "Amendment, Submitted.")

Mrs. FEINSTEIN. Mr. President, I will quote from a March 5 letter of the American Public Gas Association by its president, out of Fairfax, VA:

> As you know, Enron operated in what was essentially an unregulated environment. While there will be much more to come in the wake of Enron, one thing is perfectly clear today—our Federal Government has an obligation to make sure that no important trading activities fall between the cracks, leaving some energy markets without a Federal agency with oversight authority. Your amendment remedies this glaring deficiency.
>
> The American Public Gas Association is fully committed to support our effort to reverse the action Congress took just 15 months ago in the Commodities Futures Modernization Act. The Commodities Futures Modernization Act amended the Commodity Exchange Act by allowing some energy contracts to be traded with no Government oversight. We firmly believe that the CFTC must have at its disposal the necessary jurisdiction and authority to protect the operational integrity of energy markets so that (1) transactions are executed fairly, (2) proper disclosures are made to customers, and (3) fraudulent and manipulative practices are not tolerated.

I ask unanimous consent that the full letter be printed in the RECORD following my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See Exhibit 1.)

Mrs. FEINSTEIN. Let me also quote from the Texas Independent Producers and Royalty Owners Association:

> [This association] believes that this measure will tend to improve price transparency in natural gas markets, leading to a more efficient and stable marketplace. The relatively modest requirements outlined above should not unduly reduce liquidity for gas traders. Accordingly, TIPRO endorses your amendment.

I ask unanimous consent that that be printed in the RECORD following my statement.

The PRESIDING OFFICER: Without objection, it is so ordered.

(See Exhibit 2.)

Mrs. FEINSTEIN. This letter is from the MidAmerican Energy Holdings Company out of Omaha, NE:

> I am writing in support of your effort to ensure that there is transparency and appropriate Federal oversight of energies futures trading markets.
>
> As I testified before the Senate Energy and Natural Resources Committee last month—

This is the chairman and CEO—

> I have long been concerned that the type of exchange run by Enron before its collapse offered opportunities for manipulation. Enron was the largest buyer, the largest seller and operator of an unregulated exchange. In view of the revelations of the last several months regarding Enron, the unregulated nature of these markets has raised serious concerns regarding the ability of the Federal Government to ensure that energy trading and futures markets are operating in the interest of the public and market participants.

I ask unanimous consent that this letter, and also a similar letter from PG&E, be printed in the RECORD at the end of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See Exhibit 3.)

Mrs. FEINSTEIN. Mr. President, this amendment would provide the same transparency and oversight that is provided for every other traded tangible commodity. All this amendment says is that electronic exchanges which change energy derivatives are subject to the same requirements as other exchanges, such as the Chicago Mercantile Exchange and the New York Mercantile Exchange. Incidentally, these two organizations support this legislation.

Additionally, it says that if you are trading energy derivatives off an exchange, you simply need to keep a record of that transaction; and if it turns out that there is a complaint, the CFTC will have a record to review.

The problem, and why we need the legislation: Presently, energy transactions are regulated by the FERC, Federal Energy Regulatory Commission, when there is an actual delivery of an energy commodity. Let me give you an example. If I buy gas from you and you deliver that natural gas to me, FERC has the authority to ensure that this transaction is both transparent and reasonably priced. That is a direct delivery. However, energy transactions have gotten so complex over just the past decade, most energy transactions no longer result in delivery; thus, with these nondelivery trades and transactions, a giant loophole has opened, where there is no oversight and no transparency.

Let me explain. Mr. President, I can purchase from you a promise that you will deliver natural gas to me at some point in the future. This is referred to as a derivatives contract. I may never really need to physically own that gas, so I can sell that gas to someone at a small profit, who can then turn around and sell it to yet someone else, and so on and so forth. This promise of a gas delivery can literally change hands dozens of times before the commodity is ever delivered. Even then, it may never get delivered if the spot market price is lower than the future price that comes due on that day.

In fact, 90 percent of energy trades represent purely financial transactions, not regulated either by FERC or the Commodity Futures Trading Commission. As long as there is no delivery, there is no price transparency. So we don't know the price or the terms for 90 percent of the energy transactions taking place.

Again, this lack of transparency and oversight only applies to energy. It does not apply if you are selling wheat, or pork bellies, or any other tangible commodity. So, as I said, there is a very big loophole here.

Why is this type of trading so important? Many of these transactions provide needed insurance so a company can lock in set prices in the future without necessarily ever having to receive delivery. For example, knowing the price of natural gas in the future allows an energy company to, in turn, contract out its electricity, since it will know the price of natural gas, the main cost of production.

These transactions are here to stay. What this amendment simply does is shed light on them. Futures transactions do affect market prices for consumers, and that is why we need this transparency. That is precisely why other commodities, except for excluded financial commodities, are already regulated by the CFTC.

One simple example of how energy derivatives can affect delivered energy prices is the long-term energy electricity contracts that California and other Western States entered into last year, which were priced according to the long-term future costs for natural gas. As soon as the future price of natural gas plummeted after the contracts had been signed, electricity prices fell substantially. All of a sudden, these States looked foolish for signing these contracts.

How did this happen? How did it come up all of a sudden? The simple answer is that the Commodity Futures Modernization Act, signed into law in 2000, exempted energy and minerals trading from regulatory oversight and also exempted electronic trading platforms from oversight.

In a sense, what that legislation did was set up two different systems treating electronic trading platforms differently from all other platforms and treating energy commodities differently from other commodities.

Up until 2000, energy derivative transactions were regulated just like other transactions, and electronic trading platforms were treated like other platforms. I repeat, these were the standards that were in place all the way up to 2000.

Up until that time, if a gas or electricity commodity was delivered, FERC had oversight. If there was not delivery, the CFTC had the authority. So the loophole arose just 2 years ago.

At the time of the 2000 legislation, nobody knew how the exemptions would affect the energy market. We have a much better idea today because of what we have learned since then.

It did not take long for Enron Online and others in the energy sector to take advantage of this new freedom by trading energy derivatives absent any regulatory oversight or transparency. Thus, after the 2000 legislation was enacted, Enron Online began to trade energy derivatives—not deliveries, but derivatives—bilaterally over the counter in a one-to-one transaction without being subject to any regulatory oversight whatsoever. If the trade has delivery, again, it is regulated by FERC. If it does not, it falls into the abyss. Enron Online was able to trade back and forth without records and in secret. The result, of course, was higher prices.

Let me give an example of how that secret trading has affected California and the western energy markets.

On December 12, 2000, the price of natural gas in southern California on the spot market was $50 a decatherm, while it was $10 a decatherm close by in San Juan, NM. A decatherm is 1,000 cubic feet or enough gas to power about 100 kilowatt hours of electricity for a typical powerplant. It is enough gas to provide electricity for about 900 homes for 1 hour.

This problem lasted from November of 2000 to the end of April 2001—a full 6 months—while energy price spikes affected the entire western energy market. And all this time, hardly anyone understood what was happening in nondelivered energy transactions.

In 1999, California's total electricity price for the entire State was $7 billion. In 2000, it was $27 billion, and in 2001, it was $26.7 billion. You can see there are serious ramifications when markets are secret without any Federal oversight or investigation of dramatic price spikes. You cannot investigate it because there is no evidence because all this trading was done in secret with no records.

The Senate Energy Committee, of which I am a member, examined this issue last year, but we were not able to piece together the pieces at that time. In the wake of Enron's bankruptcy, we are beginning to learn a lot more. By controlling a significant number of energy transactions affecting California, and by trading in secret, Enron had the unique opportunity to drive up prices. Only time will tell whether that can be proved because of the absence of records and transparency.

Let me explain how this amendment works. First, the bill repeals the provisions of the 2000 Commodity Futures Modernization Act which exempted energy derivatives from regulatory oversight. As I said before, these transactions were regulated by the CFTC until 2000, so this is not an entirely new authority for the CFTC.

As a result of this provision, all electronic trading exchanges will once again be subjected to the same oversight as other exchanges when it comes to energy transactions.

Companies trading energy commodities off the exchange will simply have to keep a record of that transaction, just as they do for other traded commodities. That is certainly not too much to ask.

The amendment also requires FERC and the CFTC to work together to ensure that energy trading markets are, one, transparent, not in secret; two, regulated, which they should be; and three, working.

This will close the regulatory loopholes that allowed entities, such as Enron Online, to operate unregulated trading markets in secret.

I have received a letter from Pat Wood, the Chairman of FERC. Chairman Wood writes that neither FERC nor CFTC has adequate authority to determine price transparency and ensure that the energy market is functioning as it should. He supports this amendment. FERC Commissioners Brownell and Massey do as well.

This amendment does one more important thing. It ensures that entities running online trading forums must maintain sufficient capital to carry out their operations and maintain open books and records for investigation and enforcement purposes.

This last point is very important. Enron saw its future as a "virtual" company. As such, it sold off many of its physical assets over the past few years. So when investors and customers lost confidence and stopped trading out of fear that bankruptcy was in the offing, they learned that Enron had no collateral to back up these trades, and this was a major factor in Enron's final spiral into bankruptcy.

Who is supporting this bill? The New York Mercantile Exchange, the Chicago Mercantile Exchange, Cambridge Energy Research Associates who asked for just this, the American Public Gas Association, the American Public Power Association, Pacific Gas & Electric, Calpine, Mid-America Energy Holding Company, Texas Independent Producers and Royalty Association, the Consumers Union, and the Consumer Federation of America, all because they believe the time has come to see there are no trading markets in secret that do not keep records, and to shine the light of day on these trades.

Now, who is opposed to the amendment? Some energy companies oppose this bill. One lesson some of these companies seem to have learned from the recent energy crisis was they make more money when they can operate without any transparency, in secret, without any reporting requirements or oversight of any kind, and that cannot continue to exist.

I am very much encouraged that not all energy companies want to operate this way. As I mentioned, PG&E, Calpine, Apache, Mid-America Energy, and others support this bill, and many other energy companies are sitting on the sidelines waiting to see what may happen.

There are still some who fail to recognize the glory days of operating in secret are over. Regardless of what happens with this amendment, I want to go on record saying I will do everything in my power to see the energy sector is exposed to the same price transparency and oversight as every other sector of our economy. Make no mistake, this debate boils down to the issue of whether energy companies should be able to operate in continued secrecy.

Some of these companies have argued this amendment creates unfair reporting and oversight over energy companies. So let us again look at what this provision would do. It would treat electronic trading exchanges like any other exchange since, as I said before, there is neither price transparency nor regulatory authority over those exchanges where there is not a direct delivery. So with this provision, the same reporting requirements that CFTC requires of the New York Mercantile Exchange and the Chicago Exchange would now be required of electronic exchanges. This means simply that CFTC would be able to assert the same oversight and require the same transparency of electronic exchanges that are already required of nonelectronic exchanges.

I have a very hard time understanding why this is so burdensome and unfair. Additionally, some of these companies have also asserted this amendment would create unfair burdens on companies engaged in bilateral transactions. Here is what they are complaining about: With our amendment, any entity engaging in bilateral transactions in energy commodities would have to keep a record of those transactions, and the CFTC would have the authority to look for fraud and manipulation.

Again, let me repeat, a company engaged in bilateral trading has to keep a record of that transaction, and the CFTC has the authority to investigate fraud. That is it. It is the same authority that was there before 2000 and the same standard that traders of all other commodities are required to meet.

So with all we now know about the energy sector and Enron, I challenge anyone to explain to me why energy companies should continue to have a loophole so they can trade in secret, not keep any records, and therefore there is no evidence that can be proven as to manipulation of price. The day has come to close that loophole.

I note one of the main original cosponsors is in the Chamber and wishes to speak to this amendment. I have had the pleasure of working with the Senator from Oregon on the Energy Committee, as I have with the Presiding Officer. The Senator from Oregon has been a leader and very focused on this issue. I want to thank him for his help, and I ask the Chair recognize him.

EXHIBIT 1

AMERICAN PUBLIC GAS ASSOCIATION,
Fairfax, VA, March 5, 2002.

Hon. DIANNE FEINSTEIN,
Hart Senate Office Building,
U.S. Senate, Washington, DC.

DEAR SENATOR FEINSTEIN: The American Public Gas Association (APGA) is very pleased that you have taken the lead to amend the Commodity Exchange Act (CEA). Your revisions to S. 517, which amends the CEA, brings the trading of energy products, including natural gas spot and forward prices, under the appropriate jurisdiction of the Commodity Futures Trading Commission (CFTC). As a result, your amendment will reduce the various risks imposed on consumers by a partially unregulated energy trading market.

As you know, Enron operated in what was essentially an unregulated environment. While there will be much more to come in the wake of Enron, one thing is perfectly clear today—our federal government has an obligation to make sure that no important trading activities fall between the cracks leaving some energy markets without a federal agency with oversight authority. Your amendment remedies this glaring deficiency.

APGA is fully committed to support your effort to reverse the action Congress took just 15 months ago in the Commodities Futures Modernization Act (CFMA). The CFMA amended the CEA by allowing some energy contracts to be traded with no government oversight. We firmly believe that the CFTC must have at its disposal the necessary jurisdiction and authority to protect the operational integrity of energy markets so that (1) transactions are executed fairly, (2) proper disclosures are made to customers, and (3) fraudulent and manipulative practices are not tolerated.

In December of 2000, when the CFMA was under consideration in the Senate, APGA submitted a Statement for the Record to the U.S. Senate Committee on Energy and Natural Resources during a hearing on the "Status of Natural Gas Markets." In the statement, we expressed a concern that the proposed legislation would codify an exemption for energy commodity transactions that would shield those energy transactions from the oversight and review of the CFTC. Enron took advantage of this gap in regulatory oversight. Your amendment will close that gap. Consumers across the country will benefit from your efforts because they are less likely to be victimized by activities that occur in a market where the CFTC exercises oversight.

Again, public gas utilities and the hundreds of communities that we serve commend you for your thoughtful and deliberate leadership on this very important issue. While there may be some who will oppose this amendment, one need not look far to see whether the opposition is looking out for the best interests of Wall Street or Main Street. We pledge to work with you in any way we can to pass this much-needed amendment. Please let me know how I can assist you.

Sincerely,

BOB CAVE,
President.

EXHIBIT 2

TEXAS INDEPENDENT PRODUCERS &
ROYALTY OWNERS ASSOCIATION,
Austin, TX., March 6, 2002.

Hon. DIANNE FEINSTEIN,
U.S. Senate, Hart Senate Office Building,
Washington, DC.

DEAR SENATOR FEINSTEIN: We understand that later today, you will introduce an important measure designed to bring greater transparency to natural gas markets. We believe that improved transparency will reduce price-markups charged in transactions that take place after natural gas leaves the wellhead and before it reaches the burner tip. Thus your measure will benefit both consumers and producers. We support the modified version of S. 1951 that you intend to offer as an amendment to the Senate Energy Bill.

We understand that the amendment:

(1) will not grant any price control authority under the Federal Power Act or Natural Gas Act;

(2) will continue to allow energy commodities (actually all commodities other than agricultural commodities) to be traded on electronic trading facilities that currently qualify as exempt commercial markets, provided that the trading facilities register, meet net capital requirements, file reports, and maintain books and records;

(3) will require participants in such markets to maintain books and records; and

(4) will apply these requirements to electronic trading facilities which permit execution with multiple parties and non-binding bids and offers, and will require books and records to be kept by participants in facilities that permit bilateral negotiations.

TIPRO believes that this measure will tend to improve price transparency in natural gas markets, leading to a more efficient and stable marketplace. The relatively modest requirements outlined above should not unduly reduce liquidity for gas traders. Accordingly, TIPRO endorses your amendment.

Sincerely,

GREGORY MOREDOCK,
Natural Energy Policy
Committee Chairman.

EXHIBIT 3

MIDAMERICAN ENERGY HOLDINGS CO.,
Omaha, NE., March 5, 2002.

Hon. DIANNE FEINSTEIN,
U.S. Senate,
Washington, DC.

DEAR SENATOR FEINSTEIN: I am writing in support of your effort to ensure that there is transparency and appropriate federal oversight of energy futures trading markets.

As I testified before the Senate Energy and Natural Resources Committee last month, I have long been concerned that the type of exchange run by Enron before its collapse offered opportunities for manipulation. Enron was the largest buyer, the largest seller and the operator of an unregulated exchange. In view of the revelations of the last several months regarding Enron, the unregulated nature of these markets has raised serious concerns regarding the ability of the federal government to ensure that energy trading and futures markets are operating in the interest of the public and market participants.

As the Senate addresses this issue, it is important to remember that electric and gas markets as a whole responded to the Enron collapse without disruption, so legislation should not compromise the liquidity of these markets. I applaud your determination to keep your amendment focused on oversight and transparency and am encouraged that you, along with Senators Cantwell and Wyden, have pledged to work with market participants to continue to perfect this proposal as debate on the comprehensive energy bill continues.

Ensuring public confidence in the integrity of energy futures markets is a critical component of establishing a modernized regulatory framework for the electric and natural gas industries. I am pleased to support your effort and commend you on your work on this important issue.

Sincerely,

DAVID L. SOKOL,
Chairman and CEO.

PG&E CORPORATION,
Washington, DC, March 6, 2002.

Hon. DIANNE FEINSTEIN,
U.S. Senate, Hart Senate Office Building,
Washington, DC.

DEAR SENATOR FEINSTEIN: We are writing today in reference to the amendment you will be offering to the Senate Energy bill, containing the substance of legislation you and several of your colleagues introduced earlier to provide regulatory oversight over energy trading markets, as amended.

At the outset, we applaud your efforts to ensure public and consumer confidence in the operation and orderly functioning of the energy marketplace. As you know, the industry relies heavily on these markets and products to manage risk for the benefit of consumers of electricity. We thus appreciate your willingness to work with us and other market participants to address areas of interest and concern as the provisions of your amendment have been debated and refined. As presently drafted, we view your amendment as providing an increased level of oversight, while ensuring the continued ability of market participants to utilize these instruments as part of overall risk management strategies. We therefore support your amendment.

Thank you for your hard work in this area, and we look forward to continuing to work with you and others on matters of national energy policy.

Sincerely,

STEVEN L. KLINE.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. WYDEN. Madam President, I want to commend Senator FEINSTEIN for leading all of us in this critically important effort. It has been a pleasure to team up with her. She has been the catalyst in this whole effort and it is a pleasure to stand with her.

I also want to note that Senator CANTWELL has been a tremendous voice for consumers in the Pacific Northwest and our country, and I have enjoyed teaming up with her as well as Senator FEINSTEIN. I am going to be very brief because I think our colleague from California has laid it out very well.

Today, as the Senate turns to a number of important amendments that are going to relate to the consumer protection issue, I think it is important to note this is an opportunity to end the Enron exemption. For years, Enron and other energy traders have operated back room trading floors where energy has been bought and sold as a commodity while the public has been kept in the dark. I think the question that colleagues may be asking is: Had this amendment been law during the time when all of the damage associated with Enron was being perpetrated, what would have been the difference? What would have been different had the Feinstein-Cantwell-Wyden effort been law at the time?

It seems to me there would have been two very significant benefits had this legislation been law. First, I think it would have been less likely that there would have been market manipulation. Certainly, the Federal Energy Regulatory Commission is investigating that question. That has not yet been determined. Certainly, conceptually it is much tougher to manipulate a market if in fact the transparency and the openness is there that this legislation calls for.

Second, had this legislation been law, if in fact there was market manipulation it would be possible to find that out very quickly. As all of our colleagues know, as a result of the request from west coast Senators, virtually all of us have joined into it. The Federal Energy Regulatory Commission has written to the west coast Senators saying they are going to investigate whether Enron manipulated our markets, but it will take them several months to conduct this investigation.

Had Enron's energy trading been regulated, as called for in this amendment, we would not have had to wait months to determine if Enron manipulated the market. Information about energy trading operations would have been immediately available to regulators and the public instead of shrouded in secrecy.

I think it is important for colleagues to note, first, this amendment makes it less likely that anybody can manipulate a market; and, second, if there is that kind of conduct taking place, it would not take months to ascertain what went on. One could find it out much more readily because information would be made available more quickly.

Before it collapsed, Enron was the biggest energy trader in the country, controlling one-quarter of all wholesale energy trades. Despite the great impact on energy markets, they were able to hide the facts about the trading operations from public scrutiny by securing exemptions from regulation for their energy and derivatives trading.

Evidence is emerging that Enron may have secretly used its market power to manipulate prices in energy markets. A witness testified before the Senate Energy Committee that the price of forward contracts for electricity dropped as much as 30 percent after Enron filed for bankruptcy, suggesting, according to this witness, Enron was artificially inflating prices in western markets.

There is a well-regulated system in place for trading pork bellies and other commodities to protect the public from market manipulation, but energy, a commodity that we all regard as essential, has been completely exempt. It seems to me if energy is going to be bought and sold as a commodity, the public should at least have the same protections that exist for trading any other commodity. There must be transparency for the markets to work.

Let me conclude with one last point, and then I know we are going to hear from our colleague from Washington. There has been considerable discussion as to whether this is somehow granting vast new powers to Government, and that Government is in some way reacting to what happened in the Enron situation.

First of all, the Commodity Futures Trading Commission had this authority before. This is not a brand new idea. They had this authority and essentially they gave it up. What this bill does is restore authority to the Commodity Futures Trading Commission to regulate energy the same way it regulates every other commodity.

I hope when my colleagues vote on this amendment, they recognize this is something that the Commodity Futures Trading Commission used to have. It is authority that was on the books before the agency granted a blanket exemption from regulating energy as a commodity. As my colleague from California noted, Congress later went along as part of an appropriations rider. But this bill does not give the Commodity Futures Trading Commission vast new powers nobody has ever heard about, and constitute in some way a rush to judgment in reaction to the Enron situation. This is restoring a power the agency should not have given up.

I compliment my colleague from California. She has been the leader in this effort, as has the Senator from the State of Washington.

Mrs. FEINSTEIN. Madam President, before Senator CANTWELL is recognized, I ask unanimous consent Senator FITZGERALD of Illinois be added as an original cosponsor, and that he be called on to speak directly following Senator CANTWELL.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Washington.

Ms. CANTWELL. Madam President, I, too, rise in support of this very important legislation, the Feinstein-Cantwell-Wyden energy derivatives legislation. I thank my colleagues for articulating the importance passing this amendment.

It is no secret that the States of California, Oregon, and Washington have been greatly impacted by the high prices of energy that our consumers are still paying and that have had a very negative impact on our economies. That is why this legislation is so important.

I applaud Senator FEINSTEIN for her hard work in driving this legislation. Basically, this amendment closes a very dangerous loophole, which was actually created by Congress and which Enron may have used—I say "may" have used—to turn political influence into profit at the expense of consumers. That is why we must act today.

The Enron loophole created by the Commodity Futures Modernization Act actually allowed Enron Online and other companies like it to sell futures behind closed doors, without the regulatory oversight or the safeguards that this nation's ratepayers deserve.

At its core, our amendment allows the Commodity Futures Trading Commission to treat energy futures like all other regulated commodity futures. It does not give the CFTC any new powers that it does not already have when it is regulating other futures markets. This is a very important point. Our amendment places currently unregulated energy futures trading exchanges, such as Enron Online, under the CFTC's regulatory authority.

Closing this loophole, as Senator FEINSTEIN said, has the support of many organizations, such as NYMEX, Calpine, and Cambridge Energy Research Associates. But more importantly, consumers are counting on us. The Consumers Union, the Consumers Federation, and Public Interest Research Group all support this amendment. They support it for one very basic reason: They support it because it requires open books and transparency for markets that currently operate in secret. It is important because if there have been patterns of irregular energy trading, we want those patterns to be found and made abundantly clear.

What we are saying is that there should not be special rules for Enron. If agricultural products, minerals, and even certain other types of energy futures transactions are regulated by there CFTC, there is no good reason we should allow online energy trading exchanges to operate in the dark.

After all we have learned about Enron, shouldn't it be clear to all that exposing its trading activities to the light of day is essential? Closing the loopholes will open books and require transparency. It will give us the ability to do important things like compare Enron Online prices to competitors, compare forward markets with physical market pricing, and investigate the books of online traders to search for what those potential irregularities might be.

Being able to answer these questions will be incredibly valuable in reinforcing the strength and integrity of our energy markets. Why is this so important to the State of Washington? Many people may not realize that Enron continues to hold gigantic long-term contracts with utilities throughout the country, at least $900 million worth in my home State. We are now learning that these contracts may have been the result of market manipulation by Enron.

In one case alone, the Bonneville Power Administration has long-term contracts with Enron of over $700 million. At today's market price, those contracts would only cost $350 million. That means BPA—and that means, ultimately, Washington state ratepayers, who have to pay for those energy costs are paying Enron about $350 million more than the current market value.

Contracts like these have translated into unacceptably high utility bills for ratepayers throughout the West who deserve relief as soon as possible. That is why I have joined my colleagues in urging FERC to investigate and determine whether Enron manipulated these energy prices in the West, and if so, make sure that if these contracts are unjust and unreasonable, our consumers are let out of having to pay these high prices for the next 3 to 5 years.

Until we change this and require open books and transparency from Enron Online and businesses similar to it, the public will not be protected in the future for having the same kind of market manipulations, perhaps, happen to them. That is why passing this legislation is so important. We have to close the Enron loophole and restore the faith that the public needs to have in our energy markets—the faith that consumers deserve. They deserve to know that these entities are being regulated and are operating in the light of day.

I again thank my colleague from California who has worked so diligently on this important legislation, which is a key part of our energy strategy. We need to make sure and consumers need to believe that we are on the right track.

I yield the floor.

Mrs. FEINSTEIN. If the Senator from Illinois who is next under the unanimous consent agreement will yield for just a second, I thank Senator CANTWELL. She also is on the Energy and Natural Resources Committee. She also has been very concerned, very diligent, working very hard at what has been a very difficult onion to peel. I am very grateful for her leadership.

I ask unanimous consent to add Senator CORZINE as an original cosponsor. I believe he wants to speak to the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Illinois.

Mr. FITZGERALD. Madam President, I am pleased to rise in support of this amendment by my colleague from California. I support it and congratulate her for introducing it. Illinois, specifically Chicago, is home to some of the largest futures exchanges in the world. Certainly, I was very involved in the Commodity Exchange Act Reauthorization a couple of years ago. Since that time, in the wake of the Enron bankruptcy, the Enron exemption that allowed Enron Online to operate without any regulatory oversight has come to light, and it has drawn some criticism.

I say at the outset, I think probably Enron Online may not have had all that much to do with Enron's bankruptcy. I have also been very involved in the Enron investigations in the Senate, and as far as I can tell, Enron was running what amounts to a gigantic shell game or pyramid scheme, essentially borrowing money and booking borrowed money as income by filtering the borrowings through partnerships. They had the debt parked on the books of the off-the-balance-sheet partnerships rather than on their direct books.

At the end of the day, when Enron filed bankruptcy, it was because it had several billion dollars in indebtedness coming due that it, Enron, could not pay.

I don't know that Enron Online and their energy trading, per se, was responsible for it. I have seen many transactions that Enron engaged in that were simply borrowing money and reporting it as income. We will have to wait for a full autopsy. Nonetheless, I think it is appropriate to close the Enron exemption in the Commodities Exchange Act. That is what this bill does.

Right now, in an electronic exchange in which energy contracts are traded, that exchange is exempt from regulation under the Commodity Futures Trading Commission or by the FERC. FERC only comes in if energy is actually delivered, and in most cases energy is not actually delivered. You have contracts traded back and forth and many times an actual delivery of the commodity is put off.

I have been troubled to some extent by the wholesale exemption that is given to online futures exchanges. The exchanges at the Board of Trade and the Mercantile Exchange face a great deal of overhead to comply with their regulatory burden. I think that is appropriate. I think sometimes it is unfair to set up an offline exchange and say this is an offline exchange because online does not have any regulation. I like to see industries competing on a level playing field. I think that is what America is all about. I do not think there should be regulatory advantages given to one side or the other.

I do think this would be a protection for consumers, even sophisticated principals who may be trading energy contracts on electronic exchanges. I think there would be benefits by having some CFTC oversight. There would be greater transparency. It would be easier for prices to be discovered.

I think Senator FEINSTEIN's amendment accomplishes a great deal. It repeals the exemptions and exclusions for bilateral derivatives in multilateral markets in energy commodities. All would be again subject to direct CFTC oversight. That was the case prior to our reauthorization of the Commodities Exchange Act. We would correct that. Also, it ensures that energy dealers in derivatives markets cannot avoid full price transparency and escape regulatory oversight.

Third, the amendment subjects all multilateral markets and bilateral dealer markets in energy commodities to registration, transparency, disclosure, and reporting obligations and requires entities running online trading forums to maintain sufficient capital to carry out their operations. It seems very reasonable to me.

Fourth, parties engaging in bilateral energy transactions must keep books and records. That does not seem so onerous to me.

Fifth, all energy transactions not regulated by FERC would be regulated by the CFTC.

And sixth, the amendment requires FERC and the CFTC to meet quarterly and discuss how energy derivatives markets are functioning and affecting energy deliveries. I do think that is reasonable in light of the great runup we saw in energy prices last year, particularly in Senators FEINSTEIN and BOXER's great State of California.

It is unclear why the price rose so quickly and why then ultimately it plummeted again back to reasonable levels. Whether this amendment, had it been law at the time, would have prevented that I do not know. But I think it will promote greater price transparency. I think that can't hurt. I think there is a minimal burden here, and I think it is worthy public policy. I compliment my friend from California, and I am proud to stand in support of her amendment.

I thank the Chair.

The PRESIDING OFFICER. Who seeks recognition?

The Senator from New Jersey.

Mr. CORZINE. I thank the Chair.

I, too, rise to strongly support the amendment the Senator from California is offering to roll back this Enron exemption in the derivatives market. Being an old bond trader who operated in the derivatives markets for many years, the idea that we do not need basic registration of dealers, we do not need capital adequacy or capital rules, that there is no price transparency, whether in over-the-counter markets or on electronic exchanges, or there are not audit trails that are fundamental to any kind of regulation of financial transactions anywhere in the world, seems strange to me and offers an opportunity for those who want to take advantage of the lack of transparency and create patterns of manipulation to easily operate in these markets. It seems very strange that we pick a very narrow slice, the energy markets, to have such a gaping lack of transparency.

I have heard people say there is no creativity in markets, that they will not develop, there will not be the liquidity in overseeings. That is just flatout not the fact. If you look at the derivatives markets in financial securities, or financial instruments, you will see some of the deepest, broadest, most liquid markets in the world. As a matter of fact, confidence comes when the participants who enter into markets will know where prices are taking place, the price discovery mechanism is quite obvious, where there are audit trails, so that if there are differences of views about whether transactions were actually executed, you can go back and find out where those prices actually took place. And you know your counterparts have enough capital to be able to stand behind the transactions. And then you have some simple qualifications to be a participant in those markets.

I think all these are simple, straightforward fundamentals in finance 101 for anyone who deals with financial transactions, whether it is derivative transactions that relate to hog bellies, Treasury bills, or stocks, and no different for energy in my mind, and I find it incredibly lacking in consistency with our oversight regime which has produced maybe the broadest, deepest markets we have anywhere in the world, in the history of the world, frankly, and I see no reason why we should not have that applying to energy markets just as we do any other market.

On that basis, I strongly support the amendment. I think Senator FEINSTEIN is definitely on the right trail to produce markets that will provide consumer protection, protection against price manipulation, and a greater quality of activity in the underlying energy markets. I think they will be broader and deeper because of it.

So I am proud to stand in support of the amendment of the Senator from California.

Mrs. FEINSTEIN. Madam President, I thank the distinguished Senator from New Jersey for his support. In view of his background, his knowledge, and his expertise, I am particularly grateful for that support. It is one thing to stand here and feel in your gut what is right for the consumer, but it is another in the mystical world of finance. His wisdom and his knowledge hopefully will gain additional votes for this amendment. I am very grateful to the Senator. I thank him very much.

Madam President, I note the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The senior assistant bill clerk proceeded to call the roll.

Mr. BINGAMAN. Madam President, I ask unanimous consent the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BINGAMAN. Madam President, I ask unanimous consent the pending amendment be set aside so that I can send an amendment to the desk for consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2990 TO AMENDMENT NO. 2917

Mr. BINGAMAN. Madam President, I send an amendment to the desk.

The PRESIDING OFFICER. The clerk will report.

The senior assistant bill clerk read as follows:

The Senator from New Mexico [Mr. BINGAMAN], for himself and Mr. DOMENICI, proposes an amendment numbered 2990 to amendment No. 2917.

Mr. BINGAMAN. Madam President, I ask unanimous consent reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To promote collaboration between the United States and Mexico on research related to energy technologies)

After section 1413 insert the following:

SEC. 1414. UNITED STATES-MEXICO ENERGY TECHNOLOGY COOPERATION.

(a) FINDING.—Congress finds that the economic and energy security of the United States and Mexico is furthered through collaboration between the United States and Mexico on research related to energy technologies.

(b) PROGRAM.—

(1) IN GENERAL.—The Secretary, acting through the Assistant Secretary for Environmental Management, shall establish a collaborative research, development, and deployment program to promote energy efficient, environmentally sound economic development along the United States-Mexico border to—

(A) mitigate hazardous waste;

(B) promote energy efficient materials processing technologies that minimize environmental damage; and

(C) protect the public health.

(2) CONSULTATION.—The Secretary, acting through the Assistant Secretary for Environmental Management, shall consult with the Office of Energy Efficiency and Renewable Energy in carrying out paragraph (1)(B).

(c) PROGRAM MANAGEMENT.—The program under subsection (b) shall be managed by the Department of Energy Carlsbad Environmental Management Field Office.

(d) COST SHARING.—The cost of any project or activity carried out using funds provided under this section shall be shared as provided in section 1403.

(e) TECHNOLOGY TRANSFER.—In carrying out projects and activities under this section to mitigate hazardous waste, the Secretary shall emphasize the transfer of technology developed under the Environmental Management Science Program of the Department of Energy.

(f) INTELLECTUAL PROPERTY.—In carrying out this section, the Secretary shall comply with the requirements of any agreement entered between the United States and Mexico regarding intellectual property protection.

(g) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this section $5,000,000 for fiscal year 2003 and $6,000,000 for each of fiscal years 2004 through 2006, to remain available until expended.

Mr. BINGAMAN. Madam President, this is an amendment which tries to address some very serious health and energy production issues, environmental issues, along the 2,000-mile common border that we have with Mexico.

There are tire dumps in that region that routinely catch fire and which have been determined to breed airborne dengue fever, which is a major health risk that we will face in the next decade.

There are brick kilns that use wood and plastic and cause serious health-related problems in the metropolitan area of Juarez/El Paso. There are serious water contamination issues with regard to ground water along the United States-Mexico border.

This amendment, which I am offering on behalf of myself and Senator DOMENICI, is one which directs the transfer of Department of Energy environmental management technologies to help clean up many of these serious and pressing health-related problems along the border.

The amendment will develop joint research programs between U.S. and Mexican universities on technologies to help develop clean materials processing technologies such as leadless solders for microelectronics plants, techniques to control air pollution from border region heavy manufacturing plants, and energy-efficient methods to recover nonpotable water for irrigation.

This is an amendment that was passed unanimously as S. 397 in the last Congress, the 106th Congress. That was after we had a full markup of the legislation in the Energy Committee.

It is consistent with the current administration's views on developing close ties with Mexico in both the fields of environmental sciences and energy production.

It is a very good amendment, which I understand I will be given the opportunity to explain again tomorrow morning before a vote occurs. It is one of the amendments the majority leader has indicated he would like to have a vote on tomorrow morning.

So I will not, at this point, belabor the issue but indicate to my colleagues that it has been supported unanimously, on a bipartisan basis, in the prior Congress. It is a good piece of legislation and one that I would very much like to see added to this pending energy bill. I hope we will do that tomorrow morning when the issue comes up for a vote.

Madam President, with that, I once again yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BINGAMAN. Madam President, I ask unanimous consent the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2991 TO AMENDMENT NO. 2917

Mr. BINGAMAN. Madam President, I send an amendment to the desk on behalf of Senator AKAKA and ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, the pending amendment will be set aside, and the clerk will report.

The senior assistant bill clerk read as follows:

The Senator from New Mexico [Mr. BINGAMAN], for Mr. Akaka, proposes an amendment numbered 2991 to amendment No. 2917.

Mr. BINGAMAN. Madam President, I ask unanimous consent reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To modify the provision requiring an assessment of the dependence of the State of Hawaii on oil)

Strike section 1702 and insert the following:

SEC. 1702. ASSESSMENT OF DEPENDENCE OF STATE OF HAWAII ON OIL.

(a) ASSESSMENT.—The Secretary of Energy shall assess the economic implications of the dependence of the State of Hawaii on oil as the principal source of energy for the State, including—

(1) the short- and long-term prospects for crude oil supply disruption and price volatility and potential impacts on the economy of Hawaii;

(2) the economic relationship between oil-fired generation of electricity from residual fuel and refined petroleum products consumed for ground, marine, and air transportation;

(3) the technical and economic feasibility of increasing the contribution of renewable energy resources for generation of electricity, on an island-by-island basis, including—

(A) siting and facility configuration;

(B) environmental, operational, and safety considerations;

(C) the availability of technology;

(D) effects on the utility system, including reliability;

(E) infrastructure and transport requirements;

(F) community support; and

(G) other factors affecting the economic impact of such an increase and any effect on the economic relationship described in paragraph (2);

(4) the technical and economic feasibility of using liquefied natural gas to displace residual fuel oil for electric generation, including neighbor island opportunities, and the effect of such displacement on the economic relationship described in paragraph (2), including—

(A) the availability of supply;

(B) siting and facility configuration for onshore and offshore liquefied natural gas receiving terminals;

(C) the factors described in subparagraphs (B) through (F) of paragraph (3); and

(D) other economic factors;

(5) the technical and economic feasibility of using renewable energy sources (including hydrogen) for ground, marine, and air transportation energy applications to displace the use of refined petroleum products, on an island-by-island basis, and the economic impact of such displacement on the relationship described in paragraph (2); and

(6) an island-by-island approach to—

(A) the development of hydrogen from renewable resources; and

(B) the application of hydrogen to the energy needs of Hawaii.

(b) CONTRACTING AUTHORITY.—The Secretary may carry out the assessment under subsection (a) directly or, in whole or in part, through 1 or more contracts with qualified public or private entities.

(c) REPORT.—Not later than 300 days after the date of enactment of this Act, the Secretary shall prepare, in consultation with agencies of the State of Hawaii and other stakeholders, as appropriate, and submit to Congress, a report detailing the findings, conclusions, and recommendations resulting from the assessment.

(d) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as are necessary to carry out this section.

Mr. BINGAMAN. Madam President, this amendment makes technical corrections in section 1702 of the substitute bill that is before us, which requires the Secretary of Energy to study the economic risk posed by the dependence of Hawaii on oil as the State's principal source of energy.

The changes in the original text were proposed by the minority. They are acceptable to Senator AKAKA, who was the original proponent of section 1702. They have been cleared on both sides. So I urge that they be agreed to at this point.

The PRESIDING OFFICER. If there is no further debate, without objection, the amendment is agreed to.

The amendment (No. 2991) was agreed to.

Mr. BINGAMAN. Madam President, I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Ms. LANDRIEU. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. JOHNSON). Without objection, it is so ordered.

Ms. LANDRIEU. Mr. President, I know there are amendments that have been laid down and are open for discussion, but I want to take this opportunity to give a statement for the record in regard to the energy debate.

I will begin by thanking the chairman and our excellent leader, Senator BINGAMAN, for laying down a bill that is a real building block, a real stepping stone toward the kind of energy policy with which our Nation could grow and prosper. I thank him for including many of the issues I raised with him on behalf of the State of Louisiana and other petroleum- and gas-producing States, as well as provisions that Senator DOMENICI, Senator VOINOVICH, and I have worked on relating to electricity generation, expansion of nuclear energy, and others. He has been very open to many of the ideas we have suggested. The bill, however, is only a starting point.

I believe we have to build some additional provisions into this underlying bill.

To begin with, I am reminded of the words of Thomas Edison. He once said:

> Opportunity is missed by most people because it comes dressed up in overalls, and it looks like work.

I think, as we begin this energy debate, that is an appropriate quote of which to be mindful. The situation that presents itself here—energy policy—rarely captures the attention of Congress, but at this very moment it really is a wonderful opportunity for us. We have a real opportunity—an opportunity to impact our economy and our environmental and foreign policy, all through the adoption of an effective and coherent national energy policy. But getting there is going to require some real work and some real compromise.

I am concerned that this is an opportunity dressed up like hard work. I am hoping that the Senate is appropriately dressed. I am not quite sure. I know many of us have worked diligently, and, hopefully, with leadership on both sides and with strong leadership from the President, we can actually get a bill that makes sense for where our Nation is today—but, more importantly, where we need to be in the future.

The American people are ready for a different kind of energy policy. A recent poll found that three-fourths of the public believes that if we don't address our energy needs now, in 20 years Americans will not be able to live their lives in the way they choose. I think the American people, even prior to September 11, were very mindful of this fragile situation in which we find ourselves. But now, post-September 11, I know the people in my State are very concerned about our overdependence on foreign oil and energy sources. Of course, the American people are right. They recognize our vulnerability. This is the moment, and we must seize it.

I thank the chair of our committee again for his excellent work, and I thank Senator DASCHLE for bringing this bill to the floor for our consideration.

Many, including myself, have stated really inaccurately before that we don't have a national energy policy. Unfortunately, we do have one. The policy, whether expressed or implied, though, is perfectly clear. That policy, unfortunately, is that this Nation is to try to import as much cheap oil as possible. It doesn't seem to us that the sources of this imported oil matter much. All other national policies, such as human rights, conservation, and geopolitics, have seemingly taken a back seat to this overriding policy.

Let's look at the nations we are willing to deal with in order to secure cheap oil. The United States imports nearly 600,000 barrels of oil a day from Iraq. This is a country that we have been bombing an average of once a week. Can you imagine what the public would say if we were buying steel from Germany while undertaking the D-Day invasion? Yet that is the same kind of corrupting power that this short-sighted policy has on other interests.

I believe it is time—and I know many of my colleagues join me in saying this—for our country to forge a new "declaration of independence." About 226 years ago, we decided the people of our Nation needed to control their own destiny politically and economically. We need to do so again today. In order to have that control, we must have energy independence. While we will never achieve that 100 percent, we have to get much closer to that goal than we are today. Getting there is going to be tough, but that is what this debate is about. It is what it should be about; it is what the American people want this debate to be about.

While we are achieving that end, it may require efforts equal to the Manhattan project, or the Apollo project, but I believe it is within our grasp. Again, with strong Presidential leadership, with a bipartisan group of leaders on this floor and in the House, and with the support of the American people, I believe we are up to the challenge.

Our new declaration must center around three principles. I will start with the principle that I truly believe is the most important, and that is that this country must produce more energy. We must produce cleaner fossil fuels; more nuclear power generation; and, yes, more oil and gas by small and independent companies; and, as Senator BINGAMAN has advocated, significant new investments for alternative and renewable fuels. The occupant of the chair has advocated using biomass and other agriculturally-based projects.

There are tremendous incentives in this bill for us to expand our supply of energy so that we are not held hostage or captive by only one fuel supply. We have an ample and a varied supply, but that supply has to be increased, not decreased and diminished.

Secondly, we will conserve energy wherever possible, particularly in transportation and the industrial sector, and do it in a way that enhances our chances of creating jobs in America, not driving them away to other nations. We have to be more committed to a balance, of conserving our natural resources, conserving our clean environment, and making our environment even cleaner. But I strongly believe we have to focus as intently on conserving and expanding jobs here—in my State of Louisiana, in your State, Mr. President, and in all of our States—because if we are not careful, changes that we make can drive good, high-paying jobs away from our Nation to other nations. It is not fair to our workers, and it is not fair to our communities when there are good alternatives.

The principle of increased energy production really hearkens back to a principle deeply ingrained in our American culture; namely—and I remember studying this in my earliest grades—the dictum of Captain John Smith: "He who works eats; he who doesn't work doesn't eat." The Jamestown colony would not have survived without following that simple, clear and, in some ways, profound statement. We cannot allow mindless energy consumption on one hand while allowing a "not in my backyard," attitude toward energy production. We must restore balance to the equation. Louisiana makes more than its fair share of a contribution through oil and natural gas production.

We also house the Nation's Strategic Petroleum Reserve. However, while every State should be free to determine how to .make its contribution—solar energy perhaps from New Mexico, hydroelectric power from Washington, clean coal plants from West Virginia—every State should be free to make its choices, but every State must make a contribution.

If we are consuming 26 percent of the world's oil supply but producing only a fraction, we clearly are eating without working. Sixty-five percent of this Nation's energy supply comes from oil and gas. Yet States continue to express a reluctance to contribute their natural resources to our common needs. These natural resources belong to all the people of our Nation. Yet we see a policy permitting repeal of laws that were strict about using natural resources for our common need, which is real and I would say urgent.

It is important to contrast this with our allies in Europe who have a reputation for being more environmentally sensitive. While we have moratoria on drilling for oil and gas all over this Nation, from the west coast to the east coast, and in parts of the Gulf of Mexico, France has high-sulfur petroleum production in Paris—in Paris; not in the countryside but in Paris. The United Kingdom, the Netherlands, and Norway all permit offshore oil and gas drilling in their fishing grounds, some of the finest fishing grounds in the world. Yet there is a tremendous amount of environmentally sensitive, very strictly regulated production operating off those shores.

Such actions would set our environmental community in this Nation in a frenzy. In Europe, however, they have managed to accept a fundamental reality: If you need oil and gas, you must produce it. What is more, every possibility needs to be on the table. If you need more power from nuclear, you have to build the nuclear powerplants to produce it. You cannot just wish it so and turn on the lights.

Our allies have recognized this, but in this country we have not quite grasped this reality. We are seeing a trend toward creating something like Fritz Lang's Metropolis, but on a statewide scale, with some States getting to live in the clouds with an unspoiled environment, consuming to their heart's desire, while other States must live on Earth and bear the brunt of this carefree lifestyle.

This growing dichotomy must stop. We must have more domestic production to balance out our consumption. It is just as simple as that.

The second principle of our declaration, of course, is conservation. We must consume less. Everyone knows the American economy is the largest consumer of energy in the world.

Everyone also understands that we have the largest gross domestic product in the world. While we produce more goods than any other people on Earth and in the history of the world, the ratio between how much we produce to how much energy we use to produce it is the worst in the world. In other words, we are hugely inefficient when it comes to the use of energy. This is not only an environmental dilemma, but it is an economic dilemma as well.

We have squeezed efficiency out of our American workers through greater productivity gains, longer work hours, a more flexible and skilled workforce, and particularly new technologies. However, we have not squeezed enough efficiency out of our power distribution networks to make U.S. manufacturing cheaper and, as a result, more competitive.

I congratulate Senator BINGAMAN, again, for making this a focus of this legislation. It is truly one of the best pieces of this legislation, and, if we can build on this piece, it will be a real step in the right direction. I look forward to working with him in this debate. Already we have accepted several amendments toward this end that have strengthened this position so that we can make it even stronger.

We must, as I said in the first principle, we must be committed to robust domestic production. Then we also have to be committed to real efficiencies in our electric market, on which Senator VOINOVICH and others have worked so diligently.

Finally, we must institute the third principle, and that is, if you are taking on the burden of production, whether it is in Louisiana, which produces oil and gas and other energies for this Nation, or other States, our Nation should compensate those regions fairly.

Louisiana is the second-highest energy-producing State in the country. We have 16 percent of the total refining capacity, and we supply about 25 percent of all domestic petroleum, half of the imported liquefied natural gas, and about 13 percent of the crude oil shipped into the United States comes through Louisiana. Yet this contribution, while my State is proud of it, has not come without cost to our coast, to our environment, and our infrastructure.

In the past 50 years, Louisiana has lost over 1,000 square miles of its coast. Let me be clear, this loss is not 100 percent directly related to this activity. This activity has been a portion of this loss. There have been many other factors. But still the facts remain that because of the drainage and the shipping we provide for the Nation through the Mississippi River and the Delta so that all the Great Plains States and our great interior can ship products out and receive products, as well as the production taking place in this fragile environment, it has had some environmental consequences.

This loss represents 80 percent of all wetlands loss within the United States. While my State suffers these losses, we contribute to the Federal Treasury anywhere from $2 billion to $4 billion a year, just through oil and gas production. This figure does not take into account the taxes and wealth and prosperity generated for the whole Nation because of the shipping and the commerce allowed by our rivers.

In fact, since the year I was born, 1955, our State and other coastal States have contributed $120 billion to the Federal Treasury, and Louisiana has received nothing of this $120 billion directly. We have received less than 1 percent of the money that has come into the Treasury from offshore oil and gas drilling and yet bear most of the cost of the infrastructure required.

Louisiana's coastal wetlands contribute 28 percent to the total volume of U.S. fisheries. Our coastal wetlands are being lost at a rate of one football field every 15 minutes. Let me restate that: One football field every 15 minutes.

In short, we should sometimes ask ourselves: Why are we doing this? Why don't others do it? We have developed a system of retrieving our natural resources. In the old days, we did not do a very good job of it, but in these days of new horizontal drilling, directional drilling, with new technologies, new rules and regulations, some local and some national, we have learned to pool our natural resources for the benefit of our State and our Nation and minimize that environmental footprint.

We want to continue to do that, but we cannot continue under the present regime or set of circumstances unless we are more fairly compensated.

Interior States that produce their natural resources, whether it is to contribute to the energy sector or other sectors, receive 50 percent of their royalties in revenues. Two years ago the State of Wyoming, through severance taxes that levied from their mining operations, kept $200 million and spent it as they would to reinvest in their State and the local communities that supported that mining operation.

Yet Louisiana and the Gulf Coast States that bear a tremendous responsibility for the production now of oil and gas do not share a penny of those offshore revenues, and yet serve as a platform for that production.

The helicopters cannot get into the central gulf unless they take off from somewhere. The pipes, the equipment, the computers, the people, the technology are launched from the coast of Texas or Louisiana or Mississippi or Alabama.

I am going to be laying down amendments—there is already a provision in this bill, thanks to Senator BINGAMAN—that would authorize for the very first time a coastal impact assistance provision that will give Louisiana and the Gulf Coast States a share of these revenues. It is an authorization. I believe we need a direct appropriation, and I will be working to strengthen that provision. But for the first time, the Senate, I hope, will accept this responsibility and fashion part of our overriding energy principle or declaration of independence that if you are going to produce, you should be rewarded for that production. Again, produce what you will, produce what you can, produce what you choose, but whatever you do, you should be rewarded or compensated for that production.

Frankly, for those States that refuse to produce and only want to consume, then I think we should think very strongly about that situation and what we might do to encourage those States to do more to meet their obligation. It did not work 226 years ago, and that kind of attitude is not going to work today. So for producing States, I believe this is a very strong policy.

I look forward to this debate. It is a rare moment in our history. I hope there is enough pressure that can be brought to bear to move us to make the kind of compromises necessary. It is time for us to declare our independence. We will not get there 100 percent, but we need to get much closer to independence than we are today because not only is our economy at stake, our environment is as well. The security of our Nation rests on how successful we will be in getting more independent.

If another tragedy strikes or, shall I say, when another tragedy strikes, with the new and emerging threats confronting our Nation, we can make wise decisions based on our principles, based on America's economic interests, based on what is right in terms of leading the Nation, and not be held hostage because we have simply not learned how to either live within our means so we can have the kind of independence necessary to make wise decisions for ourselves as we help to lead this world.

This is a very important debate. I have really appreciated working again with Senator DOMENICI. He has almost singlehandedly reengaged us in understanding the importance of nuclear energy for our Nation—it is 20 percent of the source today—and rallied many different entities to realize we have safer nuclear reactors. The new technologies are quite promising, with the production of hydrogen as well as the traditional fuels and what that might mean to help us reach that independence.

Senator VOINOVICH and I will continue to work on building an electric grid for this Nation much like our transportation grid, our interstate system. No one would argue that without the interstate system our economy could not grow. We could not move our products. We could not build our businesses. We could not have the international trade that is now the lifeblood of our Nation. That is the kind of electricity system that we need to create.

It was not created that way initially. It was all State developed, regionally developed, and we have to now open that up so our electricity and power can get on onramps, off offramps, with limited speed bumps, and move throughout this Nation to create the kind of conservation and efficiency our businesses need to compete in the world.

As I said, there are many goals and objectives. I have laid out some of these principles, and I look forward to advocating for the people of my State and for many States that are producing oil and gas to make sure we are justly compensated so we can take those just compensations and reinvest for our children and for our grandchildren.

One day these oil and gas wells are going dry up. We wanted to make sure we were good stewards of the taxes that were levied on those oil and gas wells. Therefore, we have laid down new investments for cleaner technologies, for new opportunities for Louisiana and for our Nation.

Mr. GRASSLEY. Mr. President, I am glad to have the opportunity today to speak on the critical issue of energy security. In order to secure our country's economic and national security, we need to have a balanced energy plan that protects the environment, supports the needs of our growing economy, and reduces our dependence on foreign sources of energy.

Every man, woman, and child in the United States is a stakeholder when it comes to developing a responsible, balanced, stable, long-term energy policy.

When natural gas prices soared last winter, low-income families and the elderly were the hardest hit. Not too long ago, $2-per-gallon gas took a great toll on our economy. Trucking companies went bankrupt, small businesses and factories were forced to lay off workers, and farmers suffered a devastating blow of spiked input costs.

We found ourselves, after 8 years of inaction by the Clinton administration, without a comprehensive energy policy. I questioned officials from the Clinton administration and encouraged them to provide to Congress a plan to deal with the rising cost of energy. I even authored an amendment to require them to compile a report detailing their plan to address the energy shortage. I never received such a plan.

I was pleased that President Bush, soon after taking office, pledged to make the energy security of our country one of his highest priorities.

It is unfortunate that since the release of the President's National Energy Policy report last year, it took over 10 months for the Senate to begin this debate. Even more troubling is the process by which this bill was put together. In October, the majority leader and the chairman of the Energy Committees chose to remove this bill from further consideration by the committee, and instead put together this bill without the input of the minority members of the Senate Energy Committee, and that is also unfortunate.

The events of September 11 have made very clear to Americans how important it is to enhance our energy independence. We can longer afford to allow our dangerous reliance on foreign sources of oil to continue.

It is time to get serious about implementing energy efficiency and conservation efforts, investing in alternative, renewable fuels and improving domestic production of traditional resources.

I support a comprehensive energy policy consisting of conservation efforts, development of renewable and alternative energy resources, and domestic production of traditional sources of energy.

As my colleagues well know, I have long been a supporter of alternative and renewable sources of energy as a way of protecting our environment and increasing our energy independence.

In 1992, I authored legislation to provide the first-ever tax incentive for wind energy production. In 1997, I led the successful effort to extend for 10 years the tax credit for corn-based ethanol.

The energy bill we are currently debating includes a number of provisions regarding conservation and renewable energy development. For example, included in this legislation is a renewable fuels provision which requires a small percentage of our Nation's fuel supply to be provided by renewable fuels such as ethanol and biodiesel.

I strongly support the production of renewable domestic fuels, particularly ethanol and biodiesel. As domestic, renewable sources of energy, ethanol and biodiesel can increase fuel supplies, reduce our dependence on foreign oil, and increase our national and economic security.

I thank the majority leader and Chairman BINGAMAN for including this renewable fuels standard, which is very similar to the standard that the Senate Energy Committee Republicans supported early last fall.

The renewable fuels standard, supported by a broad coalition, is good for America's farmers, good for the environment, good for consumers, and good for national security.

However, while this bill addresses conservation efforts and alternative energy, it falls well short on domestic energy development of traditional sources. Critical provisions to support new development of nuclear energy and domestic oil and gas exploration and production were unfortunately left out of the package.

At a time when the United States is dependent on foreign countries for over 58 percent of our oil needs, this legislation does little to support development of resources on our own land. We currently import more than 750,000 barrels of oil a day from Saddam Hussein's Iraq. Yet this bill remains silent on the development of just 2,000 acres of land in Alaska that could supply the equivalent of the oil we import from Saudi Arabia for 30 years.

We must do more to develop, in an environmentally sensitive way, the resources that God gave us. I look forward to working with my colleagues to ensure that the bill before the Senate does more to protect our national security, and reduce our dependence on foreign oil.

I also look forward to debate on an amendment that I plan to offer with Senator BAUCUS. As ranking member of the Finance Committee, I have had the opportunity to work with Chairman BAUCUS to develop an energy-related tax amendment.

Unlike the underlying bill, this amendment strikes a good balance between conventional energy sources, alternative and renewable energy, and conservation.

Among other things, it includes provisions for the development of renewable sources of energy like wind and biomass, incentives for energy efficient appliances and homes, and incentives for the production of non-conventional sources of traditional oil and gas.

I believe the Finance Committee did a good job to address our nation's energy security in a balanced and comprehensive way, and I look forward to the Senate's consideration of the energy-related tax package.

In conclusion, I am please that the Senate has finally begun to address an issue with such a direct impact on our national and economic security.

For the sake of our children and our grandchildren, we must implement conservation efforts, invest in alternative and renewable energy, and improve development and production of domestic oil and natural gas resources. I hope that during this process we can develop a bill that is truly comprehensive.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. REID. Madam President, I ask unanimous consent the order for the quorum call be rescinded.

The PRESIDING OFFICER (Ms. CANTWELL). Without objection, it is so ordered.

MORNING BUSINESS

Mr. REID. Madam President, I ask unanimous consent the Senate proceed to a period of morning business, with Senators allowed to speak therein for a period not to exceed 10 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. How long does the Senator from Maine wish to speak?

Ms. COLLINS. If I could be recognized for 10 minutes.

Mr. REID. If the Senator needs more time, no problem.

Ms. COLLINS. I thank the leader for his assistance.

The PRESIDING OFFICER. The Senator from Maine.

Ms. COLLINS. Madam President, I also appreciate you staying in the chair. I will try not to unduly delay you.

THE ECONOMIC RECOVERY PACKAGE

Ms. COLLINS. Madam President, I rise today to express my support for the Job Creation and Worker Assistance Act, which passed the House earlier today by an overwhelming vote. I am so pleased that it appears we are on the verge of finally passing a very balanced, reasonable, and bipartisan bill to keep our economy on the road to recovery.

It has been a long struggle, back and forth, between the House and the Senate and between the two parties, and now it is great to see us all coming together on a consensus bill.

I thank the House leadership, and in particular Chairman BILL THOMAS for all the work he has done in putting together this excellent legislation.

I am particularly pleased that the bill includes two provisions about which I care a great deal.

The first is the extension of unemployment compensation for displaced workers for an additional 13 weeks. Last October, I introduced the first bipartisan bill to extend unemployment benefits for workers who had exhausted their regular State benefits and yet still have been unable to find new work or to be rehired because of the weak economy. These workers need our help.

We know that in January alone some 370,000 unemployed workers exhausted their benefits, up 63 percent from the year before. The situation is similar in Maine. We experienced a large increase in the number of unemployed workers who have been unable to find new work and have exhausted their normal 26 weeks of State unemployment benefits.

This extension could help some 3 million unemployed workers, many of whom lost their jobs either as a direct or indirect result of September 11 or have been affected by the recession that our country just now seems to be on the verge of pulling out of.

I know the Presiding Officer has been very concerned about the large number of unemployed Americans living in her State which has experienced one of the higher jumps in unemployment insurance. I know this is a provision she has been a strong advocate for as well.

The second provision on which I want to comment tonight is one that is very near and dear to me. It is a provision I have worked on for the past 3 years, originally with Senators Coverdell and KYL, and more recently with Senators WARNER and LANDRIEU.

Just Tuesday, President Bush spoke about the need to support our elementary and secondary education teachers, to help them bring out the best in their students, our children. Now we are close to passing another milestone in our journey toward the goal of supporting our teachers.

The provision to which I am referring is known as the teacher tax provision. It is a provision that has been included in the economic recovery package that would establish an above-the-line deduction of up to $250 to compensate teachers for a small part of what they invest in our children.

This tax deduction would be available to teachers who dip deep into their own pocket in order to buy supplies, materials, or books for their classrooms. This above-the-line deduction would be available for teachers, teacher's aides, principals, and counselors to help reimburse them in just a small way for the books, supplies, and equipment they purchase for their students.

I notice the Senator from Iowa is in the Chamber. He has been very helpful with this provision as well. I thank him, too.

Just last year, we passed landmark legislation reauthorizing the Elementary and Secondary Education Act. A principal goal of this bill is to promote teacher excellence. We know that other than involved parents, the most important predictor of a student's success is a quality teacher.

I have visited close to 100 schools in the State of Maine, and I have seen firsthand how dedicated our teachers are. They deserve our support. This is a way we can recognize the selfless efforts of our teachers and the financial sacrifices they make in entering the field of teaching and also in making purchases to improve the classrooms where they teach.

According to a study by the National Education Association, the average classroom teacher spends more than $400 a year out of his or her own pocket in order to buy supplies or materials or books for the classroom. This sacrifice is typical of the dedication of America's teachers to their students.

So often teachers in Maine and throughout the country spend their own money to better the classroom experiences of their students. Let me cite an example. I have spoken to dozens of teachers who have told me about their efforts to improve the quality of their teaching by giving their students access to supplies and other materials they would not otherwise have.

One example is Idella Harter. She is president of the Maine Education Association. One year, Idella saved all of her receipts from the purchases of classroom materials. She started adding up the receipts and was startled to discover she had spent over $1,000 of her own money to enrich the educational experience of her students. She told me she decided after she got to $1,000, she had better stop counting.

The relief our Tax Code now provides to our teachers is simply not sufficient because most teachers do not itemize so they do not get the benefit of the tax deduction for the supplies for their classroom. By changing the system so that we now have an above-the-line tax deduction, we will help many more teachers. By allowing them to take an above-the-line deduction for classroom expenses, this provision takes a fair, progressive approach that will provide just a bit of thanks and a little bit of incentive and financial relief to our schoolteachers. It will also encourage additional spending on classroom supplies.

The teacher tax provision of the Job Creation and Worker Assistance Act helps teachers to go that extra mile for their students. We have all seen them. We know how dedicated they are. We know the difference they have made in our own lives. As President Bush has eloquently noted, teachers sometimes lead with their hearts and pay with their wallets. This provision would reimburse educators for a small part of what they invest in our children's future.

I hope we will clear this bill very shortly and pass it either tonight or first thing tomorrow morning. I hope all of my colleagues will join in a strong vote for this important legislation.

I thank the Presiding Officer for allowing me to comment on these two important provisions. I am delighted to see two of my top legislative priorities on the verge of being signed into law.

I yield the floor.

JOB CREATION AND WORKER ASSISTANCE ACT OF 2002

The PRESIDING OFFICER. The majority leader is recognized.

Mr. DASCHLE. Madam President, I am about to propound a unanimous consent request. I have been in consultation with the Republican leader, with the distinguished Senator from Iowa, and I know of no objections to the request. So at this time I will make it.

I ask that the Chair now lay before the Senate a message from the House on H.R. 3090 and that on Friday, March 8, immediately following the usual opening ceremony, the Senate resume consideration of the message; that upon disposition of that message, the Senate immediately resume consideration of S. 517 and the McCain amendment No. 2979; and there be 2 minutes of debate equally divided and controlled, with no second-degree amendments in order prior to a vote in relation to the McCain amendment.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

The Chair laid before the Senate the following message from the House of Representatives:

Resolved, That the House agree to the amendment of the Senate to the bill (H.R. 3090) entitled "An Act to provide tax incentives for economic recovery", with the following House amendment to Senate amendment:

In the amendment of the Senate, strike the matter proposed to be inserted by the Senate and insert the following:

SECTION 1. SHORT TITLE; ETC.

(a) SHORT TITLE.—This Act may be cited as the "Job Creation and Worker Assistance Act of 2002".

(b) REFERENCES TO INTERNAL REVENUE CODE OF 1986.—Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1986.

(c) TABLE OF CONTENTS.—

Sec. 1. Short title; etc.

TITLE I—BUSINESS PROVISIONS

Sec. 101. Special depreciation allowance for certain property acquired after September 10, 2001, and before September 11, 2004.
Sec. 102. Carryback of certain net operating losses allowed for 5 years; temporary suspension of 90 percent AMT limit.

TITLE II—UNEMPLOYMENT ASSISTANCE

Sec. 201. Short title.
Sec. 202. Federal-State agreements.
Sec. 203. Temporary extended unemployment compensation account.
Sec. 204. Payments to States having agreements for the payment of temporary extended unemployment compensation.
Sec. 205. Financing provisions.
Sec. 206. Fraud and overpayments.
Sec. 207. Definitions.
Sec. 208. Applicability.
Sec. 209. Special Reed Act transfer in fiscal year 2002.

TITLE III—TAX INCENTIVES FOR NEW YORK CITY AND DISTRESSED AREAS

Sec. 301. Tax benefits for area of New York City damaged in terrorist attacks on September 11, 2001.

TITLE IV—MISCELLANEOUS AND TECHNICAL PROVISIONS

Subtitle A—General Miscellaneous Provisions

Sec. 401. Allowance of electronic 1099's.
Sec. 402. Excluded cancellation of indebtedness income of S corporation not to result in adjustment to basis of stock of shareholders.
Sec. 403. Limitation on use of nonaccrual experience method of accounting.
Sec. 404. Exclusion for foster care payments to apply to payments by qualified placement agencies.

Sec. 405. Interest rate range for additional funding requirements.
Sec. 406. Adjusted gross income determined by taking into account certain expenses of elementary and secondary school teachers.

Subtitle B—Technical Corrections

Sec. 411. Amendments related to Economic Growth and Tax Relief Reconciliation Act of 2001.
Sec. 412. Amendments related to Community Renewal Tax Relief Act of 2000.
Sec. 413. Amendments related to the Tax Relief Extension Act of 1999.
Sec. 414. Amendments related to the Taxpayer Relief Act of 1997.
Sec. 415. Amendment related to the Balanced Budget Act of 1997.
Sec. 416. Other technical corrections.
Sec. 417. Clerical amendments.
Sec. 418. Additional corrections.

TITLE V—SOCIAL SECURITY HELD HARMLESS; BUDGETARY TREATMENT OF ACT

Sec. 501. No impact on social security trust funds.
Sec. 502. Emergency designation.

TITLE VI—EXTENSIONS OF CERTAIN EXPIRING PROVISIONS

Sec. 601. Allowance of nonrefundable personal credits against regular and minimum tax liability.
Sec. 602. Credit for qualified electric vehicles.
Sec. 603. Credit for electricity produced from certain renewable resources.
Sec. 604. Work opportunity credit.
Sec. 605. Welfare-to-work credit.
Sec. 606. Deduction for clean-fuel vehicles and certain refueling property.
Sec. 607. Taxable income limit on percentage depletion for oil and natural gas produced from marginal properties.
Sec. 608. Qualified zone academy bonds.
Sec. 609. Cover over of tax on distilled spirits.
Sec. 610. Parity in the application of certain limits to mental health benefits.
Sec. 611. Temporary special rules for taxation of life insurance companies.
Sec. 612. Availability of medical savings accounts.
Sec. 613. Incentives for Indian employment and property on Indian reservations.
Sec. 614. Subpart F exemption for active financing.
Sec. 615. Repeal of requirement for approved diesel or kerosene terminals.
Sec. 616. Reauthorization of TANF supplemental grants for population increases for fiscal year 2002.
Sec. 617. 1-year extension of contingency fund under the TANF program.

TITLE I—BUSINESS PROVISIONS

SEC. 101. SPECIAL DEPRECIATION ALLOWANCE FOR CERTAIN PROPERTY ACQUIRED AFTER SEPTEMBER 10, 2001, AND BEFORE SEPTEMBER 11, 2004.

(a) IN GENERAL.—Section 168 (relating to accelerated cost recovery system) is amended by adding at the end the following new subsection:

"(k) SPECIAL ALLOWANCE FOR CERTAIN PROPERTY ACQUIRED AFTER SEPTEMBER 10, 2001, AND BEFORE SEPTEMBER 11, 2004.—

"(1) ADDITIONAL ALLOWANCE.—In the case of any qualified property—

"(A) the depreciation deduction provided by section 167(a) for the taxable year in which such property is placed in service shall include an allowance equal to 30 percent of the adjusted basis of the qualified property, and

"(B) the adjusted basis of the qualified property shall be reduced by the amount of such deduction before computing the amount otherwise allowable as a depreciation deduction under this chapter for such taxable year and any subsequent taxable year.

"(2) QUALIFIED PROPERTY.—For purposes of this subsection—

"(A) IN GENERAL.—The term 'qualified property' means property—

"(i)(I) to which this section applies which has a recovery period of 20 years or less,

"(II) which is computer software (as defined in section 167(f)(1)(B)) for which a deduction is allowable under section 167(a) without regard to this subsection,

"(III) which is water utility property, or

"(IV) which is qualified leasehold improvement property,

"(ii) the original use of which commences with the taxpayer after September 10, 2001,

"(iii) which is—

"(I) acquired by the taxpayer after September 10, 2001, and before September 11, 2004, but only if no written binding contract for the acquisition was in effect before September 11, 2001, or

"(II) acquired by the taxpayer pursuant to a written binding contract which was entered into after September 10, 2001, and before September 11, 2004, and

"(iv) which is placed in service by the taxpayer before January 1, 2005, or, in the case of property described in subparagraph (B), before January 1, 2006.

"(B) CERTAIN PROPERTY HAVING LONGER PRODUCTION PERIODS TREATED AS QUALIFIED PROPERTY.—

"(i) IN GENERAL.—The term 'qualified property' includes property—

"(I) which meets the requirements of clauses (i), (ii), and (iii) of subparagraph (A),

"(II) which has a recovery period of at least 10 years or is transportation property, and

"(III) which is subject to section 263A by reason of clause (ii) or (iii) of subsection (f)(1)(B) thereof.

"(ii) ONLY PRE-SEPTEMBER 11, 2004, BASIS ELIGIBLE FOR ADDITIONAL ALLOWANCE.—In the case of property which is qualified property solely by reason of clause (i), paragraph (1) shall apply only to the extent of the adjusted basis thereof attributable to manufacture, construction, or production before September 11, 2004.

"(iii) TRANSPORTATION PROPERTY.—For purposes of this subparagraph, the term 'transportation property' means tangible personal property used in the trade or business of transporting persons or property.

"(C) EXCEPTIONS.—

"(i) ALTERNATIVE DEPRECIATION PROPERTY.—The term 'qualified property' shall not include any property to which the alternative depreciation system under subsection (g) applies, determined—

"(I) without regard to paragraph (7) of subsection (g) (relating to election to have system apply), and

"(II) after application of section 280F(b) (relating to listed property with limited business use).

"(ii) QUALIFIED NEW YORK LIBERTY ZONE LEASEHOLD IMPROVEMENT PROPERTY.—The term 'qualified property' shall not include any qualified New York Liberty Zone leasehold improvement property (as defined in section 1400L(c)(2)).

"(iii) ELECTION OUT.—If a taxpayer makes an election under this clause with respect to any class of property for any taxable year, this subsection shall not apply to all property in such class placed in service during such taxable year.

"(D) SPECIAL RULES.—

"(i) SELF-CONSTRUCTED PROPERTY.—In the case of a taxpayer manufacturing, constructing, or producing property for the taxpayer's own use, the requirements of clause (iii) of subparagraph (A) shall be treated as met if the taxpayer begins manufacturing, constructing, or producing the property after September 10, 2001, and before September 11, 2004.

"(ii) SALE-LEASEBACKS.—For purposes of subparagraph (A)(ii), if property—

"(I) is originally placed in service after September 10, 2001, by a person, and

"(II) sold and leased back by such person within 3 months after the date such property was originally placed in service,

such property shall be treated as originally placed in service not earlier than the date on which such property is used under the leaseback referred to in subclause (II).

"(E) COORDINATION WITH SECTION 280F.—For purposes of section 280F—

"(i) AUTOMOBILES.—In the case of a passenger automobile (as defined in section 280F(d)(5)) which is qualified property, the Secretary shall increase the limitation under section 280F(a)(1)(A)(i) by $4,600.

"(ii) LISTED PROPERTY.—The deduction allowable under paragraph (1) shall be taken into account in computing any recapture amount under section 280F(b)(2).

"(F) DEDUCTION ALLOWED IN COMPUTING MINIUMUM TAX.—For purposes of determining alternative minimum taxable income under section 55, the deduction under subsection (a) for qualified property shall be determined under this section without regard to any adjustment under section 56.

"(3) QUALIFIED LEASEHOLD IMPROVEMENT PROPERTY.—For purposes of this subsection—

"(A) IN GENERAL.—The term 'qualified leasehold improvement property' means any improvement to an interior portion of a building which is nonresidential real property if—

"(i) such improvement is made under or pursuant to a lease (as defined in subsection (h)(7))—

"(I) by the lessee (or any sublessee) of such portion, or

"(II) by the lessor of such portion,

"(ii) such portion is to be occupied exclusively by the lessee (or any sublessee) of such portion, and

"(iii) such improvement is placed in service more than 3 years after the date the building was first placed in service.

"(B) CERTAIN IMPROVEMENTS NOT INCLUDED.—Such term shall not include any improvement for which the expenditure is attributable to—

"(i) the enlargement of the building,

"(ii) any elevator or escalator,

"(iii) any structural component benefiting a common area, and

"(iv) the internal structural framework of the building.

"(C) DEFINITIONS AND SPECIAL RULES.—For purposes of this paragraph—

"(i) COMMITMENT TO LEASE TREATED AS LEASE.—A commitment to enter into a lease shall be treated as a lease, and the parties to such commitment shall be treated as lessor and lessee, respectively.

"(ii) RELATED PERSONS.—A lease between related persons shall not be considered a lease. For purposes of the preceding sentence, the term 'related persons' means—

"(I) members of an affiliated group (as defined in section 1504), and

"(II) persons having a relationship described in subsection (b) of section 267; except that, for purposes of this clause, the phrase '80 percent or more' shall be substituted for the phrase 'more than 50 percent' each place it appears in such subsection.".

(b) EFFECTIVE DATE.—The amendments made by this section shall apply to property placed in service after September 10, 2001, in taxable years ending after such date.

SEC. 102. CARRYBACK OF CERTAIN NET OPERATING LOSSES ALLOWED FOR 5 YEARS; TEMPORARY SUSPENSION OF 90 PERCENT AMT LIMIT.

(a) IN GENERAL.—Paragraph (1) of section 172(b) (relating to years to which loss may be carried) is amended by adding at the end the following new subparagraph:

"(H) In the case of a taxpayer which has a net operating loss for any taxable year ending during 2001 or 2002, subparagraph (A)(i) shall be applied by substituting '5' for '2' and subparagraph (F) shall not apply.".

(b) ELECTION TO DISREGARD 5-YEAR CARRYBACK.—Section 172 (relating to net operating loss deduction) is amended by redesignating subsection (j) as subsection (k) and by inserting after subjection (i) the following new subsection:

"(j) ELECTION TO DISREGARD 5-YEAR CARRYBACK FOR CERTAIN NET OPERATING LOSSES.—Any taxpayer entitled to a 5-year carryback under subsection (b)(1)(H) from any loss year may elect to have the carryback period with respect to such loss year determined without regard to subsection (b)(1)(H). Such election shall be made in such manner as may be prescribed by the Secretary and shall be made by the due date (including extensions of time) for filing the taxpayer's return for the taxable year of the net operating loss. Such election, once made for any taxable year, shall be irrevocable for such taxable year.".

(c) TEMPORARY SUSPENSION OF 90 PERCENT LIMIT ON CERTAIN NOL CARRYOVERS.—

(1) IN GENERAL.—Subparagraph (A) of section 56(d)(1) (relating to general rule defining alternative tax net operating loss deduction) is amended to read as follows:

"(A) the amount of such deduction shall not exceed the sum of—

"(i) the lesser of—

"(I) the amount of such deduction attributable to net operating losses (other than the deduction attributable to carryovers described in clause (ii)(I)), or

"(II) 90 percent of alternative minimum taxable income determined without regard to such deduction, plus

"(ii) the lesser of—

"(I) the amount of such deduction attributable to the sum of carrybacks of net operating losses for taxable years ending during 2001 or 2002 and carryforwards of net operating losses to taxable years ending during 2001 and 2002, or

"(II) alternative minimum taxable income determined without regard to such deduction reduced by the amount determined under clause (i), and".

(2) EFFECTIVE DATE.—The amendment made by this subsection shall apply to taxable years ending before January 1, 2003.

(d) EFFECTIVE DATE.—Except as provided in subsection (c), the amendments made by this section shall apply to net operating losses for taxable years ending after December 31, 2000.

TITLE II—UNEMPLOYMENT ASSISTANCE

SEC. 201. SHORT TITLE.

This title may be cited as the "Temporary Extended Unemployment Compensation Act of 2002".

SEC. 202. FEDERAL-STATE AGREEMENTS.

(a) IN GENERAL.—Any State which desires to do so may enter into and participate in an agreement under this title with the Secretary of Labor (in this title referred to as the "Secretary"). Any State which is a party to an agreement under this title may, upon providing 30 days' written notice to the Secretary, terminate such agreement.

(b) PROVISIONS OF AGREEMENT.—Any agreement under subsection (a) shall provide that the State agency of the State will make payments of temporary extended unemployment compensation to individuals who—

(1) have exhausted all rights to regular compensation under the State law or under Federal law with respect to a benefit year (excluding any benefit year that ended before March 15, 2001);

(2) have no rights to regular compensation or extended compensation with respect to a week under such law or any other State unemployment compensation law or to compensation under any other Federal law;

(3) are not receiving compensation with respect to such week under the unemployment compensation law of Canada; and

(4) filed an initial claim for regular compensation on or after March 15, 2001.

(c) EXHAUSTION OF BENEFITS.—For purposes of subsection (b)(1), an individual shall be deemed to have exhausted such individual's rights to regular compensation under a State law when—

(1) no payments of regular compensation can be made under such law because such individual has received all regular compensation available to such individual based on employment or wages during such individual's base period; or

(2) such individual's rights to such compensation have been terminated by reason of the expiration of the benefit year with respect to which such rights existed.

(d) WEEKLY BENEFIT AMOUNT, ETC.—For purposes of any agreement under this title—

(1) the amount of temporary extended unemployment compensation which shall be payable to any individual for any week of total unemployment shall be equal to the amount of the regular compensation (including dependents' allowances) payable to such individual during such individual's benefit year under the State law for a week of total unemployment;

(2) the terms and conditions of the State law which apply to claims for regular compensation and to the payment thereof shall apply to claims for temporary extended unemployment compensation and the payment thereof, except—

(A) that an individual shall not be eligible for temporary extended unemployment compensation under this title unless, in the base period with respect to which the individual exhausted all rights to regular compensation under the State law, the individual had 20 weeks of full-time insured employment or the equivalent in insured wages, as determined under the provisions of the State law implementing section 202(a)(5) of the Federal-State Extended Unemployment Compensation Act of 1970 (26 U.S.C. 3304 note); and

(B) where otherwise inconsistent with the provisions of this title or with the regulations or operating instructions of the Secretary promulgated to carry out this title; and

(3) the maximum amount of temporary extended unemployment compensation payable to any individual for whom a temporary extended unemployment compensation account is established under section 203 shall not exceed the amount established in such account for such individual.

(e) ELECTION BY STATES.—Notwithstanding any other provision of Federal law (and if State law permits), the Governor of a State that is in an extended benefit period may provide for the payment of temporary extended unemployment compensation in lieu of extended compensation to individuals who otherwise meet the requirements of this section. Such an election shall not require a State to trigger off an extended benefit period.

SEC. 203. TEMPORARY EXTENDED UNEMPLOYMENT COMPENSATION ACCOUNT.

(a) IN GENERAL.—Any agreement under this title shall provide that the State will establish, for each eligible individual who files an application for temporary extended unemployment compensation, a temporary extended unemployment compensation account with respect to such individual's benefit year.

(b) AMOUNT IN ACCOUNT.—

(1) IN GENERAL.—The amount established in an account under subsection (a) shall be equal to the lesser of—

(A) 50 percent of the total amount of regular compensation (including dependents' allowances) payable to the individual during the individual's benefit year under such law, or

(B) 13 times the individual's average weekly benefit amount for the benefit year.

(2) WEEKLY BENEFIT AMOUNT.—For purposes of this subsection, an individual's weekly benefit amount for any week is the amount of regular compensation (including dependents' allowances) under the State law payable to such individual for such week for total unemployment.

(c) SPECIAL RULE.—

(1) IN GENERAL.—Notwithstanding any other provision of this section, if, at the time that the individual's account is exhausted, such individual's State is in an extended benefit period (as determined under paragraph (2)), then, such account shall be augmented by an amount equal to the amount originally established in such account (as determined under subsection (b)(1)).

(2) EXTENDED BENEFIT PERIOD.—For purposes of paragraph (1), a State shall be considered to be in an extended benefit period if, at the time of exhaustion (as described in paragraph (1))—

(A) such a period is then in effect for such State under the Federal-State Extended Unemployment Compensation Act of 1970; or

(B) such a period would then be in effect for such State under such Act if section 203(d) of such Act were applied as if it had been amended by striking "5" each place it appears and inserting "4".

SEC. 204. PAYMENTS TO STATES HAVING AGREEMENTS FOR THE PAYMENT OF TEMPORARY EXTENDED UNEMPLOYMENT COMPENSATION.

(a) GENERAL RULE.—There shall be paid to each State that has entered into an agreement under this title an amount equal to 100 percent of the temporary extended unemployment compensation paid to individuals by the State pursuant to such agreement.

(b) TREATMENT OF REIMBURSABLE COMPENSATION.—No payment shall be made to any State under this section in respect of any compensation to the extent the State is entitled to reimbursement in respect of such compensation under the provisions of any Federal law other than this title or chapter 85 of title 5, United States Code. A State shall not be entitled to any reimbursement under such chapter 85 in respect of any compensation to the extent the State is entitled to reimbursement under this title in respect of such compensation.

(c) DETERMINATION OF AMOUNT.—Sums payable to any State by reason of such State having an agreement under this title shall be payable, either in advance or by way of reimbursement (as may be determined by the Secretary), in such amounts as the Secretary estimates the State will be entitled to receive under this title for each calendar month, reduced or increased, as the case may be, by any amount by which the Secretary finds that the Secretary's estimates for any prior calendar month were greater or less than the amounts which should have been paid to the State. Such estimates may be made on the basis of such statistical, sampling, or other method as may be agreed upon by the Secretary and the State agency of the State involved.

SEC. 205. FINANCING PROVISIONS.

(a) IN GENERAL.—Funds in the extended unemployment compensation account (as established by section 905(a) of the Social Security Act (42 U.S.C. 1105(a)) of the Unemployment Trust Fund (as established by section 904(a) of such Act (42 U.S.C. 1104(a)) shall be used for the making of payments to States having agreements entered into under this title.

(b) CERTIFICATION.—The Secretary shall from time to time certify to the Secretary of the Treasury for payment to each State the sums payable to such State under this title. The Secretary of the Treasury, prior to audit or settlement by the General Accounting Office, shall make payments to the State in accordance with such certification, by transfers from the extended unemployment compensation account (as so established) to the account of such State in the Unemployment Trust Fund (as so established).

(c) ASSISTANCE TO STATES.—There are appropriated out of the employment security administration account (as established by section 901(a) of the Social Security Act (42 U.S.C. 1101(a)) of the Unemployment Trust Fund, without fiscal year limitation, such funds as may be necessary for purposes of assisting States (as provided in title III of the Social Security Act (42 U.S.C. 501 et seq.)) in meeting the costs of administration of agreements under this title.

(d) APPROPRIATIONS FOR CERTAIN PAYMENTS.—There are appropriated from the general fund of the Treasury, without fiscal year limitation, to the extended unemployment compensation account (as so established) of the Unemployment Trust Fund (as so established) such sums as the Secretary estimates to be necessary to make the payments under this section in respect of—

(1) compensation payable under chapter 85 of title 5, United States Code; and

(2) compensation payable on the basis of services to which section 3309(a)(1) of the Internal Revenue Code of 1986 applies.

Amounts appropriated pursuant to the preceding sentence shall not be required to be repaid.

SEC. 206. FRAUD AND OVERPAYMENTS.

(a) IN GENERAL.—If an individual knowingly has made, or caused to be made by another, a false statement or representation of a material fact, or knowingly has failed, or caused another to fail, to disclose a material fact, and as a result of such false statement or representation or of such nondisclosure such individual has received an amount of temporary extended unemployment compensation under this title to which he was not entitled, such individual—

(1) shall be ineligible for further temporary extended unemployment compensation under this title in accordance with the provisions of the applicable State unemployment compensation law relating to fraud in connection with a claim for unemployment compensation; and

(2) shall be subject to prosecution under section 1001 of title 18, United States Code.

(b) REPAYMENT.—In the case of individuals who have received amounts of temporary extended unemployment compensation under this title to which they were not entitled, the State shall require such individuals to repay the amounts of such temporary extended unemployment compensation to the State agency, except that the State agency may waive such repayment if it determines that—

(1) the payment of such temporary extended unemployment compensation was without fault on the part of any such individual; and

(2) such repayment would be contrary to equity and good conscience.

(c) RECOVERY BY STATE AGENCY.—

(1) IN GENERAL.—The State agency may recover the amount to be repaid, or any part thereof, by deductions from any temporary extended unemployment compensation payable to such individual under this title or from any unemployment compensation payable to such individual under any Federal unemployment compensation law administered by the State agency or under any other Federal law administered by the State agency which provides for the payment of any assistance or allowance with respect to any week of unemployment, during the 3-year period after the date such individuals received the payment of the temporary extended unemployment compensation to which they were not entitled, except that no single deduction may exceed 50 percent of the weekly benefit amount from which such deduction is made.

(2) OPPORTUNITY FOR HEARING.—No repayment shall be required, and no deduction shall be made, until a determination has been made, notice thereof and an opportunity for a fair hearing has been given to the individual, and the determination has become final.

(d) REVIEW.—Any determination by a State agency under this section shall be subject to review in the same manner and to the same extent as determinations under the State unemployment compensation law, and only in that manner and to that extent.

SEC. 207. DEFINITIONS.

In this title, the terms "compensation", "regular compensation", "extended compensation", "additional compensation", "benefit year", "base period", "State", "State agency", "State law", and "week" have the respective meanings given such terms under section 205 of the Federal-State Extended Unemployment Compensation Act of 1970 (26 U.S.C. 3304 note).

SEC. 208. APPLICABILITY.

An agreement entered into under this title shall apply to weeks of unemployment—

(1) beginning after the date on which such agreement is entered into; and

(2) ending before January 1, 2003.

SEC. 209. SPECIAL REED ACT TRANSFER IN FISCAL YEAR 2002.

(a) REPEAL OF CERTAIN PROVISIONS ADDED BY THE BALANCED BUDGET ACT OF 1997.—

(1) IN GENERAL.—The following provisions of section 903 of the Social Security Act (42 U.S.C. 1103) are repealed:

(A) Paragraph (3) of subsection (a).

(B) The last sentence of subsection (c)(2).

(2) SAVINGS PROVISION.—Any amounts transferred before the date of enactment of this Act under the provision repealed by paragraph (1)(A) shall remain subject to section 903 of the Social Security Act, as last in effect before such date of enactment.

(b) SPECIAL TRANSFER IN FISCAL YEAR 2002.—Section 903 of the Social Security Act is amended by adding at the end the following:

"Special Transfer in Fiscal Year 2002

"(d)(1) The Secretary of the Treasury shall transfer (as of the date determined under paragraph (5)) from the Federal unemployment account to the account of each State in the Unemployment Trust Fund the amount determined with respect to such State under paragraph (2).

"(2)(A) The amount to be transferred under this subsection to a State account shall (as determined by the Secretary of Labor and certified by such Secretary to the Secretary of the Treasury) be equal to—

"(i) the amount which would have been required to have been transferred under this section to such account at the beginning of fiscal year 2002 if—

"(I) section 209(a)(1) of the Temporary Extended Unemployment Compensation Act of 2002 had been enacted before the close of fiscal year 2001, and

"(II) section 5402 of Public Law 105–33 (relating to increase in Federal unemployment account ceiling) had not been enacted,

minus

"(ii) the amount which was in fact transferred under this section to such account at the beginning of fiscal year 2002.

"(B) Notwithstanding the provisions of subparagraph (A)—

"(i) the aggregate amount transferred to the States under this subsection may not exceed a total of $8,000,000,000; and

"(ii) all amounts determined under subparagraph (A) shall be reduced ratably, if and to the extent necessary in order to comply with the limitation under clause (i).

"(3)(A) Except as provided in paragraph (4), amounts transferred to a State account pursuant to this subsection may be used only in the payment of cash benefits—

"(i) to individuals with respect to their unemployment, and

"(ii) which are allowable under subparagraph (B) or (C).

"(B)(i) At the option of the State, cash benefits under this paragraph may include amounts which shall be payable as—

"(I) regular compensation, or

"(II) additional compensation, upon the exhaustion of any temporary extended unemployment compensation (if such State has entered into an agreement under the Temporary Extended Unemployment Compensation Act of 2002), for individuals eligible for regular compensation under the unemployment compensation law of such State.

"(ii) Any additional compensation under clause (i) may not be taken into account for purposes of any determination relating to the amount of any extended compensation for which an individual might be eligible.

"(C)(i) At the option of the State, cash benefits under this paragraph may include amounts which shall be payable to 1 or more categories of individuals not otherwise eligible for regular compensation under the unemployment compensation law of such State, including those described in clause (iii).

"(ii) The benefits paid under this subparagraph to any individual may not, for any period of unemployment, exceed the maximum amount of regular compensation authorized under the unemployment compensation law of such State for that same period, plus any additional compensation (described in subparagraph (B)(i)) which could have been paid with respect to that amount.

"(iii) The categories of individuals described in this clause include the following:

"(I) Individuals who are seeking, or available for, only part-time (and not full-time) work.

"(II) Individuals who would be eligible for regular compensation under the unemployment compensation law of such State under an alternative base period.

"(D) Amounts transferred to a State account under this subsection may be used in the payment of cash benefits to individuals only for weeks of unemployment beginning after the date of enactment of this subsection.

"(4) Amounts transferred to a State account under this subsection may be used for the administration of its unemployment compensation law and public employment offices (including in connection with benefits described in paragraph (3) and any recipients thereof), subject to the same conditions as set forth in subsection (c)(2) (excluding subparagraph (B) thereof, and deeming the reference to 'subsections (a) and (b)' in subparagraph (D) thereof to include this subsection).

"(5) Transfers under this subsection shall be made within 10 days after the date of enactment of this paragraph.".

(c) LIMITATIONS ON TRANSFERS.—Section 903(b) of the Social Security Act shall apply to transfers under section 903(d) of such Act (as amended by this section). For purposes of the preceding sentence, such section 903(b) shall be deemed to be amended as follows:

(1) By substituting "the transfer date described in subsection (d)(5)" for "October 1 of any fiscal year".

(2) By substituting "remain in the Federal unemployment account" for "be transferred to the Federal unemployment account as of the beginning of such October 1".

(3) By substituting "fiscal year 2002 (after the transfer date described in subsection (d)(5))" for "the fiscal year beginning on such October 1".

(4) By substituting "under subsection (d)" for "as of October 1 of such fiscal year".

(5) By substituting "(as of the close of fiscal year 2002)" for "(as of the close of such fiscal year)".

(d) TECHNICAL AMENDMENTS.—(1) Sections 3304(a)(4)(B) and 3306(f)(2) of the Internal Revenue Code of 1986 are amended by inserting "or 903(d)(4)" before "of the Social Security Act".

(2) Section 303(a)(5) of the Social Security Act is amended in the second proviso by inserting "or 903(d)(4)" after "903(c)(2)".

(e) REGULATIONS.—The Secretary of Labor may prescribe any operating instructions or regulations necessary to carry out this section and the amendments made by this section.

TITLE III—TAX INCENTIVES FOR NEW YORK CITY AND DISTRESSED AREAS

SEC. 301. TAX BENEFITS FOR AREA OF NEW YORK CITY DAMAGED IN TERRORIST ATTACKS ON SEPTEMBER 11, 2001.

(a) IN GENERAL.—Chapter 1 is amended by adding at the end the following new subchapter:

"Subchapter Y—New York Liberty Zone Benefits

"Sec. 1400L. Tax benefits for New York Liberty Zone.

"SEC. 1400L. TAX BENEFITS FOR NEW YORK LIBERTY ZONE.

"(a) EXPANSION OF WORK OPPORTUNITY TAX CREDIT.—

"(1) IN GENERAL.—For purposes of section 51, a New York Liberty Zone business employee shall be treated as a member of a targeted group.

"(2) NEW YORK LIBERTY ZONE BUSINESS EMPLOYEE.—For purposes of this subsection—

"(A) IN GENERAL.—The term 'New York Liberty Zone business employee' means, with respect to any period, any employee of a New York Liberty Zone business if substantially all the services performed during such period by such employee for such business are performed in the New York Liberty Zone.

"(B) INCLUSION OF CERTAIN EMPLOYEES OUTSIDE THE NEW YORK LIBERTY ZONE.—

"(i) IN GENERAL.—In the case of a New York Liberty Zone business described in subclause (II) of subparagraph (C)(i), the term 'New York Liberty Zone business employee' includes any employee of such business (not described in subparagraph (A)) if substantially all the services performed during such period by such employee for such business are performed in the City of New York, New York.

"(ii) LIMITATION.—The number of employees of such a business that are treated as New York Liberty zone business employees on any day by reason of clause (i) shall not exceed the excess of—

"(I) the number of employees of such business on September 11, 2001, in the New York Liberty Zone, over

"(II) the number of New York Liberty Zone business employees (determined without regard to this subparagraph) of such business on the day to which the limitation is being applied.

The Secretary may require any trade or business to have the number determined under subclause (I) verified by the New York State Department of Labor.

"(C) NEW YORK LIBERTY ZONE BUSINESS.—

"(i) IN GENERAL.—The term 'New York Liberty Zone business' means any trade or business which is—

"(I) located in the New York Liberty Zone, or

"(II) located in the City of New York, New York, outside the New York Liberty Zone, as a result of the physical destruction or damage of such place of business by the September 11, 2001, terrorist attack.

"(ii) CREDIT NOT ALLOWED FOR LARGE BUSINESSES.—The term 'New York Liberty Zone business' shall not include any trade or business for any taxable year if such trade or business employed an average of more than 200 employees on business days during the taxable year.

"(D) SPECIAL RULES FOR DETERMINING AMOUNT OF CREDIT.—For purposes of applying subpart F of part IV of subchapter B of this chapter to wages paid or incurred to any New York Liberty Zone business employee—

"(i) section 51(a) shall be applied by substituting 'qualified wages' for 'qualified first-year wages',

"(ii) the rules of section 52 shall apply for purposes of determining the number of employees under subparagraph (B),

"(iii) subsections (c)(4) and (i)(2) of section 51 shall not apply, and

"(iv) in determining qualified wages, the following shall apply in lieu of section 51(b):

"(I) QUALIFIED WAGES.—The term 'qualified wages' means wages paid or incurred by the employer to individuals who are New York Liberty Zone business employees of such employer for work performed during calendar year 2002 or 2003.

"(II) ONLY FIRST $6,000 OF WAGES PER CALENDAR YEAR TAKEN INTO ACCOUNT.—The amount of the qualified wages which may be taken into account with respect to any individual shall not exceed $6,000 per calendar year.

"(b) SPECIAL ALLOWANCE FOR CERTAIN PROPERTY ACQUIRED AFTER SEPTEMBER 10, 2001.—

"(1) ADDITIONAL ALLOWANCE.—In the case of any qualified New York Liberty Zone property—

"(A) the depreciation deduction provided by section 167(a) for the taxable year in which such property is placed in service shall include an allowance equal to 30 percent of the adjusted basis of such property, and

"(B) the adjusted basis of the qualified New York Liberty Zone property shall be reduced by the amount of such deduction before computing the amount otherwise allowable as a depreciation deduction under this chapter for such taxable year and any subsequent taxable year.

"(2) QUALIFIED NEW YORK LIBERTY ZONE PROPERTY.—For purposes of this subsection—

"(A) IN GENERAL.—The term 'qualified New York Liberty Zone property' means property—

"(i)(I) which is described in section 168(k)(2)(A)(i), or

"(II) which is nonresidential real property, or residential rental property, which is described in subparagraph (B),

"(ii) substantially all of the use of which is in the New York Liberty Zone and is in the active conduct of a trade or business by the taxpayer in such Zone,

"(iii) the original use of which in the New York Liberty Zone commences with the taxpayer after September 10, 2001,

"(iv) which is acquired by the taxpayer by purchase (as defined in section 179(d)) after September 10, 2001, but only if no written binding contract for the acquisition was in effect before September 11, 2001, and

"(v) which is placed in service by the taxpayer on or before the termination date.

The term 'termination date' means December 31, 2006 (December 31, 2009, in the case of nonresidential real property and residential rental property).

"(B) ELIGIBLE REAL PROPERTY.—Nonresidential real property or residential rental property is described in this subparagraph only to the extent it rehabilitates real property damaged, or replaces real property destroyed or condemned, as a result of the September 11, 2001, terrorist attack. For purposes of the preceding sentence, property shall be treated as replacing real property destroyed or condemned if, as part of an integrated plan, such property replaces real property which is included in a continuous area which includes real property destroyed or condemned.

"(C) EXCEPTIONS.—

"(i) 30 PERCENT ADDITIONAL ALLOWANCE PROPERTY.—Such term shall not include property to which section 168(k) applies.

"(ii) ALTERNATIVE DEPRECIATION PROPERTY.—The term 'qualified New York Liberty Zone property' shall not include any property described in section 168(k)(2)(C)(i).

"(iii) QUALIFIED NEW YORK LIBERTY ZONE LEASEHOLD IMPROVEMENT PROPERTY.—Such term shall not include any qualified New York Liberty Zone leasehold improvement property.

"(iv) ELECTION OUT.—For purposes of this subsection, rules similar to the rules of section 168(k)(2)(C)(iii) shall apply.

"(D) SPECIAL RULES.—For purposes of this subsection, rules similar to the rules of section 168(k)(2)(D) shall apply, except that clause (i) thereof shall be applied without regard to 'and before September 11, 2004'.

"(E) ALLOWANCE AGAINST ALTERNATIVE MINIMUM TAX.—For purposes of this subsection, rules similar to the rules of section 168(k)(2)(F) shall apply.

"(c) 5-YEAR RECOVERY PERIOD FOR DEPRECIATION OF CERTAIN LEASEHOLD IMPROVEMENTS.—

"(1) IN GENERAL.—For purposes of section 168, the term '5-year property' includes any qualified New York Liberty Zone leasehold improvement property.

"(2) QUALIFIED NEW YORK LIBERTY ZONE LEASEHOLD IMPROVEMENT PROPERTY.—For purposes of this section, the term 'qualified New York Liberty Zone leasehold improvement property' means qualified leasehold improvement property (as defined in section 168(k)(3)) if—

"(A) such building is located in the New York Liberty Zone,

"(B) such improvement is placed in service after September 10, 2001, and before January 1, 2007, and

"(C) no written binding contract for such improvement was in effect before September 11, 2001.

"(3) REQUIREMENT TO USE STRAIGHT LINE METHOD.—The applicable depreciation method under section 168 shall be the straight line method in the case of qualified New York Liberty Zone leasehold improvement property.

"(4) 9-YEAR RECOVERY PERIOD UNDER ALTERNATIVE SYSTEM.—For purposes of section 168(g), the class life of qualified New York Liberty Zone leasehold improvement property shall be 9 years.

"(d) TAX-EXEMPT BOND FINANCING.—

"(1) IN GENERAL.—For purposes of this title, any qualified New York Liberty Bond shall be treated as an exempt facility bond.

"(2) QUALIFIED NEW YORK LIBERTY BOND.—For purposes of this subsection, the term 'qualified New York Liberty Bond' means any bond issued as part of an issue if—

"(A) 95 percent or more of the net proceeds (as defined in section 150(a)(3)) of such issue are to be used for qualified project costs,

"(B) such bond is issued by the State of New York or any political subdivision thereof,

"(C) the Governor or the Mayor designates such bond for purposes of this section, and

"(D) such bond is issued after the the date of the enactment of this section and before January 1, 2005.

"(3) LIMITATIONS ON AMOUNT OF BONDS.—

"(A) AGGREGATE AMOUNT DESIGNATED.—The maximum aggregate face amount of bonds which may be designated under this subsection shall not exceed $8,000,000,000, of which not to exceed $4,000,000,000 may be designated by the Governor and not to exceed $4,000,000,000 may be designated by the Mayor.

"(B) SPECIFIC LIMITATIONS.—The aggregate face amount of bonds issued which are to be used for—

"(i) costs for property located outside the New York Liberty Zone shall not exceed $2,000,000,000, "(ii) residential rental property shall not exceed $1,600,000,000, and

"(iii) costs with respect to property used for retail sales of tangible property and functionally related and subordinate property shall not exceed $800,000,000.

The limitations under clauses (i), (ii), and (iii) shall be allocated proportionately between the bonds designated by the Governor and the bonds designated by the Mayor in proportion to the respective amounts of bonds designated by each.

"(C) MOVABLE PROPERTY.—No bonds shall be issued which are to be used for movable fixtures and equipment.

"(4) QUALIFIED PROJECT COSTS.—For purposes of this subsection—

"(A) IN GENERAL.—The term 'qualified project costs' means the cost of acquisition, construction, reconstruction, and renovation of—

"(i) nonresidential real property and residential rental property (including fixed tenant improvements associated with such property) located in the New York Liberty Zone, and

"(ii) public utility property (as defined in section 168(i)(10)) located in the New York Liberty Zone.

"(B) COSTS FOR CERTAIN PROPERTY OUTSIDE ZONE INCLUDED.—Such term includes the cost of acquisition, construction, reconstruction, and renovation of nonresidential real property (including fixed tenant improvements associated with such property) located outside the New York Liberty Zone but within the City of New York, New York, if such property is part of a project which consists of at least 100,000 square feet of usable office or other commercial space located in a single building or multiple adjacent buildings.

"(5) SPECIAL RULES.—In applying this title to any qualified New York Liberty Bond, the following modifications shall apply:

"(A) Section 146 (relating to volume cap) shall not apply.

"(B) Section 147(d) (relating to acquisition of existing property not permitted) shall be applied by substituting '50 percent' for '15 percent' each place it appears.

"(C) Section 148(f)(4)(C) (relating to exception from rebate for certain proceeds to be used to finance construction expenditures) shall apply to the available construction proceeds of bonds issued under this section.

"(D) Repayments of principal on financing provided by the issue—

"(i) may not be used to provide financing, and

"(ii) must be used not later than the close of the 1st semiannual period beginning after the date of the repayment to redeem bonds which are part of such issue.

The requirement of clause (ii) shall be treated as met with respect to amounts received within 10 years after the date of issuance of the issue (or, in the case of a refunding bond, the date of issuance of the original bond) if such amounts are used by the close of such 10 years to redeem bonds which are part of such issue.

"(E) Section 57(a)(5) shall not apply.

"(6) SEPARATE ISSUE TREATMENT OF PORTIONS OF AN ISSUE.—This subsection shall not apply to the portion of an issue which (if issued as a separate issue) would be treated as a qualified bond or as a bond that is not a private activity bond (determined without regard to paragraph (1)), if the issuer elects to so treat such portion.

"(e) ADVANCE REFUNDINGS OF CERTAIN TAX-EXEMPT BONDS.—

"(1) IN GENERAL.—With respect to a bond described in paragraph (2) issued as part of an issue 90 percent (95 percent in the case of a bond described in paragraph (2)(C)) or more of the net proceeds (as defined in section 150(a)(3)) of which were used to finance facilities located within the City of New York, New York (or property which is functionally related and subordinate to facilities located within the City of New York for the furnishing of water), one additional advanced refunding after the date of the enactment of this section and before January 1, 2005, shall be allowed under the applicable rules of section 149(d) if—

"(A) the Governor or the Mayor designates the advance refunding bond for purposes of this subsection, and

"(B) the requirements of paragraph (4) are met.

"(2) BONDS DESCRIBED.—A bond is described in this paragraph if such bond was outstanding on September 11, 2001, and is—

"(A) a State or local bond (as defined in section 103(c)(1)) which is a general obligation of the City of New York, New York,

"(B) a State or local bond (as so defined) other than a private activity bond (as defined in section 141(a)) issued by the New York Municipal Water Finance Authority or the Metropolitan Transportation Authority of the State of New York, or

"(C) a qualified 501(c)(3) bond (as defined in section 145(a)) which is a qualified hospital bond (as defined in section 145(c)) issued by or on behalf of the State of New York or the City of New York, New York.

"(3) AGGREGATE LIMIT.—For purposes of paragraph (1), the maximum aggregate face amount of bonds which may be designated under this subsection by the Governor shall not exceed $4,500,000,000 and the maximum aggregate face amount of bonds which may be designated under this subsection by the Mayor shall not exceed $4,500,000,000.

"(4) ADDITIONAL REQUIREMENTS.—The requirements of this paragraph are met with respect to any advance refunding of a bond described in paragraph (2) if—

"(A) no advance refundings of such bond would be allowed under any provision of law after September 11, 2001,

"(B) the advance refunding bond is the only other outstanding bond with respect to the refunded bond, and

"(C) the requirements of section 148 are met with respect to all bonds issued under this subsection.

"(f) INCREASE IN EXPENSING UNDER SECTION 179.—

"(1) IN GENERAL.—For purposes of section 179—

"(A) the limitation under section 179(b)(1) shall be increased by the lesser of—

"(i) $35,000, or

"(ii) the cost of section 179 property which is qualified New York Liberty Zone property placed in service during the taxable year, and

"(B) the amount taken into account under section 179(b)(2) with respect to any section 179 property which is qualified New York Liberty Zone property shall be 50 percent of the cost thereof.

"(2) QUALIFIED NEW YORK LIBERTY ZONE PROPERTY.—For purposes of this subsection, the term 'qualified New York Liberty Zone property' has the meaning given such term by subsection (b)(2).

"(3) RECAPTURE.—Rules similar to the rules under section 179(d)(10) shall apply with respect to any qualified New York Liberty Zone property which ceases to be used in the New York Liberty Zone.

"(g) EXTENSION OF REPLACEMENT PERIOD FOR NONRECOGNITION OF GAIN.—Notwithstanding subsections (g) and (h) of section 1033, clause (i) of section 1033(a)(2)(B) shall be applied by substituting '5 years' for '2 years' with respect to property which is compulsorily or involuntarily converted as a result of the terrorist attacks on September 11, 2001, in the New York Liberty Zone but only if substantially all of the use of the replacement property is in the City of New York, New York.

"(h) NEW YORK LIBERTY ZONE.—For purposes of this section, the term 'New York Liberty Zone' means the area located on or south of Canal Street, East Broadway (east of its intersection with Canal Street), or Grand Street (east of its intersection with East Broadway) in the Borough of Manhattan in the City of New York, New York.

"(i) REFERENCES TO GOVERNOR AND MAYOR.—For purposes of this section, the terms 'Governor' and 'Mayor' mean the Governor of the State of New York and the Mayor of the City of New York, New York, respectively.".

(b) CREDIT ALLOWED AGAINST REGULAR AND MINIMUM TAX.—

(1) IN GENERAL.—Subsection (c) of section 38 (relating to limitation based on amount of tax) is amended by redesignating paragraph (3) as paragraph (4) and by inserting after paragraph (2) the following new paragraph:

"(3) SPECIAL RULES FOR NEW YORK LIBERTY ZONE BUSINESS EMPLOYEE CREDIT.—

"(A) IN GENERAL.—In the case of the New York Liberty Zone business employee credit—

"(i) this section and section 39 shall be applied separately with respect to such credit, and

"(ii) in applying paragraph (1) to such credit—

"(I) the tentative minimum tax shall be treated as being zero, and

"(II) the limitation under paragraph (1) (as modified by subclause (I)) shall be reduced by the credit allowed under subsection (a) for the taxable year (other than the New York Liberty Zone business employee credit).

"(B) NEW YORK LIBERTY ZONE BUSINESS EMPLOYEE CREDIT.—For purposes of this subsection, the term 'New York Liberty Zone business employee credit' means the portion of work opportunity credit under section 51 determined under section 1400L(a).".

(2) CONFORMING AMENDMENT.—Subclause (II) of section 38(c)(2)(A)(ii) is amended by inserting "or the New York Liberty Zone business employee credit" after "employment credit".

(3) EFFECTIVE DATE.—The amendments made by this subsection shall apply to taxable years ending after December 31, 2001.

(c) CLERICAL AMENDMENT.—The table of subchapters for chapter 1 is amended by adding at the end the following new item:

"Subchapter Y—New York Liberty Zone Benefits.".

TITLE IV—MISCELLANEOUS AND TECHNICAL PROVISIONS

Subtitle A—General Miscellaneous Provisions

SEC. 401. ALLOWANCE OF ELECTRONIC 1099'S.

Any person required to furnish a statement under any section of subpart B of part III of subchapter A of chapter 61 of the Internal Revenue Code of 1986 for any taxable year ending after the date of the enactment of this Act, may electronically furnish such statement (without regard to any first class mailing requirement) to any recipient who has consented to the electronic provision of the statement in a manner similar to the one permitted under regulations issued under section 6051 of such Code or in such other manner as provided by the Secretary.

SEC. 402. EXCLUDED CANCELLATION OF INDEBTEDNESS INCOME OF S CORPORATION NOT TO RESULT IN ADJUSTMENT TO BASIS OF STOCK OF SHAREHOLDERS.

(a) IN GENERAL.—Subparagraph (A) of section 108(d)(7) (relating to certain provisions to be applied at corporate level) is amended by inserting before the period ", including by not taking into account under section 1366(a) any amount excluded under subsection (a) of this section".

(b) EFFECTIVE DATE.—

(1) IN GENERAL.—Except as provided in paragraph (2), the amendment made by this section

shall apply to discharges of indebtedness after October 11, 2001, in taxable years ending after such date.

(2) Exception.—The amendment made by this section shall not apply to any discharge of indebtedness before March 1, 2002, pursuant to a plan of reorganization filed with a bankruptcy court on or before October 11, 2001.

SEC. 403. LIMITATION ON USE OF NONACCRUAL EXPERIENCE METHOD OF ACCOUNTING.

(a) In General.—Paragraph (5) of section 448(d) is amended to read as follows:

"(5) Special rule for certain services.—

"(A) In general.—In the case of any person using an accrual method of accounting with respect to amounts to be received for the performance of services by such person, such person shall not be required to accrue any portion of such amounts which (on the basis of such person's experience) will not be collected if—

"(i) such services are in fields referred to in paragraph (2)(A), or

"(ii) such person meets the gross receipts test of subsection (c) for all prior taxable years.

"(B) Exception.—This paragraph shall not apply to any amount if interest is required to be paid on such amount or there is any penalty for failure to timely pay such amount.

"(C) Regulations.—The Secretary shall prescribe regulations to permit taxpayers to determine amounts referred to in subparagraph (A) using computations or formulas which, based on experience, accurately reflect the amount of income that will not be collected by such person. A taxpayer may adopt, or request consent of the Secretary to change to, a computation or formula that clearly reflects the taxpayer's experience. A request under the preceding sentence shall be approved if such computation or formula clearly reflects the taxpayer's experience.".

(b) Effective Date.—

(1) In general.—The amendments made by this section shall apply to taxable years ending after the date of the enactment of this Act.

(2) Change in method of accounting.—In the case of any taxpayer required by the amendments made by this section to change its method of accounting for its first taxable year ending after the date of the enactment of this Act—

(A) such change shall be treated as initiated by the taxpayer,

(B) such change shall be treated as made with the consent of the Secretary of the Treasury, and

(C) the net amount of the adjustments required to be taken into account by the taxpayer under section 481 of the Internal Revenue Code of 1986 shall be taken into account over a period of 4 years (or if less, the number of taxable years that the taxpayer used the method permitted under section 448(d)(5) of such Code as in effect before the date of the enactment of this Act) beginning with such first taxable year.

SEC. 404. EXCLUSION FOR FOSTER CARE PAYMENTS TO APPLY TO PAYMENTS BY QUALIFIED PLACEMENT AGENCIES.

(a) In General.—The matter preceding subparagraph (B) of section 131(b)(1) (defining qualified foster care payment) is amended to read as follows:

"(1) In general.—The term 'qualified foster care payment' means any payment made pursuant to a foster care program of a State or political subdivision thereof—

"(A) which is paid by—

"(i) a State or political subdivision thereof, or

"(ii) a qualified foster care placement agency, and".

(b) Qualified Foster Individuals To Include Individuals Placed by Qualified Placement Agencies.—Subparagraph (B) of section 131(b)(2) (defining qualified foster individual) is amended to read as follows:

"(B) a qualified foster care placement agency.".

(c) Qualified Foster Care Placement Agency Defined.—Subsection (b) of section 131 is amended by redesignating paragraph (3) as paragraph (4) and by inserting after paragraph (2) the following new paragraph:

"(3) Qualified foster care placement agency.—The term 'qualified foster care placement agency' means any placement agency which is licensed or certified by—

"(A) a State or political subdivision thereof, or

"(B) an entity designated by a State or political subdivision thereof,

for the foster care program of such State or political subdivision to make foster care payments to providers of foster care.".

(d) Effective Date.—The amendments made by this section shall apply to taxable years beginning after December 31, 2001.

SEC. 405. INTEREST RATE RANGE FOR ADDITIONAL FUNDING REQUIREMENTS.

(a) Amendments to the Internal Revenue Code of 1986.—

(1) Special rule.—Clause (i) of section 412(l)(7)(C) (relating to interest rate) is amended by adding at the end the following new subclause:

"(III) Special rule for 2002 and 2003.—For a plan year beginning in 2002 or 2003, notwithstanding subclause (I), in the case that the rate of interest used under subsection (b)(5) exceeds the highest rate permitted under subclause (I), the rate of interest used to determine current liability under this subsection may exceed the rate of interest otherwise permitted under subclause (I); except that such rate of interest shall not exceed 120 percent of the weighted average referred to in subsection (b)(5)(B)(ii).".

(2) Quarterly contributions.—Subsection (m) of section 412 is amended by adding at the end the following new paragraph:

"(7) Special rules for 2002 and 2004.—In any case in which the interest rate used to determine current liability is determined under subsection (l)(7)(C)(i)(III)—

"(A) 2002.—For purposes of applying paragraphs (1) and (4)(B)(ii) for plan years beginning in 2002, the current liability for the preceding plan year shall be redetermined using 120 percent as the specified percentage determined under subsection (l)(7)(C)(i)(II).

"(B) 2004.—For purposes of applying paragraphs (1) and (4)(B)(ii) for plan years beginning in 2004, the current liability for the preceding plan year shall be redetermined using 105 percent as the specified percentage determined under subsection (l)(7)(C)(i)(II).".

(b) Amendments to the Employee Retirement Income Security Act of 1974.—

(1) Special rule.—Clause (i) of section 302(d)(7)(C) of such Act (29 U.S.C. 1082(d)(7)(C)) is amended by adding at the end the following new subclause:

"(III) Special rule for 2002 and 2003.—For a plan year beginning in 2002 or 2003, notwithstanding subclause (I), in the case that the rate of interest used under subsection (b)(5) exceeds the highest rate permitted under subclause (I), the rate of interest used to determine current liability under this subsection may exceed the rate of interest otherwise permitted under subclause (I); except that such rate of interest shall not exceed 120 percent of the weighted average referred to in subsection (b)(5)(B)(ii).".

(2) Quarterly contributions.—Subsection (e) of section 302 of such Act (29 U.S.C. 1082) is amended by adding at the end the following new paragraph:

"(7) Special rules for 2002 and 2004.—In any case in which the interest rate used to determine current liability is determined under subsection (d)(7)(C)(i)(III)—

"(A) 2002.—For purposes of applying paragraphs (1) and (4)(B)(ii) for plan years beginning in 2002, the current liability for the preceding plan year shall be redetermined using 120 percent as the specified percentage determined under subsection (d)(7)(C)(i)(II).

"(B) 2004.—For purposes of applying paragraphs (1) and (4)(B)(ii) for plan years beginning in 2004, the current liability for the preceding plan year shall be redetermined using 105 percent as the specified percentage determined under subsection (d)(7)(C)(i)(II).".

(c) PBGC.—Clause (iii) of section 4006(a)(3)(E) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1306(a)(3)(E)) is amended by adding at the end the following new subclause:

"(IV) In the case of plan years beginning after December 31, 2001, and before January 1, 2004, subclause (II) shall be applied by substituting '100 percent' for '85 percent'. Subclause (III) shall be applied for such years without regard to the preceding sentence. Any reference to this clause by any other sections or subsections shall be treated as a reference to this clause without regard to this subclause.".

SEC. 406. ADJUSTED GROSS INCOME DETERMINED BY TAKING INTO ACCOUNT CERTAIN EXPENSES OF ELEMENTARY AND SECONDARY SCHOOL TEACHERS.

(a) In General.—Section 62(a)(2) (relating to certain trade and business deductions of employees) is amended by adding at the end the following:

"(D) Certain expenses of elementary and secondary school teachers.—In the case of taxable years beginning during 2002 or 2003, the deductions allowed by section 162 which consist of expenses, not in excess of $250, paid or incurred by an eligible educator in connection with books, supplies (other than nonathletic supplies for courses of instruction in health or physical education), computer equipment (including related software and services) and other equipment, and supplementary materials used by the eligible educator in the classroom.".

(b) Eligible Educator.—Section 62 is amended by adding at the end the following:

"(d) Definition; Special Rules.—

"(1) Eligible educator.—

"(A) In general.—For purposes of subsection (a)(2)(D), the term 'eligible educator' means, with respect to any taxable year, an individual who is a kindergarten through grade 12 teacher, instructor, counselor, principal, or aide in a school for at least 900 hours during a school year.

"(B) School.—The term 'school' means any school which provides elementary education or secondary education (kindergarten through grade 12), as determined under State law.

"(2) Coordination with exclusions.—A deduction shall be allowed under subsection (a)(2)(D) for expenses only to the extent the amount of such expenses exceeds the amount excludable under section 135, 529(c)(1), or 530(d)(2) for the taxable year.".

(c) Effective Date.—The amendments made by this section shall apply to taxable years beginning after December 31, 2001.

Subtitle B—Technical Corrections

SEC. 411. AMENDMENTS RELATED TO ECONOMIC GROWTH AND TAX RELIEF RECONCILIATION ACT OF 2001.

(a) Amendments Related to Section 101 of the Act.—

(1) In general.—Subsection (b) of section 6428 is amended to read as follows:

"(b) Credit Treated as Nonrefundable Personal Credit.—For purposes of this title, the credit allowed under this section shall be treated as a credit allowable under subpart A of part IV of subchapter A of chapter 1.".

(2) Conforming amendments.—

(A) Subsection (d) of section 6428 is amended to read as follows:

"(d) COORDINATION WITH ADVANCE REFUNDS OF CREDIT.—

"(1) IN GENERAL.—The amount of credit which would (but for this paragraph) be allowable under this section shall be reduced (but not below zero) by the aggregate refunds and credits made or allowed to the taxpayer under subsection (e). Any failure to so reduce the credit shall be treated as arising out of a mathematical or clerical error and assessed according to section 6213(b)(1).

"(2) JOINT RETURNS.—In the case of a refund or credit made or allowed under subsection (e) with respect to a joint return, half of such refund or credit shall be treated as having been made or allowed to each individual filing such return.".

(B) Paragraph (2) of section 6428(e) is amended to read as follows:

"(2) ADVANCE REFUND AMOUNT.—For purposes of paragraph (1), the advance refund amount is the amount that would have been allowed as a credit under this section for such first taxable year if—

"(A) this section (other than subsections (b) and (d) and this subsection) had applied to such taxable year, and

"(B) the credit for such taxable year were not allowed to exceed the excess (if any) of—

"(i) the sum of the regular tax liability (as defined in section 26(b)) plus the tax imposed by section 55, over

"(ii) the sum of the credits allowable under part IV of subchapter A of chapter 1 (other than the credits allowable under subpart C thereof, relating to refundable credits).".

(b) AMENDMENT RELATED TO SECTION 201 OF THE ACT.—Subparagraph (B) of section 24(d)(1) is amended by striking "amount of credit allowed by this section" and inserting "aggregate amount of credits allowed by this subpart".

(c) AMENDMENTS RELATED TO SECTION 202 OF THE ACT.—

(1) CORRECTIONS TO CREDIT FOR ADOPTION EXPENSES.—

(A) Paragraph (1) of section 23(a) is amended to read as follows:

"(1) IN GENERAL.—In the case of an individual, there shall be allowed as a credit against the tax imposed by this chapter the amount of the qualified adoption expenses paid or incurred by the taxpayer.".

(B) Subsection (a) of section 23 is amended by adding at the end the following new paragraph:

"(3) $10,000 CREDIT FOR ADOPTION OF CHILD WITH SPECIAL NEEDS REGARDLESS OF EXPENSES.—In the case of an adoption of a child with special needs which becomes final during a taxable year, the taxpayer shall be treated as having paid during such year qualified adoption expenses with respect to such adoption in an amount equal to the excess (if any) of $10,000 over the aggregate qualified adoption expenses actually paid or incurred by the taxpayer with respect to such adoption during such taxable year and all prior taxable years.".

(C) Paragraph (2) of section 23(a) is amended by striking the last sentence.

(D) Paragraph (1) of section 23(b) is amended by striking "subsection (a)(1)(A)" and inserting "subsection (a)".

(E) Subsection (i) of section 23 is amended by striking "the dollar limitation in subsection (b)(1)" and inserting "the dollar amounts in subsections (a)(3) and (b)(1)".

(F) Expenses paid or incurred during any taxable year beginning before January 1, 2002, may be taken into account in determining the credit under section 23 of the Internal Revenue Code of 1986 only to the extent the aggregate of such expenses does not exceed the applicable limitation under section 23(b)(1) of such Code as in effect on the day before the date of the enactment of the Economic Growth and Tax Relief Reconciliation Act of 2001.

(2) CORRECTIONS TO EXCLUSION FOR EMPLOYER-PROVIDED ADOPTION ASSISTANCE.—

(A) Subsection (a) of section 137 is amended to read as follows:

"(a) EXCLUSION.—

"(1) IN GENERAL.—Gross income of an employee does not include amounts paid or expenses incurred by the employer for qualified adoption expenses in connection with the adoption of a child by an employee if such amounts are furnished pursuant to an adoption assistance program.

"(2) $10,000 EXCLUSION FOR ADOPTION OF CHILD WITH SPECIAL NEEDS REGARDLESS OF EXPENSES.—In the case of an adoption of a child with special needs which becomes final during a taxable year, the qualified adoption expenses with respect to such adoption for such year shall be increased by an amount equal to the excess (if any) of $10,000 over the actual aggregate qualified adoption expenses with respect to such adoption during such taxable year and all prior taxable years.".

(B) Paragraph (2) of section 137(b) is amended by striking "subsection (a)(1)" and inserting "subsection (a)".

(3) EFFECTIVE DATE.—The amendments made by this subsection shall apply to taxable years beginning after December 31, 2002; except that the amendments made by paragraphs (1)(C), (1)(D), and (2)(B) shall apply to taxable years beginning after December 31, 2001.

(d) AMENDMENTS RELATED TO SECTION 205 OF THE ACT.—

(1) Section 45F(d)(4)(B) is amended by striking "subpart A, B, or D of this part" and inserting "this chapter or for purposes of section 55".

(2) Section 38(b)(15) is amended by striking "45F" and inserting "45F(a)".

(e) AMENDMENTS RELATED TO SECTION 301 OF THE ACT.—

(1) Section 63(c)(2) is amended—

(A) in subparagraph (A), by striking "subparagraph (C)" and inserting "subparagraph (D)",

(B) by striking "or" at the end of subparagraph (B),

(C) by redesignating subparagraph (C) as subparagraph (D),

(D) by inserting after subparagraph (B) the following new subparagraph:

"(C) one-half of the amount in effect under subparagraph (A) in the case of a married individual filing a separate return, or", and

(E) by inserting the following flush sentence at the end:

"If any amount determined under subparagraph (A) is not a multiple of $50, such amount shall be rounded to the next lowest multiple of $50.".

(2)(A) Section 63(c)(4) is amended by striking "paragraph (2) or (5)" and inserting "paragraph (2)(B), (2)(D), or (5)".

(B) Section 63(c)(4)(B)(i) is amended by striking "paragraph (2)" and inserting "paragraph (2)(B), (2)(D),".

(C) Section 63(c)(4) is amended by striking the flush sentence at the end (as added by section 301(c)(2) of Public Law 107–17).

(f) AMENDMENT RELATED TO SECTION 401 OF THE ACT.—Section 530(d)(4)(B)(iv) is amended by striking "because the taxpayer elected under paragraph (2)(C) to waive the application of paragraph (2)" and inserting "by application of paragraph (2)(C)(i)(II)".

(g) AMENDMENTS RELATED TO SECTION 511 OF THE ACT.—

(1) Section 2511(c) is amended by striking "taxable gift under section 2503," and inserting "transfer of property by gift,".

(2) Section 2101(b) is amended by striking the last sentence.

(h) AMENDMENT RELATED TO SECTION 532 OF THE ACT.—Section 2016 is amended by striking "any State, any possession of the United States, or the District of Columbia,".

(i) AMENDMENTS RELATING TO SECTION 602 OF THE ACT.—

(1) Subparagraph (A) of section 408(q)(3) is amended to read as follows:

"(A) QUALIFIED EMPLOYER PLAN.—The term 'qualified employer plan' has the meaning given such term by section 72(p)(4)(A)(i); except that such term shall also include an eligible deferred compensation plan (as defined in section 457(b)) of an eligible employer described in section 457(e)(1)(A).".

(2) Section 4(c) of Employee Retirement Income Security Act of 1974 is amended—

(A) by inserting "and part 5 (relating to administration and enforcement)" before the period at the end, and

(B) by adding at the end the following new sentence: "Such provisions shall apply to such accounts and annuities in a manner similar to their application to a simplified employee pension under section 408(k) of the Internal Revenue Code of 1986.".

(j) AMENDMENTS RELATING TO SECTION 611 OF THE ACT.—

(1) Section 408(k) is amended—

(A) in paragraph (2)(C) by striking "$300" and inserting "$450", and

(B) in paragraph (8) by striking "$300" both places it appears and inserting "$450".

(2) Section 409(o)(1)(C)(ii) is amended—

(A) by striking "$500,000" both places it appears and inserting "$800,000", and

(B) by striking "$100,000" and inserting "$160,000".

(3) Section 611(i) of the Economic Growth and Tax Relief Reconciliation Act of 2001 is amended by adding at the end the following new paragraph:

"(3) SPECIAL RULE.—In the case of plan that, on June 7, 2001, incorporated by reference the limitation of section 415(b)(1)(A) of the Internal Revenue Code of 1986, section 411(d)(6) of such Code and section 204(g)(1) of the Employee Retirement Income Security Act of 1974 do not apply to a plan amendment that—

"(A) is adopted on or before June 30, 2002,

"(B) reduces benefits to the level that would have applied without regard to the amendments made by subsection (a) of this section, and

"(C) is effective no earlier than the years described in paragraph (2).".

(k) AMENDMENTS RELATING TO SECTION 613 OF THE ACT.—

(1) Section 416(c)(1)(C)(iii) is amended by striking "EXCEPTION FOR FROZEN PLAN" and inserting "EXCEPTION FOR PLAN UNDER WHICH NO KEY EMPLOYEE (OR FORMER KEY EMPLOYEE) BENEFITS FOR PLAN YEAR".

(2) Section 416(g)(3)(B) is amended by striking "separation from service" and inserting "severance from employment".

(l) AMENDMENTS RELATING TO SECTIONS 614 and 616 OF THE ACT.—

(1) Section 404(a)(12) is amended by striking "(9)," and inserting "(9) and subsection (h)(1)(C),".

(2) Section 404(n) is amended by striking "subsection (a)," and inserting "subsection (a) or paragraph (1)(C) of subsection (h)".

(3) Section 402(h)(2)(A) is amended by striking "15 percent" and inserting "25 percent".

(4) Section 404(a)(7)(C) is amended to read as follows:

"(C) PARAGRAPH NOT TO APPLY IN CERTAIN CASES.—

"(i) BENEFICIARY TEST.—This paragraph shall not have the effect of reducing the amount otherwise deductible under paragraphs (1), (2), and (3), if no employee is a beneficiary under more than 1 trust or under a trust and an annuity plan.

"(ii) ELECTIVE DEFERRALS.—If, in connection with 1 or more defined contribution plans and 1 or more defined benefit plans, no amounts (other than elective deferrals (as defined in section 402(g)(3))) are contributed to any of the defined contribution plans for the taxable year, then subparagraph (A) shall not apply with respect to any of such defined contribution plans and defined benefit plans.".

(m) AMENDMENT RELATING TO SECTION 618 OF THE ACT.—Section 25B(d)(2)(A) is amended to read as follows:

"(A) IN GENERAL.—The qualified retirement savings contributions determined under paragraph (1) shall be reduced (but not below zero) by the aggregate distributions received by the individual during the testing period from any entity of a type to which contributions under paragraph (1) may be made. The preceding sentence shall not apply to the portion of any distribution which is not includible in gross income by reason of a trustee-to-trustee transfer or a rollover distribution.".

(n) AMENDMENTS RELATING TO SECTION 619 OF THE ACT.—

(1) Section 45E(e)(1) is amended by striking "(n)" and inserting "(m)".

(2) Section 619(d) of the Economic Growth and Tax Relief Reconciliation Act of 2001 is amended by striking "established" and inserting "first effective".

(o) AMENDMENTS RELATING TO SECTION 631 OF THE ACT.—

(1) Section 402(g)(1) is amended by adding at the end the following:

"(C) CATCH-UP CONTRIBUTIONS.—In addition to subparagraph (A), in the case of an eligible participant (as defined in section 414(v)), gross income shall not include elective deferrals in excess of the applicable dollar amount under subparagraph (B) to the extent that the amount of such elective deferrals does not exceed the applicable dollar amount under section 414(v)(2)(B)(i) for the taxable year (without regard to the treatment of the elective deferrals by an applicable employer plan under section 414(v)).".

(2) Section 401(a)(30) is amended by striking "402(g)(1)" and inserting "402(g)(1)(A)":

(3) Section 414(v)(2) is amended by adding at the end the following:

"(D) AGGREGATION OF PLANS.—For purposes of this paragraph, plans described in clauses (i), (ii), and (iv) of paragraph (6)(A) that are maintained by the same employer (as determined under subsection (b), (c), (m) or (o)) shall be treated as a single plan, and plans described in clause (iii) of paragraph (6)(A) that are maintained by the same employer shall be treated as a single plan.".

(4) Section 414(v)(3)(A)(i) is amended by striking "section 402(g), 402(h), 403(b), 404(a), 404(h), 408(k), 408(p), 415, or 457" and inserting "section 401(a)(30), 402(h), 403(b), 408, 415(c), and 457(b)(2) (determined without regard to section 457(b)(3))".

(5) Section 414(v)(3)(B) is amended by striking "section 401(a)(4), 401(a)(26), 401(k)(3), 401(k)(11), 401(k)(12), 403(b)(12), 408(k), 408(p), 408B, 410(b), or 416" and inserting "section 401(a)(4), 401(k)(3), 401(k)(11), 403(b)(12), 408(k), 410(b), or 416".

(6) Section 414(v)(4)(B) is amended by inserting before the period at the end the following: ", except that a plan described in clause (i) of section 410(b)(6)(C) shall not be treated as a plan of the employer until the expiration of the transition period with respect to such plan (as determined under clause (ii) of such section)".

(7) Section 414(v)(5) is amended—

(A) by striking ", with respect to any plan year," in the matter preceding subparagraph (A),

(B) by amending subparagraph (A) to read as follows:

"(A) who would attain age 50 by the end of the taxable year,", and

(C) in subparagraph (B) by striking "plan year" and inserting "plan (or other applicable) year".

(8) Section 414(v)(6)(C) is amended to read as follows:

"(C) EXCEPTION FOR SECTION 457 PLANS.—This subsection shall not apply to a participant for any year for which a higher limitation applies to the participant under section 457(b)(3).".

(9) Section 457(e) is amended by adding at the end the following new paragraph:

"(18) COORDINATION WITH CATCH-UP CONTRIBUTIONS FOR INDIVIDUALS AGE 50 OR OLDER.—In the case of an individual who is an eligible participant (as defined by section 414(v)) and who is a participant in an eligible deferred compensation plan of an employer described in paragraph (1)(A), subsections (b)(3) and (c) shall be applied by substituting for the amount otherwise determined under the applicable subsection the greater of—

"(A) the sum of—

"(i) the plan ceiling established for purposes of subsection (b)(2) (without regard to subsection (b)(3)), plus

"(ii) the applicable dollar amount for the taxable year determined under section 414(v)(2)(B)(i), or

"(B) the amount determined under the applicable subsection (without regard to this paragraph).".

(p) AMENDMENTS RELATING TO SECTION 632 OF THE ACT.—

(1) Section 403(b)(1) is amended in the matter following subparagraph (E) by striking "then amounts contributed" and all that follows and inserting the following:

"then contributions and other additions by such employer for such annuity contract shall be excluded from the gross income of the employee for the taxable year to the extent that the aggregate of such contributions and additions (when expressed as an annual addition (within the meaning of section 415(c)(2))) does not exceed the applicable limit under section 415. The amount actually distributed to any distributee under such contract shall be taxable to the distributee (in the year in which so distributed) under section 72 (relating to annuities). For purposes of applying the rules of this subsection to contributions and other additions by an employer for a taxable year, amounts transferred to a contract described in this paragraph by reason of a rollover contribution described in paragraph (8) of this subsection or section 408(d)(3)(A)(ii) shall not be considered contributed by such employer.".

(2) Section 403(b) is amended by striking paragraph (6).

(3) Section 403(b)(3) is amended—

(A) in the first sentence by inserting the following before the period at the end: ", and which precedes the taxable year by no more than five-years", and

(B) in the second sentence by striking "or any amount received by a former employee after the fifth taxable year following the taxable year in which such employee was terminated".

(4) Section 415(c)(7) is amended to read as follows:

"(7) SPECIAL RULES RELATING TO CHURCH PLANS.—

"(A) ALTERNATIVE CONTRIBUTION LIMITATION.—

"(i) IN GENERAL.—Notwithstanding any other provision of this subsection, at the election of a participant who is an employee of a church or a convention or association of churches, including an organization described in section 414(e)(3)(B)(ii), contributions and other additions for an annuity contract or retirement income account described in section 403(b) with respect to such participant, when expressed as an annual addition to such participant's account, shall be treated as not exceeding the limitation of paragraph (1) if such annual addition is not in excess of $10,000.

"(ii) $40,000 AGGREGATE LIMITATION.—The total amount of additions with respect to any participant which may be taken into account for purposes of this subparagraph for all years may not exceed $40,000.

"(B) NUMBER OF YEARS OF SERVICE FOR DULY ORDAINED, COMMISSIONED, OR LICENSED MINISTERS OR LAY EMPLOYEES.—For purposes of this paragraph—

"(i) all years of service by—

"(I) a duly ordained, commissioned, or licensed minister of a church, or

"(II) a lay person,

as an employee of a church, a convention or association of churches, including an organization described in section 414(e)(3)(B)(ii), shall be considered as years of service for 1 employer, and

"(ii) all amounts contributed for annuity contracts by each such church (or convention or association of churches) or such organization during such years for such minister or lay person shall be considered to have been contributed by 1 employer.

"(C) FOREIGN MISSIONARIES.—In the case of any individual described in subparagraph (D) performing services outside the United States, contributions and other additions for an annuity contract or retirement income account described in section 403(b) with respect to such employee, when expressed as an annual addition to such employee's account, shall not be treated as exceeding the limitation of paragraph (1) if such annual addition is not in excess of the greater of $3,000 or the employee's includible compensation determined under section 403(b)(3).

"(D) ANNUAL ADDITION.—For purposes of this paragraph, the term 'annual addition' has the meaning given such term by paragraph (2).

"(E) CHURCH, CONVENTION OR ASSOCIATION OF CHURCHES.—For purposes of this paragraph, the terms 'church' and 'convention or association of churches' have the same meaning as when used in section 414(e).".

(5) Section 457(e)(5) is amended to read as follows:

"(5) INCLUDIBLE COMPENSATION.—The term 'includible compensation' has the meaning given to the term 'participant's compensation' by section 415(c)(3).".

(6) Section 402(g)(7)(B) is amended by striking "2001." and inserting "2001).".

(q) AMENDMENTS RELATING TO SECTION 643 OF THE ACT.—

(1) Section 401(a)(31)(C)(i) is amended by inserting "is a qualified trust which is part of a plan which is a defined contribution plan and" before "agrees".

(2) Section 402(c)(2) is amended by adding at the end the following flush sentence:

"In the case of a transfer described in subparagraph (A) or (B), the amount transferred shall be treated as consisting first of the portion of such distribution that is includible in gross income (determined without regard to paragraph (1)).".

(r) AMENDMENTS RELATING TO SECTION 648 OF THE ACT.—

(1) Section 417(e) is amended—

(A) in paragraph (1) by striking "exceed the dollar limit under section 411(a)(11)(A)" and inserting "exceed the amount that can be distributed without the participant's consent under section 411(a)(11)", and

(B) in paragraph (2)(A) by striking "exceeds the dollar limit under section 411(a)(11)(A)" and inserting "exceeds the amount that can be distributed without the participant's consent under section 411(a)(11)".

(2) Section 205(g) of the Employee Retirement Income Security Act of 1974 is amended—

(A) in paragraph (1) by striking ''exceed the dollar limit under section 203(e)(1)'' and inserting ''exceed the amount that can be distributed without the participant's consent under section 203(e)'', and

(B) in paragraph (2)(A) by striking ''exceeds the dollar limit under section 203(e)(1)'' and inserting ''exceeds the amount that can be distributed without the participant's consent under section 203(e)''.

(s) AMENDMENT RELATING TO SECTION 652 OF THE ACT.—Section 404(a)(1)(D)(iv) is amended by striking ''PLANS MAINTAINED BY PROFESSIONAL SERVICE EMPLOYERS'' and inserting ''SPECIAL RULE FOR TERMINATING PLANS''.

(t) AMENDMENTS RELATING TO SECTION 657 OF THE ACT.—Section 404(c)(3) of the Employee Retirement Income Security Act of 1974 is amended—

(1) by striking ''the earlier of'' in subparagraph (A) the second place it appears, and

(2) by striking ''if the transfer'' and inserting ''a transfer that''.

(u) AMENDMENTS RELATING TO SECTION 659 OF THE ACT.—

(1) Section 4980F is amended—

(A) in subsection (e)(1) by striking ''written notice'' and inserting ''the notice described in paragraph (2)'',

(B) by amending subsection (f)(2)(A) to read as follows:

''(A) any defined benefit plan described in section 401(a) which includes a trust exempt from tax under section 501(a), or'', and

(C) in subsection (f)(3) by striking ''significantly'' both places it appears.

(2) Section 204(h)(9) of the Employee Retirement Income Security Act of 1974 is amended by striking ''significantly'' both places it appears.

(3) Section 659(c)(3)(B) of the Economic Growth and Tax Relief Reconciliation Act of 2001 is amended by striking ''(or'' and inserting ''(and''.

(v) AMENDMENTS RELATING TO SECTION 661 OF THE ACT.—

(1) Section 412(c)(9)(B) is amended—

(A) in clause (ii) by striking ''125 percent'' and inserting ''100 percent'', and

(B) by adding at the end the following new clause:

''(iv) LIMITATION.—A change in funding method to use a prior year valuation, as provided in clause (ii), may not be made unless as of the valuation date within the prior plan year, the value of the assets of the plan are not less than 125 percent of the plan's current liability (as defined in paragraph (7)(B)).''.

(2) Section 302(c)(9)(B) of the Employee Retirement Income Security Act of 1974 is amended—

(A) in clause (ii) by striking ''125 percent'' and inserting ''100 percent'', and

(B) by adding at the end the following new clause:

''(iv) A change in funding method to use a prior year valuation, as provided in clause (ii), may not be made unless as of the valuation date within the prior plan year, the value of the assets of the plan are not less than 125 percent of the plan's current liability (as defined in paragraph (7)(B)).''.

(w) AMENDMENTS RELATING TO SECTION 662 OF THE ACT.—

(1) Section 404(k) is amended—

(A) in paragraph (1) by striking ''during the taxable year'',

(B) in paragraph (2)(B) by striking ''(A)(iii)'' and inserting ''(A)(iv)'',

(C) in paragraph (4)(B) by striking ''(iii)'' and inserting ''(iv)'', and

(D) by redesignating subparagraph (B) of paragraph (4) (as amended by subparagraph (C)) as subparagraph (C) of paragraph (4) and by inserting after subparagraph (A) the following new subparagraph:

''(B) REINVESTMENT DIVIDENDS.—For purposes of subparagraph (A), an applicable dividend reinvested pursuant to clause (iii)(II) of paragraph (2)(A) shall be treated as paid in the taxable year of the corporation in which such dividend is reinvested in qualifying employer securities or in which the election under clause (iii) of paragraph (2)(A) is made, whichever is later.''.

(2) Section 404(k) is amended by adding at the end the following new paragraph:

''(7) FULL VESTING.—In accordance with section 411, an applicable dividend described in clause (iii)(II) of paragraph (2)(A) shall be subject to the requirements of section 411(a)(1).''.

(x) EFFECTIVE DATE.—Except as provided in subsection (c), the amendments made by this section shall take effect as if included in the provisions of the Economic Growth and Tax Relief Reconciliation Act of 2001 to which they relate.

SEC. 412. AMENDMENTS RELATED TO COMMUNITY RENEWAL TAX RELIEF ACT OF 2000.

(a) AMENDMENT RELATED TO SECTION 101 OF THE ACT.—Section 469(i)(3)(E) is amended by striking clauses (ii), (iii), and (iv) and inserting the following:

''(ii) second to the portion of such loss to which subparagraph (C) applies,

''(iii) third to the portion of the passive activity credit to which subparagraph (B) or (D) does not apply,

''(iv) fourth to the portion of such credit to which subparagraph (B) applies, and''.

(b) AMENDMENT RELATED TO SECTION 306 OF THE ACT.—Section 151(c)(6)(C) is amended—

(1) by striking ''FOR EARNED INCOME CREDIT.—For purposes of section 32, an'' and inserting ''FOR PRINCIPAL PLACE OF ABODE REQUIREMENTS.—An'', and

(2) by striking ''requirement of section 32(c)(3)(A)(ii)'' and inserting ''principal place of abode requirements of section 2(a)(1)(B), section 2(b)(1)(A), and section 32(c)(3)(A)(ii)''.

(c) AMENDMENT RELATED TO SECTION 309 OF THE ACT.—Subparagraph (A) of section 358(h)(1) is amended to read as follows:

''(A) which is assumed by another person as part of the exchange, and''.

(d) AMENDMENTS RELATED TO SECTION 401 OF THE ACT.—

(1)(A) Section 1234A is amended by inserting ''or'' after the comma at the end of paragraph (1), by striking ''or'' at the end of paragraph (2), and by striking paragraph (3).

(B)(i) Section 1234B is amended in subsection (a)(1) and in subsection (b) by striking ''sale or exchange'' the first place it appears in each subsection and inserting ''sale, exchange, or termination''.

(ii) Section 1234B is amended by adding at the end the following new subsection:

''(f) CROSS REFERENCE.—

“For special rules relating to dealer securities futures contracts, see section 1256.”.

(2) Section 1091(e) is amended—

(A) in the heading, by striking ''SECURITIES.—'' and inserting ''SECURITIES AND SECURITIES FUTURES CONTRACTS TO SELL.—'',

(B) by inserting after ''closing of a short sale of'' the following: ''(or the sale, exchange, or termination of a securities futures contract to sell)'',

(C) in paragraph (2), by inserting after ''short sale of'' the following: ''(or securities futures contracts to sell)'', and

(D) by adding at the end the following:

''For purposes of this subsection, the term 'securities futures contract' has the meaning provided by section 1234B(c).''.

(3)(A) Section 1233(e)(2) is amended by striking ''and'' at the end of subparagraph (C), by striking the period and inserting ''; and'' at the end of subparagraph (D), and inserting after subparagraph (D) the following:

''(E) entering into a securities futures contract (as so defined) to sell shall be considered to be a short sale, and the settlement of such contract shall be considered to be the closing of such short sale.''.

(B) Section 1234B(b) is amended by inserting after ''or this section,'' the following: ''or in section 1233,''.

(e) EFFECTIVE DATE.—The amendments made by this section shall take effect as if included in the provisions of the Community Renewal Tax Relief Act of 2000 to which they relate.

SEC. 413. AMENDMENTS RELATED TO THE TAX RELIEF EXTENSION ACT OF 1999.

(a) AMENDMENTS RELATED TO SECTION 545 OF THE ACT.—Section 857(b)(7) is amended—

(1) in clause (i) of subparagraph (B), by striking ''the amount of which'' and inserting ''to the extent the amount of the rents'', and

(2) in subparagraph (C), by striking ''if the amount'' and inserting ''to the extent the amount''.

(b) EFFECTIVE DATE.—The amendments made by this section shall take effect as if included in section 545 of the Tax Relief Extension Act of 1999.

SEC. 414. AMENDMENTS RELATED TO THE TAXPAYER RELIEF ACT OF 1997.

(a) AMENDMENTS RELATED TO SECTION 311 OF THE ACT.—Section 311(e) of the Taxpayer Relief Act of 1997 (Public Law 105–34; 111 Stat. 836) is amended—

(1) in paragraph (2)(A), by striking ''recognized'' and inserting ''included in gross income'', and

(2) by adding at the end the following new paragraph:

''(5) DISPOSITION OF INTEREST IN PASSIVE ACTIVITY.—Section 469(g)(1)(A) of the Internal Revenue Code of 1986 shall not apply by reason of an election made under paragraph (1).''.

(b) EFFECTIVE DATE.—The amendments made by this section shall take effect as if included in section 311 of the Taxpayer Relief Act of 1997.

SEC. 415. AMENDMENT RELATED TO THE BALANCED BUDGET ACT OF 1997.

(a) AMENDMENT RELATED TO SECTION 4006 OF THE ACT.—Section 26(b)(2) is amended by striking ''and'' at the end of subparagraph (P), by striking the period and inserting '', and'' at the end of subparagraph (Q), and by adding at the end the following new subparagraph:

''(R) section 138(c)(2) (relating to penalty for distributions from Medicare+Choice MSA not used for qualified medical expenses if minimum balance not maintained).''.

(b) EFFECTIVE DATE.—The amendment made by this section shall take effect as if included in section 4006 of the Balanced Budget Act of 1997.

SEC. 416. OTHER TECHNICAL CORRECTIONS.

(a) COORDINATION OF ADVANCED PAYMENTS OF EARNED INCOME CREDIT.—

(1) Section 32(g)(2) is amended by striking ''subpart'' and inserting ''part''.

(2) The amendment made by this subsection shall take effect as if included in section 474 of the Tax Reform Act of 1984.

(b) SPECIAL RULE RELATED TO WASH SALE LOSSES.—

(1) Section 1256(f) is amended by adding at the end the following new paragraph:

''(5) SPECIAL RULE RELATED TO LOSSES.—Section 1091 (relating to loss from wash sales of stock or securities) shall not apply to any loss taken into account by reason of paragraph (1) of subsection (a).''.

(2) The amendment made by this subsection shall take effect as if included in section 5075 of the Technical and Miscellaneous Revenue Act of 1988.

(c) DISCLOSURE BY SOCIAL SECURITY ADMINISTRATION TO FEDERAL CHILD SUPPORT AGENCIES.—

(1) Section 6103(l)(8) is amended—

(A) in the heading, by striking "STATE AND LOCAL" and inserting "FEDERAL, STATE, AND LOCAL", and

(B) in subparagraph (A), by inserting "Federal or" before "State or local".

(2) The amendments made by this subsection shall take effect on the date of the enactment of this Act.

(d) TREATMENT OF SETTLEMENTS UNDER PARTNERSHIP AUDIT RULES.—

(1) The following provisions are each amended by inserting "or the Attorney General (or his delegate)" after "Secretary" each place it appears:

(A) Paragraphs (1) and (2) of section 6224(c).

(B) Section 6229(f)(2).

(C) Section 6231(b)(1)(C).

(D) Section 6234(g)(4)(A).

(2) The amendments made by this subsection shall apply with respect to settlement agreements entered into after the date of the enactment of this Act.

(e) AMENDMENT RELATED TO PROCEDURE AND ADMINISTRATION.—

(1) Section 6331(k)(3) (relating to no levy while certain offers pending or installment agreement pending or in effect) is amended to read as follows:

"(3) CERTAIN RULES TO APPLY.—Rules similar to the rules of—

"(A) paragraphs (3) and (4) of subsection (i), and

"(B) except in the case of paragraph (2)(C), paragraph (5) of subsection (i),

shall apply for purposes of this subsection.".

(2) The amendment made by this subsection shall take effect on the date of the enactment of this Act.

(f) MODIFIED ENDOWMENT CONTRACTS.—Paragraph (2) of section 318(a) of the Community Renewal Tax Relief Act of 2000 (114 Stat. 2763A-645) is repealed, and clause (ii) of section 7702A(c)(3)(A) shall read and be applied as if the amendment made by such paragraph had not been enacted.

SEC. 417. CLERICAL AMENDMENTS.

(1) The subsection (g) of section 25B that relates to termination is redesignated as subsection (h).

(2) The second sentence of section 42(h)(3)(C) is amended by striking "the amounts described in" and all that follows through the period and inserting "the amounts described in clauses (ii) through (iv) over the aggregate housing credit dollar amount allocated for such year.".

(3) Clause (ii) of section 42(m)(1)(B) is amended by striking the second "and" at the end of subclause (II) and by inserting "and" at the end of subclause (III).

(4) Section 51A(c)(1) is amended by striking "51(d)(10)" and inserting "51(d)(11)".

(5) The flush sentence at the end of clause (ii) of section 56(a)(1)(A) is amended by striking "such 1250" and inserting "such section 1250".

(6) Section 151(c)(6)(B)(iii) is amended by inserting "as" before "such terms".

(7) Section 170(e)(6)(B)(i)(III) is amended by striking "2000," and inserting "2000),".

(8) Section 172(b)(1)(F)(i) is amended—

(A) by striking "3 years" and inserting "3 taxable years", and

(B) by striking "2 years" and inserting "2 taxable years".

(9) Section 351(h)(1) is amended by inserting a comma after "liability".

(10) Section 475(g)(3) is amended by striking "sections" and inserting "section".

(11) Section 529(e)(3)(B)(i) is amended by striking "subsection (b)(7)" and inserting "subsection (b)(6)".

(12) Section 741 is amended by striking "which have appreciated substantially in value".

(13) Section 857(b)(7)(B)(i) is amended by striking "subsection 856(d)" and inserting "section 856(d)".

(14) Subparagraph (B) of section 943(e)(4) is amended by aligning the left margin of the flush language with subparagraph (A).

(15) Subparagraph (B) of section 995(b)(3) is amended by striking "International Security Assistance and Arms Export Control Act of 1976" and inserting "Arms Export Control Act".

(16) Section 1394(c)(2) is amended by striking "subparagraph (A)" and inserting "paragraph (1)".

(17)(A) The section heading for section 4980E is amended to read as follows:

"SEC. 4980E. FAILURE OF EMPLOYER TO MAKE COMPARABLE ARCHER MSA CONTRIBUTIONS.".

(B) The item relating to section 4980E in the table of sections for chapter 43 is amended to read as follows:

"Sec. 4980E. Failure of employer to make comparable Archer MSA contributions.".

(18) Section 6105(c)(1) is amended by striking "any" in subparagraphs (C) and (E).

(19)(A) Section 6227(d) is amended by striking "subsection (b)" and inserting "subsection (c)".

(B) Section 6228 is amended—

(i) in subsection (a)(1), by striking "subsection (b) of section 6227" and inserting "subsection (c) of section 6227",

(ii) in subsection (a)(3)(A), by striking "subsection (b) of", and

(iii) in subsections (b)(1) and (b)(2)(A), by striking "subsection (c) of section 6227" and inserting "subsection (d) of section 6227".

(C) Section 6231(b)(2)(B)(i) is amended by striking "section 6227(c)" and inserting "section 6227(d)".

(20) Section 1221(b)(1)(B)(i) is amended by striking "1256(b))" and inserting "1256(b)))".

(21) Section 159 of the Community Renewal Tax Relief Act of 2000 (114 Stat. 2763A-624) is amended by striking "fuctions" and inserting "functions".

(22) The amendment to section 170(e)(6)(B)(iv) made by section 165(b)(1) of the Community Renewal Tax Relief Act of 2000 (114 Stat. 2763A-626) shall be applied as if it struck "in any of the grades K-12".

(23) Section 618(b)(2) of the Economic Growth and Tax Relief Reconciliation Act of 2001 (Public Law 107-16; 115 Stat. 108) is amended—

(A) in subparagraph (A) by striking "203(d)" and inserting "202(f)", and

(B) in subparagraphs (C), (D), and (E) by striking "203" and inserting "202(f)".

(24)(A) Section 525 of the Ticket to Work and Work Incentives Improvement Act of 1999 (Public Law 106-170; 113 Stat. 1928) is amended by striking "7200" and inserting "7201".

(B) Section 532(c)(2) of such Act (113 Stat. 1930) is amended—

(i) in subparagraph (D), by striking "341(d)(3)" and inserting "341(d)", and

(ii) in subparagraph (Q), by striking "954(c)(1)(B)(iii) and inserting "954(c)(1)(B)".

SEC. 418. ADDITIONAL CORRECTIONS.

(a) AMENDMENTS RELATED TO SECTION 202 OF THE ECONOMIC GROWTH AND TAX RELIEF RECONCILIATION ACT OF 2001.—

(1) Subsection (h) of section 23 is amended—

(A) by striking "subsection (a)(1)(B)" and inserting "subsection (a)(3)", and

(B) by adding at the end the following new flush sentence:

"If any amount as increased under the preceding sentence is not a multiple of $10, such amount shall be rounded to the nearest multiple of $10.".

(2) Subsection (f) of section 137 is amended by adding at the end the following new flush sentence:

"If any amount as increased under the preceding sentence is not a multiple of $10, such amount shall be rounded to the nearest multiple of $10.".

(b) AMENDMENTS RELATED TO SECTION 204 OF THE ECONOMIC GROWTH AND TAX RELIEF RECONCILIATION ACT OF 2001.—Section 21(d)(2) is amended—

(1) in subparagraph (A) by striking "$200" and inserting "$250", and

(2) in subparagraph (B) by striking "$400" and inserting "$500".

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect as if included in the provisions of the Economic Growth and Tax Relief Reconciliation Act of 2001 to which they relate.

TITLE V—SOCIAL SECURITY HELD HARMLESS; BUDGETARY TREATMENT OF ACT

SEC. 501. NO IMPACT ON SOCIAL SECURITY TRUST FUNDS.

(a) IN GENERAL.—Nothing in this Act (or an amendment made by this Act) shall be construed to alter or amend title II of the Social Security Act (or any regulation promulgated under that Act).

(b) TRANSFERS.—

(1) ESTIMATE OF SECRETARY.—The Secretary of the Treasury shall annually estimate the impact that the enactment of this Act has on the income and balances of the trust funds established under section 201 of the Social Security Act (42 U.S.C. 401).

(2) TRANSFER OF FUNDS.—If, under paragraph (1), the Secretary of the Treasury estimates that the enactment of this Act has a negative impact on the income and balances of the trust funds established under section 201 of the Social Security Act (42 U.S.C. 401), the Secretary shall transfer, not less frequently than quarterly, from the general revenues of the Federal Government an amount sufficient so as to ensure that the income and balances of such trust funds are not reduced as a result of the enactment of this Act.

SEC. 502. EMERGENCY DESIGNATION.

Congress designates as emergency requirements pursuant to section 252(e) of the Balanced Budget and Emergency Deficit Control Act of 1985 the following amounts:

(1) An amount equal to the amount by which revenues are reduced by this Act below the recommended levels of Federal revenues for fiscal year 2002, the total of fiscal years 2002 through 2006, and the total of fiscal years 2002 through 2011, provided in the conference report accompanying H. Con. Res. 83, the concurrent resolution on the budget for fiscal year 2002.

(2) Amounts equal to the amounts of new budget authority and outlays provided in this Act in excess of the allocations under section 302(a) of the Congressional Budget Act of 1974 to the Committee on Finance of the Senate for fiscal year 2002, the total of fiscal years 2002 through 2006, and the total of fiscal years 2002 through 2011.

TITLE VI—EXTENSIONS OF CERTAIN EXPIRING PROVISIONS

SEC. 601. ALLOWANCE OF NONREFUNDABLE PERSONAL CREDITS AGAINST REGULAR AND MINIMUM TAX LIABILITY.

(a) IN GENERAL.—Paragraph (2) of section 26(a) is amended—

(1) by striking "RULE FOR 2000 AND 2001.—" and inserting "RULE FOR 2000, 2001, 2002, AND 2003.—", and

(2) by striking "during 2000 or 2001," and inserting "during 2000, 2001, 2002, or 2003,".

(b) CONFORMING AMENDMENTS.—

(1) Section 904(h) is amended by striking "during 2000 or 2001" and inserting "during 2000, 2001, 2002, or 2003".

(2) The amendments made by sections 201(b), 202(f), and 618(b) of the Economic Growth and Tax Relief Reconciliation Act of 2001 shall not

apply to taxable years beginning during 2002 and 2003.

(c) Effective Date.—The amendments made by this section shall apply to taxable years beginning after December 31, 2001.

SEC. 602. CREDIT FOR QUALIFIED ELECTRIC VEHICLES.

(a) In General.—Section 30 is amended—

(1) in subsection (b)(2)—

(A) by striking ‘‘December 31, 2001,’’ and inserting ‘‘December 31, 2003,’’, and

(B) in subparagraphs (A), (B), and (C), by striking ‘‘2002’’, ‘‘2003’’, and ‘‘2004’’, respectively, and inserting ‘‘2004’’, ‘‘2005’’, and ‘‘2006’’, respectively, and

(2) in subsection (e), by striking ‘‘December 31 2004’’ and inserting ‘‘December 31, 2006’’.

(b) Conforming Amendments.—

(1) Subparagraph (C) of section 280F(a)(1) is amended by adding at the end the following new clause:

‘‘(iii) Application of subparagraph.—This subparagraph shall apply to property placed in service after August 5, 1997, and before January 1, 2007.’’.

(2) Subsection (b) of section 971 of the Taxpayer Relief Act of 1997 is amended by striking ‘‘and before January 1, 2005’’.

(c) Effective Date.—The amendments made by this section shall apply to property placed in service after December 31, 2001.

SEC. 603. CREDIT FOR ELECTRICITY PRODUCED FROM CERTAIN RENEWABLE RESOURCES.

(a) In General.—Subparagraphs (A), (B), and (C) of section 45(c)(3) are both amended by striking ‘‘2002’’ and inserting ‘‘2004’’.

(b) Effective Date.—The amendments made by subsection (a) shall apply to facilities placed in service after December 31, 2001.

SEC. 604. WORK OPPORTUNITY CREDIT.

(a) In General.—Subparagraph (B) of section 51(c)(4) is amended by striking ‘‘2001’’ and inserting ‘‘2003’’.

(b) Effective Date.—The amendment made by subsection (a) shall apply to individuals who begin work for the employer after December 31, 2001.

SEC. 605. WELFARE-TO-WORK CREDIT.

(a) In General.—Subsection (f) of section 51A is amended by striking ‘‘2001’’ and inserting ‘‘2003’’.

(b) Effective Date.—The amendment made by subsection (a) shall apply to individuals who begin work for the employer after December 31, 2001.

SEC. 606. DEDUCTION FOR CLEAN-FUEL VEHICLES AND CERTAIN REFUELING PROPERTY.

(a) In General.—Section 179A is amended—

(1) in subsection (b)(1)(B)—

(A) by striking ‘‘December 31, 2001,’’ and inserting ‘‘December 31, 2003,’’, and

(B) in clauses (i), (ii), and (iii), by striking ‘‘2002’’, ‘‘2003’’, and ‘‘2004’’, respectively, and inserting ‘‘2004’’, ‘‘2005’’, and ‘‘2006’’, respectively, and

(2) in subsection (f), by striking ‘‘December 31, 2004’’ and inserting ‘‘December 31, 2006’’.

(b) Effective Date.—The amendments made by subsection (a) shall apply to property placed in service after December 31, 2001.

SEC. 607. TAXABLE INCOME LIMIT ON PERCENTAGE DEPLETION FOR OIL AND NATURAL GAS PRODUCED FROM MARGINAL PROPERTIES.

(a) In General.—Subparagraph (H) of section 613A(c)(6) is amended by striking ‘‘2002’’ and inserting ‘‘2004’’.

(b) Effective Date.—The amendment made by subsection (a) shall apply to taxable years beginning after December 31, 2001.

SEC. 608. QUALIFIED ZONE ACADEMY BONDS.

(a) In General.—Paragraph (1) of section 1397E(e) is amended by striking ‘‘2000, and 2001’’ and inserting ‘‘2000, 2001, 2002, and 2003’’.

(b) Effective Date.—The amendment made by subsection (a) shall apply to obligations issued after the date of the enactment of this Act.

SEC. 609. COVER OVER OF TAX ON DISTILLED SPIRITS.

(a) In General.—Paragraph (1) of section 7652(f) is amended by striking ‘‘January 1, 2002’’ and inserting ‘‘January 1, 2004’’.

(b) Effective Date.—The amendment made by subsection (a) shall apply to articles brought into the United States after December 31, 2001.

SEC. 610. PARITY IN THE APPLICATION OF CERTAIN LIMITS TO MENTAL HEALTH BENEFITS.

(a) In General.—Subsection (f) of section 9812, as amended by the Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 2002, is amended to read as follows:

‘‘(f) Application of Section.—This section shall not apply to benefits for services furnished—

‘‘(1) on or after September 30, 2001, and before January 10, 2002, and

‘‘(2) after December 31, 2003.’’.

(b) Effective Date.—The amendment made by subsection (a) shall apply to plan years beginning after December 31, 2000.

SEC. 611. TEMPORARY SPECIAL RULES FOR TAXATION OF LIFE INSURANCE COMPANIES.

(a) Reduction in Mutual Life Insurance Company Deductions Not To Apply in Certain Years.—Section 809 (relating to reduction in certain deductions of material life insurance companies) is amended by adding at the end the following:

‘‘(j) Differential Earnings Rate Treated as Zero for Certain Years.—Notwithstanding subsection (c) or (f), the differential earnings rate shall be treated as zero for purposes of computing both the differential earnings amount and the recomputed differential earnings amount for a mutual life insurance company's taxable years beginning in 2001, 2002, or 2003.’’.

(b) Effective Date.—The amendment made by this section shall apply to taxable years beginning after December 31, 2000.

SEC. 612. AVAILABILITY OF MEDICAL SAVINGS ACCOUNTS.

(a) In General.—Paragraphs (2) and (3)(B) of section 220(i) (defining cut-off year) are each amended by striking ‘‘2002’’ each place it appears and inserting ‘‘2003’’.

(b) Conforming Amendments.—

(1) Paragraph (2) of section 220(j) is amended by striking ‘‘1998, 1999, or 2001’’ each place it appears and inserting ‘‘1998, 1999, 2001, or 2002’’:

(2) Subparagraph (A) of section 220(j)(4) is amended by striking ‘‘and 2001’’ and inserting ‘‘2001, and 2002’’.

(c) Effective Date.—The amendments made by this section shall take effect on January 1, 2002.

SEC. 613. INCENTIVES FOR INDIAN EMPLOYMENT AND PROPERTY ON INDIAN RESERVATIONS.

(a) Employment.—Subsection (f) of section 45A is amended by striking ‘‘December 31, 2003’’ and inserting ‘‘December 31, 2004’’.

(b) Property.—Paragraph (8) of section 168(j) is amended by striking ‘‘December 31, 2003’’ and inserting ‘‘December 31, 2004’’.

SEC. 614. SUBPART F EXEMPTION FOR ACTIVE FINANCING.

(a) In General.—

(1) Section 953(e)(10) is amended—

(A) by striking ‘‘January 1, 2002’’ and inserting ‘‘January 1, 2007’’, and

(B) by striking ‘‘December 31, 2001’’ and inserting ‘‘December 31, 2006’’.

(2) Section 954(h)(9) is amended by striking ‘‘January 1, 2002’’ and inserting ‘‘January 1, 2007’’.

(b) Life Insurance and Annuity Contracts.—

(1) In general.—Subparagraph (B) of section 954(i)(4) is amended to read as follows:

‘‘(B) Life insurance and annuity contracts.—

‘‘(i) In general.—Except as provided in clause (ii), the amount of the reserve of a qualifying insurance company or qualifying insurance company branch for any life insurance or annuity contract shall be equal to the greater of—

‘‘(I) the net surrender value of such contract (as defined in section 807(e)(1)(A)), or

‘‘(II) the reserve determined under paragraph (5).

‘‘(ii) Ruling request, etc.—The amount of the reserve under clause (i) shall be the foreign statement reserve for the contract (less any catastrophe, deficiency, equalization, or similar reserves), if, pursuant to a ruling request submitted by the taxpayer or as provided in published guidance, the Secretary determines that the factors taken into account in determining the foreign statement reserve provide an appropriate means of measuring income.’’.

(c) Effective Date.—The amendments made by this section shall apply to taxable years beginning after December 31, 2001.

SEC. 615. REPEAL OF REQUIREMENT FOR APPROVED DIESEL OR KEROSENE TERMINALS.

(a) In General.—Subsection (e) of section 4101 is hereby repealed.

(b) Effective Date.—The amendment made by subsection (a) shall take effect on January 1, 2002.

SEC. 616. REAUTHORIZATION OF TANF SUPPLEMENTAL GRANTS FOR POPULATION INCREASES FOR FISCAL YEAR 2002.

Section 403(a)(3) of the Social Security Act (42 U.S.C. 603(a)(3)) is amended by adding at the end the following:

‘‘(H) Reauthorization of grants for fiscal year 2002.—Notwithstanding any other provision of this paragraph—

‘‘(i) any State that was a qualifying State under this paragraph for fiscal year 2001 or any prior fiscal year shall be entitled to receive from the Secretary for fiscal year 2002 a grant in an amount equal to the amount required to be paid to the State under this paragraph for the most recent fiscal year in which the State was a qualifying State;

‘‘(ii) subparagraph (G) shall be applied as if ‘2002’ were substituted for ‘2001’; and

‘‘(iii) out of any money in the Treasury of the United States not otherwise appropriated, there are appropriated for fiscal year 2002 such sums as are necessary for grants under this subparagraph.’’.

SEC. 617. 1-YEAR EXTENSION OF CONTINGENCY FUND UNDER THE TANF PROGRAM.

Section 403(b) of the Social Security Act (42 U.S.C. 603(b)) is amended—

(1) in paragraph (2), by striking ‘‘and 2001’’ and inserting ‘‘2001, and 2002’’; and

(2) in paragraph (3)(C)(ii), by striking ‘‘2001’’ and inserting ‘‘2002’’.

Mr. DASCHLE. Madam President, this unanimous consent is required in order for us to finish our work on the economic stimulus package that was just sent to us this afternoon from the House. Senator LOTT and I have discussed this matter throughout the day. As I said, I had an earlier conversation with the distinguished ranking member of the Finance Committee, as well as the chairman of the Finance Committee, and we are now in a position to proceed to a vote on the stimulus package tomorrow morning.

We haven't set a time, but I expect the votes will be taken at approximately 9:30. So there will be two votes at 9:30—one on the unanimous consent that we have just now agreed to, the so-called economic stimulus unemployment insurance extension legislation, and one on the McCain amendment.

I thank my colleagues for their participation and cooperation.

The PRESIDING OFFICER. The Senator from Virginia is recognized.

Mr. WARNER. Madam President, I have worked closely with Senator COLLINS for some time now on legislation to provide much needed tax relief for our educators. Tonight, I am pleased to report that the Senate should soon pass H.R. 3090, the Job Creation and Worker Assistance Act of 2002, as previously passed by the House of Representatives. With passage of this legislation, Senator COLLINS and I will have finally achieved our shared goal of providing much needed tax relief for our Nation's teachers.

The Collins/Warner provision that is in this legislation, was crafted by Senator COLLINS and myself after months of consultations with Senator GRASSLEY, Senator BAUCUS, Senator ALLEN, and House Ways and Means Chairman THOMAS.

Simply put, the provision provides a $250 above the line deduction for educators who incur out of pocket expenses for supplies they bring into the classroom to better the education of their students. The National Education Association played a key role and its many members should look with pride and satisfaction on their constructive advice to the Congress. The President of the Virginia Education Association, Jean Bankos also helped lead this superb effort. Our teachers in this country are overworked, underpaid, and all too often, under-appreciated. In addition to these factors, our teachers expend significant money out of their own pocket to better the education of our children. Most typically, our teachers are spending significant amounts of money out of their own pocket on classroom expenses—such as books, supplies, pens, paper, and computer equipment. These out of pocket costs place lasting financial burdens on our teachers. This is one reason our teachers are leaving the profession. Little wonder that our country is in the midst of a teacher shortage.

Estimates are that 2.4 million new teachers will be needed by 2009 because of teacher attrition, teacher retirement and increased student enrollment. While the primary responsibility rests with the states, I believe the Federal Government can and should play a role in helping to alleviate the Nation's teaching shortage. On a federal level, we can encourage individuals to enter the teaching profession and remain in the profession by providing tax relief to teachers for the costs that they incur as part of the profession.

Madam President, our teachers have made a personal commitment to educate the next generation and to strengthen America. While many people spend their lives building careers, our teachers spend their careers building lives. The Teacher Tax Relief provisions in this bill go a long way towards providing our teachers with the recognition they deserve by providing teachers with important and much needed tax relief.

I am proud to have had the opportunity to work with Senator COLLINS and so many others to eventually make our goal a reality.

I commend the leadership of the majority and the minority for their efforts. I have long supported the concept of having the stimulus package. While it may not be what each of us wanted, it is essential, particularly the unemployment provisions and the provisions about teachers, with which I have long been associated. I thank the leadership.

Madam President, I commend the President of the United States for his commitment, along with his several Cabinet officers who have fought so strongly for passage of a stimulus package. The American economy is, I believe, showing some signs of recovery, but I believe that this is an additional step to shore up the confidence of the people of this country in the economy.

Within the stimulus package we will vote on tomorrow are provisions that I worked on with Senator COLLINS and others for some time that relate to teachers. In my visits to educational institutions throughout the Commonwealth of Virginia, I have often learned—inadvertently, not because teachers come up to me and tell me about it, because they are rather modest—but, in fact, so many of our teachers, particularly those in the lower grades and those in schools which, for whatever reason, might not be as well financed as other institutions in our State, have taken from their own pockets, funds to buy school supplies which are needed to help their particular students in their classroom perform their educational responsibilities. Sometimes it is paper. Sometimes it is crayons, occasionally books. I find this extraordinary. As I say, they have not come to me and asked: Oh, we want this, we want that. They are very humble about it.

Senator COLLINS and I, and my colleague, Senator ALLEN, who has been very active in the entire area of education with me—I happen to serve on the committee for education in the Senate—but we have as a team, together with other Senators, have been working on this concept for some time.

The National Education Association took a pivotal role in seeing that this legislation was incorporated in the House bill. Now at long last, we do have a measure of success, and it is owed to the teachers and the National Education Association and other colleagues here who have worked on it with me.

I am delighted over the whole prospect of this being passed. It is only a $250 above the line deduction. But at long last teachers can point to something—"this is our's; we helped make it happen, and we are proud of it."

I thank the Chair. I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. REID. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE VIRGINIA GARCIA MEMORIAL HEALTH CENTER

Mr. SMITH of Oregon. Madam President, today I rise today to give tribute to some of the health care heroes in my home State of Oregon. They are the hard-working people who staff the Virginia Garcia Memorial Health Center in Cornelius, OR.

Virginia Garcia was a 6-year-old girl who died from a treatable infection in the 1970s. She died, not because she lacked health care, but because no one spoke to her family in the only language they knew—Spanish.

Access to health care involves more than insurance. Barriers to access continue to exist even when financial problems to health care are removed. Disparities in health care and health outcomes reflect these barriers.

For example, Latinos are twice as likely as White Americans to have diabetes, and twice as likely to have cervical cancer. They also trail other ethnic groups in childhood immunizations and health insurance coverage.

The Virginia Garcia Clinic does a wonderful job at bridging the large gap between access to coverage and access to care. The clinic serves nearly 8,000 patients a year, 80 percent of whom are Spanish speaking, and 90 percent of whom are below the poverty level. Patients in the clinic pay for their services on a sliding scale, sometimes as low as $5 per visit.

Access to high quality, affordable, and culturally accessible care has saved many lives, and improved the quality of lives of many others. I have two true stories to relate to you today, though I really don't need to use their names, because they represent thousands of people across my home State. I will refer to them just as people in need of health care.

One woman who has benefitted from the good works of the Virginia Garcia Clinic came to the clinic after moving to the U.S. from Mexico. She had suffered from breast cancer, and underwent a mastectomy and a long, expensive treatment of chemotherapy that had bankrupted her family. To pay for this treatment, they lost their home.

She turned to the Virginia Garcia Health Center for help. She needed very expensive medication, and the clinic managed to provide it to her. To make matters worse, she also had diabetes and other complicated health problems. Yet the Virginia Garcia Clinic manages her care and arranges for the specialty care that she requires. Without a safety net clinic such as the Virginia Garcia Clinic, she would very likely not get the care she needs to stay healthy for her children and family.

The staff at the clinic have also told me about a farm worker who came to the Virginia Garcia Clinic for an urgent care visit about a rash on his arm. During the exam, the nurse practitioner asked about a lump she noticed on his neck. He hadn't been concerned about it, but the staff at the Virginia Garcia Clinic persisted until he agreed to have a biopsy. The lump turned out to be lymphoma, so the Virginia Garcia Clinic arranged for his chemotherapy at the Oregon Health and Sciences University, where he was treated successfully.

Without a migrant community health center such as Virginia Garcia to provide outreach, the outcome of this story would likely not have been so positive.

Spending time at the Virginia Garcia Clinic, I have met with people with stories such as these and whose lives would have changed for the worse without the efforts of the hard-working and dedicated staff.

Truly, these people, these staff workers are health care heroes, and we desperately need them in our quest to ensure that every person in this country has access to health care.

So today, I salute the work and the workers of the Virginia Garcia Clinic, true heroes in the State of Oregon.

IN RECOGNITION OF SERGEANT PHILIP SVITAK

Mr. NELSON of Nebraska. Madam President, this week during the war against terror in Afghanistan America lost eight soldiers and Nebraska lost a native son. These soldiers died valiantly protecting the rights, ideals, values, and way of life that Americans enjoy.

Sgt. Philip Svitak, a member of the Second Battalion, 160th Special Operations Aviation Regiment, was born in Lincoln and raised in Fremont. He graduated from Fremont High School in 1989 and entered the Army where he served in the Gulf War.

Sgt. Svitak's parents have said that growing up, he dreamed of a career with the military service. His favorite gifts would be colored the familiar green olive drab. But he also enjoyed fixing things, hunting, and skateboarding. He loved his wife, Laura, and their two young sons, Nolan and Ethan. Before departing for Afghanistan, he told his family that "the terrorists have to be stopped." Philip has made the ultimate contribution.

Those who knew Sgt. Svitak will remember him as a levelheaded and caring friend and father. Those of us who did not, will remember him as well, as a brave and dedicated soldier who made the ultimate sacrifice for a forever grateful nation.

We thank Sgt. Svitak for his service and his sacrifices. Our thoughts and prayers are with his family and the families of other servicemen and women as they endure their loss of their loved ones who have been killed defending our freedom.

LOCAL LAW ENFORCEMENT ACT OF 2001

Mr. SMITH of Oregon. Madam President, I rise today to speak about hate crimes legislation I introduced with Senator KENNEDY in March of last year. The Local Law Enforcement Act of 2001 would add new categories to current hate crimes legislation sending a signal that violence of any kind is unacceptable in our society.

I would like to describe a terrible crime that occurred in September 1997 in Tulsa, OK. Two gay men were severely beaten after leaving a bar. After being arrested, the assailants told police they were "only rolling a couple of fags."

I believe that government's first duty is to defend its citizens, to defend them against the harms that come out of hate. The Local Law Enforcement Enhancement Act of 2001 is now a symbol that can become substance. I believe that by passing this legislation, we can change hearts and minds as well.

NOMINATION OF JOE SCHMITZ

Mr. SMITH of New Hampshire. Madam President, I believe that the Department of Defense Inspector General position is among the most important in the Department, because the IG office is responsible for ensuring accountability and efficiency, and therefore is the heart of integrity in the Pentagon.

There have been numerous scandals in the IG office in the recent past, which has been rudderless, without a confirmed nominee for 3 years. With the IG office in disarray, there is the impression left that the Department is without proper and necessary oversight. I am also told that the IG office has been headless for some 10 years over the past couple of decades—which is a disgrace. Without strong leadership, direction and motivation, no office can function efficiently and effectively.

Secretary Rumsfeld needs an Inspector General. We are, after all, at war. Joe Schmitz was the choice of the Secretary of Defense and the choice of President Bush for this important post. Mr. Schmitz is an individual with a strong background for the job, and with impeccable personal and professional credentials. I hope that we can move forward expeditiously with his nomination, now that it has been cleared both by the Armed Services committee—by voice vote—and by the Government Affairs Committee.

Individuals who undergo the nomination process put their names and reputations on the line, opening themselves up to intense scrutiny of their past employment, their finances, their conduct and their associations. They fill out hundreds of documents. Mr. Schmitz has been held up for long enough—there are no ethical issues impacting his nomination, and he has received strong recommendations from those who know him and have worked with him, regardless of party affiliation.

I believe that Joe Schmitz was a superlative choice by Secretary Rumsfeld and president Bush, and that he will make an outstanding IG. The Senate needs to act now, to fill this important position at the Department of Defense and to give Secretary Rumsfeld the team he needs to do his job.

ADDITIONAL STATEMENTS

WALTER JOHANNSEN

• Mr. WELLSTONE. Mr. President, I rise today to talk about the extraordinary service of Walter "Bud" Johannsen and the extraordinary dedication he has shown to the Lake George, MN community. It is extraordinary in its duration. It is extraordinary in its selflessness. And it is a wonderful example of community service at its best.

Week after week for the past forty years Bud Johannsen has been on call twenty four hours a day, seven days a week as a volunteer firefighter for the Lake George Volunteer Fire Department, the only fire department that services this peaceful north central community and its surrounding area. And week after week he has accepted the risks inherent in a job of this nature. Week after week. For forty years. Voluntarily. Without pay.

He has done this while maintaining a full-time job, raising a family and participating in community affairs. He has done this while demonstrating a positive attitude, a wonderful sense of humor and a willingness to lend a helping hand wherever and whenever needed.

That is dedication. That is the American spirit at its best.

Now I know that Bud Johannsen is not the first individual to ever volunteer his time. Nor will he be the last. But when I hear of such a milestone, 40 years as a volunteer firefighter, I feel the need to recognize and publicly thank that individual for his service, especially in light of the events of September 11 when we saw all too clearly the sometimes tragic consequences of such courage and commitment.

So today I thank Walter "Bud" Johannsen. I thank his wife Kay and his daughter Tracy for sharing him with the Lake George community for so many years. And I thank all the members of the Lake George Volunteer Fire Department for the great work that they do. They are all truly inspiring.•

TRIBUTE TO DIANE RUMER

• Mr. BUNNING. Madam President, today I have the distinct honor of rising to share with my fellow colleagues the poetic work of Diane Rumer of Florence, Kentucky.

The tragic events of September 11 has affected us all in so many different ways. Some have lost loved ones. Some have sacrificed their lives to save others. And some have simply wept. We all have different methods of dealing with such tragic circumstances, and I personally have found a certain degree of solace in Diane Rumer's poem entitled American Angel. I am honored to share her work with you.

God Bless our country,
And all we hold dear:
Faith and our freedom,
And life without fear.

Guard her and guide her,
Protect her, we pray.
Send angels among us
To show us the way.

Every time I read these beautiful words, I find myself visualizing the American angels Diane so gracefully describes in her poem. I see a soldier fighting at home and abroad to rid the world of terrorism and oppression. I see a fireman racing into a burning building to save the life of a complete stranger. I see a blood donor. I see an aid worker. I see a family raising a flag in their front yard. After reading this, I realize there are angels surrounding us in every aspect of life, trying desperately to show us the way.

I would like to thank Diane for this inspirational piece. Her words are a truly a comfort in times of strife.•

MESSAGES FROM THE HOUSE

At 11:42 a.m., a message from the House of Representatives, delivered by Mr. Hays, one of its reading clerks, announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 1870. An act to provide for the sale of certain real property within the Newlands Project in Nevada, to the city of Fallon, Nevada.

H.R. 1883. An act to authorize the Secretary of the Interior to conduct a feasibility study on water optimization in the Burnt River basin, Malheur River basin, Owyhee River basin, and Powder River basin, Oregon.

H.R. 1963. An act to amend the National Trails System Act to designate the route taken by American soldier and frontiersman George Rogers Clark and his men during the Revolutionary War to capture the British forts at Kaskaskia and Cahokia, Illinois, and Vincennes, Indiana, for study for potential addition to the National Trails System.

The message also announced that the House has passed the following joint resolution, without amendment:

S.J. Res. 32. A joint resolution congratulating the United States Military Academy at West Point on its bicentennial anniversary, and commending its outstanding contributions to the Nation.

The message further announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 275. Concurrent resolution expressing the sense of the Congress that hunting seasons for migratory mourning doves should be modified so that individuals have a fair and equitable opportunity to hunt such birds.

ENROLLED JOINT RESOLUTION SIGNED

At 2:26 p.m., a message from the House of Representatives, delivered by Mr. Hays, one of its reading clerks, announced that the Speaker has signed the following enrolled joint resolution:

S.J. Res. 32. A joint resolution congratulating the United States Military Academy at West Point on its bicentennial anniversary, and commending its outstanding contributions to the Nation.

The enrolled joint resolution was signed subsequently by the President pro tempore (Mr. BYRD).

At 3:50 p.m., a message from the House of Representatives, delivered by Ms. Niland, one of its reading clerks, announced that the House has agreed to the amendment of the Senate to the bill (H.R. 3090) to provide tax incentives for economic recovery, with an amendment, in which it requests the concurrence of the Senate.

The message also announced that the Speaker has appointed the following members as additional conferees in the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 2646) to provide for the continuation of agricultural programs through fiscal year 2011:

As additional conferees from the Committee on the Budget, for consideration of section 197 of the Senate amendment, and modifications committed to conference: Mr. NUSSLE, Mr. SUNUNU, and Mr. SPRATT.

From the Committee on Education and the Workforce, for consideration of sections 453–5, 457–9, 460–1, and 464 of the Senate amendment, and modifications committed to conference: Mr. CASTLE, Mr. OSBORNE, and Mr. KILDEE.

From the Committee on Energy and Commerce, for consideration of sections 213, 605, 627, 648, 652, 902, 1041, and 1079E of the Senate amendment, and modifications committed to conference: Mr. TAUZIN, Mr. BARTON of Texas, and Mr. DINGELL.

From the Committee on Financial Services, for consideration of sections 335, and 601 of the Senate amendment, and modifications committed to conference: Mr. OXLEY, Mr. BACHUS, and Mr. LAFALCE.

From the Committee on International Relations, for consideration of title III of the House bill and title III of the Senate amendment, and modifications committed to conference: Mr. HYDE, Mr. SMITH of New Jersey, and Mr. LANTOS.

From the Committee on the Judiciary, for consideration of sections 940–1 of the House bill and sections 602, 1028–9, 1033–5, 1046, 1049, 1052–3, 1058, 1068–9, 1070–1, 1098, and 1098A of the Senate amendment, and modifications committed to conference: Mr. SENSENBRENNER, Mr. GREEN of Wisconsin, and Ms. BALDWIN.

From the Committee on Resources, for consideration of sections 201, 203, 211, 213, 215–7, 262, 721, 786, 806, 810, 817–8, 1069, 1070, and 1076 of the Senate amendment, and modifications committed to conference: Mr. HANSEN, Mr. YOUNG of Alaska, and Mr. KIND.

From the Committee on Science, for consideration of sections 808, 811, 902–3, and 1079 of the Senate amendment, and modifications committed to conference: Mr. BOEHLERT, Mr. BALLENGER, and Mr. HALL of Texas.

From the Committee on Ways and Means, for consideration of sections 127 and 146 of the House bill and sections 144, 1024, 1038, and 1070 of the Senate amendment, and modifications committed to conference: Mr. THOMAS, Mr. HERGER, and Mr. RANGEL.

ENROLLED BILL SIGNED

The following enrolled bill, previously signed by the Speaker of the House, was signed today, March 7, 2002, by the president pro tempore (Mr. BYRD):

S. 1857. An act to encourage the negotiated settlement of tribal claims.

MEASURES REFERRED

The following bills were read the first and the second times by unanimous consent, and referred as indicated:

H.R 1870. An act to provide for the sale of certain real property within the Newlands Project in Nevada, to the city of Fallon, Nevada; to the Committee on Energy and Natural Resources.

H.R. 1963. An act to amend the National trails System Act to designate the route taken by American soldier and frontiersman George Rogers Clark and his men during the Revolutionary War to capture the British forts at Kaskaskia and Cahokia, Illinois, and Vincennes, Indiana, for study for potential addition to the National Trails System; to the Committee on Energy and Natural Resources.

The following concurrent resolution was read, and referred as indicated:

H. Con. Res. 275. Concurrent resolution expressing the sense of the Congress that hunting seasons for migratory mourning doves should be modified so that individuals have a fair and equitable opportunity to hunt such birds; to the Committee on Environment and Public Works.

MEASURES PLACED ON THE CALENDAR

The following bill was read the first and second times by unanimous consent, and placed on the calendar:

H.R. 1883. An act to authorize the Secretary of the Interior to conduct a feasibility study on water optimization in the Burnt River basin, Malheur River basin, Owyhee River basin, and Powder River basin, Oregon.

ENROLLED BILL AND JOINT RESOLUTION PRESENTED

The Secretary of the Senate reported that on today, March 7, 2002, she had presented to the President of the United States the following enrolled bill and joint resolution:

S. 1857. An act to encourage the negotiated settlement of tribal claims.

S.J. Res. 32. A joint resolution congratulating the United States Military Academy at West Point on its bicentennial anniversary, and commending its outstanding contributions to the Nation.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC–5615. A communication from the Deputy Assistant Secretary for Program Operations, Pension and Welfare Benefits Administration, Department of Labor, transmitting, pursuant to law, the report of a rule entitled "Class Exemption for Cross-Trades of Securities by Index and Model-Driven Funds" (RIN1210–ZA01) received on February 12, 2002; to the Committee on Health, Education, Labor, and Pensions.

EC–5616. A communication from the Assistant Secretary of Legislative Affairs, Department of State, transmitting, pursuant to law, the Presidential Determination Number 2002–07, relative to major drug transit or major illicit drug producing countries; to the Committee on Foreign Relations.

EC–5617. A communication from the Senior Regulations Analyst, Saint Lawrence Seaway Development Corporation, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Tariff of Tolls" (RIN2135–AA14) received on February 14, 2002; to the Committee on Environment and Public Works.

EC–5618. A communication from the Director of the Fish and Wildlife Service, Department of the Interior, transmitting, pursuant to law, the report of a rule entitled "Endangered and Threatened Wildlife and Plants; Endangered Status for the Buena Vista Lake shrew (Sorex ornatus relictus)" (RIN1018–AG04) received on March 6, 2002; to the Committee on Environment and Public Works.

EC–5619. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14–278, "District of Columbia Emancipation Day Fund Temporary Act of 2002"; to the Committee on Governmental Affairs.

EC–5620. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14–277, "Residential Permit Parking Area Temporary Amendment Act of 2002"; to the Committee on Governmental Affairs.

EC–5621. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14–276, "John T. 'Big John' Williams Building Designation Act of 2002"; to the Committee on Governmental Affairs.

EC–5622. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14–274, "Closing of a Portion of a Public Alley in Square 236, S.O. 01–2919 Act of 2002"; to the Committee on Governmental Affairs.

EC–5623. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14–270, "North Capitol Expansion and Expansion of Business Improvement Districts Temporary Amendment Act of 2002"; to the Committee on Governmental Affairs.

EC–5624. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14–271, "Washington Convention Center Authority Oversight and Management Continuity Temporary Amendment Act of 2002"; to the Committee on Governmental Affairs.

EC–5625. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14–272, "Eastern Avenue Tour Bus Parking Prohibition Temporary Amendment Act of 2002"; to the Committee on Governmental Affairs.

EC–5626. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14–269, "Closing of a Public Alley in Square 528 S.O. 01–173, Act of 2002"; to the Committee on Governmental Affairs.

EC–5627. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14–268, "Food Regulation Amendment Act of 2002"; to the Committee on Governmental Affairs.

EC–5628. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14–292, "Mental Health Commitment Temporary Act of 2002"; to the Committee on Governmental Affairs.

EC–5629. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14–291, "Vendor Payment Authorization Temporary Amendment Act of 2002"; to the Committee on Governmental Affairs.

EC–5630. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14–289, "Wooly Mammoth Theatre Tax Abatement Act of 2002"; to the Committee on Governmental Affairs.

EC–5631. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14–290, "Square 456 Payment in Lieu of Taxes Act of 2002"; to the Committee on Governmental Affairs.

EC–5632. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14–288, "Edward 'Duke' Ellington Plaza Designation Act of 2002"; to the Committee on Governmental Affairs.

EC–5633. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14–279, "Towing Vehicles Rulemaking Authority Temporary Act of 2002"; to the Committee on Governmental Affairs.

EC–5634. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14–275, "Closing of a Public Alley in Square 628, S.O. 00-96 Act of 2002"; to the Committee on Governmental Affairs.

EC–5635. A communication from the Administrator of Tobacco Programs, Agriculture Marketing Service, Department of Agriculture, transmitting, pursuant to law, the report of a rule entitled "Tobacco Inspection; Producer Referenda on Mandatory Grading" (Doc. No. TB–02–03) received on March 4, 2002; to the Committee on Agriculture, Nutrition, and Forestry.

EC–5636. A communication from the Administrator of the Rural Utilities Service, Department of Agriculture, transmitting, pursuant to law, the report of a rule entitled "Distance Learning and Telemedicine Loan and Grant Program" (RIN0572–AB70) received on March 4, 2002; to the Committee on Agriculture, Nutrition, and Forestry.

EC–5637. A communication from the Congressional Review Coordinator of Policy and Program Development, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting, pursuant to law, the report of a rule entitled "Change in Disease Status of Japan Because of BSE" (Doc. No. 01–094–2) received on March 4, 2002; to the Committee on Agriculture, Nutrition, and Forestry.

EC–5638. A communication from the Congressional Review Coordinator of Policy and Program Development, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting, pursuant to law, the report of a rule entitled "Black Stem Rust; Identification Requirements and Addition of Rust-Resistant Varieties" (Doc. No. 97–053–3) received on March 4, 2002; to the Committee on Agriculture, Nutrition, and Forestry.

EC–5639. A communication from the Congressional Review Coordinator, Policy and Program Development, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting, pursuant to law, the report of a rule entitled "West Indian Fruit Fly" (Doc. No. 00–110–4) received on March 4, 2002; to the Committee on Agriculture, Nutrition, and Forestry.

EC–5640. A communication from the Congressional Review Coordinator, Policy and Program Development, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting, pursuant to law, the report of a rule entitled "National Poultry Improvement Plan and Auxiliary Provisions" (Doc. No. 00–075–2) received on March 4, 2002; to the Committee on Agriculture, Nutrition, and Forestry.

EC-5641. A communication from the Congressional Review Coordinator, Policy and Program Development, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting, pursuant to law, the report of a rule entitled "Steam Treatment of Golden Nematode-Infested Farm Equipment, Construction Equipment, and Containers" (Doc. No. 01-050-1) received on March 4, 2002; to the Committee on Agriculture, Nutrition, and Forestry.

EC-5642. A communication from the Congressional Review Coordinator, Policy and Program Development, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting, pursuant to law, the report of a rule entitled "Change in Disease Status of Greece Because of BSE" (Doc. No. 01-065-2) received on March 4, 2002; to the Committee on Agriculture, Nutrition, and Forestry.

EC-5643. A communication from the Congressional Review Coordinator, Policy and Program Development, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting, pursuant to law, the report of a rule entitled "Citrus Canker; Quarantined Areas" (Doc. No. 01-079-2) received on March 4, 2002; to the Committee on Agriculture, Nutrition, and Forestry.

EC-5644. A communication from the Congressional Review Coordinator, Policy and Program Development, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting, pursuant to law, the report of a rule entitled "Asian Longhorned Beetle; Addition to Quarantined Areas" (Doc. No. 01-092-2) received on March 4, 2002; to the Committee on Agriculture, Nutrition, and Forestry.

EC-5645. A communication from the Administrator of the Agricultural Marketing Service, Fruit and Vegetable Programs, Department of Agriculture, transmitting, pursuant to law, the report of a rule entitled "Tart Cherries Grown in the States of Michigan, et al.; Modifications to the Rules and Regulations Under the Tart Cherry Marketing Order" (Doc. No. FV01-930-0 FIR) received on March 6, 2002; to the Committee on Agriculture, Nutrition, and Forestry.

EC-5646. A communication from the Administrator of the Agricultural Marketing Service, Fruit and Vegetable Programs, Department of Agriculture, transmitting, pursuant to law, the report of a rule entitled "Hazelnuts Grown in Oregon and Washington; Establishment of Reporting Requirements for Imported Hazelnuts" (Doc. No. FV01-982-3 FR) received on March 6; 2002; to the Committee on Agriculture, Nutrition, and Forestry.

EC-5647. A communication from the Administrator of the Agricultural Marketing Service, Fruit and Vegetable Programs, Department of Agriculture, transmitting, pursuant to law, the report of a rule entitled "Irish Potatoes Grown in Colorado; Suspension of Continuing Assessment Rate" (Doc. No. FV01-948-2 FIR) received on March 6, 2002; to the Committee on Agriculture, Nutrition, and Forestry.

EC-5648. A communication from the Administrator of the Agricultural Marketing Service, Fruit and Vegetable Programs, Department of Agriculture, transmitting, pursuant to law, the report of a rule entitled "Olives Grown in California; Decreased Assessment Rate" (Doc. No. FV02-932-1 IFR) received on March 6, 2002; to the Committee on Agriculture, Nutrition, and Forestry.

EC-5649. A communication from the Administrator of the Agricultural Marketing Service, Fruit and Vegetable Programs, Department of Agriculture, transmitting, pursuant to law, the report of a rule entitled "Domestic Dates Produced or Packed in Riverside County, California; Increased Assessment Rate" (Doc. No. FV01-987-1 FR) received on March 6, 2002; to the Committee on Agriculture, Nutrition, and Forestry.

EC-5650. A communication from the Administrator of the Agricultural Marketing Service, Fruit and Vegetable Programs, Department of Agriculture, transmitting, pursuant to law, the report of a rule entitled "Raisin Produced from Grapes Grown in California; Extension of Redemption Date for Unsold 2001 Diversion Certificates" (Doc. No. FV02-989-3 IFR) received on March 6, 2002; to the Committee on Agriculture, Nutrition, and Forestry.

EC-5651. A communication from the Administrator of the Agricultural Marketing Service, Fruit and Vegetable Programs, Department of Agriculture, transmitting, pursuant to law, the report of a rule entitled "Fresh Prunes Grown in Designated Counties in Washington and Umatilla County, Oregon; Decreased Assessment Rate" (Doc. No. FV01-924-1 FIR) received on March 6, 2002; to the Committee on Agriculture, Nutrition, and Forestry.

EC-5652. A communication from the Administrator of the Agricultural Marketing Service, Fruit and Vegetable Programs, Department of Agriculture, transmitting, pursuant to law, the report of a rule entitled "Fresh Bartlett Pears Grown in Oregon and Washington; Increased Assessment Rate" (Doc. No. FV01-931-1 FR) received on March 6, 2002; to the Committee on Agriculture, Nutrition, and Forestry.

EC-5653. A communication from the Administrator of the Agricultural Marketing Service, Fruit and Vegetable Programs, Department of Agriculture, transmitting, pursuant to law, the report of a rule entitled "Irish Potatoes Grown in Colorado; Increased Assessment Rate" (Doc. No. FV01-948-3 FR) received on March 6, 2002; to the Committee on Agriculture, Nutrition, and Forestry.

EC-5654. A communication from the Administrator of the Agricultural Marketing Service, Fruit and Vegetable Programs, Department of Agriculture, transmitting, pursuant to law, the report of a rule entitled "Limes Grown in Florida and Imported Limes; Suspension of Regulations" (Doc. No. FV01-911-2 FR) received on March 6, 2002; to the Committee on Agriculture, Nutrition, and Forestry.

EC-5655. A communication from the Administrator of the Agricultural Marketing Service, Fruit and Vegetable Programs, Department of Agriculture, transmitting, pursuant to law, the report of a rule entitled "Winter Pears Grown in Oregon and Washington; The Establishment of a Supplemental Rate of Assessment for the Beurre d'Anjou Variety of Pears and of a Definition for Organically Produced Pears" (Doc. No. FV01-927-1 FR) received on March 6, 2002; to the Committee on Agriculture, Nutrition, and Forestry.

EC-5656. A communication from the Administrator of the Agricultural Marketing Service, Fruit and Vegetable Programs, Department of Agriculture, transmitting, pursuant to law, the report of a rule entitled "Cranberries Grown in the States of Massachusetts, et al.; Increased Assessment Rate" (Doc. No. FV01-929-3 FR) received on March 6, 2002; to the Committee on Agriculture, Nutrition, and Forestry.

EC-5657. A communication from the Administrator of the Agricultural Marketing Service, Fruit and Vegetable Programs, Department of Agriculture, transmitting, pursuant to law, the report of a rule entitled "Hass Avocados Promotion, Research and Information Order; Referendum Procedures" (Doc. No. FV-01-706-FR) received on March 6, 2002; to the Committee on Agriculture, Nutrition, and Forestry.

EC-5658. A communication from the Administrator of the Agricultural Marketing Service, Fruit and Vegetable Programs, Department of Agriculture, transmitting, pursuant to law, the report of a rule entitled "Walnuts Grown in California; Decreased Assessment Rate" (Doc. No. FV01-984-1 FIR) received on March 6, 2002; to the Committee on Agriculture, Nutrition, and Forestry.

EC-5659. A communication from the Administrator of the Agricultural Marketing Service, Fruit and Vegetable Programs, Department of Agriculture, transmitting, pursuant to law, the report of a rule entitled "Kiwifruit Grown in California; Relaxation of Pack Requirements" (Doc. No. FV02-920-1 IFR) received on March 6, 2002; to the Committee on Agriculture, Nutrition, and Forestry.

EC-5660. A communication from the Administrator of the Agricultural Marketing Service, Fruit and Vegetable Programs, Department of Agriculture, transmitting, pursuant to law, the report of a rule entitled "Dried Prunes Produced in California; Increased Assessment Rate" (Doc. No. FV01-993-3 FR) received on March 6, 2002; to the Committee on Agriculture, Nutrition, and Forestry.

EC-5661. A communication from the Administrator of the Agricultural Marketing Service, Fruit and Vegetable Programs, Department of Agriculture, transmitting, pursuant to law, the report of a rule entitled "Oranges, Grapefruit, Tangerines, and Tangelos Grown in Florida; Decreased Assessment Rate" (Doc. No. FV01-905-3 IFR) received on March 6, 2002; to the Committee on Agriculture, Nutrition, and Forestry.

EC-5662. A communication from the Administrator of the Agricultural Marketing Service, Fruit and Vegetable Programs, Department of Agriculture, transmitting, pursuant to law, the report of a rule entitled "Tomatoes Grown in Florida; Decreased Assessment Rate" (Doc. No. FV01-966-2 IFR) received on March 6, 2002; to the Committee on Agriculture, Nutrition, and Forestry.

EC-5663. A communication from the Acting Administrator of the Agricultural Marketing Service, Fruit and Vegetable Programs, Department of Agriculture, transmitting, pursuant to law, the report of a rule entitled "Nectarines Grown in California; Increased Assessment Rate" (Doc. No. FV01-916-2 FR) received on March 6, 2002; to the Committee on Agriculture, Nutrition, and Forestry.

EC-5664. A communication from the Acting Administrator of the Fruit and Vegetable Programs, Research and Promotion Branch, Agricultural Marketing Service, Department of Agriculture, transmitting, pursuant to law, the report of a rule entitled "Referendum Procedures under the Watermelon Research and Promotion Plan" (Doc. No. FV01-701-FR) received on March 6, 2002; to the Committee on Agriculture, Nutrition, and Forestry.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. LEAHY, from the Committee on the Judiciary, without amendment and with a preamble:

S. Res. 214: A resolution designating March 25, 2002, as "Greek Independence Day: A National Day of Celebration of Greek and American Democracy."

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. LEAHY for the Committee on the Judiciary.

David C. Bury, of Arizona, to be United States District Judge for the District of Arizona.

Randy Crane, of Texas, to be United States District Judge for the Southern District of Texas.

Ralph R. Beistline, of Alaska, to be United States District Judge for the District of Alaska.

Paul I. Perez, of Florida, to be United States Attorney for the Middle District of Florida, for the term of four years.

Eric F. Melgren, of Kansas, to be United States Attorney for the District of Kansas for the term of four years.

Dennis Cluff Merrill, of Oregon, to be United States Marshal for the term of four years.

John Schickel, of Kentucky, to be United States Marshal for the Eastern District of Kentucky for the term of four years.

William R. Whittington, of Louisiana, to be United States Marshal for the Western District of Louisiana for the term of four years.

Stephen Gilbert Fitzgerald, of Wisconsin, to be United States Marshal for the Western District of Wisconsin for the term of four years.

J.C. Rafferty, of West Virginia, to be United States Marshal for the Northern District of West Virginia for the term of four years.

James Anthony Rose, of Wyoming, to be United States Marshal for the District of Wyoming for the term of four years.

James Loren Kennedy, of Indiana, to be United States Marshal for the Southern District of Indiana for the term of four years.

Theophile Alceste Duroncelet, of Louisiana, to be United States Marshal for the Eastern District of Louisiana for the term of four years.

James Thomas Plousis, of New Jersey, to be United States Marshal for the District of New Jersey for the term of four years.

Charles R. Reavis, of North Carolina, to be United States Marshal for the Eastern District of North Carolina for the term of four years.

Timothy Dewayne Welch, of Oklahoma, to be United States Marshal for the Northern District of Oklahoma for the term of four years.

Michael Robert Regan, of Pennsylvania, to be United States Marshal for the Middle District of Pennsylvania for the term of four years.

Jesse Seroyer, Jr., of Alabama, to be United States Marshal for the Middle District of Alabama for the term of four years.

Gregory Allyn Forest, of North Carolina, to be United States Marshal for the Western District of North Carolina for the term of four years.

John R. Edwards, of Vermont, to be United States Marshal for the District of Vermont for the term of four years.

(Nominations without an asterisk were reported with the recommendations that they be confirmed.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second times by unanimous consent, and referred as indicated:

By Mr. SMITH of New Hampshire (for himself, Mr. Enzi, and Mr. Thomas):

S. 1996. A bill to amend title 18, United States Code, to protect citizens' rights under the Second Amendment to obtain firearms for legal use, and for other purposes; to the Committee on the Judiciary.

By Mrs. CARNAHAN:

S. 1997. A bill to require a pilot program to assess the adoption of the Air Force Expeditionary Medical Support System by the Air National Guard; to the Committee on Armed Services.

By Mr. ENSIGN (for himself and Mr. Allard):

S. 1998. A bill to amend the Higher Education Act of 1965 with respect to the qualifications of foreign schools; to the Committee on Health, Education, Labor, and Pensions.

By Mr. JOHNSON (for himself and Mr. Daschle):

S. 1999. A bill to reauthorize the Mni Wiconi Rural Water Supply Project; to the Committee on Energy and Natural Resources.

By Ms. STABENOW:

S. 2000. A bill to amend the Internal Revenue Code of 1986 to provide for a special depreciation allowance for certain property acquired after December 31, 2001, and before January 1, 2004; to the Committee on Finance.

By Mr. CAMPBELL:

S. 2001. A bill to require the Secretary of Defense to report to Congress regarding the requirements applicable to the inscription of veterans' names on the memorial wall of the Vietnam Veterans Memorial; to the Committee on Armed Services.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. CRAIG (for himself, Mr. Cleland, Mr. Allen, Mr. Bayh, Mr. Bingaman, Mrs. Boxer, Mr. Breaux, Mr. Burns, Mr. Campbell, Ms. Cantwell, Mr. Cochran, Mr. Crapo, Mr. Daschle, Mr. DeWine, Mr. Domenici, Mr. Edwards, Mr. Enzi, Mr. Feingold, Mrs. Feinstein, Mr. Frist, Mr. Hagel, Mr. Helms, Mr. Hutchinson, Mr. Inhofe, Mr. Inouye, Mr. Johnson, Mr. Kennedy, Mr. Kerry, Mr. Kohl, Ms. Landrieu, Mrs. Lincoln, Mr. McConnell, Ms. Mikulski, Mr. Nickles, Mr. Sessions, Mr. Specter, Mr. Stevens, Mr. Voinovich, and Mr. Dayton):

S. Res. 218. A resolution designating the week beginning March 17, 2002, as "National Safe Place Week"; to the Committee on the Judiciary.

By Mr. GRAHAM (for himself, Mr. Helms, Mr. DeWine, and Mr. Torricelli):

S. Res. 219. A resolution expressing support for the democratically elected Government of Colombia and its efforts to counter threats from United States-designated foreign terrorist organizations; to the Committee on Foreign Relations.

By Mr. GRASSLEY:

S. Res. 220. A resolution expressing the sense of the Senate regarding the continued attacks on democracy and the rule of law in Colombia, including the kidnappings of the elected representatives of the people of Colombia; to the Committee on Foreign Relations.

By Mr. CAMPBELL (for himself, Mr. Leahy, Mr. Hatch, Mr. Allard, Ms. Cantwell, Mr. Gregg, Mr. Rockefeller, Mr. Bingaman, Mr. Biden, Mr. Bunning, Mr. Cochran, Mr. Allen, Mr. Thomas, and Mr. Hutchinson):

S. Res. 221. A resolution to commemorate and acknowledge the dedication and sacrifice made by the men and women who have lost their lives while serving as law enforcement officers; to the Committee on the Judiciary.

ADDITIONAL COSPONSORS

S. 442

At the request of Mr. Campbell, the name of the Senator from Virginia (Mr. Allen) was added as a cosponsor of S. 442, a bill to exempt qualified current and former law enforcement officers from State laws prohibiting the carrying of concealed firearms and to allow States to enter into compacts to recognize other States' concealed weapons permits.

S. 540

At the request of Mr. DeWine, the name of the Senator from South Carolina (Mr. Hollings) was added as a cosponsor of S. 540, a bill to amend the Internal Revenue Code of 1986 to allow as a deduction in determining adjusted gross income the deduction for expenses in connection with services as a member of a reserve component of the Armed Forces of the United States, to allow employers a credit against income tax with respect to employees who participate in the military reserve components, and to allow a comparable credit for participating reserve component self-employed individuals, and for other purposes.

S. 885

At the request of Mr. Hutchinson, the name of the Senator from Louisiana (Ms. Landrieu) was added as a cosponsor of S. 885, a bill to amend title XVIII of the Social Security Act to provide for national standardized payment amounts for inpatient hospital services furnished under the medicare program.

S. 913

At the request of Ms. Snowe, the name of the Senator from Maryland (Ms. Mikulski) was added as a cosponsor of S. 913, a bill to amend title XVIII of the Social Security Act to provide for coverage under the medicare program of all oral anticancer drugs.

S. 952

At the request of Mr. Gregg, the name of the Senator from Illinois (Mr. Durbin) was added as a cosponsor of S. 952, a bill to provide collective bargaining rights for public safety officers employed by States or their political subdivisions.

S. 1140

At the request of Mr. HATCH, the name of the Senator from Oregon (Mr. SMITH) was added as a cosponsor of S. 1140, a bill to amend chapter 1 of title 9, United States Code, to provide for greater fairness in the arbitration process relating to motor vehicle franchise contracts.

S. 1152

At the request of Mr. DURBIN, the name of the Senator from New Mexico (Mr. BINGAMAN) was added as a cosponsor of S. 1152, a bill to ensure that the business of the Federal Government is conducted in the public interest and in a manner that provides for public accountability, efficient delivery of services, reasonable cost savings, and prevention of unwarranted Government expenses, and for other purposes.

S. 1523

At the request of Mrs. FEINSTEIN, the name of the Senator from South Dakota (Mr. JOHNSON) was added as a cosponsor of S. 1523, a bill to amend title II of the Social Security Act to repeal the Government pension offset and windfall elimination provisions.

S. 1899

At the request of Mr. BROWNBACK, the name of the Senator from Alaska (Mr. MURKOWSKI) was added as a cosponsor of S. 1899, a bill to amend title 18, United States Code, to prohibit human cloning.

S. 1915

At the request of Mrs. LINCOLN, the name of the Senator from South Dakota (Mr. JOHNSON) was added as a cosponsor of S. 1915, a bill to amend the Internal Revenue Code of 1986 to treat natural gas distribution lines as 10-year property for depreciation purposes.

S. 1917

At the request of Mr. JEFFORDS, the names of the Senator from Texas (Mrs. HUTCHISON), the Senator from North Carolina (Mr. HELMS), the Senator from Kansas (Mr. ROBERTS), the Senator from West Virginia (Mr. BYRD), and the Senator from Washington (Mrs. MURRAY) were added as cosponsors of S. 1917, a bill to provide for highway infrastructure investment at the guaranteed funding level contained in the Transportation Equity Act for the 21st Century.

S. 1933

At the request of Mr. SHELBY, the name of the Senator from Illinois (Mr. DURBIN) was added as a cosponsor of S. 1933, a bill to amend the Securities Exchange Act of 1934 and the Securities Act of 1933, to address liability standards in connection with violations of the Federal securities laws, and for other purposes.

S. 1967

At the request of Mr. KERRY, the name of the Senator from Louisiana (Ms. LANDRIEU) was added as a cosponsor of S. 1967, a bill to amend title XVIII of the Social Security Act to improve outpatient vision services under part B of the medicare program.

S. 1977

At the request of Mr. THURMOND, the name of the Senator from Massachusetts (Mr. KENNEDY) was added as a cosponsor of S. 1977, a bill to amend chapter 37 of title 28, United States Code, to provide for appointment of United States marshals by the Attorney General.

S. 1984

At the request of Mr. BUNNING, the name of the Senator from New Hampshire (Mr. SMITH) was added as a cosponsor of S. 1984, a bill to authorize the Secretary of Health and Human Services to make grants to nonprofit tax-exempt organizations for the purchase of ultrasound equipment to provide free examinations to pregnant women needing such services, and for other purposes.

S. 1991

At the request of Mr. HOLLINGS, the names of the Senator from Montana (Mr. BAUCUS) and the Senator from Maine (Ms. SNOWE) were added as cosponsors of S. 1991, to establish a national rail passenger transportation system, reauthorize Amtrak, improve security and service on Amtrak, and for other purposes.

S.J. RES. 33

At the request of Mr. HOLLINGS, the name of the Senator from Mississippi (Mr. COCHRAN) was added as a cosponsor of S.J. Res. 33, a joint resolution proposing an amendment to the Constitution of the United States relating to contributions and expenditures intended to affect elections.

S. RES. 207

At the request of Mr. BINGAMAN, the names of the Senator from Connecticut (Mr. DODD), the Senator from New Mexico (Mr. DOMENICI), the Senator from New York (Mr. SCHUMER), and the Senator from Pennsylvania (Mr. SPECTER) were added as cosponsors of S. Res. 207, a resolution designating March 31, 2002, and March 31, 2003, as "National Civilian Conservation Corps Day."

AMENDMENT NO. 2979

At the request of Mr. CORZINE, his name was added as a cosponsor of amendment No. 2979.

At the request of Mr. MCCAIN, the name of the Senator from New Jersey (Mr. TORRICELLI) was added as a cosponsor of amendment No. 2979 supra.

At the request of Mr. MURKOWSKI, his name was added as a cosponsor of amendment No. 2979 supra.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mrs. CARNAHAN:

S. 1997. A bill to require a pilot program to assess the adoption of the Air Force Expeditionary Medical Support System by the Air National Guard; to the Committee on Armed Services.

Mrs. CARNAHAN. Mr. President, as the last few months have shown, America's citizen soldiers and airmen are vital to Homeland Security.

Air Guard fighter pilots have patrolled the skies over our largest cities. Army Guard units police our air terminals and ports of entry.

These brave men and women stand sentry over our Nation. They are making America safer.

But we must be ready to respond if terrorists again succeed in bringing harm to American people. We must be ready to rescue the victims, care for the sick, and aid the injured. This will take cooperation from every level of government—local, State, and Federal agencies.

Dr. Jeffery Lowell is the St. Louis Mayor's Chief of a special team called the Medical Critical Incident Response Group. He is responsible for determining how the region's 30-plus hospitals will provide medical aid to the 2½ million residents of the St. Louis metropolitan area.

Dr. Lowell reports only that 70 to 80 critical care beds are available at any one time. But we need to prepare for the possibility that an attack could generate hundreds, perhaps thousands, of injuries.

Additionally, the entire St. Louis metropolitan area does not have enough emergency responders to care for so many victims. Help would need to come from other cities, other States. This would take time, many hours, even days. In situations like this, lost time means lost lives.

There is an answer to this problem, and it involves the same Guard men and women I mentioned earlier.

The answer is the Expeditionary Medical System, or EMEDS. EMEDS is a new rapid response medical system. It was created by the Air Force to rush its medics with blazing speed anywhere in the world they are needed, at a moment's notice.

Our military relies on this life-saving capability during wartime, but it could prove just as valuable to the civilian community here, in America.

The legislation I am introducing today would establish an EMEDS program in the Air Guard. This bill gives the Air Guard an EMEDS program so that we are prepared for any disaster or attack on the home front, as our troops have been on the war front.

Our Guard soldiers and airmen pride themselves on being light, lean, and lethal. EMEDS will make our Guard medics light, lean, and life-saving, able to react within minutes to an attack.

The new equipment and training that EMEDS would provide the Guard will allow it to respond to attacks or disasters within minutes. And once on site, Guard EMEDS will be able to remain there for days without re-supply, they are self-sustaining. They would assist local responders.

EMEDS will care for sick, provide emergency medicine to wounded, even perform life-saving surgery. Additionally, Guard EMEDS would be able to perform in a biological, chemical, or radiological warfare environment.

If the pilot program is successful, I would hope each State's Guard will acquire EMEDS capability. America needs this capability as its citizens grapple with the emerging threats facing them within the United States.

The National Guard is the perfect organization to provide Americans this valuable homeland defense initiative.

This bill is supported by the U.S. Air Force Surgeon General as well as several other national military organizations such as the Air Force Sergeants Association, National Guard Association and the Air Force Association.

I am proud to offer this bill. Guard EMEDS is a ground-breaking initiative. This first step toward ensuring that each State, through its Guard units, can medically respond to disasters and terrorist attacks with live-saving immediacy.

I believe this measure is of vital importance to our national security.

I urge my colleagues to support this bill's passage.

By Ms. STABENOW

S. 2000. A bill to amend the Internal Revenue Code of 1986 to provide for a special depreciation allowance for certain property acquired after December 31, 2001, and before January 1, 2004; to the Committee on Finance.

Ms. STABENOW. Mr. President, recently we passed legislation to protect families hurt in this recession by extending unemployment protection for an additional 13 weeks.

It was the right thing to do. Now let's finish the job by helping them get back to work. Let's pass a stimulus bill that will jump start the economy and create more employment.

I am introducing a bill that will encourage business investment in new equipment and technology by offering a 30-percent depreciation bonus on capital goods with a depreciation life of 20 years or less as defined by IRS.

The bonus would apply to purchases made by the end of 2003 to encourage spending now, not years from now.

This depreciation bonus is a broad-based incentive that would help businesses both large and small in almost every sector of our economy.

The IRS list of qualifying industries and equipment runs nine pages in very small type and there's not much that isn't covered.

It would help industries from autos to agriculture, from construction to computers, from energy to electronics, and more.

And not only would this bill help the manufacturing industries that make these products, spurring employment, but it would also help the businesses that buy these products by making their workers more productive.

I count this as a win/win situation. Let me give you an example of how this depreciation bonus would work. To keep the math simple, let's talk about a business that buys a computer for $1,000. Under IRS regulations, computers have a 5-year deduction life.

With the depreciation bonus, the business would immediately take a 30-percent deduction on the $1,000 computer, a deduction of $300, making the computer now worth $700.

Now the business would take all the standard depreciation deductions allowed over the 5 years, but at the $700 value. For a computer that would mean another 20-percent deduction in the first year. That's another $140.

That means a total deduction of $440, or 44 percent, in just the first year.

I support this bill because it is not targeted to specific industries or companies or individuals. Almost every business in America, large, small and in between, can benefit from this depreciation bonus.

I support this bill because it would be a needed short-term shot in the arm for the economy, without shooting holes in our long-term goal of fiscal responsibility.

I support this bill because it would create jobs, and support existing jobs, bolstering the consumer economy, which is two-thirds of our Gross Domestic Product and vital to getting us out of this recession.

This bill has the support of a broad range of business and industrial groups. I urge my colleagues to support this legislation as well. Let's rev up the economy without running up debt.

I ask unanimous consent that a copy of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2000

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SPECIAL DEPRECIATION ALLOWANCE FOR CERTAIN PROPERTY ACQUIRED AFTER DECEMBER 31, 2001, AND BEFORE JANUARY 1, 2004.

(a) IN GENERAL.—Section 168 of the Internal Revenue Code of 1986 (relating to accelerated cost recovery system) is amended by adding at the end the following new subsection:

“(k) SPECIAL ALLOWANCE FOR CERTAIN PROPERTY ACQUIRED AFTER DECEMBER 31, 2001, AND BEFORE JANUARY 1, 2004.—

“(1) ADDITIONAL ALLOWANCE.—In the case of any qualified property—

“(A) the depreciation deduction provided by section 167(a) for the taxable year in which such property is placed in service shall include an allowance equal to 30 percent of the adjusted basis of the qualified property, and

“(B) the adjusted basis of the qualified property shall be reduced by the amount of such deduction before computing the amount otherwise allowable as a depreciation deduction under this chapter for such taxable year and any subsequent taxable year.

“(2) QUALIFIED PROPERTY.—For purposes of this subsection—

“(A) IN GENERAL.—The term ‘qualified property’ means property—

“(i)(I) to which this section applies which has a recovery period of 20 years or less or which is water utility property,

“(II) which is computer software (as defined in section 167(f)(1)(B)) for which a deduction is allowable under section 167(a) without regard to this subsection,

“(III) which is qualified leasehold improvement property, or

“(IV) which is eligible for depreciation under section 167(g),

“(ii) the original use of which commences with the taxpayer after December 31, 2001,

“(iii) which is—

“(I) acquired by the taxpayer after December 31, 2001, and before January 1, 2004, but only if no written binding contract for the acquisition was in effect before January 1, 2002, or

“(II) acquired by the taxpayer pursuant to a written binding contract which was entered into after December 31, 2001, and before January 1, 2004, and

“(iv) which is placed in service by the taxpayer before January 1, 2004, or, in the case of property described in subparagraph (B), before January 1, 2005.

“(B) CERTAIN PROPERTY HAVING LONGER PRODUCTION PERIODS TREATED AS QUALIFIED PROPERTY.—

“(i) IN GENERAL.—The term ‘qualified property’ includes property—

“(I) which meets the requirements of clauses (i), (ii), and (iii) of subparagraph (A),

“(II) which has a recovery period of at least 10 years or is transportation property, and

“(III) which is subject to section 263A by reason of clause (ii) or (iii) of subsection (f)(1)(B) thereof.

“(ii) ONLY PRE-JANUARY 1, 2004, BASIS ELIGIBLE FOR ADDITIONAL ALLOWANCE.—In the case of property which is qualified property solely by reason of clause (i), paragraph (1) shall apply only to the extent of the adjusted basis thereof attributable to manufacture, construction, or production before January 1, 2004.

“(iii) TRANSPORTATION PROPERTY.—For purposes of this subparagraph, the term ‘transportation property’ means tangible personal property used in the trade or business of transporting persons or property.

“(C) EXCEPTIONS.—

“(i) ALTERNATIVE DEPRECIATION PROPERTY.—The term ‘qualified property’ shall not include any property to which the alternative depreciation system under subsection (g) applies, determined—

“(I) without regard to paragraph (7) of subsection (g) (relating to election to have system apply), and

“(II) after application of section 280F(b) (relating to listed property with limited business use).

“(ii) ELECTION OUT.—If a taxpayer makes an election under this clause with respect to any class of property for any taxable year, this subsection shall not apply to all property in such class placed in service during such taxable year.

“(D) SPECIAL RULES.—

“(i) SELF-CONSTRUCTED PROPERTY.—In the case of a taxpayer manufacturing, constructing, or producing property for the taxpayer's own use, the requirements of clause (iii) of subparagraph (A) shall be treated as met if the taxpayer begins manufacturing, constructing, or producing the property after December 31, 2001, and before January 1, 2004.

"(ii) SALE-LEASEBACKS.—For purposes of subparagraph (A)(ii), if property—

"(I) is originally placed in service after December 31, 2001, by a person, and

"(II) sold and leased back by such person within 3 months after the date such property was originally placed in service,

such property shall be treated as originally placed in service not earlier than the date on which such property is used under the leaseback referred to in subclause (II).

"(E) COORDINATION WITH SECTION 280F.—For purposes of section 280F—

"(i) AUTOMOBILES.—In the case of a passenger automobile (as defined in section 280F(d)(5)) which is qualified property, the Secretary shall increase the limitation under section 280F(a)(1)(A)(i) by $4,600.

"(ii) LISTED PROPERTY.—The deduction allowable under paragraph (1) shall be taken into account in computing any recapture amount under section 280F(b)(2).

"(3) QUALIFIED LEASEHOLD IMPROVEMENT PROPERTY.—For purposes of this subsection—

"(A) IN GENERAL.—The term 'qualified leasehold improvement property' means any improvement to an interior portion of a building which is nonresidential real property if—

"(i) such improvement is made under or pursuant to a lease (as defined in subsection (h)(7))—

"(I) by the lessee (or any sublessee) of such portion, or

"(II) by the lessor of such portion,

"(ii) such portion is to be occupied exclusively by the lessee (or any sublessee) of such portion, and

"(iii) such improvement is placed in service more than 3 years after the date the building was first placed in service.

"(B) CERTAIN IMPROVEMENTS NOT INCLUDED.—Such term shall not include any improvement for which the expenditure is attributable to—

"(i) the enlargement of the building,

"(ii) any elevator or escalator,

"(iii) any structural component benefiting a common area, and

"(iv) the internal structural framework of the building.

"(C) DEFINITIONS AND SPECIAL RULES.—For purposes of this paragraph—

"(i) BINDING COMMITMENT TO LEASE TREATED AS LEASE.—A binding commitment to enter into a lease shall be treated as a lease, and the parties to such commitment shall be treated as lessor and lessee, respectively.

"(ii) RELATED PERSONS.—A lease between related persons shall not be considered a lease. For purposes of the preceding sentence, the term 'related persons' means—

"(I) members of an affiliated group (as defined in section 1504), and

"(II) persons having a relationship described in subsection (b) of section 267; except that, for purposes of this clause, the phrase '80 percent or more' shall be substituted for the phrase 'more than 50 percent' each place it appears in such subsection.

"(D) IMPROVEMENTS MADE BY LESSOR.—In the case of an improvement made by the person who was the lessor of such improvement when such improvement was placed in service, such improvement shall be qualified leasehold improvement property (if at all) only so long as such improvement is held by such person.".

(b) ALLOWANCE AGAINST ALTERNATIVE MINIMUM TAX.—

(1) IN GENERAL.—Section 56(a)(1)(A) of the Internal Revenue Code of 1986 (relating to depreciation adjustment for alternative minimum tax) is amended by adding at the end the following new clause:

"(iii) ADDITIONAL ALLOWANCE FOR CERTAIN PROPERTY ACQUIRED AFTER DECEMBER 31, 2001, AND BEFORE JANUARY 1, 2004.—The deduction under section 168(k) shall be allowed."

(2) CONFORMING AMENDMENT.—Clause (i) of section 56(a)(1)(A) of the Internal Revenue Code of 1986 is amended by striking "clause (ii)" both places it appears and inserting "clauses (ii) and (iii)".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to property placed in service after December 31, 2001, in taxable years ending after such date.

By Mr. CAMPBELL:

S. 2001. A bill to require the Secretary of Defense to report to Congress regarding the requirements applicable to the inscription of veterans' names on the memorial wall of the Vietnam Veterans Memorial; to the Committee on Armed Services.

Mr. CAMPBELL. Mr. President, today I introduce the Fairness to All Fallen Vietnam War Service Members Act of 2002. Almost forty years ago, our country started sending a generation of young men off to fight in Vietnam. Over 58,000 American soldiers gave their lives to their country in and around the lands, skies, and seas of Vietnam.

The ultimate sacrifices many of these men have made are honored on the Vietnam Veterans Memorial Wall here in Washington, D.C. There are, however, names that are missing from the wall, names that rightfully should be there with their fallen fellow Americans. It is now time to correct that omission.

On the morning of June 3, 1969, the United States destroyer, U.S.S. *Frank E. Evans*, was cut in half during a training exercise by the Australian aircraft carrier, *Melbourne*. The front half of the destroyer sank in three minutes claiming the lives of seventy-four men.

While these men were not lost due to enemy fire, they were involved in serious combat only days before this tragedy. At the time of the accident, the U.S.S. *Frank E. Evans* was taking part in Operation Sea Spirit in the South China Sea which involved over 40 ships from Southeast Asia Treaty Organization Nations. These brave men were instrumental in forwarding American objectives in Vietnam.

The fact is these men died while serving their country and are due the rights and honors they deserve, including being listed on the Vietnam Memorial Wall.

Two of my fellow Coloradans, Brian Crowson and Del A. Francis were on board on that fateful morning and survived this horrible accident. Sadly, 74 of their fellow sailors were not as fortunate.

There are many cases of men and women who were killed serving their country in Southeast Asia, yet they are not eligible to have their names placed on the Wall.

At a time when we rightly honor heroes across our country, should we not also take the necessary step to ensure that our past heroes are also honored?

This legislation directs the Secretary of Defense to determine an appropriate manner to recognize and honor Vietnam Veterans who died in service to our Nation but whose names were excluded from the Vietnam Veterans Memorial Wall. It further asks for input from government agencies and organizations that originally constructed the Vietnam Veterans Memorial Wall regarding the feasibility of adding additional names. Finally, the bill asks for appropriate alternative options for recognizing these veterans should it be deemed that there is no logistical way to add these names.

As a veteran of the Korean War, I personally understand the ultimate sacrifice many of our brave men and women have made for the price of freedom. This recognition should not be taken lightly.

I am honored to introduce this companion bill to H.R. 3443, which was introduced by my good friend and colleague in the House of Representatives, Congressman STEVE HORN.

I look forward to working with my colleagues here in the Senate as well as Representative HORN and the U.S.S. Frank E. Evans Association so that we can pass this long overdue legislation.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD as follows:

S. 2001

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Fairness to All Fallen Vietnam War Service Members Act of 2002".

SEC. 2. FINDINGS.

Congress finds as follows:

(1) Public Law 96–297 (94 Stat. 827) authorized the Vietnam Veterans Memorial Fund, Inc., (the "Memorial Fund") to construct a memorial "in honor and recognition of the men and women of the Armed Forces of the United States who served in the Vietnam war".

(2) The Memorial Fund determined that the most fitting tribute to those who served in the Vietnam war would be to permanently inscribe the names of the members of the Armed Forces who died during the Vietnam war, or who remained missing at the conclusion of the war, on a memorial wall.

(3) The Memorial Fund relied on the Department of Defense to compile the list of individuals whose names would be inscribed on the memorial wall and the criteria for inclusion on such list.

(4) The Memorial Fund established procedures under which mistakes and omissions in the inscription of names on the memorial wall could be corrected.

(5) Under such procedures, the Department of Defense established eligibility requirements that must be met before the Memorial Fund will make arrangements for the name of a veteran to be inscribed on the memorial wall.

(6) The Department of Defense determines the eligibility requirements and has periodically modified such requirements.

(7) As of February 1981, in order for the name of a veteran to be eligible for inscription on the memorial wall, the veteran must have—

(A) died in Vietnam between November 1, 1955, and December 31, 1960;

(B) died in a specified geographic combat zone on or after January 1, 1961;

(C) died as a result of physical wounds sustained in such combat zone; or

(D) died while participating in, or providing direct support to, a combat mission immediately en route to or returning from such combat zone.

(8) Public Law 106–214 (114 Stat. 335) authorizes the American Battle Monuments Commission to provide for the placement of a plaque within the Vietnam Veterans Memorial "to honor those Vietnam veterans who died after their service in the Vietnam war, but as a direct result of that service, and whose names are not otherwise eligible for placement on the memorial wall".

(9) The names of a number of veterans who died during the Vietnam war are not eligible for inscription on the memorial wall or the plaque.

(10) Examples of such names include the names of the 74 servicemembers who died aboard the USS Frank E. Evans (DD–174) on June 3, 1969, while the ship was briefly outside the combat zone participating in a training exercise.

SEC. 3. STUDY AND REPORT.

(a) STUDY.—The Secretary of Defense shall conduct a study that—

(1) identifies the veterans (as defined in section 101(2) of title 38, United States Code) who died on or after November 1, 1955, as a direct or indirect result of military operations in southeast Asia and whose names are not eligible for inscription on the memorial wall of the Vietnam Veterans Memorial;

(2) evaluates the feasibility and equitability of revising the eligibility requirements applicable to the inscription of names on the memorial wall to be more inclusive of such veterans; and

(3) evaluates the feasibility and equitability of creating an appropriate alternative means of recognition for such veterans.

(b) REPORT.—Not later than 1 year after the date of the enactment of this Act, the Secretary of Defense shall submit to Congress a report based on the study conducted under subsection (a). Such report shall include—

(1) the reasons (organized by category) that the names of the veterans identified under subsection (a)(1) are not eligible for inscription on the memorial wall under current eligibility requirements, and the number of veterans affected in each category;

(2) a list of the alternative eligibility requirements considered under subsection (a)(2);

(3) a list of the alternative means of recognition considered under subsection (a)(3); and

(4) the conclusions and recommendations of the Secretary of Defense with regard to the feasibility and equitability of each alternative considered.

(c) CONSULTATIONS.—In conducting the study under subsection (a) and preparing the report under subsection (b), the Secretary of Defense shall consult with—

(1) the Secretary of Veterans Affairs;

(2) the Secretary of the Interior;

(3) the Vietnam Veterans Memorial Fund, Inc.;

(4) the American Battle Monuments Commission;

(5) the Vietnam Women's Memorial, Inc.; and

(6) the National Capital Planning Commission.

STATEMENTS ON SUBMITTED RESOLUTIONS

SENATE RESOLUTION 218—DESIGNATING THE WEEK BEGINNING MARCH 17, 2002, AS "NATIONAL SAFE PLACE WEEK"

Mr. CRAIG (for himself, Mr. CLELAND, Mr. ALLEN, Mr. BAYH, Mr. BINGAMAN, Mrs. BOXER, Mr. BREAUX, Mr. BURNS, Mr. CAMPBELL, Ms. CANTWELL, Mr. COCHRAN, Mr. CRAPO, Mr. DASCHLE, Mr. DEWINE, Mr. DOMENICI, Mr. EDWARDS, Mr. ENZI, Mr. FEINGOLD, Mrs. FEINSTEIN, Mr. FRIST, Mr. HAGEL, Mr. HELMS, Mr. HUTCHINSON, Mr. INHOFE, Mr. INOUYE, Mr. JOHNSON, Mr. KENNEDY, Mr. KERRY, Mr. KOHL, Ms. LANDRIEU, Mrs. LINCOLN, Mr. MCCONNELL, Ms. MIKULSKI, Mr. NICKLES, Mr. SESSIONS, Mr. SPECTER, Mr. STEVENS, Mr. VOINOVICH, and Mr. DAYTON) submitted the following resolution; which was referred to the Committee on the Judiciary:

S. RES. 218

Whereas today's youth are vital to the preservation of our country and will be the future bearers of the bright torch of democracy;

Whereas youth need a safe haven from various negative influences such as child abuse, substance abuse and crime, and they need to have resources readily available to assist them when faced with circumstances that compromise their safety;

Whereas the United States needs increased numbers of community volunteers acting as positive influences on the Nation's youth;

Whereas the Safe Place program is committed to protecting our Nation's most valuable asset, our youth, by offering short term "safe places" at neighborhood locations where trained volunteers are available to counsel and advise youth seeking assistance and guidance;

Whereas Safe Place combines the efforts of the private sector and non-profit organizations uniting to reach youth in the early stages of crisis;

Whereas Safe Place provides a direct means to assist programs in meeting performance standards relative to outreach/community relations, as set forth in the Federal Runaway and Homeless Youth Act guidelines;

Whereas the Safe Place placard displayed at businesses within communities stands as a beacon of safety and refuge to at-risk youth;

Whereas over 641 communities in 39 states and more than 11,000 locations have established Safe Place programs;

Whereas over 53,000 young people have gone to Safe Place locations to get help when faced with crises situations;

Whereas through the efforts of Safe Place coordinators across the country each year more than one-half million students learn that Safe Place is a resource if abusive or neglectful situations exist;

Whereas increased awareness of the program's existence will encourage communities to establish Safe Places for the Nation's youth throughout the country: Now, therefore, be it

Resolved, That the Senate—

(1) proclaims the week of March 17 through March 23, 2002 as "National Safe Place Week" and

(2) request that the President issue a proclamation calling upon the people of the United States and interested groups to promote awareness of and volunteer involvement in the Safe Place programs, and to observe the week with appropriate ceremonies and activities.

SENATE RESOLUTION 219—EXPRESSING SUPPORT FOR THE DEMOCRATICALLY ELECTED GOVERNMENT OF COLOMBIA AND ITS EFFORTS TO COUNTER THREATS FROM UNITED STATES-DESIGNATED FOREIGN TERRORIST ORGANIZATIONS

Mr. GRAHAM (for himself, Mr. HELMS, Mr. DEWINE, and Mr. TORRICELLI) submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 219

Whereas the democratically elected Government of Colombia, led by President Andres Pastrana, is the legitimate authority in the oldest representative democracy in South America;

Whereas the Secretary of State, in consultation with the Attorney General and the Secretary of the Treasury, is required to designate as foreign terrorist organizations those groups whose activities threaten the security of United States nationals or the national security interests of the United States pursuant to section 219 of the Immigration and Nationality Act;

Whereas the Secretary of State has designated 3 Colombian terrorist groups as foreign terrorist organizations, including the Revolutionary Armed Forces of Colombia (FARC), the United Self-Defense Forces of Colombia (AUC), and the National Liberation Army (ELN);

Whereas all 3 United States-designated foreign terrorist organizations regularly engage in criminal acts, including murder, kidnapping, and extortion perpetrated against Colombian civilians, government officials, security forces, and against foreign nationals, including United States citizens;

Whereas the FARC is holding 5 Colombian legislators, a presidential candidate, and Colombian police and army officers and soldiers as hostages and has recently escalated bombings against civilian targets, including a foiled attempt to destroy the city of Bogota's principal water reservoir;

Whereas, according to the Colombian government, the FARC has received training in terrorist techniques and technology from foreign nationals;

Whereas, since 1992, United States-designated foreign terrorist organizations in Colombia have committed serious crimes against United States citizens, kidnapping more than 50 Americans and murdering at least 10 Americans;

Whereas the Drug Enforcement Administration believes that members of the FARC and the AUC directly engage in narcotics trafficking;

Whereas individual members of Colombia's security forces have collaborated with illegal paramilitary organizations by, inter alia, in some instances allowing such organizations to pass through roadblocks, sharing tactical information with such organizations, and providing such organizations with supplies and ammunition;

Whereas while the Colombian government has made progress in its efforts to combat and capture members of illegal paramilitary organizations and taken positive steps to break links between individual members of the security forces and such organizations, further steps by the Colombian government are warranted;

Whereas in 1998, Colombian President Andres Pastrana began exhaustive efforts to negotiate a peace agreement with the FARC and implemented extraordinary confidence-building measures to advance these negotiations, including establishing a 16,000-square-mile safe haven for the FARC;

Whereas the Government of Colombia has also undertaken substantial efforts to negotiate a peace agreement with the ELN;

Whereas the United States has consistently supported the Government of Colombia's protracted efforts to negotiate a peace agreement with the FARC and supports the Government of Colombia in its continuing efforts to reach a negotiated agreement with the ELN;

Whereas the United States would welcome a negotiated, political solution to end the violence in Colombia;

Whereas, after the FARC hijacked a commercial airplane and took Colombian Senator Jorge Eduardo Gechem Turbay as a hostage into the government-created safe haven, President Pastrana ended his government's sponsorship of the peace negotiations with the FARC and ordered Colombia's security forces to reestablish legitimate governmental control in the safe haven;

Whereas President Pastrana has received strong expressions of support from foreign governments and international organizations for his decision to end the peace talks and dissolve the FARC's safe haven; and

Whereas the Government of Colombia's negotiations with the ELN are continuing despite the end of the negotiations with the FARC: Now, therefore, be it

Resolved, That—

(1) the Senate—

(A) expresses its support for the democratically elected Government of Colombia and the Colombian people as they strive to protect their democracy from terrorism and the scourge of illicit narcotics; and

(B) deplores the continuing criminal, terrorist acts of murder, abduction, and extortion carried out by all United States-designated foreign terrorist organizations in Colombia against United States citizens, the civilian population of Colombia, and Colombian authorities; and

(2) it is the sense of the Senate that the President, without undue delay, should transmit to Congress for its consideration proposed legislation, consistent with United States law regarding the protection of human rights, to assist the Government of Colombia to protect its democracy from United States-designated foreign terrorist organizations and the scourge of illicit narcotics.

SENATE RESOLUTION 220—EXPRESSING THE SENSE OF THE SENATE REGARDING THE CONTINUED ATTACKS ON DEMOCRACY AND THE RULE OF LAW IN COLOMBIA, INCLUDING THE KIDNAPPINGS OF THE ELECTED REPRESENTATIVES OF THE PEOPLE OF COLOMBIA

Mr. GRASSLEY submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 220

Whereas Colombia is home to the oldest democracy in Latin America and has consistently been a friend of the United States;

Whereas Colombia has been affected by the violence generated by the terrorist acts of illegal armed groups;

Whereas the largest of these groups, the Revolutionary Armed Forces of Colombia (FARC), has used kidnapping, extortion, terrorism, and narcotics trafficking to raise money for its activities;

Whereas those most affected by the targets of these activities have been the people of Colombia;

Whereas in October 1997, almost 10,000,000 Colombians voted for a mandate for peace that asked all presidential candidates to find peace in Colombia through political negotiation;

Whereas in June 1998, 6,500,000 Colombians voted for President Andres Pastrana and his project for peace in Colombia;

Whereas, since his election, President Pastrana has worked consistently and persistently to find a peaceful solution to the ongoing conflict between the Government of Colombia and the insurgency groups operating within the borders of Colombia;

Whereas the Government of Colombia put forth several proposals for peace and made sacrifices in sovereign territory and commitments in funding in hopes of achieving peace in Colombia only to have these overtures repeatedly rejected;

Whereas, on January 20, 2002, the Government of Colombia and the FARC were able to agree on a schedule to be followed in order to define the future of the peace process;

Whereas, since this accord was signed by the FARC, the FARC has consistently and repeatedly taken violent actions against the people and the Government of Colombia in the form of terrorist attacks, including—

(1) car bombs;

(2) attacking government installations;

(3) mining new fields;

(4) homicides, including women and children;

(5) destroying electric pylons;

(6) bombing oil pipelines;

(7) destroying bridges; and

(8) attacks on the dam that provides water to Bogota;

Whereas five democratically elected representatives of the Colombian Congress are currently being held against their will after being kidnapped by the FARC, including—

(1) Representative Oscar Tulio Lizcano, a member of the Conservative Party and elected by the people of Colombia to represent the Province of Caldas, who was kidnapped in the municipality of Riosucio, Province of Caldas, on August 5, 2000, by members of the "Aurelio Rodriguez Front" of the "Jose Maria Cordoba Block" of the FARC;

(2) Senator Luis Eladio Perez, a member of the Liberal Party and elected by the people of Colombia, while visiting several municipalities on a political tour who was kidnapped in the town of Ipiales, Province of Nariflo, on June 10, 2001, by elements of the FARC, as a second attempt to kidnap Senator Eladio, the first occurring at the end of May 2001, and frustrated by his security detail;

(3) Representative Orlando Beltran Cuellar, a member of the Liberal party from the Province of Huila and elected by the people of Colombia, who was kidnapped by the FARC in the municipality of Gigante, Province of Huila, on August 28, 2001;

(4) Representative Consuelo Gonzalez de Perdomo, a member of the Liberal Party from the Province of Huila and elected by the people of Colombia, who was kidnapped by the FARC in the municipality of Hobo, Province of Huila, on September 11, 2001; and

(5) Senator Jorge Eduardo Gechem Turbay, a member of the Liberal Party from the Province of Huila, elected by the people of Colombia, and President of the Colombian Senate's Peace Commission, who was kidnapped on February 20, 2002, when four members of the FARC hijacked a commercial AIRES aircraft traveling from Neiva to Bogota with 30 passengers on board and who was removed from the aircraft after it was forced to land on a rural road in the municipality of Hobo, Province of Huila; and

Whereas Saturday, February 23, Presidential Candidate Ingrid Betancourt and her campaign manager Clara Rojas were kidnapped by the FARC as she traveled to San Vicente del Caguan: Now, therefore, be it

Resolved, That the Senate—

(1) expresses its strong support for the democratically elected Government of Colombia and the Colombian people in their struggle to protect their democracy from terrorism and the scourge of illicit narcotics;

(2) deplores the continuing criminal terrorist acts of murder, abduction, and extortion carried out by all illegal armed groups in Colombia against the civilian population of Colombia and Colombian authorities;

(3) condemns the kidnapping of elected representatives of the people of Colombia by the FARC and extends its sympathy to the families and friends of the kidnapped members of the Colombian Congress; and

(4) urges the President to develop a comprehensive strategic policy proposal, consistent with United States law regarding human rights and the environment, to assist the Government of Colombia in defending its democracy and rule of law from illegal armed groups and the scourge of illicit narcotics.

Mr. GRASSLEY. Mr. President, I am sending to the desk a sense-of-the-Senate resolution on the current situation in Colombia.

The resolution expresses outrage over the current attacks on democracy and democratic institutions in Colombia by a gang of vicious thugs. The most recent outrage, in a long history of outrages, was the hijacking of a commercial airliner filled with innocent people that was forced to land, and then the kidnapping at gun point of a distinguished Colombian Senator. That Senator remains a prisoner, his fate unknown and uncertain. Four other members of the Colombian Congress are also prisoners, and now so is one of the candidates for president in Colombia's upcoming elections. Other members have been murdered, their families threatened, their children terrorized. These are only the most publicly visible victims of Colombia's guerrilla thugs.

There can be no clearer testimony, if further evidence was called for, of the vicious nature of the actions of Colombia's insurgent movement, the FARC. They have branded themselves, if it was not clear before, as outright terrorists. Their actions are an assault on the rule of law and on democracy.

My resolution expresses the concern over the fate of those in a companion institution. Our sympathies must go to their families, our concern to their countryman in their time of threat an menace. I hope that other members will join me in expressing our unanimous concern for the fate of democracy and the rule of law in Colombia. The other body has passed a resolution expressing its concern. I hope we will as well.

SENATE RESOLUTION 221—TO COMMEMORATE AND ACKNOWLEDGE THE DEDICATION AND SACRIFICE MADE BY THE MEN AND WOMEN WHO HAVE LOST THEIR LIVES WHILE SERVING AS LAW ENFORCEMENT OFFICERS

Mr. CAMPBELL (for himself, Mr. LEAHY, Mr. HATCH, Mr. ALLARD, Ms. CANTWELL, Mr. GREGG, Mr. ROCKEFELLER, Mr. BINGAMAN, Mr. BIDEN, Mr. BUNNING, Mr. COCHRAN, Mr. ALLEN, Mr. THOMAS, and Mr. HUTCHINSON) submitted the following resolution; which was referred to the Committee on the Judiciary:

S. RES. 221

Whereas the well-being of all citizens of the United States is preserved and enhanced as a direct result of the vigilance and dedication of law enforcement personnel;

Whereas more than 700,000 men and women, at great risk to their personal safety, presently serve their fellow citizens as guardians of peace;

Whereas peace officers are on the front line in preserving the right of the children of the United States to receive an education in a crime-free environment, a right that is all too often threatened by the insidious fear caused by violence in schools;

Whereas 70 peace officers died at the World Trade Center in New York City on September 11, 2001, the most peace officers ever killed in a single incident in the history of the Nation;

Whereas more than 220 peace officers across the Nation were killed in the line of duty during 2001, 57 percent more police fatalities than the previous year, and the deadliest year for the law enforcement community since 1974;

Whereas every year, 1 out of every 9 peace officers is assaulted, 1 out of every 25 peace officers is injured, and 1 out of every 4,400 peace officers is killed in the line of duty; and

Whereas on May 15, 2002, more than 15,000 peace officers are expected to gather in Washington, D.C. to join with the families of their recently fallen comrades to honor those comrades and all others who went before them: Now, therefore, be it

Resolved, That the Senate—

(1) recognizes May 15, 2002 as Peace Officers Memorial Day, in honor of Federal, State, and local officers killed or disabled in the line of duty; and

(2) calls upon the people of the United States to observe this day with appropriate ceremonies and respect.

Mr. CAMPBELL. Mr. President, today I am joined by the chairman and ranking member of the Senate Judiciary Committee, Senators LEAHY and HATCH, along with several other Senators in submitting this resolution to keep alive in the memory of all Americans the sacrifice and commitment of those law enforcement officers who lost their lives serving their communities. Specifically, this resolution would designate May 15, 2002, as National Peace Officers Memorial Day.

As a former deputy sheriff, I know first-hand the risks which law enforcement officers face everyday on the front lines protecting our communities. Currently, more than 700,000 men and women who serve this Nation as our guardians of law and order do so at a great risk. Every year, about 1 in 9 officers is assaulted, 1 in 25 officers is injured, and 1 in 4,400 officers is killed in the line of duty. There are few communities in this country that have not been impacted by the words: "officer down."

On September 11, 2001, 70 peace officers died at the World Trade Center in New York City as a result of a cowardly act of terrorism. This single act of terrorism resulted in the highest number of peace officers ever killed in a single incident in the history of this country. Thirty-seven of those fallen heroes served with the Port Authority of New York and New Jersey Police Department: twenty-three were New York City police officers; three worked for the New York Office of Court Administration; five were with the New York Office of Tax Enforcement; one was a FBI special agent; and one was a master special officer with the U.S. Secret Service. Before this event, the greatest loss of law enforcement like in a single incident occurred in 1917, when nine Milwaukee police officers were killed in a bomb blast at their police station.

In 2001, more than 200 Federal, State and local law enforcement officers give their lives in the line of duty. This represents more than a 57 percent increase in police fatalities over the previous year. And, in total, nearly 15,000 men and women have made the supreme sacrifice.

The chairman of the National Law Enforcement Officers Memorial Fund, Craig W. Floyd, reminds us:

> The level of public support and appreciation for our law enforcement officers has increased dramatically since September 11. But the incredible bravery and selfless sacrifice our officers displayed that day was no different than every other day of the year in communities across America. We owe all of our police officers a huge debt of gratitude for the invaluable work they do.

On May 15, 2002, more than 15,000 peace officers are expected to gather in our Nation's Capitol to join with the families of their fallen comrades who by their faithful and loyal devotion to their responsibilities have rendered a dedicated service to their communities. In doing so, these heroes have established for themselves an enviable and enduring reputation for preserving the rights and security of all citizens. This resolution is a fitting tribute for this special and solemn occasion.

I urge my colleagues to join us in supporting passage of this important resolution.

AMENDMENTS SUBMITTED AND PROPOSED

SA 2983. Mr. VOINOVICH (for himself, Mr. BINGAMAN, Mr. SMITH, of New Hampshire, Mr. DOMENICI, Ms. LANDRIEU, Mr. MURKOWSKI, Mr. HAGEL, Mr. CRAPO, Mr. THOMAS, Mr. INHOFE, Mr. THOMPSON, Mr. BOND, Mr. CAMPBELL, Mr. FRIST, Mr. KYL, Mr. CRAIG, Mrs. LINCOLN, Mr. HUTCHINSON, and Mr. SESSIONS) proposed an amendment to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) to authorize funding the Department of Energy to enhance its mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, and for other purposes.

SA 2984. Mr. REID proposed an amendment to amendment SA 2983 proposed by Mr. VOINOVICH (for himself, Mr. BINGAMAN, Mr. SMITH of New Hampshire, Mr. DOMENICI, Ms. LANDRIEU, Mr. MURKOWSKI, Mr. HAGEL, Mr. CRAPO, Mr. THOMAS, Mr. INHOFE, Mr. THOMPSON, Mr. BOND, Mr. CAMPBELL, Mr. FRIST, Mr. KYL, Mr. CRAIG, Mrs. LINCOLN, Mr. HUTCHINSON, and Mr. SESSIONS) to the amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) supra.

SA 2985. Mr. BUNNING (for himself and Mr. VOINOVICH) submitted an amendment intended to be proposed to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) supra; which was ordered to lie on the table.

SA 2986. Mr. BINGAMAN (for himself, Mr. BAUCUS, Mr. BOND, Mr. BREAUX, Mr. CAMPBELL, Mr. CONRAD, Mr. DORGAN, Mr. INHOFE, Ms. LANDRIEU, Mrs. LINCOLN, Mr. THOMAS, Mr. SESSIONS, Mr. ROCKEFELLER, Mr. ENZI, Mr. MURKOWSKI, Mr. NICKLES, Mr. HUTCHINSON, and Mr. VOINOVICH) proposed an amendment to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) supra.

SA 2987. Mr. CRAIG proposed an amendment to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) supra.

SA 2988. Mr. MURKOWSKI proposed an amendment to amendment SA 2979 proposed by Mr. MCCAIN (for himself, Mr. HOLLINGS, Mrs. MURRAY, Mr. BINGAMAN, Mr. BREAUX, Mr. SMITH of Oregon, Mr. DOMENICI, Mrs. HUTCHISON, and Mr. WYDEN) to the amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) supra.

SA 2989. Mrs. FEINSTEIN (for herself, Ms. CANTWELL, Mr. WYDEN, Mrs. BOXER, Mr. LEAHY, Mr. DURBIN, Mr. FITZGERALD, and Mr. CORZINE) proposed an amendment to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) supra.

SA 2990. Mr. BINGAMAN (for himself and Mr. DOMENICI) proposed an amendment to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) supra.

SA 2991. Mr. BINGAMAN (for Mr. AKAKA) proposed an amendment to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) supra.

TEXT OF AMENDMENTS

SA 2983. Mr. VOINOVICH (for himself, Mr. BINGAMAN, Mr. SMITH of New Hampshire, Mr. DOMENICI, Ms. LANDRIEU, Mr. MURKOWSKI, Mr. HAGEL, Mr. CRAPO, Mr. THOMAS, Mr. INHOFE, Mr. THOMPSON, Mr. BOND, Mr. CAMPBELL,, Mr. FRIST, Mr. KYL, Mr. CRAIG, Mrs. LINCOLN, Mr. HUTCHINSON, and Mr. SESSIONS) proposed an amendment to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) to authorize funding the Department of Energy to enhance its mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, and for other purposes; as follows:

On page 115, strike line 5 and all that follows through page 119, line 10 and insert the following:

Subtitle A—Price-Anderson Act Reauthorization

SEC. 501. SHORT TITLE.

This subtitle may be cited as the "Price-Anderson Amendments Act of 2002".

SEC. 502. EXTENSION OF INDEMNIFICATION AUTHORITY.

(a) INDEMNIFICATION OF NUCLEAR REGULATORY COMMISSION LICENSEES.—Section 170 c. of the Atomic Energy Act of 1954 (42 U.S.C. 2210(c)) is amended—

(1) in the subsection heading, by striking "LICENSES" and inserting "LICENSEES"; and

(2) by striking "August 1, 2002" each place it appears and inserting "August 1, 2012".

(b) INDEMNIFICATION OF DEPARTMENT OF ENERGY CONTRACTORS.—Section 170 d.(1)(A) of the Atomic Energy Act of 1954 (42 U.S.C. 2210(d)(1)(A)) is amended by striking ", until August 1, 2002,".

(c) INDEMNIFICATION OF NONPROFIT EDUCATIONAL INSTITUTIONS.—Section 170 k. of the Atomic Energy Act of 1954 (42 U.S.C. 2210(k)) is amended by striking "August 1, 2002" each place it appears and inserting "August 1, 2012".

SEC. 503. DEPARTMENT OF ENERGY LIABILITY LIMIT.

(a) INDEMNIFICATION OF DEPARTMENT OF ENERGY CONTRACTORS.—Seciton 170 d. of the Atomic Energy Act of 1954 (42 U.S.C. 2210(d)) is amended by striking paragraph (2) and inserting the following:

"(2) In agreements of indemnification entered into under paragraph (1), the Secretary—

"(A) may require the contractor to provide and maintain financial protection of such a type and in such amounts as the Secretary shall determine to be appropriate to cover public liability arising out of or in connection with the contractual activity; and

"(B) shall indemnify the persons indemnified against such liability above the amount of the financial protection required, in the amount of $10,000,000,000 (subject to adjustment for inflation under subsection t.), in the aggregate, for all persons indemnified in connection with such contract and for each nuclear incident, including such legal costs of the contractor as are approved by the Secretary.".

(b) CONTRACT AMENDMENTS.—Section 170 d. of the Atomic Energy Act of 1954 (42 U.S.C. 2210(d)) is further amended by striking paragraph (3) and inserting the following:

"(3) All agreements of indemnification under which the Department of Energy (or its predecessor agencies) may be required to indemnify any person under this section shall be deemed to be amended, on the date of the enactment of the Price-Anderson Amendments Act of 2002, to reflect the amount of indemnity for public liability and any applicable financial protection required of the contractor under this subsection.".

(c) LIABILITY LIMIT.—Section 170 e.(1)(B) of the Atomic Energy Act of 1954 (42 U.S.C. 2210(e)(1)(B)) is amended

(1) by striking "the maximum amount of financial protection required under subsection b. or"; and

(2) by striking "paragraph (3) of subsection d., whichever amount is more" and inserting "paragraph (2) of subsection d.".

SEC. 504. INCIDENTS OUTSIDE THE UNITED STATES.

(a) AMOUNT OF INDEMNIFICATION.—Section 170 d.(5) of the Atomic Energy Act of 1954 (42 U.S.C. 2210(d)(5)) is amended by striking "$100,000,000" and inserting "$500,000,000".

(b) LIABILITY LIMIT.—Seciton 170 e.(4) of the Atomic Energy Act of 1954 (42 U.S.C. 2210(e)(4)) is amended by striking "$100,000,000" and inserting "$500,000,000".

SEC. 505. REPORTS.

Section 170 p. of the Atomic Energy Act of 1954 (42 U.S.C. 2210(p)) is amended by striking "August 1, 1998" and inserting "August 1, 2008".

SEC. 506. INFLATION ADJUSTMENT.

Section 170 t. of the Atomic Energy Act of 1954 (42 U.S.C. 2210(t)) is amended—

(1) by redesignating paragraph (2) as paragraph (3); and

(2) by adding after paragraph (1) the following:

"(2) The Secretary shall adjust the amount of indemnification provided under an agreement of indemnification under subsection d. not less than once during each 5-year period following July 1, 2002, in accordance with the aggregate percentage change in the Consumer Price Index since—

"(A) that date, in the case of the first adjustment under this paragraph; or

"(B) the previous adjustment under this paragraph.".

SEC. 507. CIVIL PENALTIES.

(a) REPEAL OF AUTOMATIC REMISSION.—Section 234A b.(2) of the Atomic Energy Act of 1954 (42 U.S.C. 2282a (b)(2)) is amended by striking the last sentence.

(b) LIMITATION FOR NOT-FOR-PROFIT INSTITUTIONS.—Subsection d. of section 234A of the Atomic Energy Act of 1954 (42 U.S.C. 2282a(d)) is amended to read as follows:

"d. (1) Notwithstanding subsection a., in the case of any not-for-profit contractor, subcontractor, or supplier, the total amount of civil penalties assessed under subsection a. may not exceed the total amount of fees paid within any one-year period (as determined by the Secretary) under the contract under which the violation occurs.

"(2) For purposes of this section, the term 'not-for-profit' means that no part of the net earnings of the contractor, subcontractor, or supplier inures, or may lawfully inure, to the benefit of any natural person or for-profit artificial person.".

(c) EFFECTIVE DATE.—The amendments made by this section shall not apply to any violation of the Atomic Energy Act of 1954 occurring under a contract entered into before the date of enactment of this section.

SEC. 508. TREATMENT OF MODULAR REACTORS.

Section 170 b. of the Atomic Energy Act of 1954 (42 U.S.C. 2210(b)) is amended by adding at the end the following:

"(5)(A) For purposes of this section only, the Commission shall consider a combination of facilities described in subparagraph (B) to be a single facility having a rated capacity of 100,000 electrical kilowatts or more.

"(B) A combination of facilities referred to in subparagraph (A) is 2 or more facilities located at a single site, each of which has a rated capacity of 100,000 electrical kilowatts or more but not more than 300,000 electrical kilowatts, with a combined rated capacity of not more than 1,300,000 electrical kilowatts.".

SEC. 509. EFFECTIVE DATE.

The amendments made by sections 503(a) and 504 do not apply to any nuclear incident that occurs before the date of the enactment of this subtitle.

SA 2984. Mr. REID proposed an amendment to amendment SA 2983 proposed by Mr. VOINOVICH (for himself, Mr. BINGAMAN, Mr. SMITH of New Hampshire, Mr. DOMENICI, Ms. LANDRIEU, Mr. MURKOWSKI, Mr. HAGEL, Mr. CRAPO, Mr. THOMAS, Mr. INHOFE, Mr. THOMPSON, Mr. BOND, Mr. CAMPBELL, Mr. FRIST, Mr. KYL, Mr. CRAIG, Mrs. LINCOLN, Mr. HUTCHINSON, and Mr. SESSIONS) to the amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) to authorize funding the Department of Energy to enhance its mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, and for other purposes; as follows:

In lieu of the matter to be inserted, insert the following:

SEC. 5 . FINANCIAL PROTECTION FOR LICENSEES.

(a) STANDARD DEFERRED PREMIUM.—Section 170b.(1) of the Atomic Energy Act of 1954 (42 U.S.C. 2210(b)(1)) is amended in the third sentence by striking "$63,000,000 (subject to adjustment for inflation under subsection t.), but not more than $10,000,000 in any 1 year" and inserting "$88,000,000 (subject to adjustment for inflation under subsection t.), but not more than $20,000,000 in any 1 year (subject to adjustment for inflation under subsection t.)".

(b) FINANCIAL HARDSHIP.—Section 170b.(2)(A) of the Atomic Energy Act of 1954 (42 U.S.C. 2210(b)(2)(A)) is amended by striking "paragraph (1)" and all that follows and inserting "paragraph (1) for any facility if more than 1 nuclear incident occurs in any 1 calendar year.".

(c) NEW LICENSES.—Section 170c. of the Atomic Energy Act of 1954 (42 U.S.C. 2210(c)) is amended—

(1) by striking "The Commission" and inserting the following:

"(1) LICENSES ISSUED ON OR BEFORE AUGUST 1, 2002.—The Commission"; and

(2) by adding at the end the following:

"(2) LICENSES ISSUED AFTER AUGUST 1, 2002.—After August 1, 2002, as a condition to receiving a license for a utilization facility under this Act, the applicant, before receiving the license, shall obtain insurance coverage from the private insurance market for the full potential liability (including the public liability and any other liability) of the person that might arise as a result of a nuclear incident at the utilization facility.

SEC. 5 . GUARANTEE OF DEFERRED PREMIUM; FINANCIAL QUALIFICATIONS.

Section 170b. of the Atomic Energy Act of 1954 (42 U.S.C. 2210(b)) is amended by adding at the end the following:

"(5) GUARANTEE OF DEFERRED PREMIUM.—

"(A) CONDITION OF INDEMNIFICATION.—Not later than 180 days after the date of enactment of this paragraph, and not less frequently than each year thereafter, the Commission, in consultation with the Securities and Exchange Commission, shall, as a condition of indemnification, require each licensee to demonstrate that the licensee has the financial ability to pay the full potential retrospective premium for each reactor through 1 or more of—

"(i) a surety bond;

"(ii) a letter of credit or loan;

"(iii) an insurance policy; or

"(iv) maintenance of an escrow deposit of government securities in reserves, a trust, or an equivalent instrument.

"(B) REORGANIZATION PROCEEDINGS.—If a licensee or creditors of a licensee file a petition under chapter 11 of title 11, United States Code, for reorganization of the licensee, the Commission—

"(i) shall review the ability of the licensee to—

"(I) pay the full amount of prospective and standard deferred premiums; and

"(II) ensure that adequate funds will be available for safe operation of the licensed facility; and

"(ii) if the Commission determines that the licensee is unable to meet the requirements of clause (i), shall not renew any indemnification of the licensee under this section.

"(6) FINANCIAL QUALIFICATIONS.—

"(A) IN GENERAL.—The Commission, in consultation with the Securities and Exchange Commission, shall establish criteria and procedures for determination of the minimum financial qualifications for new licensees (including license transferees) to ensure that the new licensee has the resources and instruments necessary to—

"(i) operate safely if it becomes necessary to shut down a reactor for 12 months or longer; and

"(ii) ensure payment of prospective and deferred premiums under this subsection.

"(B) CONDITION.—A license shall be conditioned on meeting and maintaining the minimum financial qualifications established under subparagraph (A).".

SEC. 5 . PRESIDENTIAL COMMISSION ON INCIDENT CONSEQUENCES.

Section 170(l) of the Atomic Energy Act of 1954 (42 U.S.C. 2210(l)) is amended—

(1) in paragraph (1), by striking "1988" and inserting "2002";

(2) in paragraph (2)—

(A) in subparagraph (A), by striking "not less than 7 and not more than 11 members" and inserting "6, 8, 10, or 12 members"; and

(B) in subparagraph (B), by striking "not more than a mere majority of the members are of the same political party" and inserting "there are equal numbers of members of each major political party"; and

(3) by striking paragraph (3) and inserting the following:

"(3) DUTIES.—

"(A) IN GENERAL.—The study commission shall conduct a comprehensive study of the economic, public health, and environmental impacts of nuclear incidents that may result in a full breach of containment and uncontained meltdown at a facility built in accordance with an existing design or a proposed design.

"(B) INPUTS.—The matters to be studied under subparagraph (A) include—

"(i) for each existing and proposed facility—

"(I) the public health effects; and

"(II) the economic costs attributable to public health effects, property damage, environmental damage, and evacuation and resettlement of affected populations;

of a worst-case nuclear incident; and

"(ii) the ability of the licensee of each existing or proposed facility to pay the standard deferred premium for a potential occurrence at each covered facility of the licensee and at a facility that is not covered by the licensee.

"(C) SENSITIVITY ANALYSIS.—

"(i) IN GENERAL.—In studying the matters under subparagraph (B)(i), the study commission shall conduct a sensitivity analysis based on various modeling input assumptions to determine the maximum potential consequences of a worst-case nuclear incident.

"(ii) ASSUMPTIONS.—The assumptions on which the sensitivity analysis is based shall include assumptions regarding—

"(I) nuclear incident scenarios;

"(II) weather patterns;

"(III) traffic patterns; and

"(IV) human behavior that may have an effect on evacuation of persons threatened by a nuclear incident.".

SEC. 5 . ACTS OF TERRORISM.

Section 11q. of the Atomic Energy Act of 1954 (42 U.S.C. 2014(q)) is amended—

(1) by striking "q. The term" and inserting the following:

"q. NUCLEAR INCIDENT.—

"(1) IN GENERAL.—The term"; and

(2) by adding at the end the following:

"(2) OCCURRENCES.—

"(A) IN GENERAL.—In paragraph (1), the term 'occurrence' includes an act that the President determines to have been an act of domestic terrorism or international terrorism (as those terms are defined in section 2331 of title 18, United States Code).

"(B) NO JUDICIAL REVIEW.—A determination of the President under subparagraph (A) shall not be subject to judicial review.".

SEC. 5 . TREATMENT OF NUCLEAR REACTOR FINANCIAL OBLIGATIONS.

Section 523 of title 11, United States Code, is amended by adding at the end the following:

"(f) TREATMENT OF NUCLEAR REACTOR FINANCIAL OBLIGATIONS.—Notwithstanding any other provision of this title—

"(1) any funds or other assets held by a licensee or former licensee of the Nuclear Regulatory Commission, or by any other person, to satisfy the responsibility of the licensee, former licensee, or any other person to comply with a regulation or order of the Nuclear Regulatory Commission governing the decontamination and decommissioning of a nuclear power reactor licensed under section 103 or 104b. of the Atomic Energy Act of 1954 (42 U.S.C. 2133, 2134(b)) shall not be used to satisfy the claim of any creditor in any proceeding under this title, other than a claim resulting from an activity undertaken to satisfy that responsibility, until the decontamination and decommissioning of the nuclear power reactor is completed to the satisfaction of the Nuclear Regulatory Commission;

"(2) obligations of licensees, former licensees, or any other person to use funds or other assets to satisfy a responsibility described in paragraph (1) may not be rejected, avoided, or discharged in any proceeding under this title or in any liquidation, reorganization, receivership, or other insolvency proceeding under Federal or State law; and

"(3) private insurance premiums and standard deferred premiums held and maintained in accordance with section 170b. of the Atomic Energy Act of 1954 (42 U.S.C. 2210(b)) shall not be used to satisfy the claim of any creditor in any proceeding under this title, until the indemnification agreement executed in accordance with section 170c. of that Act (42 U.S.C. 2210(c)) is terminated.".

SA 2985. Mr. BUNNING (for himself and Mr. VOINOVICH) submitted an amendment intended to be proposed to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) to authorize funding the Department of Energy to enhance its mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

SEC. . INDUSTRIAL SAFETY RULES FOR DEPARTMENT OF ENERGY NUCLEAR FACILITIES.

Section 170 d. of the Atomic Energy Act of 1954 (42 U.S.C. 2210(d) is amended by adding at the end the following new paragraph:

"(8)(A) It shall be a condition of any agreement of indemnification entered into under this subsection that the indemnified party comply with regulations issued under this paragraph.

"(B) Not later than 180 days after the date of the enactment of this paragraph, the Secretary shall issue industrial health and safety regulations that shall apply to all Department of Energy contractors and subcontractors who are covered under agreements entered into under this subsection for operations at Department of Energy nuclear facilities. Such regulations shall provide a level of protection of worker health and safety that is substantially equivalent to or identical to that provided by the industrial and construction safety regulations of the Occupational Safety and Health Administration (29 CFR 1910 and 1926), and shall establish civil penalties for violation thereof that are substantially equivalent to or identical to the civil penalties applicable to violations of the industrial and construction safety regulations of the Occupational Safety and Health Administration. The Secretary shall amend regulations under this subparagraph as necessary.

"(C) No later than 240 days after the date of the enactment of this paragraph, all agreements described in subparagraph (B), and all contracts and subcontracts for the indemnified contractors and subcontractors, shall be modified to incorporate the requirements of the regulations issued under subparagraph (B). Such modifications shall require compliance with the requirements of the regulations not later than 1 year after the issuance of the regulations.

"(D) Enforcement of regulations issued under subparagraph (B), and inspections required in the course thereof, shall be conducted by the Office of Enforcement of the Office of Environment, Safety, and Health of the Department of Energy. The Secretary shall transmit to the Congress an annual report on the implementation of this subparagraph.".

SA 2986. Mr. BINGAMAN (for himself Mr. BAUCUS, Mr. BOND, Mr. BREAUX, Mr. CAMPBELL, Mr. CONRAD, Mr. DORGAN, Mr. INHOFE, Ms. LANDRIEU, Mrs. LINCOLN, Mr. THOMAS, Mr. SESSIONS, Mr. ROCKEFELLER, Mr. ENZI, Mr. MURKOWSKI, Mr. NICKLES, Mr. HUTCHINSON, and Mr. VOINOVICH) proposed an amendment to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) to authorize funding the Department of Energy to enhance its mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, and for other purposes; which was ordered to lie on the table; as follows:

At the end of title VI, add the following new section:

"SEC. 610. HYDRAULIC FRACTURING.

"Section 1421 of the Safe Drinking Water Act (42 U.S.C. Sec. 300h) is amended by adding at the end the following:

"(e) HYDRAULIC FRACTURING FOR OIL AND GAS PRODUCTION.—

"(1) STUDY OF THE EFFECTS OF HYDRAULIC FRACTURING.—

"(A) IN GENERAL.—As soon as practicable, but in no event later than 24 months after the date of enactment of this subsection, the Administrator shall complete a study of the known and potential effects on underground drinking water sources of hydraulic fracturing, including the effects of hydraulic fracturing on underground drinking water sources on a nationwide basis, and within specific regions, States, or portions of States.

"(B) CONSULTATION.—In planning and conducting the study, the Administrator shall consult with the Secretary of the Interior, the Secretary of Energy, the Ground Water Protection Council, affected States, and, as appropriate, representatives of environmental, industry, academic, scientific, public health, and other relevant organizations. Such study may be accomplished in conjunction with other ongoing studies related to the effects of oil and gas production on groundwater resources.

"(C) STUDY ELEMENTS.—The study conducted under subparagraph (A) shall, at a minimum, examine and make findings as to whether—

"(i) such hydraulic fracturing has endangered or will endanger (as defined under subsection (d)(2)) underground drinking water sources, including those sources within specific regions, states or portions of States;

"(ii) there are specific methods, practices, or hydrogeologic circumstances in which hydraulic fracturing has endangered or will endanger underground drinking water sources; and

"(iii) there are any precautionary actions that may reduce or eliminate any such endangerment.

"(D) STUDY OF HYDRAULIC FRACTURING IN A PARTICULAR TYPE OF GEOLOGIC FORMATION.—The Administrator may also complete a separate study on the known and potential effects on underground drinking water sources of hydraulic fracturing in a particular type of geologic formation.

"(i) If such a study is undertaken, the Administrator shall follow the procedures for study preparation and independent scientific review set forth in subparagraphs (1)(B) and (C) and (2) of this subsection. The Administrator may complete this separate study prior to the completion of the broader study of hydraulic fracturing required pursuant to subparagraph (A) of this subsection.

"(ii) At the conclusion of independent scientific review for any separate study, the Administrator shall determine, pursuant to paragraph (3), whether regulation of hydraulic fracturing in the particular type of geologic formation addressed in the separate study is necessary under this part to ensure that underground sources of drinking water will not be endangered on a nationwide basis, or within a specific region, State or portions of a state. Subparagraph (4) of this subsection shall apply to any such determination by the Administrator.

"(iii) If the Administrator completes a separate study, the Administrator may use the information gathered in the course of such a study in undertaking her broad study to the extent appropriate. The broader study need not include a reexamination of the conclusions reached by the Administrator in any separate study.

"(2) INDEPENDENT SCIENTIFIC REVIEW.—

"(A) IN GENERAL.—Prior to the time the study under paragraph (1) is completed, the Administrator shall enter into an appropriate agreement with the National Academy of Sciences to have the Academy review the conclusions of the study.

"(B) REPORT.—Not later than 11 months after entering into an appropriate agreement with the Administrator, the National Academy of Sciences shall report to the Administrator, the Committee on Energy and Commerce of the House of Representatives, and the Committee on Environment and Public Works of the Senate, on the—

"(i) findings related to the study conducted by the Administrator under paragraph (1);

"(ii) the scientific and technical basis for such findings; and

"(iii) recommendations, if any, for modifying the findings of the study.

"(3) REGULATORY DETERMINATION.—

"(A) IN GENERAL.—Not later than 6 months after receiving the National Academy of Sciences report under paragraph (2), the Administrator shall determine, after informal public hearings and public notice and opportunity for comment, and based on information developed or accumulated in connection with the study required under paragraph (1) and the National Academy of Sciences report under paragraph (2), either:

"(i) that regulation of hydraulic fracturing under this part is necessary to ensure that underground sources of drinking water will not be endangered on a nationwide basis, or within a specific region, State or portions of a State; or

"(ii) that regulation described under clause (i) is unnecessary.

"(B) PUBLICATION OF DETERMINATION.—The Administrator shall publish the determination in the Federal Register, accompanied by an explanation and the reasons for it.

"(4) PROMULGATION OF REGULATIONS.—

"(A) REGULATION NECESSARY.—If the Administrator determines under paragraph (3) that regulation by hydraulic fracturing under this part is necessary to ensure that hydraulic fracturing does not endanger underground drinking water sources on a nationwide basis, or within a specific region, State or portions of a State, the Administrator shall, within 6 months after the issuance of that determination, and after public notice and opportunity for comment, promulgate regulations under section 1421 (42 U.S.C. 300h) to ensure that hydraulic fracturing will not endanger such underground sources of drinking water. However, for purposes of the Administrator's approval or disapproval under section 1422 of any State underground injection control program for regulating hydraulic fracturing, a State at any time may make the alternative demonstration provided for in section 1425 of this title.

"(B) REGULATION UNNECESSARY.—The Administrator shall not regulate or require States to regulate hydraulic fracturing under this part unless the Administrator determines under paragraph (3) that such regulation is necessary. This provision shall not apply to any State which has a program for the regulation of hydraulic fracturing that was approved by the Administrator under this part prior to the effective date of this subsection.

"(C) EXISTING REGULATIONS.—A determination by the Administrator under paragraph (3) that regulation is unnecessary will relieve all States (including those with existing approved programs for the regulation of hydraulic fracturing) from any further obligation to regulate hydraulic fracturing as an underground injection under this part.

"(5) DEFINITION OF HYDRAULIC FRACTURING.—For purposes of this subsection, the term 'hydraulic fracturing' means the process of creating a fracture in a reservoir rock, and injecting fluids and propping agents, for the purposes of reservoir stimulation related to oil and gas production activities.

"(6) SAVINGS.—Nothing in this subsection shall in any way limit the authorities of the Administrator under section 1431 (42 U.S.C. 300i).

"SEC. 611. AUTHORIZATION OF APPROPRIATIONS.

"There are authorized to be appropriated to the Administrator of the Environmental Protection Agency $100,000 for fiscal year 2003, to remain available until expended, for a grant to the State of Alabama to assist in the implementation of its regulatory program under section 1425 of the Safe Drinking Water Act."

SA 2987. Mr. CRAIG proposed an amendment to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) to authorize funding the Department of Energy to enhance its mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, and for other purposes; as follows:

Strike subsection (e) of section 1254 and insert the following:

"(e) AUTHORIZATION OF APPROPRIATIONS.—From amounts authorized under section 1251, the following amounts are authorized for activities under this section and for activities of the Fusion Energy Science Program.

"(1) for fiscal year 2003, $335,000,000;

"(2) for fiscal year 2004, $349,000,000;

"(3) for fiscal year 2005, $362,000,000; and

"(4) for fiscal year 2006, $377,000,000.".

SA 2988. Mr. MURKOWSKI proposed an amendment to amendment SA 2979 proposed by Mr. MCCAIN (for himself, Mr. HOLLINGS, Mrs. MURRAY, Mr. BINGAMAN, Mr. BREAUX, Mr. SMITH of Oregon, Mr. DOMENICI, Mrs. HUTCHISON, and Mr. WYDEN) to the amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) to authorize funding the Department of Energy to enhance its mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, and for other purposes; as follows:

At the appropriate place, insert the following:

SEC. . CRIMINAL PENALTIES FOR DAMAGING OR DESTROYING A FACILITY.

Section 60123(b) of title 49, United States Code, is amended—

(1) by striking "or" after "gas pipeline facility" and inserting a comma; and

(2) by inserting after "liquid pipeline facility" the following: ", or either an intrastate gas pipeline facility or an intrastate hazardous liquid pipeline facility that is used in interstate or foreign commerce or in any activity affecting interstate or foreign commerce".

SA 2989. Mrs. FEINSTEIN (for herself, Ms. CANTWELL, Mr. WYDEN, Mrs. BOXER, Mr. LEAHY, Mr. DURBIN, Mr. FITZGERALD, and Mr. CORZINE) proposed an amendment to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) to authorize funding the Department of Energy to enhance its mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, and for other purposes; as follows:

At the end, add the following:

DIVISION —MISCELLANEOUS

TITLE I—ENERGY DERIVATIVES

SEC. 1. JURISDICTION OF THE COMMODITY FUTURES TRADING COMMISSION OVER ENERGY TRADING MARKETS.

(a) REPEAL OF DEFINITION OF EXEMPT COMMODITY.—Section 1a of the Commodity Exchange Act (7 U.S.C. 1a) is amended by striking paragraph (14) and inserting the following:

"(14) [Repealed.]".

(b) FERC LIAISON.—Section 2(a)(8) of the Commodity Exchange Act (7 U.S.C. 2(a)(8)) is amended by adding at the end the following:

"(C) FERC LIAISON.—The Commission shall, in cooperation with the Federal Energy Regulatory Commission, maintain a liaison between the Commission and the Federal Energy Regulatory Commission.".

(c) EXEMPT TRANSACTIONS.—Section 2 of the Commodity Exchange Act (7 U.S.C. 2) is amended by striking subsection (g) and inserting the following:

"(g) EXEMPT TRANSACTIONS.—

"(1) APPLICABILITY.—

"(A) IN GENERAL.—Except as provided in subparagraph (B), this Act shall not apply to any agreement, contract, or transaction in a commodity other than an agricultural commodity if the agreement, contract, or transaction—

"(i) is between persons that are eligible contract participants at the time at which the agreement, contract, or transaction is entered into;

"(ii) is subject to individual negotiation by the parties to the agreement, contract, or transaction; and

"(iii) is not executed or traded on an electronic trading facility.

"(B) EXCEPTIONS.—

"(i) IN GENERAL.—An agreement, contract, or transaction described in subparagraph (A) (other than an agreement, contract, or transaction in an excluded commodity) shall be subject to—

"(I) sections 4b, 4c(b), 4o, and 5b;

"(II) subsections (c) and (d) of section 6, 6c, 6d, and 8a, to the extent that those provisions—

"(aa) provide for the enforcement of the requirements specified in this paragraph and paragraphs (2), (3), and (4); and

"(bb) prohibit the manipulation of the market price of any commodity in interstate commerce or for future delivery on or subject to the rules of any contract market;

"(III) sections 6c, 6d, 8a, and 9(a)(2), to the extent that those provisions prohibit the manipulation of the market price of any commodity in interstate commerce or for future delivery on or subject to the rules of any contract market;

"(IV) section 12(e)(2); and

"(V) section 22(a)(4).

"(ii) EXCLUDED COMMODITIES.—An agreement, contract, or transaction described in subparagraph (A) in an excluded commodity shall be subject to—

"(I) sections 5a (to the extent provided in subsection (g) of that section), 5b, and 5d; and

"(II) section 12(e)(2).

"(2) BILATERAL DEALER MARKETS.—

"(A) IN GENERAL.—A person or group of persons that constitutes, maintains, administers, or provides a physical or electronic facility or system in which a person has the ability to offer, execute, trade, or confirm the execution of an agreement, contract, or transaction (other than an agreement, contract, or transaction in an excluded commodity), by making or accepting the bids and offers of all other participants on the facility or system (including facilities or systems described in clauses (i) and (iii) of section 1a(33)(B)), may offer to enter into, enter into, or confirm the execution of any agreement, contract, or transaction under paragraph (1) (other than an agreement, contract, or transaction in an excluded commodity) if the person or group of persons meets the requirement of subparagraph (B).

"(B) REQUIREMENT.—The requirement of this subparagraph is that a person or group of persons described in subparagraph (A) shall—

"(i) register with the Commission in any capacity that the Commission requires by rule, regulation, or order;

"(ii) file with the Commission any reports (including large trader position reports) that the Commission requires by rule, regulation, or order;

"(iii) maintain sufficient net capital, as determined by the Commission;

"(iv)(I) maintain books and records consistent with section 4i; and

"(II) make those books and records available to representatives of the Commission and the Department of Justice for inspection at all times; and

"(v) make available to the public any information that the Commission determines to be appropriate for public disclosure.

"(3) REPORTING REQUIREMENTS.—On request of the Commission, an eligible contract participant that trades on a facility or system described in paragraph (2)(A) shall provide to the Commission, within the time period specified in the request and in such form and manner as the Commission may require, any information relating to the transactions of the eligible contract participant on the facility or system that the Commission determines to be appropriate.

"(4) TRANSACTIONS EXEMPTED BY COMMISSION ACTION.—Any agreement, contract, or transaction exempt under paragraph (1) (other than an agreement, contract, or transaction in an excluded commodity) that would otherwise be exempted by the Commission under section 4(c) shall be subject to—

"(A) sections 4b, 4c(b), and 4o; and

"(B) subsections (c) and (d) of section 6, 6c, 6d, 8a, and 9(a)(2), to the extent that those provisions prohibit the manipulation of the market price of any commodity in interstate commerce or for future delivery on or subject to the rules of any contract market.

"(5) EFFECT.—This subsection does not affect the power of the Federal Energy Regulatory Commission to regulate transactions described in paragraph (1) under the Federal Power Act (16 U.S.C. 791a et seq.).".

(d) REPEAL OF GUIDELINES FOR TRANSACTIONS IN EXEMPT COMMODITIES.—Section 2 of the Commodity Exchange Act (7 U.S.C. 2) is amended—

(1) by striking subsection (h); and

(2) by redesignating subsection (i) as subsection (h).

(e) CONTRACTS DESIGNED TO DEFRAUD OR MISLEAD.—Section 4b of the Commodity Exchange Act (7 U.S.C. 6b) is amended by striking subsection (a) and inserting the following:

"(a) PROHIBITION.—It shall be unlawful for any member of a registered entity, or for any correspondent, agent, or employee of any member, in or in connection with any order to make, or the making of, any contract of sale commodity in interstate commerce, made, or to be made on or subject to the rules of any registered entity, or for any person, in or in connection with any order to make, or the making of, any agreement, transaction, or contract in a commodity subject to this Act—

"(1) to cheat or defraud or attempt to cheat or defraud any person;

"(2) willfully to make or cause to be made to any person any false report or statement, or willfully to enter or cause to be entered any false record;

"(3) willfully to deceive or attempt to deceive any person by any means; or

"(4) to bucket the order, or to fill the order by offset against the order of any person, or willfully, knowingly, and without the prior consent of any person to become the buyer in respect to any selling order of any person, or to become the seller in respect to any buying order of any person.".

(f) CONFORMING AMENDMENTS.—The Commodity Exchange Act is amended—

(1) in section 2(e) (7 U.S.C. 2(e))—

(A) in paragraph (1), by striking "section 2(d)(2), 2(g), or 2(h)(3)" and inserting "subsection (d)(2) or (g)(1)(B)(ii)"; and

(B) in paragraph (3), by striking "or to comply with section 2(h)(5)";

(2) in section 2(h) (7 U.S.C. 2(h)) (as redesignated by subsection (d)), by striking "2(h) or";

(3) in section 4i (7 U.S.C. 6i)—

(A) by striking "any contract market or" and inserting "any contract market,"; and

(B) by inserting ", or pursuant to an exemption under section 4(c)" after "transaction execution facility";

(4) in section 5a(g)(1) (7 U.S.C. 7a(g)(1)), by striking ", or exempt under section 2(h) of this Act";

(5) in section 5b (7 U.S.C. 7a-1)—

(A) in subsection (a)(1), by striking "2(h) or"; and

(B) in subsection (b), by striking "2(h) or"; and

(6) in section 12(e)(2)(B) (7 U.S.C. 16(e)(2)(B)), by striking "2(h) or".

SEC. 2. RECRUITMENT AND RETENTION OF QUALIFIED PERSONNEL AT THE COMMODITY FUTURES TRADING COMMISSION.

(a) IN GENERAL.—Section 2(a)(6) of the Commodity Exchange Act (7 U.S.C. 2(a)(6)) is amended by adding at the end the following:

"(G) PERSONNEL MATTERS.—

"(i) IN GENERAL.—The Chairman may appoint and fix the compensation of any officers, attorneys, economists, examiners, and other employees that are necessary in the execution of the duties of the Commission.

"(ii) Compensation.—

"(I) In general.—Rates of basic pay for all employees of the Commission may be set and adjusted by the Chairman without regard to the provisions of chapter 51 or subchapter III of chapter 53 of title 5, United States Code.

"(II) Additional compensation.—The Chairman may provide additional compensation and benefits to employees of the Chairman if the same type and amount of compensation or benefits are provided, or are authorized to be provided, by any other Federal agency specified in section 1206 of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 (12 U.S.C. 1833b).

"(III) Comparability.—In setting and adjusting the total amount of compensation and benefits for employees under this subparagraph, the Chairman shall consult with, and seek to maintain comparability with, any other Federal agency specified in section 1206 of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 (12 U.S.C. 1833b).".

(b) Conforming Amendments.—

(1) Section 3132(a)(1) of title 5, United States Code, is amended—

(A) in subparagraph (C), by striking "or";

(B) in subparagraph (D), by adding "or" at the end; and

(C) by adding at the end the following:

"(E) the Commodity Futures Trading Commission.".

(2) Section 5316 of title 5, United States Code, is amended—

(A) by striking "General Counsel, Commodity Futures Trading Commission."; and

(B) by striking "Executive Director, Commodity Futures Trading Commission.".

(3) Section 5373(a) of title 5, United States Code, is amended—

(A) in paragraph (2), by striking "or" at the end;

(B) by redesignating paragraph (3) as paragraph (4); and

(C) by inserting after paragraph (2) the following:

"(3) section 2(a)(6)(G) of the Commodity Exchange Act.".

(4) Section 1206 of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 (12 U.S.C. 1833b) is amended by inserting "the Commodity Futures Trading Commission," after "the Farm Credit Administration, ".

SEC. 3. JURISDICTION OF THE FEDERAL ENERGY REGULATORY COMMISSION OVER ENERGY TRADING MARKETS.

Section 402 of the Department of Energy Organization Act (42 U.S.C. 7172) is amended by adding at the end the following:

"(i) Jurisdiction Over Derivatives Transactions.—

"(1) In general.—To the extent that the Commission determines that any contract under the jurisdiction of the Commission is not in its jurisdiction, the transaction shall be under the jurisdiction of the Commodity Futures Trading Commission.

"(2) Meetings.—A designee of the Commission shall meet quarterly with a designee of the Commodity Futures Trading Commission, the Securities Exchange Commission, the Federal Trade Commission, and the Federal Reserve Board to discuss—

"(A) conditions and events in energy trading markets; and

"(B) any changes in Federal law (including regulations) that may be appropriate to regulate energy trading markets.

"(3) Liaison.—The Commission shall, in cooperation with the Commodity Futures Trading Commission, maintain a liaison between the Commission and the Commodity Futures Trading Commission.".

SA 2990. Mr. BINGAMAN (for himself and Mr. Domenici) proposed an amendment to amendment SA 2917 proposed by Mr. Daschle (for himself and Mr. Bingaman) to the bill (S. 517) to authorize funding the Department of Energy to enhance its mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, and for other purposes; as follows:

After section 1413 insert the following:

SEC. 1414. UNITED STATES-MEXICO ENERGY TECHNOLOGY COOPERATION.

(a) Finding.—Congress finds that the economic and energy security of the United States and Mexico is furthered through collaboration between the United States and Mexico on research related to energy technologies.

(b) Program.—

(1) In general.—The Secretary, acting through the Assistant Secretary for Environmental Management, shall establish a collaborative research, development, and deployment program to promote energy efficient, environmentally sound economic development along the United States-Mexico border to—

(A) mitigate hazardous waste;

(B) promote energy efficient materials processing technologies that minimize environmental damage; and

(C) protect the public health.

(2) Consultation.—The Secretary, acting through the Assistant Secretary for Environmental Management, shall consult with the Office of Energy Efficiency and Renewable Energy in carrying out paragraph (1)(B).

(c) Program Management.—The program under subsection (b) shall be managed by the Department of Energy Carlsbad Environmental Management Field Office.

(d) Cost Sharing.—The cost of any project or activity carried out using funds provided under this section shall be shared as provided in section 1403.

(e) Technology Transfer.—In carrying out projects and activities under this section to mitigate hazardous waste, the Secretary shall emphasize the transfer of technology developed under the Environmental Management Science Program of the Department of Energy.

(f) Intellectual Property.—In carrying out this section, the Secretary shall comply with the requirements of any agreement entered between the United States and Mexico regarding intellectual property protection.

(g) Authorization of Appropriations.—There are authorized to be appropriated to carry out this section $5,000,000 for fiscal year 2003 and $6,000,000 for each of fiscal years 2004 through 2006, to remain available until expended.

SA 2991. Mr. BINGAMAN (for Mr. Akaka) proposed an amendment to amendment SA 2917 proposed by Mr. Daschle (for himself and Mr. Bingaman) to the bill (S. 517) to authorize funding the Department of Energy to enhance its mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, and for other purposes; as follows:

Strike section 1702 and insert the following:

SEC. 1702. ASSESSMENT OF DEPENDENCE OF STATE OF HAWAII ON OIL.

(a) Assessment.—The Secretary of Energy shall assess the economic implications of the dependence of the State of Hawaii on oil as the principal source of energy for the State, including—

(1) the short- and long-term prospects for crude oil supply disruption and price volatility and potential impacts on the economy of Hawaii;

(2) the economic relationship between oil-fired generation of electricity from residual fuel and refined petroleum products consumed for ground, marine, and air transportation;

(3) the technical and economic feasibility of increasing the contribution of renewable energy resources for generation of electricity, on an island-by-island basis, including—

(A) siting and facility configuration;

(B) environmental, operational, and safety considerations;

(C) the availability of technology;

(D) effects on the utility system, including reliability;

(E) infrastructure and transport requirements;

(F) community support; and

(G) other factors affecting the economic impact of such an increase and any effect on the economic relationship described in paragraph (2);

(4) the technical and economic feasibility of using liquefied natural gas to displace residual fuel oil for electric generation, including neighbor island opportunities, and the effect of such displacement on the economic relationship described in paragraph (2), including—

(A) the availability of supply;

(B) siting and facility configuration for onshore and offshore liquefied natural gas receiving terminals;

(C) the factors described in subparagraphs (B) through (F) of paragraph (3); and

(D) other economic factors;

(5) the technical and economic feasibility of using renewable energy sources (including hydrogen) for ground, marine, and air transportation energy applications to displace the use of refined petroleum products, on an island-by-island basis, and the economic impact of such displacement on the relationship described in paragraph (2); and

(6) an island-by-island approach to—

(A) the development of hydrogen from renewable resources; and

(B) the application of hydrogen to the energy needs of Hawaii.

(b) Contracting Authority.—The Secretary may carry out the assessment under subsection (a) directly or, in whole or in part, through 1 or more contracts with qualified public or private entities.

(c) Report.—Not later than 300 days after the date of enactment of this Act, the Secretary shall prepare, in consultation with agencies of the State of Hawaii and other stakeholders, as appropriate, and submit to Congress, a report detailing the findings, conclusions, and recommendations resulting from the assessment.

(d) Authorization of Appropriations.—There are authorized to be appropriated such sums as are necessary to carry out this section.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON ARMED SERVICES

Mr. REID. Mr. President, I ask unanimous consent that the Committee on

Armed Services be authorized to meet during the session of the Senate on Thursday, March 7, 2002, at 9:30 a.m., in open session to receive testimony on the defense authorization request for fiscal year 2003 and the future years defense program.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Banking, Housing, and Urban Affairs be authorized to meet during the session of the Senate on Thursday, March 7, 2002, at 10 a.m. to conduct an oversight hearing on the "The Semi-Annual Report on Monetary Policy of the Federal Reserve."

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Energy and Natural Resources be authorized to hold a hearing during the session of the Senate on Thursday, March 7, at 2:30 p.m. in SD-366. The purpose of this hearing is to receive testimony on the following bills:

S. 213 and H.R. 37, to amend the National Trails System Act to update the feasibility and suitability studies of 4 national historic trails and provide for possible additions to such trails.

S. 1069 and H.R. 834, to amend the National Trails Systems Act to designate the route in Arizona and New Mexico which the Navajo and Mescalero Apache Indian Tribes were forced to walk in 1863 and 1864, for study for potential addition to the National Trails System.

S. 1946, to amend the National Trails Systems Act to designate the Old Spanish Trail as a National Historic Trail.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FINANCE

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Finance be authorized to meet during the session of the Senate on Thursday, March 7, 2002 at 10 a.m. to hear testimony on Bush proposal for Medicare modernization.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Thursday, March 7, 2002 at 10:15 a.m. to hold a hearing on the children's protocols.

Agenda

Witnesses

Panel 1: The Honorable Michael Southwick, Deputy Assistant Secretary for International Organization Affairs, Department of State, Washington, DC; Mr. Marshall Billingslea, Deputy Assistant Secretary for Negotiations Policy, Department of Defense, Washington, DC; Mr. John Malcolm, Deputy Assistant Attorney General, Criminal Division, Department of Justice, Washington, DC.

Panel 2: Ms. Jo Becker, Children's Rights Advocacy Director, Human Rights Watch, New York, NY; RADM (Ret.) Eugene Carroll, Jr., USN, Vice President Emeritus, Center for Defense Information, Washington, DC; Rear Adm. Timothy O. Fanning, Jr., USNR (ret.), National President of the Navy League of the United States, Washington, DC.

COMMITTEE ON FOREIGN RELATIONS

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Thursday, March 7, 2002 at 2:30 p.m. to hold a hearing on trafficking.

Agenda

Witnesses

Panel 1: The Honorable Paula Dobriansky, Undersecretary for Global Affairs, Department of State, Washington, DC; Mr. Viet D. Dinh, Assistant Attorney General, Office of Legal Policy, Department of Justice, Washington, DC.

Panel 2: Ms. Nancy Ely-Raphel, Senior Advisor, Office to Monitor and Combat Trafficking in Persons, Department of State, Washington, DC; Dr. Nguyen Van Hanh, Director, Office of Refugee Resettlement, Department of Health and Human Resources, Washington, DC.

Panel 3: Ms. Hae Jung Cho, Coalition to Abolish Slavery and Trafficking, Los Angeles, CA; Mrs. Ann Jordan, Director, Initiative Against Trafficking in Persons, International Human Rights Law Group, Washington, DC; Mrs. Carol Smolensky, Coordinator, End Child Prostitution and Trafficking—USA, New York, NY.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be authorized to meet on Thursday, March 7, 2002 at 9:30 a.m. to hold a hearing entitled "Public Health and Natural resources: A Review of the Implementation of our Environmental Laws."

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON INDIAN AFFAIRS

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Indian Affairs be authorized to meet on Thursday, March 7, 2002, at 10 a.m. in room 485 of the Russell Senate Office Building to conduct an oversight hearing on the President's budget request for Indian Programs for fiscal year 2003.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet to conduct a markup on Thursday, March 7, 2002 at 10:00 a.m., in SD 226.

Final Agenda

I. Nominations

Charles W. Pickering, Sr. to be U.S. Circuit Court Judge for the 5th Circuit, Ralph Beistline to be U.S. District Court Judge for the District of Alaska, David Charles Bury to be U.S. District Court Judge for the District of Arizona, Randy Crane to be U.S. District Court Judge for the Southern District of Texas.

To be United States Attorney: Eric F. Melgren for the District of Kansas and Paul I. Perez for the Middle District of Florida.

To be United States Marshal: Theophile Alceste Duroncelet for the Eastern District of Louisiana, John Edward for the District of Vermont, Steven Gilbert Fitzgerald for the Western District of Wisconsin, Gregory Forest to be U.S. Marshal for the WD of NC, James Loren Kennedy for Southern District of Indiana, Dennis Cluff Mwerrill for the District of Oregon, James Thomas Plousis for the District of New Jersey, J.C. Raffety for the Northern District of West Virginia, Charles R. Reavis for the Eastern District of North Carolina, Michael Robert Regan for the Middle District of Pennsylvania, James Anthony Rose for the District of Wyoming, John Schickel for the Eastern District of Kentucky, Jesse Seroyer to be U.S. Marshal for the MD of AL, Timothy Dewayne Welch for the Northern District of Oklahoma, and William R. Whittington for the Western District of Louisiana.

II. Bills

S. 1615, Federal-Local Information Sharing Partnership Act of 2001 [Schumer/Hatch].

S. 1356, The Wartime Treatment of European Americans and Refugees Study Act. [Feingold/Grassley/Kennedy].

III. Resolutions

S. Res. 214, a resolution designating March 25, 2002, as "Greek Independence Day: A National Day of Celebration of Greek and American Democracy" [Specter].

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON VETERANS' AFFAIRS

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Veterans' Affairs be authorized to meet during the session of the Senate on Thursday, March 7, 2002, for a joint hearing with the House of Representatives' Committee on Veterans Affairs, to hear the legislative presentations of the Paralyzed Veterans of America, Jewish War Veterans, Blinded Veterans Association, the Non-Commissioned Officers Association, and the Military Order of the Purple Heart.

The hearing will take place in room 345 of the Cannon House Office Building at 10 a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON STRATEGIC

Mr. REID. Mr. President, I ask unanimous consent that the Subcommittee on Strategic of the Committee on Armed Services be authorized to meet during the session of the Senate on Thursday, March 7, 2002, at 2:30 p.m., in open session to receive testimony on the Ballistic Missile Defense Program and budget in review of the Defense authorization request for fiscal year 2003.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDERS FOR FRIDAY, MARCH 8, 2002

Mr. REID. Madam President, I ask unanimous consent that when the Senate completes its business today, it adjourn until the hour of 9:15 a.m., Friday, March 8; that following the prayer and the pledge, the Journal of proceedings be approved to date, the morning hour be deemed expired, the time for the two leaders be reserved for their use later in the day, and the Senate resume consideration of the message from the House on H.R. 3090.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. REID. Madam President, we expect two rollcall votes beginning at 9:30 a.m., first on the stimulus bill, and second in relation to the McCain amendment to the energy reform bill.

ADJOURNMENT UNTIL 9:15 A.M. TOMORROW

Mr. REID. Madam President, if there is no further business to come before the Senate, I ask unanimous consent that the Senate stand in adjournment under the previous order.

There being no objection, the Senate, at 6:43 p.m., adjourned until Friday, March 8, 2002, at 9:15 a.m.

EXTENSIONS OF REMARKS

STATEMENT FOR THE INTRODUCTION OF THE WORK ENTITLED WE SHALL RISE BY DAVID STANCLIFF

HON. DON YOUNG

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Mr. YOUNG. Mr. Speaker, I wish to recognize Mr. David Stancliff of Tok, Alaska, for his contribution in helping our nation heal after the tragic events of September 11th, 2001. Mr. Stancliff wrote the song "We Shall Rise" in his Tok log cabin and has since traveled to Gettysburg, Pennsylvania, where he joined up with American roots singer Scott Ainslie. Mr. Ainslie performed "We Shall Rise" to its first audience at the Gettysburg National Cemetery on November 19th, 2001, the anniversary of the Gettysburg Address.

Lincoln gave birth to the healing of the nation in Gettysburg and Mr. Stancliff's words sung by Mr. Ainslie in the same place will hopefully help heal society. On this single day, November 19th, 2001, "We Shall Rise" was performed multiple times in Pennsylvania. "We Shall Rise" became the first song ever sung on the floor of the Pennsylvania House of Representatives. It was also performed at the Emergency Services Banquet in Harrisburg, Pennsylvania for the Governor and a thousand emergency service workers, and later that day at Gettysburg College.

We will never forget those who lost their lives on September 11th, 2001. As the battle against terrorism carries on, we are forever indebted to those who fight for our great nation. New challenges at home and abroad continue to test our faith, hope, and resiliency. In this time of mourning and war, we can take comfort and inspiration from the words of David Stancliff's "We Shall Rise." Here are the words to the song that will help us to renew our hopes as well as our faith in people as we face the aftermath of the plane crashes in Pennsylvania, New York, and Washington, DC, as well as the new battle against terrorism abroad:

"WE SHALL RISE"

"Here we are—left behind—when our loved ones had to go.
Here we are—left to fill—lonely spaces here below.
But we shall rise. we shall rise—past mighty towers tall.
We shall rise. we shall rise—we shall rise up from the fall.
Along our streets. when we miss their daily smiles.
Along our streets. we'll be lifted from our trials,
Along our streets. with our memories great and small,
We will rise up from the fall.
We shall rise. rise up from the fall.
We shall rise. on the wings they've given us all.
We shall rise. over every hateful wall.
We shall rise up from the fall.
With their lives. we'll be taken to new heights.
With their lives. we'll turn to darkness into light,
With their lives. when we hear the trumpet's call
We will rise up from the fall.
We shall rise. rise up from the fall.
We shall rise. on the wings they've given us all.
We shall rise. over every hateful wall.
We will rise up from the fall.
They'll all be waiting—up around the bend.
They'll be waiting—the circle never ends.
They'll all be waiting—and when we hear them call,
We will rise up from the fall.
We shall rise. rise up from the fall.
We shall rise. on the wings they've give us all.
We shall rise. over every hateful wall.
We will rise up from the fall—We will rise."

THE HEALTH CARE IMPROVEMENTS ACT OF 2002

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Mr. CONYERS. Mr. Speaker, I am pleased to introduce, along with Congressman BARR, the Health Care Improvement Act of 2002. This is the successor legislation to the Campbell/Conyers bill from last Congress, which passed the House by an overwhelming 276–136 vote. We have drafted a more narrow legislative response this Congress in the hope that the bill will be more likely to move in the Senate.

The legislation responds to two alarming anti-consumer trends—the ever increasing level of concentration among health insurers and exclusionary contracting practices by health insurance companies. The last five years have seen a massive consolidation in the health insurance and managed care market as more than a dozen health insurance competitors have been eliminated through mergers and acquisitions.

The dangers posed by this ever increasing market concentration are exacerbated by the practice of health insurers engaging in heavy-handed negotiating tactics and requiring exclusionary contractual commitments from health care providers. Such restrictive contractual terms are frequently proffered on a "take it or leave it" basis to health care providers, under the threat of the loss of the provider's patients or exclusion from their access to other patients.

Our legislation responds to the problem by allowing physicians or other health care professional to collectively negotiate with a health plan over contractual terms or plan policies. Presently, joint negotiations with a health plan by physicians or other health care professionals who are not financially integrated are illegal per se under the federal antitrust laws if they involve fees or prices. Under this legislation, such activities would be subject to review based on a more liberal "rule of reason" analysis, which could take quality of health care into account.

I have taken a particular interest in this legislation because of the unfairness of the current market situation on African American doctors. I am aware of a number of incidents in Detroit and around the country of minority physicians being threatened that they will lose all of their business unless they enter into one-sided service contracts. This bill gives physicians the ability to respond to these abuses on a collective basis.

The legislation is strongly supported by a wide array of health care professional and trade organizations, including several speaking today.

PERSONAL EXPLANATION

HON. LYNN C. WOOLSEY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Ms. WOOLSEY. Mr. Speaker, I was absent from the House yesterday and part of today due to California's primary elections on March 5, 2002. had I been present, I would have voted:

Rollcall No. 47—"yea".
Rollcall No. 48—"yea".
Rollcall No. 49—"nay".
Rollcall No. 50—"yea".

INTRODUCTION OF PROTECT OUR WOMEN FROM OVARIAN CANCER ACT OF 2002

HON. STEVE ISRAEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Mr. ISRAEL. Mr. Speaker, currently, around three-quarters of women with ovarian cancer are diagnosed in advanced stages of the disease, when they have only about a 20 percent chance to surviving five years. However, if the disease is caught early, the five-year survival is around 95 percent. So providing a way to routinely identify the disease in its "Stage 1" phase could have a dramatic impact in what is now a very deadly cancer.

Scientist from the Food and Drug Administration and the National Cancer Institute reported in [Petricoin EF, Ardekani AM, Hitt BA, Levine PJ, Fusaro VA, Steinberg SM, Mills GB, Simone C, Fishman DA, Kohn EC, Liotta

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.
Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

LA. use of proteomic patterns in serum to identify ovarian cancer. The Lancet 2002:261. Feb. 8, 2002.] that patterns of protein found in patients' blood serum may reflect the presence of the disease.

In the study, scientists used serum proteins to detect ovarian cancer, seven at early stages. using test that can be completed in 30 minutes using blood that can be obtained from a finger stick, researchers were able to differentiate between serum samples taken from patients with ovarian cancer and those from unaffected individuals.

However, despite the success of this preliminary research, it is only the first step in the testing process. It is incumbent that we find out as soon as possible whether protein screening is an effective preventive health-screening tool for this devastating disease. Therefore I am introducing legislation which will instruct the Secretary of the Department of Health and Human to immediately conduct or support research on the effectiveness of the medical screening technique of using proteomic patterns in blood serum to identify ovarian cancer, including the effectiveness of so using proteomic patterns in combination with other screening methods for ovarian cancer.

If the testing finds the test effective, this legislation would require that Medicare cover the cost of this preventive health-screening tool. Medicare will treat proteomic screening at the same reimbursement rate and under the same rules and restrictions as a Pap smear test.

Therefore, Medicare will cover this test fro all women starting at the age of 50 once every two years and will reimburse health care providers at exactly the same rate as pap smears.

Mr. Speaker, those of us who have been elected to Congress have been entrusted with enormous responsibility and enormous power. We must use our power wisely, for the common good. There is no issue of more importance to the people of the United States than health care, and no more poignant issue than the health off our women. Ovarian cancer is a heartbreaking disease that strikes surreptitiously and long before any symptoms are manifest. Waiting for symptoms means our mothers and sisters and daughters are extremely vulnerable to unacceptably high fatality rates. By detecting the disease in Stage 1, we will save thousands of lives. In the development of national priorities, can there be anything more important than saving lives? I think not. Let us proceed with the research, and if successful, let us implement effective early screening for ovarian cancer.

Mr. Speaker, this is medical breakthrough. Now let us breakthrough government and bureaucracy and start saving lives.

PERSONAL EXPLANATION

HON. BARBARA LEE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Ms. LEE. Mr. Speaker, I was not present for votes Tuesday or Wednesday, due to official business in my district. Had I been present, I would have voted:

Tuesday, March 5, 2002: "Yea" on H. Con. Res. 305, Permitting The Use Of the Rotunda For A Ceremony To Present A Congressional Gold Medal To Former President Ronald Reagan And Nancy Reagan.

Wednesday, March 6, 2002: "Yea" on the Journal vote; "nay" on House Resolution 354, the rule for considering seven suspension bills, because I believe we should be passing meaningful unemployment insurance relief for laid-off workers first; and "Yea" on S.J. Res. 32—Congratulating the U.S. Military Academy at West Point On Its Bicentennial Anniversary.

HONORING RICHARD GONZALES, 2001 RECIPIENT OF THE YMCA DISTINGUISHED SERVICE AWARD

HON. KEN CALVERT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Mr. CALVERT. Mr. Speaker, my congressional district in Riverside, California is extremely fortunate to have a dynamic and dedicated group of community leaders who willingly and unselfishly give of their time and talents to ensure the well-being of our cities and county. These individuals work tirelessly to develop voluntary community action to improve the region's economy, its education, its environment and its overall quality of life. One individual, who is a member of this group, is Richard Gonzales. He has been active in so many community groups and activities that it is hard to imagine how he found the time to become a career law enforcement officer with the Los Angeles Police Department (LAPD), as the Chief of Police for the City of Coronoa, a husband and a father of two.

On the 9th of March, Mr. Gaonzales will be honored with the Ira. D. "Cal" Calvert Distinguished Service Award by the Corona-Norco Family YMCA. The award is given in memory of my father, "Cal" Calvert, and his innumerable philanthropic gifts to the community and his efforts to encourage others to serve their community in a similar fashion. The award recognizes Mr. Gonzales for his exceptional devotion to developing community volunteerism.

Richard's career with the LAPD lasted for an impressive 26 years where he commanded many divisions. During those years, he served as a police officer, detective, sergeant, lieutenant and captain. After retiring from LAPD, Richard was named the police chief of Corona in 1998. Richard holds a Master of Arts in Public Administration and a Bachelor of Science in Criminal Justice, both from California State University, Long Beach. He is a graduate of the FBI National Academy in Quantico, Virginia and holds a POST certificate for Command Development. He is also an adjunct professor at Golden West College, where he teaches a POST Discipline course at the Criminal Justice Training Center.

With all of these career and family commitments, Richard's unselfish giving of time and energy to volunteering is all the more impressive and serves as a model to his community, neighbors and own children. His strong commitment to the Inland Empire is displayed in his participation in the Corona Police Community Partnership, Coalition for Family Preservation, Corona Rotary, as a board member for UNITY which deals with community youth sports and the Coronoa-Norco YMCA. Chief Gonzales has actively instituted partnerships with our local school district, ministerial groups and other services in keeping our community safe and raising the quality of life in Corona.

Mr. Speaker, I take this opportunity to thank Richard Gonzales for his dedication, influence and involvement in our community. I know that we will continue to benefit from his longtime experience in the 43rd congressional district and deep commitment to the region. It is a great pleasure for me to congratulate Richard on his outstanding career with the LAPD and his lifelong devotion to the community.

IN MEMORY OF MICHELE MILLS

HON. EDOLPHUS TOWNS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Mr. TOWNS. Mr. Speaker, I rise in honor of a wonderful woman who was taken from us well before her time. Michele Mills was called home on Monday, November 12, 2001. She was aboard American Airlines flight 587, from New York to the Dominican Republican, which seconds after take off tragically fell out of the sky and crashed into a residential neighborhood in Queens, New York.

Michele Mills was born to Priscilla and Eugene Mills on June 4, 1955 in St. Mary's Hospital in Brooklyn. Michele remained a proud resident of Brooklyn for many years living in Red Hook and Crown Heights. After graduating from the Franklin D. Roosevelt High School in 1973, she continued her education at the Fashion Institute of Technology where she majored in merchandising/buying. With encouragement from her sister, Tricia, Michele moved on to an aviation career working for Overseas National Airlines. In 1978, Michele joined American Airlines. She worked there for her remaining twenty-three years.

Michele always kept her priorities in order: God, family, work and hobbies. She realized God's presence in her life at a very early age and joined Brownsville Community Baptist Church, where she served as a faithful member. She was a very spiritual person who routinely began her day with meditation and spiritual readings.

Michele's family and friends were an extremely important part of her life. Her home was a gathering place for festive occasions. She took great pride in graciously serving others and did so with a warm smile. Her colleagues became her extended family.

Michele was an avid reader, a gourmet cook, an interior decorator and a thrifty shopper. She was rarely seen at work or around the house without her "book of the week," nearby. She became well known by her JFK co-workers, family and friends for her famous, "Michele's Fried Chicken." Every aspect of her life was orderly; and her attire was always impeccable. She took little to nothing for granted.

Michele is survived by her parents, Priscilla and Eugene Mills; her siblings, Tricia and Kenneth Mills; her fiancée, Henry Ray; two uncles:

Bob Mills of Edison, New Jersey and Freddie Holmes of Columbia, South Carolina; five aunts, Albertha Bell of Brooklyn, New York, Dezel Mallory of North Carolina, Doris Mills of Edison, New Jersey, Lysine Holmes of South Carolina, Irene Holmes of Brooklyn, New York, a great aunt, Lucille Wilkins of Brooklyn, New York, one god-daughter, Stephanie Holmes of Brooklyn, and a host of cousins and friends throughout the United States.

Mr. Speaker, Michele Mills was a woman who enjoyed her religion, her family, her work, and her hobbies. She worked hard, no matter which part of her life was her focus at any particular moment. As such I hope that my colleagues will join me in honoring the memory of this woman who was at the beginning of a truly remarkable life.

IN HONOR OF BRUCE HOCHMAN

HON. ADAM B. SCHIFF

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Mr. SCHIFF. Mr. Speaker, I rise today to honor the late Bruce Hochman. Mr. Hochman will be greatly missed, as he was a devoted and outstanding member of the Southern California community. Through his civic involvement, he helped affect positive change in the lives of many.

Bruce Hochman received his Bachelor of Arts degree from the University of California; Los Angeles. He later received his Juris Doctorate degree from the same university. Throughout his life, he served as an attorney in many capacities, earning acceptance to practice before the Supreme Court of the United States, Ninth Circuit Court of Appeals, United States District Court, United States Claims Court, and United States Tax Court.

Bruce was an active author and lecturer over the years, speaking on tax law and accounting at a number of prestigious universities and institutes throughout the nation. He has spoken both at the University of California, Los Angeles and the University of Southern California. He also addressed the Southern Tax Institute, Alabama Tax Institute, and the North West Tax Institute.

Bruce was set apart from so many because he devoted himself to the improvement of the lives of others. As the Chairman of the Board of the Foundation for People, Inc., he helped the organization assist federal parolees and probationers with vocational opportunities. For his work with the Anti-Defamation League as a past Regional Board President, National Commissioner and Executive Committee Member, he was honored as an Honorary National Vice Chairman.

So I ask all Members of the United States House of Representatives to pause to honor a great man who helped so many people. He will be missed not only by his family, but by all of those fortunate enough to cross his path.

TRIBUTE TO REVEREND DR. JULIUS RICHARD SCRUGGS

HON. ROBERT E. (BUD) CRAMER, JR.

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Mr. CRAMER. Mr. Speaker, I rise today to recognize Reverend Dr. Julius Richard Scruggs of the First Missionary Baptist Church in Huntsville, Alabama. This year he celebrates his 42nd pastoral anniversary and his 25th anniversary with First Missionary Baptist. Dr. Scruggs is an incredible asset to this church and the City of Huntsville and deserves every honor on this special anniversary.

Rev. Dr. Julius Scruggs was born in Elkton, Tennessee and grew up in Toney, Alabama. He began his pastoral career at the age of 18 at Pine Grove Missionary Baptist Church in Harvest, Alabama, and has continued his work in the ministry for forty-two years. Dr. Scruggs has been at First Missionary Baptist Church since 1977 and has seen more than 2,500 new members unite with the church during that time. Under his esteemed leadership, the church has begun witnessing and evangelism teams, jail ministry teams, scholarship funds, health and recreation ministries, and has greatly enhanced its Christian Education ministry. The church has also built and paid for a house with Habitat for Humanity and the congregation continues to donate their time and money to help build other Habitat homes for the surrounding community.

Mr. Speaker, I want to express my sincere appreciation of Dr. Scruggs' service to our community in Huntsville. Dr. Scruggs is an important and active member of the national and local Christian community. He is a member and former president of the Greater Huntsville Interdenominational Ministerial Fellowship and was the 1998 recipient of their Dr. Martin Luther King, Jr. Award. Dr. Scruggs' many other accomplishments and community services include being elected Vice President at Large of the National Baptist Convention, U.S.A., Inc. in 1999. First Missionary Baptist and the Huntsville community have been very blessed by Rev. Dr. Julius Scruggs' pastoral career. I want to congratulate and thank him for his forty-two years of invaluable service in the ministry and his twenty-five years at First Missionary Baptist Church in Huntsville.

PERSONAL EXPLANATION

HON. DIANE E. WATSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Ms. WATSON of California. Mr. Speaker, on Tuesday, March 5, and Wednesday, March 6, I was absent due to the California State Primary Elections. During that period, I missed four recorded votes: S.J. Res. 32, Congratulating the United States Military Academy at West Point on its Bicentennial Anniversary, and Commending its Outstanding Contributions to the Nation; H. Res. 354, Providing for consideration of motions to suspend the rules; On Approving the Journal; and H. Con. Res. 305, Permitting the Use of the Rotunda of the Capitol for a Ceremony to Present a Gold Medal on Behalf of Congress to Former President Ronald Reagan and his Wife Nancy Reagan. Had I been present, I would have voted "yea" for S.J. Res. 32, H. Con. Res. 305, and Approving the Journal. I would have voted "nay" for H. Res. 354.

FILIPINO SERVICEMEN

HON. RANDY "DUKE" CUNNINGHAM

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Mr. CUNNINGHAM. Mr. Speaker, today I, along with co-sponsor Mr. FILNER of California, introduce legislation aimed at righting a wrong that has been inflicted on a small, hard-working, patriotic segment of our population. When our immigration laws were changed in 1996, we inadvertently affected a group of people that have stalwartly defended our nation since World War II—the Filipino servicemen of the U.S. Navy, and their families.

Under the 1996 changes, life as a Filipino citizen serving our nation became much more difficult than it was in previous years. They saw their families placed in "deferred action status" in order to gain authorization to work. This status, however, is not a period of stay that gives them lawful presence in our country. As a result, they are subject to accruing time unlawfully present, thereby making it difficult for them to ever successfully apply for residency or citizenship. In short, if they want to work, they must accrue bad time. This is clearly an injustice and a remedy is long overdue. Any person who legally enlists to serve in the United States military should be allowed to have his immediate family reside here with him for the duration of his enlistment. And those family members should be authorized to work. Additionally, they should not accrue any "unlawful present time" while their husband or father is defending our nation. That is the simple purpose behind this legislation, and I urge my colleagues to swiftly pass this important legislation.

While it will not affect a great number of people—the Navy only recruited approximately 400 Filipinos per year until 1991 when this recruitment ended—the people it does impact will be greatly affected.

RECOGNIZING THE LIFE OF THE LATE DR. JOHN HOLLOMAN

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Mr. RANGEL. Mr. Speaker, I rise today to recognize a great humanitarian, health executive, physician and civil rights leader—the late Dr. John Holloman who passed away on February 27, 2002.

For many years, as president of the New York City public hospital corporation in the mid-1970s, Dr. Holloman battled for increased accessibility to health care for the poor in the city. At the time he was the country's highest-ranking African-American person in health care.

Duly committed to health care for all, he served as Associated Director of Health Services of the William F. Ryan Community Health Center up until the time of his death—a job he held for the past 21 years. Many remember, that on his desk sat a plaque with the simple, but powerful motto that represented the goal of most of his life's work: "Health Care is Right."

During his years as an advocate and physician, he managed to influence policies to increase better health care for prison inmates and the inclusion of more minorities in the American Medical Association. He also was instrumental in the civil rights movement, where I remember him taking care of people's feet during the voting rights march from Selma to Montgomery, Alabama. The medical attention he gave to many was a necessity during the long journeys in the fight for civil rights.

His medical and humanitarian deeds, numerous at last count, have been recognized by organizations such as the Urban League, state and private universities, and the Bar Association.

For 50 years, Dr. Holloman political activism, community and national leadership, and provision of both care and concern to the most hard to reach and vulnerable population exemplify the will of a man to accomplish great deeds for the benefit of all human beings. I ask my colleagues to join me in celebrating the life of Dr. John Holloman a man who today we owe a great deal of gratitude for his work on ensuring equitable access to health care.

A TRIBUTE TO HADASSAH

HON. WM. LACY CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Mr. CLAY. Mr. Speaker, I would like to take this opportunity to pay a special tribute to one of our nation's most outstanding organizations, a group recognized as both the largest women's and the largest Jewish membership organization in the United States, Hadassah. Hadassah is a name that has come to be synonymous with strength of purpose and humanitarianism. The women of Hadassah are a force for change with an unchanging commitment to serving human needs.

Hadassah, the Women's Zionist Organization of America, recently celebrated its 90th anniversary. Throughout its long history, the women of Hadassah have exemplified the highest ideals of civic awareness and action. They have long combined an agenda of vital international and domestic issues. Proponents of a strong Israeli nation and a peaceful Middle East, they are also champions of fundamental social and domestic programs.

In many ways, Hadassah exemplifies the heart and soul of our democratic society—active involvement in public policy making and civic life. The Hadassah members have successfully channeled their remarkable energies toward an agenda that spans from education and health care, to religious freedom and social justice, to energy and the environment. They are genuinely devoted to serving the human cause.

In so many fundamental ways our nation changed forever last September 11, and we have begun a new chapter in our history. As leaders in Congress, we strive to restore the strength of the American spirit and confidence that was eclipsed by the terrorist events. In this role I am inspired by the women of Hadassah. They have long exercised a very special and unique commitment to domestic and international issues. They are an organization of courageous women whose faith, perseverance and strength of purpose flourishes and thrives in the face of challenge and adversity. I salute Hadassah for its longstanding commitment to enhancing the quality of life for both the people of the United States and the people of Israel. Hadassah members are a source of inspiration and guidance for all Americans as we strive to meet the challenges of achieving peace and domestic security in the years ahead.

INTRODUCTION OF THE "RESTORATION OF FAIRNESS IN IMMIGRATION ACT OF 2002"

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Mr. CONYERS. Mr. Speaker, I am pleased to introduce the "Restoration of Fairness in Immigration Law Act of 2000," a bipartisan bill that is supported by the leaders of the Congressional Hispanic, Black and Asian Pacific Caucuses as well as over 60 immigration advocacy groups.

Since this nation's founding, more than 55 million immigrants from every continent have settled in the United States. Immigrants work hard to make ends meet and pay taxes every day. They have lived in this country for decades, married U.S. citizens, and raised their U.S.-citizen children. Laws that single these people out for no other reason than their status as immigrants violate their fundamental right to fair treatment.

Yet, for too many years, Congress has witnessed a wave of anti-immigrant legislation, playing on our worst fears and prejudices. Since 1994, we have considered proposals to ban birthright citizenship, ban bilingual ballots, and slash family and employment based immigration, as well as to limit the number of asylees and refugees. In 1996 we passed laws denying legal residents the right to public benefits and denying immigrants a range of due process and fairness protections.

Recently we have seen the tragedy of September 11th used as an excuse for even more assaults on the rights of immigrants. The Justice Department is now holding deportation hearings in secret and detaining immigrants even after they are ordered released. The Attorney General is reducing both the independence and number of judges that handle the appeals of immigration cases. We are fending off legislation almost daily intended to reduce if not eliminate immigration to this country.

Those who urge us to restrict the due process rights of immigrants forget the reason these rights were established in the first place. We grant due process rights to citizens and non-citizens alike; not out of some soft-hearted sentimentality, but because we believe that these rights form an important cornerstone to maintaining civilized society.

The "Restoration of Fairness in Immigration Act of 2002" furthers this proud legacy by restoring our nation's longstanding compassion for individuals seeking to build a better life and reunite with their families.

The bill restores fairness to the immigration process by making sure that each person has a chance to have their case heard by a fair and impartial decision maker. No one here is looking to give immigrants a free ride, just a fair chance.

Our work will not stop with the introduction of this legislation. While this bill lays the benchmark for future Congresses of what our immigration policy should be, I believe that many provisions of this bill can be passed into law, including the restoration of section 245(i), Congressman FRANK's Family Reunification Act and Senator KENNEDY's Immigrant Fairness Restoration Act.

Justice and fairness, as well as our own economic interests, demand that we take these actions.

HONORING RICHARD "DICK" DAY

HON. LYNN C. WOOLSEY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Ms. WOOLSEY. Mr. Speaker, I rise today to honor the memory of Richard "Dick" Day, a man who walked his talk with both integrity and good humor, and whose life should encourage every citizen working for a better community.

Born in Idaho of a large and boisterous family 67 years ago, Dick Day matured in the hot political atmosphere of the California of the 60's. Not one to fear overwhelming odds, the young Dick Day chaired John F. Kennedy's presidential campaign in the Republican heartland of Orange County. Later, Day attended U.C. Berkeley's Boalt School of Law balancing his studies with a whimsical campaign for a seat in the California legislature, which he lost handily.

After gradation in 1968, the 32-year-old lawyer moved to the fast growing city of Rohnert Park in Sonoma County. The next year, Day moved to Santa Rosa and won election to the Sonoma County Board of Education. In 1970 he lost election to the Sonoma County Board of Supervisors. In 1979, Day was selected by Governor Jerry Brown to fill a vacancy on the Sonoma County Municipal Court, a position he lost in a mid-year election a year later.

Dick Day's destiny was not to be an officeholder, but to be a man who seized on important issues from the grassroots. Day joined with Bill Kortum, Chuck Rhinehart and others to fight against an attempt by private developers to block 13 miles of spectacular coast from coastal access. As the attorney for Californians Organized to Acquire Access to State Tidelands (COAAST), Day was able to convince the state Supreme Court to overturn a county supervisor decision favorable to developers; and later become instrumental in the passage of a statewide measure that guaranteed public access to beaches in the state and formed a new agency, the California Coastal Commission which is chartered to protect California's coastline from overdevelopment.

In an ongoing fight against unrestrained growth, Day served on the board of Sonoma County Tomorrow; was a founder of a coalition of Santa Rosa neighborhood groups and became chair of the Committee to Oppose Warm Springs Dam. Later he helped form Concerned Citizens for Santa Rosa, which became an influential player in Santa Rosa politics and a training ground for several future leaders, including current California Assemblywoman Pat Wiggins. Day was also a founder of Sonoma County Environmental Action, an effective grassroots political organization that helped elect numerous environmental progressives to Sonoma County city and county government. Fighting against sprawl, Day pushed for city-centered transit as a founder of the Sonoma County Transportation Coalition and for downtown revitalization as a member of Heart of Santa Rosa.

Dick Day provided both legal advice and political savvy to all of these groups. Always outspoken, he learned he was most effective in a background role. When there was a press release, a letter to the editor, a legal challenge to be written, Dick Day was always ready to serve. He didn't always carry the day, but working with others, he won significant victories in protecting the Russian River against dredging, limiting campaign contributions in local elections, creating greenbelts around the county's cities, and defeating tax measures to widen highways without developing public transit. Representing the Sierra Club he won a settlement from the Santa Rosa City Council in the early 90's, after charging that the Council acted improperly in providing tax incentives to the developers of a shopping center.

Dick Day had many opponents, but no real enemies. It was clear that he was coming from a place of integrity. He was a gregarious man, always armed with a quip. He loved to hold court in Mac's Delicatessen in downtown Santa Rosa, advise and josh his friends, and debate and trade barbs with folks of other political persuasions. Politics was play to Dick as much as it was serious business.

He was blessed with a long and loving relationship with his wife, Jean, who was a partner in all of his endeavors, and helped provide a home full of warmth, good conversation and books. Jean died last year, and Dick carried on bravely though his heart was broken.

We will miss Dick Day. His activism showed us that dedicated, informed citizens can make democracy work. And clearly, for all who knew him, Dick Day has been elected to our hearts for life.

BREAKING THE CONTRACT

HON. STEVE ISRAEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Mr. ISRAEL Mr. Speaker, here is an article that I would like to submit for the RECORD.

[From the New York Times, Mar. 5, 2002]

BREAKING THE CONTRACT

(By Paul Krugman)

If converting Social Security to a system of private retirement accounts is such a good idea, why can't advocates of that conversion try, just once, to make their case without insisting that 1 + 1 = 4?

Last week George W. Bush did it again, contrasting Social Security benefits with what retiring workers would have if they had invested all that Social Security taxes in the stock market instead. As an article in The Times pointed out, this was a misleading scenario even on its own terms, financial planners strongly advise against investing solely in stocks, and diversified retirement account wouldn't have risen nearly as much in the 1990's bull market.

But there's something much more serious wrong with Mr. Bush's story. Indeed, the latest remarks perfectly illustrate how he uses bogus comparisons to make private accounts sound like a much better idea than they really are. For by emphasizing what today's 65-year-olds could have done if they hadn't paid Social Security taxes. Mr. Bush has forgotten something rather important. Without those taxes, who would have paid for their parents' benefits?

The point is that when touring its plan to privatize Social Security, the Bush administration conveniently fails to mention the system's existing obligations, the debt it owes to older Americans. As with so many other administration proposals, private accounts are being sold with deceptive advertising.

The truth—which Mr. Bush's economists understand perfectly well—is that Social Security has never been run like a simple pension fund. It's really a social contact: each generation pays taxes that support the previous generation's retirement, and expects to receive the same treatment from the next generation.

You may believe that Franklin Roosevelt should never have created this system in the first place. I disagree, but in any case Social Security exists, and older Americans have upheld their end of the bargain. In particular, baby boomers have spent their working years paying quite high payroll taxes, which were used mainly to support their elders, and only secondarily to help Social Security build up a financial reserve. And they expect to be supported in their turn.

Mr. Bush proposes to allow younger workers to place their payroll taxes in private accounts—in effect, to break this ongoing contract. But then what happens to older workers, who have already paid their dues?

There are only two possibilities. One is default: make room for the trillions diverted into private accounts by slashing the baby boomers' benefits. The other is to buy the baby boomers out—that is, to use money from other sources to replace the diverted funds.

Those really are the only alternatives. Last year the special commission on reform of Social Security, which was charged with producing a plan for private accounts, came to an ignominious end—it issued a deliberately confusing report, then slunk quietly out of town. But wade through its menu of options, and you'll find that in the end the commission grudgingly rediscovered the obvious: Private accounts won't "save" Social Security. On the contrary, they will create a financing crisis, requiring sharp benefit cuts, large infusions of money from unspecified outside sources, or both.

But nervous Republican members of Congress want to send all Social Security recipients a letter (at government expense, of course) assuring them that their benefits will never be cut. And now that the magic budget surplus has turned back into a pumpkin, the government is in no position to infuse new money into Social Security—on the contrary, the government at large is now borrowing from Social Security at a furious pace.

So why is the Bush administration reviving its push for private accounts right now? Did it really learn nothing from the implosion of the reform commission? I doubt it; the administration's economists aren't fools, though loyalty often requires that they pretend otherwise.

A more likely interpretation is that this is entirely cynical. War frenzy is subsiding, the Bush domestic agenda is stalled, and early indications for the November election aren't as good as Karl Rove expected. So it's fantasy time: tantalize the public with visions of sugarplums, then blame Democrats for snatching the goodies away. And it doesn't matter that the numbers don't add up, because the plan will never be tested by reality.

SOCIAL SECURITY

HON. BARBARA LEE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Ms. LEE. Mr. Speaker, I rise today in strong support of preserving Social Security and protecting millions of seniors and individuals with disabilities from the dangers of privatization and from the problems of raiding the Social Security Trust Fund.

Today, there are approximately 45 million Americans who receive Social Security benefits in our nation. Over 4 million of these individuals reside in the state of California but Americans all over our nation depend on this benefit as a major source of retirement income.

Currently, Social Security provides guaranteed, lifelong benefits. No matter what the stock market does the day you retire or in the months leading up to your retirement, your benefits will be unaffected.

While the Bush Administration's budget proposes to raid the Social Security Trust Fund, they also believe in privatizing parts of Social Security.

Unfortunately, privatization plans and cuts to the Social Security budget will hit women the hardest. Poverty among American women over 65 is already twice as severe as among men over 65. Women are also more likely to earn less than men and are more likely to live longer. Women also lose an average of 14 years of earnings due to time out of the workforce (to raise children or to care for ailing parents or spouses) and since women generally have a higher incidence of part-time employment, they have less of an opportunity to save for retirement.

The current Social Security program recognizes this problem; however, most privatization proposals make no provision for these differences and would thus make poverty among women even worse.

Many women depend on Social Security income to survive. What will happen to these individuals when the Social Security Trust Fund is completely raided and substituted by a destructive privatization plan?

This Congress has an obligation to strengthen Social Security because working people have earned and deserve Social Security.

We must work to ensure that Social Security survives for our seniors today as well as for our future generations. We owe it to the American people who have paid into the system for so long. We must increase the flow of funds into Social Security, not divert funds from it.

The Bush Administration's budget specifically proposes to divert $1.5 trillion of the Social Security Trust Fund surplus to other programs over the next ten years, effectively raiding the Social Security Trust Fund.

While the budget provides a $48 billion increase in defense spending, it calls for a $15.8 billion decrease in domestic programs. Providing for our homeland security is critical, but it cannot come at the expense of our seniors.

President Bush's proposals on Social Security directly harm our seniors' entitlement to retirement benefits.

The Bush Administration must understand that privatization does not eliminate the challenges Social Security must confront, it exacerbates them and puts millions of people at risk. If the Bush Administration continues to spend the surplus unwisely and promote privatization, our seniors will be without a retirement program. President Bush, please don't raid the Social Security Trust Fund. Our seniors are depending on you.

HONORING ROY VANDER KALLEN 2001 RECIPIENT OF THE YMCA DISTINGUISHED SERVICE AWARD

HON. KEN CALVERT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Mr. CALVERT. Mr. Speaker, my congressional district in Riverside, California is extremely fortunate to have a dynamic and dedicated group of community leaders who willingly and unselfishly give of their time and talents to ensure the well-being of our cities and county. These individuals work tirelessly to develop voluntary community action to improve the community's economy, its education, its environment and its overall quality of life. One individual, who is a member of this group, is Roy Vander Kallen.

On the 9th of March, Mr. Vander Kallen will be honored with the Ira. D. "Cal" Calvert Distinguished Service Award by the Corona-Norco Family YMCA. The award is given in memory of my father, "Cal" Calvert, and his innumerable philanthropic gifts to the community and his efforts to encourage others to serve their community in a similar fashion. The award recognizes Roy for his exceptional devotion to developing community volunteerism.

A lieutenant in the Corona Police Department, Roy credits his upbringing and the mentors of his youth for providing an emphasis on community service for his own history of volunteerism. Losing his parents at the young age of twelve, it was through his involvement in sports programs that kept him active in school. His early love of football set the tone for the next 25 years. He was all-CIF in high school, Second Team All American in college and played fifteen years in semipro. He joined the Corona Police Department in 1978.

During regular patrols and through handling many family issues throughout his career, Roy noticed that our community includes numerous low income families. The children of these families found themselves without the financial support necessary to participate in many after school sports and organizations. Seeing a need, Roy, along with Bud Gordon, co-founded the ARC Angel Foundation to address this financial void.

Raising funds through an annual golf tournament, the program is administered by Corona police officers. Word of the foundation has spread throughout the city and it is now called upon to assist with Christmas gifts, food, clothing, funerals, after school programs and computer equipment.

Mr. Speaker, I take this opportunity to thank Roy Vander Kallen for his dedication, influence and involvement in our community. He has aided in developing and maintaining community volunteerism in the Corona-Norco area and the Inland Empire. I know that we will continue to benefit from his experience in the 43rd congressional district and deep commitment to the region. It is a great pleasure for me to congratulate Roy on his outstanding career and lifelong devotion to the community.

A TRIBUTE TO WHAT SHALL I RENDER MINISTRIES

HON. EDOLPHUS TOWNS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Mr. TOWNS. Mr. Speaker, I rise in honor of "What Shall I Render Ministries" and their Pastor, Lucille P. Farrell-Scott, in recognition of their first year of ministering to the Brooklyn community.

"What Shall I Render Ministries" was founded on March 1, 2001 with seven members and a mission to nurture families and restore them to wholeness. After only a year, they are fifty-three active members strong and have helped welfare mothers obtain employment by working with those in need on a case-by-case basis. In one instance, the church paid for a nurse's assistants' course and supplied the forms for a mother to become a Nurse's Assistant.

In addition, "What Shall I Render Ministries" established education as a top priority. To demonstrate their commitment, they established a scholarship fund which has already assisted four students with a total of $9,600 in tuition assistance. They have also worked with other community organizations to hold monthly events. In March of 2001, they celebrated Women's History Month by holding a health and wellness seminar for the community. Over one hundred families received free blood pressure screening and literature on breast cancer, lupus, and high blood pressure. Last May, they joined with Alpha Kappa Sorority Sigma Psa Omega Chapter and contributed 60 shoeboxes filled with school supplies that were sent to the school children in Africa. They celebrated Father's Day in June with a celebration honoring black fathers in our community. In August, school day was celebrated by presenting eight high school students with a $300 stipend to assist parents with their student's clothing. On September 11, 2001, "What Shall I Render Ministries" opened their hearts and hands with the assistance of Kinko's, on Queens Boulevard, and distributed over 2,000 prayer cards. In October, "What Shall I Render . . . once again reached out to those in need by contributing $500 to the Annual Lupus walk which was sponsored by the Philadelphia Church of Universal Brotherhood in Brooklyn. In November, they went into the community with $300 gift certificates for needy families so that they would be able to have Thanksgiving dinner. During the Christmas holidays, the church sponsored a new clothing and toy drive to help five families in need. In February of this year, they sponsored three events all designed to help the community: a home buying seminar, a stewardship seminar, and a parenting skills workshop.

Mr. Speaker, in one year "What Shall I Render Ministries" and Pastor Lucille P. Farrell-Scott have built an organization of vast accomplishments and commitment to the community. As such, they are more than worthy of receiving this recognition and I urge my colleagues to join me in honoring this truly remarkable addition to the Brooklyn community.

TRIBUTE TO THE FINLANDIA UNIVERSITY LIONS FOR THEIR NSCAA BASKETBALL CHAMPIONSHIP

HON. BART STUPAK

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Mr. STUPAK. Mr. Speaker, I'd like to say a few words about a great accomplishment by a small university in my congressional district—one of the nation's newest universities, as a matter of fact.

Finlandia University in Hancock, Michigan, up on the beautiful Keweenaw Peninsula, is less than a year old. That age is deceiving, however. Finlandia is actually a new name for Soumi College, a school founded by Finnish immigrants in 1896 to ensure their children would have a better life through advanced education.

One of the qualities of Finnish culture is a respect for the quality of "sisu," translated variously as persistence, determination, drive, or stamina. The Finlandia Lions, the university's basketball team, recently demonstrated the characteristic of sisu by capturing the National Small College Athletic Association national championship in basketball.

The team entered the tourney with a 14–14 record and came up in the first round against St. Mary's College of Ave Maria University, an Orchard Lake, Mich., school. After defeating St. Mary's by a score of 76–50, Finlandia University next faced the tournament's No. I seed, Northwest Christian College from Eugene, Ore. In a comeback victory, 69–66, Finlandia won the right to meet Southern Virginia College of Buena Vista, Va., which it defeated 98–84 to take the title.

The Finlandia Lions basketball team was led by second-year coach Art Van Damme and assistant coach Duane Snell. Nine Michigan students and one student from Finland make up the roster of the National Small College Athletic Association championship team. Team members are Nick Forgette and Jacob Polfus of Carney; Jeffrey Stiefel of Capac, Jeremy Suardina of Gwinn; John Abramson, Painesdale; Mark Nolan, Watton, Jon Paul Katona, Negaunee, Pete Flaska, Ishpeming, Bill Loeks, Iron Mountain; Marcus Ylalnen of Helsinki, Finland, and Michael O'Donnell, Negaunee, the tournament MVP.

Mr. Speaker, Finlandia University is the only private university in Michigan's Upper Peninsula and one of only 28 colleges and universities in the U.S. affiliated with the Evangelical Lutheran Church in America. In its vision statement, Finlandia University says it is "committed to offering liberal arts based, globally connected, international, ecologically sensitive, spiritually engaged and career focused baccalaureate and associate degree programs as well as community education opportunities."

Clearly, Mr. Speaker, Finlandia is also offering its students an opportunity to cheer for one heck of a basketball team. I ask you and my House colleagues to join me in offering the warmest congratulations to Coach Van Damme and the Finlandia Lions for their success in capturing the NSCAA basketball crown.

TRIBUTE TO MRS. SUSAN LaCOMBE

HON. ADAM B. SCHIFF

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Mr. SCHIFF. Mr. Speaker, I rise today to honor an outstanding citizen of California's 27th Congressional District, Mrs. Susan LaCombe. Mrs. LaCombe has served on the South Pasadena Unified School District Board of Education for nearly seventeen years and has been a positive force in my Congressional District for much longer.

Mrs. LaCombe began her journey with the South Pasadena Unified School District Board of Education in May of 1985, fresh from volunteer stints as PTA President at Arroyo Vista Elementary School and PTA Council President. When she was elected to the board, her five children were all attending South Pasadena public schools, one of whom now teaches at Eagle Rock Elementary School in Eagle Rock, California.

The consummate board member, Mrs. LaCombe has worked with fourteen board members and four superintendents during her tenure, serving as board President three times. Under her leadership, some of the board's finest accomplishments include the transition of the junior high to a middle school program eleven years ago, the formation and bonding of today's administrative team under Superintendent Adelson, and the passage of the bond measure, Measure L, in 1995.

Mrs. LaCombe is most proud of her efforts to build an excellent administrative and teaching team, establishing exceptional training programs for the teachers, and maintaining the commitment to excellence in academic programs, "so that families continue to seek out South Pasadena as a wonderful place to live and send their children to the public schools."

The South Pasadena community she served for so long will truly miss her. At this time, I ask all Members to join me in extending congratulations to Mrs. LaCombe for her dedicated service to the South Pasadena community. I am sure that each person positively affected by Mrs. LaCombe's service will also join me in wishing her much joy in the years to come and thank her for her time, her energy, and her efforts.

TRIBUTE TO SPARKMAN HIGH SCHOOL OF HARVEST, ALABAMA

HON. ROBERT E. (BUD) CRAMER, JR.

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Mr. CRAMER. Mr. Speaker, I rise today to honor Sparkman High School from Harvest, Alabama for winning the statewide "We the People . . . The Citizen and the Constitution" competition. On May 4–6, 2002, they will join more than 1,200 students from across the United States in Washington, D.C. to compete in the national finals. The "We the People . . ." program is the most extensive educational program in the country developed specifically to educate young people about the Constitution and the Bill of Rights.

These young scholars from Sparkman High School have worked diligently to reach the national finals and, through their experience, have gained a deep knowledge and understanding of the fundamental principles and values of our constitution. I want to congratulate these students on this outstanding achievement.

The "We the People . . . program, administered by the Center for Civic Education, provides students with a working knowledge of our Constitution, Bill of Rights, and the principles of democratic government. The three-day national competition is modeled after hearings in the United States Congress. The hearings will consist of oral presentations by high school students before a panel of constitutional scholars. The students' testimony is followed by a period of questioning by the judges to explore their depth of understanding and ability to apply their constitutional knowledge.

It is inspiring to see these young people advocate the fundamental ideals and principles of our government in the aftermath of the tragedy on September 11th. These are ideas that identify us as a people and bind us together as a nation. It is important for our next generation to understand these values and principles that we hold as standards in our endeavor to preserve and realize the promise of our constitutional democracy.

The class from Sparkman High School is currently conducting research and preparing for their upcoming participation in the national competition in Washington, D.C. I wish these young "constitutional experts" the best of luck at the We the People . . . national finals. They represent the future leaders of our nation.

END DOMESTIC VIOLENCE WEEK

HON. DIANE E. WATSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Ms. WATSON of California. Mr. Speaker, I'd like to commend Lifetime Television for all their efforts in putting together End Domestic Violence Week, and I thank you for inviting my colleagues in the Women Caucus to participate and lend our voices and support to this important cause. As we celebrate Women's History Month and commemorate International Women's Day tomorrow, March 8, we must applaud the progress women have made globally as we address the problems that continue to impede this progress.

The issue of domestic violence is a great concern. In the 32nd Congressional District of California, I have worked diligently with the Jenesse Center, the oldest sustaining domestic violence intervention program in South Central Los Angeles. I recently commended the Center, on the occasion of their 21 years of dedicated service to women and children.

While in the State Senate, one of my first pieces of legislation addressed domestic violence. I authored the first domestic violence training legislation, which required law enforcement officers to maintain a written report when responding to domestic violence calls. My concern was to make law enforcement sensitive to the cultural, social, economic and personal issues that complicate domestic violence cases. Today, California has implemented laws that remove the abuser from the home and to provide assistance to the victim. But Mr. Speaker, domestic violence is more than a criminal offense, it is an attack on our families and our communities.

Without question the violence in our homes has contributed to the violence on our streets. It is contributing to health care costs that are escalating, and it is tearing apart our communities.

Mr. Speaker, I encourage you to work with the House and the Senate to continue funding programs that ensure the protection of women and children, provide adequate health care for domestic violence victims and to ensure that local law enforcement has the monetary resources to tackle this problem.

Let us rededicate ourselves to continuing the fight against domestic violence.

CONGRATULATIONS TO BECKY MOWRER ON BEING NAMED OUTSTANDING COMMUNITY CITIZEN BY THE SHAVERS CREEK GRANGE

HON. BILL SHUSTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Mr. SHUSTER. Mr. Speaker, I rise today to congratulate Becky Mowrer of Petersburg, Pennsylvania, on being named Outstanding Community Citizen by the Shavers Creek Grange. Becky was crowned as Huntingdon County's Dairy Princess last June. She was then named Pennsylvania State Dairy Princess in September. Becky has the honor of being the first Huntingdon County princess to also be named Pennsylvania State Dairy Princess.

Becky was chosen for the Outstanding Community Citizen award based on her leadership, her integrity, and her community involvement. The Shavers Creek Grange has been giving the Outstanding Community Citizen award annually for many years. The award is often given out to older recipients, but the grange members felt Becky was so deserving that they gave her the award, making her one of the youngest recipients. I commend Becky for being an active citizen in her community, and I wish her continued success in the future.

INTRODUCTION OF DUTY SUSPENSION LEGISLATION

HON. MICHAEL N. CASTLE

OF DELAWARE

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Mr. CASTLE. Mr. Speaker, I rise today to introduce several duty suspension bills for materials used in the production of environmentally sensitive herbicides and insecticides that improve the quality of our lives.

These duty suspension bills lower the cost of producing these products thereby lowering the cost to consumers and helping U.S. industries compete in the global marketplace. When American companies make the active ingredients for these chemicals, there is a proper role for duties to exist. However, when the active ingredients are only made by foreign companies, we needlessly increase product costs for American consumers by imposing duties on their importation. By introducing these bills, I am triggering a careful review of these proposals by the House Ways and Means Committee and the International Trade Commission to make sure there are no domestic producers of these active ingredients so no U.S. jobs will be negatively affected. In fact, these duty suspensions will make U.S. products more competitive, thus creating jobs in the U.S.

Mr. Speaker, let me take this opportunity to highlight the beneficial uses of the final products these chemicals will produce. Triflusulfuron Methyl formulated product is used in the production of a postemergence herbicide for sugar beets. Postemergence herbicides have the advantage of low application rates. The herbicide is only needed if weeds emerge around the sugar beets. Many other herbicides must be applied ahead of time to prevent weeds from developing regardless of whether they would have emerged naturally, needlessly introducing toxins into the environment. Benzyl Carbazate is a general fruit and vegetable insecticide. It has the unique ability to kill certain pests while leaving beneficial insects unharmed. Furthermore, Benzyl Carbazate is well within the margins of safety to mammalian, avian, and aquatic organisms. Esfenvalerate Technical is used in the production of pyrethroid insecticide. This environmentally sound product has significant use in Integrated Pest Management (IPM) programs offering broad-spectrum insect control across a wide range of crops. Finally, the single active ingredient, (S)-methyl 7-chloro-2, 5-dihydro-2-[[(methoxycarbonyl) [4(trifluoromethoxy)phenyl] amino]—carbonyl] indeno [1,2-e] [1,3,4] oxadiazine-4a-(3H)carboxylate and application adjuvants, produces a proprietary insecticide for use on cotton, vegetables and fruit. The formulated products demonstrate good efficacy on target insect pests while preserving beneficial insects and mites, and offer a very favorable environmental profile.

Duty suspension bills often pass with universal bipartisan support because they are common sense for consumers, for the environment, and for enhancing the competitiveness of our domestic industries. I urge support for these proposals after the appropriate committees and agencies have thoroughly vetted these measures.

INTERNET FREEDOM AND BROADBAND DEPLOYMENT ACT OF 2001

SPEECH OF

HON. SPENCER BACHUS

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 27, 2002

The House in Committee of the Whole House on the State of the Union had under consideration the bill (H.R. 1542) to deregulate the Internet and high speed data services, and for other purposes:

Mr. BACHUS. Mr. Chairman, I am in full support of H.R. 1542 including the Manager's Amendment, which includes an antitrust savings clause. That clause reaffirms that regulatory and antitrust laws play important but different roles in promoting competition in the telecom industry. The Telecommunications Act of 1996 governs the transition of local telecommunications from a heavily regulated environment historically dominated by incumbent carriers to a competitive environment in which new entrants and incumbents compete vigorously with each other. The 1996 Act imposes on carriers special duties that do not exist under the antitrust laws and compels them to take actions firms in an unregulated environment would not undertake. Antitrust laws serve a different function. They protect competition by preventing firms from entering into agreements that prevent or restrain competition. They also prevent firms from unlawfully obtaining monopoly power or unlawfully extending existing monopolies into new lines of business. There should be no confusion about the differences in these laws or the roles they play in bringing the benefits of competition to American consumers.

These laws are compatible and complementary for two reasons. First, they promote the same goal: vigorous competition in the marketplace. Second, to the extent that any potential inconsistencies may arise in the administration of these laws, antitrust courts resolve them through well-established antitrust doctrines recognizing that general antitrust laws will not be enforced in a manner that undermines the requirements of regulatory laws crafted to deal with specific industry situations. This savings clause does not repeal any portion of the antitrust laws or antitrust doctrines adopted by the courts under those laws.

Neither this Act nor the 1996 Act change the manner in which the antitrust laws are enforced by antitrust enforcement agencies and courts. Rights, duties and remedies under the antitrust laws are preserved and not diminished in any way. Also preserved are the traditional antitrust defenses, exemptions, and immunities crafted by the courts to balance antitrust and regulatory objectives for more than 100 years.

This savings clause does not overrule any portion of the Seventh Circuit decision in the Goldwasser case. This savings clause is fully consistent with the learned opinion in that case.

By not modifying antitrust laws, rights, remedies, defenses, exemptions, immunities, and procedures, we make it plain that antitrust courts should continue to do what they have always done—manage potential conflicts between the administration of antitrust and regulatory laws on a case-by-case basis with due regard for the intent of Congress in establishing specific regulatory processes. This savings clause achieves that effect.

IN HONOR OF ROBERT "BOB" HODGES

HON. WALTER B. JONES

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Mr. JONES of North Carolina. Mr. Speaker, today I speak in honor of an incredible man: A man who is believed to be our Nation's oldest veteran, a man who in 1918 joined the military so that he could serve our country during WWI, a man who worked from the time he was 8 years old, a man who has served his community well, and a man, who, above all else, has loved the Lord his God with all his heart, mind and soul. That man is Mr. Robert Hodges, of Stonewall, North Carolina. I am proud, honored and, quite frankly, privileged to speak in his honor today on the House floor.

Mr. Hodges has led a remarkable life. Considering he has seen the turn of two centuries, recounting all of his milestones would take hours. Instead, I will attempt to highlight just a few of the high points in Mr. Hodges life.

Mr. Hodges was born on June 18, 1891, in a small community called North Creek, just between Bath and Belhaven, North Carolina. His grandparents were slaves, and his mother, born into slavery, was later freed in New Bern, NC. At the age of 8, Mr. Hodges began working, just as his parents had done.

In 1918, Mr. Hodges joined the United States Army where he proudly wore the uniform of heroes as he served in France with the 702 Stevedore Battalion. A lifelong Eastern North Carolinian, Mr. Hodges returned to Beaufort County after his discharge where he married Malinda Boyd.

After moving to Pamlico County, Mr. Hodges worked his way from bookkeeper, to farm foreman, to landowner of a farm of his very own. He continued to work the land until his eyesight forced him to retire in the 1950's. His retirement, however, did not keep him from participating in his community. Mr. Hodges has remained a vital part of his hometown in Stonewall, North Carolina and his church home of Mt. Sinai Missionary Baptist Church. Church has been a part of Mr. Hodges' life since he was a young child. Growing up, young Robert used to walk 12 miles to church and back . . . barefoot.

Some of you may ask, "What is the secret to Mr. Hodges long and healthy life?" Well, my friends, I must tell you I believe it is the scripture verse he has clung to for so many years. Mr. Hodges says he gives God the glory for his long life, claiming the 5th commandment as his own. The verse reads, "Honor thy father and mother; that thy days may be long upon the land which the Lord thy God giveth thee." Mr. Hodges' life has certainly been very "long upon the land." His very history, quite frankly, illustrates what it means to live a life pleasing to the Lord, and to in turn see His blessings.

In closing, Mr. Speaker, let me say that Mr. Hodges joins so many of the men and women who served our Nation during wartime and asked so little in return. And today, those people who know him best are here to honor him, not only for his service to our great Nation but for the incredible impressions he has made on the lives of so many people as husband, father, grandfather, and a citizen of North Carolina.

It is because of the dedication and heroic courage of men like Robert Hodges that we can enjoy the many freedoms of this great land. On behalf of a grateful Nation, please accept my deepest appreciation.

DESIGNATION OF GEORGE ROGERS CLARK NORTHWEST CAMPAIGN TRAIL FOR STUDY FOR POTENTIAL ADDITION TO THE NATIONAL TRAILS SYSTEM

SPEECH OF

HON. BARON P. HILL

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 2002

Mr. HILL. Mr. Speaker, I rise to support H.R. 1963 and note that a George Rogers Clark Northwest Campaign Trail would not be complete without the inclusion of Clarksville, Indiana and the surrounding Falls of the Ohio area.

George Rogers Clark and his troops arrived at the Falls of the Ohio in late May of 1778, where they took possession of Corn Island. It was here that Clark trained his troops and first told them of a secret plan to attack British forts in the Illinois country. On June 24, 1778, Clark and his troops left the Falls to begin the Illinois campaign to take Kaskaskia, Cahokia and Vincennes.

Indiana takes great pride in General George Rogers Clark. State law directs the Governor to proclaim each February 25 as "George Rogers Clark Day" to mark the anniversary of the surrender of Fort Sackville at Vincennes. Not only did this great victory occur on what would later become part of Indiana, but General Clark and his men were granted 150,000 acres of land for their service by the state of Virginia in what is now Clark and Floyd counties, Indiana. One thousand acres overlooking the Falls of the Ohio River became Clarksville, Indiana. General Clark lived in Clarksville from 1803 to 1809.

Just recently, through a grant from the Ogle Foundation and individual contributions from community members, a representation cabin was placed on the site where Clark's original cabin overlooked the Falls of the Ohio. The significance of this site goes beyond General Clark. In 1803, Meriwether Lewis met General Clark's younger brother, William at the cabin to plan the Lewis and Clark Expedition.

I applaud Mr. Costello of Illinois for bringing forward this legislation because George Rogers Clark is a largely forgotten hero of the American revolution. He has been overshadowed by the success of his younger brother, William. Yet, through the sheer force of his personality, General Clark motivated his men to endure great hardship and do the impossible. His vision and leadership is credited by historians with assuring America's control of what later became the Northwest Territory.

I look forward to the establishment of the George Rogers Clark Northwest Campaign Trail and invite every American to visit the Falls of the Ohio to learn more about this important chapter of our nation's history.

HIGHLIGHTING IMPORTANCE OF INTERNATIONAL WOMEN'S DAY

HON. CAROLYN C. KILPATRICK

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Ms. KILPATRICK. Mr. Speaker, I rise today to support and highlight the importance of International Women's Day on March 8. International Women's Day honors the history and important work of women around the world in their fight toward equality, justice, and peace. While this day symbolizes the advancement and great strides that have been made, this day also symbolizes the work that still needs to be done to break down the barriers and injustices women continue to face day after day.

In our nation and around the world, women continue to be victims of violence. Domestic violence, sexual assault, and rape are just a few forms of the injustices perpetrated against women. The statistics are startling. In our nation, at least 1 out of 6 women and girls has been beaten or sexually abused in her lifetime. Worldwide, the percentage increases dramatically to 1 out of every 3 women. These numbers speak to the continued and gross victimization that women face.

Here at home and around the world, we need to continue our efforts to ensure that women are provided with the safeguards, services, and tools they need, namely an education, to break the cycle of violence. Education empowers individuals and would give women the opportunity to be independent and self-reliant. No woman anywhere should have to continue to be a victim of violence and discrimination. International Women's Day represents this important goal.

IN HONOR OF VINCENT "JIMMY" SUOZZI

HON. GARY L. ACKERMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Mr. ACKERMAN. Mr. Speaker, I rise today to congratulate Vincent "Jimmy" Suozzi, who will be honored by the Glen Cove Council of PTA at a dinner on Sunday, March 10, 2002.

Jimmy Suozzi, former Mayor and current Controller of the City of Glen Cove, NY, was bom in New York City and raised in the City of Glen Cove where he has lived ever since. Drafted into the army immediately after high school, Jimmy served our nation two years before attending St. John's University under the GI Bill. In 1950, Jimmy graduated with a BBA in Accounting and soon after began his brilliant career as a community leader in Glen Cove.

Jimmy's career in local politics began in the 1950s with his appointment to the Glen Cove Planning Board and he moved onto serve as the Deputy County Treasurer in the late 1960's. On January 1, 1973, Vincent "Jimmy" Suozzi was appointed Mayor of the City of Glen Cove, and was then elected by the citizens of his city four times between 1975 and 1984. Among his many accomplishments during his 11 years as Glen Cove's chief executive, Jimmy Suozzi centralized control of the various city departments, established celebration of Martin Luther King Day, and had Sturno, Italy declared the sister city of Glen Cove.

Jimmy has always been an active, outstanding and dedicated member of the Glen Cove Community. He recalls being one of the first altar boys at St. Rocco's Church, where today he is the chairman of the St. Rocco's Annual Feast. As a young man, Jimmy worked hard with the Glen Cove Community Chest to raise money for the Community House in the Orchard, an afterschool center servicing all the children in the neighborhood. As a father, Jimmy was active in the Coles School PTA and Glen Cove High School PTSA. Today, in addition to being a member of the Sons of Italy. Knights of Columbus, VFW and American Legion, Jimmy is a devoted father, grandfather and husband. Married to Theresa M. Cioffs since 1950, they have raised seven children, all who graduated from Glen Cove High School.

Mr. Speaker, it is with great pride that I honor such an exceptional individual. I ask all my colleagues in the House of Representatives to join me now in commending Vincent "Jimmy" Suozzi for his life-long dedication to the Glen Cove Community.

HONORING MEXICAN PAINTER RAUL ANGUIANO

HON. HILDA L. SOLIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Ms. SOLIS. Mr. Speaker, I rise today to mark the 87th birthday of Maestro Raul Anguiano, a prolific Mexican painter and muralist whose career has spanned 68 years.

Born in 1915 in Guadalajara, Mexico, Mr. Anguiano began studying painting at an early age. In 1934, he moved to Mexico City to begin his artistic career as a muralist and instructor. He quickly became part of the second generation of 20th century Mexican muralists known as the Mexican School of Painting, which attempted to make art accessible to the people and depict their reality.

Mr. Anguiano's murals portray the true heart of Mexico by depicting the indigenous people as well as the workers of the country. His murals can be found throughout North and South America and Europe, and one entitled "Crucifixion" was recently acquired by the Vatican. He has participated in both individual and public exhibitions internationally, including in Mexico, the United States, Chile, Germany, Russia, France and Cuba.

His talent led Mr. Anguiano to become not only a celebrated painter and muralist but also a literary illustrator and teacher. He has illustrated several books and taught at renowned art schools throughout Mexico, as well as in France and the United States.

In 1952, Mr. Anguiano completed one of his most famous paintings called "La Espina" or "The Thorn", which was influenced by his travels throughout the Mayan regions of Mexico. The painting portrays a woman with Indian features who is working intently to remove a thorn from her foot. Although the scene depicted is not extraordinary in and of itself, Mr. Anguiano's stunning depiction reveals the importance of everyday activities.

This acclaimed muralist's most recent work is a mural for East Los Angeles College, a community college which serves the students of my district. This mural has brought international attention to the school and the community it serves, and I am grateful for his kind contribution.

I urge my colleagues to join me in recognizing this incredible Mexican artist.

THE JUDICIAL IMPROVEMENTS ACT OF 2002

HON. HOWARD COBLE

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Mr. COBLE. Mr. Speaker, I rise to introduce the "Judicial Improvements Act of 2002." This legislation constitutes a noncontroversial fine-tuning of an existing statute, the "Judicial Conduct and Disability Act of 1980" (the 1980 Act), which permits individuals to file complaints against federal judges for inappropriate behavior.

Mr. Speaker, the Subcommittee on Courts, the Internet, and Intellectual Property conducted an oversight hearing on the operations of federal judicial misconduct statutes on November 29, 2001. The witnesses at the hearing were united in their general praise for the Third Branch. Their respect for the federal judiciary is also shared by the members of the Subcommittee. Still, no federal entity is immune from periodic evaluation.

Consistent with our obligations to conduct oversight, the Ranking Member of the Subcommittee, Representative HOWARD BERMAN, and I are introducing this bill that will reorganize the 1980 Act by re-codifying it as a new chapter of title 28 of the U.S. Code. The legislation will also clarify the responsibilities of a circuit chief judge in making initial evaluations of a complaint. In addition, section 3 of the bill resolves an existing conflict governing recused judges and whether their votes should count in determining a majority by a circuit to sit en banc.

The changes set forth in the "Judicial Improvements Act of 2002" are largely based on procedures that the judges themselves have developed through the years. The construct for the bill, based as it is on self-regulation, indicates that Congress and the American people retain great confidence in the ability of federal judges to identify and correct misconduct among their own colleagues.

Finally, Mr. Speaker, I would be remiss if I failed to highlight the contributions of three individuals who helped to draft this bill. They are Professor Arthur Hellman of the Pittsburgh School of Law; Mike Remington, former Chief Counsel of our Subcommittee; and Sandy Strokoff of the Office of Legislative Counsel. The Subcommittee appreciates the energy, time, and talent that they invested in this project.

In closing, I urge my colleagues to support the "Judicial Improvements Act of 2002," and I thank the Speaker.

HONORING THE 70TH ANNIVERSARY OF LOCAL 318 INTERNATIONAL UNION OF OPERATING ENGINEERS

HON. JERRY F. COSTELLO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Mr. COSTELLO. Mr. Speaker, I rise today to ask my colleagues to join me in recognizing the 70th Anniversary of Local 318, International Union of Operating Engineers in Marion, Illinois.

Local 318 has 1125 members, which represents most of southernmost Illinois. Ron Herring, who is currently the Business Manager for 318, oversees the operations of the union. For Ron, being an operating engineer is more than just a job; it is a way of life. Ron's father, who is now retired, has been a member of the union for 53 years.

Back in 1932, during the Great Depression, a construction company came to Saline County, Illinois to do drainage work on the Saline River. They hired local people, some of them out of work coal miners. Working conditions were bad. Two workers on the job, brothers Ted and Prentiss Carathurs of Indiana, encouraged local men hired for the job to apply for an Operating Engineers Charter. It took seven names to apply, and since there were only 5 local men, the five split the fee in order to include the Carathurs brothers name to make the seven names needed for the application.

Soon, others joined in and on June 1, 1932, Laborer's International Representative William "Whitey" Stuhr came to Harrisburg, Illinois and presented the Union's charter. Local 318 was born.

Local 318's first Business Manager was Arley Sheldon, the founder. He was the Local's Business Manager from June 1, 1932 to October 12, 1948. After Arley's term, 318 has had six Business Managers; Stanley Medley 1948–1965; Wardell Riggs 1965–1980; L. Dale Choate 1980–1987; Lester D. Allen 1987–1989; Bradley O. Williams 1990–1993; Anthony Ron Herring 1993-present.

Over the years, 318 has seen plenty of changes especially in equipment. From the days of mules pulling scrapers to the use of modern computerized systems in dozers, cranes and trucks. They have come from the days of Bloody Williamson County when the UMWA was battling for workers' rights from 1949 through 1959 when this country was almost 85% union. 318 met in local kitchens, halls and rooms throughout southern Illinois. They participate in hundreds of projects across the southern portion of the state. Local 318's service area has been 100% union and continues to be under 318's leadership.

From the first project in the 30's on the Saline River, flood aid assistance in Harrisburg in 1937, construction of the Illinois Ordnance plant, the "Big Inch" pipeline project, the Joppa Power Plant, construction of Interstates 57, 24, and 64, the Dog Island Dam project and cleanup work at Crab Orchard, Local 318 has continued to provide quality work.

Founded in 1896, the International Union of Operating Engineers today has 400,000 members nationwide in some 170 local unions. It is the 12th largest union in the AFL–CIO. Further, nearly 100 apprenticeships and training programs ensure that union members are highly trained and highly skilled. The union offers employment and training opportunities to all.

Local 318, like other Building Trades, are involved in many community activities and educational programs for children. 318 has a program that begins introducing students, even at the grade school level, to the trade in hopes that they develop another dedicated operator prepared to assist southern Illinois. It was the first labor union in Illinois to take this step.

Mr. Speaker, I ask my colleagues to join me in honoring the 70th Anniversary of Local 318 of the International Union of Operating Engineers and wish their members and their families the very best for the future.

CONGRATULATING AMANDA WETZEL

HON. JOSEPH M. HOEFFEL

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Mr. HOEFFEL. Mr. Speaker, I rise today to congratulate Amanda Wetzel, who was recently named a George Mitchell Scholarship recipient for 2002–2003. Amanda was 1 of only 12 scholars nationwide selected for this prestigious award. The scholarship will include a year of postgraduate study in Northern Ireland.

The George Mitchell Scholarship is awarded to American students who have demonstrated the highest standards of academic excellence, leadership, and community service. Since its inception in 1998, the Mitchell scholarship is recognized among the most prestigious fellowships for international study. The program is named in honor of former Senator George J. Mitchell and is administered by the United States-Ireland Alliance, a nonprofit organization based in Washington, DC.

In May, Amanda will receive her bachelor's degree in International Politics from Penn State University. While attending Penn State, Amanda has served as director of the Innovation and Quality Team Program at the Schreyer Institute for Innovative Learning. She directed groups who provided feedback and policy based recommendations to improve meaningful teaming in Penn State classes. She also interned at the U.S. Consulate in Belfast and as intern in the European Affairs Bureau at the State Department.

Amanda is a hard-working, dedicated student and American. I am pleased to have this opportunity to recognize Amanda Wetzel for her commitment and achievement.

PERSONAL EXPLANATION

HON. LUCILLE ROYBAL-ALLARD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Ms. ROYBAL-ALLARD. Mr. Speaker, due to the California State primary on March 5, 2002, I was in my congressional district and unable to be present for rollcall votes 47–50. Had I been present I would have voted "yea" on rollcall votes 47, 48, and 50; and "nay" on rollcall vote 49.

RECOGNIZING CIVIL AIR PATROL FOR 60 YEARS OF SERVICE TO UNITED STATES

SPEECH OF

HON. BOB BARR

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 28, 2002

Mr. BARR of Georgia. Mr. Speaker, I am pleased to rise in support of H. Con. Res. 311, recognizing the Civil Air Patrol for 60 years of service to the United States.

The Civil Air Patrol has been involved in airborne and ground-based search and rescue for over half a century. Founded on December 1, 1941, to counter the threat of enemy submarines operating off the east coast, the Civil Air Patrol has evolved into a highly trained emergency response team of volunteer members, responding to needs of emergency preparedness agencies throughout the nation.

With more than 53,000 members, CAP manages the world's largest fleet of light, single-engine aircraft—totaling 530—which fly more than 85 percent of inland search and rescue missions.

The Civil Air Patrol also aggressively and heroically performs its other two missions mandated by the Congress: Aerospace Education and Cadet Programs. In fulfilling these missions, the CAP serves as an important liaison between today's planners of our Nation's air strength and tomorrow's pilots and air navigators.

Not only does the CAP fulfill all these missions, it also provides disaster relief services, and assists in humanitarian services and counterdrug efforts; CAP also performs many other missions in direct support of the U.S. Air Force. Many CAP members serve as aerospace education instructors, ground team members, and observers during search and rescue missions. They also serve as radio operators, mission coordinators, public affairs officers, and cadet mentors. To prepare volunteers to serve their communities, CAP provides training in 20 different specialty tracks, including technical instruction in flight operations, emergency services, and communications. In addition, members can participate in management and executive leadership training that complements Air Force professional development.

The Civil Air Patrol is structured around the core values of Integrity, Volunteer Service, Excellence, and Respect. The core values reflected in all CAP members exemplify the highest standards of personal and professional conduct.

I am proud to represent a number of squadrons, which make up the Civil Air Patrol Wing of Georgia, including: the Georgia State Legislative and the Georgia Wing Headquarters Composite Squadron which flies out of Dobbins Air Reserve Base; the Bartow-Etowah Composite Squadron; the Rome Composite Squadron; the Cobb County Composite Squadron; the West Georgia Composite Squadron; and the Gwinnett County Composite Squadron. I am proud to recognize all of them for their efforts, and I commend them for their generosity and concern for others. They reflect the commitment to voluntary community service essential in solving our nation's most pressing problems. By reaching out to those in need, they set an outstanding example to all Americans; especially our young people.

EXPRESSING SUPPORT FOR DEMOCRATICALLY ELECTED GOVERNMENT OF COLOMBIA AND ITS EFFORTS TO COUNTER THREATS FROM U.S.-DESIGNATED FOREIGN TERRORIST ORGANIZATIONS

SPEECH OF

HON. TAMMY BALDWIN

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 2002

Ms. BALDWIN. Mr. Speaker, I rise in opposition to H. Res. 358. We are all deeply troubled by the ongoing civil war in Colombia. Efforts to attain a peace agreement have not been successful so far, but the recent setbacks to the peace process do not change the fundamental nature of the conflict and should not result in a rush to radically revise U.S. policy.

This conflict did not arise from drug trafficking. It is a forty-year-old conflict stemming from fundamental economic, political and social tensions in Colombia. All parties have been implicated in drug trafficking. And all parties have been responsible for serious and repeated human rights abuses. The Revolutionary Armed Forces of Colombia (known by their Spanish acronym FARC), the United Self-Defense Forces of Colombia (AUC), and the National Liberation Army (ELN) have all contributed to the murder, kidnapping and extortion now endemic in Colombia. This Congress is clearly on record condemning these actions.

While Congress and the United States have condemned the revolutionaries, the paramilitaries and the Colombian government for human rights abuses, we have been very careful to avoid becoming entangled in the Colombian civil war. As a very large and geographically diverse country, military action in Colombia is quite difficult and could easily drag our nation into a quagmire like Vietnam. We have wisely recognized this risk and have limited military assistance to anti-narcotic activities.

In addition to limiting the use of U.S. military assistance to anti-drug efforts, Congress has taken numerous steps to try to break the links between the Colombian military and the paramilitary forces of the AUC. U.S. and Colombian non-governmental organizations have clearly and definitively documented significant and ongoing collaboration between the paramilitaries and the Colombian military. Paramilitary violence has increased even as the record of the Colombian military has improved. Most estimates indicated the paramilitaries commit more than 75% of the non-combatant killings.

The resolution under consideration by the House states that the "Colombian Government has made progress in its efforts to combat and capture members of illegal paramilitary organizations and taken positive steps to break links between individual members of the security forces and such organizations." Well, saying it does not make it so. This simply isn't the reality. A report last month from Human Rights Watch (HRW), Amnesty International (AI) and the Washington Office on Latin America (WOLA) concluded exactly the opposite. Their report noted that President Pastrana has "failed to take effective action to establish control over the security forces and break the persistent ties to paramilitary groups." The report further noted that high-ranking officers "failed to take steps necessary to prevent killings by suspending security force members suspected of abuses, ensuring that their cases were handed over to civilian judicial authorities for investigation and prosecution, and pursuing and arresting paramilitary leaders." Despite our efforts, we have not seen any significant progress.

As part of the FY02 Foreign Operations Appropriations bill, signed by the President on January 10, 2002 (Public Law 107–115), the Secretary of State must certify that Colombia has met certain human rights conditions in order for aid to be released (Section 567). According to the HRW, AI and WOLA report, the conditions required for certification have not been met. I am very concerned that approval of this resolution by the House will be a signal to the Colombian Government and the U.S. Secretary of State that we believe these conditions have been met. I do not believe that they have been and certification should not take place at this time.

Rushing this resolution to the floor is unnecessary and a mistake. As my colleague from Massachusetts, Mr. Delahunt, has said, we need to have comprehensive hearings on Colombia. Using the war on terrorism to justify leaping into a forty-year-old civil war with little debate or consideration is the wrong thing to do. We must step back and evaluate our policy toward Colombia. The United States has become embroiled in civil wars in the past, and we've come to regret those actions. Let's not let that happen with Colombia.

TRIBUTE TO E. L. "BERT" POOSER

HON. JAMES E. CLYBURN

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Mr. CLYBURN. Mr. Speaker, I rise today to pay tribute to E. L. "Bert" Pooser, of South Carolina, a renowned man and respected leader of hotel development and management throughout the southeastern United States.

Mr. Pooser grew up in Orangeburg, SC, during the 1940s where he learned the value and need of hard work at an early age. He invested in his first hotel at the age of 28. Since then, his hotel empire has expanded to 33 hotels throughout six southeastern States. Many in the industry consider him a hotel giant.

Currently, Mr. Pooser is president and CEO of Interstate Management and Investment Corporation (IMIC) hotels. Mr. Pooser's company includes 1,500 employees that handle all aspects of the business from sales and marketing, to a design and property management team. IMIC assets include Sheraton Hotels, Hampton Inns, Comfort Inns, and Quality Suites. Throughout IMIC's 20 years of existence, they have purchased or built nearly 40 hotels. This past year, Mr. Pooser's firm opened two more hotels in Myrtle Beach, SC.

Mr. Pooser has received numerous awards during his building career. The University of South Carolina's School of Hotel, Restaurant and Tourism Management has honored him as the Hospitality Leader of the Year. Today, at 63, Mr. Pooser has no plans for retirement anytime soon.

Mr. Speaker, I ask you and my colleagues to join me today in honoring Mr. E. L. "Bert" Pooser for his achievements and commitments to the hotel industry in the southeastern States. I sincerely thank Mr. Pooser for his outstanding contributions, and congratulate him on becoming a recipient of the 2002 South Carolina Hospitality Leader of the Year Award, and wish him well in all of his future endeavors.

RECOGNIZING THE AMERICAN CENTURY THEATER

HON. TOM DAVIS

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Mr. TOM DAVIS of Virginia. Mr. Speaker, I rise today to acknowledge the American Century Theater, which is located in northern Virginia. Since 1995, this Arlington-based theater has been overwhelmingly successful in bringing different genres of theater to the stage, and in turn has greatly enhanced the quality of life for northern Virginians.

When the American Century Theater realized the lack of visibility American playwrights have in the Washington DC area, it strove to encourage Americans to rediscover the extraordinary vision and wisdom of our past American playwrights. Regardless of the countless masterpieces created by our country's great writers, only a handful of classics could be found in local theaters. The American Century theater recognized the lack of family-orientated shows available, and subsequently set the theater's mission to become an experience for the whole family to enjoy.

The American Century Theater focuses on plays that are at least 25 years old, under produced, and contain a variety of form and content. The plays do not contain offensive language or graphic sexual behavior, and they frequently deal with current social issues—making them suitable for the entire family. The Theater has also shown itself to be nonpartisan and apolitical.

In addition to providing northern Virginia with extraordinary plays, the Theater also maintains a strong dedication to serving our community in many other ways. StageThought is a special educational program for high school students and other youth groups that provide study guides, pre- and post-show discussions, and drastically reduced group rates that enable these students to attend plays that might otherwise be outside their means.

Mr. Speaker, in closing, I would like to congratulate the American Century Theater for its continued efforts to preserve American Culture. The American Century Theater is a local treasure and should be recognized for its integrity and laudable mission. I hope all my colleagues will join me in applauding them for their hard work in bringing American heritage to the theater.

VIOLENCE AGAINST WOMEN

HON. JOE KNOLLENBERG

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Mr. KNOLLENBERG. Mr. Speaker, since the first celebration of International Women's Day on March 19, 1911, women have come to realize opportunities about which they then could only dream. And they have taken advantage of those opportunities, excelling in every field and task put before them. As the world has become more aware of the abilities and talents of women throughout the globe, we also have become more aware of the very real issue of violence against women and its devastating effects.

While our consciousness of violence against women has risen, the problem has not evaporated. There is still much work to do. Cases of violence against women continue to persist in our own nation and throughout the world. These vicious crimes often happen within the home and have devastating consequences for the victims personally, as well as for their families and for society as a whole.

We must continue to work together to empower women from an early age by teaching them that any form of abuse is unacceptable and encouraging them to speak out. We must also ensure that those who commit these heinous acts are appropriately punished for the crimes they commit.

I serve on the Appropriations Subcommittee on Foreign Operations where I am proud to support many foreign assistance programs that benefit women, including the microcredit program for the very poor. These program empower women by giving them the capacity to provide for themselves and become self-reliant. Economically empowering women not only reduces poverty, it also creates a sense of self-worth and importance with which women can address the many challenges they face.

Mr. Speaker, we must continue to build upon the achievements that have been made in reducing violence against women and I look forward to working with my colleagues to accomplish this goal.

PERSONAL EXPLANATION

HON. JEFF MILLER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Mr. JEFF MILLER of Florida. Mr. Speaker, I was unavoidably detained earlier today while attending a closed hearing for Schism v. the United States in the U.S. Court of Appeals, here in Washington, DC. Being a closed hearing, I was unable to leave when this afternoon's vote was called and further, had the understanding that the vote would not occur until a time certain. I respectfully request the RECORD to reflect that, had I been here, I would have voted "yea" on S.J. Res. 32.

GENERATING OPPORTUNITIES BY FORGIVING EDUCATIONAL DEBT FOR SERVICE (GOFEDS)

HON. DANNY K. DAVIS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Mr. DAVIS of Illinois. Mr. Speaker, listening to the inspiring thoughts of Darin Johnson, I can't help but reflect on the words uttered over 40 years ago by President John F. Kennedy:

"In the long history of the world, only a few generations have been granted the role of defending freedom in its hour of maximum danger. I do not shrink from this responsibility—I welcome it. I do not believe that any of us would exchange places with any other people or any other generation. The energy, the faith, the devotion which we bring to this endeavor will light our country, and all who serve it—and the glow from that fire can truly light the world.

And so, my fellow Americans: ask not what your country can do for you—ask what you can do for your country."

There was perhaps no more eloquent a call to government service than this speech by President Kennedy. Even though our enemies may be different than they were in 1961, we are still charged with "defending freedom in its hour of maximum danger."

In the aftermath of 9–11, many Americans, like Darin Johnson, are looking for ways to serve and "make a difference" for their country. In fact, according to data collected by the Partnership for Public Service, in the three months after September 11th, the number of applications for federal jobs received by the U.S. Office of Personnel Management's service centers increased by 14 percent. We need to seize this opportunity to hire a diverse group of the best and brightest women and men this country has to offer. However, we can't do this using outdated recruitment methods and incentives that penalize those who choose Federal service.

That's why we are here today. With college tuition costs spiraling, many college graduates are left with huge loans to repay following graduation. Even those who are attracted to government employment, out of necessity, gravitate toward the higher salaries of the private sector in order to repay their personal debt.

Although we are standing here on Capitol Hill, this is not just an "inside the Beltway issue." The reach of our Federal government is evident across our great nation. In Cook County, Illinois, for example, my home state, there are over 20,000 Federal employees. I am, therefore, pleased to be a cosponsor of Generating Opportunities by Forgiving Educational Debt for service (GOFEDS). Currently, when Federal agencies repay student loans for employees, these payments are taxable to the employees. However, many educational institutions have instituted similar loan repayment benefits to encourage graduates to go into government service or to work for nonprofit organizations—and these payments are not taxable. This bill will erase this disparity.

However, let us not see this bill as an ending, but rather, a beginning—one in a series of initiatives we need to take to ensure that our Federal government is a model employer—we own the American people no less.

SAINT PATRICK'S DAY 2002 DEMONSTRATES REAL PROGRESS IN NORTH OF IRELAND

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Mr. GILMAN. Mr. Speaker, yet another glorious Saint Patrick's Day will soon be upon us, and all of the good, warm Irish people here, and all around the globe, will be celebrating the patron saint of the Emerald Isle on this the day when the wearing of the green means something special.

Today, in the long, difficult struggle for lasting peace and justice in the north of Ireland there is also much to celebrate. The assembly and local governing bodies are up and running. All of the people of Northern Ireland are making their own judgments on many of the contentious issues of the past, and deciding their own future through new and democratically accountable institutions as established under the Good Friday accord.

One of the most important and difficult issues for many in the nationalist community is a new beginning for policing, and in particular the issue of the new police service and the new policing board, as well as a new ombudsman along with the democratic accountability of these new institutions over the police service, once viewed by many as just a unionist dominated force.

Recently, the Irish News in Belfast published my opinion piece on the need for all those in the nationalist community to join and support the new police service and support the policing board in order that they help select a new chief constable, and further make these institutions even more democratically accountable. We must continue to struggle for protection of human rights and the redress of past injustices in the new north of Ireland as we make these changes and bring about long overdue reforms.

For your consideration, I ask that my Irish News piece, be reprinted below for the benefit of my colleagues, and all those who are concerned the progress in Northern Ireland which we are witnessing, to continue to move forward:

[From the Irish News Limited, Feb. 25, 2002]

WE MUST ALL JOIN THE SOLUTION FOR POLICING

(By Ben Gilman)

"It's time for the nationalist community to seize the moment on policing reform and fully participate in the new Northern Ireland Police institutions," says Congressman Ben Gilman.

The newly constituted Policing Board established under the Pattern reforms, which is now overseeing the Police Service of Northern Ireland (PSNI), will soon have a historic opportunity to help select the new chief constable to replace the long serving Sir Ronnie Flanagan.

The often tragic and troubling history of many in the nationalist community with policing in the north is hopefully coming to an end.

Our International Relations Committee in the House of Representatives held hearings and investigated this past and troubling record.

We know well the problems and anxieties in the nationalist community on the difficult policing issue, and we will continue to push for even more democratically accountable policing in the north.

The chief constable appointment, however, can become a historic crossroads on the nationalist community's relationship with the police service—once viewed by many as merely an arm of unionist domination in the north.

The selection of a new chief constable, with whom the nationalist community, its leadership, and its citizens will have to communicate and interact for years to come on organized crime, parades, protests, illicit drugs, and all of the fundamental rule of law problems in a democratic society, will help define the new policing relationship well into the 21st century.

All of the leaders in the nationalist community must raise their voices and be heard on the vital selection of the new police chief, as surely and rightfully the unionist community will, and should do, as well. This is the very essence of democratic accountability for policing. The key selection decision will be made by the policing board, and Sinn Fein should be part of it.

Not only should the nationalist leadership help choose a qualified, understanding and sensitive chief constable, the time has also come for all of the young people in the nationalist community to consider a rewarding police career in the new PSNI. There they can help serve all of the citizens in the north of Ireland, irrespective of tradition, location, or station in life.

Policing is very often the average citizen's only interaction with his or her government on a daily basis. It is vital that both communities be adequately represented in the police service and that the face of citizen contact should truly represent the entire community.

The "new beginning" for policing that the Good Friday agreement wisely envisioned is now becoming a reality in Northern Ireland. We have seen a new name, new badge, new flag, and new police recruits from both traditions. The GAA's island-wide vote to drop its longstanding rule excluding Northern Ireland police officers from playing Gaelic athletic games was a reflection of that new reality.

Change has occurred in policing, and it is broadly welcomed.

Along with the new police leadership in Northern Ireland, at of these new policing efforts will help better serve both communities under the new democratically accountable community policing, especially through the new policing board and district boards, for decades to come.

We in the Congress, and President George Bush in the White House, acknowledged and recognized this new beginning when the administration, at the request of myself and others finally restored our world-renowned FBI police training for the new PSNI in Northern Ireland.

In doing so, President Bush made it clear the US government officially and formally concurs with the British and Irish governments and groups like SDLP and the Roman Catholic Church in the north, that the new PSNI meets the spirit and intent of the recommendations of the Patten commission police reforms. It was a major vote of confidence on the future.

In our nation, earlier Irish emigrants to America often faced isolation, mistreatment and hostile bigotry in many of our major US cities where they embarked or journeyed in an unknown and sometimes hostile land. They did not remain isolated and withdrawn from politics and the police functioning in their newly adopted land, but rather they worked for and brought about change and reform from within these vital institutions.

These courageous and hardworking Irish emigrants to America used our political process and policing to play a key role in improving their lives and bringing themselves, their children, and future generations into the maintstream.

As a result, they have prospered and grown apart of the American melting pot, and today they staff, and in many cases lead, major police departments in several American big cities.

The lessons of Irish emigrants in the US can serve as an example to the nationalist community in the new north of Ireland in dealing with their difficult and challenging police question. The time to sit on the side lines is over.

I strongly urge young people in the north to join the new police service, without fear or favor, and become part of the solution. I also urge, as the Bush administration has urged, that Sinn Fein now in the assembly, also join the new policing board, join in picking the new chief constable, and thereafter hold him or her, and the PSNI fully and democratically accountable to all of the citizens of Northern Ireland.

We in the Congress will continue our efforts to improve and increase police accountability to the new board in areas like the ongoing loyalist attacks on the nationalist community, the Patrick Finucane murder, and the Omagh bombing investigate shortcomings, among other legitimate areas of rightful concern to the nationalist community.

All of the friends of the good, hardworking people of Northern Ireland of both traditions see the future for their children and communities as unlimited. We note that they can help ensure that continuing success by becoming part of the peace process and the new, shared governing institutions, such as the police board. The solutions now lie from within.

We here on our side of the Atlantic will continue to cheer the progress we see daily in Northern Ireland and will work to see it continue. We have helped and encouraged on that front but it is now up to all of the good people of Northern Ireland to fulfill this promise.

OVERCOMING PHYSICAL HURDLES

HON. JANICE D. SCHAKOWSKY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Ms. SCHAKOWSKY. Mr. Speaker, I want to extend my congratulations to Taina Rodriguez, a Chicago resident and member of my staff who was recently featured in "Latina" magazine. Her boundless energy and enthusiasm make Taina a star. Taina has Marfan's syndrome and has overcome a tremendous number of physical obstacles. This has made her a powerful advocate. Taina was an intern at Access Living, a Chicago group fighting for people with disabilities, and now I am proud to have her as a member of my staff. I am proud that Taina will be able to use her fighting spirit to benefit the residents of the 9th district. I urge all of my colleagues to read the inspirational article about Taina in the January/February issue of "Latina" magazine.

REAL LOVE STARTS WITH YOU

(By Anamary Pelayo)

Some people have a knack for blaming everyone but themselves when things go wrong. Others have a flair for always finding fault in something that they think they did wrong, then feel burdened by guilt. What would it take to release all of that guilt? The answer may lie in learning to love yourself, experts say. "You have to be ready to look in the mirror and see all the positives and the negatives," says Araceli Perea-Salas, a domestic-violence counselor in southern California. But that's not always easy. Once self-love disappears, it takes a lot of reflection and determination to get it back, says psychologist and author Ana Nogales, Ph.D. "The key is took within yourself to find your good qualities and build from there. If you don't you'll never be capable of extending love to others." Still, the process is difficult and can sometimes take years. It's why thousands of women find themselves stuck in unhealthy situations for long periods, unable to take control of their lives.

The following woman confronted adversity, found the strength to pull herself out of the dismal hole of self-blame, and emerged with a shared revelation: The key to turning your life around is learning love yourself. Despite this woman's hardships, she says her life is better and more hopeful than ever.

OVERCOMING PHYSICAL HURDLES—TAINA RODRIGUEZ, 21, CHICAGO

My wheelchair has been one of my accessories for 11 years now. We go everywhere together. The chair is as much a part of my life as the Marfan's syndrome that put me in it. This genetic disorder caused my spine to curve and damaged my corneas. As a child, I wore thick glasses, and my body was tall and lanky. I was a prime target for teasing. I remember being called everything from four eyes to banana back. For years I was ashamed of my appearance, my wheelchair, and my inability to do things for myself.

Then, in high school, I met Mari. She would do my hair, and she and I would go shopping together. We would even go to clubs, and I'd wiggle in my wheelchair while she danced next to me. My friend was never embarrassed by me, she didn't seem to care that I was stuck in a wheelchair, so why should I? Instead of feeling ugly, I felt lucky. Maybe I couldn't do everything Mari did, but I almost always found a way to participate, even if it had to be as a spectator at times. For the first time in my life, I felt like a normal teenager. Unfortunately, my health wasn't as resilient. Three years ago, a grueling 18-hour surgery to repair a ruptured heart valve left my in a coma for five days, near death. When I woke up and learned that I had almost died, I was shocked. I couldn't believe my body was strong enough to pull itself out of a coma. I realized what I had slowly been coming to terms with for the past two years: that I had great inner strength and that there was more to my body than its attachment to a wheelchair. Instead of hating my body for its weaknesses, I felt blessed to be alive and eager to get back to my new life.

I learned to drive and bought a car. I also got an internship at Access Living, a nonprofit organization in Chicago that champions rights for the disabled. There, two women and I started the Empowered Fe-Fes, a group for young women with disabilities to talk about issues such as body image and sexuality. I later won a national award for my service to the disabled, and my internship led to a job as an assistant in the Chicago office of Congresswoman Jan Schakowsky (D-Illinois).

I don't think my relationship with my wheelchair will ever be perfect. I still wish I could dance and drive with the full use of my legs, but I have made peace with that. My wheelchair is, after all, a source of mobility, and it doesn't hold me back from living the life I love.

STOP VIOLENCE AGAINST WOMEN CONGRESSIONAL BRIEFINGS

HON. DANNY K. DAVIS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Mr. DAVIS of Illinois. Mr. Speaker, The narrator in the PBS documentary written by Mary Dickson, "No Safe Place—Violence Against Women," began by relating that:

> In the early hours of a hot August morning, three men pulled a woman from her car after a minor traffic accident. The men threatened her with a crowbar, made her strip, then chased her until she jumped off a bridge to her death in the Detroit River.' None of the 40 or so passers-by tried to help the 33-year-old woman. Some reports say onlookers cheered as the men taunted her.

A judge in New Bedford, MA, sentenced the confessed rapist of a 14-year-old girl to probation. He then said that the victim ". . . can't go through life as a victim. She's 14. She got raped. Tell her to get over it."

The San Francisco Chronicle reported that:

> Cassandra Floyd was a respected physician, a single mother living in an affluent San Jose suburb, and ardent volunteer and a role model for young black women. The 35-year-old was also the victim of domestic violence . . . when her ex-husband shot and killed her as their 4-year-old daughter slept nearby and shot and wounded Floyd's mother. He then fled and killed himself.

These are not isolated incidents selected to cause sensationalism. Violence against women is a worldwide epidemic.

According to the NOW Legal Defense and Education Fund,

> Violence against women—rape, sexual assault and domestic violence—affects women worldwide, regardless of class or race. Violence not only affects women in the home, but in the workplace, school and every arena of life.

The Center for Health and Gender Equity (CHANGE) at the Johns Hopkins School of Public Health found that

> 'Around the world at least one women in every three has been beaten, coerced into sex, or otherwise abused in her lifetime. Most often the abuser is a member of her own family. Increasingly, gender-based violence is recognized as a major public health concern and a violation of human rights.

The dimensions of this issue were illustrated in a joint study by the Jacobs Institute of Women's Health and the Henry J. Kaiser

Family Foundation, which made the following conclusions:

In 1998 there were approximately 2.8 million assaults on women. The Journal of the American Women's Association reported that those most at risk are ". . . younger, separated or divorced, of lower socioeconomic status and unemployed." The risk of assault by an intimate partner increases when a woman is pregnant.

Just four in ten women who are physically injured by a partner seek professional medical treatment.

Women are more likely to be the victim of rape or sexual assaults by an intimate partner or acquaintance, rather than by a stranger.

The National Violence Against Women Survey found that one out of every 12 women, a total of 8.2 million women, has been stalked at some point in their lives.

Women are more likely than men to be killed by someone they know, and nearly one-third of women are killed by an intimate partner, compared to approximately four percent of men, according to the Bureau of Justice Statistics.

Black women are more likely than White or Hispanic women to be the victims of nonlethal violent crimes.

These statistics are appalling. Just as we have come together with our allies to declare war against terrorism, so too must we unite and declare war against this form of terrorism—violence against women.

INTRODUCTION OF THE WORLD WAR I VETERANS MEDAL OF HONOR JUSTICE ACT

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Mr. GILMAN. Mr. Speaker, I rise today to introduce H.R. 3890, a bill to facilitate the posthumous awarding of a long overdue medal of honor to Sergeant Henry Johnson, of Albany, NY, for actions he preformed in the First World War. Additionally, the legislation requests that the Secretary of the Army review the cases of other African-American veterans from World War I, who have had their accomplishments overlooked due to racism.

This legislation is not without precedent. During the 100th Congress, my former colleagues Joe Dioguardi and Mickey Leland first brought the issue of racism in the awarding of medals of honor to national prominence. In 1997, after years of study, the Secretary of the Army finally recommended that seven Black veterans from World War II have their prior Distinguished Service Cross Awards upgraded to Medals of Honor. Likewise, a similar decision was taken regarding Asian-American veterans from World War II, including that of our esteemed colleague in the Senate, DANIEL INOUYE. Furthermore, last year, I joined my colleague from Florida, BOB WEXLER, in introducing legislation to reconsider the records of several prominent Jewish veterans from World War II and Korea, who had been previously denied Medals of Honor. I was gratified that this bill, H.R. 606, was included in the fiscal year 2002 Defense Authorization Act.

Yet, despite this important progress, Henry Johnson and his colleagues from the Great War still await due recognition for their service to their country. The sole exception to this shameful legacy was the example of Corporal Freddie Stowers, who was posthumously awarded the Medal of Honor in 1991, in large part due to the tireless efforts of former Congressman Dioguardi in promoting his case to the Department of Defense from 1987–1991.

Unlike more recent conflicts, which have been promoted heavily through print and televised media, the First World War has largely receded into the mists of time. What was originally known as the Great War receives scant attention these days, primarily it has become viewed as a failure of sorts. It was, in the words of President Wilson, the "War to end all wars," yet tragically, it did nothing of the kind. World War I was the most widespread, destructive and costly conflict the world had ever seen up to that point, but it paled in comparison to the destruction of the Second World War.

Against this backdrop, the American public has, especially since 1945, forgotten the sacrifices of the generation that made the world "safe for democracy." This is no more true for the African-American veterans of World War I, and especially, for Sergeant Henry Johnson.

On May 14, 1918, Sergeant Johnson, an NCO with the 369th Infantry Regiment, a Black unit of New York National Guard troops, was stationed as part of a five-man watch in Northern France. Early that morning, Johnson and a fellow soldier were attacked by 24 Germans. Johnson's companion was wounded and captured. When his rifle subsequently jammed, Sergeant Johnson used his bayonet and a knife to kill and wound several Germans. He eventually freed his companion and drove the Germans off, before succumbing to the nearly two dozen wounds he suffered himself.

For his actions in battle, the Government of France awarded its highest military honor to Sergeant Johnson, the Croix de Guerre with Gold Palm. Yet he received nothing from his own country until 1997, when he was posthumously awarded the Purple Heart, a decoration which all U.S. personnel are entitled to if wounded in combat.

Henry Johnson returned to civilian life after the war and attempted to resume his old job as a railway porter. However, his wounds prevented this and he died penniless in 1937.

Mr. Speaker, Sergeant Johnson's case is not unique among African-American veterans of World War I, but it is the most egregious. It is not as if the U.S. Army was totally ignorant of his accomplishments. There is ample evidence that his profile and his story were used to sell war bonds in African-American communities in the closing days of the war. Moreover, in 1976, the Army had no problem featuring him in a U.S. Army recruiting poster. Yet to this day, more than 83 years after the fighting stopped on the Western Front, elements of the military are resisting awarding Sergeant Johnson the Medal of Honor.

Last year, after a 4-year long review, outgoing Secretary of the Army Caldera approved a recommendation that Henry Johnson be awarded the Medal of Honor. Last spring, Former Chairman of the Joint Chiefs General Shelton recommended against such an award stating that "proper procedure" had not been followed in the application process.

I believe that any reasonable person would be able to see that it would be impossible to follow outlined procedure in this case, 83 years after the fact. The chief requirement for the award, eyewitness testimony, is an unreachable goal in that any such persons in this instance are long dead. Moreover, it is absurd to argue that Sergeant Johnson should have submitted an application for the award within the proscribed time frame of 3 years. Given the entrenched and pervasive racism that existed in American society and the Army in 1921, it is not a stretch of logic to say such an effort would have been fruitless.

It is for this reason that this legislation further requires the Army to revisit the service records of every other African-American soldier from World War I who was awarded the Distinguished Service Cross or the French Croix De Guerre to determine if a medal upgrade or additional award of the Medal of Honor is warranted.

Mr. Speaker, our Nation has belatedly acknowledged that certain African-American and Asian-American veterans of World War II were unjustly denied proper recognition for military service above and beyond the call of duty. It is now time for us to admit that one debt remains to be paid: The proper acknowledgement of the courageous service of African-American veterans in World War I.

The American veterans of World War I have almost all departed. The VA estimated that approximately 1,000 remained alive at the start of fiscal year 2002. It is long past time for us to recognize the service of Henry Johnson and his fellow African-American soldiers in World War I. When he first brought this issue before this House in 1987, my former colleague from New York, Representative Dioguardi, in criticizing the Pentagon's aversion to review the cases of Black veterans from the World Wars for possible medal upgrades, stated that "The statute of limitations was established for criminals, not war heroes."

With this legislation, we have an opportunity to correct a longstanding injustice, a glaring blot on the noble and historic legacy of the United States Army. These cases have been referred to by some as the last loose ends of World War I. It is now time to close out this unfinished business.

TRIBUTE TO TRAVERSE CITY WEST SENIOR HIGH SCHOOL

HON. BART STUPAK

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Mr. STUPAK. Mr. Speaker, I rise today to pay tribute to the administration, staff, and students of Traverse City West Senior High School, a school in northern Michigan. In just four years Traverse City West has distinguished itself through the academic success of its students and through national recognition of the school's visual and performing arts programs.

Barbara M. White, a distinguished former president at Mills College in Oakland, California, is quoted as saying, "The basic purpose of a liberal arts education is to liberate the human being to exercise his or her potential to the fullest." Upon hearing those words, I'm sure most listeners would immediately think of a college or university education, but Traverse City West Senior High is preparing its students for a successful life at the high school level.

The school's fine arts curriculum includes a choral program with six performing groups, band and orchestra, an award-winning newspaper and yearbook, theater arts, video and production; there are classes in photography, pottery, ceramics, metals, jewelry, drawing and painting, sculpture, computer art and traditional American arts.

For those students not taking formal arts classes, the Humanities program includes extensive exposure to painting, sculpture, music, dance and film. The arts are incorporated into the science, math and language areas, according to the expertise of the teacher and in collaboration with the arts department. Finally, the school itself is decorated with art murals and stained glass windows designed by students, and music is incorporated into classroom study and even staff meetings.

The study of other cultures, other peoples and other times is part of the school's comprehensive learning environment. Mr. Speaker, these programs have strong parental support for projects and field trips. Accustomed as we may be to booster clubs for sports programs, this "booster" spirit for the study of arts, crafts and humanities must be viewed as unique at the high school level.

I do not rise today, Mr. Speaker, to propose that Traverse City West Senior High be taken as the model for all high schools. I rise merely to point out that a combination of hard work and a rich environment can produce academic success. For example, in 2000 Traverse City West received the Governor's Cup for the big North Conference for having the most Michigan Merit Award recipients, and its total placed it sixth in the state. The Michigan Merit Award is a college scholarship based upon performance on the Michigan Educational Assessment Program. I should note that this number is more remarkable when one considers that Traverse City West received the least amount of money per student of the top ten schools listed, and it had the highest percentage of students on the free and reduced lunch program.

Consider, too, that in the four years Traverse City West Senior High has been open, its students have scored above the state and national average on the ACT test. In 1999/2000 its composite ACT score was 21.8, compared to a Michigan average of 21.3 and a national average of 21.0. As I mentioned earlier, the school's newspaper and yearbook have been honored statewide, its theater department recognized nationally, and its music department a finalist in an international competition.

Mr. Speaker, the efforts of the administration, staff, parents and students at Traverse City West High School to acknowledge the arts an essential part of education has now been recognized nationally. The school was recently notified it is the winner of the "Creative Ticket National School of Distinction Award" from the John F. Kennedy Center for the Performing Arts. As a result of this award, a representative group of students has been invited to travel here to Washington to perform at the Kennedy Center and to perform at a congressional breakfast celebrating National Arts Day.

Mr. Speaker, I ask you and my House colleagues to join me in praise of the hard work and dedication of the administration, staff, parents and students of Traverse City West High School, a young school with a classical notion of a well-rounded education.

CONGRATULATING THE UNITED STATES MILITARY ACADEMY AT WEST POINT ON ITS BICENTENNIAL ANNIVERSARY

SPEECH OF

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 2002

Mr. GILMAN. Mr. Speaker, "to educate, train, and inspire the corps of cadets so that each graduate is a commissioned leader of character committed to the values of duty, honor, country; professional growth throughout a career as an officer in the United States Army; and a lifetime of selfless service to the nation."

That is the mission of an outstanding institution of rich history and formidable pride, our West Point Military Academy, along the shores of our historic Hudson River.

More than 200 years ago, Gen. George Washington, recognizing the strategic importance of West Point, established fortifications in our war against the British. There, along the west bank of the Hudson River, during the founding of our Nation, West Point was born.

Further recognizing our national need to develop an institution dedicated to the arts and sciences of warfare, Thomas Jefferson signed legislation establishing the U.S. Military Academy in 1802. Over the last two centuries, West Point Military Academy has grown to become one of the most revered institutions of its kind, training young men and women to become great leaders and proud soldiers. Among the distinguished list of Academy graduates are names which have changed the history of our Nation and our world, including Grant, Lee, Sherman, Jackson, Eisenhower, MacArthur, Bradley, Arnold, Clark, and Patton.

In these trying times for our Nation, as many of the service men and women are defending freedom in Afghanistan and elsewhere around the world, it is a fitting tribute to celebrate the 200th anniversary of the U.S. Military Academy at West Point, the citadel of freedom.

The leadership which West Point has provided to our Nation and which will continue to provide for years to come is an inspiration to every American.

West Point is more than just an Academy, it is a pillar of our Nation, and a symbol of our Nation's rich past and fruitful future.

This prestigious Academy is a tribute to the strength of America and our right as free people to pursue life, liberty, and happiness.

The history of West Point is the story of America—a distinguished tale to tell.

God bless West Point and God bless America.

ADDITIONAL MATERIALS REGARDING AMENDMENTS TO FISCAL YEAR 2002 APPROPRIATIONS LEGISLATION AFFECTING THE RIGHTS OF THE WYANDOTTE TRIBE OF OKLAHOMA

HON. DENNIS MOORE

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 7, 2002

Mr. MOORE. Mr. Speaker, on March 4, I placed in the CONGRESSIONAL RECORD an extension of remarks, that included a letter from Leaford Bearskin, the chief of the Wyandotte Tribe of Oklahoma, concerning congressional actions last year that affected his Tribe. Due to space limitations, I was unable to include correspondence from organizations in the Third District of Kansas supporting the Wyandotte Tribe Settlement Act, referred to by Chief Bearskin. I have included the nine letters below.

UNIFIED GOVERNMENT OF WYANDOTTE COUNTY/KANSAS CITY, KANSAS,

Kansas City, KS, October 20, 1999.

Hon. DON YOUNG,

Chairman, House Resources Committee, House of Representatives, Rayburn House Office Building, Washington, DC.

DEAR CHAIRMAN YOUNG: On behalf of the citizens of Wyandotte County/Kansas City, Kansas, I would like to thank you for your efforts in sponsoring H.R. 1533, The Wyandotte Tribe Settlement Act, and strongly urge you to continue your efforts to move this critical piece of legislation through Congress before it adjourns.

The citizens here, overwhelmingly, endorsed gaming at the Woodlands by an 80 percent vote in 1997. The passage of H.R. 1533 and similar legislation in the Senate would allow the Wyandotte Nation the opportunity to open a gaming facility at the Woodlands and greatly enhance the economy of this city and county. There is already widespread gaming throughout the State of Kansas and in the Kansas City area. This bill would allow the citizens of Wyandotte County to realize economic gains that are currently not available to them.

Your continued efforts are greatly appreciated, and if I can be of any assistance, please do not hesitate to call me.

Sincerely,

CAROL MARINOVICH,
Mayor/CEO.

THE KANSAS CITY, KANSAS AREA
CHAMBER OF COMMERCE,

Kansas City, KS, October 20, 1999.

Hon. DON YOUNG,

Chairman, House Resources Committee, Rayburn House Office Building, House of Representatives, Washington, DC.

DEAR CONGRESSMAN YOUNG: I am writing to once again reiterate this organization's support for and to thank you for your efforts to expedite the passage of H.R. 1533: The Wyandotte Tribe Settlement Act of 1999.

As you know the by-product of this legislation will have a significant impact not only on the economic well being of the Wyandotte Nation, but certainly for our community as well. I believe that the passage of H.R. 1533 will allow the Wyandotte Nation to exercise certain rights afforded to them via the Indian Gaming Act of 1988. This also would create an opportunity for the Wyandotte Nation and the current ownership of the Woodlands greyhound and thoroughbred parimutuel racetrack to negotiate an agreement for a Tribal Casino. The Woodlands would be greatly aided by this arrangement.

Congressman Young, legalized games of chance and casino gaming are not unknown to our community, nor to the State of Kansas. There is already legalized gaming just across the state line in metropolitan Kansas City, Missouri, and there are several Tribal Casino operations in the State of Kansas. H.R. 1533 will allow for a win-win situation for our community, the State of Kansas as well at the Wyandotte Nation.

Thanking you in advance for your support and sponsorship of H.R. 1533, I am

Sincerely,

DERYL W. WYNN,
Chairman of the Board, Kansas City, Kansas Area Chamber of Commerce.

DAN SCHENKEIN,
President, Kansas City, Kansas Area Chamber of Commerce.

GREATER KANSAS CITY BUILDING AND CONSTRUCTION TRADES COUNCIL, AFL–CIO,
Independence, MO October 19, 1999.

Hon. Congressman DON YOUNG,
Chairman, House Resources Committee, Rayburn Office Building, Washington, DC.

DEAR CHAIRMAN YOUNG: I am writing this letter in strong support of House Bill 1533, regarding the Wyandotte Tribe of Oklahoma's request for due compensation from Congress for lands and rights issues pertaining to the Treaty of 1855.

The successful passage of H.B. 1533 will create significant benefits for the Kansas City Metropolitan Area, not to mention specifically the working class community of Kansas City, Kansas and Wyandotte County. In a unique area of our metro-plex where employment opportunities are needed most, Kansas City, Kansas and its residents will significantly benefit from your efforts towards H.B. 1533's successful passage.

On behalf of the rank and file of the Greater Kansas City Building & Construction Trades Council, AFL–CIO I urge your continued diligence on H.B. 1533.

Sincerely,

GARRY KEMP,
Exec. Sec./Business Manager, Greater Kansas City Building & Construction Trades Council.

AFL–CIO TRI-COUNTY LABOR COUNCIL OF EASTERN KANSAS UNION LABEL & SERVICE TRADES—AREA COPE,
Kansas City, KS, October 20, 1999.

Hon. Congressman DON YOUNG,
Chairman, House Resources Committee, Rayburn Office Building, Washington, DC.

DEAR CHAIRMAN YOUNG: I am writing this letter in strong support of House Bill 1533, regarding the Wyandotte Tribe of Oklahoma's request for due compensation from Congress for lands and rights issues pertaining to the Treaty of 1855.

The successful passage of H.B. 1533 will create significant benefits for the Kansas City Metropolitan Area, not to mention specifically the working class community of Kansas City, Kansas and Wyandotte County. In a unique area of our metro-plex where employment opportunities are needed most, Kansas City, Kansas and its residents will significantly benefit from your efforts towards H.B. 1533's successful passage.

On behalf of the rank and file of the AFL–CIO Tri-County Labor Council of Eastern Kansas, I urge your continued diligence on H.B. 1533.

Sincerely,

JIM HADEL,
President, Tri-County Labor Council.

WYANDOT NATION OF KANSAS, INC.,
Kansas City, KS, July 11, 1998.

Re Wyandot Nation of Kansas and the Wyandotte Tribe of Oklahoma Settlement.

Hon. DON YOUNG,
Rayburn House Office Building, United States House of Representatives, Washington, DC.

DEAR CONGRESSMAN YOUNG: On May 19, 1998, Congressman Vincent Snowbarger and Holly Zane, Attorney General of the Wyandot Nation of Kansas, authored letters which reference a controversy between the Wyandotte Tribe of Oklahoma and the Wyandot Nation of Kansas regarding the use of the Huron Cemetery. This letter advises you that this controversy has been resolved by the Wyandotte Tribe of Oklahoma and the Wyandot Nation of Kansas. The settlement prohibits the use of the Huron Cemetery for any use other than religious, cultural or those compatible with the use of the land as a burial ground.

Thank you very much for your attention to this matter.

Sincerely,

WYANDOT NATION OF KANSAS, INC.

MINORITY CONTRACTORS ASSOCIATION OF GREATER KANSAS CITY,
Kansas City, MO, October 19, 1999.

Hon. Congressman DONALD YOUNG,
Chairman House Resources Committee, House of Representatives, Rayburn House Office Building, Washington, DC.

DEAR CHAIRMAN YOUNG. The House Resources Committee passed H.B. 1533 which allows the Wyandotte Tribe of Oklahoma to redeem "lost" tribal rights to land in Wyandotte County. This Bill is now awaiting action by the full House. The Minority Contractors Association would like to help educate you on the bill's impact with this letter and seek your support for it. As you may recall last year the Senate imposed a restriction on the Tribe's use and rights of their own land. H.B. 1533 restores those rights without infringing on last year's Senate action and helps meet critical needs in our community. The members of this association believe that this bill will greatly enhance economic development and construction in our community.

As you know the by-product of this legislation will have a significant impact not only on the economic well being of the Wyandotte Tribe of Oklahoma, but certainly for the people of Wyandotte County as well. The entire region will benefit from our growing economy and the opportunities for employment. We believe that the passage of H.B. 1533 will allow the Wyandotte Tribe to exercise their rights to own and operate a Tribal Casino in our community under the authority of the Indian Gaming Act of 1988.

The residents of this community in 1996 voted overwhelmingly in an advisory vote to endorse legalized gaming by nearly 80 percent. Additionally, the Wyandotte Tribe has entered into a memorandum of understanding with the Unified government of Wyandotte County, Kansas City, Kansas for the purchase and operation of the Woodlands Greyhound and thoroughbred parimutuel racetrack as a Tribal Casino. The Woodlands will be enhance greatly by this arrangement and will be revitalized to add value to our community. The citizens of Wyandotte County, the Kansas City Kansas Area Chamber of Commerce and the members of the Minority Contractors Association have gone on record of continually supporting this issue and casino-style gaming at the Woodlands. Chairman Young, as you know, legalized games of chance and casino gaming are not strangers to our community nor the States of Kansas, Missouri, Nebraska or Iowa. There is already wide-spread gaming with several Tribal Casino operations within the State of Kansas. We believe that H.B. 1533 will allow for a win-win situation for our community as well as the Wyandotte Tribe of Oklahoma. To that end the Minority Contractors Association humbly urges you to review this legislation before the adjournment of the 106th Congress.

I appreciate your time and interest in this matter and look forward to hearing from you as you review this critical issue facing this community.

Sincerely,

MIKE HUGHES,
Executive Director.

HISPANIC CHAMBER OF COMMERCE OF GREATER KANSAS CITY,
Kansas City, MO, October 21, 1999.

Hon. DON YOUNG,
Chairman, House Resources Committee, House of Representatives, Rayburn House Office Building, Washington, DC.

DEAR CHAIRMAN YOUNG: On behalf of the Hispanic Chamber of Commerce of Greater Kansas City, I would like to thank you for your efforts in sponsoring H.R. 1533, The Wyandotte Tribe Settlement Act. The Hispanic Chamber strongly urges you to continue your efforts to move this critical piece of legislation through Congress before it adjourns.

The citizens of Kansas City overwhelmingly endorsed gaming at the Woodlands by an 80 percent vote in 1997. The passage of H.R. 1533 and similar legislation in the Senate would allow the Wyandotte Nation the opportunity to open a gaming facility at the Woodlands. This in turn would improve the economy of the City and Wyandotte County. We are pleased to hear about the Wyandotte Tribe's commitment to diversity. We are certain that through the passage of this bill, that the Hispanic community will be provided economic opportunities in the areas of construction, services and employment.

Your continued efforts are greatly appreciated and if I can be of any assistance, please do not hesitate to call me.

Sincerely,

WILLIAM TORRES,
First Vice President.

WYANDOTTE DEVELOPMENT, INC.,
Kansas City, KS, October 21, 1999.

Hon. DON YOUNG,
Chairman, House Resources Committee, Rayburn House Office Building, House of Representatives, Washington, DC.

CONGRESSMAN YOUNG: I am writing on behalf of Wyandotte Development, Inc., which serves as the lead private economic development agency for Wyandotte County Kansas serving the communities of Edwardsville, Bonner Springs, and Kansas City.

I am writing to encourage your continued efforts to pass House Resolution 1533, which would return tribal rights in our County to the Wyandotte Nation. As you know, our community and this organization are committed to the viable economic operation of the Woodlands parimutuel racetrack in our community. This organization believes that H.R. 1533 provides a unique potential for casino style gaming to be conducted at the Woodlands. Should that occur, it would allow our community to compete for tourism and gaming revenues on a regional basis and will create significant employment opportunities for our residents.

Please continue your fine efforts on House Resolution 1533.

Sincerely,

GARY D. GRABLE,
Chairman of the Board,
Wyandotte Development Incorporated.

THE WOMEN'S CHAMBER OF COMMERCE,
Kansas City, KS, October 20, 1999.

Hon. DON YOUNG,
Chairman, Housing Resources Committee, Rayburn House Office Building, House of Representatives, Washington, DC.

DEAR CONGRESSMAN YOUNG: Thank you for your efforts to expedite the passage of H.R. 1533: The Wyandotte Tribe Settlement Act of 1999. I again request that you continue to support this worthy effort.

The by-product of this legislation will have a significant impact not only on the economic well being of the Wyandotte Nation, but certainly for our community as well. I believe that the passage of H.R. 1533 will allow the Wyandotte Nation to exercise certain rights afforded to them via the Indian Gaming Act of 1988. This also would create an opportunity for the Wyandotte Nation and the current ownership of the Woodlands greyhound and thoroughbred parimutuel racetrack to negotiate an agreement for a Tribal Casino. The Woodlands would be greatly aided by this arrangement. The board of directors of the Kansas City Kansas Women's Chamber of Commerce has continually supported casino-style gambling at the Woodlands since 1995.

There are legalized casinos just across the state line in metropolitan Kansas City, Missouri, and there are several Tribal Casino operations in the State of Kansas. I believe that H.R. 1533 would benefit our own community with jobs and economic opportunities. These opportunities would have a positive effect on my community, the State of Kansas and the Wyandotte Nation.

Thanking you in advance for your support and sponsorship of H.R. 1533.

Sincerely,

LORETTA MORTON,
President, Kansas City, Kansas
Women's Chamber of Commerce.

SENATE—*Friday, March 8, 2002*

The Senate met at 9:15 a.m. and was called to order by the Honorable JON S. CORZINE, a Senator from the State of New Jersey.

PRAYER

The Chaplain, Dr. Lloyd John Ogilvie, offered the following prayer:

Lord God of truth, we praise You for the revelation of Your truth to people through history. We thank You for the lodestar leadership of Nathan Hale, the courageous revolutionary patriot, who in the moments before he was hanged said, "I only regret that I have but one life to lose for my country." His grandson, Everett Hale, Chaplain of the Senate from 1903 to 1909, gave us another memorable saying that becomes the theme of our prayerful reflection this morning: "I am only one, but I am one. I cannot do everything, but I can do something. What I can do, I should do and, with the help of God, I will do!"

Father, thank You that You have a plan for each of us. Give us Everett Hale's determination to trust You for the power to follow through on what You have given us the clear conviction to do. Bless the Senators with incisive intentionality for the challenges of this day. You are our Lord and Saviour. Amen.

PLEDGE OF ALLEGIANCE

The Honorable JON S. CORZINE led the Pledge of Allegiance, as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. BYRD).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, March 8, 2002.

To the Senate:

Under the provisions of rule I, paragraph 3, of the Standing Rules of the Senate, I hereby appoint the Honorable JON S. CORZINE, a Senator from the State of New Jersey, to perform the duties of the Chair.

ROBERT C. BYRD,
President pro tempore.

Mr. CORZINE thereupon assumed the chair as Acting President pro tempore.

RESERVATION OF LEADER TIME

The ACTING PRESIDENT pro tempore. Under the previous order, the leadership time is reserved.

JOB CREATION AND WORKER ASSISTANCE ACT OF 2002

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will now resume consideration of the House message on H.R. 3090. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (H.R. 3090) to provide tax incentives for economic recovery.

The ACTING PRESIDENT pro tempore. The majority leader.

Mr. DASCHLE. Mr. President, I move to concur in the House amendment and ask unanimous consent that the time until 9:30 this morning be for debate with respect to the motion to concur, with the time equally divided and controlled between the two leaders; that the Democratic time be equally divided between the distinguished Senator from West Virginia, Mr. ROCKEFELLER, and the Senator from North Dakota, Mr. CONRAD; that upon the use or yielding back of time, the Senate proceed to a vote on the motion to concur in the House amendment to the Senate amendment to the House bill without further intervening action or debate.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. DASCHLE. I thank my colleagues.

The ACTING PRESIDENT pro tempore. Who yields time?

The Senator from West Virginia.

Mr. ROCKEFELLER. Mr. President, I was on the conference committee on the stimulus package prior to Christmas, which failed. That was predicated on unemployment insurance, health benefits, and money to help States with Medicaid. Two of the three are left out in this stimulus package. I urge my colleagues to vote against this stimulus package, which I consider to be hurtful to the States but will no doubt get virtually everybody's vote for the wrong reasons.

I have been fighting for the stimulus package for a long time, obviously since September 11. I cannot, in any sense of conscience, support this bill. This has about $9 million to expand unemployment insurance. That is good. That is fine. That is one of the three. Two of the three we had to have we did not do; one, we did do. It also has $86 billion in corporate tax breaks and eliminates the tax cuts for those lower income Americans who missed out on last summer's rebates. In other words, the people who did not get a rebate will continue not to get a rebate.

It provides no help for States at this critical time and, in fact, hurts them. On every Senator's desk Members will find the 46 of 50 States that are hurt. Members will see how much each State is hurt.

I am outraged this $100 billion-plus bill was pushed to a vote, frankly, in the way that it was with, at best, totally inadequate notice to Senators, with no debate and discussion about the need for stimulus on a day after Alan Greenspan said that everything is going just fine.

Why are we ignoring the clear consensus among economists and our Federal Reserve chief? I cannot answer that. Maybe I can. We all say we want to defend the Nation, and we do. We want to fund a prescription drug benefit, and we do. We want to support better education for our children, and we do. But now, we are in deficit. Our surplus is gone. Critical needs remain. Are we addressing them? No. Can we afford nearly $100 billion more in corporate tax breaks right now? No. Are we even going to discuss it? No, we are not.

This bill causes 46 States to lose $14 billion in tax revenues at a time when they are already facing between $40 and $50 billion of debt. I spoke to my Governor last night. It will cost him $86 million. He will have to cut Medicaid. He does not know where he will get the money. It is another nail in the coffin of the State which is not famed for being rich.

Mr. CONRAD. Mr. President, I acknowledge this stimulus package is a dramatic improvement over what the other body sent previously. That misses the larger point.

This morning's New York Times headline is interesting: "The Federal Reserve Chief Sees the Decline Over, House passes recovery bill."

It is the irony of ironies that, once again, Congress, in trying to provide fiscal stimulus, has acted too late. That is the history of Congress trying to use fiscal policy for stimulus. In fact, when the Budget Committee did an analysis, we found every single time we tried to act, we moved too late.

In the Washington Post this morning: "Greenspan Declares An Expansion,'" it reports that economists are now largely agreed that in this quarter the economy will be growing at 4 percent. Congress comes with its recovery package too late.

I have supported a recovery package. I did when we attempted to do one last year when it would have been timely. Unfortunately, that did not occur. I would still support one if it were properly crafted. But I don't believe this legislation meets the test. CBO has stated over the next 10 years we are in deficit each and every year for the entire decade, and by big amounts. They have just told us we can expect $2.3 trillion of non-trust-fund deficits over the next decade. Every dime will be coming out of the Social Security trust fund. That means every dime of this stimulus package is coming out of the Social Security trust fund. We are headed for this future: The trust fund turns cash negative in 2016. That changes everything.

When we examine the details of this package, its centerpiece is 3 years of bonus depreciation. I strongly supported bonus depreciation for a 1-year period because every economist said if we stretch it out, we are encouraging companies to wait—not to act now, but to wait. In fact, that is exactly what one sees in the economics of this package—$39 billion of stimulus this year, but $82 billion in the future.

The ACTING PRESIDENT pro tempore. The Senator from Iowa.

Mr. GRASSLEY. I yield myself such time as I might consume.

Mr. President, I rise today to address the House bill that we will be passing on economic stimulus and aid to dislocated workers.

On a preliminary note, in normal circumstances, I would note that we should not make a practice of passing House bills as is. These are not, however, normal times and this is not a normal process.

The House bill is really the latest bipartisan product on economic stimulus and aid to dislocated workers. It is a thinner version of last December's agreement between the White House and the Senate centrists. The bottom line is this bill now enjoys Senate Democratic leadership support because it has been thinned down.

There is some good news and some bad news. Let's turn first to the good news. This bill is a bipartisan, bicameral product, that the President will sign. That's the good news. Help is on the way for unemployed workers and recovering businesses.

Mr. President, the unemployed and struggling businesses have had to wait too long for the good news we deliver today. It has been over five months of long meetings, committee action, floor debates. Finally, we, the United States Senate, will do our duty and act on economic stimulus.

Now, with the President's signature a certainty, several good things will finally happen. First off, the unemployed will get extended benefits. Businesses, large and small, will get a kick start with 30 percent bonus depreciation. That kick start will mean more jobs, so those unemployed workers will be able to go back to work. Businesses that have hit hard times will be able to carry back net operating losses for an additional three years. New York City will receive much needed tax relief for the purpose of rebuilding Lower Manhattan. In addition, tax provisions that expired this year will be extended for two years. Finally, our States will receive some relief in the form of an extension and reauthorization of portions of the TANF program. These measures are all good news for folks across America.

I said there is some bad news too. That news is derived from all of the proposals dropped from the White House-centrist agreement. As I said above, this bipartisan agreement was before us in December, but we were blocked from considering it by the Democratic leadership. Let's take a look at the things that were dropped.

First off, there was a proposal to accelerate tax relief from last year's bipartisan tax cut legislation. I'm talking about dropping the 27 percent tax rate to 25 percent.

I do not also discount the ideologically based opposition to accelerating the reduction in the 27 percent bracket. It is amazing to me that many on the other side see taxpayers in the 27 percent bracket as rich folks. A 2-percent rate cut for single folks earning between $27,051 and $65,550 is seen as a tax cut for the wealthy by the Democratic leadership. Likewise, a married couple with incomes between $45,201 and $109,250 is considered rich. But I recognize that this tax cut proposal was difficult for the Democratic leadership to accept.

In this skinnier version, the other element of individual tax relief, this one for payroll taxpayers, was dropped. I am talking about the rebate checks for payroll taxpayers. The rebate checks are gone. Some on my side will view this omission positively.

So, in terms of tax relief for individuals, forget about it. We were not able to strike the balance of the White House-centrist agreement.

There is little in the nature of corporate AMT relief in the thin package. In some ways this is a good result. As I said at the time, the original House bill was too heavy on corporate AMT relief. On the other hand, there were noncontroversial reforms in the corporate AMT that we could have included.

The most disappointing omission related to health care subsidies. We had before us revolutionary social policy in the White House-centrist agreement. For the first time, the Congress had sign able legislation that guaranteed health care benefits for laid off workers. The form of the benefit, a refundable tax credit, ran into ideological opposition by some on the other side. Because two-thirds of the Senate Democratic Caucus did not agree with the form of the benefit, unemployed workers will not receive the benefit. That's too bad. We had a chance to move the ball forward on an important bipartisan objective, improving access and affordability of health care. Instead of moving the ball, because of ideology, we had to punt.

All of these were good provisions which enjoy broad bipartisan support. They were the foundation of the White House-centrist agreement. Yet because of an ideological fixation, all of these good things went by the wayside. I believe today, as I did almost 3 months ago, that, if we had been accorded a straight up or down vote on the White House-centrist agreement, we would have prevailed. If we had prevailed, the people would be better served.

Mr. President unfortunately, it was not to be. So, here we are with a mixed bag. There is good news in terms of extended unemployment benefits, bonus depreciation, and other measures. But there is bad news in terms of missed opportunities.

Mr. President, I ask unanimous consent that the RECORD be held open until 5 p.m. today for a statement by Senators, and that they be included at this point in the RECORD.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. McCAIN. Mr. President, I will vote for the economic stimulus package in the interest of providing temporary assistance for unemployed Americans and their families. We cannot ignore the plight of millions of Americans, who were laid off and want to get back to work. My vote for this legislation should not be interpreted as a total endorsement of all of its provisions. Indeed, I have some serious reservations about extending tax benefits given to the oil and gas industry and the industry in the business of converting poultry waste into electricity. Again, my concern is that the special interests continue to benefit at the expense of hard-working Americans everywhere. However, overall, this bill will give unemployment relief for those families who need it the most and will help stimulate our economy to help America get moving again.

Mr. DOMENICI. Mr. President, I rise in strong support of the bipartisan Job Creation and Workers Assistance Act of 2002, H.R. 3090. This economic stimulus bill has been long in coming.

I am happy this day has finally arrived, but I know those unemployed workers and their families, who became unemployed after the events of September 11, and who will soon see their 26 weeks of unemployment benefits expire, will be even more pleased that we have not forgotten them. We will provide those whose benefits will soon expire an additional 13 weeks of assistance, and I truly believe that within this additional time period, they will return to full employment.

There are clear signs that the economy is recovering, but for those nearly 1.4 million long-term unemployed workers, there is no solace to be found until they are working again and earning incomes in the private sector.

I believe the provisions of this bill that will also provide assistance to small and large businesses in the form of 30 percent special depreciation allowances, combined with conforming AMT depreciation rules and a 5-year carryback of net operation loss provisions will help to increase those employment opportunities for the unemployed so they do not have to depend on further extensions of unemployment insurance.

I am also pleased that this bill follows through—as the Administration promised it would—to help fulfill the promise of providing over $21 billion in assistance to New York City. The expansion of Worker Opportunity Tax Credits to certain employees in New York City, and special credits to property placed in the Liberty Zone along with other provisions of this bill will continue to assist that city on the road to recovery.

I am pleased that the bill also extends $12 billion in various tax provisions that expired or will soon expire including the Worker Opportunity Tax Credits, Welfare to Work Credits, a 100 percent limitation on percentage depletion for oil and gas from marginal wells, and a provision I have championed that would penalize in the form of a tax those groups health plans that fail to comply with mental health parity requirements.

There are other provisions in this bill that will allow teachers to deduct classroom expenditures and exclusions for foster care payments to qualified placement agencies. The reauthorization of the Temporary Assistance for Needy Families supplemental grants and contingency funds for states such as mine that have seen an increase in population is needed help to some hard pressed state budgets.

This bill will become law. President Bush who has pressed for congressional action will sign this needed legislation. It is not everything he wanted, and I remain convinced that the proposal I advanced last winter to provide for a payroll tax holiday would have provided additional needed stimulus. But nonetheless this bill will still inject over $50 billion into the economy immediately and over $40 billion next year.

I congratulate the chairman and ranking member of the Finance Committee, the majority and minority leader in bringing this issue finally to a conclusion. It is the right thing to do, it is the right thing for those displaced and out of work today.

Mr. WARNER. Mr. President, I have worked closely with Senator COLLINS for sometime now on legislation to provide much needed tax relief for our educators. Today, I am pleased to report that the Senate should soon pass H.R. 3090, the Job Creation and Worker Assistance Act of 2002, as previously passed by the House of Representatives. With passage of this legislation, Senator COLLINS and I will have finally achieved our shared goal of providing much needed tax relief for our Nation's teachers.

The Collins-Warner provisions that are in this legislation, were crafted by Senator COLLINS and myself after months of consultations with Senator GRASSLEY, Senator BAUCUS, Senator ALLEN and House Ways and Means Chairman THOMAS. Congressman SCOTT from Virginia was also a very good working partner on this legislation, having introduced similar legislation on the House side.

The National Education Association played a key role and its many members should look with pride and satisfaction on their constructive advice to the Congress. The president of the Virginia Education Association, Jean Bankos, also helped lead this superb effort.

Simply put, the Collins-Warner provisions provide a $250 above the line deduction for educators who incur out of pocket expenses for supplies they bring into the classroom to better the education of their students. The Joint Committee on Taxation estimates that this provision will provide almost half a billion dollars worth of tax relief to teachers all across America over the next 2 years.

Our teachers in this country are overworked, underpaid, and all too often, under-appreciated.

In addition to these factors, our teachers expend significant money out of their own pocket to better the education of our children. Most typically, our teachers are spending significant amounts of money out of their own pocket on classroom expenses, such as books, supplies, pens, paper, and computer equipment.

These out of pocket costs place lasting financial burdens on our teachers. This is one reason our teachers are leaving the profession. Little wonder that our country is in the midst of a teacher shortage.

Estimates are that 2.4 million new teachers will be needed by 2009 because of teacher attrition, teacher retirement and increased student enrollment.

While the primary responsibility rests with the States, I believe the Federal Government can and should play a role in helping to alleviate the Nation's teaching shortage.

On a Federal level, we can encourage individuals to enter the teaching profession and remain in the profession by providing tax relief to teachers for the costs that they incur as part of the profession.

Our teachers have made a personal commitment to educate the next generation and to strengthen America. While many people spend their lives building careers, our teachers spend their careers building lives.

The Teacher Tax Relief provisions in this bill go a long way toward providing our teachers with the recognition they deserve by providing teachers with important and much needed tax relief.

I am proud to have had the opportunity to work with Senator COLLINS, Senator ALLEN, and so many others to make this goal a reality.

Mr. REID. Mr. President, on behalf of Leader DASCHLE, I yield Senator BAUCUS 5 minutes of leader time, and following that, 2 minutes of leader time to Senator CONRAD.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The Senator from Montana.

Mr. BAUCUS. Mr. President, this bill that has come over from the House has come over quite quickly and Senators have not had a lot of time to examine it and to work through the provisions of the bill. Personally, I think it is a bit rushed.

Having said that, I will support it at this point because—the phrase I often find myself using these days—we cannot let perfection be the enemy of good.

There are some good provisions in this bill. We did not have the opportunity to amend it. But the fact is, if we do try to amend it, we will probably get wrapped around the axle, and nothing will be passed.

And there are several provisions that should definitely pass. One is the extension of unemployment insurance. To my mind, the provisions in the House bill relating to unemployment insurance do not do enough. Given the state of the economy in the last year and the number of people who are out of jobs and need help, it is unfortunate that we cannot do more. But a 13 week extension will help many people and provide an economic stimulus.

In addition, the bill includes the extension of several important tax provisions, some of which expired last year. It is an outrage, frankly, that this Senate and the House of Representatives let those provisions lapse and we did not pass them at the end of last year.

I tell my colleagues right now that I regret I did not push strongly enough last year when we passed the tax bill to make sure the extenders were included. I had an assurance that they would come up soon. But that is no way to run a railroad. It is no way for the country to run its business, to say it is OK to have an on-again/off-again policy with respect to tax law.

I tell my colleagues the next time this comes up, we are going to pass extenders so that the provisions remain continuous. It will be a seamless web. There will never be another time when extenders are not passed, if I have anything to do with it.

Unfortunately, there are not any health provisions in this bill. There should be. A lot of people lost their health insurance benefits as a consequence of lost jobs and as a consequence of the declining economy.

As you well know, more and more people are without health insurance. It is because companies are not providing health insurance, and people are laid off and can't keep their health insurance. It is a huge cost individually to the people involved, and it is a huge cost to the country. It is regrettable that this provision we are passing today does not include health insurance benefits for those people who lost their health insurance on account of lost jobs. That is too bad. I wish it were in the bill, but it is not.

The bonus depreciation provision is good. It is going to help create jobs, and it will help stimulate the economy a bit.

I note, as we all note, that Chairman Greenspan said we are turning the corner. I think he is probably right. But the bonus depreciation provision is going to help. It also is insurance, and that is going to help as well.

The long and short of it is we have a choice. It is either vote for this, or try to amend it. If we try to amend it, we will be back where we have been for the last 5 months; that is, doing a lot of talk and not much action. I regret that.

But that is the situation with which we are faced. In light of this situation, I urge my colleagues to pass this. It is going to help—particularly the provisions that I mentioned—and we will get on with health insurance and get on with the other provisions that need to be taken up later on this year.

When they come up, I urge my colleagues to work with us to be sure that they are enacted because there are a lot of people hurting and who need a lot of help.

I thank my good friend from Nevada.

I yield the remainder of my time.

The ACTING PRESIDENT pro tempore. The Senator from North Dakota.

Mr. CONRAD. Mr. President, Senator BAUCUS is absolutely right. There are some good provisions in this bill. They are necessary provisions. That is what makes this vote so difficult.

I have struggled with the question of how to vote. But, again, the press reports this morning said the Chairman of the Federal Reserve said an economic expansion is now underway. It goes on to report that many economists have concluded that the economy this quarter is growing at an annual rate of 4 percent. Now the House passes a recovery package. They are too late.

This is the history of recovery packages. Every time in our history that we have tried to use fiscal stimulus, we have been too late.

The centerpiece of this package is 3 years of bonus depreciation. Look, I am a strong supporter of bonus depreciation, but not for 3 years. That encourages people to wait. That makes no sense. This is digging the hole deeper because every penny of it is coming out of the Social Security trust fund—every penny. We are already in a deep hole for the entire next decade.

I yield whatever time remains to Senator CARPER.

The PRESIDING OFFICER (Ms. STABENOW). The Senator from Delaware. There are 45 seconds remaining.

Mr. CARPER. Madam President, I thank the Senator from North Dakota for yielding.

Imagine that we are in a car driving down the road. We have an accelerator, and we have a brake.

The Federal Reserve, having launched the most aggressive monetary policy in our lives to help us get out of the recession—which will probably occur later this year—is beginning to tap down on the breaks to slow down inflationary expectations. Meanwhile, we are preparing to put our foot on the accelerator.

This plan made a whole lot of sense in October, November, and even in December. But in March, on March 8, with GDP having grown 1.4 percent in the last quarter, and is probably going to grow by 4 percent this month, this plan makes a whole lot less sense.

Mr. REID. Madam President, I ask for the yeas and nays on the pending matter before the Senate.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The question is on agreeing to the motion, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. REID. I announce that the Senator from Louisiana (Mr. BREAUX), the Senator from Hawaii (Mr. INOUYE), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Maryland (Ms. MIKULSKI), and the Senator from Georgia (Mr. MILLER) are necessarily absent.

Mr. NICKLES. I announce that the Senator from Wyoming (Mr. ENZI) is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 85, nays 9, as follows:

Mrs. BOXER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL LABORATORIES PARTNERSHIP IMPROVEMENT ACT OF 2001

The PRESIDING OFFICER. Under the previous order, the Senate will resume consideration of S. 517, which the clerk will report.

The legislative clerk read as follows:

A bill (S. 517) to authorize funding for the Department of Energy to enhance the mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, and for other purposes.

Pending:

Daschle/Bingaman further modified amendment No. 2917, in the nature of a substitute.

McCain amendment No. 2979 (to amendment No. 2917), to provide for enhanced safety, public awareness, and environmental protection in pipeline transportation.

Feinstein amendment No. 2989 (to amendment No. 2917), to provide regulatory oversight over energy trading markets.

Bingaman/Domenici amendment No. 2990 (to amendment No. 2917) to promote collaboration between the United States and Mexico on research related to energy technologies.

The PRESIDING OFFICER. The Senator from Nevada is recognized.

AMENDMENT NO. 2979, AS AMENDED, TO AMENDMENT NO. 2917, AS FURTHER MODIFIED

Mr. REID. Madam President, I ask unanimous consent that the 2 minutes for debate be yielded back.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Madam President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

NOT VOTING—6

Breaux
Enzi
Inouye
Kennedy
Mikulski
Miller

The amendment was agreed to.

Mr. CORZINE. Madam President, I rise today in support of the amendment offered by my distinguished colleagues, Senators MCCAIN and HOLLINGS, to improve pipeline safety. This amendment would add to this legislation the text of S. 235, the Pipeline Safety Improvement Act of 2001, which previously was approved by the Senate.

As Congress debates the direction of our Nation's energy policy, we need to consider the safety of the infrastructure that transmits much of that energy. S. 235 is important legislation that would help to secure the safety and integrity of our Nation's 2.2 million mile-long hazardous liquid and natural gas pipeline system. And I want to thank Senators MCCAIN, HOLLINGS, and MURRAY for the hard work that culminated in this bill.

When S. 235 was considered on the Senate floor early last year, Senator TORRICELLI and I offered four amendments that we felt addressed important issues related to pipeline safety. We agreed with the sponsors of the bill that the most important of these amendments, related to the integrity of pipelines and their frequency of inspection, should be added to the bill. The bill then passed the Senate unanimously, 98–0. Unfortunately that bill remains stuck in the House, which so far has refused to act on the legislation.

The issue of pipeline integrity remains an important issue that must be addressed. I have a special interest in this matter because my own State of New Jersey was the site of a major pipeline explosion. On March 24, 1994, a natural gas pipeline exploded in Edison, NJ, at 12 midnight. Families living in the nearby Durham Woods apartment complex awoke to a deafening roar. They ran out of their homes to see a wall of flame hundreds of feet in the air. These flames were so high that they were seen in both New York City and Pennsylvania.

Miraculously, only one person died that night. However scores of people suffered injuries due either to burns or smoke inhalation. Many more lost their homes and all their possessions. And the explosion itself left a crater that was 60-feet deep.

This explosion was caused by a natural gas pipeline that was buried in the earth. There were no reports of digging in the area, nor were there reports of any other disturbances that could have set off this explosion. It was simply the corrosion that occurred in the pipeline as a result of natural conditions that allowed natural gas to leak, the gas to then ignite and an explosion to happen.

As harrowing as this tragedy was—it was not the only one. There have been natural gas pipeline explosions in other States, including New Mexico, which have been severe enough to cause loss of life. In New Mexico, 12 members of a family were incinerated when the natural gas pipeline they were camped next to exploded in August of 2000.

From 1986 to 2000, there have been 366 fatalities due to pipeline accidents around our Nation. Three hundred and forty of these were due to natural gas pipeline accidents.

This concerns me because there is currently no requirement for the regular inspection of natural gas pipelines in this country. The Office of Pipeline Safety already requires hazardous liquid pipelines to be inspected on a regular basis. But it has not yet promulgated a rule regarding natural gas pipelines. And we have waited long enough.

That is why I sponsored language requiring a 5-year inspection period for all pipelines, liquid and natural gas. It was this language which was added to the version of S. 235 that is included in this amendment. And it is this language, along with the rest of S. 235, that I hope we will include in the energy bill to move this matter forward and help ensure that this legislation gets to the President's desk and becomes law.

PRICE-ANDERSON ACT

Mr. KERRY. Madam President, I would like to make a brief statement about the Price-Anderson Act and our vote yesterday. The Price-Anderson Act, which was first enacted in 1957, limits the nuclear industry's liability in the case of an accident. Under current law, that limitation applies to all existing nuclear powerplants and would have continued to apply to all existing nuclear powerplants had the Senate not acted. The amendment the Senate passed yesterday extended the Price-Anderson Act's liability limitation to new nuclear powerplants. As I have said before, I support Price-Anderson for our existing fleet of reactors, and I support extending the life of those plants. However, I do question whether or not we need to extend this liability to new plants. I know that we are making progress in developing new, more economic and safer plants, such as the pebble bed reactors. Nevertheless, the jury is out. We don't know if these plants will be economical. We don't know whether they will need or should receive liability caps. We don't know what that liability cap should be. And we still have not solved the fundamental question of what we will do with nuclear waste. I believe we should answer that question before we build new plants and not simply leave that problem to future generations.

Mr. REID. The Senator from Idaho is here to offer an amendment on the bill. We thought previously it would be something we could do in about 5 minutes. I don't think we can do that, although we may be able to do it quickly on Monday or Tuesday.

I ask the Senator to be his usual gracious self and not offer the amendment today until we have a chance to look at it.

Mr. CRAIG. Madam President, the Senator from Nevada chairs the appropriating subcommittee on this issue. It is an authorization. I certainly want him to understand it. I will step back. I would like to move it as quickly as possible. Monday or Tuesday of next week would be fine.

MORNING BUSINESS

Mr. REID. I ask unanimous consent that the Senate proceed to a period of morning business, with Senators allowed to speak for a period not to exceed 10 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Connecticut.

THE STIMULUS PACKAGE

Mr. DODD. Madam President, I will not take more than 10 minutes. I see my colleague from New Hampshire here as well. I voted against the so-called stimulus package a few moments ago. I didn't have a chance before the vote occurred to explain why I was going to cast that ballot, voting no.

Obviously, there are provisions that I strongly endorse and support, including: The extension of unemployment benefits; teacher expenses which is an item we argued about a number of years ago that I thought would be very worthwhile; and the New York recovery package—certainly I would like to see us do what we can to help New York City as a result of what happened September 11.

If those were the only issues, this would have been an easy vote. They were not the only issues. In fact, they were minor issues by comparison to what else was included in this package. Based on whatever estimates you want to rely on, at least over the next 10 years, there are $42 billion in revenue losses to the Federal Treasury.

Yesterday, the Presiding Officer, I, and others who sit on the Senate Banking Committee had the pleasure of listening to the Chairman of the Federal Reserve Board say their analysis at the Federal Reserve was that we are on our way out of this recession. The worrisome figures that indicated this recession could be deeper or be a double-dip recession apparently will not bear out. The country is getting stronger, the economy is getting much stronger.

While there may have been a strong case for this bill that just went through by 85–9—it is becoming the law of the land—and a strong case could have been made for it 2 or 3 years ago or even a number of months ago, but I do not think the case could be made for it today. Using the most conservative number, the $42 billion, that is $42 billion more to the deficits with which we are grappling, which according to the CBO, may be $120 billion in this coming fiscal year. The administration had initially said $80 billion. We are now told that over 10 years it is $1.8 trillion.

Well, $42 billion in a $1.8 trillion deficit may not sound like much, but it is when we are trying to see if we can do more, for instance, with the Securities and Exchange Commission, where we need maybe $100 million to $200 million to beef up enforcement and accounting divisions to deal with an Enron-type situation. It is a lot when we know, as a result of increasing the workload of working mothers, we need additional funding for child care, that we ought to do more on the child abuse treatment and prevention programs—to mention a couple. In transportation, we have an $8.6 billion shortfall. I don't know a section of the country that will not be hurt by that budget decision.

Yet we just took $42 billion off the table this morning by a 85–9 vote. State budget shortfalls will total more than $42 billion for the current fiscal year. A few months ago, we had a stimulus proposal on the table that would have included State assistance. The previous House version of this bill contained capped assistance for State Medicaid Programs and also provided dollars back to the States as a result of the revenue losses on the bonus depreciation. My State just lost $240 million this morning. New York lost more than $2 billion.

So on one hand we are giving money for relief and providing assistance on the September 11 tragedy, yet we will take $2 billion away from the State of New York. And again, in my state, this bill is taking $240 million! The Governor and others are wrestling with how to provide needed resources to our area.

I mentioned the $8.6 billion deficit reduction in the administration's budget for transportation. That is a huge issue in my State, as I know it is in the State of the Presiding Officer and others. Listen to what we have done and the analysis of this. The most expensive component of this bill that we just passed is the 3-year bonus depreciation provision that will costs close to $97 billion during the next three years, according to the Joint Committee on Taxation. The Congressional Budget Office, CBO, a nonpartisan budget office, concluded that allowing depreciation bonus for 3 years rather than 1 year—which is what we should have done—would sharply reduce the effectiveness of this proposal as an economic stimulus. These are their words. With a 3-year provision, firms can delay investment until well after the economy has recovered. This provision will worsen the financial situation in States which are facing cumulative budget deficits of more than $42 billion.

Unlike the last two stimulus bills the House passed and the stimulus bill the Senate Finance Committee approved last fall, this bill we adopted includes no fiscal assistance whatsoever to States to offset the State revenue offices that the depreciation provision would cost.

As I said, this bill might have been fine 5 months ago, but today it is a mistake. The provision calls for 3 years at 30 percent, but the 3-year period begins on September 11. So all investments since September 11 will qualify; new investments have to be made by September 10, 2004, long after the recession is over. This is overreaching and it goes too far. We have to learn to have a sense of balance about these things when we take these steps. In 2002, the bonus depreciation provision will cost $35 billion. This is unfortunate when I know there are many great demands. How do you not have interest rates go up if the deficit continues to mount?

On the net operating loss, I am sympathetic to some of the issues, but this provision allows a carryback to 1996—1996, as a stimulus package? It is overreaching, way overreaching.

There is a lot we did not include: There are no health care tax provisions. No rebates—the bill drops the $14 billion included earlier. No small business expensing. No general increase in small business expensing. And no State assistance.

I know there are provisions that Members did not want to be seen voting against, such as extension of unemployment benefits. I know we wanted to help out in the case of September 11 and what happened in New York. But typically what happens is we list all of these things as if they were of equal wait in the budget. They are not.

We just voted for a huge addition to the fiscal deficit of this country at a time when we are struggling to find payments for transportation, health care, child care, and education. We have a 2-percent reduction in the elementary and secondary education accounts, and the President's budget. We may change it. We just passed a bill with additional reforms for which we are going to have to pay.

This stimulus bill results in a tax increase for people at the local level. Local communities are going to raise taxes. States are going to have to raise taxes. We just made, I think, a mistake by voting for this so-called stimulus package.

Those are the reasons I cast a "no" vote this morning on that proposal.

I yield the floor.

The PRESIDING OFFICER. The Senator from Pennsylvania.

JUDICIAL NOMINATIONS

Mr. SPECTER. Madam President, I have sought recognition to comment briefly on the pending nomination of Judge Charles Pickering for the circuit court of appeals, which was heard by the Judiciary Committee yesterday, with the vote postponed until next week.

I support Judge Pickering because I think Judge Pickering, in the year 2002, is an appropriate nominee for the circuit court. If Charles Pickering were still a State Senator in the 1970s, I would vote against him because his civil rights record at that time was not good. But today he is a different man. This is a different time.

The opposition raised against Judge Pickering, in large measure, is about what he was as a Mississippi State Senator in the 1970s.

It is my hope that at a minimum we will send Judge Pickering's nomination to the floor of the Senate for a vote by the full Senate. The Constitution provides for confirmation by the Senate—not by the Senate Judiciary Committee. There are solid indicators that if Judge Pickering reached the floor, there would be 51 or more votes for his confirmation.

When you take into account an analysis of the comments within the beltway by those who oppose Judge Pickering vociferously, and those in Mississippi who know him best, they are for him. Those who talk about him in Mississippi talk in specifics about how he took a courageous stand against a leader of the Ku Klux Klan, about how he sided with an African American who was a defendant in a case where there was a white victim, something which was frequently not the case in the South.

This may be a warmup for the next Supreme Court nomination. We have already seen some indicators of that with some members of the Judiciary Committee saying that a litmus test should be applied, and, if a nominee will not pledge to uphold Roe v. Wade, that nominee is not appropriate for confirmation.

This is an effort, in effect, to equate Brown v. Board of Education on segregation, with Roe v. Wade. It is obvious that if someone did not support Brown v. Board of Education and desegregation, that person would not be considered fit for the Federal bench today. But to apply a litmus test more broadly is very troublesome, in my opinion.

It is my hope that if Judge Pickering receives a negative vote in committee along party lines, which seems almost certain, that at a minimum he would be sent to the floor for full floor consideration.

We ought to establish a truce—an armistice—on the partisan in-fighting which has been ongoing on nominations. When we had a Democrat in the White House and a Republican-controlled Senate, it was the mirror image of what we have today with Republican President Bush in the White house and a Senate Judiciary Committee in the Senate controlled by the Democrats. I said the same thing when we had President Clinton in the White House and a Republican-controlled Senate. I crossed party lines to vote for Judge Paez and Judge Berzon, Judge Gregory and Bill Lann Lee for Assistant Attorney General for the Civil Rights Division.

It is my hope that we will establish a protocol.

I think Senator McCONNELL was right when he said yesterday in the Judiciary Committee hearing that we are facing an "institutional crisis."

The American people do not like the partisan bickering—Democrats versus Republicans—especially when it comes to the selection of Federal judges and there is a judicial emergency in many circuits.

It is my hope that we will move ahead to try to end this partisanship.

There is solid precedent for submitting nominees to the full Senate when there is a negative or tied vote in committee. Judge Bork was defeated 8 to 5 in committee. Yet his nomination was sent to the floor for consideration as a Supreme Court nomination.

Justice Clarence Thomas had a tie vote in the committee of 7 to 7, but by a vote of 13 to 1 his nomination was sent to the floor.

Six nominees for district court or circuit courts have been sent to the full Senate when they did not receive an affirmative vote in committee—since 1951.

We still have time to revise the thinking on Judge Pickering. We still have time for an analysis on an appropriate way to handle Judge Pickering. But I submit that we ought to establish a principle from the Judiciary Committee that, if the vote is strictly along party lines, the matter be put before the full Senate for consideration.

I thank my distinguished colleague from New Hampshire for allowing me to precede him on the floor.

I yield the floor.

The PRESIDING OFFICER. The Senator from New Hampshire.

METHYL TERTIARY BUTYL ETHER

Mr. SMITH of New Hampshire. Madam President, I want to speak briefly on four issues this morning. Let me start, first, with the issue of MTBE, which is probably not a household word in many States. It is methyl tertiary butyl ether. I will be calling it MTBE from now on in these remarks.

Over the past few years, countless families and businesses in my State and throughout the Nation have learned firsthand the devastating effect of this gasoline additive known as MTBE. It is in our drinking water. People can't shower because of the smell. They cannot drink the water. Their homes have to have three or four huge tanks with filters in order to be able to drink and use their water. It depreciates the value of their home. This is a real problem nationally.

Fortunately, there is help on the way. I am very pleased that the energy package we are now considering finally contains a solution.

I thank the majority leader for including my legislation in the Federal Reform Leaded Fuels Act in the energy package that we are debating. This legislation was voted out of committee both last Congress and this Congress. I am pleased that it will finally get a vote, I hope, on the Senate floor.

I thank a lot of people who helped. This does not come easy. We all have strong views. We have a number of different interests: Those who produce the MTBE, those who produce ethanol, those who refine gasoline, those regions of the country that can't use ethanol for various reasons, and those who are worried about the higher cost, if they do.

It took a lot of compromise and a lot of negotiations, which we have been working on now for many months—particularly Senator REID of Nevada, Senator VOINOVICH, Senator JEFFORDS, Senator INHOFE, Senator KAY BAILEY HUTCHISON, Senator HAGEL, and Senator MURKOWSKI—there are others, but in particular their hard work and cooperation with my staff.

I also want to say that the refiners, the ethanol producers, the environmental groups—all of them—have worked with me over the last few years to reach a consensus. It was not easy, that is for sure, with so many diverse issues and views.

I thank all of them for negotiating in good faith and keeping the work product to ourselves as we went through this.

The result is good. It is a comprehensive legislative package that protects our drinking water while preserving air quality and minimizing negative impacts on gasoline prices and supply.

Understanding where we are, it is worth taking a step back to discuss how and why we got to this point.

In 1990, the Clean Air Act was amended to include a reformulated gasoline program. This program requires clean burning gasoline in specified areas with high levels of air pollution. Four counties in southern New Hampshire chose to participate. The program has been successful in achieving the air quality benefits beyond our requirements.

Unfortunately, one provision of the program mandates the use of an oxygenate in areas that use reformulated gas, requiring States to use MTBE or ethanol. Because New Hampshire is far from ethanol production, economics dictated that MTBE be chosen as the oxygenate. There was also concern with the impact ethanol could have on the air quality of New Hampshire, particularly the potential of increased smog.

So the State chose MTBE. Of course, at that time no one was aware of the looming nightmare as a result of that choice. What we put in the gasoline to clean up the air has now contaminated our water.

How does that happen? Because the tanks underground that hold the gasoline leak, or after you fill up your tank with gasoline and you take the nozzle out, a drop or two of the gasoline may hit the pavement, and then it washes away into our ground water.

I remind all who are listening to me now, think about that when you put that nozzle back: Don't let any of that gasoline drip, not even a drop, because it goes so quickly into the water supply.

MTBE is a clean, cheap gasoline additive that boosts octane. It is a very effective product. But it migrates through the ground and into the water table and the aquifer very quickly and diffuses quickly. At even low levels of contamination, MTBE renders water unusable because of its foul odor and taste.

Particularly hard hit by the MTBE contamination are the communities in the southern tier of New Hampshire, such as Salem, Derry, and Raymond. I have come to the Senate Chamber on several occasions to speak specifically about these families and small businesses that have been impacted by the MTBE contamination, continuing to reiterate the desperate need that the Senate take action. Time after time, in committee, month after month. I have almost begged the Senate to take action on this matter because it isn't fair that people, in the interests of making a profit, selling one product, should do it at the expense of those whose health is being impacted by contaminated water.

I spoke to the Miller family—Christina and Greg, and their son Nathan—who live in Derry, NH. This young family has been struggling for over 3 years with MTBE contamination in their well—not being able to drink the water, not being able to shower. I have spent time at the Four Corners Store and surrounding homes in the town of Richmond. Gasoline in those tanks spread from that location into the aquifers of the surrounding homes. This plume has contaminated a number of private wells near that store. I visited some of those families who have those wells. We went down in the basements and saw these large tanks with filters. When a prospective buyer comes to look at the house, what are they going to think? The first question is: What is this?

The Goulas and Frampton families were kind enough to invite me into their homes and show me this massive treatment system that had been installed by the State. The answer is, yes, we are getting the filters, we are getting the help, the remediation we need, but that does not take care of the problem.

We do not want more homes contaminated. Once we remove the MTBE, then it is not going to get anymore into their wells. Once it is cleaned up, they will be able to use their water again.

We take for granted, in this country, the fact we can turn that faucet on and get a clean drink of water or take a shower and not have to smell the water. These are cumbersome systems that have to be set up, and costly to operate, not to mention the concerns and fears they face on a daily basis.

There are hundreds, maybe thousands, of stories similar to these New Hampshire examples of nightmares that are the result of MTBE contamination.

We made a mistake. The Government made a mistake. They put MTBE in gasoline to clean up the air, not knowing the harm they were doing. We did not do enough research and science, and we made a terrible mistake. We have to correct it. We have to do it now.

To help understand the magnitude of the problem in New Hampshire alone, it is worth noting just a couple of statistics.

The State Department of Environmental Services in New Hampshire estimates that up to 40,000 private wells in New Hampshire have some MTBE contamination.

In the year 2000, over 16 percent of the public water supplies had detected levels of MTBE. Almost 20 percent of that public water with MTBE contamination is at levels above the State drinking water standard.

The State has had to buy bottled water. I mentioned the installation of the expensive treatment equipment with contaminated wells.

Currently, New Hampshire has two dedicated State funds and a federally funded program that are used to address MTBE problems.

During discussions with State officials, I learned that the money is running low and will soon run out if new sources of funding are not found. This is a crisis. We have to deal with it.

New Hampshire is not alone. Many other States have had to address problems from MTBE contamination. I know the distinguished Senator from California, Mrs. FEINSTEIN, and I have talked about this a number of times.

This is a bipartisan issue. It is not a partisan issue. This is a national problem. It has to be addressed at the national level because to not do so would force communities to say, we are going to ban MTBE, and they would be in violation of the Clean Air Act.

So this legislation I have written is an effective solution. I am pleased that the energy package includes the text of that legislation. Specifically, it bans MTBE, provides money for the cleanup of MTBE, eliminates the oxygen mandate in the RFG program, and maintains the current level of air quality protection. There is no backsliding.

In addition, the legislation requires the EPA to conduct an expedited review of State petitions to suspend the oxygen mandate in the RFG program. If the EPA fails to complete the review of a State petition within 30 days, the petition will automatically be granted. This provision could allow New Hampshire to begin to eliminate MTBE from the fuel system even before the oxygen mandate is lifted.

I have promised to help New Hampshire in any way possible to stop the use of MTBE and I promise those families the same thing. We owe it to them. The Senators who are not from New Hampshire owe it to them, as I would help those in other States who have similar problems. And there are those in other States who have similar problems.

Finally, the language includes $2 million for the research of techniques to clean up bedrock contamination and to establish a clearinghouse for sharing the information. This is a huge increase beyond the pilot study currently funded.

The greatest difficulty, according to Dr. Nancy Kinner, a scientist from the University of New Hampshire, is tracking and cleaning up MTBE in fractured bedrock. This research will help to address that problem. It has not been an easy deal to reach, but a lot of people participated. They came in with the right approach, understanding the desperate need those families have.

Again, I thank the majority leader, and all of the Senators involved. I particularly thank Chris Hessler and Melinda Cross from my staff for their help, and Dave Conover, of course, for his assistance in helping me to work through this.

Madam President, I see there are no other Senators in the Chamber. I ask unanimous consent to speak for an additional 10 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

NOMINATION OF JEFFREY HOWARD

Mr. SMITH of New Hampshire. Madam President, there has been a lot of discussion about the Pickering nomination and about the delay in approving judges. It seems to be a perennial issue. Senator SPECTER just spoke about it. But there are times when we need to put some of these partisan feelings behind us and look at some of these nominations.

I rise to discuss the nomination of Jeffrey Howard to be a justice for the First Circuit Court of Appeals. Attorney Howard is like many other of President Bush's nominees who have yet to even receive a hearing. These men and women whom we nominate, their lives go on hold. They have law practices. They have responsibilities. They have families. What do you do?

Jeff Howard is a young man. He has a family. He was nominated on August 2, 2001. I was pleased to have been the prime mover and sponsor of that nomination because Jeff Howard is extremely well qualified for this position. But his nomination, with all due respect to the chairman of the Judiciary Committee, has now been pending for 217 days.

The vacancy he was nominated to fill was formerly held by Judge Norman Stahl. This vacancy was created on April 16, 2001. You may want to keep this in mind. We are almost to the first-year anniversary of the creation of the vacancy, and yet, how does he conduct his law practice? How does he take on new clients? What does he do?

His paperwork has been complete since September 20, 2001. Both Senator GREGG and I returned our blue ships—that means approval slips—on September 20, 2001. There is no reason this nomination cannot have a hearing. There is no controversy here. He should have a hearing.

Jeff Howard has an impressive array of legal experience that well qualifies him to be a Federal appellate judge. He served as U.S. attorney for New Hampshire from 1989 to 1993. In that post, he litigated numerous cases at both the trial and appellate levels and was a member of the Attorney General's Advisory Committee of U.S. Attorneys.

For his efforts, he received the Attorney General's Edmund Randolph Award as well as the U.S. Attorneys' Award.

He has Federal experience that includes a stint as principal associate deputy attorney general at the U.S. Department of Justice from 1991 to 1992. He performed this job at the request of former Attorney General Bill Barr. In addition to his work as U.S. attorney, he served as attorney general of New Hampshire from 1993 to 1997 and deputy attorney general in 1988 and 1989. In these State and Federal capabilities, Jeff Howard has been involved in thousands of litigated matters covering the full range of issues that are going to come before him as a Federal judge.

In particular, he has been either on the brief or lead counsel in more than 100 cases in the First Circuit, the court to which the President has nominated him. Over the last 10 years, he has performed approximately 2,500 hours of pro bono work for victims of domestic violence.

He grew up on his grandfather's dairy farm in Cornish, NH, and later graduated from Plymouth State College with a B.A. and later Georgetown Law School, and he was editor of the American Criminal Law Review.

This is a well qualified judge. He should be on the court. He does not deserve this kind of treatment. How are we going to get good people to come forth and take these jobs when their lives are put on hold for years, sometimes, let alone months and days?

The circuit court nomination pace is incredible. During the first year of the Clinton administration, only five court of appeals nominees were nominated. Of those five, three were reported out that same year. That is 60 percent of President Clinton's court of appeals nominees. In contrast, President Bush has nominated 29, and the committee has only reported 6. That is 21 percent. There were only two circuit court nominees left pending in committee at the end of President Clinton's first year in office. In contrast, there were 23 of President Bush's circuit court nominees pending in committee at the end of last year.

It is unfair to compare the first years of the second Bush administration and the Clinton administration by looking only at the mere number of nominees confirmed. This approach fails to take into account the fact that President Bush chose to nominate 24 more circuit court nominees than President Clinton did. We can get lost in the numbers, and I don't want to go through it.

I just repeat that Jeff Howard is as highly qualified a judge for the First Circuit as any judge I have seen. Yet we still have the nomination pending without even a hearing. His life is on hold. His family's life is on hold. I appeal to the chairman of the Judiciary Committee to give this good, decent, honorable judge a hearing so we have the opportunity to bring his nomination forth and put him on the bench where he belongs and where I was proud to support him.

NOMINATION OF CHARLES PICKERING

Mr. SMITH of New Hampshire. Madam President, I rise to discuss the nomination of Charles Pickering. Senator SPECTER just spoke on it.

This is a tragedy, when we have to drag people through the mud when they get finally to the hearing process, as Charles Pickering has. He is a man whose name is being dragged through the mud, even though people in his hometown of all races and creeds are praising him and saying: Whatever mistakes he made in the past, we understand. He has moved beyond that. He is a good man. He ought to be on the bench. Yet here we are, stuck with probably seeing a situation where Charles Pickering will be defeated by one vote on a party-line vote and not be allowed to come to the floor.

Why not give the Senate a chance? It is done. Maybe it has not been done that often on circuit court matters, but it has certainly been done many times with Supreme Court Judges. I hate to say it because I will not get into the partisan rhetoric here, but this is a classic case of getting "Borked" again. We all know what Judge Bork went through, and Clarence Thomas. We know what John Ashcroft went through.

Is this the way to treat people? Just be fair about it. If we are going to hold people accountable for every single mistake they make in life, then we will have to have perfect people. I don't know too many perfect people walking around this Chamber. If there is anybody in this Chamber who has not made any mistakes, they probably should vote against Pickering.

This is ridiculous. He is a good man, a good judge. To have his name dragged through the mud is disgusting. I hate to see it. It reminds me of the Ashcroft hearing, of the terrible things said about Clarence Thomas and, of course, Robert Bork. Bork was probably one of the most qualified people ever to even be nominated for the Supreme Court. Whether you liked him or disliked him on his views, he was still qualified. The last time I looked, a President had the right to pick somebody of his choosing, of his philosophy.

I voted for I don't know how many Clinton nominations to the Supreme Court, to the Federal court system. I didn't expect to get Reagan-type judges out of Bill Clinton, but he was the President. I supported most of them unless there was some particular thing that, in my view, made them not qualified.

To echo what Senator SPECTER said, it is my hope we will move this nomination to the Senate floor and let the Senate make the decision. That is not unreasonable. The committee is deadlocked on a partisan vote. Bring Judge Pickering out. If he loses, fine; if he wins, fine. But let him have a vote. He deserves that. At worst, we can say maybe some of the things are true. How do you know whether what he said and did 30 or 40 years ago is over now? Can you be the judge of that? Let all 100 Senators make that judgment. I would like to have a chance to have a vote on that.

THE NOMINATION OF JOE SCHMITZ

Mr. SMITH of New Hampshire. Madam President, the final item I rise to discuss involves another nomination, but not for the judiciary. It is the nomination of Joe Schmitz. I have already submitted a statement for the RECORD, but I want to say this in the Chamber because I believe strongly in it.

Joe Schmitz was nominated for the inspector general at the DOD. This is a position among the most important in the Department because the inspector general's office is responsible for ensuring accountability and efficiency, and therefore it is the heart of the integrity of the Pentagon.

There have been numerous scandals in the IG's office in the recent past. Essentially, the inspector general's office has been rudderless without a confirmed nominee now for 3 years. With the IG's office in disarray, there is the impression left that the Department is without proper and necessary oversight. It is more than impression; it is fact.

I am also told that the IG's office has been leaderless, headless, for some 10 years—over the past couple decades, which is a disgrace when you stop to think about it. Without strong leadership, direction, and motivation, no office can function efficiently and effectively.

Secretary Rumsfeld needs an inspector general. If you stop to think about the job Donald Rumsfeld has done as the Defense Secretary in this country, the way they have responded, the way they have conducted themselves in countless briefings, and the way they have administered the war and come back after the terrible events of 9/11, he deserves an inspector general. He deserves Joe Schmitz because that is his choice. We are, after all, at war. Remember that.

It doesn't seem to bother those who are deliberately holding up the nomination of this good man. He was the Secretary of Defense's choice, the choice of President Bush in this important post.

This is not a lifetime appointment. This is not a judge. This is an appointment of who President Bush and Secretary Rumsfeld want to be inspector general for the Defense Department at a great critical time. He is an individual with a strong background for the job, with impeccable personal and professional credentials. I hope we move forward expeditiously with this nomination. It has been cleared by the Armed Services Committee by voice vote and the Governmental Affairs Committee, yet it is on the calendar with no action.

Individuals who undergo the nomination process put their names and reputations on the line. They open themselves up for intense scrutiny of their past employment, finances, conduct, associations, somebody's opening every door—everybody who wants to say something negative about you, they find. They interview you.

He has been held up long enough. There are no ethical issues impacting this nomination. He has received strong recommendation from those who know him and have worked with him, regardless of party affiliation. You will find it on both sides. Joe Schmitz was a superlative choice by Secretary Rumsfeld and President Bush, and he will make an outstanding attorney general, and that is a fact.

The Senate needs to act. Again, I put this nomination in the same box with Charles Pickering and Clarence Thomas and Robert Bork and John Ashcroft and others. Why do we have to put people through this? Why do we have to attack them publicly in nomination hearings? If you have a problem, be man enough to sit down and talk with them. If I have a problem, I bring them into my office and talk to them privately. If there is still a problem, I might have to say something publicly; but for the most part, if I know something and I need an answer, I am man enough to bring the person in, sit him or her down and say: Here is what I want to know.

It is not real bravery and courage to sit up on the dais in Senate hearings, with the nominee sitting down at the table, and you are pounding away on him, criticizing him in front of everybody. You have the gavel, you are the Senator, what is he going to say? He has to sit there and take it in order to get this job. We do it and we character-assassinate people day in and day out. It is not right. We wonder why we can't get good people to serve and why there is so much exasperation and condemnation about the people who serve in government. That is why. It is not right.

Schmitz is a good man. I say to my colleagues who have the power to make it happen: Get him on the floor of the Senate and let's vote and give Don Rumsfeld his inspector general.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DASCHLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ECONOMIC RECOVERY BILL

Mr. DASCHLE. Mr. President, earlier this morning, we had the opportunity to vote on the economic package that we have been working on now for some period of time. Our deliberations on this subject began almost 6 months ago.

In fact, I do not think that the timing of this action is a coincidence. Monday will mark the 6-month anniversary of September 11. It will also be the days that workers who lost their livelihoods on September 11 will exhaust their unemployment benefits.

Those who have until now opposed a bipartisan economic recovery bill, and the unemployment insurance extension it includes, have wisely decided to relent in their opposition before the anniversary of that awful day arrives.

Two months ago, I proposed a common-ground economic recovery bill that contained only provisions supported by both parties. It included a 13-week unemployment extension, tax rebates for persons left out of last year's tax cut, business tax cuts to spur investment and create jobs, and fiscal relief for the states.

In an attempt to break the logjam and bridge disagreements between the parties, Democrats agreed to give up the economic priorities we had pressed last year, but which were opposed by Republicans. In exchange, we proposed that Republicans give up their priorities which were opposed by Democrats—namely, repealing the alternative minimum tax for corporations, including Enron, and accelerating the rate cuts enacted last year.

Regrettably, Senate Republicans blocked that measure, despite the fact that when votes were taken our consensus package received 56 votes, while the Republican bill had just 48 votes.

The bill we have just approved is similar in its approach. Like the common-ground bill Democrats proposed in January, it leaves out the highly controversial proposals Republicans insisted on previously. And it includes a top priority for Democrats—an extension of unemployment insurance. For these reasons, I support this legislation—although I would point out one serious omission.

As I said, our bill included one year of fiscal relief for the states through an increase in the match rate for Medicaid. Sixty-two Senators voted for an amendment to provide this relief for 2 years. Unfortunately, the bill passed by the House does not include this important measure.

This fiscal relief provision is the top priority of the bipartisan National Governors Association. It would assist States with the serious revenue shortfalls they are experiencing as a result of the recession. Given the adamant opposition of some Republicans and the difficult time constraints under which the Senate is operating, it is not possible to address this issue in the time available to us this morning.

I say to the opponents of State fiscal relief: Dropping this provision is a serious mistake, and one I believe they will regret. In the long run, I do not believe we can avoid dealing with this problem.

There are other measures in this bill some of us might have written differently. Many of us would prefer a shorter time period for the bonus depreciation provision, for example, but on balance, the bill is a vast improvement over what Republicans and the administration advocated originally, and I believe it deserves the support it received this morning. I am grateful for its passage.

Mr. BYRD. Mr. President, today the Senate at long last passed a thirteen-week extension of unemployment benefits.

This is a relief to over 3,000 workers in my State of West Virginia who have exhausted their regular unemployment benefits since September 11, 2001, and, it is help that could have—and should have—been provided sooner, if it had not been delayed unnecessarily by those who have sought to provide tens of billions of dollars in tax cuts for a so-called "economic stimulus."

Much has changed since an economic stimulus was first proposed in response to the September 11 attacks. The economy is growing again, business investment is on the rise, and workers are returning to their jobs. Both the stock markets and the economy have proved to be more resilient than economists had expected.

And so I find it difficult to accept the argument that $43 billion in tax cuts is necessary to ignite an economic expansion that appears to be already underway.

What is more, I find it difficult to support legislation that would result in a further erosion in the budgets of state governments. I served in the West Virginia Legislature, and I understand and sympathize with their budgetary constraints. The depreciation provision that was included in the bill that was passed today is projected to cost my state $86 million in revenue. My State cannot afford to lose that revenue.

The Federal budget position is not much better, Mr. President. This year's budget and appropriations process promises to be very difficult, and tough choices will have to be made. With projected deficits for the current and upcoming fiscal years, the mounting costs of our military efforts abroad, the need to improve our homeland defenses, and the long-term financing problems facing Social Security and Medicare, I could not in good conscience vote to spend $51 billion to spur an economic expansion that, as Federal Reserve Chairman Alan Greenspan told the Senate Banking Committee yesterday, is already well underway.

What is unfortunate, is that in opposing this package of tax cuts, I was forced to oppose a number of tax provisions that would aid the City of New York. I have tried to be helpful to the people of New York State in the aftermath of the September 11 attacks. Last year, I helped to secure $11 billion through the Appropriations Committee—almost $2 billion more than was proposed by the president—to help New Yorkers rebuild their city.

Nevertheless, I am glad a thirteen-week extension of unemployment benefits has at last been approved, and am only sorry that it could not have been provided sooner and without tens of billions of dollars in what is likely to be unnecessary stimulus.

Mr. LEVIN. Mr. President, although I strongly support an extension of unemployment insurance benefits, because this bill—which is called a stimulus bill—would in reality have a detrimental impact on our economy, I cannot support it.

First, while I agree that bonus depreciation for corporations should be included in an economic stimulus package, this bill provides it for three years. The package is intended to stimulate the economy now, in 2002. Giving a company 30% bonus depreciation in 2003 and 2004 does not help stimulate the economy in 2002. The incentive to invest now, when we need it, is not just missing. In fact, since companies know that this bonus depreciation will be around for three years, they don't need to invest now when the economic picture is still uncertain. The incentive will be reversed—companies can choose to delay investments and still take advantage of the bonus depreciation in 2003 or 2004. A three year bonus depreciation provision therefore could actually encourage businesses to wait to invest, and therefore be counterproductive to the goal of jumpstarting the economy.

Not only is the bonus depreciation provision not stimulative, it is also extremely expensive. This provision will cost us about $97 billion over the next three years at a time in when we are already projected to tap into our Social Security surpluses. That's almost 80% of the three-year cost of this bill in this one provision alone. If we passed bonus depreciation for two years or one year—time periods which may actually encourage immediate investment and stimulate the economy—we would save anywhere between approximately $30 billion to $60 billion in revenue. That's money we could use to help protect Social Security, pay down the debt, pay for a prescription drug benefit, or rebuild some of our nation's crumbling schools. Instead, under the guise of "stimulus," this tax break for corporations will have real impacts long after this recession has ended. That's bad policy, and I cannot support it.

Also, this bonus depreciation provision will severely harm our states at a time when many are facing severe budget shortfalls. The bill is estimated to cost states some $14 billion over the next three years; Michigan will lose an estimated $144 million over the next three years from this bonus depreciation provision. That is money Governor Engler has argued Michigan cannot afford to lose. Instead of stimulating growth in our states, we are making the economic picture worse.

I also have concerns about the five year extension to the Subpart F exceptions concerning foreign subsidiaries of U.S. corporations located in tax havens. While many Subpart F exceptions have a valid business purpose, there are loopholes in the law that are being exploited that allow some corporations to combine the exceptions with the use of tax haven jurisdictions to avoid paying a fair share of taxes. Most extensions in this bill are for no more than two years, but the extension for Subpart F in this bill is for 5 years. That's not appropriate given concerns about loopholes in Subpart F. I had hoped we would have provided the extension for no more than 2 years during which time we would have hearings on this important issue to get to the abuses. Instead, this bill extends the exceptions, unchanged, for five years time at a cost of $9 billion. This issue is something I will continue to pursue. Tightening up Subpart F to prevent it from being used for purposes for which it was not intended requires our prompt attention.

There are some important provisions in this bill. I strongly support the extension of unemployment benefits for an additional thirteen weeks; I support the aid to New York City; and I support the extension of the Welfare to Work and Work Opportunity tax credits. Regarding the extension of unemployment benefits, I voted earlier this year for a bill to accomplish that. Congress should have taken this action months ago. As I have said previously, we have an obligation in times like these to assist Americans who have lost their jobs. Many are suffering right now and need our help. But their needs go beyond just a simple extension of UI benefits. While I am pleased that this bill contains the additional 13 weeks of benefits, it does not go nearly far enough in providing the help that is needed—it does not provide any health care assistance to our unemployed, increase weekly benefits, or expand unemployment insurance eligibility.

Because of this bill's short-term costs, the harm it causes to our states, its lengthy extension of a provision that may be being abused for tax avoidance, and the fact that over 50% of its 10 year costs go to provisions that are not really stimulative to our economy, I cannot support it.

Mrs. CARNAHAN. Mr. President, today I am pleased to vote in favor of legislation that will extend unemployment benefits for workers across America who have lost their jobs since this recession began last March. Congress ought to have acted much sooner. Thousands of people have exhausted their unemployment benefits and have had to resort to extraordinary measures to take care of their families while they look for another job. They should not have had to wait this long for assistance. I am relieved that they will not have to wait any longer.

This bill also provides tax relief to businesses in order to boost the economy and ensure a robust recovery. I have long supported provisions to provide bonus depreciation and net operating loss carry back to businesses. I believe that these steps will help our economic engine create more jobs. This legislation also includes tax provisions that have recently expired or are about to expire. It extends the Welfare to Work tax credit which is so vital to our hopes for renewed economic growth. And it provides tax deductions to construct the infrastructure necessary for the widespread use of renewable fuels such as ethanol.

In addition, I strongly support the measures included in this bill that will contribute to the recovery of New York City. The devastation suffered in lower Manhattan last September will be difficult to overcome. It will take a long time. But all Americans want to see the city reclaim its standing as a proud center of commercial activity. The measures included in this legislation are an important step in that recovery process.

Let me state for the record, I have some reservations about this bill. I do not believe that this is the best stimulus package the Senate has considered this year. I strongly supported the consensus package offered by Senator DASCHLE in January. That bill would have provided tax rebates to those low-income Americans who did not receive them last year. It would have limited the business tax incentives to a shorter timeframe, thereby really promoting investment in the near future. I have also been very supportive of efforts to help unemployed workers secure health insurance for themselves and their families. I am very disappointed that this legislation make no progress on that front.

And most important, Senator DASCHLE's bill included financial assistance to our states that are facing such dire fiscal crises. I supported increasing the Federal matching money for the Medicaid program to help states meet the additional demands for social services that are being placed on them as they respond to the economic downturn. Most states do not have the option of engaging in deficit spending, no matter what the circumstances. Yet the legislation we have before us today will make their job more difficult. Rather than lending a helping hand to states, we have just reduced their tax revenues. I believe this is the largest failing of this bill. And I will continue to work with my colleagues to find ways that we can help states cope with the pressure on their budgets.

In spite of its flaws, I support this compromise legislation. It is not the bill I would have crafted myself, but I believe that every Senator here could make the same statement. this is a compromise. And on balance this legislation will be good for our economy, and is vital for those workers who are still struggling to find new jobs.

Mr. BAUCUS. Mr. President, the Job Creation and Worker Assistance Act of 2002 contains a package of technical corrections to EGTRRA, the tax cut bill we enacted last year. Among these technical corrections is a provision that corrects an unintended drafting error that prevented increased contributions to Simplified Employer Pension plans—also known as SEPs. Congress raised the percentage of compensation limit on all defined contribution plans, but the drafters failed to make the conforming change that would also have raised the percentage of compensation limit on SEP plans by an equal amount. Clearly, we intended to include SEP plans when we raised the compensation limit for defined contribution plans. As a result, this technical correction is entirely appropriate.

There is no doubt this Congress intended for employers who sponsor SEPs for their workers to be able to contribute the maximum annual amount that we authorized under the law. However, we also intend that SEP plans comply with the law just as all other pension plans must.

The Treasury Department has authority under existing law—Internal Revenue Code Section 408(l)(1)—to impose reporting requirements on SEPs. However, such requirements have not yet been implemented through any regulation.

The Internal Revenue Service has indicated many SEP plan sponsors may not be in compliance with rules that require SEP plan contributions be provided to rank-and-file employees along with owners and key employees. Much of this noncompliance may well be the result of the absence of reporting requirements.

The tax subsidy for SEP plans is a substantial one, and under the provisions of EGTRRA and this technical correction, that subsidy will grow significantly.

Had this tax package gone through the usual legislative procedure—including a conference from which a conference report containing legislative history would have emerged—it would have included committee report language urging the Treasury Department to exercise their existing statutory authority under IRC Section 408(l)(1) to impose reporting requirements on SEPs.

In the absence of such a committee report, I urge the Treasury Department to act expeditiously to issue clear, simple SEP reporting requirements so that Congress can be confident that those working for SEP plan sponsors are getting all the pension benefits to which they are entitled.

Ms. CANTWELL. Mr. President, I rise today to impress on my colleagues just how important this legislation is to the workers in the Nation who have borne the weight of this recession that was so exacerbated by the September 11 incidents.

My colleagues have heard me say this again and again, but the Pacific Northwest has suffered extraordinarily in the past year. My State of Washington now has the dubious honor of having the second highest unemployment rate in the Nation, behind our neighboring State Oregon.

We had a seasonally adjusted unemployment rate of 7.5 percent in January—and the insured unemployment rate is above 5 percent.

I have analysts in my State who foresee a wave of layoff notices in the pipeline and estimate that the State is going to hit 8 percent unemployment when the February numbers come out later this month.

Why is this the case? Well, we have a number of factors at work. I would like to give my colleagues a better understanding of the economic circumstances affecting my State.

Even prior to the tragic events of September 11 and even prior to the recession that may have begun in the early months of last year, Washington's economy was facing hurdles.

We have seen significant layoffs in aluminum, agriculture, and high technology—due to persistent droughts, the high cost of energy, massive reductions in timber harvests, and declining export markets.

My State is the most trade dependent State in the Nation on a per-capita basis, and September 11 had a devastating impact on the aviation industry. In October, the Boeing Company announced that it will lay off an estimated 30,000 commercial division workers. Approximately 80 percent of those workers are located in the State of Washington.

The first layoff of Boeing workers—nearly 4,000—occurred on December 14, and the company set a schedule of layoff notices for the following months that predicted twelve-to-fourteen hundred job cuts per month through June of this year.

But it does not stop there. We have seen from previous recessions that when a Boeing worker is laid off, approximately two more jobs are lost further down the supply line.

So where does that leave us? When all is said and done, we will probably have at least 40,000 layoffs in our State that will be attributable to the events surrounding September 11. Some projections suggest that the number may go as high as 65,000.

I mentioned previously our statewide unemployment rate of 7.5 percent, but even more unsettling is the fact that 14 of Washington's 39 counties have unemployment rates above 10 percent. In Ferry County, we are facing 15.1 percent unemployment. That same figure is 13.3 percent in Franklin County, 16.8 percent in Adams, 12.1 in Chelan, 11.5 percent in Grays Harbor, and the topper is 17.1 percent in Klickitat.

If this is not an emergency, I do not know what is.

That is why we have insisted, for months now that the Senate pass a simple unemployment insurance extension of at least 13 weeks.

It is extremely disconcerting for me to know that so many workers displaced after September 11 have already reached or are nearing the end of their benefits eligibility. Since September 11, about 1.3 million workers have exhausted their unemployment benefits throughout this Nation. In Washington State alone, more than 42,000 workers exhausted UI claims from September 11 through the beginning of March.

And at the same time, heavily affected States and workforce areas throughout this Nation are running out of training dollars.

That is why I and my colleagues have fought for emergency training dollars; that is why we have fought against cuts in WIA funding that were proposed in budget; and why we have fought for this temporary extension in UI benefits.

This is about giving workers a chance to get back on their feet. It should also be our priority to invest in training those workers, so that we'll be ready with the highest-skilled workforce when we get the economy jumpstarted again.

My State has taken an aggressive approach to retraining our workforce, and has invested State dollars to provide the necessary support for displaced workers to put food on the table while they get skills training.

This is the direction that our Nation should be heading—and it is one that we should be encouraging as we finally take this step to get the federal aid to the States. With the help of the majority leader in February, we were able to pass a clean 13-week unemployment benefit extension that took into account the unique situation of States that have aggressively worked to provide more substantial benefits for displaced workers. The majority leader and his staff have been tremendously helpful in recognizing these concerns and ensuring that we were providing the maximum assistance to all States.

I want to be clear, I am extremely pleased that the House has finally come to the conclusion that workers are desperate for this 13-week federal support, and has finally set politics aside to do the right thing for our workers, and our Nation as a whole.

I have worked to ensure that the language of this legislation is consistent with the extended benefits offered by our State—so that one of the most heavily impacted States in the Nation is able to fully benefit from what we are doing today.

I understand that the Department of Labor has promised to provide a letter of interpretation of the House-passed legislation that is expected to clarify these issues, and specifically, the technical order of benefits that workers will be expected to receive. I urge the Secretary to get this assurance to us immediately, so that our State can plan to meet the needs of workers who have exhausted or will soon exhaust their benefits.

It was my intent, and I understand it was the expressed intent of the drafters in the House, to provide the 13-week temporary federal UI benefit immediately after the expiration of regular State unemployment insurance benefits—which is typically 26 weeks.

While I am disappointed that the House language is not explicitly clear on this matter, as was the Senate bill, I am pleased to hear that the Department understands our intent and will reportedly carry out these provisions in keeping with that intent.

I will be watching to ensure that the Secretary follows through on this commitment and puts the Department's priority where it should be—on providing as much assistance as possible to the areas of this Nation that desperately need it—and to provide it in a timeframe that truly reflects the urgency of the situation.

Again, I appreciate the phenomenal work of the majority leader and the entire Senate in doing its work on this bill months ago; and now that the House has finally come to the table, I urge that we move quickly to get it enacted and get extended benefits out to workers who need it most.

Finally, I will add that I am pleased with the targeted business tax incentives contained in this stimulus package. By providing both bonus depreciation for capital investments, and increased write-offs for business losses, we encourage economic expansion and development. By giving workers the resources to invest in themselves through training, education and health care, we provide the means for this expansion.

Additionally, I am pleased that this package contains the so-called tax extenders that promote research and development across so many industries in our country.

The country is at an economic crossroads and the choices we make today will affect us for years. We must maintain our fiscal discipline and invest in the nation's future business, education and worker needs.

The package we are approving today invests in the next generation of our economy as businesses recover from the weakened economy.

ECONOMIC STIMULUS IN THE NORTHWEST

Mrs. MURRAY. Mr. President, I rise today with my colleague from the State of Washington to impress on this body just how important elements of this legislation are to the workers in the Pacific Northwest and the Nation.

As my colleagues know, Washington and Oregon have the highest unemployment rates in the Nation right now.

The economy of the Northwest has been struggling for some time and September 11 only made things worse.

Last year, Boeing, Washington's largest employer, announced they would be cutting 30,000 jobs within a year. Most of those jobs would be out of Washington State. To date, 10,000 dedicated Boeing workers have been handed their pink slips. That number doesn't include the thousands of jobs that are being lost by those dependent on Boeing.

Washington State is also a high-tech dependent State. The downturn in that sector has left many in the Northwest without a job.

These massive lay-offs, uncertainty in the economy, and fear of another terrorist attack have crippled the economies of the Northwest.

We are expecting that the layoffs may reach 40 to 65,000 by the end of this year.

So the importance of the legislation is paramount—but the devil's in the details—and so we have worked to make sure that the language passed by the House will provide the maximum stimulus possible to workers throughout this Nation.

My colleague, Senator CANTWELL, has been diligent in monitoring this legislation and we have worked in tandem to ensure that States in such great need do not have their support decreased because those States have proactively made efforts to provide extended benefits to workers in advance of the passage of this legislation.

I understand that the majority leader has agreed to engage in a colloquy on this matter with myself and Senator CANTWELL so that we may clarify that the legislation will, in fact, have it's intended stimulative impact on our State.

At this time, I yield back to the majority leader and look forward to his response.

Ms. CANTWELL. If the majority leader yield for a question, I thank the majority leader and my colleague Senator MURRAY.

I am pleased to join her in support of this legislation.

My colleague shares my concern over the serious situation in our State and throughout the Northwest. In Washington State alone 42,070 workers exhausted UI claims from September 11 through the beginning of March; and 14 of Washington's 39 counties have unemployment rates above ten percent.

If this is not an emergency, I do not know what is.

That's why we have insisted for months now that the Senate pass a simple unemployment insurance extension of at least 13 weeks.

But, we do want to make explicitly clear how the bill will conform with state laws providing extended benefits, so that we preserve the intended purpose of this legislation.

I cannot emphasize enough how pleased this Senator is to have this legislation finally approaching enactment. I am extremely pleased that the House has finally come to the conclusion that need this 13-week Federal support, and has finally decided to do the right thing for our workers, and our nation as a whole.

But we have meticulously worked to ensure that the language of this legislation would conform with the extended benefits offered by our State, so that one of the most heavily impacted States in the nation is able to fully benefit from what we're doing today.

The distinguished majority leader worked very hard with us last year and earlier this year to craft language that would achieve this purpose. The language passed by this body in February made very clear that the temporary federal benefits would begin immediately after the 26th week, across the board. The UI provision is crafted in a less clear manner in the House bill, but I am aware that the House Ways and Means chairman yesterday expressed his intent in drafting that language that the federal benefit would begin before wholly State-financed benefits.

We understand that the Department of Labor has promised to provide a letter of interpretation of the House-passed legislation that is expected to clarify these issues, and specifically, the technical order of benefits that workers will be expected to receive. This Senator urges the Secretary to get this assurance to us immediately, so that States can adequately plan to meet the needs of workers who have exhausted or will soon exhaust their benefits.

While I am disappointed that the House language is not explicitly clear on this matter, as was the Senate bill, I am pleased to hear that the Department understands this intent and will interpret the language accordingly.

We will closely be watching to ensure that the Secretary follows through on this commitment and puts the Department's priority where it should be—on providing as much assistance as possible to the areas of this Nation that desperately need it—and to providing it in a time frame that truly reflects the urgency of the situation.

Again, I appreciate the phenomenal work of the majority leader and the entire Senate in doing its work on this bill months ago; and now that the House has finally come to the table, I urge that we move quickly to get it enacted and get extended benefits out to workers who need it most.

At this time I ask the distinguished majority leader if it is his understanding that the intent of this legislation was to provide a Federal benefit immediately after regular state UI benefits, and I will yield back for his response.

Mr. DASCHLE. The Senator is exactly right, that is the intent of the legislation.

As I understand it, the House chairman did clarify yesterday that his intent in drafting the legislation conformed to the Senator's view that the federal benefit start before any state-financed extended benefit.

As the Senators from Washington know, the Senate put forward a bill in February that provided a simple 13-week extension to all States, which would begin immediately after the exhaustion of regular UI benefits.

There are a number of States that did act in providing State-financed extended benefits before the House finally agreed to send us this compromise legislation, and those States deserve the maximum federal benefit.

This is about giving workers a chance to get back on their feet.

We have worked hard to recognize the technical concerns of the Senators from Washington and ensure that we were providing the maximum assistance to all States.

So I will say clearly that it was the Congress' intent to provide the federal benefit immediately after regular UI and I will work with the Senators to ensure that the Department conforms with that intent.

INCOME FORECAST METHOD

Mr. DASCHLE. Mr. President, I would like to engage in a brief colloquy with the distinguished chairman and ranking member of the Finance Committee, Senator BAUCUS and Senator GRASSLEY, regarding a tax issue that I had hoped to clarify as part of this legislation, which will have serious economic ramifications for several important industries.

Recently, some uncertainty has arisen regarding the proper tax treatment of residuals and participations under the income forecast method of depreciation. I would ask the distinguished chairman and ranking member if they could clarify this issue.

Mr. BAUCUS. In 1993, the United States Court of Appeals for the Ninth Circuit held in Transamerica Corporation v U.S. that, for purposes of the income forecast depreciation method, the anticipated cost of participations and residuals should be included in a property's cost basis at the beginning of the property's depreciable life.

As the Ninth Circuit determined in Transamerica, inclusion of participations and residuals in a property's initial cost basis is necessary to properly match the income and expenses associated with the property and to clearly reflect income. Yet, it is my understanding that the IRS is not currently permitting such treatment. To eliminate the current uncertainty, Senator GRASSLEY and I have encouraged Treasury to consider regulations clarifying that participations and residuals may be included in a property's initial cost basis for purposes of the income forecast method of depreciation.

Mr. GRASSLEY. I agree with Senator BAUCUS. Excluding participations and residuals from a property's initial depreciable cost basis under the income forecast method results in a mismatching of income from the property and the expenses incurred in producing the property. The Ninth Circuit reached this conclusion in Transamerica. Moreover, I would note that including participations and residuals in the initial depreciable cost basis is consistent with industry standards in computing income for financial accounting purposes. We should remove this uncertainty to avoid needless disputes and to ensure the accurate reflection of taxpayers' income.

Mr. DASCHLE. I want to thank both of my distinguished colleagues for this important clarification. I understand that Treasury is considering this issue currently as part of its 2001 Priority Guidance Plan. For the record, I would note that Senators BAUCUS and GRASSLEY previously sent a letter to Treasury Secretary O'Neill asking him to consider regulations that eliminate the current uncertainty by clarifying that participations and residuals may be included in a property's initial cost basis for purposes of the income forecast method of depreciation. I agree with my colleagues and urge Treasury to issue such regulations.

Mr. BREAUX. Mr. President, I completely agree with the previous colloquy of my distinguished colleagues on the income forecast method of depreciation. The motion picture industry presently is facing a legal cloud that has serious economic implications for the industry. The cloud concerns the tax treatment of residual and participation payments under the income forecast method of accounting, the predominant method of accounting for the industry.

In 1993, the Ninth Circuit held in Transamerica Corporation v U.S. that participations and residuals are included in the initial cost basis of a property for purposes of the income forecast method. Yet, despite this clear result, I understand that the Internal Revenue Service is beginning to challenge that treatment. Simply put, this is wrong—as a matter of law, as a matter of policy, and as a matter of fairness.

The Transamerica decision continues to remain the proper result under present law. As the Transamerica Court found, the inclusion of participations and residuals in the film's costs is necessary in order to match income and expenses property and to clearly reflect income.

I believe we must quickly lift this cloud of uncertainty from one of our most critical industries. I am in agreement with my colleagues that Treasury should issue regulations which eliminate the current uncertainty this year as part of its 2001 Priority Guidance Plan.

CLARIFICATION REGARDING THE FIVE-YEAR CARRYBACK OF NET OPERATING LOSSES

Mr. HATCH. Mr. President, the Job Creation and Worker Assistance Act of 2002, being considered by the Senate today, contains an important provision to extend the general net operating loss ("NOL") carryback provision to 5 years (from 2 years) for NOLs arising in taxable years ending in 2001 and 2002. The Joint Committee on Taxation's Technical Explanation of the Act contains a footnote indicating that the NOL provision "does not affect the terms and conditions that the Internal Revenue Service may impose on a taxpayer seeking approval for a change in its annual accounting period."

I want to clarify with the distinguished chairman of the Finance Committee, Senator BAUCUS, that this footnote was not intended to limit the Internal Revenue Service's authority to alter or modify the terms and conditions that may have been imposed on taxpayers that had already received permission to change accounting periods, particularly under circumstances where the events of September 11, 2001, have resulted in unanticipated and severe hardships, and the waiver or modification would not result in the planning activity that the NOL Condition was intended to prevent.

Specifically, I want to clarify that the IRS has authority to permit an NOL incurred in a short taxable year to be carried back notwithstanding that the taxpayer may have agreed as a condition to securing the change to carry over the NOL only to future years.

Mr. BAUCUS. I would agree that the relevant footnote merely restates the

Internal Revenue Service's present authority, and is not intended to limit that authority in cases where modification of an approval is sought, and such a modification would be consistent with the government's overall response to September 11.

AIRCRAFT

Mr. BROWNBACK. Mr. President, I would like to engage my colleagues, Senator BAUCUS and Senator GRASSLEY in a colloquy. I have a question regarding the special depreciation allowance provisions of H.R. 3090, the "Job Creation and Worker Assistance Act of 2002." Do the depreciation provisions in the bill cover all aircraft?

Mr. BAUCUS. It is our intention to cover all types of aircraft, including commercial, chartered, privately-owned, or crop-dusting aircraft, to the extent the aircraft is otherwise eligible for depreciation.

Mr. GRASSLEY. I agree with Senator BAUCUS' remarks. These special depreciation allowance provisions are intended to cover all aircraft.

Mr. BROWNBACK. I thank my colleagues for that clarification.

HATE CRIMES: WHY WE CAN'T WAIT

Mrs. FEINSTEIN. Mr. President, if you were to walk past the driveway at 222 West Micheltorena Street in Santa Barbara, California today you would see a makeshift memorial of flowers and candles. On a tree nearby, you would also see a note that reads, "United We Stand. Never be forgotten. Always to be loved. A symbol of silence that needs to be broken."

That memorial has been erected outside the home of Clinton Scott Risetter, 37, the victim of a hate crime.

On February 24, 2002, Clint Risetter awoke in his apartment engulfed in flames and then tried to escape as he was burning. When firefighters arrived, they found him dead on his patio. Two days later, Martin Thomas Hartmann walked into the Santa Barbara Police Department and admitted to entering Clint's apartment, pouring gasoline on him as he slept, and then setting him on fire.

Martin Hartmann had known Clint for several months but had learned just recently that Clint was gay. He told police about his hatred toward gays and how he ". . . decided to put [Clint] out of his misery," because he was gay. He believed that he was doing the right thing and that Clint deserved to die.

The note on the tree outside Clint Risetter's apartment expresses not only the views of its author, but also the views of the more than 500 people that joined together Monday night in Santa Barbara to light candles in a vigil for Clint. One of the vigil's attendees, Russ Chaffin, said, "I can't be silent. This is my community. I cannot stand it that something like this could happen in my community."

I simply cannot stand silent when such a violent act is committed against an innocent person. I was deeply saddened and disturbed to hear the horrific details of Clint's death. It's hard for me to imagine a more heinous act of hatred than to set another human being on fire. Unfortunately, Clint's death is characteristic of many hate crimes in America; where an attacker repeatedly beats, stabs or severely burns his victim as if he is removing whatever it is he hates out of the person. And the attacker feels justified in doing so, as if he is doing a great service to humanity by killing the person.

In California, I have seen, first-hand, the devastating impact hate crimes have on victims, their families and their communities. A hate crime divides neighborhoods and breeds a sense of mistrust and fear within a community, just like it has in Santa Barbara. This is why I have long supported legislation aimed at protecting citizens from crimes based on race, ethnicity, religion, gender, disability, or sexual orientation.

According to the FBI's latest statistics, hate crimes based on sexual orientation rose every year between 1994 and 2000. Yet, current Federal hate crimes law does not include crimes against others because of sexual orientation. It only covers crimes motivated by bias on the basis of race, color, religion or national origin. The current law also limits Federal hate crime prosecutions to instances in which the victim was targeted because he or she was exercising one of six narrowly defined federally-protected activities, such as serving on a jury, voting, attending a public school, eating at a restaurant or lodging at a hotel.

The limitations of current law prevent it from reaching many cases where individuals are killed or injured by just walking down the street, or, as we have now seen, even sleeping in their own homes. It does not extend basic civil rights protections to every American, only to a few and under certain circumstances. Updating the current law would not provide special rights, it would ensure equal protection.

"The Local Law Enforcement Act of 2001," legislation of which I am an original cosponsor, would expand current Federal protections against hate crimes based on race, color, religion, and national origin; amend the criminal code to cover hate crimes based on gender, disability, and sexual orientation; authorize grants for State and local programs designed to combat and prevent hate crimes; and enable the federal government to assist State and local law enforcement in investigating and prosecuting hate crimes.

Final passage of "The Local Law Enforcement Act of 2001," is long overdue. It is necessary for the safety and well being of millions of Americans. No American should have to live in fear because of his or her disability. No American should be afraid to walk down the street for fear of a gender-motivated attack. And certainly, no American should be afraid to sleep in their own home because of his or her sexual orientation.

We have had strong bipartisan support for this legislation in the past, and it continues to receive bipartisan support. We just have not been able to get it to the President's desk for his consideration. Today, I ask all of my colleagues to work to ensure that this legislation is not simply supported, but actually gets passed and signed into law. Let's send a signal to Clint Risetter's family, and to all Americans, that our nation will no longer turn a blind eye to hate crimes in this country.

CONFIRMATION OF SHERIFF STEPHEN FITZGERALD TO BE U.S. MARSHAL FOR THE WESTERN DISTRICT OF WISCONSIN

Mr. KOHL. Mr. President, I rise today in support of the confirmation of Sheriff Stephen Fitzgerald to be United States Marshal for the Western District of Wisconsin.

Sheriff Fitzgerald's qualifications for this position are impressive. He has served as the Sheriff of Dodge County since 1989 and as a detective and patrol officer with the Chicago Police Department before seeing the light and moving to the greener pastures of Wisconsin to continue his lifelong devotion to law enforcement and public service.

Sheriff Fitzgerald received a unanimous vote of the Judiciary Committee yesterday and deserves the support of the full Senate today. We look forward to his service to the Western District of Wisconsin.

FLORIDA'S 2002 OLYMPIC MEDALISTS

Mr. NELSON of Florida. Mr. President, I rise today to recognize five athletes who recently represented our Nation at the 19th Winter Olympic Games in Salt Lake City.

While the accomplishments of these competitors are exceptional by any measure, this group deserves special recognition; that's because Garrett Hines, Derek Parra, Jennifer Rodriguez, Brian Shimer and Chris Thorpe are Floridians. For the record, Florida sees snow a little more often than once every ice age, and the State's highest mountain is but a bunny hill compared to the terrain these athletes saw in Utah.

Nevertheless, these five Floridians won seven medals in the luge, the bobsled and on the speed skating oval.

Garrett Hines, along with teammate Randy Jones, became the first black

American males to win a medal in the Winter Olympics, as the United States took silver in the four-man bobsled. Garrett is the pride of Sanford, FL, and I'd like to wish him luck in his future endeavors.

Similarly, Derek Parra achieved a barrier-breaking milestone, becoming the first Hispanic American to medal in the Winter Olympics as he won both a gold and silver in speed skating.

These two pioneers have left a lasting mark on their sports, and I am proud to call them Floridians.

Also, Jennifer Rodriguez, known as "Miami Ice," showed the world that South Florida has a place on the Winter Olympic map. After becoming the first Hispanic American to compete for the United States Winter Olympic Team during the 1998 Games in Japan, Rodriguez not only competed in Salt Lake City, she won two speed skating bronze medals.

Brian Shimer continued the South Florida success, as the Naples native took home a bronze in the four-man bobsled. This five-time Olympian had never before won a medal, but as the driver in this year's bronze medal winning sled, he has realized a career-long goal.

Finally, Daytona Beach resident Chris Thorpe, added a bronze medal in doubles luge to the silver he won four years ago in the Nagano Games. Chris has said this will be his last Olympics, and I'd like to wish him luck as he finishes his undergraduate degree at the University of Florida, Gainesville.

I applaud the commitment these athletes have shown in reaching the pinnacle of their respective sports, and I hope their willingness to sacrifice and their determination to succeed motivates all Americans to exceed expectations and achieve the extraordinary.

I would ask to have printed in the RECORD the names and hometowns of these five athletes, along with the events they competed in and the medals they won. This group is a portrait of diversity, and as representatives of Florida and America, they have made us all very proud.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

FLORIDA MEDALISTS AT THE 19TH WINTER OLYMPIC GAMES

Garrett Hines, Orlando, FL, Silver, Bobsled, Four-man; Derek Parra, Orlando, FL, Gold, Speed skating, 1,500 meters, Silver, Speed skating, 5,000 meters; Jennifer Rodriguez, Miami, FL, Bronze, Speed skating, 1,000 meters, Bronze, Speed skating, 1,500 meters; Brian Shimer, Naples, FL, Bronze, Bobsled, Four-man; Chris Thorpe, Daytona Beach, FL, Bronze, Luge, Doubles.

IN MEMORY OF HOWARD CANNON

Mr. HOLLINGS. Mr. President, I want to remember our friend, and outstanding former chairman of the Commerce Committee, Howard Cannon. I had the good fortune to serve with Senator Cannon for most of his four terms, and what set him above in my eyes was that he came from the school that the Senate is an institution where people get things done. Had it not been for this courageous vote to end a filibuster in 1964, the landmark civil rights legislation that has so dramatically changed this country would never have gotten to the Senate floor.

It is almost 20 years since he left the Commerce Committee, and I find his shoes are still difficult to fill. We called him Mr. Aviation because he ended 40 years of federal control over the airlines. Had it not been for his interest in water projects and basic infrastructure, Las Vegas would not have had the phenomenal growth it has seen.

No question, it is hard to find a Senator in the last half century whose loyalty to his convictions has made more lasting contributions to our nation and to his state. We will miss him.

My wife Peatsy, and I want to express our deepest sympathy to his charming wife, Dorothy, and to their family.

ADDITIONAL STATEMENTS

LOCAL LAW ENFORCEMENT ACT OF 2001

• Mr. SMITH of Oregon. Mr. President, I rise today to speak about hate crimes legislation I introduced with Senator KENNEDY in March of last year. The Local Law Enforcement Act of 2001 would add new categories to current hate crimes legislation sending a signal that violence of any kind is unacceptable in our society.

I would like to describe a terrible crime that occurred July 10, 1999 in Anchorage, AK. A gay man, Alexander Paul Nicholai, 45, was stabbed to death in his apartment. The attacker, Kenneth J. Washington, 21, who claimed he was defending himself against unwanted sexual advances, was charged with first-degree murder in connection with the incident.

I believe that government's first duty is to defend its citizens, to defend them against the harms that come out of hate. The Local Law Enforcement Enhancement Act of 2001 is now a symbol that can become substance. I believe that by passing this legislation, we can change hearts and minds as well.•

THE IMPORTANCE OF ENFORCING GUN LAWS

• Mr. LEVIN. Mr. President, sadly another gun tragedy occurred in my State this past Tuesday in Mount Pleasant, MI when three people were shot and killed allegedly by the ex-husband of one of them. According to a Detroit Free Press article, the man had a recent domestic violence conviction. This case illustrates the importance of closing the loopholes in our gun laws and preventing domestic violence offenders from owning firearms.

According to a Violence Policy Center analysis, a woman is 14 times more likely to be murdered by a spouse, intimate acquaintance or close relative if there was a history of domestic violence. Having one or more guns in the home makes a woman more than seven times more likely to be the victim of homicide.

Current law prohibits the possession of firearms by any person convicted of a misdemeanor crime of domestic violence and prohibits the sale of any firearm or ammunition to a person convicted of domestic violence. But we have to do more to prevent women from being victims of gun violence.

First, we must continue to fund the National Criminal History Improvement Program, which assists States in compiling criminal records and establishing identification systems for Brady gun background checks. In addition, we need to act now to close the gun show loophole and keep domestic abusers and other criminals from buying weapons at gun shows. These critical steps will help make America safer by ensuring that the criminal background information is accurate and accessible and make it tougher for those with a domestic violence conviction to obtain a firearm by easily bypassing a background check.•

IN HONOR OF HADASSAH'S 90TH ANNIVERSARY

• Mr. CORZINE. I rise today to pay tribute to Hadassah, the Women's Zionist Organization of America, on the occasion of their 90th anniversary. Founded in 1912 by Henrietta Szold and a small study circle of American women, Hadassah was committed to bringing modern health care to the Holy Land. It has since grown to become the largest Jewish and largest women's membership organization in the nation.

In 1913, this fledgling organization sent two public health nurses to Jerusalem to set up a maternity clinic and treatment center for women and children. A short 27 years later, Hadassah established the Hadassah Hospital on Mt. Scopus. Since that auspicious milestone, Hadassah has become a leading force in providing for Israel's medical needs, opening various clinics across the country and a new center of medical excellence, the world-renowned Ein Karem Hospital. I had the chance to personally visit the Hadassah facilities when I was in Israel last August, and to see first hand the care and compassion that are provided on a daily basis to anyone in need regardless of race, color, creed, or national origin. Hadassah hospitals, in addition to serving as a model of peaceful coexistence in the Middle East, provide state-of-the-art health services ranging from emergency attention to long-term care to more than 600,000 patients a year.

As its first national domestic effort, Hadassah women sold $200 million in World War II bonds—a remarkable accomplishment by any standard. After Pearl Harbor, Hadassah mobilized its members to aid the war effort by beginning a blood bank and donating supplies. Their work continues in the United States through voter registration drives, grassroots advocacy on United States-Israel relations, volunteering in domestic violence shelters, and numerous other humanitarian efforts.

Another key component of Hadassah's mission is education. Through the College of Technology, the Career Counseling Institute, and Youth Villages, and in the United States through Young Judaca and the Hadassah Leadership Academy, they accomplish their goal to provide the people of Israel with quality educational programs and learning opportunities.

Ninety years later, the Hadassah Foundation remains true to its original mission and is dedicated to—improving the status, health and well being of women and girls; bringing their contributions, issues and needs from the margins to the center of Jewish concern; and encouraging and facilitating active participation in decisionmaking and in leadership in all spheres of life. Their strength comes from action. And their actions bring to their sisters, to their homeland, and to our Nation the precious gifts of health, education, and the power of hope. As Hadassah looks toward the next century, they see continued pioneering, continued progress, and continued innovation in health care in Israel, while continuing to share their knowledge and experience for the benefit of mankind.

For the services they have provided to Israel and across the globe, and for their dedication to the well-being of their community, I offer my sincere congratulations to Hadassah for 90 years of providing the adage that together we can make a difference and together we can change people's lives. Shalom!●

TRIBUTE TO THE HEROISM OF ISAAC HO'OPI'I

● Mr. AKAKA. Mr. President, it is with great pride that I come to the floor today to speak about the courageous and heroic acts of a dear friend and constituent, Defense Protective Service Officer Isaac Ho'opi'i. I have always said that Hawaii is a unique place not because of its beauty, but because of its people. The people of Hawaii share a special attitude, which has been referred to as the "Aloha spirit." Aloha in Hawaiian has a number of meanings, including love. The Aloha spirit can best be explained as the love of others and is illustrated through acts of kindness. Isaac Ho'opi'i exemplifies and lives the Aloha spirit.

I rise today to honor the actions of Officer Isaac Ho'opi'i, who was awarded the Office of Secretary Medal of Valor for his efforts in responding to the tragedy at the Pentagon on September 11, 2001. There have been a number of news articles and television segments recounting Isaac's heroic actions in the wake of tragic events at the Pentagon on September 11.

Isaac is most well-known as "the voice" in the dark smoke, moments after Flight 77 crashed into the Pentagon, calling for anyone who was in the blackened, smoke-filled corridors to come toward his voice. Seven people responded to his calls to head toward his voice and were guided safely out of the burning Pentagon on September 11. Isaac also physically carried at least eight individuals out of the burning building on that fateful day. He and his K-9 partner, Vito, worked 36 hours straight immediately after the plane crashed into the Pentagon—they have continued on 12-hour shifts since.

I was honored to attend the Medal of Valor ceremonies on Tuesday afternoon at the Pentagon. I witnessed Isaac receiving the Medal of Valor, the highest award in the Department of Defense for a civilian. 38 other individuals also received the award on Tuesday, and I salute their brave acts as well.

Isaac, born and raised in Hawaii, has lived in Washington, D.C., for the past twelve years and has spent the last five years as a member of the Defense Protective Service. I have known Isaac for over 12 years. I first met him when I was a member of the House of Representatives. My family and I have spent time with Isaac and his family, his wife Gigi, and their children, Emily, Bess, and Jeff, on many occasions.

When I spoke to him after September 11, and discussed his split-second decision to respond to the burning Pentagon with little concern for his personal safety, I asked him how he felt. He modestly discounted his heroic actions. I was told by others that Isaac felt badly after September 11, because he felt that he should have been able to help more people. I am sure that those 15 people who he personally helped out of the Pentagon, and their families, are very thankful for his quick thinking and willingness to risk his life. His own wife and family had no idea about his safety on September 11, because of his immediate response to the site.

Isaac is a man who is always willing to help others. During the awards ceremony, Mr. Paul Haselbush, Director of the Real Estate and Facilities Directorate, mentioned a letter he received from a woman who had been stranded on the road with a flat tire for three hours in the cold. She wrote to the Department of Defense to thank the Defense Protective Service for the actions of Officer Isaac Ho'opi'i, who saw her stranded on the road, stopped to help her, and fixed her flat tire. When she saw his name, she recognized Isaac as "the voice" that she had read about in the newspaper who had saved some of the people in the Pentagon on September 11th.

In November of last year, Isaac went home to Hawaii for a family vacation. Isaac took one week of his vacation to talk to students in schools, not about his heroic acts, but about the events of September 11th and to answer their questions about why terrorists would attack the United States. I asked Isaac why he spoke with the students. He told me that he wanted to inspire them to reach out for their goals and dreams—that if he, a Native Hawaiian boy raised in Waianae could move to Washington, D.C., become successful by helping others and sharing the Aloha Spirit, they could all do the same. He told me if he just reached one student his time would have been spent well. Isaac reached more than one student. He has received a number of letters from the students he spoke to during his trip to Hawaii.

On Tuesday, when I told Isaac that I was so very proud of him, he smiled, and told me that he was just trying to be a good Hawaiian and to share the spirit of Aloha. Isaac Ho'opi'i is indeed a wonderful man, a wonderful American, and his actions reflect the Aloha Spirit, the essence of the people of Hawaii. It is with great pride that I congratulate Isaac Ho'opi'i and the other 38 recipients of the Medal of Valor for their courageous acts on September 11, 2001.●

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second times by unanimous consent, and referred as indicated:

By Mr. WELLSTONE (for himself, Ms. COLLINS, Mr. KENNEDY, Mr. DEWINE, and Mr. BAYH):

S. 2002. A bill to ensure that victims of domestic violence get the help they need in a single phone call, and for other purposes; to the Committee on Health, Education, Labor, and Pensions.

By Mr. NELSON of Florida (for himself, Mr. MCCAIN, Ms. LANDRIEU, Mr. CONRAD, Mr. BINGAMAN, Mr. BREAUX, and Mr. JOHNSON):

S. 2003. A bill to amend title 38, United States Code, to clarify the applicability of the prohibition on assignment of veterans benefits to agreements regarding future receipt of compensation, pension, or dependency and indemnity compensation, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. DODD (for himself, Mr. CORZINE, Ms. STABENOW, Mr. JOHNSON, and Mrs. BOXER):

S. 2004. A bill to improve quality and transparency in financial reporting and independent audits and accounting services, to designate an Independent Public Accounting Board, to enhance the standard setting process for accounting practices, to improve Securities and Exchange Commission resources and oversight, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. DASCHLE (for himself and Mr. LOTT):

S. Res. 222. A resolution commending and supporting the troops; considered and agreed to.

By Mr. BIDEN (for himself, Mrs. BOXER, Mr. DODD, Mrs. CLINTON, Ms. CANTWELL, Mr. CARPER, Mrs. MURRAY, Ms. LANDRIEU, Ms. COLLINS, Mr. FEINGOLD, Mr. KOHL, Mr. HATCH, Mr. BREAUX, Ms. STABENOW, Mr. SCHUMER, Mr. SPECTER, Mr. SARBANES, Mr. WELLSTONE, Mr. KENNEDY, Ms. SNOWE, Mrs. FEINSTEIN, Mr. SMITH of Oregon, Mr. BAYH, Ms. MIKULSKI, Mrs. LINCOLN, Mrs. CARNAHAN, Mr. LEVIN, Mrs. HUTCHISON, Mr. JEFFORDS, Mr. DURBIN, Mr. MURKOWSKI, Mr. DOMENICI, Mr. AKAKA, Mr. KERRY, Mr. STEVENS, Mr. BURNS, and Mr. BINGAMAN):

S. Res. 223. A resolution designating March 8, 2002, as "International Women's Day"; considered and agreed to.

By Mr. JOHNSON (for himself, Mr. DORGAN, Mr. NELSON of Nebraska, Mr. CONRAD, Mr. BINGAMAN, Mr. BAUCUS, Mr. DASCHLE, Mr. CAMPBELL, and Mr. FEINGOLD):

S. Res. 224. A resolution designating September 6, 2002, as "National Crazy Horse Day"; to the Committee on the Judiciary.

ADDITIONAL COSPONSORS

S. 121

At the request of Mrs. FEINSTEIN, the name of the Senator from Ohio (Mr. VOINOVICH) was added as a cosponsor of S. 121, a bill to establish an Office of Children's Services within the Department of Justice to coordinate and implement Government actions involving unaccompanied alien children, and for other purposes.

S. 1761

At the request of Mr. DORGAN, the name of the Senator from South Dakota (Mr. JOHNSON) was added as a cosponsor of S. 1761, a bill to amend title XVIII of the Social Security Act to provide for coverage of cholesterol and blood lipid screening under the medicare program.

S. 1860

At the request of Mr. DORGAN, the names of the Senator from South Dakota (Mr. DASCHLE), the Senator from South Dakota (Mr. JOHNSON), and the Senator from North Dakota (Mr. CONRAD) were added as cosponsors of S. 1860, a bill to reward the hard work and risk of individuals who choose to live in and help preserve America's small, rural towns, and for other purposes.

S. 1899

At the request of Mr. BROWNBACK, the name of the Senator from Wyoming (Mr. ENZI) was added as a cosponsor of S. 1899, a bill to amend title 18, United States Code, to prohibit human cloning.

S. 1991

At the request of Mr. HOLLINGS, the name of the Senator from Maryland (Mr. SARBANES) was added as a cosponsor of S. 1991, to establish a national rail passenger transportation system, reauthorize Amtrak, improve security and service on Amtrak, and for other purposes.

S. 1992

At the request of Mr. KENNEDY, the name of the Senator from Connecticut (Mr. LIEBERMAN) was added as a cosponsor of S. 1992, a bill to amend the Employee Retirement Income Security Act of 1974 to improve diversification of plan assets for participants in individual account plans, to improve disclosure, account access, and accountability under individual account plans, and for other purposes.

S. RES. 132

At the request of Mr. CAMPBELL, the name of the Senator from Arkansas (Mr. HUTCHINSON) was added as a cosponsor of S. Res. 132, a resolution recognizing the social problem of child abuse and neglect, and supporting efforts to enhance public awareness of it.

AMENDMENT NO. 2979

At the request of Ms. LANDRIEU, her name was added as a cosponsor of amendment No. 2979 proposed to S. 517, a bill to authorize funding the Department of Energy to enhance its mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, and for other purposes.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. WELLSTONE (for himself, Ms. COLLINS, Mr. KENNEDY, Mr. DEWINE, and Mr. BAYH):

S. 2002. A bill to ensure that victims of domestic violence get the help they need in a single phone call, and for other purposes; to the Committee on Health, Education, Labor, and Pensions.

Mr. WELLSTONE. Mr. President, today along with Senators COLLINS, KENNEDY, DEWINE and BAYH, I am proud to introduce the National Domestic Violence Hotline Enhancement Act. Modeled after the Day One project in Minnesota, the Act would create a web site that would allow National Domestic Violence Hotline operators, shelter based advocates and relevant State and local domestic violence service providers around the country to more quickly and easily find the most appropriate shelter for families seeking safety from abuse. The highly secure and confidential web site would keep a continuously updated, nationwide list of available shelter for victims of domestic violence and their families. It would also make available to the Hotline and to advocates information about services and facilities offered by these shelters, such as language, disability, transportation and children's services.

In doing so, the new site would ensure that whenever a woman calls the Hotline or a shelter seeking help, the operator can immediately check the web site, get an up-to-the-minute listing of available shelters and services around the country, then, place the caller in the most appropriate shelter to meet her family's needs for safety, location, language and other services without the caller ever having to hang up the phone. The web site will ensure that during one of the most stressful and dangerous times of their lives, victims of domestic violence and their families can get the help they need in a single, easy phone call.

Minnesota's Day One Program, which is the model for this bill, has run a highly successful, confidential web site that links every shelter in Minnesota. Day One has shown what profound benefits this new technology can bring to the lives of battered women and their children. It has broken down barriers families face in their first attempts to find safety, resulting in faster, more appropriate placements. In fact, Day One reports that 90 percent of women and children who call are assured services and shelter in a single call. In other words, when and where they need them most. This is critical since needing to make and receive multiple followup calls to find the most appropriate shelter has been a major barrier for women trying to escape an unsafe situation.

The website helps ensure that women and children are placed in shelters that are best for them, whether that means shelters that are near transportation or a school, shelters that provide language or disability services, or shelters that have special programs for children. Finding shelter in a place where families can get the unique supports that they need also overcomes more of the traditional obstacles to safety.

Having an online network of shelters also allows survivors and their children to relocate to a broader number of areas in the state so that they can be as safe as possible from their batterer, if that is necessary.

The Network also benefits families because it benefits the service providers who help families. The new technology has saved staff time by reducing the number of calls staff has to make to find the best placement for clients. The web site has also opened lines of communication between shelters in

Minnesota and has allowed a better sharing of needs and ideas which has led to better relationships and cooperation between shelters. Further, it has led to expanded documentation of occupancy rates and services needed and provided in Minnesota. In a survey of Minnesota shelters, 95 percent of respondents said that their experience with Day One is "excellent." All of this means better service for battered women and their families.

We have used the most advanced technology to improve education, science, medicine and almost every aspect of our lives. None of us can have failed to recognize the powerful change the Internet has brought to our society. None of us can deny that we must embrace this change and use it to our greatest advantage. The National Domestic Violence Hotline Enhancement Act now will apply America's newest and best technology to help solve one of our nation's oldest, most confounding and brutal problems, domestic violence. This move is long overdue. The National Network to End Domestic Violence estimates that only 43 percent of shelters in the United States have Internet access, leaving well over half of all shelters without services the rest of us have come to think of as routine. In linking the shelters on an electronic network, this bill would help every shelter in the country have Internet access. It gives us the opportunity to use one of the century's greatest advances to save the lives of women and children.

Last year at least 32 women and 10 children were murdered as a result of domestic violence in Minnesota. Across the Nation, a woman is battered every 15 seconds. Three to 10 million children nationally are estimated to witness domestic violence each year, 70 percent of whom are abused themselves. Domestic Violence is in all of our communities. Despite its pervasiveness, there is still nowhere where violence is more isolated from view, more difficult to combat and more far reaching in its impact than violence in the home. It is a problem we cannot afford to ignore. People who will try to keep family violence quiet and hidden behind the walls of the home ignore its tragic echoes in our schools, in the workplace and on the streets.

I do not want to hear one more story about a woman being murdered by her husband or by her boyfriend. I do not want to hear one more story about a woman being beaten, or her child fighting in school because he saw fighting in his home.

If we are going to put an end to this horrible pattern, we must put an end to the pattern where women seek shelter, but give up in frustration when they find none. We must put an end to the pattern that one quarter of homeless people on any given night are victims of domestic violence and their children. This bill is one step in that direction.

Over the past six years, the National Domestic Violence Hotline has received over 500,000 calls from women and children in danger from abuse. If we ensure that a web site similar to the one in Minnesota were made available to all of these families seeking help, so that women can get shelter and services when and where they need it, we could take a strong step to ensuring the safety and well being of hundreds of thousands of families fleeing domestic violence around the country. Technology gives us the tools to help undo one of the greatest wrongs we confront as a society. We cannot turn our backs on this opportunity. I urge my colleagues' support of this important legislation.

Ms. COLLINS. Mr. President, today I join Senators WELLSTONE, KENNEDY, DEWINE, and BAYH in introducing the National Domestic Violence Hotline Enhancement Act. This legislation would authorize the Department of Health and Human Services to oversee the creation of a secure web site that would link every domestic violence shelter and service provider in the United States and the National Domestic Violence Hotline.

The objective is to enable victims of domestic violence and their families who are seeking safety from abuse to more quickly and easily find the shelter and other services they so desperately need. The secure and confidential web site would keep a continuously updated, nationwide list of available shelter and services, such as transportation and children's services, for victims of domestic violence and their families.

Once the web site is operational, whenever a woman calls the Hotline, a shelter or other domestic violence project, the operator can immediately check the site and get an up-to-date listing of available shelters and services around the country. With a single phone call, a victim of domestic violence and her family can be placed in the most appropriate shelter to meet their needs or more quickly obtain the other services that will enable them to escape a dangerous situation.

Domestic violence is the number one cause of injury to women in the United States. In this country, a woman is battered every 15 seconds. It is estimated that one in five women admitted to emergency rooms is there due to battering. Almost one-third of the American women murdered each year are killed by their current or former partners, usually a husband. In the State of Maine, the overall crime rate dropped by 12 percent in 2000, but domestic violence reports increased by 12.5 percent. It is the leading cause of murder in Maine, resulting in over half the state's homicides.

Even when children aren't the target of family violence, those who witness abuse in their homes do not escape unscathed. Tragically, they too are victims, with effects that can include physical, psychological and behavioral problems. Moreover, many of the millions of children who suffer or witness abuse in their homes grow up to perpetuate the legacy of family violence. A report by the American Psychological Association found that a "child's exposure to the father abusing the mother is the strongest risk for transmitting violent behavior from one generation to the next."

According to one estimate by the American Medical Association, domestic violence costs the nation from $5 to $10 billion annually in medical expenses, police and court costs, shelters and foster care, sick leave, absenteeism, and nonproductivity. Add the untold costs in suffering and destroyed lives caused by domestic abuse, and the need to more effectively intervene and break the cycle of violence becomes even more compelling.

Information technology has improved many aspects of our lives in recent years, and it is time we used advances in technology to help victims and break the cycle of domestic violence. The National Domestic Violence Hotline Enhancement Act will do just that by more effectively helping women and children escape unsafe and violent situations.

To achieve the goal of linking the National Domestic Violence Hotline and every domestic violence shelter and service provider on an electronic network, the legislation authorizes the use of funds to provide Internet access and training to shelters that currently do not have the necessary technology. This is a critical element of the bill because only 43 percent of shelters in the United States have Internet access, leaving over half of all shelters without services that many of us now take for granted.

The National Domestic Violence Hotline Enhancement Act would create a national domestic violence website and secure network, and it will give service providers the tools to both contribute to and benefit from that network. By doing so, the bill would help ensure that hundreds of thousands of women and children in need of help to escape violence will find the safety and well-being they deserve. I urge my colleagues to support this important legislation.

By Mr. NELSON of Florida (for himself, Mr. MCCAIN, Ms. LANDRIEU, Mr. CONRAD, Mr. BINGAMAN, Mr. BREAUX, and Mr. JOHNSON):

S. 2003. A bill to amend title 38, United States Code, to clarify the applicability of the prohibition on assignment of veterans benefits to agreements regarding future receipt of compensation, pension, or dependency and indemnity compensation, and for other purposes; to the Committee on Veterans' Affairs.

Mr. NELSON. Mr. President, I rise today to introduce legislation, on behalf of Senators JOHN MCCAIN, Ms. LANDRIEU, Mr. CONRAD, Mr. BINGAMAN, Mr. BREAUX, and Mr. JOHNSON, to protect our veterans from financial predators who offer "instant cash" in exchange for future pensions or disability pay.

Current law prohibits the direct sale of a veteran's pension or disability benefits. These payments are a tax-free, monthly check from the government, meant to provide important financial support to veterans who were disabled or wounded in service to our country. In the State of Florida alone, 245,000 veterans or their survivors received such compensation last year; and the Department of Veterans Affairs paid out nearly $21.3 billion nationwide.

To get this pot of money, some companies have used a loophole that enables them to enter into contract with veterans and offer them "instant cash" in exchange for future benefits.

These contracts require veterans to sign away their disability benefits or pensions for a certain period, often 8 years. In exchange, companies give them a lump-sum cash payment, typically valued at only 30 cents per dollar and in certain cases, companies require veterans to put up collateral, such as taking out a life insurance policy, potentially leaving a veteran's family out in the cold.

The VA has called this practice a "financial scam." The VA Inspector General says: "These schemes seem to target the most financially desperate veterans who are the most vulnerable. For many unsuspecting veterans, these benefit buyouts could be financially devastating." In one case, a veteran received a lump total of $73,000 in return for his monthly benefit checks of $2,700 over 10 years. An annual interest rate of 28.5 percent.

I find this practice reprehensible. The intent of the law that prohibits the assignment of a veteran's benefits is being skirted. My bill expands the definition of assignment of benefits and makes a violation punishable by a stiff fine, and up to 1 year in jail.

The second part of my bill creates a 5-year education and outreach campaign, through the VA, to provide information to veterans about what legitimate financial services are available to them.

The Disabled American Veterans, Paralyzed Veterans of America, Vietnam Veterans of America, and AMVETS have endorsed this bill. I look forward to having the support of this body as we move to better protect our veterans from "instant cash" and other financial schemes.

I would like to conclude with a comment from one of our country's veterans. ". . . My pension isn't a lottery winning. It's an award from the American people for serving my country, and it's appalling to think there are those out there that would rob you of this honor and steal your future."

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2003

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Veterans Benefits and Pensions Protection Act of 2002".

SEC. 2. APPLICABILITY OF PROHIBITION ON ASSIGNMENT OF VETERANS BENEFITS TO AGREEMENTS ON FUTURE RECEIPT OF CERTAIN BENEFITS.

(a) IN GENERAL.—Section 5301(a) of title 38, United States Code, is amended—

(1) by inserting "(1)" after "(a)";

(2) by designating the last sentence as paragraph (2) and indenting such paragraph, as so designated, two ems from the left margin; and

(3) by adding at the end the following new paragraph:

"(3)(A) For purposes of this subsection, in any case where a beneficiary entitled to compensation, pension, or dependency and indemnity compensation enters into an agreement with another person under which agreement such other person acquires for consideration the right to receive payment of such compensation, pension, or dependency and indemnity compensation, as the case may be, whether by payment from the beneficiary to such other person, deposit into an account from which such other person may make withdrawals, or otherwise, such agreement shall be deemed to be an assignment and is prohibited.

"(B) Any agreement or arrangement for collateral for security for an agreement that is prohibited under subparagraph (A) is also prohibited.

"(C)(i) Any person who enters into an agreement that is prohibited under subparagraph (A), or an agreement or arrangement that is prohibited under subparagraph (B), shall be fined under title 18, imprisoned for not more than one year, or both.

"(ii) This subparagraph does not apply to a beneficiary with respect to compensation, pension, or disability and indemnity compensation to which the beneficiary is entitled under a law administered by the Secretary.".

(b) EFFECTIVE DATES.—(1) Subparagraphs (A) and (B) of paragraph (3) of section 5301(a) of title 38, United States Code (as added by subsection (a) of this section), shall apply with respect to any agreement or arrangement described in such subparagraphs, whether entered into before, on, or after the date of the enactment of this Act, and any such agreement or arrangement entered into before the date of the enactment of this Act is void and unenforceable as of such date.

(2) Subparagraph (C) of such paragraph shall apply with respect to any agreement or arrangement covered by such subparagraph that is entered into on or after the date of the enactment of this Act.

(c) OUTREACH.—The Secretary of Veterans Affairs shall, during the five-year period beginning on the date of the enactment of this Act, carry out a program of outreach to inform veterans and other recipients or potential recipients of compensation, pension, or disability and indemnity compensation benefits under the laws administered by the Secretary of the prohibition on the assignability of such benefits under law. The program shall include information on various schemes to evade the prohibition, and means of avoiding such schemes.

(d) AUTHORIZATION OF APPROPRIATIONS.—There is hereby authorized to be appropriated for the Department of Veterans Affairs for each of fiscal years 2003 through 2007, $3,000,000 for purposes of carrying out the program of outreach required by subsection (c).

STATEMENTS ON SUBMITTED RESOLUTIONS

SENATE RESOLUTION 222—COMMENDING AND SUPPORTING THE TROOPS

Mr. DASCHLE (for himself and Mr. LOTT) submitted the following resolution; which was considered and agreed to.

S. RES. 222

Whereas, Al Qaeda, which attacked the United States on September 11 and killed thousands of people, remains a threat to the national security of the United States;

Whereas, the servicemen and women of the United States, who have undertaken more than twenty weeks of courageous and successful operations, are currently engaged in the largest ground combat operation in Afghanistan since the October 7, 2001 start of U.S. and allied military efforts;

Whereas, United States military personnel face tremendous risks in Afghanistan, as evidenced by the fierce attacks that killed at least 8 American servicemen and injured more than 30 American servicemen during the conduct of Operation Anaconda;

Whereas, we are engaged in an unprecedented global conflict, one that presents many new and dangerous challenges to the men and women of the Armed Forces;

Whereas, the Senate has supported all of the President's requests to meet this deadly new threat to world peace;

Whereas, this conflict will require our unflinching resolve, and the first priority of the Congress is to provide our soldiers, sailors, airmen, and marines with the necessary resources and tools required for victory;

Whereas, the United States remains steadfastly determined to bring to justice the perpetrators of the September 11 attacks against America.

Now, therefore, be it

Resolved by the Senate, That

(1) The Senate expresses the gratitude of the Nation to:

(A) The United States Armed Forces who are participating in Operation Enduring Freedom.

(B) The families of American service men and women participating in Operation Enduring Freedom, who have borne the burden of separation from their loved ones, and staunchly supported them during this effort.

(2) The Senate expresses its condolences to the families of the brave American service personnel who have lost their lives defending America in the war against terrorism.

(3) The Senate reaffirms that it stands united with the President in the ongoing effort to defeat terrorism.

SENATE RESOLUTION 223—DESIGNATING MARCH 8, 2002, AS "INTERNATIONAL WOMEN'S DAY"

Mr. BIDEN (for himself, Mrs. BOXER, Mr. DODD, Mrs. CLINTON, Ms. CANTWELL, Mr. CARPER, Mrs. MURRAY, Ms. LANDRIEU, Ms. COLLINS, Mr. FEINGOLD, Mr. KOHL, Mr. HATCH, Mr. BREAUX, Ms. STABENOW, Mr. SCHUMER, Mr. SPECTER, Mr. SARBANES, Mr. WELLSTONE, Mr. KENNEDY, Ms. SNOWE, Mrs. FEINSTEIN, Mr. SMITH of Oregon, Mr. BAYH, Ms. MIKULSKI, Mrs. LINCOLN, Mrs. CARNAHAN, Mr. LEVIN, Mrs. HUTCHISON, Mr. JEFFORDS, Mr. DURBIN, Mr. MURKOWSKI, Mr. DOMENICI, Mr. AKAKA, Mr. KERRY, Mr. STEVENS, Mr. BURNS, and Mr. BINGAMAN) submitted the following resolution; which was considered and agreed to.

S. RES. 223

Whereas all over the world women are contributing to the growth of economies, participating in the world of diplomacy and politics, and improving the quality of the lives of their families, communities, and nations;

Whereas discrimination continues to deny women full political and economic equality and is often the basis for violations of women's basic human rights;

Whereas worldwide the lives and health of women and girls continue to be endangered by violence that is directed at them simply because they are women;

Whereas worldwide violence against women includes rape, genital mutilation, sexual assault, domestic violence, dating violence, honor killings, sexual trafficking in women, dowry-related violence, female infanticide, sex selection abortion, forced pregnancy, forced sterilization and forced abortion;

Whereas worldwide at least 1 in 3 females has been beaten or sexually abused in her lifetime;

Whereas 1 in 6 women in the United States has experienced an attempted or completed sexual assault;

Whereas somewhere in the United States, a woman is battered, usually by her intimate partner, every 15 seconds;

Whereas somewhere in the United States, a woman is raped every 90 seconds;

Whereas it is estimated that 1 in 5 adolescent girls in the United States becomes a victim of physical or sexual abuse, or both, in a dating relationship;

Whereas only 17 countries consider marital rape to be a criminal offense;

Whereas worldwide, women account for almost half of all cases of HIV/AIDS, approximately 32,400,000, and in countries with high HIV prevalence, young women are at a higher risk than young men of contracting HIV;

Whereas worldwide sexual violence, including marital rape, has been denounced as a major cause of the rapid spread of HIV/AIDS among women;

Whereas ⅔ of the world's 876,000,000 individuals who are illiterate are women;

Whereas of the 125,000,000 school-aged children not in school all over the world, ⅔ are girls;

Whereas worldwide girls are less likely to complete school than boys;

Whereas in the United States, in the 3 decades since 1971, the educational attainment rates of females has increased faster than those of males, and by the year 2000, not only did females have higher rates of completing high school and some college, but there were no differences in the percentages of males and females with a bachelor's degree or higher;

Whereas it is estimated that women and their children make up more than 70 percent of the 1,300,000,000 poorest people in the world;

Whereas worldwide, women remain vastly underrepresented in national and local assemblies, accounting for less than 10 percent of the seats in parliament, on average (except for East Asia where the figure is approximately 18 to 19 percent), and in no developing region do women hold more than 8 percent of the ministerial positions;

Whereas illegal trafficking worldwide for forced labor, domestic servitude, or sexual exploitation involves between 1,000,000 and 2,000,000 women and children each year, of whom 50,000 are transported to the United States;

Whereas worldwide women still earn less, own less property, and have less access to education, employment, and health care than do men;

Whereas March 8 has become known as International Women's Day for the last century, and is a day on which people, often divided by ethnicity, language, culture, and income, come together to celebrate a common struggle for women's equality, justice, and peace;

Whereas the dedication and successes of those working all over the world to end violence against women and girls and fighting for equality should be recognized; and

Whereas the people of the United States should be encouraged to participate in International Women's Day: Now, therefore, be it

Resolved, That the Senate—

(1) designates March 8, 2002, as International Women's Day;

(2) reaffirms its commitment—

(A) to ending discrimination and violence against women;

(B) to ensuring the safety and welfare of women; and

(C) to pursuing policies that guarantee the basic rights of women both in the United States and in the world; and

(3) requests that the President issue a proclamation calling upon the people of the United States to observe "International Women's Day" with appropriate programs and activities.

SENATE RESOLUTION 224—DESIGNATING SEPTEMBER 6, 2002, AS "NATIONAL CRAZY HORSE DAY"

Mr. JOHNSON (for himself, Mr. DORGAN, Mr. NELSON of Nebraska, Mr. CONRAD, Mr. BINGAMAN, Mr. BAUCUS, Mr. DASCHLE, Mr. CAMPBELL, and Mr. FEINGOLD) submitted the following resolution; which was referred to the Committee on the Judiciary:

S. RES. 224

Whereas Crazy Horse was born on Rapid Creek in 1843;

Whereas during his lifetime, Crazy Horse was a great leader of his people;

Whereas Crazy Horse was a warrior and a military genius, and his battle strategies are studied to this day at West Point;

Whereas Crazy Horse was a "Shirt Wearer", having duties comparable to those of the Secretary of State;

Whereas it was only after he saw the treaty of 1868 broken that Crazy Horse defended his people and their way of life in the only manner he knew;

Whereas Crazy Horse took to battle only after he saw his friend, Conquering Bear, killed and after he saw the failure of Federal Government agents to supply treaty guarantees such as food, clothing, shelter, and necessities for existence; and

Whereas Crazy Horse was killed at Fort Robinson, Nebraska, on September 6, 1877, when he was only 34 years of age: Now, therefore, be it

Resolved, That the Senate—

(1) designates September 6, 2002, as "National Crazy Horse Day"; and

(2) requests that the President issue a proclamation calling on the Federal Government and State and local governments, interested groups and organizations, and the people of the United States to observe the day with appropriate programs, ceremonies, and activities.

Mr. JOHNSON. Mr. President, I rise today to submit a resolution that will commemorate the life of Crazy Horse. I submit this legislation along with Senators DORGAN, BEN NELSON, CONRAD, BINGAMAN, BAUCUS, DASCHLE, CAMPBELL, and FEINGOLD. Crazy Horse was a great leader of his people, and the designation of September 6 will be the ultimate commendation for his bravery and contribution to Native Americans.

Crazy Horse was born on Rapid Creek in 1843. He was killed when he was only 34 years of age, September 6, 1877. He was stabbed in the back by a soldier at Fort Robinson, NE, while he was under U.S. Army protection. During his life he was a great leader of his people. Crazy Horse was a warrior and a military genius. His battle strategies are studied to this day at West Point.

Crazy Horse was bestowed with the honor of becoming a Shirt Wearer. This honor is comparable to duties like that of the Secretary of State.

Crazy Horse defended his people and their way of life in the only manner he knew, but only after he saw the treaty of 1868 broken. He took to the warpath only after he saw his friend Conquering Bear killed; only after he saw the failure of the government agents to bring required treaty guarantees such as food, clothing, shelter and necessities for existence. In battle the Sioux war leader would rally his warriors with the cry, "It is a good day to fight—it is a good day to die."

Throughout recent history, a memorial commemorating the life of this great warrior is under construction in my State of South Dakota. I would like to take these efforts one step further and designate September 6, 2002, the 125th anniversary of Crazy Horse's death, as "National Crazy Horse Day."

I urge my colleagues to join me in the commemoration of this great hero.

AMENDMENTS SUBMITTED AND PROPOSED

SA 2992. Mr. NELSON of Florida submitted an amendment intended to be proposed to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) to authorize funding the Department of Energy to enhance its mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, and for other purposes; which was ordered to lie on the table.

TEXT OF AMENDMENTS

SA 2992. Mr. NELSON of Florida submitted an amendment intended to be proposed to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) to authorize funding the Department of Energy to enhance its mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, and for other purposes; which was ordered to lie on the table; as follows:

On page 94, between lines 16 and 17, insert the following:

SEC. 5 . REPORT ON MISSILE DEFENSE OF NUCLEAR FACILITIES.

(a) IN GENERAL.—The Secretary of Energy, in coordination with the Secretary of Defense, shall conduct a study of the feasibility and desirability of establishing ground-based air defense missile systems, integrated with the national air defense system under the North American Aerospace Defense Command, at critical nuclear facilities to protect against threats from aircraft.

(b) MATTERS TO BE ADDRESSED.—The study shall include analyses of—

(1) alternative organizations, structures, and equipment to be used in connection with the missile defense systems; and

(2) the utility, suitability, feasibility, risks, and costs of establishing the missile defense systems.

(c) REPORT.—Not later than 180 days after the date of enactment of this Act, the Secretary of Energy shall submit to Congress a report describing the results of the study.

PRIVILEGE OF THE FLOOR

Mr. REID. Mr. President, I ask unanimous consent that Sarah Lennon, a fellow in the office of Senator CARNAHAN, be granted floor privileges during debate on the energy bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS SUBJECT TO THE CALL OF THE CHAIR

Mr. DASCHLE. Mr. President, we will be taking up other business before the end of the day, but until that time, I ask unanimous consent that the Senate stand in recess subject to the call of the Chair.

There being no objection, the Senate, at 11:20 a.m., recessed subject to the call of the Chair and reassembled at 11:50 a.m., when called to order by the Presiding Officer (Mr. WYDEN).

Mr. DASCHLE. Mr. President, there are pieces of business we need to accommodate prior to the end of the session today. All of these matters have the approval of the distinguished Republican leader.

EXECUTIVE SESSION

EXECUTIVE CALENDAR

Mr. DASCHLE. I begin by asking unanimous consent that the Senate proceed to executive session to consider Calendar Nos. 707 through 723, en bloc, that the nominations be confirmed en bloc, the motions to reconsider be laid upon the table en bloc, the President be immediately notified of the Senate's action, any statements thereon appear at the appropriate place in the RECORD, and the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations considered and confirmed en bloc are as follows:

DEPARTMENT OF JUSTICE

Paul I. Perez, of Florida, to be United States Attorney for the Middle District of Florida, for the term of four years.

Eric F. Melgren, of Kansas, to be United States Attorney for the District of Kansas for the term of four years.

Dennis Cluff Merrill, of Oregon, to be United States Marshal for the District of Oregon for the term of four years.

John Schickle, of Kentucky, to be United States Marshal for the Eastern District of Kentucky for the term of four years.

William R. Whittington, of Louisiana, to be United States Marshal for the Western District of Louisiana for the term of four years.

Stephen Gilbert Fitzgerld, of Wisconsin, to be United States Marshal for the Western District of Wisconsin for a term of four years.

J.C. Raffety, of West Virginia, to be United States Marshal for the Northern District of West Virginia for a term of four years.

James Anthony Rose, of Wyoming, to be United States Marshal for the District of Wyoming for the term of four years.

James Loren Kennedy, of Indiana, to be United States Marshal for the Southern District of Indiana for the term of four years.

Theophile Alceste Duroncelet, of Louisiana, to be United States Marshal for the Eastern District of Louisiana for the term of four years.

James Thomas Plousis, of New Jersey, to be United States Marshal for the District of New Jersey for the term of four years.

Charles R. Reavis, of North Carolina, to be United States Marshal for the Eastern District of North Carolina for the term of four years.

Timothy Dewayne Welch, of Oklahoma, to be United States Marshal for the Northern District of Oklahoma for the term of four years.

Michael Robert Regan, of Pennsylvania, to be United States Marshal for the Middle District of Pennsylvania for the term of four years.

Jesse Seroyer, Jr., of Alabama, to be United States Marshal for the Middle District of Alabama for the term of four years.

Gregory Allyn Forest, of North Carolina, to be United States Marshal for the Western District of North Carolina for the term of four years.

John R. Edwards, of Vermont, to be United States Marshal for the District of Vermont for the term of four years.

LEGISLATIVE SESSION

The PRESIDING OFFICER. Under the previous order, the Senate will resume legislative session.

INTERNATIONAL WOMEN'S DAY

Mr. DASCHLE. I ask unanimous consent that the Senate proceed to the immediate consideration of S. Res. 223, submitted earlier today by Senators BIDEN, BOXER, DODD, and others.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 223), designating March 8, 2002, as "International Women's Day".

There being no objection, the Senate proceeded to consider the resolution.

Mr. BIDEN. Mr. President, today I introduced a Senate resolution designating March 8 as International Women's Day. A similar resolution will be introduced in the House of Representatives by Representative SCHAKOWSKY with the support of the Women's Caucus. International Women's Day was first observed in 1909, and since then it has provided an opportunity for us to take a moment to remember, celebrate and honor the remarkable steps women have made in their fight for equality all over the globe. This year, Afghan women are the symbol of International Women's Day. Afghan women are triumphant examples of women empowered and able to transform their lives.

We have much to admire in the courage and endurance of Aghan women. Afghan women withstood for more than 5 years systemic oppression by the Taliban. For more than 5 years, women in Afghanistan—solely because they were women—were silenced, forbidden to enter public life, forbidden to be seen unaccompanied on city streets, forbidden to teach or attend schools, forbidden to seek health care and forbidden to work. If women disobeyed, they were beaten. The threat of violence kept women quiet and compliant.

Since the downfall of the Taliban, the veil has lifted for women in Afghanistan. Today we see news clips of women walking the streets of Kabul without burkas and girls learning to read in a city school. Women are resuming their jobs as teachers, government workers and doctors. The Health Minister in the new interim government is a Tajik woman surgeon from Kabul. There is a new Ministry of Women's Affairs led by Dr. Sima Samar who is steadily pushing and pulling to restore women's rights. These are enormous strides to regain women's rights in Afghanistan and a testament to the strength of Afghan women.

The collaboration, persistence and support of international women's groups to expose the Taliban's oppression should also be recognized. While the plight of Afghan women surfaced on the cover of American magazines only this year, many women's groups have been working on the situation for years—writing letters, pressing for action, and supporting refugees. Indeed, in December, an incredible array of international women's groups gathered in Brussels from all over the world to discuss and strategize ways to change Afghanistan. The international women's community understands that this is a long and complicated process for change, and they remain strongly beside Afghan women. International Women's Day gives us an opportunity to acknowledge their tireless efforts and achievements.

As we have seen in Afghanistan, an essential component to achieving gender equality is ending violence against women—an issue about which I care deeply. Women cannot fully participate in a society when they live in fear of violence. Supporting International Women's Day means supporting an end to violence against women.

Without a doubt, we must start in our living rooms. Unfortunately, there is still much to be done in the United States. But steadily we are making significant improvements. According to United States Justice Department data, the overall rate of intimate partner violence against all females decreased a dramatic 41 percent between 1993 and 1999. I am proud to say that some of the improvements come directly from my bill, the Violence Against Women Act of 1994, and its reauthorization in 2000. We have transformed a "private" family matter into a serious, public crime.

Now we are setting our sights on cultural changes and creating a society that has zero tolerance for violence against women. Men who hit or assault women must become the pariahs of our society. We need to teach our young men and boys that violence against girls is completely and utterly unacceptable. And then spread the word around the globe.

International Women's Day reminds us that as we are fighting to end violence against women in America, we need to extend our reach, and fight violence against all women. The range of gender-related violence is staggering. It occurs in every segment of society, without regard for class, color, ethnicity, or country. The violence includes honor killings, sexual trafficking in women, dowry-related violence, female infanticide, sexual assault, and domestic violence. Studies indicate that 1 out of every 3 women in the world has been battered by an intimate partner. Data on rape indicates that as many as 1 in 5 women worldwide are victims of rape, with young women as the most frequent targets. Women everywhere cannot fully participate in society until the violence ends.

We will get there. Despite the threat of violence, women have made incredible strides. Worldwide, there is a closing gender gap in primary and secondary school education. In 1998, 8 percent of the world's cabinet ministers were women, compared to 4 percent in 1994. All over the world women are actively engaged in the economy as workers, producers, traders, managers, and owners. On International Women's Day let us imagine what women can accomplish when they no longer fear violence.

Mr. President, I sincerely hope that all of my colleagues join me to support this resolution to designate March 8 as International Women's Day, to celebrate the enormous progress of women and to reaffirm our commitment to end violence and discrimination against women.

Mr. FEINGOLD. Mr. President, today I rise to commemorate International Women's Day. For nearly a century, women's groups worldwide have paused on this day to celebrate the achievements and contributions of women around the globe. It is a special occasion to remember the progress women have made and to reflect upon the injustices and hardships women still face in the struggle for total equality.

International Women's Day is recognized in many countries around the world, and in some cases, is celebrated as a national holiday. This past week, the Senate has marked this holiday with a Senate resolution urging the President to designate March 8 as International Women's Day in the United States. Also, in honor of this day, there have been a series of briefings and discussions about violence and discrimination against women for Members of Congress and their staff. I hope my colleagues have had an opportunity to participate in these discussions and view the exhibits.

Women have made tremendous strides in the last century. In the United States, more and more women are attending college and earning postgraduate degrees. Consequently, more women are entering the workforce, and starting their own companies. Women all over the world are increasingly becoming more active in the political process, having earned the right to vote, being elected to office, and appointed to positions of power. In the year 2000, 11 countries were led by women.

In our own country, while much progress has been made in the struggle for equality, there are many cases where women are still at a disadvantage. Women continue to earn less than men. Equal pay for equal work is the law of the land, but that promise remains unfulfilled for many. Although some progress has been made in narrowing the gender wage-gap since Congress enacted the Equal Pay Act in 1963, unfair wage disparities continue to be a problem. Wage discrimination is costing families thousands of dollars each year. I am proud to support legislative efforts to correct this discrepancy.

We cannot forget women and children when the Senate considers reauthorization of Temporary Assistance for Needy Families later this year. Too often, women and children fall through the cracks of the system. While many women are going to work, many have to sacrifice time spent with their children in order to afford child care, education, and health care for their kids.

Unfortunately, violence against women is still all too prevalent in our country. Domestic violence is the leading cause of injury among women of child-bearing age. One out of every six American women have been victims of a rape or an attempted rape. Many rapes go unreported, and more than half of the women attacked knew their assailant. Only recently have states begun to recognize crimes such as stalking or marital rape.

Today, we must also consider the challenges facing women abroad. Women in the developing world are more likely to live in poverty, suffer from malnutrition and lack access to education. Despite the expansion of women's health care research and practices in the last two decades, women still have unequal access to these services.

The HIV/AIDS crisis in Africa is particularly alarming. As chairman of the Senate Foreign Relations Committee's Subcommittee on African Affairs, I have had the opportunity to travel to numerous countries in Africa and see firsthand the devastating toll that HIV/AIDS and other infectious diseases are taking on the people of this continent. According to United Nations reports, over 25 million adults and children in Africa are infected with the HIV virus, the majority of them in Sub-Saharan Africa. Sub-Saharan Africa is the only region in which women are infected with the virus at a higher rate than men. UNAIDS, the United Nations Program on HIV/AIDS, reports that women make up an estimated 55 percent of the HIV-positive adult population in this region, as compared to 47 percent worldwide. Young women are especially at risk. The United Nations reports that in the region girls age 15-19 are infected with HIV at a rate of 15 percent to 23 percent, whereas infection rates among boys of the same age group are 3 percent to 4 percent.

Women in other countries suffer tragic human rights abuses as well. They are victims of domestic violence and illegal trafficking of persons for slavery and prostitution. In some countries, women fall victim to "honor killings," a deplorable practice whereby women are murdered by male relatives for actions that are perceived to bring dishonor to the family.

Rape and sexual assault have often been used as weapons of war. The international tribunals for the former Yugoslavia and Rwanda are setting legal precedents in convicting men for rape, torture, and enslavement of women during times of war or regional conflict. These convictions set an international legal precedent for rape to be considered a crime against humanity.

In the last few months, the whole world has come to understand the treatment and status of Afghan women under the reign of the Taliban. Now, as the Afghan people begin to rebuild and reconstruct their country, it is imperative that women play an integral role in that effort. International aid should be given to help women regain their rights to an education, access to quality health care, and involvement in the political process. Women should be included in all levels of government for the future of Afghanistan. Restoring human rights, and, in particular, women's human rights, is key to Afghanistan's successful reconstruction and the transition to democracy.

The protection of women's rights is vital to the success of promoting fundamental human rights. The United States Senate can work towards protecting women's rights and improving the status of women domestically and internationally by acting upon the United Nations Convention on the Elimination of Discrimination Against Women, or CEDAW. CEDAW is the most comprehensive treaty on women's human rights addressing almost all forms of discrimination in areas such as education, employment, marriage and family, health care, politics and law. It has been over two decades since the United States signed this treaty, and it still awaits consideration before the United States Senate. Once again, I urge the Committee on Foreign Relations to take up this treaty and finally allow the Senate the opportunity to offer its advice and consent on this important convention.

In conclusion, today, as we honor women everywhere and celebrate their accomplishments and contributions to history, we must recognize that there is still more to be done in the struggle for gender equity. Discrimination and violence against women still exist here at home and abroad. The United States and the rest of the international community must reaffirm their commitment to promote gender equality and human rights around the world.

Mr. DASCHLE. I ask unanimous consent that the resolution and preamble be agreed to en bloc, the motion to reconsider be laid upon the table, and any statements be printed in the RECORD, with no intervening action or debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 223) was agreed to.

The preamble was agreed to.

(The resolution is printed in today's RECORD under "Statements on Submitted Resolutions.")

GREEK INDEPENDENCE DAY

Mr. DASCHLE. I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 322, S. Res. 214.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 214) designating March 25, 2002, as "Greek Independence Day: A National Day of Celebration of Greek and American Democracy."

There being no objection, the Senate proceeded to consider the resolution.

Mr. DASCHLE. I ask unanimous consent that the resolution and preamble be agreed to, the motion to reconsider be laid upon the table, and any statements be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 214) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, is as follows:

S. RES. 214

Whereas the ancient Greeks developed the concept of democracy, in which the supreme power to govern was vested in the people;

Whereas the Founding Fathers of the United States drew heavily on the political experience and philosophy of ancient Greece in forming our representative democracy;

Whereas Greek Commander in Chief Petros Mavromichalis, a founder of the modern Greek state, said to the citizens of the United States in 1821, "it is in your land that liberty has fixed her abode and . . . in imitating you, we shall imitate our ancestors and be thought worthy of them if we succeed in resembling you";

Whereas Greece is 1 of only 3 nations in the world, beyond the former British Empire, that has been allied with the United States in every major international conflict for more than 100 years;

Whereas Greece played a major role in the World War II struggle to protect freedom and democracy through such bravery as was shown in the historic Battle of Crete and in Greece, presenting the Axis land war with its first major setback, which set off a chain of events that significantly affected the outcome of World War II;

Whereas the price for Greece holding our common values in their region was high, as hundreds of thousands of civilians were killed in Greece in the World War II period;

Whereas President George W. Bush, in a letter to the Prime Minister of Greece, Constantinos Simitis, in January 2001, referred to the "stable foundations and common values" that are the basis of relations between Greece and the United States;

Whereas President Bush in his January 10, 2002 meeting with the Greek Prime Minister, said, "I am most appreciative of your strong stand against terror. You have been a friend in our mutual concerns about routing out terror around the world," and, "I look forward to the Olympics. It's going to be a magnificent moment for the sporting world to have the Olympics return to Athens. I'm confident your country will do a fine job";

Whereas as a member of NATO, Greece has assigned members of its air force to fly surveillance missions over the United States;

Whereas Greece is a stabilizing force by virtue of its political and economic power in the volatile Balkan region, is one of the fastest growing economies in Europe, and will hold the presidency of the European Union in 2003;

Whereas Greece, geographically located in a region where Christianity meets Islam and Judaism, maintains excellent relations with Muslim nations and Israel;

Whereas Greece has had extraordinary success in recent years in furthering cross-cultural understanding and reducing tensions between Greece and Turkey;

Whereas Greece and the United States are at the forefront of the effort for freedom, democracy, peace, stability, and human rights;

Whereas those and other ideals have forged a close bond between our 2 nations and their peoples;

Whereas March 25, 2002, marks the 181st anniversary of the beginning of the revolution that freed the Greek people from the Ottoman Empire; and

Whereas it is proper and desirable to celebrate with the Greek people and to reaffirm the democratic principles from which our 2 great nations were born: Now, therefore, be it

Resolved, That the Senate—

(1) designates March 25, 2002, as "Greek Independence Day: A National Day of Celebration of Greek and American Democracy"; and

(2) requests that the President issue a proclamation calling on the people of the United States to observe the day with appropriate ceremonies and activities.

HUNGER TO HARVEST: DECADE OF SUPPORT FOR SUB-SAHARAN AFRICA

Mr. DASCHLE. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 262, H. Con. Res. 102.

The PRESIDING OFFICER. The clerk will report the resolution by title.

The legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 102) relating to efforts to reduce hunger in sub-Saharan Africa.

There being no objection, the Senate proceeded to consider the concurrent resolution.

Mr. DASCHLE. Mr. President, I ask unanimous consent that the resolution and the preamble be agreed to, the motion to reconsider be laid upon the table, and that any statements be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (H. Con. Res. 102) was agreed to.

The preamble was agreed to.

RECORD TO REMAIN OPEN

Mr. DASCHLE. Mr. President, I ask unanimous consent that the RECORD remain open today, Friday, March 8, until 2 p.m. for the introduction of legislation and the submission of statements.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMENDING AND SUPPORTING OUR TROOPS

Mr. DASCHLE. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of S. Res. 222, submitted earlier today by the two leaders.

The PRESIDING OFFICER. The clerk will report the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 222) commending and supporting the troops.

There being no objection, the Senate proceeded to consider the resolution.

Mr. DASCHLE. Mr. President, in more than 20 weeks of operations in Afghanistan, our troops have liberated Afghanistan, decimated the Taliban, disrupted al Qaeda operations and captured hundreds of al Qaeda terrorists.

Their success lulled much of the world into thinking that our work in Afghanistan was done. The somber news of earlier this week—that eight of America's finest soldiers had been killed in action—reminds us that there is much to be done in Afghanistan.

Right now, our troops are doing that work. They are engaged in the largest ground offensive of the war, confronting the hardest of the hard core of al Qaeda.

The resolution that we are about to pass reminds our troops that we are thinking of them and are praying for them. The 6-month anniversary of September 11 is next week.

It expresses our condolences to the families of those who have lost loved ones in Operation Enduring Freedom.

And it makes absolutely clear on the 6-month juncture, to the al Qaeda terrorists, and to all who of those who wish to take notes, that we will not stop until they have been defeated.

But this resolution is also important for another reason. On September 14, we voted unanimously to send our troops into action against the perpetrators of the cowardly and heinous attacks on the World Trade Center and the Pentagon. That was our constitutional duty, and it is one that none of us takes lightly.

The soldiers who were killed this week—and in the last twenty-one weeks of Operation Enduring Freedom—died doing the work that we sent them out to do. It is only fitting, then, that we take a moment here in the Senate to thank them and their families and to reaffirm the commitment that we made on September 14—that we will not rest until the perpetrators of the September 11 attacks are brought to justice.

Mr. President, I ask unanimous consent that the resolution and preamble be agreed to, en bloc, the motion to reconsider be laid upon the table, with no intervening action or debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 222) was agreed to.

The preamble was agreed to.

(The resolution is printed in the RECORD under "Statements on Submitted Resolutions.")

ORDERS FOR MONDAY, MARCH 11, 2002

Mr. DASCHLE. Mr. President, I ask unanimous consent that when the Senate completes its business today it adjourn until the hour of 3 p.m., Monday, March 11; that following the prayer and the pledge, the Journal of proceedings be approved to date, the morning hour be deemed expired, the time for the two leaders be reserved for their use later in the day, and the Senate resume consideration of the energy reform bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. DASCHLE. Mr. President, I announced earlier that there will be no rollcall votes on Monday. Many of my colleagues have heard me make similar announcements with some concern for the lost opportunity that these days present. Not having votes means very few amendments are offered. When very few amendments are offered, we lose another critical day in accomplishing all that must be done prior to the coming recess, as well as to the end of this session of Congress.

While there are no votes on Monday, I do hope that Senators will come to the floor and offer amendments so that we might have votes on them Tuesday morning.

Senators should be notified that there will be votes on Tuesday morning. It is my sincere hope that a number of amendments can be offered, considered, and completed in debate on Monday afternoon.

The next rollcall vote will occur on the morning of Tuesday, March 12.

ADJOURNMENT UNTIL 3 P.M. MONDAY, MARCH 11, 2002

Mr. DASCHLE. Mr. President, if there is no further business to come before the Senate, I ask unanimous consent that the Senate stand in adjournment under the previous order.

There being no objection, the Senate, at 11:57 a.m., adjourned until Monday, March 11, 2002, at 3 p.m.

CONFIRMATIONS

Executive nominations confirmed by the Senate March 8, 2002:

DEPARTMENT OF JUSTICE

PAUL I. PEREZ, OF FLORIDA, TO BE UNITED STATES ATTORNEY FOR THE MIDDLE DISTRICT OF FLORIDA, FOR THE TERM OF FOUR YEARS.

ERIC F. MELGREN, OF KANSAS, TO BE UNITED STATES ATTORNEY FOR THE DISTRICT OF KANSAS FOR THE TERM OF FOUR YEARS.

DENNIS CLUFF MERRILL, OF OREGON, TO BE UNITED STATES MARSHAL FOR THE DISTRICT OF OREGON FOR THE TERM OF FOUR YEARS.

JOHN SCHICKEL, OF KENTUCKY, TO BE UNITED STATES MARSHAL FOR THE EASTERN DISTRICT OF KENTUCKY FOR THE TERM OF FOUR YEARS.

WILLIAM R. WHITTINGTON, OF LOUISIANA, TO BE UNITED STATES MARSHAL FOR THE WESTERN DISTRICT OF LOUISIANA FOR THE TERM OF FOUR YEARS.

STEPHEN GILBERT FITZGERALD, OF WISCONSIN, TO BE UNITED STATES MARSHAL FOR THE WESTERN DISTRICT OF WISCONSIN FOR A TERM OF FOUR YEARS.

J.C. RAFFETY, OF WEST VIRGINIA, TO BE UNITED STATES MARSHAL FOR THE NORTHERN DISTRICT OF WEST VIRGINIA FOR A TERM OF FOUR YEARS.

JAMES ANTHONY ROSE, OF WYOMING, TO BE UNITED STATES MARSHAL FOR THE DISTRICT OF WYOMING FOR THE TERM OF FOUR YEARS.

JAMES LOREN KENNEDY, OF INDIANA, TO BE UNITED STATES MARSHAL FOR THE SOUTHERN DISTRICT OF INDIANA FOR THE TERM OF FOUR YEARS.

THEOPHILE ALCESTE DURONCELET, OF LOUISIANA, TO BE UNITED STATES MARSHAL FOR THE EASTERN DISTRICT OF LOUISIANA FOR THE TERM OF FOUR YEARS.

JAMES THOMAS PLOUSIS, OF NEW JERSEY, TO BE UNITED STATES MARSHAL FOR THE DISTRICT OF NEW JERSEY FOR THE TERM OF FOUR YEARS.
